Desert land act	897,160.57	1,170,675.53	1,607,310.22

And various amounts disposed of under special acts, to be found in the Statutes at Large.

The above does not include lands embraced in Indian or military reservations.

RAPID DISPOSITION OF THE PUBLIC DOMAIN.

To June 30, 1883.

(See pages 23 and 26.)

SALES OF PUBLIC AND INDIAN LANDS DURING THE FISCAL YEAR 1881.

During the year ending June 30, 1881, the disposal of public lands under all acts of Congress was 10,128,175.25 acres. The sales of Indian lands to the same period was 765,221.80 acres; a grand total of 10,893,397.05 acres.

*Probably 5,000,000 of acres of this has been commuted into cash payments.

†Grants for universities in Dakota, Montana, Arizona Idaho, and Wyoming, 230,400 acres, added.

The sales of public and Indian lands, during the fiscal year 1881, were in detail as follows:

	Acres.
Cash sales:	
Private entries	666,229.11
Public sales	2,279.40
Timber and stone lands	42,987.92
Pre-emption entries	721,146,26
Desert lands	108,560.02
Mineral lands	27,189.68
Coal lands	4,975.58
Excesses	12,339.06
Abandoned military reservations	1,910.21
Total	1,587,617.24
Homestead entries	5,028,100.69
Timber culture entries	1,763,799.35
Locations with military bounty land-warrants issued under acts of 1847, 1850, 1852, and 1855	55,662.36
Agricultural college scrip locations	360.00
Supreme court scrip locations	28,253.74
Valentine scrip locations	392.15
Sioux half-breed scrip locations	2,519.27
Chippewa half-breed scrip locations	800.00
Locations with Porterfield scrip	16.86
Lands certified or patented for railroad purposes to States:	
Alabama	383.23
Iowa	73,321.58
Minnesota	483,466.63
Kansas	281,277.28
To corporations:	
Pacific railroads	211,992.04
State selections, approved for—	
School indemnity	15,880.00
Internal improvements	1,760.00
Agricultural colleges	1,370.45
Seminaries	3,964.14
Donation claims	18,237.06
Approved to States as swamp	569,001.18
Total	10,128,175.25

Indian lands, sales of, during the fiscal year 1881:	Acres.	
Osage ceded	4,622.21	
Osage trust and diminished reserve	613,951.05	
Kansas trust	25,736.53	
Kansas trust and diminished reserve	18,971.86

Cherokee strip	20,086.12	
Otoe and Missouria	16,036.87	
Cherokee school	240.57	
		765,221.80
Which added to the sales of public lands makes a grand total of		10,893,397.05

SALES OF PUBLIC AND INDIAN LANDS DURING THE FISCAL YEAR 1882.

(*See tabular statement of total dispositions of public lands for the fiscal year* 1882 *facing page* 521.)

Under all acts of Congress during the fiscal year ending June 30, 1882, the disposal of public lands was 13,998,780.27 acres, and of Indian lands 310,386.13 acres, making a total of 14,309,166.50 acres—greater by 3,415,769.35 acres than in the year 1881, and embracing an area almost equal to the total area of the States of New Hampshire, Massachusetts, and Connecticut.

The sales of public and Indian lands during the fiscal year 1882 to June 30 were, in detail, as follows:

Cash sales:	Acres.
Private entries	1,924,496.15
Public sales	7,933.13
Timber and stone lands	95,237.02
Pre-emption entries	1,351,380.85
Desert lands	164,955.94
*Final desert lands	(39,323.11)
Mineral lands	36,768.63
Coal lands	8,634.23
Excess payments on homestead and other entries	19,316.77
Abandoned military reservation	2,808.12
*Commuted homesteads	(376,656.10)
*Act June 15, 1880	(700,727.80)
Total cash sales	3,611,530.94
Homestead entries (original)	6,348,045.05
*Final homesteads	(2,219,427.10)
Timber culture entries (original)	2,566,686.09
*Timber culture, final	(23,371.12)
Locations with military bounty land warrants	43,865.69
Agricultural college scrip locations	1,040.00
Private land scrip locations	10,577.12
Valentine scrip locations	853.47
Sioux half-breed scrip locations	840.00
Chippewa half-breed scrip locations	240.00
Locations with Porterfield scrip	390.79
Lands selected under railroad grants	472,263.88
State, school, and internal improvement selections	276,111.74
Donation claims	18,303.14
Swamp land selections	648,032.36
Total	13,998,780.27

Sales of Indian lands:	Acres.	
Cherokee strip	29,508.02	
Cherokee school	298.65	
Kansas trust	210.72	
Kansas trust and diminished reserve	11,760.30	
Osage trust and diminished reserve	81,817.16	
Osage ceded	3,260.63	
Otoe and Missouria	7,343.57	
Choctaw orphan	160.96	
Pawnee	112,982.80	
Sac and Fox	80.00	
Sioux	62,763.32	
Shawnee absentee	200.00	
		310.386.13

Which added to the disposals of public lands make a grand total of.... 14,309,166.40

Under all acts the entries and dispositions were in fact 17,182,024.33 acres. (See page 524.)

SALES OF PUBLIC AND INDIAN LAND DURING THE FISCAL YEAR TO JUNE 30, 1883.

(*See tabular statement of total dispositions of public lands for fiscal year* 1883, *facing page* 522.)

Under all acts of Congress during the fiscal year ending June 30, 1883, the disposal of public lands was 19,030,796.89 acres, and of Indian lands 399,235.91 acres, a grand total of 19,430,032.80 acres, a total area about equal to the area of the States of New Hampshire, Massachusetts, Connecticut, Rhode Island, and New Jersey, and the largest annual disposition known in the history of the public land system; exceeding 1882 by 5,120,866.30 acres, an area almost equal to the State of New Jersey, and exceeding the business of 1881 by 8,536,635.75 acres, an area about equal to the surface of the States of Delaware and Maryland.

*The areas of homestead entries commuted with cash, and of lands originally entered under the homestead laws but subsequently purchased under the act of June 15, 1880, and the areas of final homesteads, final timber culture entries, and final deserted land entries, are not embraced in the foregoing total, such areas having been previously reported with original entries of the repective classes.

TITLE TO MORE THAN 27,000,000 ACRES OF PUBLIC LANDS INITIATED IN 1883.

This statement only includes actual sales and dispositions. During the fiscal year 1883, in addition to the foregoing and not included in the grand total, title to about 8,000,000 of acres of public lands was initiated, under the several settlement laws, so that, if these filings are consummated and title passes under them, the public land dispositions for the year 1883 will be 27,430,032.80 acres, an area greater by almost 1,000,000 acres than the whole area of the State of Louisiana.

The sales and actual dispositions of public and Indian lands during the fiscal year 1883 were, in detail, as follows:

	Acres.
Cash sales:	
Public sales	273,069.62
Private entries	2,179,955.14
Pre-emption entries	2,285,719.35
Timber and stone land entries	297,735.50
Desert land entries	436,633.69
Mineral entries	31,520.18
Coal land entries	15,612.82
Excess payments on homestead and other entries	25,677.00
Abandoned military reservations	1,695.90
Total cash sales	5,547,610.20
Miscellaneous:	
Homestead entries	8,171,914.38
Timber-culture entries	3,110,930.23
Donation entries	4,132.46
Entries with school warrants	289.85
Entries with military bounty land warrants	45,414.42
Entries with agricultural college scrip	1,440.00
Entries with private land claim scrip (Supreme Court)	10,580.00
Entries with Valentine scrip	2,600.00
Entries with Porterfield scrip	146.87
Entries with Israel Dodge scrip	800.00
Entries with Wilson scrip	80.00
Entries with Sioux half-breed scrip	792.27
Entries with Chippewa half-breed scrip	160.00
State selections (school, swamp, and internal improvement)	214,570.50
Railroad selections	1,919,335.71
Total	19,030,796.89

Indian lands:	Acres.	
Cherokee school	748.84	
Cherokee strip	59,800.09	
Absentee Shawnee	120.00	
Kansas trust	17,836.75	
Miami	4,976.34	
Osage ceded	1,831.73	
Osage trust	224,646.22	
Otoe and Missouria	467.99	
Sac and Fox	118.72	
Sioux	15.531.55	
Pawnee	73,157.68	
Total	399,235.91	
Making a grand total of (acres)		19,430,032.80

Under all acts the entries and dispositions were in fact 22,923,927.89. (See page 525.)

ENTRIES NOT INCLUDED IN THE ABOVE STATEMENT.

The foregoing total does not include the following entries, the areas of which have previously been reported with original entries of the respective classes:

	Acres.
Commuted homesteads	930,876.29
Commuted (act June 15, 1880)	305,243.67
Final desert land entries	55,312.51
Final homestead entries	2,504,414.51
Final timber culture entries	97,836.08
Total areas previously reported	3,893,683.06

TITLES INITIATED NOT INCLUDED IN AREA DISPOSED OF.

In addition to the foregoing, and not included in the totals of lands disposed of, are pre-emption, homestead, and miscellaneous filings, viz:

Number of pre-emption filings	47,933
Number of soldiers' declaratory statements	4,999
Miscellaneous filings	10,232

The area of lands embraced in these filings aggregates 8,000,000 acres.

RECEIPTS FROM AND COST OF THE PUBLIC DOMAIN TO JUNE 30, 1883.

(See pages 18, 19, and 20.)

COST OF THE PUBLIC DOMAIN.

TO JUNE 30, 1880. (See pages 18, 19, 20, and 21.)

FROM MARCH 1, 1784, TO JUNE 30, 1883.

Purchases and cessions		$88,157,389 98
For surveying and disposition:		
Part estimated to June 30, 1880	$46,563,302 07	
From June 30, 1880, to June 30, 1881	2,180,443 86	
From June 30, 1881, to June 30, 1882	2,927,486 04	
From June 30, 1882, to June 30, 1883	3,376,507 13	
		55,047,739 10
For Indians, annuities, and payments on account of quieting and purchase of their titles to portions of the public domain:		
From July 4, 1776, to June 30, 1880	$187,328,903 91	
From June 30, 1880, to June 30, 1881	6,514,161 09	
From June 30, 1881, to June 30, 1882	9,736,747 40	
From June 30, 1882, to June 30, 1883	5,196,218 84	
		208,776,031 24
Total of cost to June 30, 1883		351,981,160 32

RECEIPTS FROM THE PUBLIC DOMAIN.

(See page 17.)

From the origin of the public domain, or since the passage of the ordinance of May 20, 1785, the total net cash receipts therefrom have been as follows:

Gross cash receipts to June 30, 1880		$208,059,657 14
Receipts from June 30, 1880, to June 30, 1881	$5,408,804 16	
Receipts from June 30, 1881, to June 30, 1882	8,394,516 04	
Receipts from June 30, 1882, to June 30, 1883	11,713,883 70	
		25,517,203 90
Grand total of gross receipts		233,576,861 04
Deduct amount paid to the several States under the 2, 3, and 5 per cent. fund acts, to June 30, 1882, when last adjusted (see page 721)	$7,333,069 76	
Deduct cash paid the several States and Territories under the distribution act of September 4, 1841 (see page 753)	691,117 05	
		8,024,186 81
Net receipts by the United States from the public lands, to June 30, 1883		225,552,675 23

COST AND RECEIPTS.

RECAPITULATION TO JUNE 30, 1883. (See page 21.)

From the origin of the public domain to June 30, 1883, the cash expenditures on account of the same by the United States was	$351,981,160 32
From the origin of the public domain to June 30, 1883, the net cash receipts therefrom have been	225,552,675 23
Deduct cost from receipts	126,428,484 89

‡ School warrants.

§ The area of commuted homesteads, final homestead and final desert entries, and area and amount of Indian lands are not included in the grand aggregate.

EXCESS OF COST OVER RECEIPTS.

To June 30, 1883, the public domain has cost the United States in cash $126,428,484.89 more than it has realized.

COST OF THE PUBLIC DOMAIN PER ACRE.

To JUNE 30, 1883. (See page 21.)

The public domain contains, estimated, 1,849,072,587 acres, and has cost $351,981,160.32, or 19 cents per acre.

DISPOSITION OF THE PUBLIC DOMAIN AND PRICE RECEIVED PER ACRE.

To JUNE 30, 1883. (See pages 21 and 519.)

The United States has disposed of, under the several laws enumerated on page 519, estimated, 591,987,814.22 acres of public domain (exclusive of Tennessee), and received therefor $225,552,675.23, or 38 3/10 cents per acre.

DISPOSITION OF THE PUBLIC DOMAIN DURING THE FISCAL YEARS 1882 AND 1883.

The following official tables for the fiscal years ending June 30, 1882 and 1883, show the cost of disposition per acre, the amount received, and the average net proceeds per acre from the sale of the public lands in the several land States and Territories:

DURING THE FISCAL YEAR TO JUNE 30, 1882.

(See pages 23, 24, 518, 520, and 521.)

Amount realized per acre from disposition during the year, 44 7/10 cents.

Statement of the disposals of the public lands during the fiscal year 1882, *with the cost thereof, the amount received, and the average cost per acre of disposals, and the average receipts per acre by the United States.*

States and Territories.	Total area disposed of.	Expenses of sale, including salaries and commissions of registers and receivers.	Average cost of sale per acre at the local land offices.	Area disposed of, less Indian lands.	Amount received from all sources, not including Indian lands.	Average amount received per acre of the public lands by the United States.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., November 23, 1883.

DETAILED STATEMENT OF THE EXPENSES OF THE PUBLIC LAND SYSTEM FOR THE FISCAL YEARS 1881, 1882, AND 1883, TOGETHER WITH THE COST OF DISPOSITION PER ACRE, AND GROSS AND NET RECEIPTS THEREFROM PER ACRE.

Expenses of the land system for the fiscal year of 1881.

Expenses of local offices:		
Salaries and commissions of registers and receivers	$432,879 03	
Contingent expenses	91,423 77	
Expenses of depositing	5,934 24	
Expenses of printing and binding	727 73	
Stationery	5,666 60	
		$536,631 37
Expenses of General Land Office:		
Appraisement and sale of abandoned military reservations	7,297 38	
Salaries	273,139 31	
Depredations on the public timber	29,126 58	
Reproducing plats	24,988 00	
Contingent expenses	24,808 96	
Maps	5,999 75	
Stationery	5,766 77	
Expenses of printing and binding	27,837 09	
		398,973 84
Cost of surveys		1,244,838 65
Total expenses		2,180,443 86
Total receipts for 1881	5,408,804 16	
Deduct sales of Indian lands	1,006,691 63	
Total receipts from public lands	4,402,112 53	
Total expenses of public lands	2,180,443 86	
Net receipts	2,221,668 67	

Disposals for 1881:	Cents per acre.
*10,128,175.25 acres; cost, $2,180,443.86; average cost per acre, .2152 cents	.21$\frac{13}{25}$
10,128,175.25 acres; receipts, $4,402,112.53; average receipts per acre, .4346 cents	.43$\frac{23}{50}$
10,128,175.25 acres; net $2,221,668.67; average net receipts per acre, .2193 cents	.21$\frac{93}{100}$

Expenses of the land system for the fiscal year ending June 30, 1882.

Expenses local offices:		
Salaries and commissions of registers and receivers	$467,843 21	
Contingent expenses	100,000 00	
Expenses of depositing public funds	8,089 10	
Stationery	5,220 93	
Freight on stationery	528 08	
		$581,681 32
Expenses of General Land Office:		
Appraisement and sale of abandoned military reservations	83 41	
Depredations on the public timber	40,000 00	
Reproducing plats	24,000 00	
Salaries	311,485 26	
Contingent expenses	30,137 89	
Maps	6,000 00	
Expenses of printing and binding	12,846 28	
Stationery	6,922 95	
		431,475 79
Expenses of surveys		1,914,328 93
Total expenses		2,927,486 04
Total receipts from public lands	7,759,898 82	
Total expenses	2,927,486 04	
Net receipts		4,832,412 78

*This area does not include final and commuted homesteads nor final desert entries.

Area disposed of, including final and commuted homesteads, final desert and final timber-culture entries, but not including Indian lands, amounts to 17,182,024.33 acres.

Receipts from the disposals of public lands amount to $7,759,898.82, being an average of .4470 or 44$\frac{7}{10}$ cents per acre.

Including all sums paid for surveys during the fiscal year of 1882, 17,182,024.33 acres cost to dispose of $2,927,486.04, being an average of .1686 or 16$\frac{17}{20}$ cents per acre.

The net receipts were $4,832,412.78 for 17,182,024.33 acres, being an average of .2784 or 27$\frac{7}{25}$ cents per acre.

Expenses of the land system for the fiscal year ending June 30, 1883.

Expenses local offices:		
Salaries and commissions of registers and receivers	$491,907 76	
Contingent expenses	119,028 06	
Expenses of depositing public funds	9,961 67	
Stationery	5,592 05	
Freight on stationery	447 36	
		626,936 90
Expenses of General Land Office:		
Appraisement and sale of abandoned military reservations	1,195 09	
Depredations on the public timber	75,000 00	
Protecting public lands	10,618 57	
Reproducing plats	18,000 00	
Salaries	373,121 40	
Contingent expenses	30,735 02	
Maps	6,000 00	
Payment for swamp lands and swamp-land indemnity	14,574 72	
Expenses of printing and binding	18,878 66	
Stationery	5,821 11	
		553,944 57
Expenses of surveys		2,195,625 66
Total expenses		3,376,507 13
Total receipts from public lands	11,088,479 43	
Total expenses	3,376,507 13	
Net receipts		7,711,972 30

Area disposed of, including final and commuted homesteads, final desert and final timber-culture entries, but not including Indian lands, amounts to 22,923,927.89 acres.

Receipts from the disposals of public lands amount to $11,088,479.43, being an average of .48$\frac{9}{20}$ cents per acre.

Including all sums paid for surveys during the fiscal year of 1883, 22,923,927.89 cost to dispose of $3,376,507.13, being an average of .14$\frac{13}{20}$ cents per acre.

The net receipts were $7,711,972.30, being an average of 33$\frac{1}{3}$$\frac{6}{0}$ cents per acre.

THE REMAINING PUBLIC DOMAIN—UNSURVEYED AND SURVEYED AND UNSOLD PUBLIC LANDS.

To June 30, 1882 and 1883. (See pages 15 and 16.)

UNSURVEYED LANDS.

The United States owned to June 30, 1882, 983,068,075 acres of unsurveyed public land, as shown by the official tables of the General Land Office, and on June 30, 1883, owned 928,426,577 acres of unsurveyed public lands and (estimated) 243,666,150.01 acres of surveyed and unsold lands in the public land States and Territories other than the five Southern States. In these (see page 530) the nation, June 30, 1883, owned (estimated) 10,957,983.03 acres of surveyed and unsold land; in all, 254,624,133.04 acres.

THE PUBLIC LANDS REMAINING FOR DISPOSITION JUNE 30, 1883.

Railroad and private land claims grants. One hundred and eighty-nine millions of acres yet to be segregated should be deducted. (See page 531.)

June 30, 1883, the United States owned a total of 928,426,577 acres of unsurveyed lands and 271,382,299.43 acres of surveyed and unsold lands; a grand total of 1,199,808,876.43 acres yet to be disposed of, an area equal to 7,498,805 homesteads of 160 acres each. This estimate is probably within 10 per cent. of the actual amount, official, legal, and other reasons preventing a closer estimate.

THE UNSURVEYED PUBLIC LANDS.

JUNE 30, 1882, AND JUNE 30, 1883.

The unsurveyed public lands, June 30, 1883, were 928,426,577 acres, lying in the following public land States and Territories:

States and Territories.	1882.	1883.
	Acres.	*Acres.*
Alabama		
Arkansas		
California	40,495,097	36,768,921
Colorado	19,627,440	15,458,256
Florida	7,659,507	7,549,562
Illinois		
Indiana

Public land strip*		3,672,640
Total	983,068,075	928,426,577

*The public land strip was not taken up in the General Land Office tables until 1883.

THE SURVEYED AND UNSOLD PUBLIC LANDS.

TO JUNE 30, 1883. (See pages 15, 529, and 530.)

The United States, to June 30, 1883, owned 243,666,150.01 acres of surveyed and unsold public lands lying in the public land States and Territories other than in the five Southern States. The surveyed and unsold lands in these States are estimated at 10,957,983.03 acres; or, in all, 254,624,133.04 acres of surveyed and unsold lands.

This estimate is probably within 10 per cent. of the exact amount. A large area of the above may now be held by persons holding under the effect of the doctrine of the Supreme Court of the United States in Atherton *vs.* Fowler and Hosmer *vs.* Wallace, decisions which should long ago have been set aside by legislation. (See note on page 15.)

TO JUNE 30, 1882, AND JUNE 30, 1883.

(See pages 15 and 16.)

The surveyed and unsold lands lie in the following States and Territories (estimated):

Land States and Territories.	Surveyed and unsold lands to June 30, 1880.	Public lands surveyed in 1881.	Public lands surveyed in 1882.	Total to June 30, 1882.	Area disposed of from July 1, 1880, to June 30, 1882.	Area surveyed and undisposed of to June 30, 1882.	Public lands surveyed in 1883.	Area surveyed to June 30, 1883.	Area disposed of from July 1, 1882, to June 30, 1883.	Area surveyed and undisposed of to June 30, 1883.

*An error of 500,000 acres. Add lands in five Southern States.

Official:
GENERAL LAND OFFICE, *November* 12, 1883.

TOTAL AREA OF SURVEYED AND UNSOLD PUBLIC LANDS IN THE SOUTHERN STATES.

To June 30, 1883. (See page 16.)

The total amount of land, surveyed and unsurveyed, owned by the United States in the five Southern States, to June 30, 1880, including 1,148,892 acres in Louisiana and 7,756,493 acres in Florida unsurveyed, was estimated at 25,585,641 acres.

SURVEYED AND UNSOLD LANDS IN SOUTHERN STATES.

The area of these lands were estimated, June 30, 1880, to be about 16,680,256 acres, as follows:

	Acres.
Florida	3,205,109
Alabama	3,516,140
Mississippi	3,208,887
Arkansas	4,620,120
Louisiana	2,130,000
Total	16,680,256

The unsurveyed lands in Florida and Louisiana noted above, viz, 8,905,385 acres, makes the total June 30, 1880, 25,585,641 acres.

June 30, 1883, the surveyed and unsold lands were estimated at 10,957,983.03 acres, which, with the unsurveyed lands, makes 18,620,645.93 acres of public lands in the five Southern land States.

ESTIMATED AREA REMAINING JUNE 30, 1883.

UNSURVEYED LANDS.

June 30, 1883, the unsurveyed public lands in the South were 7,549,562 acres in Florida and 123,091 acres in Louisiana; in all, 7,672,653 acres remaining unsurveyed.

THE SURVEYED AND UNSOLD LANDS REMAINING JUNE 30, 1883.

The sales or disposition of public lands in the five Southern States for the three years since 1880 were as follows:

States.	1881.	1882.	1883.	Total.
	Acres.	*Acres.*	*Acres.*	*Acres.*
Florida	148,652.92	516,001.64	452,263.08	1,116,917.64
Alabama	412,229.71	418,329.07	346,630.79	1,277,189.57
Mississippi	131,055.89	358,217.21	517,737.36	1,007,010.46
Arkansas	437,295.43	426,747.81	461,215.87	1,325,259.11
Louisiana	119,063.31	508,703.94	488,129.04	1,105,896.29

Deducting the above from the area surveyed and unsold June 30, 1880, as given above, the remaining area would be as follows:

AREA OF REMAINING PUBLIC LANDS SURVEYED AND UNSOLD AND UNSURVEYED IN THE SOUTH JUNE 30, 1883.

States.	Surveyed and unsold.	Unsurveyed.	Total surveyed and unsurveyed.
	Acres.	*Acres.*	*Acres.*
Florida	2,088,191.36	7,549,562	9,637,753.36
Alabama	2,238,950.43		2,238,950.43
Mississippi	2,201,876.54		2,201,876.54

THE REMAINING PUBLIC DOMAIN.

Total area of the public domain	1,849,072,587
Acres for disposition (estimated), including Alaska, June 30, 1883.	1,010,808,876.43
Acres for disposition (estimated), exclusive of Alaska, June 30,1883	641,284,276.43

Alaska, estimated, 369,524,600 acres.

1

2

Remainder for disposition June 30, 1883, lying in the public land States and Territories, estimated at 641,284,276.43.

3 4 5 6 7

Area estimated as necessary, June 30, 1883, to fill land grants to railroads, viz, 109,000,000 acres, and 80,000,000 acres to fill private land claims; in all, 189,000,000 acres.

Total area disposed of under all laws from 1785 to June 30, 1883, estimated at 620,000,000 acres. See page 519.

	Acres.
1. The purely agricultural lands remaining in the West (estimated)	5,000,000
2. The desert lands (estimated)	440,000,000
3. The irrigable lands (estimated)	29,000,000
4. Lands in five Southern States, agricultural, timber, and mineral (estimated)	18,000,000
5. The precious metal and mineral lands (estimated)	64,000,000
6. The coal lands, to be increased by discoveries	10,000,000
7. The timber lands (the estimate on page 1053, to December 1, 1883, most correct, viz, 73,000,000 acres)	75,000,000

Alaska is not estimated or considered in the above tables. A thorough survey and exploration of this division is necessary, and would be of great value.

CHARACTER OF THESE LANDS.

The public lands in these five Southern States are now sold at the district land offices at $1.25 per acre in unlimited quantities, provided they conform to legal subdivisions. They are the only public lands of any moment which can be bought for cash without settlement. Holding the "public lands for actual settlers" does not apply to the South.

These lands contain timber, coal, iron, and other valuable deposits, and are about all of the purely arable lands the nation has left, outside of Dakota and one or two other Western States and Territories.

ESTIMATED CHARACTER, QUANTITY, AND VALUE OF THE PUBLIC DOMAIN REMAINING JUNE 30, 1883.

(See pages 25 and 26.)

The remaining public domain, including Alaska, consists of (estimated) 1,199,808,876.43 acres. (See page 527.) Deducting Alaska—viz, 369,524,600 acres—there remain 830,284,276.43 acres, inclusive of Indian and military reservations. From this should be deducted the area necessary to fill private land claims, estimated at 80,000,000 acres (see page 1151), and the area requisite to complete land grants to railroads, estimated in round numbers at 109,000,000 acres (see page 753); in all, 189,000,000 acres to be deducted. Exclusive of Alaska, and deducting the area yet to be segregated for railroad and private land claim grants, there remain 641,284,276.43 acres of unsurveyed and surveyed lands for disposition (see page 527); with Alaska, 1,010,808,876.43 acres for actual disposition, estimated as follows:

Kinds of land.	Area, in acres.	Value per acre.	Total value.
The timber lands (Estimate to Dec 1, 1883, pages 1053 and 1082, most correct, viz, 73,000,000 acres.)	75,000,000.00	At $2.50 per acre. If the timber is sold and the fee remain in United States, the area of lands for disposition will be largely increased.	$187,500,000
The coal lands. Dakota and other recent discoveries increase the actual area, which will be constantly increased until all lands are surveyed.	10,000,000.00	At average of $13 per acre. Medium between $10 and $20 per acre as shown by sales.	130,000,000
Precious metal lands, containing mines. To be largely increased by explorations and surveys. (See map facing page 979.)	64,000,000.00	At average of $3.50 per acre. shown by medium between $2.50 and $5 per acre.	224,000,000
The purely arable lands remaining in the West (estimated). Generally in isolated tracts.	5,000,000.00	At $1.25 per acre. If taken under present settlement or disposition laws, nothing; survey and disposition will eat up fees and commission.	6,250,000
The lands in the five Southern States Surveyed, and vacant on the records; some, however, occupied and the unsurveyed.	18,000,000.00	At $1.25 per acre. Present selling price. If confined to the homestead act, nothing above cost of survey and disposition.	22,500,000
Irrigable lands. Under desert-land act which may be irrigated from present water supply. Much of this, however, may be at present held by locators.	29,000,000.00	At $1.25 per acre, present law. If given for reclamation, nothing above cost of survey and disposition will be realized.	36,200,000
The remainder, desert lands (see page 1104). And all others, including pasturage and reservations, estimated at 350,000,000 acres (see page 1104). This estimate includes the area of military reservations, 3,155,152.76 acres; also, Indian reservations, estimated to contain 135,993,101 acres, two-thirds of which will eventually be restored to the public domain for sale, if the present policy continues. This area also contains	440,284,276.43	At $1.25 per acre, present price, round numbers. If disposed of under actual settlement laws, nothing will be realized above cost of survey and disposition, except the undeveloped mineral lands to be hereafter disposed of under the mineral laws. The grazing lands are estimated, exclusive of the minerals underlying them, at not more than 10 cents per acre.	551,000,000
		In all	1,157,500,000

Estimated character, quality, and value of the public domain, June 30, 1883—Continued.

Kinds of land.	Area, in acres.	Value per acre.	Total value.
a vast amount of precious metals, coal, iron, copper, and other valuable minerals. Also, the unsurveyed portion of Indian Territory, viz, 17,150,250 acres. The area required to fill private land claims and railroad land grants are estimated for at the head of this statement.		Deduct cost of surveying and disposition of the remainder of the public lands, based upon former costs (see page 19).....$40,000,000 Less quieting Indian title to public lands, estimated 38,000,000	$78,000,000
Grand total, exclusive of Alaska	641,284,276.43	Estimated value, June 30, 1883.....	1,079,500,000

Estimated total value under present laws, exclusive of Alaska.....	$1,079,500,000
The area at present held under various laws and yet to be paid for, and the money for which will be covered into the Treasury of the United States, is estimated in value at.....	10,000,000
Which added to the above would make the total value.....	1,089,500,000

It has required since 1785 to sell and dispose of a less quantity of the public land than the above estimates cover; besides, the agricultural lands are now about absorbed, and the movement westward in search of free Government lands must soon cease. It will require a vastly greater period of time to dispose of the remaining public domain than the ninety-eight years that were requisite to dispose of the lands sold prior to June 30, 1880. Mineral lands require long periods to develop, and timber lands require a market for their product. If the present laws as to sale and disposition continue in force, no reasonable estimate of the time required to dispose of the remaining public lands can be made. Reorganization of the land system, as to sales and disposition, and an accounting of and definition of the character of the remaining public lands, are now required to secure proper results in the future.

A thorough and exact examination of Alaska by competent persons is of moment, and is necessary for the purpose of giving the Government full details and information as to the mineral and other resources of that region.

Private enterprise will best develop the possibility of reclaiming the desert lands of the public domain. The United States, in view of the results of the swamp-land grants, would best part title direct to the desert lands. If granted free of acreage in sufficient quantity, these lands may be developed by private interests.—(From edition of 1880; see page 27.)

In the near future, with the absorption of the purely arable lands, cash receipts from sales of public lands under settlement laws will be small, and the chief reliance will be sales for mineral, desert, and timber lands, and the land system, after the year 1890, will probably never again be self-sustaining, considering the annual charges incurred on account of the Indians, unless some plan of general disposition of the pasturage lands in large areas be enacted by Congress.

CASH RECEIPTS AND RECEIPTS FOR FEES AND COMMISSIONS FOR THE YEARS 1881, '82 AND '83.

WITHOUT CASH SALES THE LAND SYSTEM WOULD BE IN ACTUAL ARREARS.

The following tables of the receipts and expenditures on account of the public lands for 1881, '82, and '83 are given to show that without cash sales the land system—relying on fees and commissions under the settlement laws—would have been in actual arrears:

Actual cash sales.	From receipts, cash and fees and commissions.	Deduct sales of Indian lands.	Actual receipts from sales or disposition of public lands.
1881 (see page 517) $3,534,550.98	$5,408,804 16	$1,006,691 63	$14,402,112 53
1882 (see page 518) $6,628,775.02	8,394,516 04	634,619 22	7,759,898 82
1883 (see page 518) $9,657,032.21	11,713,883 70	625,404 27	11,088,479 43

Actual cash sales.	Actual expenses (see pages 527, 528).	Excess of receipts over expenditures for public lands.	Actual cash sales.	Actual fees and commissions under settlement laws.
1881 (see page 517) $3,534,550.98	$2,180,443 86	$2,221,668 67	$3,534,550 98	$867,561 55
1882 (see page 518) $6,628,775.02	2,927,486 04	4,832,412 78	6,628,775 02	1,131,123 80
1883 (see page 518) $9,657,032.21	3,376,507 13	7,711,972 30	9,657,032 21	1,431,447 22

When the present useless and vicious disposition and cash sales laws are repealed, and actual settlement and residence laws are passed, the public lands as shown by the above tables for three years past will probably cease to yield any net revenue, as fees and commissions will be the only cash received. Cash sales are now more than three-fourths of the revenues received from the sales or disposition of the public lands. It will require wise and careful legislation to prevent the public land system from becoming a yearly drain in the near future upon the National Treasury.

The tables above show that without the cash sales receipts and relying upon the fees and commissions, which are the only charges to applicants under the settlement laws, and deducting one-half of the annual total expenses, the land system would have been in arrears during the three years past.

The total annual expenses of the General Land Office and its agents, exclusive of surveys, are about $1,000,000. Considering the vast jurisdiction of this Bureau this amount cannot be reduced, and should be increased.

THE NECESSITY FOR CHANGES IN EXISTING LAND LAWS.

HOW THEY CAN BE EFFECTED.

December 1, 1883.

The public lands are the property of the people. They are an asset. The policy has been in the main to dispose of them under various laws to the people and foreigners as the wants and necessities of the times demanded; now and then a bad law has crept in. The nation is interested in a proper, just, and equitable distribution of these lands. Individual homes are essentials, and for these the public lands should be kept. One hundred and sixty acres was determined upon after many years as the true unit of disposition for a home. Upon this area the country settled. The abuse of this is shown on page 1159; 1,120 acres to a person under the several laws is now the rule, and a million acres at $1.25 per acre, if you have the money, in the South. It is of the highest national importance that not another acre of the public lands shall be sold outright for cash, warrants, or scrip. All of the laws permitting this should be swept away and the warrants and scrip redeemed with money.

VIEWS OF THE SECRETARY OF THE INTERIOR AS TO HOW AGRICULTURAL LANDS SHOULD BE DISPOSED OF.

Hon. H. M. Teller, Secretary of the Interior, in his report for 1883, says:

Public lands, suitable for agriculture, should be disposed of only to the actual settler under the homestead laws. A strict compliance with the law should be required in all cases. No greater calamity can befall a country than to have the land owned by the few and thus compel the masses of the people to become the tenants of such land owners. It has been the policy of the Government heretofore to so distribute the public land among the people in such quantities as would enable all desiring to engage in agriculture to do so as land owners and *not* as renters. As the country grows rich the tendency is to aggregate the lands in the hands of a less number of people; this is an evil with which the General Government is not called to deal after it has parted with the title to its lands, but as the owner of the public land, held for the people of the United States, it becomes the duty of the Government to see that the laws intended to secure a fair distribution of these lands are strictly enforced.

PUBLIC LANDS ARE NOW SOLD FOR CASH AT PRIVATE SALE AND IN UNLIMITED QUANTITIES.

The public do not seem to know that at this hour thousands of acres of public lands are being entered at United States district land offices, with cash, in unlimited quantities by the favored few who have the money, lands which should be reserved for homes for actual settlers. An equal and fair distribution of the privileges of the public land by proper and wise laws is demanded. The Government is too often a

myth when self-interest stands in view. The Executive officers can go but so far; Congress is the sole power to stop the leaks, and repeal existing useless laws. Petitions will be of great service, as recommendations by Executive officers have thus far failed to obtain legislation.

HOW MUCH PUBLIC LAND ONE PERSON CAN TAKE UNDER EXISTING SETTLEMENT AND DISPOSITION LAWS, DECEMBER 1, 1883.

To show the full operations of the existing settlement and disposition laws, the following is taken from a work published by Henry N. Copp, esq., of Washington, one of the best known of land law book publishers, and an authority on such subjects. The book is entitled the "American Settlers' Guide, a Popular Exposition of the Public Land System of the United States."

To obtain the largest amount of land from the Government at the least cost, a party should first enter 160 acres under the pre-emption laws, which will cost $1.25 or $2.50 an acre, can be paid for at end of 6 months; then enter 160 acres more under the homestead laws, can be paid for or commuted at end of 6 months, and also make entry of 160 acres under the timber-culture laws, where the land is naturally devoid of timber, can hold with a pre-emption or homestead; 480 acres will thereby be secured at an average cost of about 50 cents an acre.

The usual way is to make an entry under the homestead laws, and at once another entry under the timber-culture laws, because it is cheaper to do so, and there is no delay to prove up under the pre-emption laws—320 acres will thereby be obtained at a cost of $36 for fees and commissions—which is equal to about 11 cents an acre.

An entry can thereafter be made under the desert-land laws of 640 acres, and one entry is allowed under each of the several laws mentioned herein. Under the mining laws as many entries are allowed as a party owns legal claims.

After an entry has been made under the pre-emption, homestead, and timber-culture laws, the same person may buy as much land at public sale and private entry—also of the State government, corporations, and individuals—as his means and inclination permit.

INFORMATION AS TO USELESS AND VICIOUS LAND LAWS.

(See pages 682 to 685 and 1163 to 1167.)

Officers charged with the immediate care of the public lands have reported against the pre-emption, timber culture, private deposit survey, the timber and stone, and desert land acts, and in favor of vital amendments to the homestead acts. Special agents of the General Land Office have reported against these laws, and their reports are on file—why cannot they be repealed or amended? Where can information be found as to frauds under and the uselessness of these laws? In the General Land Office at Washington, D. C., in the Department of the Interior, corner of Seventh and F streets. Why should not a committee of the House and Senate send for Noah C. McFarland, Commissioner, Luther Harrison, chief clerk, and the chiefs of the several divisions of the General Land Office, and see which the bad and inefficient land laws are, and send for the official papers on file in that office, showing enormous frauds.

HOW CAN REPEAL BE AIDED?

In the minds of many publicists and Congressmen there is an impression that only the persons who live upon or nearest the public lands can speak best as to the laws applying to them. This limited view of the matter in the past led to much legislation dictated or proposed by in some cases a single person, and he sometimes an interested party, or the friend of such parties. Railroads and other quick means of communication have somewhat changed this, and exclusive knowledge upon any public land matter is no more the property of the few. The numerous papers spread information and speak with the aid of the telegraph each morning to the entire country. The traveling correspondent ferrets out byways to explore and strange facts and fancies to write about. The public lands have attracted much attention for several years past, and the press and official reports have published many startling statements as to frauds committed under and the practical operations of the several public land laws. The intelligent action of fair-minded men of the entire nation should be directed to the repeal and amendment of obnoxious land laws. The press can be the great lever to lift these laws from the statute books, aided by earnest efforts of men who believe that the public lands should be fairly distributed among legal settlers, and that one hundred and sixty acres of arable land, a tract one quartar of a mile square,

is sufficient for any one person under one settlement law. An equivalent to one hundred and sixty acres of arable land should be given in a larger area of desert or irrigable lands. It could be called a "Desert Land Homestead."

LEAKS WHICH SHOULD BE STOPPED.

The cry of "Corporations are absorbing the public lands" does for a better, and is wide apart from the truth. No grants of public lands have been made to corporations by Congress since 1872.

The grants already made and set out on page 268 herein will not increase in area, but, on the contrary, will decrease, as official examinations are made and judgments rendered on list of railroad or wagon-road lands offered for patents. Congress and the courts could have settled all of these questions years ago. Congress alone can initiate any legal methods toward the forfeiture, revocation, or recall of these grants. The courts can then say how far such proceedings can be had.

The present settlement and disposition laws are the cancers that are eating up the public lands. "One hundred and sixty acres is enough for a person" became a settled idea in past land legislation. The pre-emption act initiated this area of holding. The homestead act gives this amount as a bounty to a person for making a home. How many of our active publicists know that at this hour any person, male or female *citizen above the age of twenty-one years*, or a male or female person, who have just filed their first naturalization papers, can have benefit of settlement and other laws, so that their holdings will be 1,120 acres, or can buy a million acres of offered public lands at $1.25 per acre in some Western and in the five Southern States?

Why not stop screaming at a shadow and just for once strike at a bit of substance?

THE PUBLIC LANDS VIRTUALLY RESERVED FOR FOREIGNERS.

The preference right to public lands in favor of foreigners who had declared their intention to become citizens of the United States began in the pre-emption acts in 1838. A vote was had in the Senate during the debate on the pre-emption act of June 22, 1838, on motion of Mr. Merrick, of Maryland, to confine the benefits of the act to citizens of the United States. It failed. See page 214 herein for details.

The enormous emigration of the past five years has called attention to this feature of our land laws. An inspection of the initiatory papers filed in the district land offices in the West and Northwest in land filings will confirm the repeated statement that more than one-third of all foreigners who now come to America enter upon the public lands. The frequency with which a X signs the papers, and the appalling length and queerness of almost unpronounceable names, bear witness to the need for interpreters and translators in the land service.

All foreigners (except Chinamen and African negroes) who have declared their intention to become citizens of the United States can at once, upon landing and paying a small fee for his or her first papers to the clerk of a court of record, file a claim for public lands, provided they be heads of families or above the age of twenty-one years, while American-born boys and girls must stand by and wait until they are twenty-one years of age before they can file a claim for an acre of their country's public lands! "Cheap and free lands in America" has been the cry Europe over for twenty years past. The ocean steamship lines and the railroads leading to the West have agencies in the principal cities of Europe, and their advertisements in the papers and handbills present glowing accounts of the liberality of the Government of the United States, who are thirsting to present gentlemen and ladies who will emigrate to this favored land with a home of 160 acres of land free of cost.

The arid regions of the West become in these advertisements areas of broad glowing bearing fields, where the ripening grains, waving in the tropic sun, bows a stately welcome to the oppressed, poverty stricken, or ambitious. The boundless sage brush plains become orange groves, and the region from where the coyote flies in howling pangs of hunger, is known as the banana belt of the growing northwest; the blizzard and the norther, zephyrs of pure delight, and the lack of water a cause for congratulation, because there will be no swamps to produce ague.

To be and expectant Senators and Representatives of yet to come States, usually

a little over three-fourths of the male population of a rising territory, anxious for enough citizens to warrant an admission into the Union, welcome these aids to political ambition and assist them to homes from the nation's lands. These foreign advertisements are a great means of inducing the rush to America. Forty dollars will bring a British subject from Liverpool and place him on the public lands in Dakota. Five dollars will pay the fee for making him the first portion of a citizen of the United States, and from three to twelve pay the first fee in a district land office for a farm of 160 acres of public land. If he desires to tarry a time to see the beauties of the metropolis—say that he lands at New York City—he can pay his five dollars to the clerk of a court in that city, inclose his first papers with his application and the fee to a United States district land office in the West, under several of our convenient settlement laws, and thus secure his claim. After awhile he can proceed to his farm in the West so liberally provided by a generous Government. When this feature of pre-emption for aliens was adopted immigration was limited, and it was not anticipated that before the year 1883 it would be so great in one year—as in 1882, viz, 788,992—that it would exceed the total population of the States of Oregon, Nevada, Delaware, Rhode Island, and Colorado in one year.

Race traditions, as shown by opinions and political views of the descendants of original settlers, will be the greatest danger the Republic will have to meet. A nation's people should own its lands. A person on a farm is sure of a living; his or her overplus is a contribution to the wealth of the whole people, and the surplus crops of our farms become aids to the world's medium of exchange. Our American farms, peopled by American farmers, have been the producers of the strong and useful men and women who manage and control the business and the affairs of the nation. It is not a rash estimate to say that almost one-third of our public lands now go to persons who are not citizens of the United States and, under many land laws, need not be to perfect title. We can continue to furnish not only well-ordered, safe Government, with equal chance in the fight for competence and wealth, to all foreigners except Chinaman and African negroes, but is it wise or necessary to give them a land bounty in consideration of their having the kindness to come over and declare their intention to become citizens. Should not our efforts be to the depopulating of our cities and large and overcrowded communities, and the moving of our surplus home population westward to homes on the public lands, where they can become self-sustaining citizens and an element of security and wealth. The Anglo-Saxon, Slavic, and Teutonic races who have come in the past have easily assimilated into reliable citizens; what of the Latin race just starting westward? what of the Italian—80,000 in 1882, 90,000 in 1883? Why should we give them a land bounty for coming?

President James Buchanan, in his veto message of the Homestead Act, June 22, 1860, speaking of the provision therein giving the benefits of the act to unnaturalized foreigners (which is also part of the existing law), said:

We ought ever to maintain the most perfect equality between native and naturalized citizens. They are equal, and ought always to remain equal before the laws. Our laws welcome foreigners to our shores, and their rights will ever be respected. While these are the sentiments on which I have acted through life, it is not, in my opinion, expedient to proclaim to all the nations of the earth that whoever shall arrive in this country from a foreign shore, and declare his intention to become a citizen, shall receive a farm of 160 acres at a cost of 25 or 20 cents per acre. * * *

The act of 1862, now in force, enacted all of the objectionable features of the vetoed act of 1860, with the addition of "a person," male or female.

FRAUDS UNDER EXISTING LAND LAWS, AND WHEN DOES OR SHOULD GOVERNMENT LAND TITLE PASS.

The present system of laws seems to invite fraud. You cannot turn to a single state paper or public document where the subject is mentioned for the year 1883, from the message of the President to the report of the Commissioner of the General Land Office, but what statements of "fraud" in connection with the disposition of the public lands are found.

Hon. Henry M. Teller, Secretary of the Interior, in his report for 1883, says:

The attention of the Department has been called to the frequent frauds committed by parties securing lands under existing settlement laws without a compliance there-

with. In very many cases there is not even an attempt to comply with the laws. When the country was new, and the parties desiring to secure land comparatively few, it is believed that these laws were complied with in most cases when land was entered, but as the demand for land has increased, it seems as if the people are restless under the restraint imposed on them in securing land, and they go to work systematically to defeat the very purpose of the law. The homestead and pre-emption laws, designed to secure to the actual settler lands at a reasonable price, have become agencies by which the capitalist secures large and valuable areas of the public land at but little expense.

WHEN DOES TITLE PASS?

The parties thus securing land without a compliance with the terms of the law rarely hold the title thereto for any considerable time. In many cases, doubtless, such conveyances are made for the purpose of placing the title in the hands of those not connected with the frauds practiced at the time of entry, and in other cases from a desire to realize the value of the land. Much embarrassment arises from the attempt on the part of the Department to avoid such fraudulent entries. No difficulty is found where the parties making such fraudulent entries still hold the title, but in case there has been a transfer for a valuable consideration without notice of the fraud, great injustice is done to the purchaser by disturbing the title which he had no reason to suppose was fraudulent. Where the fraud is discovered before the issue of the patent the Department finds no difficulty in canceling the entry, but where such entries have passed to patent resort must be had to the courts. In some cases fictitious names are used in the entry, and under a well-known principle of law no title passes by such entry and patent. On the records of the United States, as well as in the local office of record, there appears to be a good title in the patentee for the premises described in the patent. The local records show a conveyance to some one who professes to be the owner; on the strength of such patent and the conveyance under it, for a valuable consideration, a conveyance is made to a *bona fide* purchaser who subsequently finds his title attacked by the Government. If it is clearly established that the grantee in the patent had no existence, the title is held to be in the Government, and the purchaser has no remedy except against the vendor, who is usually impecunious, and not infrequently has left the country. It would appear to be right that after a certain time the presumption should be conclusive that the patent was issued in strict accordance with law, and there should be no inquiry into the proceedings anterior to the time of issue.

The portion of the above relating to the question of the efficacy of a patent obtained by fraud is a serious one.

Under all of the settlement or disposition laws (see page 1162) the register, at the time of applicant or claimant making purchase or proof completing his part toward a title, issues a certificate which recites the law and other details, and concludes in substance in all final certificates as follows:

Now, therefore, be it known that, on presentation of this certificate to the Commissioner of the General Land Office, the said ——— ——— shall be entitled to a patent for the tract of land above described.

——— ———, *Register.*

No reservation whatever. This form came from the pre-emption act or cash-purchase law prior to 1841, when there were no conditions of law as to settlement, residence, and cultivation. It was used under the pre-emption act of 1841, and is still, where residence, cultivation, and improvements are required. After the homestead act of May 20, 1862, was passed, and forms were made under it, this certificate was continued.

WHEN DOES TITLE TO GOVERNMENT LANDS PASS?

No State or Territory can tax the public lands of the United States until title passes from it. The improvements may be taxed but not the lands. It is the custom, however, sanctioned by usage and law, to list and tax the land as soon as applicants receive, under any law or laws, the register's certificate for patent, issued at the district land office. This the United States has thus far consented to. If title does not pass until the patent issues at the General Land Office at Washington, what right or authority have States or Territories to tax the land, for if the register's certificate does not pass the title of the United States to the land, then the land should not be taxed, because the title is yet in the Government, and so remains until the patent issues.

The existing doubt is usually construed by the public and courts (see Judge Sawyer's Opinion, page 1171 herein, on a suit to set aside a patent obtained by false

swearing) on the side of the applicant or purchaser. If the law was not complied with by the applicant, an innocent purchaser years afterwards may be brought into court in equity to defend title to his land. The surest way to cure this defect is to repeal the laws suggested as worthy of repeal. Enact a simple disposition law, such as an amended homestead law, and declare that the title goes with the act of proof of compliance and issuing of register's certificate for patent, with a reasonable time for action by the General Land Office. Unless some such act is passed, a fine assortment and collection of suits for fraud are in store, and attorneys can fatten on reluctant clients to be drawn into court to answer the suits of a negligent Government. This question should be settled.

For method and manner of taxation and for citations of authorities as to when a State may tax public lands, see page 239.

A MULTITUDE OF FORMS.

At present the public-land system requires a multitude of forms and regulations.

The catalogue of blanks and blank books for the Department of the Interior for 1882–'83 contains a list of blanks used in and by the land service, covering 23 pages—from page 85 to 108—and recording more than 800 numbers for blanks, books, and circulars. For forms used in land entries see as follows: For pre-emption, page 638: for homestead, page 1032; for desert-land act, page 1106; for timber and stone act, page 1086; for timber-culture act, page 1091; for mines, page 1013; for cash entries, page 1159.

In the face of the known fraud in land entries, some of the affidavits and blanks used under the settlement laws are almost ludicrous. The fewer and simpler the laws the less blanks and forms required for entry and the fewer false oaths by applicants.

PATENTS.

A patent for public lands should be free of conditions and embarrassments. It should be, as it was intended to be, a deed in fee.

It is the general opinion that a patent for public lands is in fact a fee, without limitations or conditions. This is an error, and how serious a one can be seen by reference to page 356, where the form of a homestead patent is given in full; page 216, for form of a pre-emption patent; pages 329 and 330, for forms used for placer and vein mineral claims, and pages 973 to 976, for substance of patents for town sites. When some of the present settlement and disposition laws are repealed or amended, the United States land patent can be made a fee in fact. The present numerous and varied kinds are great aids to litigation, especially the patents for mining claims and town sites.

When the word "patent" is used, a deed or fee is understood. The nation should give a warranty deed or one in fee, as it is the sole owner or proprietor, instead of one form of patent, or one form for the several different classifications of land, which would be at most seven different patents. We find that at present the General Land Office issues under the several land laws 57 different patents. The list is given in full.

Department blanks (Department of the Interior) used in the General Land Office.

UNLAWFUL OCCUPATION OF THE PUBLIC LANDS.

(See also page 1168 herein.)

An immediate necessity exists for the passage of a law to prevent the unlawful occupation of the public lands. The effect of the decision of the Supreme Court of the United States in Atherson *vs.* Fowler (6 Otto, 543), and in Hosmer *vs.* Wallace (7 Otto, 575), has been to turn over a large portion of the public lands to such as may want them, with the right of holding against the United States or persons claiming under the Government. These decisions have been court law for more than three years. The laws of Congress, however, are the other way. A new act should be passed with provisions for punishment and penalties for the unlawful occupation of the public lands. The following report by Mr. T. M. Rice, from the House Committee on the Public Lands, January 12, 1883, Forty-seventh Congress, second session, House of Representatives, Report No. 1859, is given in full.

LEGISLATION NECESSARY.

[Report to accompany bill H. R. 7244.]

The Committee on the Public Lands, to whom was referred the bill (H. R. 3560) to prevent the unlawful occupation of the public lands, report back said bill with a substitute, the passage of which is recommended.

In California and in others of the States and Territories, as is made to appear to the committee, large tracts of the public lands have been inclosed by sheep and cattle rangers, who have no title, but, finding the lands vacant, have inclosed them with fences and use them for purposes of pasturage.

These lands, so unlawfully held, are legally subject to pre-emption and homestead entry, and but for this unlawful adverse occupation would be eagerly sought and entered by the home-seekers now flocking into the West. But finding the land in the occupation of another, the homesteader or pre-emptor is thereby, under the rulings of the courts, prevented from making homestead or pre-emption entry.

The Supreme Court of the United States in the case of Atherson *vs.* Fowler (6 Otto, 513), and the subsequent cases of Hosmer *vs.* Wallace (7 Otto, 575), and Trenouth *vs.* San Francisco (10 Otto, 251) has held that no right of pre-emption can be established by a settlement and improvement on a tract of public land which is in the possession of another who has inclosed, settled upon, and improved it.

In Hosmer *vs.* Wallace the court says:

"To create a right of pre-emption, there must be settlement, inhabitation, and improvement by the pre-emptor, conditions which cannot be met when the land is in the occupation of another. * * * Under the pre-emption laws, as held in Atherson *vs.* Fowler, the right to make a settlement is to be exercised on unsettled lands; the right

to make improvements is to be exercised on unimproved land; and the right to erect a dwelling house is to be exercised on vacant land. None of these things can be done on land when it is occupied and used by others."

In Trenouth *vs.* San Francisco the court says:

"The right of pre-emption, under the laws of the United States, cannot be acquired by intrusion and trespass upon lands in the actual possession of others."

From these quotations, it is apparent that the Supreme Court intended to deny the right to pre-empt when there was *actual* possession in another, without regard to the character of the possession, whether lawful or not.

And so the supreme court of California understands those decisions, as will be seen from their language in the case of Davis *vs.* Scott (6 Pac. Law Journal, 699):

"As the land was in the *actual* possession and occupation of the plaintiff at the time defendant attempted to locate a pre-emption claim thereon, it was not, therefore, subject to pre-emption."

Under the operation of these decisions the trespasser is enabled to hold and keep from settlement and improvement large areas of the public lands. If the pre-emptor attempts to enter into possession he is proceeded against as a trespasser for invading the possession of another. If he seeks to defend on the ground that he is a pre-emptor, and the lands are legally subject to pre-emption, he is met with the decisions of the courts that, inasmuch as these lands are and were, when he attempted to make pre-emption or homestead entry, in the possession of another, his entry and possession is of no force or effect. Thus he is deprived of any standing in court to assail the possession of the real trespasser.

The substitute provides a simple procedure by which the occupant can make entry, filings, and declarations to acquire title to such part of the tract as he could enter under the laws, and prevents his holding a larger quantity and thereby thwarting the beneficent operation of the laws framed for the benefit of actual and *bona-fide* settlers."

CHANGES IN EXISTING LAND LAWS.

THE PRE-EMPTION ACT.

(See pages 678–682 and 1163, 1209.)

The pre-emption act and amendments should be repealed. Its chief value now is to illegally acquire public lands. It aids in the increase and growth of perjury. For details as to recommendations of officials and the action of Congress in favor of this repeal, see references above.

Enacted long prior to the homestead law of 1862, it was, in fact, supplanted by it. All of its best and useful features are now in the homestead act.

It is stated by land officers that more than one-half of all the entries under the pre-emption act are fraudulent. The lands for which this and the present homestead act were framed are now about exhausted; and changed condition of affairs now exists.

THE HOMESTEAD LAWS

(See pages 679–683 and 1163, 48, 1220.)

Should be consolidated into one act, with a provision for five years' settlement, then title to pass free; or, if at the end of two years, the homesteader desires, he or she can pay for the land at $1.25 per acre. The five years' residence clause in the present law grew out of the fact that foreigners who had filed their intentions to become citizens and then filed a homestead, have to wait five years to become citizens, so as to obtain title by residence, and unless the right of such to file claims is abolished, or the term of residence required for citizenship is shortened, the present rule must stand.

The Indian homestead clause, on pages 1032 and 1045–'6, should remain, with the proviso that Indians entering such lands should not be charged for filing, and the fees of local offices should be paid by or credited to them by the General Land Office. A desert homestead, 640 acres or more, should be provided for in lieu of present desert-land law.

The existing timber-culture provision could be retained. (See 2317 R. S.)

MINING LAWS.

(See page 1220.)

The present mining laws relating to the precious metals will, in the near future, have to be materially changed, when other classes of public lands are exhausted and attention is given to the subject. A short and sharp conclusion will be reached, and essential amendments will be made—changes for the better security of title and respect for the rights of property. They and the timber lands are in the future to become the chief source of supply of cash from sales of public lands.

The coal lands are sold at too high a price, $10 and $20 per acre; $5 would seem to be enough. Gold and silver lands are sold for this amount.

THE PASTURAGE LANDS.

The great area of pasturage land in the desert region, now the property of the nation, more than 300 millions of acres, are a free zone for millions of cattle and thousands of herders, holding title to ranges by mere occupancy and to the herds by brands and marks and consent and agreement between herd-owners. The value of these lands for grazing purposes is considerable; for any other surface use at present, nothing. Underlying these are vast measures of coal and other minerals, so that if these lands are sold for a nominal acreage the coal and other minerals would probably go with them. Scattered here and there over them are springs and water holes. These have been entered under the homestead or pre-emption acts. The ownership of the water on the plains and pasturage lands controls the land. The land is useless without the water. A spring, water hole, or river front will control the pasturage lands for miles. These have almost all been entered under the settlement laws.

Artesian wells may settle the future of these lands. Government experiments, however, in this direction thus far have not resulted satisfactorily.

This valuable interest should be protected by law, and in some manner security of title for occupancy, for a time at least, should be secured to cattle-owners.

The settlement and disposition laws are now used to capture the water, and thus control the lands. These lands must be sold or leased or remain as they are. (See Ex. Doc. No. 46, Forty-sixth Congress, second session, for testimony and suggestions as to these lands and the cattle-raising industry.)

THE DESERT-LAND ACT.

(See pages 1165, 1221.)

The desert-land act has become an aid to land-grabbing. It should be repealed or a larger area given under it. The act is nearly, if not quite, useless for the actual settler, from the fact that poor men cannot irrigate by means of expensive ditches, and men of means cannot afford to dig ditches for so small an area on account of the cost. In the opinion of many, the claims entered under this act were meant by the law to be assignable, but Secretary Schurz ruled otherwise.

We now guard the desert lands with scrupulous care; perhaps we are waiting for climatic changes to make them arable. It is a great pity that the same care was not taken with the swamp lands. We gave millions of acres of swamp lands, because they could not be cultivated, to persons who would reclaim them to agriculture by taking water from them, while under the desert-land act we charge persons for uncultivatable lands and make them pay $1.25 per acre for the privilege of spending large sums of money to reclaim them to agriculture by the introduction of water. In one case we gave them the land for reclamation; in the other we make them reclaim the land at a vast expense and pay the Government for the privilege.

THE TIMBER-CULTURE LAW

(See Pages 681, 683, 1088, 1164, and 1221.)

Should be repealed. Its use is to fraudently enter public lands. For entries, see pages 1089 to 1090 and page 1290.

The entries under this act in *Kansas* alone up to 1883, were 23,942, containing 3,832,636.44 acres. Under this act, to June 30, 1883, there have been 101,358 entries, containing 16,768,076.70 acres. Surely the cry that our forests are being destroyed is of small value when the enormous timber crop that is coming on under these entries

is considered. We are growing on public lands (on paper) timber for the world. Unfortunately the humor of this law can readily be seen when it is known that but 500 of these claims have been proved up or shown to contain cultivated timber, containing in all 97,836.08 acres.

Dakota is to become the future timber reserve under this law.

In 1882, in Dakota 9,368 entries were made, containing 1,466,532.39 acres. Four claims were paid for; that is, four persons showed that they had complied with the law, containing 521.68 acres. In 1883 there were 11,199 timber-culture entries in Dakota—timber culture probably being more profitable than wheat growing—containing 1,755,419.58 acres. During the same period 111 persons showed that they had complied with the law and made final entries of 14,968.12 acres.

The two tables of total disposition of public lands for the year 1882 and 1883, in detail printed herein, can be studied with profit as to all of the settlement and disposition laws. Minnesota, Kansas, Nebraska, and other tree and treeless States have entered enormously into the growing of timber.

An area more than twice as large as all New England is now by law and on paper raising timber for the future. (See pages 1089–90 and 1290 for tables.)

The timber-culture act can fairly be titled "An act to loan to any person 160 acres of public land for eight years without fear, favor, or supervision."

The existing homestead act contains a timber-culture provision. (See 2317, R. S. U. S., and page 361, herein.)

TIMBER LANDS.

(See pages 1049, 1081, and 1165.)

The timber lands should be sold, and a law should be passed to this effect. Will not private ownership, self-interest, best protect this class of lands?

At present a force of special timber agents (see page 1051) are employed under the direction of the Commissioner of the General Land Office, charged with the care of the timber lands. The force is self-sustaining so far as money is concerned, but it is un-American and unpopular. The necessity for it is due to the fact that there is no general law for the disposition of the timber lands of the United States. The statements of these agents are, of course, *ex parte*, and the public are not in love with nor do they yield willing obedience to them. Persons do not usually depredate upon the public timber for mere wantoness, but frequently they are forced to become depredators through want of the timber for actual or commercial use, and the lack of a law for its sale.

RECOMMENDATIONS AS TO LEGISLATION FOR THE SALE AND CARE OF TIMBER LANDS.

The Public Land Commission, in its report, February 21, 1880 (H. Ex. Doc. No. 46, second session, Forty-sixth Congress, with testimony as to these lands), speaking of the timber lands, recommended the passage of a law for the sale of the public timber and graduating the price.

DETAILS AS TO LACK OF TIMBER LAWS.

Referring to the timber-lands question and the above suggested law, the Commission used the following language, which is of value, because the situation December 1, 1883, is the same as at the date of the report.

It is proper to say that much difficulty is encountered in trying to suppress depredations upon the timber on the public lands.

The difficulties arise from a variety of causes, chief among which has been and still is the impossibility of purchasing, in a straightforward, honest way from the Government, either timber or timber-bearing lands.

Until a very recent date, no public lands in the States of Arkansas, Louisiana, Mississippi, Alabama, or Florida could be procured in any other manner than by a compliance with the homestead law. This condition of the law was the primary cause of thousands of fraudulent homestead entries. It was no uncommon thing for one person or one firm engaged in the timber or turpentine trade to procure to be made large numbers of homestead entries with apparently no intention of complying with the law. So far as relates to the States mentioned, this condition no longer exists, as the lands have all been brought into market under the act of June 22, 1876, and rendered subject to sale at $1.25 per acre at private entry, and consequently depredations on the timber in those States have, to a very great extent, ceased.

Until the passage of the act of June 3, 1878, entitled "An act for the sale of timber lands in the States of California, Oregon, Nevada, and in Washington Territory" there was no manner by which timber or timber lands in either of the States or the Territory mentioned could be obtained excepting by settlement under the homestead and pre-emption laws, and by the location of certain kinds of scrip and additional homestead rights, which cost several dollars per acre.

Settlements upon timber-bearing lands in the States and Territory mentioned in the act, under the homestead and pre-emption laws, are usually a mere pretense for getting the timber. Compliance with those laws in good faith where settlements are made on lands bearing timber of commercial value is well-nigh impossible, as the lands in most cases possess no agricultural value, and hence a compliance with the law requiring cultivation is impracticable.

The commission visited the red-wood producing portion of the State of California, and saw little huts or kennels built of "shakes" that were totally unfit for human habitation, and always had been, which were the sole improvements made under the homestead and pre-emption laws, and by means of which large areas of red-wood forests, possessing great value, had been taken under pretenses of settlement and cultivation which were the purest fictions, never having any real existence in fact, but of which "due proof" had been made under the laws.

In some sections of timber-bearing country where there should be, according to the "proofs" made, large settlements of industrious agriculturists engaged in tilling the soil, a primeval stillness reigns supreme, the solitude heightened and intensified by the grandeur of high mountain-peaks, where farms should be according to proofs made, the mythical agriculturist having departed after making his "final proof" by perjury, which is an unfavorable commentary upon the operation of purely beneficent laws.

The law of June 3, 1878, is onerous, and ameliorates the condition existing before its passage but very little, if any; something further is necessary.

Another act was approved on the 3d of June, 1878, entitled "An act authorizing the citizens of Colorado and the Territories to fell and remove timber on the public domain for mining and domestic purposes," by the provisions of which settlers and other persons may take timber for mining and agricultural purposes from mineral lands.

The provisions of this law, when understood, mean but very little. *Timber may be taken from mineral lands.* Perhaps not one acre in five thousand in the State and Territories named is mineral, and perhaps not one acre in five thousand of what may be mineral is known to be such. The benefit of this law to the settlers is better understood when these facts are known.

The whole subject-matter of existing laws in relation to the sale or disposal of timber-bearing lands may be briefly stated, as follows:

Timber lands in the States of Arkansas, Louisiana, Mississippi, Alabama, and Florida may be bought for cash by any persons in any quantities, or may be taken under the homestead and pre-emption laws.

In such parts of the States of Michigan, Wisconsin, Minnesota, and Missouri as contain public lands, which are at the same time agricultural and timber lands, the title may be obtained only under the homestead and pre-emption laws.

There is no way provided by law for disposing of lands which are chiefly valuable for timber of commercial value in those States, as it must be conceded by all that the homestead and pre-emption laws apply only to lands valuable for agriculture.

In the States of California, Oregon, and Nevada, and in Washington Territory, timber lands can be bought by certain persons, under certain onerous conditions, in quantities not exceeding one hundred and sixty acres.

In the States of Nevada (both the laws approved June 3, 1878, are applicable to this State) and Colorado, and in all the Territories except Washington, any person may cut and remove all the timber he may need for mining and domestic purposes from *mineral land.* This law, strictly observed, would not confer any benefit upon one in one thousand of the inhabitants. There is no other law by or under which timber or timber lands can be procured in the States and Territories last above named.

The population of two States and seven Territories should not longer be compelled by the laws of the country to be trespassers and criminals on account of taking the timber necessary to enable them to exist, as is the condition to-day, and as it has been, according to law, ever since settlements were commenced, or since the policy of selling lands for cash has been abandoned by the Government.

LEGISLATION RECOMMENDED, 1883.

Attention is called to the recommendation of Commissioner McFarland, in his annual report for 1883, page 9, for the necessity of prompt legislation as to the sale or disposition of the timber lands.

THE TIMBER AND STONE ACT.

(See pages 689, 1046, 1086, and 1221.)

The data as to the necessity of amendment or repeal of this law, together with details of its practical operation, will be found on the pages above cited.

PUBLIC LANDS IN THE FIVE SOUTHERN STATES.

At the close of the war of the Rebellion, the President, by proclamation June 13, 1865, ordered the reopening of the United States district land offices in the States of Louisiana, Florida, Arkansas, Mississippi, and Alabama. Congress, June 21, 1866, directed that all public lands in those States should be reserved for settlement under the homestead act of May 20, 1862. The obtaining of these lands by the landless class of the South was considered essential to their future welfare and that of the Nation. Congress therefore enacted that they should only be entered under the homestead law, and, changing the rule, fixed the maximum acreage to be entered by a person at 80 acres. This was to continue until June 21, 1868. Under this law to June 30, 1883, the homestead entries have been as follows:

FROM JUNE 26, 1866, TO JUNE 30, 1883.

States.	Original entries.	Quantity.
		Acres.
Alabama	31, 207	3, 142, 279. 21
Arkansas	47, 975	4, 449, 567. 94
Florida	18, 036	1, 956, 227. 07
Louisiana	10, 901	1, 297, 620. 32
Mississippi	13, 845	1, 342, 117. 35
	121, 964	12, 187, 811. 89

One hundred and twenty-one thousand nine hundred and sixty-four homes started and initiated, containing 12,187,811.89 acres, an area almost equal to the surface of the States of Connecticut, Massachusetts, and New Jersey.

Considering the lack of immigration into these five States, the above results of the homestead act were gratifying, and the poor and landless class of that section were acquiring homes and becoming self-supporting.

THE LAW CHANGED, AND PUBLIC OFFERING AND PRIVATE CASH ENTRIES ARE AUTHORIZED.

Congress enacted—which enactment became a law June 22, 1876, by the non-approval of President Grant—that all of the public lands in the five Southern States should be brought into market by proclamation for sale at public offering (see pages 206 and 207), to be followed by private cash entry.

THE ACT IN FULL.

[R. S. 2303, p. 424, repealed July 4, 1876.]

CHAP. 165.—An act to repeal section two thousand three hundred and three of the Revised Statutes of the United States, making restrictions in the disposition of the public lands in the States of Alabama, Mississippi, Louisiana, Arkansas, and Florida.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section two thousand three hundred and three of the Revised Statutes of the United States, confining the disposal of the public lands in the States of Alabama, Mississippi, Louisiana, Arkansas, and Florida to the provisions of the homestead law, be, and the same is hereby, repealed: *Provided,* That the repeal of said section shall not have the effect to impair the right, complete or inchoate, of any homestead settler, and no land occupied by such settler at the time this act shall take effect shall be subject to entry, pre-emption, or sale: *And provided,* That the public lands affected by this act shall be offered at public sale, as soon as practicable from time to time, and according to the provisions of existing law, and shall not be subject to private entry until they are so offered.

SAMUEL S. COX,
Speaker of the House of Representatives, pro tempore.
T. W. FERRY,
President of the Senate, pro tempore.

Received by the President June 22, 1876.

[NOTE BY THE DEPARTMENT OF STATE.—The foregoing act, having been presented to the President of the United States for his approval, and not having been returned by him to the House of Congress in which it originated within the time prescribed by the Constitution of the United States, has become a law without his approval.]

It was claimed that the passage f the act of June 22, 1876, would enable persons to at once acquire titles to homes without waiting the long period required under the homestead act. Besides it was urged that, as much of this land was covered with valuable timber, the Nation would secure a greater price than $1.25 per acre, it being

worth a great deal more at public sale. This was and always is mere subterfuge. It is a cunning device to pass a cash or private sales law. Hardly a member of Congress could or can be found who would introduce a bill to sell public lands outright for money, in unlimited quantities, to citizen or alien. The acts of June 22, 1876, and March 3, 1883, were in fact just such laws, with this difference, that they put the Nation to an enormous expense for advertising the public sales, about equal to $500,000, in the South, which would not be necessary if the law was a plain spoken cash sale act. Pages 206 to 208, show the existing procedure in public offering and sale of public lands.

The sales are advertised; a few persons come to the land office where offered; scarcely any one bids. The lands thus become offered, are so marked on the plats, and are thereafter sold for cash in unlimited quantities at $1.25 per acre. This is going on at this date in the Southern States, and especially in Alabama, under the act of March 3, 1883. Several offerings are now advertised for January 7, 1884. Any person, citizen, or alien, can at this hour buy a million acres of the public lands, not occupied by settlers, in any of the five Southern States, at $1.25 per acre—timber, mineral, and agricultural.

PUBLIC OFFERING IN THE SOUTHERN STATES A MERE TECHNICAL EXPRESSION.

Millions of acres of public lands have been offered at public sale at auction in the five Southern States since 1876. This method of sale came into effect during the old cash-sale period prior to 1841. It has become a fixture of the public land system on account of precedent, but with no reason or value. To show what a farce this is, the statistics of such sales for 1882 and 1883 are given:

Sales of lands at public sale offering and private cash entry, or purchase of such lands after being offered and not sold, in the five Southern States, for the fiscal years 1882, 1883.

States.	1882.			1883.		
	Sold at public offering.	Amount.	Actual cash sales after being offered at public sale, private entry.	Sold at public offering.	Amount.	Actual cash sales after being offered at public sale, private entry.
	Acres.		*Acres.*	*Acres.*		*Acres.*
Alabama			57,438.83	40.11	$50 14	70,265.52
Arkansas	772.36	$1,059 53	57,172.57	2,177.68	2,922 10	106,671.87
Florida	1,174.37	1,552 55	128,873.42	220.99	590 44	221,853.15

THE SPECULATORS AND LARGE HOLDERS EARNESTLY AT WORK.

This bad policy of selling the public lands in the South at private sale—for cash at private sale—in unlimited quantities, can be seen in the steady gain of the area of cash purchases over the area taken under the homestead act.

States.	1882.		1883.

AREA OF PUBLIC LANDS IN THE SOUTH JUNE 30, 1866, WHAT HAS BEEN DONE WITH THEM, AND AREA REMAINING JUNE 30, 1883.

In 1866 it was estimated that the United States owned more than 40,000,000 of acres in the five Southern public land States, or an area quite equal to the States of South Carolina, West Virginia, and Connecticut.

WHAT HAS BECOME OF THEM.

In round numbers, thirteen millions of acres of this area have been disposed of to June 30, 1883, under the homestead, pre-emption, mineral and coal acts; about 8,000,000 acres have been sold for cash; about 18,000,000 of acres were still the property of the Nation June 30, 1883.

RAPID DISPOSITION PROBABLE IN 1884.

Of the amount remaining, judging by the disposals from June 30, 1883, to December 1, 1883, 3,500 of acres will be disposed of during the year to June 30, 1884. The sales under the Alabama mineral act of March 3, 1883, may run this up to 4,000,000 of acres, of which more than a half will probably go into the clutches of speculators.

THESE LAWS SHOULD BE AT ONCE REPEALED.

The act of July 4, 1876, or June 22, 1876, page 545, and the Alabama act of March 3, 1883, page 980, should be at once repealed. They do violence to the views of the majority of the people, are for the use and benefit of capitalists and speculators, and are against sound public policy. These lands, about all of the remaining purely agricultural public domain, and some covered with valuable timber, should be held for actual settlers, under the homestead act. Such as are purely timber lands should be disposed of under a new and general timber disposition law.

The Alabama act of March 3, 1883.—The Alabama public land act, given in full on pages 980, 981, should be at once repealed.

The mineral lands thrown open by this act to purchase at private sale in unlimited quantities at $1.25 per acre, are of great value, and embrace from two to five hundred thousand acres. Being found to contain valuable minerals, iron, and coal, the Commissioner of the General Land Office, as was his duty by law, after examination by experts of his office, withdrew them from public and private sale and entry under the homestead act, to the end that the nation might get the legal price, per acre for the lands, the same exacted for mineral and coal lands in other public land States and Territories. Besides, large areas of this land had been entered under the homestead act, in the face of a non-mineral affidavit taken in each case. A curative act (the law contains such a clause), if Congress found equity existing, would have reached this class of entries, and relieved the actual settlers without throwing open the entire area known to be mineral to private entry. It was alleged that interested parties, capitalists, for their own benefit, had caused homestead entries to be made by persons employed for the purpose; these entries were suspended by the General Land Office. Congress was then asked to aid in the acquirement of title by these principals. For almost two years a constant attempt was made to pass this law in the 47th Congress. Active, earnest legislators watched it closely, and tried to prevent its passage. The Commissioner of the General Land Office, the officer charged with the direct control of the disposition of the public lands, did not recommend its passage, but on the contrary distinctly stated in substance that he was not prepared to recommend so radical a change in the method of disposition of the public lands. The title of the act has no reference in fact to the text of the bill. It is, "An act to exclude the public lands in Alabama from the operations of the laws relating to mineral lands."

The title should have been "An act to sell all mineral lands of the public domain in Alabama as agricultural lands, and at private sale at $1.25 per acre in unlimited quantities to any person or persons," citizens or aliens. For this is the effect and the result of the act.

The law contains this proviso, "*Provided, however*, that all lands which have heretofore been reported to the General Land Office, as containing coal and iron, shall first be offered at public sale." The meaning of this was and is that such lands shall be sold at private sale, cash entry (see page 1159), nothing more or nothing less, and under this clause the lands are now being offered by President's proclamation. A

ew acres will be sold at public sale, but, as a result of the offering, it being the purpose, an enormous area will be sold in legal subdivisions, at private sale, to any person in unlimited quantities for cash. This law was originally introduced in the House of Representatives as H. R. No. 19, 47th Congress, 1st session, December 13, 1881.

It should be repealed along with the act of June 22, 1876, and before much serious harm may have occurred under its provisions.

Why should the public coal lands be sold for $10 and $20 per acre in Colorado, Utah, and other land States and Territories as they are, and for $1.25 per acre in Alabama, as this law orders they shall be sold? Why should iron lands be sold for $2.50 to $5 per acre in California and Idaho as "valuable mineral deposits," and in other land States and Territories as they are, and for $1.25 per acre in Alabama, as this law says they shall be sold. Do they lose in value because located in Alabama?

EXISTING PRIVATE LAND CLAIMS SHOULD BE SETTLED.

(See pages 365 to 410, 1111 to 1157, and 1292.)

Private land claims should be at once settled, a statute of limitation should be passed, of say two years, within which all such claims should be filed. A commission should be appointed (if a court is not thought best). One commission should be created charged with the entire matter; one would be better than several, as experience would thus be more available.

PRIVATE LAND SURVEYS OR DEPOSITS FOR PUBLIC LAND SURVEYS. (Secs. 2401, 2402, 2403, Revised Statutes.)

(See pages 184, 185, and 569 to 572, and for circular of September 15, 1883, see page 1243; Chapter XXXVI, Surveys, page 1242.)

This law has materially aided in giving the United States a handsome addition to her already large and full collection of surplus surveyed sand banks and deserts, which she cannot dispose of. The arable or irrigable lands, a comparatively few acres in each township are taken by actual settlers, still the entire area is surveyed and subdivided. In most cases leaving four-fifths of the area waste. This law results in the survey of lands of no present, and probably of no future value, and the obtaining of certificates indorsed by officers of the Government for moneys advanced, which may have to be redeemed with land in place or cash. Congress will probably be called on shortly to redeem these certificates. (See Commissioner McFarland's recommendation as to the repeal of this law, page 572, and as to its operations).

AREA OF SURVEYED AND UNSOLD LANDS JUNE 30, 1883.

As the United States already owns more than 254,000,000 of acres of surveyed and unsold lands (see page 528), will it not be as well for Congress to inquire as to the utility of this system? The United States appropriated $400,000 for surveys in the year 1883. The deposits for private surveys were $1,162,935.58, for which certificates were issued, and these certificates are assignable, and are used in payment for public lands. A careful scrutiny of this law and the results under it will pay for the effort. Congress in fact seems to know nothing of the practical effect or abuses of this law, or it would have been repealed long ago. Mr. Commissioner McFarland's statement in 1881 (see page 572 herein) can be again given, as it is, in the main, as potent to-day as it was two years ago.

RESULTS UNDER THIS LAW SHOW THE NECESSITY FOR ITS REPEAL.

The necessities which formerly existed for advanced or early surveys of the public lands in 1862 and up to 1879, consequent upon a rush of settlers, has ceased to exist. The purely agricultural lands are about all surveyed, except probably in Dakota and the Southern States. The annual appropriation for surveys is sufficient for all practical purposes. Surely the estimates of the Commissioner of the General Land Office should be the guide for the necessities for surveys. It is difficult to give the exact area surveyed under the private deposit system, as the private deposit and public surveys are aggregated by the General Land Office.

HISTORY OF THIS LAW.

The law as originally passed, May 30, 1862 (sections 2401 to 2403 R. S., and amendatory act of July 1, 1864), permitted the deposit of money, by the settlers in any

township not mineral, for the survey and subdivision of the same. The certificate of deposit was to be receivable in part or in payment for their lands, taken under the homestead or pre-emption acts, situated in the townships, the surveying of which is paid for out of such deposits.

This law was fair enough upon its face, but was but seldom used.

March 3, 1879, an amendment of section 2403, R. S., was passed, making the certificates issued for such deposits assignable by indorsement and receivable at any land office in payment for pre-emption and homestead claims. This was a shrewd and cunning amendment. For details as to its operations see pages 569 to 572.

In the sundry civil bill passed August 7, 1882 (it is probable that no separate bill could have been passed), section 2403 (the act of March 3, 1879) was amended by providing that the certificates issued for private deposit surveys of the public lands should only be received in payment for lands at the land offices in the land districts where the lands are which are surveyed The township feature of the original law was not restored. This was some relief, and abridged in a slight measure the evils of the law. But a district in some cases means almost an entire Territory or State. (See the list of land offices, page 555 herein.) If the law must remain, confine the location of its certificates to the township in which the lands lie are surveyed. It laid almost dormant from 1862 to 1879, when interested parties had it amended and the fraud began. The amendment of 1882, confining the use or location of the certificates issued for surveys to the land district in which the lands lie, virtually continues the fraud.

This amendatory law was passed August 7, 1882. The deposits for private surveys in the year ending June 30, 1883, were $1,162,935.58. Congress should examine into this at once and repeal or vitally amend this law.

CIRCULAR OF MARCH 5, 1880, REVOKED.

(Noted on page 569.)

The circular of March 5, 1880, relative to surveys under the private deposit system, was revoked by the circular of September 15, 1883, given in full in "Surveys," Chapter XXXVI, page 1243 herein. The method of procedure and regulations under this law are therein set out in full.

VAST AREAS OF LANDS SURVEYED WHICH REMAIN UNSOLD.

For the purpose of showing the practical operation of this private deposit survey system the following five political divisions are selected as a type. For full details of operations under it, in all surveying districts, see pages 1240 and 1242:

State or Territory.	Area surveyed in 1882.	Disposed of, 1882.	Surveyed in 1883.	Disposed of, 1883.	Estimated area of surveyed and unsold lands, June 30, 1883.
	Acres.	*Acres.*	*Acres.*	*Acres.*	*Acres.*
Arizona	293, 036. 38	21, 156. 81	1, 866, 015. 76	57, 386. 54	4, 404, 001. 26
Colorado	5, 818, 183. 84	534, 257. 02	1, 370, 924. 49	424, 713. 86	36, 735, 914. 80
Nevada	631, 373. 47	78, 588. 27	3, 025, 799. 18	79, 936. 67	18, 768, 912. 47
New Mexico	5, 287, 307. 74	116, 931. 60	8, 361, 740. 67	249, 195. 70	22, 866, 999. 03
Wyoming	412, 270. 91	58, 307. 25	1, 216, 611. 03	187, 488. 65	20, 655, 148. 98

The above is one of the most interesting statements connected with the administration of the land service. Millions of acres are surveyed annually under this private deposit system which are not and cannot be sold, and the United States receives and redeems the certificates issued for the money deposited for these surveys. Virtually a loan of the credit of the United States to an unlimited amount for a private purpose. If this private deposit system is of real benefit to settlers and the lands necessary for actual settlers, why then does this not supersede the direct annual appropriation by the United States for surveys? One or the other certainly is superfluous.

OFFICERS OF THE GOVERNMENT ARE COMPETENT TO JUDGE WHEN SURVEYS ARE NECESSARY.

The surveyors-general in the sixteen public land surveying districts certainly are sufficiently empowered by law to direct as to the progress and locality of surveys,

with an eye to the best interest of the Government and the wants of the settlers. They alone, under the direction of the Commissioner of the General Land Office, should control the surveys in their districts. Under this private deposit system they do not act, and cannot, upon actual personal knowledge as to alleged necessities for surveys.

PRIVATE DEPOSIT SYSTEM SURVEYS FOUR-FIFTHS OF THE PUBLIC LANDS.

One-fifth only of all the public land surveys since June 30, 1878, have been done with public moneys or money appropriated by Congress for the purpose. It is estimated that since that period about four-fifths of the public land surveys have been done with money deposited by individuals.

For statement of the Commissioner of the General Land Office in his annual report for 1881 as to the glaring frauds under this law, see page 1242.

CONGRESSIONAL APPROPRIATIONS SUFFICIENT FOR PUBLIC LAND SURVEYS.

To illustrate that the annual appropriations are sufficient for surveys of the public lands and to keep pace with the needs of the people, the following facts are stated:

The United States owned about 220,000,000 acres of *surveyed* and *unsold* lands June 30, 1882, lying and being in the States and Territories where the private deposit system is most used. During the fiscal year 1883, there were 54,129,400.28 acres of public lands surveyed, about four-fifths of it under the private deposit system and the other fifth under the Congressional appropriation of $400,000. Of this vast area only 19,030,796.89 acres were disposed of, and probably not half of this amount from the lands surveyed during the year, leaving a balance—provided the disposals were from the area surveyed during the year—of about 35,000,000 of acres!

USELESS SURVEYING OF ARID LANDS.

The great cost of these surveys is the subdivision of townships. Of course almost all of the public lands will eventually be surveyed, but the barren and desert lands will have to be sold in such tracts as that only the exteriors of townships or sections will be surveyed and not subdivided.

SURVEYS UNDER THIS SYSTEM ARE MADE IN ARID AND BARREN REGIONS.

A look at the table of surveys on page 1241, will show that the larger portion of the surveys under this system are made in arid and barren regions. The surveyors get the profit of the surveys and the United States the surveyed barren lands.

The amount appropriated by Congress in 1882 was $300,000, in 1883 was $400,000. These are undoubtedly sufficient considering the character of the remaining settlement lands (mineral surveys are paid for by the applicants) for all actual settlements. The private deposits were in 1882 $2,013,270.77. This was while the certificates were assignable and could be used on any of the public lands. In 1883, $1,162,935.58 were deposited with certificates to be used in the district in which the lands lie. The original act confined their use to the townships in which the lands were.

CONCLUSIONS.

DECEMBER 1, 1883.

WHAT LAND LAWS SHOULD BE PASSED.

There should be but one law for the disposition of arable, desert, and pasturage lands. One law for the disposal of mineral lands. One law for the disposal of timber lands. Special laws in the past have resulted in depleting the public domain. The more restrictions placed around the public lands in past legislation, the more fraud and evasion; the less restrictions, the greater honesty in their acquirement. An amended homestead act, requiring five years settlement and occupation for title, with a clause permitting commutation at $1.25 per acre at end of two years, should be the only settlement law. This should, to maintain a family, embrace a sufficient area of arable, irrigable, or pasturage lands; it should provide for a holding of one hundred and sixty acres of arable land, and contain also a timber-culture clause.

CLASSIFICATION.

(See page 1161.)

Short and compact laws can be passed embracing four classes of lands, and providing for their disposition, which will be free from ambiguity and doubt.

No settlement or agricultural lands should be sold by the nation for cash.

Mineral lands should embrace all minerals and mineral deposits.

Homestead lands should embrace agricultural, desert, and pasturage lands. A new law should provide for proper areas for actual settlers under the three several kinds, with incidental regulations as to irrigation and reclamation. The agricultural should be given for actual settlement, the pasturage for an acreage, the desert could be given for reclamation.

Timber lands—the several grades at several prices.

LAWS WHICH SHOULD BE REPEALED.

The pre-emption act of 1841. (See pages 678 to 682, 1162, and 1163.)

The New Mexico donation act of July 22, 1859. (See statements as to frauds, page 1221.) Useless.

Pre-emption a cash purchase and private entry. (See page 1159.) No public lands should be sold outright for cash. All such laws should be at once repealed. See pages 206 and 207 for details as to method of, and laws relating to, private entry of public lands. A proper timber-sale law will do away with the only existing necessity for public offering and private entry of any public lands.

Saline land act. (See pages 217, 696, and 1162.) An obsolete law in many respects. Saline lands should be included in mineral deposits and a general mining law. They are now virtually sold as agricultural lands.

Timber-culture laws of March 3, 1873, and March 13, 1874. (See pages 360, 683, 1093, 1162–1164). The homestead act, sec. 2317, Revised Statutes, contains a clause giving a bounty for planting timber. This can be re-enacted in a new homestead act.

Swamp-land indemnity act. (Pages 219, 696, and 1166.) Claims under this should be closed as soon as possible. The public lands are fast disappearing in the swamp-land States, and soon a claim will be made against the nation for cash payment from the public Treasury for land claimed in indemnity. The operations of selection under this act have been colored and tainted with constructive, and aided largely by actual fraud. (See page 221.)

The desert-land act of March 3, 1877 (see pages 363, 689, 1106, 1165), has been of but little practical use, and is now most useful in aid of fraud. A desert homestead should be substituted, giving a person the land for reclamation.

THE TIMBER AND STONE ACT.

(See pages 357–9, 684, 1046–1086–1165.)

Its provisions are constantly violated; all entries under it for 1883 have been suspended for fraud. (See page 1165.) A general law for the sale of timber should supersede the necessity for this.

Cash sales of public lands in the Southern States.

The act of June 22, 1876, throwing open the public lands in the five Southern States to private entry or cash purchase, should be at once repealed. (Also see page 544.)

The act of March 3, 1883, selling the mineral lands in Alabama as agricultural lands. (See page 546.)

The private deposit, land survey acts, secs. 2901, 2902, 2403, R. S., United States, and amendments. (See pages 189, 569, 572, and 547 to 549.) This law should be at once repealed. Under it the General Land Office does not have what it is supposed to have, charge and control of the surveys of the public land. An act in aid of fraud.

Scrip. All outstanding scrip and warrants should be redeemed, and cash indemnity paid in scrip cases in the future.

LAWS WHICH SHOULD BE CONSOLIDATED OR RETAINED.

The homestead acts. (See pages 683, 1023, 1162, and 1163.) The six existing homestead acts should be consolidated into one actual-settlement law, with requirement of residence and settlement for two and five years, and should apply to all agricultural lands.

A desert or arid land homestead could be embraced in this—of say, 640 acres—in lieu of desert-land act.

Pasturage lands could be disposed of under this act as well.

Mining land laws. All acts (see page 1162) should be consolidated. This would include the timber and stone act proper and the coal-land act of March 3, 1866.

The town site, lot, and county-seat acts should be retained. They are serviceable and useful. Except in Utah no undue stretch of the provisions of these laws has occurred.

LAWS WHICH SHOULD BE PASSED AS SOON AS IS POSSIBLE.

A law settling the status of lapsed and unused railroad land grants. (See page 1264.)

A law permitting the several States and Territories in which they lie to tax the lands granted rail and wagon roads, as soon as listed by the United States as "granted." A duplicate of the list of lands assigned to railroads under grants could be sent by the General Land Office to the governors of the States or Territories in which they lie for listing and taxation. (See page 1265.)

A law to settle and adjust all private land claims. (See pages 547.)

A law for the sale or other disposition of the timber lands. The timber in alternate sections, or, with or without the fee. In any event a radical change in existing timber-land laws. (See page 542.)

A law fixing the time definitely at which the United States parts title to its lands, purchased or obtained under the disposition or settlement laws, whether at the time the register issues his certificate at the district land office, as he does in all cases for patent, or when the patent issues at the General Land Office at Washington, which in some cases has not yet been done (owing to inadequate clerical force in the General Land Office) for twenty-five years past. (See page 537.)

Indian reservations.—The settlement of the question as to whether lands are to be given the Indians for settlement. It is immaterial for this purpose whether they are to be allotted to the individual or the tribe. The area is the question. It is probable that almost two-thirds of the area at present embraced in Indian reservations will be thrown into the public domain for settlement or disposition. The remainder, above the wants of the Indians, should be taken by the nation, say at $1.25 per acre, and a trust fund created with the proceeds. The interest, payable four times a year, will be ample, coupled with the results of their own labor, to maintain the Indians. An Army officer could disburse it, and the Indians be at once removed from the need of annual legislation. (See page 1253.)

In all lands hereafter sold there should be reserved an easement to the public for highways. This will prevent the holding of water fronts on streams by individuals to the exclusion of settlers in the rear. Such easement will also permit parties owning back lands to get out timber.

The General Land Office should be placed, as an Executive office, on a different basis from now. (See page 1222, 1225, and 1230.)

A building should be erected for the use of the General Land Office wherein the records can be safely stored, and the attaches have a chance for comfort and health. (See page 1222 and 1230.)

The Commissioner should be better paid, and relieved of much mere routine work. (See page 1223.)

An Assistant Commissioner should be provided. (See page 1223.)

The chiefs of division should be better paid. (See page 1224.)

The clerical force should be increased and better compensated, to the end that the arrears of business can be brought up. Swamp-land indemnity and railroad land-grant acts could then be executed. (See page 1224.)

The statistics of the land service should be brought up, and some accuracy at least approximated. (See page 1219.)

The present enormous number of forms in use in the land service can and should be reduced by the repeal of useless and worthless laws, and by the consolidation of useful ones. (See page 538.)

The repeal of laws requiring a force of special timber agents covering the country to prevent fraud, a force always objectionable in a republic and believed to be against the spirit of personal liberty; no law relating to the public lands should be enacted requiring such service. New and wise laws will do away with the necessity for this force.

ADMINISTRATION OF THE LAND SERVICE.

[See chapter VI, pages 164, 165 and 1230.]

FROM JUNE 30, 1880, TO JUNE 30, 1883.

REGISTERS AND RECEIVERS.

APPOINTMENT OF—FEES AND COMMISSIONS ALLOWED, AND DUTIES OF—THE LAWS RELATIVE THERETO.

[Revised Statutes.]

SECTION 2234. There shall be appointed by the President, by and with the advice and consent of the Senate, a register of the land-office and a receiver of public moneys, for each land-district established by law.

Appointment of registers and receivers.
See all acts establishing land-districts.

SEC. 2235. Every register and receiver shall reside at the place where the land-office for which he is appointed is directed by law to be kept.

Residence of register and receiver.
See all acts establishing land-districts.

SEC. 2236. Every register and receiver shall, before entering on the duties of his office, give bond in the penal sum of ten thousand dollars, with approved security, for the faithful discharge of his trust.

Bond of register and receiver.
10 May, 1800, c. 55, ss. 1, 6, v. 2, pp. 73, 75. 3 March, 1853, c. 145, s. 5, v. 10, p. 245.

SEC. 2237. Every register and receiver shall be allowed an annual salary of five hundred dollars.

Salaries of register and receiver.
30 May, 1862, c. 86, s. 6, v. 12, p. 409. 20 April, 1818, c. 123, v. 3, p. 466.

SEC. 2238. Registers and receivers, in addition to their salaries, shall be allowed each the following fees and commissions, namely:

Fees and commissions of register and receiver.
4 Sept., 1841, c. 16, s. 12, v. 5, p. 456, 21 Mar., 1864, c. 38, s. 4, v. 13, p. 35.

First. A fee of one dollar for each declaratory statement filed, and for services in acting on pre-emption claims.

Second. A commission of one per centum on all moneys received at each receiver's office.

20 April, 1818, c. 123, v. 3, p. 466.

Third. A commission to be paid by the homestead applicant, at the time of entry, of one per centum on the cash price, as fixed by law, of the land applied for; and a like commission when the claim is finally established, and the certificate therefor issued as the basis of a patent.

21 March, 1864, c. 38, s. 2, v. 13, p. 35. 20 May, 1862, c. 75, s. 6, v. 12, p. 393. 15 July, 1870, c. 294, s. 25, v. 16, p. 320.

Fourth. The same commission on lands entered under any law to encourage the growth of timber on western prairies, as allowed when the like quantity of land is entered with money.

3 March, 1873, c. 277, s. 6, v. 17, p. 606.

Fifth. For locating military bounty-land warrants issued since the eleventh day of February, eighteen hundred and forty-seven, and for locating agricultural college land-scrip, the same commission to be paid by the holder or assignee of each warrant or scrip, as is allowed for sales of the public lands for cash, at the rate of one dollar and twenty-five cents per acre.

22 March, 1852, c. 19, s. 2, v. 10, p. 4. 2 July, 1862, c. 130, s. 7, v. 12, p. 505.

Sixth. A fee, in donation cases, of five dollars for each final certificate for one hundred and sixty acres of land; ten dollars for three hundred and twenty acres; and fifteen dollars for six hundred and forty acres.

30 May, 1862, c. 86, s. 6, v. 12, p. 409.

Seventh. In the location of lands by States and corporations under grants from Congress for railroads and other purposes, (except for agricultural colleges,) a fee of one dollar for each final location of one hundred and sixty acres; to be paid by the State or corporation making such location.

1 July, 1864, c. 196, s. 1, v. 13, p. 335.

Eighth. A fee of five dollars per diem for superintending public-land sales at their respective offices; [and to each receiver, mileage in going to and returning from depositing the public moneys received by him.]*

24 April, 1820, c. 51, s. 5, v. 3, p. 567.

Ninth. A fee of five dollars for filing and acting upon each application for patent or adverse claim filed for mineral lands, to be paid by the respective parties.

10 May, 1872, c. 152, s. 12, v. 17, p. 95.

Tenth. Registers and receivers are allowed, jointly, at the rate of fifteen cents per hundred words for testimony reduced by them to writing for claimants, in establishing pre-emption and homestead rights.

21 March, 1864, c. 38, s. 4, v. 13, p. 35.

Eleventh. A like fee as provided in the preceding subdivision when such writing is done in the land-office, in establishing claims for mineral lands.

10 May, 1872, c. 152, s. 12, v. 17, p. 95.

Twelfth. Registers and receivers in California, Oregon, Washington, Nevada, Colorado, Idaho, New Mexico, Arizona, Utah, Wyoming, and Montana, are each entitled to collect and receive fifty per centum on the fees and commissions provided for in the first, third, and tenth subdivisions of this section.

21 March, 1864, c 38, s. 6, v. 13, p. 36, and several acts establishing land offices for Utah, Wyoming, and Montana.

SEC. 2239. The register for any consolidated land-district, in addition to the fees now allowed by law, shall be entitled to charge and receive for making transcripts for individuals, or furnishing any other record information respecting public lands or land-titles in his consolidated land-district, such fees as are properly authorized by the tariff existing in the local courts of his district; and the receiver shall receive his equal share of such fees, and it shall be his duty to aid the register in the preparation of the transcripts, or giving the desired record information.

Fees of register and receiver for consolidated land offices.
18 Feb., 1861, c. 38, ss. 1, 3, v. 12, p. 131.

SEC. 2240. The compensation of registers and receivers, including salary, fees, and commissions, shall in no case exceed in the aggregate three thousand dollars a year, each; and no register or receiver shall receive for any one quarter or fractional quarter more than a pro-rata allowance of such maximum.

Maximum of compensation for registers and receivers.
21 March, 1864, c. 38, s. 6, v. 13, p. 36. 20 April, 1818, c. 123, v. 3, p. 466. 20 May, 1862, c. 75, s. 6, v. 12, p. 393. 30 May, 1862, c. 86, s. 6, v. 12, p. 409. 1 July, 1864, c. 196, s. 1, v. 13, p. 335. 22 March, 1852, c. 19, s. 3, v. 10, p. 4. 2 July, 1862, c. 130, s. 7, v. 12, p. 505. 2 Feb., 1859, c. 19, v. 11, p. 378. 18 Feb., 1861, c. 38, ss. 1, 3, v. 12, p. 131.—U. S. *vs.* Babbit, 1 Bl., 55.

SEC. 2241. Whenever the amount of compensation received at any land-office exceeds the maximum allowed by law to any register or receiver, the excess shall be paid into the Treasury, as other public moneys.

Excess of compensation to be paid into Treasury.
3 March, 1853, c. 97, s. 1, v. 10, p. 204. 18 Feb., 1861, c. 38, ss. 1, 3, v. 12, p. 131.

*Part in brackets repealed. Annual expenses only allowed. Act June 16, 1874. Stats., vol. 18, p. 72.

Illegal fees: Penalty.
22 March, 1852, c. 19, s. 3, v. 10, p. 4. 17 July, 1854, c. 84, s. 6, v. 10, p. 306.

SEC. 2242. No register or receiver shall receive any compensation out of the Treasury for past services who has charged or received illegal fees; and, on satisfactory proof that either of such officers has charged or received fees or other rewards not authorized by law, he shall be forthwith removed from office.

Compensation of registers and receivers, when to commence.
24 Feb., 1855, c. 124, s. 3, v. 10, p. 615.

SEC. 2243. The compensation of registers and receivers, both for salary and commissions, shall commence and be calculated from the time they, respectively, enter on the discharge of their duties.

Duration of office of registers and receivers.
15 May, 1820, c. 102, s. 1, v. 3, p. 582.

SEC. 2244. All registers and receivers shall be appointed for the term of four years, but shall be removable at pleasure.

Monthly and quarterly returns o receivers.
4 July, 1836, c. 352, s. 9, v. 5, p. 111.

SEC. 2245. The receivers shall make to the Secretary of the Treasury monthly returns of the moneys received in their several offices, and pay over such money pursuant to his instructions. And they shall also make to the Commissioner of the General Land Office like monthly returns, and transmit to him quarterly accounts-current of the debits and credits of their several offices with the United States.

Oaths administered by registers and receivers.
12 June, 1840, c. 35, v. 5, p. 384.

SEC. 2246. The register or receiver is authorized, and it shall be their duty, to administer any oath required by law or the instructions of the General Land-Office, in connection with the entry or purchase of any tract of the public lands; but he shall not charge or receive, directly or indirectly, any compensation for administering such oath.

Penalty for false information by register.
4 July, 1836, c. 352, s. 13, v. 5, p. 112.

SEC. 2247. If any person applies to any register to enter any land whatever, and the register knowingly and falsely informs the person so applying that the same has already been entered, and refuses to permit the person so applying to enter the same, such register shall be liable therefor to the person so applying, for $5 for each acre of land which the person so applying offered to enter, to be recovered by action of debt in any court of record having jurisdiction of the amount.

DEPARTMENTAL REGULATIONS.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., October 1, 1880.

It is the duty of the registers and receivers to be in attendance at their offices, and give proper facilities and information to persons applying for lands.

Within three days from the close of each month they are required to make out and transmit to the General Land Office a statement of the business of their respective offices for the preceding month.

These reports are in the form of abstracts of pre-emption declarations and of soldiers' declarations filed, abstracts of lands sold, abstracts of homesteads entered, abstracts of timber culture entries allowed, abstracts of military bounty land warrants and of agricultural college scrip located, accompanied by the certificates of purchase, receivers' receipts, homestead and timber culture applications and affidavits, military bounty land warrants and agricultural college scrip surrendered as satisfied, and the certificates of location thereof. Names of parties must be clearly and legibly written in these papers to correspond with the signature to every application; and when spelled in two or more ways, or illegibly written by the person signing, the register must ascertain by proper inquiry the correct orthography and certify to the same upon the margin of the certificate.

The abstracts, after being carefully examined by the register and receiver, are to be certified by them as correct and as in conformity with the papers in the entries or locations embraced therein and with their records, which papers, abstracts, and records must agree with each other.

The receiver is required also to render promptly a *monthly account of all moneys received*, showing the balance due the Government at the close of each month.

At the end of every *quarter* he must also transmit a *quarterly* account as receiver; upon the several accounts an adjustment is here made, and submitted to the Treasury Department for final settlement.

He must also render a quarterly disbursing account of all moneys expended.

He is required to deposit the moneys received by him at some depository designated by the Secretary of the Treasury, when the amount on hand shall have reached the sum of *one thousand dollars;* and in no case is he authorized, without special instructions, to hold a larger amount in his hands.

Registers and receivers of the land offices are not authorized by law to make any charges for their services in accepting or entering pre-emption or homestead claims, other than such as are herein set forth. By section 2242 of the Revised Statutes it is, among other things, provided that upon satisfactory proof that either of said officers has charged or received fees or other rewards not authorized by law, he shall forthwith be removed from office. To them, their official clerks and employés, and to those intimately and confidentially related to them, or their official clerks and employés, it is forbidden to make entries of public lands at the district offices with which they are respectively connected.

J. A. WILLIAMSON,
Commissioner of the General Land Office.

NOTE.—See also circular of July 20, 1883, in relation to fees of registers and receivers for reducing testimony to writing.

RULES OF PRACTICE IN CASES BEFORE THE UNITED STATES DISTRICT LAND OFFICES, THE GENERAL LAND OFFICE, AND THE DEPARTMENT OF THE INTERIOR.

APPROVED DECEMBER 20, 1880. IN EFFECT DECEMBER 1, 1883.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., November 26, 1880.

SIR: In compliance with your direction of the 22d of September last, I have the honor to submit herewith, for your consideration and approval, a revised draft of the Rules of Practice in cases before the district land officers, the General Land Office, and Department of the Interior, embracing such modifications and additional rules as the experience of this office has suggested for the good of the practice and the public service; the whole being arranged in a new form by topics, and the consecutive numbering of paragraphs, with a view to greater clearness and convenience.

I am, sir, very respectfully, your obedient servant,

J. A. WILLIAMSON,
Commissioner.

Hon. C. SCHURZ,
Secretary of the Interior.

DEPARTMENT OF THE INTERIOR,
Washington, December 20, 1880.

SIR: I herewith return with my approval the draft of the revised Rules of Practice in land cases received with your letter of November 26, 1880.

Very respectfully,

C. SCHURZ,
Secretary.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

INDEX TO RULES OF PRACTICE.

PROCEEDINGS BEFORE REGISTERS AND RECEIVERS.

I.

CONTESTS AND HEARINGS.

1.—*Initiation of contests.*

RULE 1.—Contests may be initiated by a party in interest, or by any other person, in the following cases:

1. Alleged abandoned homestead entries. (Revised Statutes, sec. 2297.)
2. Alleged abandoned or forfeited timber-culture entries. (20 Stat., 113, sec. 3.)

RULE 2.—In all other cases contests can be initiated only by a party in interest.

RULE 3.—In every case of application for a hearing an affidavit must be filed by the contestant with the register and receiver, fully setting forth the facts which constitute the grounds of contest.

RULE 4. Where an entry has been allowed and remains of record, the affidavit of the contestant must be accompanied by the affidavits of one or more witnesses in support of the allegations made.

2.—*Hearings in contested cases.*

RULE 5.—Registers and receivers may order hearings in the following cases wherein entry has not been perfected and no certificate has been issued as a basis for patent, namely:

1. Contests between pre-emption claimants.
2. Contests between homestead and pre-emption claimants.
3. Contests to clear the record of abandoned homestead entries.
4. Contests to clear the record of abandoned or forfeited timber-culture entries.

RULE 6.—In case of an entry or location of record, on which final certificate has been issued, the hearing will be ordered only by direction of the Commissioner of the General Land Office.

RULE 7.—Applications for hearings under the preceding section must be transmitted by the register and receiver, with special report and recommendation, to the Commissioner for his determination and instructions.

3.—*Notice of contest.*

RULE 8.—At least thirty days' notice shall be given of all hearings before the register and receiver, unless, by written consent, an earlier day shall be agreed upon.

RULE 9.—The notice of contest and hearing must conform to the following requirements:

1. It must be written or printed.
2. It must be signed by the register and receiver, or by one of them.
3. It must state the time and place of hearing.
4. It must describe the land involved.
5. It must state the R. and R. number of the entry, and the land office where, and the date when made, and the name of the party making the same.
6. It must give the name of the contestant, and briefly state the grounds and purpose of the contest.
7. It may contain any other information pertinent to the contest.

4.—*Service of notice.*

RULE 10.—Personal service shall be made in all cases when possible, if the party to be served is resident in the State or Territory in which the land is situated, and shall consist in the delivery of a copy of the notice to each person to be served.

RULE 11.—Personal service may be executed by any officer or person.

RULE 12.—Notice may be given by publication alone only when it is shown by affidavit of the contestant, and by such other evidence as the register and receiver may require, that personal service cannot be made.

5.—*Notice by publication.*

RULE 13.—Notice by publication shall be made by advertising the notice at least once a week for four successive weeks in some newspaper published in the county

wherein the land in contest lies; and, if no newspaper be published in such county, then in the newspaper published in the county nearest to such land.

RULE 14.—Where notice is given by publication a copy of the notice shall be mailed by registered letter to the last known address of each person to be notified, and a like copy shall be posted in a conspicuous place on the land during the period of publication for at least two weeks prior to the day set for hearing.

6.—*Proof of service of notice.*

RULE 15.—Proof of personal service shall be the written acknowledgment of the person served, or the affidavit of the person who served the notice attached thereto, stating the time, place, and manner of service.

RULE 16.—When service is by publication the proof of service shall be a copy of the advertisement, with the affidavit of the publisher or foreman attached thereto, showing that the same was successively inserted the requisite number of times and the date thereof.

7.—*Notice of interlocutory proceedings.*

RULE 17.—Notice of interlocutory motions, proceedings, orders, and decisions shall be in writing, and may be served personally or by registered letter through the mail.

RULE 18.—Proof of service by mail shall be the affidavit of the person who mailed the notice, attached to the post-office receipt for the registered letter.

8.—*Rehearings.*

RULE 19.—Orders for rehearing must be brought to the notice of the parties in the same manner as in case of original proceedings.

9.—*Continuances.*

RULE 20.—A postponement of a hearing to a day to be fixed by the register and receiver may be allowed on the day of trial on account of the absence of material witnesses, when the party asking for the continuance makes an affidavit befor the register and receiver showing—

1. That one or more of the witnesses in his behalf is absent without his procurement or consent;
2. The name and residence of each witness;
3. The facts to which they would testify if present;
4. The materiality of the evidence;
5. The exercise of proper diligence to procure the attendance of the absent witnesses; and
6. That affiant believes said witnesses can be had at the time to which it is sought to have the trial postponed.

RULE 21.—One continuance only shall be allowed to either party on account of absent witnesses, unless the party applying for a further continuance shall at the same time apply for an order to take the depositions of the alleged absent witnesses.

RULE 22.—No continuance shall be granted when the opposite party shall admit that the witnesses would, if present, testify to the statement set out in the application for continuance.

10.—*Depositions.*

RULE 23.—Testimony may be taken by deposition in the following cases:

1. Where the witness is unable, from age, infirmity, or sickness, or shall refuse, to attend the hearing at the local land office.
2. Where the witness resides more than fifty miles from the place of trial, computing distance by the usually traveled route.
3. Where the witness resides out of or is about to leave the State or Territory, or is absent therefrom.
4. Where, from any cause, it is apprehended that the witness may be unable or will refuse to attend; in which case the deposition will be used only in event that the personal attendance of the witness cannot be obtained.

RULE 24.—The party desiring to take a deposition under Rule 23 must comply with the following regulations:

1. He must make affidavit before the register or receiver setting forth one or more of the above-named causes for taking such deposition, and that the witness is material.
2. He must file with the register and receiver the interrogatories to be propounded to the witness.

3. He must state the name and residence of the witness.

4. He must serve a copy of the interrogatories on the opposing party or his attorney.

RULE 25.—The opposing party will be allowed ten days in which to file cross-interrogatories.

RULE 26.—After the expiration of the ten days allowed for filing cross-interrogatories, a commission to take the deposition shall be issued by the register and receiver, which commission shall be accompanied by a copy of all the interrogatories filed.

RULE 27.—The register and receiver may designate any officer authorized to administer oaths within the county or district where the witness resides to take such deposition.

RULE 28.—It is the duty of the officer before whom the deposition is taken to cause the interrogatories appended to the commission to be written out, and the answers thereto to be inserted immediately underneath the respective questions; and the whole, when completed, is to be read over to the witness, and must be by him subscribed and sworn to in the usual manner.

RULE 29.—The officer must attach his certificate to the deposition stating that the same was subscribed and sworn to by the deponent at the time and place therein mentioned.

RULE 30.—The deposition and certificate, together with the commission and interrogatories, must then be sealed up, the title of the cause indorsed on the envelope, and the whole returned by mail or express to the register and receiver.

RULE 31.—Upon receipt of the package at the local land-office, the date when the same is opened must be indorsed on the envelope and body of the deposition by the local land-officers.

RULE 32.—If the officer designated to take the deposition has no official seal, a proper certificate of his official character, under seal, must accompany his return.

RULE 33.—The parties in any case may stipulate in writing to take depositions before any qualified officer, and in any manner.

RULE 34.—All stipulations by parties or counsel must be in writing, and be filed with the register and receiver.

RULE 35.—Registers and receivers are not authorized to cite contestants before any officer other than themselves.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., January 3, 1883.

REGISTERS and RECEIVERS, and SURVEYORS-GENERAL:

GENTLEMEN: You are advised of the adoption of the following *amendment to the Rules of Practice:*

Rule 35 of the Rules of Practice adopted December 20, 1880, is hereby amended to read as follows:

RULE 35.

1. In contested cases and hearings ordered by the Commissioner of the General Land Office, testimony may be taken near the land in controversy before a U. S. commissioner or other officer authorized to administer oaths at a time and place to be fixed by the register and receiver, and stated in the notice of hearing.

2. Officers taking testimony under the foregoing rule will be governed by the rules applicable to trials before registers and receivers. (See Rules 36 to 42, inclusive.)

3. Testimony so taken must be certified to, sealed up, and transmitted by mail or express to the register and receiver, and the receipt thereof at the local office noted on the papers, in the same manner as provided in case of depositions by Rules 29 to 32, inclusive.

4. On the day set for hearing at the local office the register and receiver will examine the testimony taken by the officer designated, and render a decision thereon in the same manner as if the testimony had been taken before themselves. (See Rules 50 to 53, inclusive.)

5. No charge for examining testimony in such cases will be made by the register or receiver.

6. Officers designated to take testimony under this rule will be allowed to charge such fees as are properly authorized by the tariff of fees existing in the local courts of their respective districts, to be taxed in the same or equivalent manner as costs are taxed by registers and receivers under Rules 54 to 58, inclusive.

7. The costs of transcribing cross-examinations will in all cases be taxed to the party making the cross-examination.

8. Where hearings are ordered by the Commissioner of the General Land Office in cases to which the United States is a party, continuances will be granted in accordance with the usual practice in Unted States cases in the courts, without requiring an affidavit on the part the Government.

9. When an officer designated to take testimony under this rule, or when an officer designated to take depositions under Rule 27, cannot act on the day fixed for taking the testimony or deposition, the testimony or deposition, as the case may be, will be deemed properly taken before any other qualified officer at the same place and time who may be authorized, by the officer originally designated, or by agreement of parties to act in the place of the officer first named.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Approved, December 28, 1882.

H. M. TELLER,
Secretary.

11.—*Trials.*

RULE 36.—Upon the trial of a cause the register and receiver may, in any case, and should in all cases when necessary, personally direct the examination of witnesses in order to draw from them all the facts within their knowledge requisite to a correct conclusion by the officers upon any point connected with the case.

RULE 37.—The register and receiver will be careful to reach, if possible, the exact condition and status of the land involved in any contest, and will ascertain all the facts having any bearing upon the rights of parties in interest.

RULE 38.—In pre-emption cases they will particularly ascertain the nature, extent, and value of alleged improvements; by whom made, and when; the true date of the settlement of persons claiming as pre-emptors; the steps taken to mark and secure the claim, and the exact status of the land at that date as shown upon the records of their office.

RULE 39.—In like manner, under the homestead and other laws, the conditions affecting the inception of the alleged right, as well as the subsequent acts of the respective claimants, must be fully and specifically examined.

RULE 40.—Due opportunity will be allowed opposing claimants to confront and cross-examine the witnesses introduced by either party.

RULE 41.—No testimony will be excluded from the record by the register and receiver on the ground of any objection thereto; but when objection is made to testimony offered, the exceptions will be noted, and the testimony, with the exceptions, will come up with the case for the consideration of the Commissioner.

RULE 42.—Upon the day originally set for hearing, and upon any day to which the trial may be continued, the testimony of all the witnesses present shall be taken and reduced to writing.

12.—*Appeals.*

RULE 43.—Appeals from the action or decisions of registers and receivers lie in every case to the Commissioner of the General Land Office. (Revised Statutes, sections 453, 2478.)

RULE 44.—After hearing in a contested case has been had and closed, the register and receiver will notify the parties in interest of the conclusions to which they have arrived, and that thirty days are allowed for an appeal from their decision to the Commissioner.

RULE 45.—The appeal must be in writing or in print, and should set forth in brief and clear terms the specific points of exception to the ruling appealed from.

RULE 46.—No appeal from the action or decisions of the register and receiver will be received at the General Land Office unless forwarded through the local officers.

RULE 47.—A failure to appeal from the decision of the local officers will be considered final as to the facts in the case, and will be disturbed by the Commissioner only as follows:

1. Where fraud or gross irregularity is suggested on the face of the papers.
2. Where the decision is contrary to existing laws or regulations.
3. In event of disagreeing decisions by the local officers.
4. Where it is not shown that the party against whom the decision was rendered was duly notified of the decision and of his right of appeal.

RULE 48.—In any of the foregoing cases the Commissioner will reverse or modify the decision of the local officers or remand the case, at his discretion.

RULE 49.—All documents once received by the local officers must be kept on file with the cases, and the date of filing must be noted thereon; and no papers will be allowed under any circumstances to be removed from the files or taken from the custody of the register and receiver; but access to the same under proper rules, so as not to interfere with necessary public business, will be permitted to the parties in interest, or their attorneys, under the supervision of those officers.

13.—*Reports and opinions.*

RULE 50.—Upon the termination of a contest the register and receiver will render a joint report and opinion in the case, making full and specific references to the postings and annotations upon their records.

RULE 51.—In order that all parties to a contest may have full opportunity to examine the record and prepare their arguments upon the questions at issue, the report of the register and receiver in such cases will not be forwarded until the expiration of the thirty days named in the notice for appeal, unless all parties request its earlier transmission.

RULE 52.—The register and receiver will forward their report, together with the testimony and all the papers in the case, to the Commissioner of the General Land Office, with a brief letter of transmittal, describing the case by its title, the nature of the contest, and the tract involved.

RULE 53.—The local officers will thereafter take no further action affecting the disposal of the land in contest until instructed by the Commissioner.

14.—*Taxation of costs.*

RULE 54.—Applicants for contest must deposit with the register and receiver a sufficient sum of money to defray the cost of the proceedings.

RULE 55.—Registers and receivers are not required to make advances from their own funds, nor to incur individual liabilities, for the expense of hearings.

RULE 56.—When testimony is taken by deposition the party in whose behalf the same is taken must pay the costs thereof.

RULE 57.—Parties contesting the validity of homestead and timber-culture entries must pay the costs of the contest.

RULE 58.—In other contested cases the costs may be equitably apportioned between the parties by the register and receiver.

RULE 59.—Only the actual costs of notice, and the legal fees for reducing testimony to writing, or for acting on mineral land applications and protests, can be charged to the parties. (Revised Statutes, sec. 2238.)

RULE 60.—Costs of notice will include the costs of all notices up to the final determination of the case.

RULE 61.—Upon the final disposal of a case, any excess in the sum deposited as security over the amount chargeable to the party making the deposit will be returned to him by the register and receiver.

RULE 62.—When hearings are ordered by the Commissioner or by the Secretary of the Interior, upon the discovery of reasons for suspension in the usual course of examination of entries, the preliminary costs will be provided from the contingent fund for the expenses of local land offices.

RULE 63.—The preliminary costs provided for by the preceding section will be collected by the register and receiver when the parties are brought before them in obedience to the order of hearing.

RULE 64.—The register and receiver will then require proper provision to be made for such further notification as may become necessary in the usual progress of the case to final decision.

RULE 65.—The register and receiver will append to their report in each case a statement of costs and the amount actually paid by each of the contestants, and also a statement of the amount deposited to secure the payment of the costs, how said sum was apportioned, and the amount returned, if any, and to whom.

II.

APPEALS FROM DECISIONS REJECTING APPLICATIONS TO ENTER PUBLIC LANDS.

RULE 66.—For the purpose of enabling appeals to be taken from the rulings or action of the local officers relative to applications to file upon, enter, or locate the public lands, the following rules will be observed:

1. The register and receiver will indorse upon every rejected application the date when presented, and their reasons for rejecting it.
2. They will promptly advise the party in interest of their action, and of his right of appeal to the Commissioner.
3. They will note upon their records a memorandum of the transaction.

RULE 67.—The party aggrieved will be allowed thirty days from receipt of notice in which to file his appeal in the local land office.

RULE 68.—The register and receiver will promptly forward the appeal to the General Land Office, together with a full report upon the case.

RULE 69.—This report should recite all the facts and the proceedings had, and must embrace the following particulars:

1. A statement of the application and rejection, with the reasons for the rejection.
2. A description of the tract involved and a statement of its status as shown by the records of the local land office.
3. References to all entries, filings, annotations, memoranda, and correspondence shown by the record relating to said tract, and to the proceedings had.

RULE 70.—Rules 43 to 48, inclusive, are applicable to all appeals from the decisions of registers and receivers.

PROCEEDINGS BEFORE SURVEYORS-GENERAL.

RULE 71.—The proceedings in hearings and contests before surveyors-general shall, as to notices, depositions, and other matters, be governed, as nearly as may be, by the rules prescribed for proceedings before registers and receivers unless otherwise provided by law.

PROCEEDINGS BEFORE THE COMMISSIONER OF THE GENERAL LAND OFFICE AND SECRETARY OF THE INTERIOR.

RULE 72.—When a contest has been closed before the local land officers, and their report forwarded to the General Land Office, no additional evidence will be admitted in the case unless offered under stipulation of the parties to the record, except where such evidence is presented as the basis of a motion for a new trial or in support of a mineral application or protest; but this rule will not prevent the Commissioner, in the exercise of his discretion, from ordering further investigation when necessary.

RULE 73.—After the Commissioner shall have received a record of testimony in a contested case, thirty days will be allowed to expire before any action thereon is taken, unless, in the judgment of the Commissioner, public policy or private necessity shall demand summary action, in which case he will proceed at his discretion, first notifying the attorneys of record of his proposed action.

RULE 74.—When a case is pending on appeal from the decision of the register and receiver, or surveyor-general, and argument is not filed before the same is reached in its order for examination, the argument will be considered closed, and thereafter no further arguments or motions of any kind will be entertained except upon written stipulation duly filed, or good cause shown to the Commissioner.

RULE 75.—If, before decision by the Commissioner, either party should desire to discuss a case orally, reasonable opportunity therefor will be given in the discretion of the Commissioner, but only at a time to be fixed by him upon notice to the opposing counsel, stating time and specific points upon which discussion is desired; and, except as herein provided, no oral hearings or suggestions will be allowed.

REHEARINGS AND REVIEWS.

RULE 66.—Motions for rehearings before registers and receivers, or for review or reconsideration of the decisions of the Commissioner or Secretary, will be allowed in accordance with legal principles applicable to motions for new trials at law, after due notice to the opposing party.

RULE 77.—Motions for rehearings and reviews must be filed in the office wherein the decision to be affected by such rehearing or review was made, or in the local land office for transmittal to the General Land Office, and, except when based upon newly-discovered evidence, must be filed within thirty days from notice of such decision.

RULE 78.—Motions for rehearings and reviews must be accompanied by an affidavit of the party, or his attorney, that the motion is made in good faith, and not for the purpose of delay.

RULE 79.—The time between the filing of a motion for rehearing or review and the notice of the decision upon such motion shall be excluded in computing the time allowed for appeal.

RULE 80.—No officer shall entertain a motion in a case after an appeal from his decision has been taken.

APPEALS FROM THE COMMISSIONER TO THE SECRETARY.

RULE 81.—An appeal may be taken from the decision of the Commissioner of the General Land Office to the Secretary of the Interior, upon any question relating to the disposal of the public lands and to private land claims, except in case of interlocutory orders and decisions, and orders for hearing or other matter resting in the discretion of the Commissioner. Decisions and orders forming the above exception

will be noted in the record, and will be considered by the Secretary on review, in case an appeal upon the merits be finally allowed.

RULE 82.—When the Commissioner considers an appeal defective he will notify the party of the defect and if not amended within fifteen days from the date of the service of such notice, the appeal will be dismissed and the case closed.

RULE 83.—In proceedings before the Commissioner in which he shall formally decide that a party has no right of appeal to the Secretary, the party against whom such decision is rendered may apply to the Secretary for an order directing the Commissioner to certify said proceedings to the Secretary, and to suspend further action until the Secretary shall pass upon the same.

RULE 84.—Applications to the Secretary under the preceding rule shall be made in writing, under oath, and shall fully and specifically set forth the grounds upon which the application is made.

RULE 85.—When the Commissioner shall formally decide against the right of an appeal, he shall suspend action on the case at issue for twenty days from service of notice of his decision, to enable the party against whom the decision is rendered to apply to the Secretary for an order, in accordance with rules 83 and 84.

RULE 86.—Notice of an appeal from the Commissioner's decision must be filed in the General Land Office, and served on the appellee or his counsel, within sixty days from the date of the service of notice of such decision.

RULE 87.—When notice of the decision is given through the mails by the register and receiver, or surveyor-general, five days additional will be allowed by those officers for the transmission of the letter, and five days for the return of the appeal through the same channel, before reporting to the General Land Office.

RULE 88.—Within the time allowed for giving notice of appeal, the appellant shall also file in the General Land Office a specification of errors, which specification shall clearly and concisely designate the errors of which he complains.

RULE 89.—He may also, within the same time, file a written argument, with citation of authorities, in support of his appeal.

RULE 90.—A failure to file a specification of errors within the time required will be treated as a waiver of the right of appeal, and the case will be considered closed.

RULE 91.—The appellee shall be allowed thirty days from the expiration of the sixty days allowed for appeal in which to file his argument.

RULE 92.—The appellant shall be allowed thirty days from service of argument of appellee in which to file argument strictly in reply; and no other or further arguments or motions of any kind shall be filed without permission of the Commissioner or Secretary and notice to the opposite party.

RULE 93.—A copy of the notice of appeal, specification of errors, and all arguments of either party, shall be served on the opposite party within the time allowed for filing the same.

RULE 94.—Such service shall be made personally or by registered letter.

RULE 95.—Proof of personal service shall be the written acknowledgment of the party served, or the affidavit of the person making the service attached to the papers served, and stating time, place, and manner of service.

RULE 96.—Proof of service by registered letter shall be the affidavit of the person mailing the letter attached to a copy of the post-office receipt.

RULE 97.—Fifteen days, exclusive of the day of mailing, will be allowed for the transmission of notices and papers by mail, except in case of notice to resident attorneys, when one day will be allowed.

RULE 98.—Notice of interlocutory motions and proceedings before the Commissioner and Secretary shall be served personally or by registered letter, and service proved as provided in rules 94 and 95.

RULE 99.—No motion affecting the merits of a case or the regular order of proceedings will be entertained, except on due proof of service of notice.

RULE 100.—Ex-parte cases and cases in which the adverse party does not appear will be governed by the foregoing rules as to notices of decisions, time for appeal, and filing of exceptions and arguments, as far as applicable. In such cases, however, the right to file additional evidence at any stage of the proceedings to cure defects in the proof or record will be allowed.

RULE 101.—No person hereafter appearing as a party or attorney in any case shall be entitled to a notice of the proceedings who does not at the time of his appearance file in the office in which the case is pending a statement in writing, giving his name and post-office address, and the name of the party whom he represents; nor shall any person who has heretofore appeared in a case be entitled to a notice unless within fifteen days after being requested to file such statement he shall comply with said requirement.

RULE 102.—No person, not a party to the record, shall intervene in a case without first disclosing on oath the nature of his interest.

RULE 103.—When the Commissioner makes an order or decision affecting the merits of a case or the regular order of proceedings therein, he will cause notice to be given to each party in interest whose address is known.

ATTORNEYS.

RULE 104.—In all cases, contested or ex parte, where the parties in interest are represented by attorneys, such attorneys will be recognized as fully controlling the cases of their respective clients.

RULE 105.—All notices will be served upon the attorneys of record.

RULE 106.—Notice to one attorney in a case shall constitute notice to all counsel appearing for the party represented by him; and notice to the attorney will be deemed notice to the party in interest.

RULE 107.—All attorneys practicing before the General Land Office and Department of the Interior must first file the oath of office prescribed by section 3478 United States Revised Statutes.

RULE 108.—In the examination of any case, whether contested or ex parte, and for the preparation of arguments, the attorneys employed, when in good standing in the Department, will be allowed full opportunity to consult the record of the case and to examine the abstracts, plats, field notes, and tract-books, and the correspondence of the General Land Office or of the Department relative thereto, and to make verbal inquiries of the various chiefs of divisions at their respective desks in respect to the papers or status of said case; but such personal inquiries will be made of no other clerk in the division except in the presence or with the consent of the head thereof, and will be restricted to the hours between 11 a. m. and 2 p. m.

RULE 109.—Any attorney detected in any abuse of the above privileges, or of gross misconduct, upon satisfactory proof thereof, after due notice and hearing, shall be prohibited from further practicing before the Department.

RULE 110.—Should either party desire to discuss a case orally before the Secretary opportunity will be afforded at the discretion of the Department, but only at a time specified by the Secretary or fixed by stipulation of the parties, with the consent of the Secretary; and in the absence of such stipulation, on written notice to opposing counsel, with like consent, specifying the time when argument will be heard.

RULE 111.—The examination of cases on appeal to the Commissioner or Secretary will be facilitated by filing in printed form such arguments as it is desired to have considered.

DECISIONS.

RULE 112.—Decisions of the Commissioner not appealed from within the period prescribed become final, and the case will be regularly closed. (Revised Statutes, sec. 2273.)

RULE 113.—The decision of the Secretary, so far as respects the action of the Executive, is final.

RULE 114.—The preceding rules shall take effect on the 1st day of February, 1881.

None of the foregoing rules shall be construed to deprive the Secretary of the Interior of the exercise of the directory and supervisory powers conferred upon him by law.

SURVEYS OF THE PUBLIC LANDS.

JUNE 30, 1882.

[See page 1239.]

[See Chapter VII, pages 178 to 195. See manual of instructions to surveyors-general issued by the General Land Office, May 3, 1881, printed herein, page 575.]

APPROPRIATIONS FOR SURVEYS, 1881 AND 1882.

By the act of Congress approved June 16, 1880, the sum of $300,000 was appropriated for the survey of the public lands for the fiscal year ending June 30, 1881.

By the act of Congress approved March 3, 1881, the sum of $300,000 was appropriated for the survey of the public lands for the fiscal year ending June 30, 1882.

These amounts were apportioned by the Commissioner to the sixteen surveying districts, in accordance with the respective exigencies of field work called for by the public service in the years 1881 and 1882, as follows:

To the district of—	1881.	1882.
Arizona	$10,000	$9,500
California	35,000	30,000
Colorado	30,000	19,000
Dakota	35,000	31,400
Florida	8,000	3,100
Idaho	12,000	13,000
Louisiana	12,000	13,000
Minnesota	16,000	16,000
Montana	15,000	20,000
Nebraska and Iowa	25,000	20,000
Nevada	17,000	16,000
New Mexico	20,000	25,000
Oregon	16,000	19,000
Utah	12,000	16,000
Washington	16,000	19,000
Wyoming	15,000	12,000
Amount apportioned for field work	294,000	282,000
Additional apportionment to sundry survey districts	6,000	
	300,000	

By the act of Congress of June 16, 1880, there was also appropriated for surveys of private land claims during the year 1881.

In Arizona	$8,000
In California	10,000
In New Mexico	6,000
Making a total of	24,000

There was also appropriated by the same act of Congress for occasional examinations of public surveys in the several surveying districts and for inspection of coal fields, timber lands, &c., in land States where offices of the surveyors-general have been closed, the sum of $8,000, making an aggregate of the appropriations of $332,000 for the year 1881.

By the act of Congress of March 3, 1881, there was also appropriated for surveys of private land claims during the year 1882.

In Arizona	$8,000
In California	10,000
In New Mexico	8,000
	26,000

in addition to the sum of $300,000, or an aggregate appropriation of $326,000 for the year 1882.

Or a total of Congressional appropriations for 1881 of	$332,000 00
Private survey deposits by individuals in 1881	1,804,166 47
Or a total for surveys for 1881 of	2,136,166 47
Congressional appropriations for 1882	326,000 00
Private or individual deposits for 1882	2,013,270 77
Or a total for surveys for 1882 of	2,339,270 77

ADDITIONAL SURVEYING MERIDIANS AND BASE LINES.

[See pages 179, 180, 181.]

TO JUNE 30, 1882.

Since June 30, 1880, the following additional surveying meridians and base lines have been ordered or established:

The Wind River meridian governs the subdivisional surveys within the Shoshone Indian Reservation, in the Territory of Wyoming.

The Uinta special base and meridian govern the surveys of the Uinta Indian Reservation, in the Territory of Utah.

The Navajoe special base and meridian controls the surveys of the Navajoe Indian Reservation, in the Territories of New Mexico and Arizona.

The Black Hills meridian is coincident with the west boundary of the Territory of Dakota, on the 27° of longitude west from Washington, and intersects the base line in the parallel of 44° north latitude; it governs the surveys in the southwestern corner of the Territory named.

The Grand River meridian and base line governs the subdivisional surveys for allotment to the Ute Indians, in Western Colorado.

Proposed Cimarron meridian will be coincident with the eastern boundary of the Territory of New Mexico, or 103° meridian of longitude west from Greenwich, and intersects the base line on the parallel of 36° 30′ north latitude, or the north boundary of the State of Texas, and will govern the proposed surveys in the strip of public lands inclosed between the States of Kansas and Colorado on the north, the Indian Territory on the east, the State of Texas on the south, and the Territory of New Mexico on the west.

INDIVIDUAL DEPOSITS FOR THE SURVEY OF PUBLIC LANDS.

[See pages 184, 185, and 1239.]

Sections 2401, 2402, and 2403, Revised Statutes, provide that when settlers in any township, not mineral or reserved, desire a survey of the same under authority of the surveyor-general, they shall be entitled thereto, upon filing a written application therefor, and depositing a sum sufficient to pay for the survey and all expenses incident thereto; that said sums so deposited shall be placed to the credit of the proper appropriation for the surveying service, and that the amount so deposited by any such settlers may go in part payment for their lands situated in the township, the surveying of which is paid out of such deposits.

By act of March 3, 1879, amendatory of section 2403, Revised Statutes, the certificates issued for such deposits were made assignable by indorsement, and receivable in payment for pre-emption and homestead claims.

In 1881, under authority of the above laws, individual deposits for surveys were made to the amount of $1,804,166.47, and in 1882 to the amount of $2,013,270.77; in both years exceeding the Congressional appropriations by an aggregate of $3,159,437.24

The certificates issued for the return of the money advanced by individuals for the surveys of the public lands are used for final payment in pre-emption and homestead entries. [See circulars General Land Office March 5, 1880, April 6, 1881, and June 2, 1881, for method of procedure to obtain surveys by deposit and duties of officers.]

For a startling exhibit as to the operations of this law, see report of Commissioner of General Land Office for 1881, pages 6, 7, and 8, 144 and 145

EFFORTS OF COMMISSIONERS OF THE GENERAL LAND OFFICE TO PREVENT OR SUPPRESS FRAUDS UNDER THE INDIVIDUAL DEPOSIT SYSTEM FOR SURVEYS.

With the intent to secure, as far as possible, honest proceedings under the individual deposit survey system, J. A. Williamson, Commissioner of the General Land Office, issued the following circular:

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., May 28, 1881.

It having been alleged that gross frauds have been and are being perpetrated under section 2401, Revised Statutes, whereby lands unsettled upon and worthless are being surveyed, and that surveys are improperly executed, and that applications for surveys are fraudulently procured by or through the United States deputy surveyors, and the vast increase in the said applications and contracts indicating an extraordinary condition of things without explanation, it becomes my duty to direct you to require the most satisfactory proof as to the character of the land, nature of settlement, character and value of improvements, &c., and make yourselves entirely satisfied with the validity and good faith of each and every application for survey before giving it your approval, and if you *suspect*, even, that it is irregular in any respect, you must refuse to approve it.

If the frauds are not and cannot be prevented, it may become necessary to resort to extreme measures, even to a suspension of the execution of the law.

In view of recent developments, and to aid in restricting as far as possible the irregularities complained of, the circular instructions from this office, dated April 6th, ultimo, and amendatory instructions of subsequent date, are hereby suspended, except in so far as the same permit surveys under the deposit system for lands entered under the desert-land law.

The original affidavits, instead of copies as heretofore, must be forwarded to this office with the contracts.

The circular instructions of March 5, 1880, except as herein modified, are hereby restored.

The surveyors general are required to exercise the utmost care and vigilance to prevent frauds or irregularities of any kind regarding surveys under the law, and will promptly report any fact that may come to their knowledge of any attempted fraud, and by whom made, with all particulars concerning the same.

The law, as amended by act of March 3, 1879, allowing certificates of deposit to be used in payment of lands in townships other than those for the survey of which money was deposited, holds out inducements for fraudulent transactions. It therefore becomes all the more necessary to use all lawful means to protect the interests of the Government.

You will therefore proceed with the mose scrupulous prudence.

Respectfully,

J. A. WILLIAMSON,
Commissioner.

To UNITED STATES SURVEYORS GENERAL.

Mr. Commissioner McFarland (succeeding after the resignation of Commissioner Williamson), still further impressed with the enormity of the frauds perpetrated under this law, issued the following:

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE.
Washington, D. C., September 5, 1881.

To SURVEYORS GENERAL:

In order to prevent as far as possible the perpetration of frauds and fraudulent surveys, which have already assumed alarming proportions under the system of deposits by individuals, it is hereby ordered:

I. The surveyors general shall exercise the most searching scrutiny into the statements of applicants for survey, to satisfy themselves of the truth thereof, and unless found to be *bona fide* in every respect they shall not accept such applications nor furnish the estimates requested.

II. Believing that in a great many instances applications for survey, particularly in sections of country unfit for settlement, have been procured or invited at the instance of deputy surveyors seeking contracts, you are instructed that such proceedings on the part of deputy surveyors are unlawful, and that contracts thus unlawfully procured will not be recognized as valid. The surveyor general must minutely examine into all applications for surveys under the deposit system. If he is satisfied that the deputy has acted in the manner described, the commission of such deputy shall be forthwith revoked, and the surveyor general shall report all the facts, with his findings in the case, to this office. Upon approval thereof such deputy shall be deemed unfit to exercise the functions of a deputy surveyor, and the approval of a finding against a deputy will be communicated by this office to each surveyor general for his information and guidance; and any surveyor general who shall fail to report such deputy, or who shall employ any deputy so barred, will be open to charges to be preferred by the Commissioner of the General Land Office to the Secretary of the Interior.

III. Surveyors general are required to exercise the utmost care and vigilance to prevent frauds and irregularities of any kind regarding surveys under the system of deposits by individuals, as also of surveys made under any other appropriation of moneys by Congress, whether general or special, and they will report each and every fact that may come to their knowledge of any attempted fraud, by whomsoever made, with all obtainable particulars, to this office for consideration and action.

IV. The plats and field notes of surveys under the system of deposits by individuals, as returned to this office, do not usually show the settlements and improvements of the settlers at whose instance the surveys are ostensibly made. In a majority of instances the location of the settler, whether *bona fide* or otherwise, is entirely omitted, while the improvements, if any, are never noted. In order, therefore, to still further check the abuses and dishonest practices to which this system of surveys has become subject, the attention of surveyors general and deputy surveyors is specially directed to the requirements of pages 18 and 19 of the Manual of Surveys, and pages 43 and 44 of the Instructions of the Commissioner of the General Land Office, dated May 3, 1881. The requirements therein contained must be strictly adhered to, and surveyors general are required and enjoined to see to it that their deputies comply therewith.

V. Surveyors general are directed to instruct their deputies that they must designate in the field notes and plats of their surveys the location of each and every settlement within a township surveyed under the deposit system, whether it be permanent in character or not, together with the names of such settlers and their improvements, if any. Cattle corrals are not considered as constituting improvements.

VI. When no settlers are found within a township surveyed under the system of individual deposits, the field notes of survey must *distinctly and unequivocally state that fact*, and any omission so to describe and designate the settlements and their surrounding improvements, or the *absence* of one or both in the field notes and plat, will be deemed a sufficient cause to infer fraud, and the accounts of the deputy will be

suspended until such omission shall have been supplied to both plat and field notes. A suspension of the commission of the deputy will in the meantime take place, and all the facts will be reported to this office for consideration and action.

VII. Surveyors general are directed to make known to their several deputies the provisions and nature of this order, and will be held strictly accountable for its faithful execution. Ignorance of the terms of this order will not be held an excuse for failure to comply therewith by deputies.

VIII. This order will be observed by deputies now in the field, and surveyors general are directed to so inform them with the least practicable delay.

IX. Surveyors general are reminded of the important trust confided to them, and are instructed to exercise their whole authority to secure correct and honest surveys and returns by their deputies.

X. This order will take effect from and after the receipt of the same, and its receipt will be immediately acknowledged by each surveyor general.

XI. In every case of a contract heretofore approved which the surveyor general has reason to believe was fraudulently procured, such contract and the accounts thereunder must be immediately suspended and the facts reported to this office.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Approved:

A. BELL,
Acting Secretary of the Interior.

REPEAL OF THE INDIVIDUAL DEPOSIT LAW RECOMMENDED.

Mr Commissioner McFarland, in his annual report for 1881, says:

"I am compelled to conclude, however, that there is no effectual remedy for said abuses except by the repeal of said act of March 3, 1879. This act, in its purpose and intent, in my opinion, is well adapted to the wants of actual settlers who desire to obtain title to their settlements without being subject to the enforced postponement incident to surveys under the present system; but the temptation to irregularity and fraud are too great, and the means of evading the law too easy, to justify a reasonable expectation that the law can be administered in the public interest."

AREAS OF SURVEYS FOR THE FISCAL YEARS 1881 AND 1882.

The extent of the surveying operations during the fiscal years ending June 30, 1881, and June 30,-1882, payable out of the Congressional appropriations, and individual deposits for the survey of public lands, as provided in section 2401 of the United States Revised Statutes, were as follows:

In 1881, public lands, 21,788,010 acres; private land claims, 526,359.95 acres, or a total in 1881 of 21,314,369.95 acres. In 1882, public lands, 14,204,561.79 acres; private land claims, 74,278 acres; Indian lands, 502,427.12 acres, or a total of 14,781,266.91 acres, as follows:

Areas surveyed in land States and Territories, severally considered, both of public lands and private claims, during the fiscal years ending June 30, 1881, and June 30, 1882.

NECESSITY FOR SURVEYS.

The Secretary of the Interior, Hon S. J. Kirkwood, in his annual report for 1881, says:

Under the present law there seems good reason to believe that extensive surveys are made far in advance of any legitimate demand; it is impossible to test the accuracy of the field work, and it is probable that when, in the future, a survey shall be needed, the work will have to be done again.

The Secretary of the Interior, Hon. H. M. Teller, says in his annual report for 1882:

The public lands ought to be speedily surveyed. It is lawful for a settler to go on the public lands in advance of the surveys, but it is difficult for him to fix boundaries to his location made in advance of the surveys. Conflicts arise between neighbors as to lines, and when the surveys are made, not infrequently a whole neighborhood is thrown into confusion, and much bitterness and strife created by the attempt to adjust their location to the Government surveys. There is but little, if any, of the public land that will not be ultimately surveyed. The necessity for surveys in the agricultural and pastoral regions is not greater than in the mineral regions of the high mountains. The miner as well as the agriculturist finds it difficult clearly and properly to define and locate his claim in the absence of Government surveys. Liberal appropriations ought to be made for the survey of the unsurveyed land of all kinds, with a proper classification of the same, showing whether they are timber, agricultural, pastoral, or mineral lands.

AREA OF SURVEYED LANDS UNSOLD.

[See page 529.]

The United States, June 30, 1882, owned, in round numbers, 220,000,000 acres of surveyed lands which were unsold.

RATES FOR SURVEYS OF THE PUBLIC LANDS.

Rates for surveys for fiscal year 1882.

Minimum rates, per mile:	
For standard and meander lines	$12 00
For township lines	10 00
For section lines	8 00
Maximum rates, per mile:	
For standard lines	16 00
For township lines	14 00
For section lines	10 00
Under sections 2404 and 2405, R. S., applying only to Oregon, California, and Washington Territory:	
Standard lines in Oregon	18 00
Township lines in Oregon	15 00
Section lines in Oregon	12 00
In California and Washington Territory, per mile:	
For standard lines	18 00
For township lines	16 00
For section lines	14 00

SURVEYED AND UNSURVEYED LANDS TO JUNE 30, 1882.

[See pages 16–178, 189, and 1241.]

The total amount of public lands, from the beginning of the land system, surveyed to June 30, 1882, was 831,725,863 acres. The total acreage of public lands remaining unsurveyed to June 30, 1882, was 983,068,075 acres.

Tabular statement showing the number of acres of public lands surveyed in the following land States and Territories up to June 30, 1881, during the fiscal year 1882, and the total of the public lands surveyed up to June 30, 1882; also the total area of the public domain remaining unsurveyed within the same.

Land States and Territories.	Area of public lands in States and Territories.		Number of acres of public lands surveyed.				Total area of public and Indian lands remaining unsurveyed, inclusive of the private land claims surveyed up to June 30, 1882.

*Of the surveys in Colorado, 229,906.83 acres were for allotments to the Uncompahgre Ute Indians, who were since removed to Utah Territory, which lands became public lands by act of Congress approved July 28, 1882; and 152,171.29 acres were surveyed into 40-acre tracts for the Southern Ute Indians.

†Of the surveys in New Mexico, 120,349.47 acres were surveyed into 40-acre tracts for the Southern Ute Indians, under the Ute commission, of which 108,533.82 acres had been also surveyed as public lands under the surveyor-general of New Mexico.

‡Exclusive of the area of the public land strip, viz, 3,673,600 acres.

SURVEYS OF THE PUBLIC LANDS.

INSTRUCTIONS OF THE COMMISSIONER OF THE GENERAL LAND OFFICE TO THE SURVEYORS-GENERAL OF THE UNITED STATES RELATIVE TO THE SURVEY OF THE PUBLIC LANDS AND PRIVATE LAND CLAIMS.

MAY 3, 1881.—IN EFFECT DECEMBER 1, 1883.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., May 3, 1881.

GENTLEMEN: The following instructions, including full and minute directions for the execution of surveys in the field, are issued under the authority given me by sections 453, 456, 2398, and 2399 United States Revised Statutes, and must be strictly complied with by yourselves and your deputy surveyors.

Very respectfully,

J. A. WILLIAMSON,
Commissioner.

TO SURVEYORS-GENERAL OF THE UNITED STATES.

INDEX TO INSTRUCTIONS.

INTRODUCTORY.

The present system of survey of the public lands was inaugurated by a committee appointed by the Continental Congress, and consisting of the following delegates:

Hon. THOS. JEFFERSON, *Chairman* ..... Virginia.
Hon. HUGH WILLIAMSON ..... North Carolina.
Hon. DAVID HOWELL ..... Rhode Island.
Hon. ELBRIDGE GERRY ..... Massachusetts.
Hon. JACOB READ ..... South Carolina.

On the 7th of May, 1784, this committee reported "An ordinance for ascertaining the mode of locating and disposing of lands in the western territory, and for other purposes therein mentioned." This ordinance required the public lands to be divided into "hundreds" of ten geographical miles square, and those again to be subdivided into lots of one mile square each, to be numbered from 1 to 100, commencing in the *northwestern* corner, and continuing from west to east and from east to west consecutively. This ordinance was considered, debated, and amended, and reported to Congress April 26, 1785, and required the surveyors "to divide the said territory into townships of 7 miles square, by lines running due north and south, and others crossing these at right angles. * * * The plats of the townships, respectively, shall be marked by subdivisions into sections of 1 mile square, or 640 acres, in the same direction as the external lines, and numbered from 1 to 49. * * * And these sections shall be subdivided into lots of 320 acres." This is the first record of the use of the terms "township" and "section."

May 3, 1785, on motion of Hon. William Grayson, of Virginia, seconded by Hon. James Monroe, of Virginia, the section respecting the extent of townships was amended by striking out the words "seven miles square" and substituting the words "six miles square." The record of these early sessions of Congress are not very full or complete; but it does not seem to have occurred to the members until the 6th of May, 1785, that a township six miles square could not contain 49 sections of 1 mile square. At that date a motion to amend was made, which provided, among other changes, that a township should contain 36 sections; and the amendment was *lost*. The ordinance as finally passed, however, on the 20th of May, 1785, provided for townships, 6 miles square, containing 36 sections of 1 mile square. The first public surveys were made under this ordinance. The townships, six miles square, were laid out in ranges, extending northward from the Ohio river, the townships being numbered from south to north, and the ranges from east to west. The region embraced by the surveys under this law forms a part of the present State of Ohio, and is usually styled "The Seven Ranges." In these initial surveys only the *exterior lines* of the townships were surveyed, but the plats were marked by subdivisions into sections of 1 mile square, and mile corners were established on the township lines. The sections were numbered from 1 to 36, commencing with No. 1 in the *southeast* corner of the township, and running from *south* to *north* in each tier to No. 36 in the *northwest* corner of the township, as shown in the following diagram:

36	30	24	18	12	6
35	29	23	17	11	5
34	28	22	16	10	4
33	27	21	15	9	3
32	26	20	14	8	2
31	25	19	13	7	1

The surveys were made under the direction of the Geographer of the United States. The act of Congress approved May 18, 1796, provided for the appointment of a sur-

veyor-general, and directed the survey of the lands northwest of the Ohio River, and above the mouth of the Kentucky River, "in which the titles of the Indian tribes have been extinguished." Under this law *one-half* of the townships surveyed were subdivided into sections "by running through the same, each way, parallel lines at the end of every two miles, and by making a corner on each of said lines at the end of every mile," and it further provided that the "sections shall be numbered, respectively, beginning with the number one in the northeast section and proceeding west and east alternately, through the township, with progressive numbers till the thirty-sixth be completed." This method of numbering sections, as shown by the following diagram, is still in use:

6	5	4	3	2	1
7	8	9	10	11	12
18	17	16	15	14	13
19	20	21	22	23	24
30	29	28	27	26	25
31	32	33	34	35	36

The act of Congress approved May 10, 1800, required the "townships west of the Muskingum, which * * * are directed to be sold in quarter townships, to be subdivided into half sections of three hundred and twenty acres each, as nearly as may be, by running parallel lines through the same from east to west, and from south to north, at the distance of one mile from each other, and marking corners, at the distance of each half mile on the lines running from east to west, and at the distance of each mile on those running from south to north. * * * And the interior lines of townships intersected by the Muskingum, and of all the townships lying east of that river, which have not been heretofore actually subdivided into sections shall also be run and marked. * * * And in all cases where the exterior lines of the townships thus to be subdivided into sections or half sections shall exceed, or shall not extend, six miles, the excess or deficiency shall be specially noted, and added to or deducted from the western and northern ranges of sections or half sections in such township, according as the error may be in running the lines from east to west or from south to north."

The act of Congress approved February 11, 1805, directs the subdivision of the public lands into quarter-sections, and provides that all the corners marked in the public surveys shall be established as the proper corners of sections or subdivisions of sections which they were intended to designate, and that corners of half and quarter sections *not marked* shall be placed as nearly as possible "equidistant from those two corners which stand on the same line." This act further provides that "The boundary lines actually run and marked * * * shall be established as the proper boundary lines of the sections or subdivisions for which they were intended; and the length of such lines as returned by * * * the surveyors * * * shall be held and considered as the true length thereof, and the boundary lines which shall not have been actually run and marked as aforesaid shall be ascertained by running straight lines from the established corners to the opposite corresponding corners; but in those portions of the fractional townships, where no such opposite or corresponding corners have been or can be fixed, the said boundary line shall be ascertained by running from the established corners due north and south or east and west lines, as the case may be, to the * * * external boundary of such fractional township."

The act of Congress approved April 25, 1812, provided "That there shall be established in the Department of the Treasury an office to be denominated the General Land Office, the chief officer of which shall be called the Commissioner of the General Land Office, whose duty it shall be, under the direction of the head of the Department, to superintend, execute, and perform all such acts and things touching or respecting the public lands of the United States, and other lands patented or granted by the United States, as have heretofore been directed by law to be done or performed in the office of the Secretary of State, of the Secretary and Register of the Treasury, and of the Secretary of War, or which shall hereafter by law be assigned to the said office."

The act of Congress approved April 24, 1820, provides for the sale of public lands in half quarter-sections, and requires that "in every case of the division of a quarter-section the line for the division thereof shall run north and south * * * and

fractional sections containing 160 acres and upwards shall, in like manner, as nearly as practicable, be subdivided into half quarter-sections, under such rules and regulations as may be prescribed by the Secretary of the Treasury; but fractional sections containing less than 160 acres shall not be divided."

The act of Congress approved May 24, 1824, provides "That whenever, in the opinion of the President of the United States, a departure from the ordinary mode of surveying land on any river, lake, bayou, or watercourse would promote the public interest, he may direct the surveyor-general in whose district such land is situated, and where the change is intended to be made, under such rules and regulations as the President may prescribe, to cause the lands thus situated to be surveyed in tracts of two acres in width, fronting on any river, bayou, lake, or watercourse, and running back the depth of forty acres." * * *

The act of Congress approved May 29, 1830, provides for the fine and imprisonment of any person obstructing the survey of the public lands, and for the protection of surveyors, in the discharge of their official duties, by the United States marshal, with sufficient force, whenever necessary.

The act of Congress approved April 5, 1832, directed the subdivision of the public lands into quarter quarters; that in every case of the division of a half quarter-section the dividing line should run east and west, and that fractional sections should be subdivided under rules and regulations prescribed by the Secretary of the Treasury. Under the latter provision the Secretary directed that fractional sections containing less than 160 acres, or the residuary portion of a fractional section, after the subdivision into as many quarter quarter-sections as it is susceptible of, may be subdivided into lots, each containing the quantity of a quarter quarter-section as nearly as practicable, by so laying down the line of subdivision that they shall be 20 chains wide, which distances are to be marked on the plat of subdivision, as are also the areas of the quarter quarters and residuary fractions.

The two acts last above mentioned provided that the corners and contents of half-quarter and quarter-quarter sections should be ascertained, as nearly as possible, in the manner and on the principles directed and prescribed in the act of Congress approved February 11, 1805.

The act of Congress approved July 4, 1836, provided for the reorganization of the General Land Office, and that the executive duties of said office "shall be subject to the supervision and control of the Commissioner of the General Land Office under the direction of the President of the United States." The repealing clause is: "That such provisions of the act of the twenty-fifth of April, in the year one thousand eight hundred and twelve, entitled 'An act for the establishment of a General Land Office in the Department of the Treasury,' and of all acts amendatory thereof, as are inconsistent with the provisions of this act, be, and the same are hereby, repealed."

From the wording of this act it would appear that the control of the General Land Office was removed from the Treasury Department, and that the Commissioner reported direct to the President, but, as a matter of fact, the Secretary of the Treasury still had supervisory control, for the act of Congress approved March 3, 1849, by which the Department of the Interior was established, provided "That the Secretary of the Interior shall perform all the duties in relation to the General Land Office, of supervision and appeal, now discharged by the Secretary of the Treasury." * * * By this act the General Land Office was transferred to the Department of the Interior, where it still remains.

In 1855 a manual of instructions to surveyors-general was prepared, under the direction of the Commissioner of the General Land Office, by John M. Moore, then principal clerk of surveys, and the act of Congress approved May 30, 1862, provided "That the printed manual of instructions relating to the public surveys, prepared at the General Land Office, and bearing the date February twenty-second, eighteen hundred and fifty-five, the instructions of the Commissioner of the General Land Office, and the special instructions of the surveyor-general, when not in conflict with said printed manual or the instructions of said Commissioner, shall be taken and deemed to be a part of every contract for surveying the public lands of the United States."

The instructions contained in this volume are issued under the authority given in the clause in said act providing that "The instructions of the Commissioner of the General Land Office * * * shall be taken and deemed to be a part of every contract for surveying the public lands of the United States."

The following comprise so much of the general laws relating to the survey of the public domain as it is deemed necessary to incorporate in this volume, reference being made by chapter and section to the codification of the Public Land Laws, prepared pursuant to acts of Congress approved March 3, 1879, and June 16, 1880, and by section number to the Revised Statutes of the United States.

CHAPTER TWO.

THE GENERAL LAND OFFICE.

Duties of Commissioner.

SEC. 32. The Commissioner of the General Land Office shall perform under the direction of the Secretary of the Interior, all executive duties appertaining to the surveying and sale of the public lands of the United States, or in anywise respecting such public lands, and, also, such as relate to private claims of lands, and the issuing of patents for all grants of land under the authority of the Government. (R. S. 453.)

Returns and accounts relative to lands.

SEC. 35. All returns relative to the public lands shall be made to the Commissioner of the General Land Office; and he shall have power to audit and settle all public accounts relative to the public lands; and upon the settlement of any such accounts he shall certify the balance, and transmit the account with the vouchers and certificate to the First Comptroller of the Treasury for his examination and decision thereon. (R. S. 456.)

Commissioner to perform duties of surveyor-general, &c.

SEC. 38. Upon the discontinuance of any surveying district the authority, powers and duties in relation to the survey, resurvey, or subdivision of lands therein and all matters and things connected therewith, as previously exercised by the surveyor-general, shall be vested in and devolved upon the Commissioner of the General Land Office; and deputy surveyors or other agents under his direction shall have free access to any field-notes, maps, records, and other papers, turned over to the authorities of any State pursuant to law, for the purpose of making copies thereof, without charge of any kind. (R. S. 2219, 2220.)

Approval of surveying contracts.

SEC. 45. The Commissioner shall approve all contracts for the survey of the public lands. (R. S. 2398.)

Commissioner's instructions deemed part of contract for surveying.

SEC. 46. The instructions issued by the Commissioner of the General Land Office not in conflict with law shall be deemed part of every contract for surveying the public lands. (R. S. 2399.)

Power of Commissioner to make regulations.

SEC. 61. The Commissioner, under the direction of the Secretary of the Interior, is authorized to enforce and carry into execution every part of the public land laws not otherwise specially provided for. (R. S. 2478.)

CHAPTER THREE.

SURVEYS AND SURVEYORS.

Surveyor-general, how and where appointed.

SEC. 77. There shall be appointed by the President, by and with the advice and consent of the Senate, a surveyor-general for the States and Territories herein named, embracing, respectively, one surveying district, namely: Louisiana, Florida, Minnesota, Kansas, California, Nevada, Oregon, Nebraska and Iowa, Dakota, Colorado, New Mexico, Idaho, Washington, Montana, Utah, Wyoming, Arizona. (R. S. 2207.)

Residence of surveyor-general.

SEC. 83. Every surveyor-general, while in the discharge of the duties of his office, shall reside in the district for which he is appointed. (R. S. 2414.)

Bond of surveyor-general.

SEC. 84. Every surveyor-general shall, before entering on the duties of his office, execute and deliver to the Secretary of the Interior a bond, with good and sufficient security, for the penal sum of thirty thousand dollars, conditioned for the faithful disbursement, according to law, of all public money placed in his hands, and for the faithful performance of the duties of his office; and the President has discretionary authority to require a new bond and additional security, under the direction of the Secretary of the Interior, for the lawful disbursements of public moneys. (R. S. 2215, 2216.)

Duration of office.

SEC. 85. The commission of each surveyor-general shall cease and expire in four years from the date thereof, unless sooner vacated by death, resignation, or removal from office. (R. S. 2217.)

Continuance of duties and bond after expiration of commission.

SEC. 86. Every surveyor-general, except where the President sees cause otherwise to determine, is authorized to continue in the uninterrupted discharge of his regular official duties after the day of expiration of his commission and until a new commission is issued to him for the same office, or until the day when a successor enters upon the duties of such office; and the existing official bond of any officer so acting shall be deemed good and sufficient and in force until the date of the approval of a new bond to be given by him, if recommissioned, or otherwise, for the additional time he may so continue officially to act, pursuant to the authority of this section. (R. S. 2222.)

Transfer of papers and discontinuance of office in case of completed surveys.

SEC. 87. Whenever the surveys and records of any surveying district are completed the surveyor-general thereof shall be required to deliver over to the secretary of state or the respective States, including such surveys, or to such other officer as may be authorized to receive them, all the field-notes, maps, records, and other papers appertaining to land titles within the same; and the office of surveyor-general in every such district shall thereafter cease and be discontinued. (R. S. 2218.)

Devolution of powers upon Commissioner in case of discontinuance.

SEC. 88. In all cases of discontinuance, as provided in the preceding section, the authority, powers, and duties of the surveyor-general in relation to the survey, resurvey, or subdivision of the lands therein, and all matters and things connected therewith shall be vested in and devolved upon the Commissioner of the General Land Office. (R. S. 2219.)

Free access to public records delivered to States and conditions of such delivery.

SEC. 89. Under the authority and direction of the Commissioner of the General Land Office any deputy surveyor or other agent of the United States shall have free access to any such field-notes, maps, records, and other papers for the purpose of taking extracts therefrom or making copies thereof without charge of any kind; but no transfer of such public records shall be made to the authorities of any State until such State has provided by law for the reception and safe-keeping of such public records and for the allowance of free access thereto by the authorities of the United States. (R. S. 2220, 2221.)

General duties of surveyor-general.

SEC. 90. Every surveyor-general shall engage a sufficient number of skillful surveyors as his deputies, to whom he is authorized to administer the necessary oaths upon their appointments. He shall have authority to frame regulations for their direction, not inconsistent with law or the instructions of the General Land Office, and to remove them for negligence or misconduct in office.

Second. He shall cause to be surveyed, measured, and marked, without delay, all base and meridian lines through such points and perpetuated by such monuments, and such other correction parallels and meridians as may be prescribed by law or by instructions from the General Land Office in respect to the public lands within his surveying district, to which the Indian title has been or may be hereafter extinguished.

Third. He shall cause to be surveyed all private land claims within his district after they have been confirmed by authority of Congress, so far as may be necessary to complete the survey of the public lands.

Fourth. He shall transmit to the register of the respective land offices within his district general and particular plats of all lands surveyed by him for each land district; and he shall forward copies of such plats to the Commissioner of the General Land Office.

Fifth. He shall, so far as is compatible with the desk duties of his office, occasionally inspect the surveying operations while in progress in the field, sufficiently to satisfy himself of the fidelity of the execution of the work according to contract, and the actual and necessary expenses incurred by him while so engaged shall be allowed; and where it is incompatible with his other duties for a surveyor-general to devote the time necessary to make a personal inspection of the work in progress, then he is authorized to depute a confidential agent to make such examination, and the actual and necessary expenses of such person shall be allowed and paid for that service, and five dollars a day during the examination in the field; but such examination shall not be protracted beyond thirty days, and in no case longer than is actually necessary; and when a surveyor-general, or any person employed in his office at a regular salary, is engaged in such special service, he shall receive only his necessary expenses in addition to his regular salary. (R. S. 2223.)

Bond of deputy surveyor.

SEC. 91. Every deputy surveyor shall enter into bond, with sufficient security, for the faithful performance of all surveying contracts confined to him; and the penalty of the bond in each case shall be double the estimated amount of money accruing under such contract at the rate per mile stipulated to be paid therein. The sufficiency of the sureties to all such bonds shall be approved and certified by the proper surveyor-general. (R. S. 2230.)

Oath of deputy surveyor.

SEC. 92. The surveyors-general, in addition to the oath now authorized by law to be administered to deputies on their appointment to office, shall require each of their deputies, on the return of his surveys, to take and subscribe an oath that those surveys have been faithfully and correctly executed according to law and the instructions of the surveyor-general. (R. S. 2231.)

Suit on bond of deputy surveyor; lien of.

SEC. 93. The district attorney of the United States, in whose district any false, erroneous, or fraudulent surveys have been executed, shall, upon the application of the proper surveyor-general, immediately institute suit upon the bond of such deputy, and the institution of such suit shall act as a lien upon any property owned or held by such deputy or his sureties at the time such suit was instituted. (R. S. 2232.)

SEC. 98. The President is authorized, in any case where he thinks the public interest may require it, to transfer the duties of register and receiver in any district to the surveyor-general of the surveying district in which such land district is located. (R. S. 2228.)

Duties of register and receiver performed by surveyor-general.

SEC. 99. The public lands shall be divided by north and south lines run according to the true meridian, and by others crossing them at right angles, so as to form townships of six miles square, unless where the line of an Indian reservation, or of tracts of land heretofore surveyed or patented, or the course of navigable rivers may render this impracticable; and in that case this rule must be departed from no further than such particular circumstances require.

Rules of survey.

Second. The corners of the townships must be marked with progressive numbers from the beginning, each distance of a mile between such corners must be also distinctly marked with marks different from those of the corners.

Third. The township shall be subdivided into sections, containing, as nearly as may be, six hundred and forty acres each, by running through the same, each way, parallel lines at the end of every two miles; and by making a corner on each of such lines, at the end of every mile. The sections shall be numbered, respectively, beginning with the number one in the northeast section and proceeding west and east alternately through the township with progressive numbers till the thirty-sixth be completed.

Fourth. The deputy surveyors, respectively, shall cause to be marked on a tree near each corner established in the manner described, and within the section, the number of such section, and over it the number of the township within which such section may be; and the deputy surveyors shall carefully note, in their respective field-books, the names of the corner trees marked and the numbers so made.

Fifth. Where the exterior lines of the townships which may be subdivided into sections or half sections exceed, or do not extend six miles, the excess or deficiency shall be specially noted, and added to or deducted from the western and northern ranges of sections or half sections in such townships, according as the error may be in running the lines from east to west, or from north to south; the sections and half sections bounded on the northern and western lines of such townships shall be sold as containing only the quantity expressed in the returns and plats, respectively, and all others as containing the complete legal quantity.

Sixth. All lines shall be plainly marked upon trees, and measured with chains, containing two perches, of sixteen and one-half feet each, subdivided into twenty-five equal links; and the chain shall be adjusted to a standard to be kept for that purpose.

Seventh. Every surveyor shall note in his field-book the true situations of all mines, salt-licks, salt-springs, and mill-seats which come to his knowledge; all water-courses over which the line he runs may pass; and also the quality of the lands.

Eighth. These field-books shall be returned to the surveyor-general, who shall cause therefrom a description of the whole lands surveyed to be made out and transmitted to the officers who may superintend the sales. He shall also cause a fair plat to be made of the townships and fractional parts of townships contained in the lands, describing the subdivisions thereof and the marks of the corners. This plat shall be recorded in books to be kept for that purpose; and a copy thereof shall be kept open at the surveyor-general's office for public information, and other copies shall be sent to the places of the sale and to the General Land Office. (R. S. 2395.)

SEC. 100. The boundaries and contents of the several sections, half sections, and quarter sections of the public lands shall be ascertained in conformity with the following principles:

Boundaries and contents of public lands, how ascertained.

First. All the corners marked in the surveys returned by the surveyor-general shall be established as the proper corners of sections, or subdivisions of sections, which they were intended to designate; and the corners of half and quarter sections, not marked on the surveys, shall be placed as nearly as possible equidistant from two corners which stand on the same line.

Second. The boundary lines, actually run and marked on the surveys returned by the surveyor-general, shall be established as the proper boundary lines of the sections or subdivisions for which they were intended, and the length of such lines as returned, shall be held and considered as the true length thereof. And the boundary lines which have not been actually run and marked shall be ascertained by running straight lines from the established corners to the opposite corresponding corners; but in those portions of the fractional townships, where no such opposite corresponding corners have been or can be fixed, the boundary lines shall be ascertained by running from the established corners due north and south or east and west lines, as the case may be, to the water-course, Indian boundary line, or other external boundary of such fractional township.

Third. Each section or subdivision of section, the contents whereof have been returned by the surveyor-general, shall be held and considered as containing the exact quantity expressed in such return; and the half-sections and quarter-sections, the contents whereof shall not have been thus returned, shall be held and considered as

containing the one-half or the one-fourth part, respectively, of the returned contents of the section of which they may make part. (R. S. 2396.)

Lines of division of half-quarter sections, how run.

SEC. 101. In every case of the division of a quarter-section the line for the division thereof shall run north and south, and the corners and contents of half-quarter sections which may thereafter be sold shall be ascertained in the manner and on the principles directed and prescribed by the section preceding, and fractional sections containing one hundred and sixty acres or upwards shall in like manner, as nearly as practicable, be subdivided into half quarter-sections, under such rules and regulations as may be prescribed by the Secretary of the Interior, and in every case of a division of a half-quarter section, the line for the division thereof shall run east and west, and the corners and contents of quarter-quarter sections, which may thereafter be sold, shall be ascertained, as nearly as may be, in the manner and on the principles directed and prescribed by the section preceding; and fractional sections containing fewer or more than one hundred and sixty acres shall in like manner, as nearly as may be practicable, be subdivided into quarter-quarter sections, under such rules and regulations as may be prescribed by the Secretary of the Interior. (R. S. 2397.)

Variance in shape of surveys on rivers, &c.

SEC. 102. Whenever, in the opinion of the President, a departure from the ordinary method of surveying land on any river, lake, bayou, or water-course would promote the public interest, he may direct the surveyor-general, in whose district such land is situated, and where the change is intended to be made, to cause the lands thus situated to be surveyed in tracts of two acres in width, fronting on any river, bayou, lake, or water-course, and running back the depth of forty acres; which tracts of land so surveyed shall be offered for sale entire, instead of in half-quarter sections, and in the usual manner, and on the same terms in all respects as the other public lands of the United States. (R. S. 2407.)

MINERAL LANDS.

Extension of puclic surveys over mineral lands.

SEC. 106. The public surveys shall extend over all mineral lands, and all subdividing of surveyed lands into lots less than one hundred and sixty acres may be done by county and local surveyors at the expense of claimants; but nothing in this section contained shall require the survey of waste or useless lands. (R. S. 2406.)

What instructions to be deemed part of contract.

SEC. 107. The printed manual of instructions relating to the public surveys, prepared at the General Land Office, and bearing date February twenty-second, eighteen hundred and fifty-five, the instructions of the Commissioner of the General Land Office, and the special instructions of the surveyor-general, when not in conflict with such printed manual or the instructions of the Commissioner, shall be taken and deemed to be a part of every contract for surveying the public lands. (R. S. 2399.)

Contracts for surveys of puclic lands, when binding.

SEC. 111. Contracts for the survey of the public lands shall not become binding upon the United States until approved by the Commissioner of the General Land Office, except in such cases as the Commissioner may otherwise specially order. (R. S. 2398.)

Price of surveys, how established; cost of surveying private claims and railroad grants to be refunded.

SEC. 112. The Commissioner of the General Land Office has power, and it shall be his duty to fix the prices per mile for public surveys, which shall in no case exceed the maximum established by law; and, under instructions to be prepared by the Commissioner, an accurate account shall be kept by each surveyor-general of the cost of surveying and plotting private land claims, to be reported to the General Land Office, with the map of such claim; and patents shall not issue for any such private claim, nor shall any copy of such survey be furnished, until the cost of survey and platting has been paid into the Treasury by the claimant or other party; and before any land granted to any railroad company by the United States shall be conveyed to such company or any persons entitled thereto, under any of the acts incorporating or relating to said company, unless such company is exempted by law from the payment of such cost, there shall first be paid into the Treasury of the United States the cost of surveying, selecting, and conveying the same by the said company or persons in interest. (R. S. 2400.)

INDIVIDUAL DEPOSIT SURVEYS.

When survey may be had by settlers in township.

SEC. 115. When the settlers in any township, not mineral or reserved by government, desire a survey made of the same, under the authority of the surveyor-general, and file an application therefor in writing and deposit in a proper United States depository to the credit of the United States, a sum sufficient to pay for such survey, together with all expenses incident thereto, without cost or claim for indemnity on the United States, it may be lawful for the surveyor-general, under such instructions as may be given him by the Commissioner of the General Land Office, and in accordance with law, to survey such

township and make return thereof to the general and proper local land office, provided the township so proposed to be surveyed is within the range of the regular progress of the public surveys embraced by existing standard lines or bases for the township and subdivisional surveys. (R. S. 2401.)

Deposit for expenses of surveys deemed an appropriation, &c.

SEC. 116. The deposit of money in a proper United States depository, under the provisions of the preceding section, shall be deemed an appropriation of the sums so deposited for the objects contemplated by that section, and the Secretary of the Treasury is authorized to cause the sums so deposited to be placed to the credit of the proper appropriations for the surveying service; but any excesses in such sums over and above the actual cost of the surveys, comprising all expenses incident thereto, for which they were severally deposited, shall be repaid to the depositors respectively. (R. S. 2402.)

Settlers' deposits for surveys to go in part payment of lands, and are assignable.

SEC. 117. Where settlers make deposits in accordance with the provisions of section one hundred and fifteen, the amount so deposited shall go in part payment for their lands situated in the townships, the surveying of which is paid for out of such deposits; or the certificates issued for such deposits may be assigned by indorsement and be received in payment for any public lands of the United States entered by settlers under the preemption and homestead laws of the United States, and not otherwise. (R. S. 2403.)

Surveyors-general to survey private land claims when confirmed, &c.

SEC. 118. Each surveyor-general, when thereunto duly authorized by law, shall cause all confirmed private land claims within his district to be accurately surveyed, and shall transmit plats and field-notes thereof to the Commissioner of the General Land Office for his approval. When publication of such surveys is authorized by law, the proof thereof, together with any objections properly filed, and all evidence submitted either in support of or in opposition to the approval of any such survey, shall also be transmitted to said Commissioner. (R. S. 2447.)

Penalty for interrupting surveys.

SEC. 120. Every person who in any manner, by threat or force, interrupts, hinders, or prevents the surveying of the public lands, or of any private land claim which has or may be confirmed by the United States, by the persons authorized to survey the same, in conformity with the instructions of the Commissioner of the General Land Office, shall be fined not less than fifty dollars, nor more than three thousand dollars, and be imprisoned not less than one nor more than three years. (R. S. 2412.)

Protection of surveyor by marshal of district.

SEC. 121. Whenever the President is satisfied that forcible opposition has been offered, or is likely to be offered, to any surveyor or deputy surveyor in the discharge of his duties in surveying the public lands, it may be lawful for the President to order the marshal of the State or district, by himself or deputy, to attend such surveyor or deputy surveyor with sufficient force to protect such officer in the execution of his duty, and to remove force should any be offered. (R. S. 2413.)

Surveyors to explore and select timber lands to reserve for use of the Navy.

SEC. 122. The President is authorized to appoint surveyors of public lands, who shall explore such vacant and unappropriated lands of the United States as produce the live-oak and red-cedar timbers, and shall select such tracts or portions thereof, where the principal growth is of either of such timbers, as in the judgment of the Secretary of the Navy may be necessary to furnish for the Navy a sufficient supply of the same. Such surveyors shall report to the President the tracts by them selected, with the boundaries ascertained and accurately designated by actual survey or water-courses. (R. S. 2459.)

APPOINTMENT OF DEPUTY SURVEYORS.

Sec. 2223 U. S. Revised Statutes provides that "Every surveyor-general shall engage a sufficient number of skillful surveyors as his deputies, to whom he is authorized to administer the necessary oaths upon their appoinntments. He shall have authority to frame regulations for their direction, not inconsistent with law or the instructions of the General Land Office, and to remove them for negligence or misconduct in office."

Each surveyor-general should exercise great care in the appointment of deputy surveyors, and should thoroughly satisfy himself, before making such appointments, that the applicants possess the proper theoretical and practical qualifications, as well as to their moral standing and fitness for the important trusts to be confided to them.

Commissions will be issued to deputy surveyors as follows:

Form of commission.

The United States of America.

To all to whom these presents shall come, greeting:

Know ye, that, reposing special trust and confidence in the integrity, ability, and discretion of ——— ———, I do appoint him to be deputy surveyor of the United

States for the district of ———, and do authorize and empower him to execute and fulfill the duties of that office according to law, and to hold the said office with all the rights and emoluments thereunto legally appertaining to him, the said ——— ———, during the pleasure of the surveyor-general of the United States for the district of ——— for the time being.

In testimony whereof I have hereunto affixed my signature.

Given under my hand at ———, the —— day of ———, 18—, in the year of our Lord one thousand eight hundred and ———, and of the Independence of the United States of America the one hundred and ———.

———— ————,

United States Surveyor-General for ———.

The deputy surveyor will acknowledge in writing to the surveyor-general the receipt of such commission, stating in such letter that he accepts the same. He must also transmit, with such letter, his official oath, duly subscribed and sworn to, as follows:

Oath prescribed to be taken by all persons in the public service, by act of Congress approved July 2, 1862.

I, ——— ———, do solemnly swear that I have never voluntarily borne arms against the United States since I have been a citizen thereof; that I have voluntarily given no aid, countenance, counsel, or encouragement to persons engaged in armed hostility thereto; that I have neither sought nor accepted nor attempted to exercise the functions of any office whatever under any authority or pretended authority in hostility to the United States; that I have not yielded a voluntary support to any pretended Government, authority, power or constitution within the United States hostile or inimical thereto. And I do further swear that, to the best of my knowledge and ability, I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God.

———— ————. [SEAL.]

Subscribed and sworn to before me at ———, county of ———, ——— of ———, this —— day ———, 18—.

———— ————,

———— ————.

A full record of all commissions issued, together with letters of acceptance and official oaths, must be carefully filed in the office of the surveyor-general. Thereafter the deputy surveyor will execute in duplicate, and forward to the surveyor-general, his official bond (one copy of which will be forwarded by the surveyor-general to the Commissioner of the General Land Office), in accordance with the following form:

Form of bond.

Know all men by these presents that we, ——— ———, of ———, as principal, and ——— ———, of ———, ——— ——— of ———, ——— ——— of ———, and ——— ———, of ——— —, as sureties, are held and firmly bound unto the United States of America, in the sum of ——— thousand dollars, lawful money of the United States, for which payment, well and truly to be made, we bind ourselves, our heirs, executors and administrators, and each and every one of us and them, jointly and severally, firmly by these presents.

Signed with our hand and sealed with our seals this —— day of ———, 18—.

The condition of the above obligation is such that if the above bounden ——— ———, during the time for which his appointment as deputy surveyor, under ——— ———, surveyor-general of the United States for ———, may continue, shall well, truly, and faithfully, according to the laws of the United States, the printed manual of surveying instructions and other surveying instructions issued, or which may hereafter be issued, by the Commissioner of the General Land Office, and with such special instructions as he may receive from the surveyor-general in conformity therewith, make and execute the surveys which are required of him to be made by each and every contract which has been or shall be entered into by him as such deputy surveyor, and return the true field-notes of the said surveys to the surveyor-general in the manner and

within the period named in the said contracts respectively, then this obligation to be void, or otherwise it shall remain in full force and virtue.

Signed, sealed, and acknowledged before us:

Certificate.

I, ——— ———, hereby certify that, in my opinion, the sureties to the above bond are sufficient, and I hereby approve the same.

———. ———,
U. S. Surveyor-General for ———.

1. The bond must be dated the date it is signed by all the parties thereto.
2. The names of all the parties executing the bond and of the witnesses thereto must be written in full.
3. The affidavits of sureties must be made before some officer (preferably an officer of the United States) duly authorized to administer oaths.

4. The sufficiency of sureties must be certified to by the surveyor-general.
5. All erasures, mutilations, and interlineations must be avoided.
6. The amount of bond must be *at least* double the estimated amount that will be due to the deputy surveyor upon the completion of the first contract made under the same; and whenever the estimated amount that will be due the deputy surveyor on any contract or contracts under any bond shall equal one-half the sum named in such bond, subsequent contracts must be made under a new bond, *e. g.*, the bond being for $30,000, and the deputy surveyor having had three contracts of $5,000 each, under such bond, if a further contract is given him, he must execute a new bond to cover same and subsequent contracts.

The deputy surveyor having been duly commissioned, and his letter of acceptance, oath of office, and official bond filed in the surveyor-general's office, contracts for surveys may then be entered into between the surveyor-general and such deputy surveyor, in accordance with the following form:

Form of contract.

This agreement made this —— day of ——, 18—, by and between —— ——, surveyor-general of the United States for ——, acting for and in behalf of the United States, of the one part, and —— ——, deputy surveyor, of the other part (a bond for the faithful performance of this and other contracts having been executed by the said —— ——, deputy surveyor, as principal, and —— ——, —— ——, as sureties, and dated the —— day of ——, 18—), witnesseth:

That the said —— ——, for and in consideration of the conditions, terms, provisions, and covenants hereinafter expressed, and according to the true intent and meaning thereof, doth hereby covenant and agree with the said —— ——, in his capacity aforesaid, that he, the said —— ——, in his own proper person, with the assistance of such compassmen, chainmen, axmen, flag-bearers, and others as may be necessary, in strict conformity with the laws of the United States, the printed manual of surveying instructions, and other surveying instructions issued by the Commissioner of the General Land Office, and with such special instructions as he may receive from the surveyor-general in conformity therewith (all of said instructions being hereby incorporated with and made a part of this contract), will well, truly, and faithfully survey, mark, and establish —— ——, or such other lines of survey as he may be authorized to substitute for those named above, in accordance with instructions and subject to the approval of the surveyor-general and the Commissioner of the General Land Office, and that he will complete these surveys in the manner aforesaid, and return the true field-notes thereof to the office of the said surveyor-general, on or before the —— day of ——, 18—, on penalty of forfeiture and paying to the United States the sum of —— dollars, lawful money of the United States (being double the estimated amount which would be due by the United States to the said —— —— upon the completion of the surveys named in this contract), if default be made in any of the foregoing conditions.

And it is further expressly stipulated and made a condition of this contract, that the surveys herein described shall not be commenced before the —— day of ——, 18—, or before said —— —— shall have been officially notified by the surveyor-general of the approval of this contract by the Commissioner of the General Land Office.

And the said —— ——, in his official capacity aforesaid, covenants and agrees with the said —— ——, that on the completion of the surveys above named, in manner aforesaid, there shall be paid to the said —— ——, by the Treasury Department of the United States, as a full compensation for all work performed under this agreement, at the rate of —— dollars for base, standard, meridian, and meander lines, —— dollars for township lines, and —— dollars for section lines, except where the lines of survey pass over mountainous lands, or lands heavily timbered, or covered with dense undergrowth, and in such case at the rate of —— dollars for base, standard, meridian, and meander lines, —— dollars for township lines, and —— dollars for section lines, per mile, for every mile and part of a mile actually run and marked in the field, *random lines and offsets not included.*

It is further agreed by and between the parties to this agreement that no account shall be paid unless properly certified by —— ——, in his official capacity aforesaid (or by his successor in office in such official capacity), that the surveys are in accordance with the instructions herein referred to and the provisions of this agreement, and until approved plats and certified transcripts of field-notes of the surveys for which the accounts are rendered are filed in the General Land Office.

And it is further understood and agreed by and between the parties to this agreement that the said surveys will not be approved by the said —— ——, in his official capacity aforesaid (or by his successor in office in such official capacity), unless they shall be found to be in exact accordance with the instructions hereinbefore specified. *Provided, also,* That no member of Congress, or subcontractor, shall have any part or

interest in this contract. and that no payment shall be made for any surveys not executed by the said deputy surveyor, ——— ———, in his own proper person.

In testimony whereof the parties to these articles of agreement have hereunto set their hands and seals, the day and year and place specified, as follows:

The surveyor-general at ———, county of ———, ——— of ———, the —— day of ———, 18—.

The deputy surveyor at ———, county of ———, ——— of ———, the —— day of ———, 18—.

——— ———, [SEAL.]
United States Surveyor-General for ———.
——— ———, [SEAL.]
United States Deputy Surveyor.

Signed, sealed, and acknowledged before us:

Witnesses to surveyor-general's signature:

——— ———,
Residence, ———,
——— ———,
Residence, ———.

Witnesses to deputy surveyor's signature:

——— ———,
Residence, ———.
——— ———,
Residence, ———.

1. Where both parties sign the contract on the same day it will be dated that day.
2. Where parties sign the contract on different days it will be dated the day when the last signature is affixed.
3. The names of the surveyor-general, deputy surveyor, sureties, and witnesses must be written in full, and the residence of witnesses written after their signatures.
4. A full description of the surveys embraced in the contract must be written in the blank space left for that purpose.
5. When contract is made under the appropriation for public surveys, the date when surveys are required to be completed and field-notes returned shall not be later than the end of the fiscal year for which appropriation is made; and the date when surveys can be commenced shall not be earlier than the commencement of such fiscal year, except in cases where the appropriation is made immediately available.
6. The rates named in contract must not exceed those fixed by law.
7. The signatures of the surveyor-general and of the deputy surveyor must each be witnessed by two persons.
8. All erasures, mutilations, and interlineations must be avoided.

The substitution provided for in above form of contract is to be made only in cases where townships or portions of townships included in the contract for subdivision are found to be unsurveyable under instructions; and in such cases other townships which are surveyable may be substituted, preference being given to those upon which settlement has been made, or toward which settlement is tending.

In case the deputy finds it necessary to make such substitution, he must forward to the surveyor-general a written report of same at the earliest practicable date. Such report must state fully all of the circumstances of the case and the reasons for substitution, and if subsequent investigation should prove that the substitution was unnecessary and should not have been made, payment for the survey of such substituted townships will not be made.

SYSTEM OF RECTANGULAR SURVEYING.

1. The public lands of the United States are ordinarily surveyed into rectangular tracts, bounded by lines conforming to the cardinal points.

2. The public lands shall be laid off, in the first place, into bodies of land of 24 miles square, as near as may be. This shall be done by the extension of standard lines from the principal meridian every 24 miles, and by the extension, from the base and standard lines, of auxiliary meridians every 24 miles. Thereafter they shall be laid off into bodies of land of 6 miles square, as near as may be, called *townships*, containing as near as may be 23,040 acres. The township shall be subdivided into 36 tracts, called sections, each containing as near as may be 640 acres. Any number or series of contiguous townships, situate north or south of each other, constitute a *range*.

The law requires that the lines of the public surveys shall be governed by the true meridian, and that the townships shall be *six miles square*—two things involving in connection a mathematical impossibility—for, strictly to conform to the meridian,

necessarily throws the township out of square, by reason of the convergency of meridians, and hence, by adhering to the true meridian, results the necessity of departing from the strict requirements of law, as respects the precise area of townships and the subdivisional parts thereof, the township assuming something of a trapezoidal form, which inequality develops itself more and more as such, the higher the latitude of the surveys. It is doubtless in view of these circumstances that the law provides (see section 2 of the act of May 18, 1796) that the sections of a mile square shall contain the quantity of 640 acres, *as nearly as may be;* and, moreover, provides (see section 3 of the act of May 10, 1800) in the following words: "And in all cases where the exterior lines of the townships, thus to be subdivided into sections or half sections, shall exceed, or shall not extend 6 miles, the excess or deficiency shall be specially noted, and added to or deducted from the western or northern ranges of sections or half sections in such township, according as the error may be in running the lines from east to west, or from south to north; the sections and half sections bounded on the northern and western lines of such townships shall be sold as containing only the quantity expressed in the returns and plats, respectively, and all others as containing the complete legal quantity."

The accompanying diagram, marked A, and the specimen field-notes pertaining to the same, will serve to illustrate the method of running lines to form tracts of land 24 miles square, as well as the method of running out the exterior lines of townships, and the order and mode of subdividing townships will be found illustrated in the accompanying specimen field-notes, conforming with the township diagram B. The method here presented is designed to insure as full a compliance with all the requirements, meaning, and intent of the surveying laws as, it is believed, is practicable.

The section lines are surveyed from *south* to north on true meridians, and from *east* to west, in order to throw the excesses or deficiencies in measurements on the north and west sides of the township, as required by law. In case where a township has been partially surveyed, and it is necessary to complete the survey of the same, or where the character of the land is such that only the north or west portions of the township can be surveyed, this rule cannot be strictly adhered to, but, in such cases, must be departed from only so far as is absolutely necessary. It will also be necessary to depart from this rule where surveys close upon State or Territorial boundaries, or upon surveys extending from different meridians.

3. The townships are to bear numbers in respect to the base line, either north or south of it; and the tiers of townships called "ranges" will bear numbers in respect to the meridian line according to their relative position to it, either on the east or west.

4. The thirty-six sections into which a township is subdivided are numbered, commencing with number *one* at the *northeast* angle of the township, and proceeding west to number six, and thence proceeding east to number twelve, and so on, alternately, until the number thirty-six in the southeast angle. In all cases of surveys of fractional townships, the sections should bear the same numbers as they would if the township was full.

5. Standard parallels shall be established at intervals of every 24 miles, north and south of the base line, and auxiliary meridians at intervals of every 24 miles, east and west of the principal meridian; the object being to confine the errors resulting from convergence of meridians, and inaccuracies in measurements, within the tracts of lands bounded by the lines so established.

6. The survey of all principal base and meridian, standard parallels, and auxiliary meridian, and township lines must be made with an instrument operating independently of the magnetic needle. Burt's *improved solar compass*, or other instrument of equal utility, must be used of necessity in such cases; and it is deemed best that such instrument should be used under all circumstances. Where the needle can be relied on, however, the ordinary compass may be used in subdividing and meandering. Whenever deputies use instruments with magnetic apparatus only, they must test the accuracy of their work and the condition of their instruments by at least three observations upon a circumpolar star, upon different days, between the commencement and the close of surveying operations in any given township. Deputies using instruments with solar apparatus are not required to make observations of the star Polaris, but they must test their instruments by taking the latitude daily, weather permitting, in running base, standard, meridian, and range lines, and upon three different days during the execution of subdivisional surveys in each township. They must make complete records in their field-notes, under proper dates, of the making of all observations in compliance with these instructions, showing the style and condition of the instrument in use, and the angle formed, by comparing the line run with the meridian as by observation determined.

7. The construction and adjustments of all surveying instruments used in the surveying of the public lands of the United States must be tested at least once a year, and oftener if necessary, by comparison with the true meridian, established under the direction of the surveyor-general of the district; and the instruments must be

so modified in construction, or in such a way corrected, as may be necessary to produce the closest possible approximation to accuracy and uniformity in the operation of all such instruments. A record will be made of such examinations, showing the number and style of the instrument, name of the maker, the quantity of instrumental error discovered by comparison, in either solar or magnetic apparatus, or both, and means taken for correction. The surveyor-general will allow no surveys to be made until the instruments to be used therefor have been approved by him.

8. The township lines and the subdivision lines will usually be measured by a two-pole chain of 33.03 feet in length, consisting of 50 links, and each link being 7 inches and ninety-two hundredths of an inch long. On uniform and level ground, however, the four-pole chain may be used. The measurements will, however, always be represented according to the four-pole chain of 100 links. The four-pole chains must be adjusted to lengths of 66.06 feet. The object in adding six-hundredths of a foot to the 66 feet of a four-pole chain is to assure thereby that 66 feet will be set off upon the earth's surface without the application of a greater strain than about 20 pounds by the chainmen, thus providing for loss by vertical curvature of the chain, and at the same time avoiding the uncertain results attending the application of strains taxing its elasticity. The deputy surveyor must provide himself with a measure of the standard chain kept at the office of the surveyor-general, to be used by him as a field standard. The chain in use must be compared and adjusted with this field standard each working day, and such field standard must be returned to the surveyor-general's office for examination when his work is completed.

OF TALLY PINS.

9. You will use eleven tally pins made of steel, not exceeding 14 inches in length, weighty enough toward the point to make them drop perpendicularly, and having a ring at the top, in which is to be fixed a piece of red cloth, or something else of conspicuous color, to make them readily seen when stuck in the ground.

PROCESS OF CHAINING.

10. In measuring lines with a two-pole chain, every *five* chains are called "a *tally*"; and in measuring lines with a four-pole chain, every *ten* chains are called "a *tally*," because at that distance the last of the ten tally pins with which the forward chainman set out will have been struck. He then cries "tally"; which cry is repeated by the other chainman, and each registers the distance by slipping a thimble, button, or ring of leather, or something of the kind, on a belt worn for that purpose, or by some other convenient method. The hind chainman then comes up, and having counted in the presence of his fellow the tally pins which he has taken up, so that both may be assured that none of the pins have been lost, he then takes the forward end of the chain, and proceeds to set the pins. Thus the chainmen alternately change places, each setting the pins that he has taken up, so that one is forward in all the odd, and the other in all the even, tallies. Such procedure, it is believed, tends to insure accuracy in measurement, facilitates the recollection of the distances to objects on the line, and renders a mistally almost impossible.

LEVELING THE CHAIN AND PLUMBING THE PINS.

11. The length of every line you run is to be ascertained by precise horizontal measurement, as nearly approximating to an air line as is possible in practice on the earth's surface. This all-important object can only be attained by a rigid adherence to the three following observances:

1. Ever keeping the chain *stretched* to its utmost degree of tension on even ground.

2. On uneven ground, keeping the chain not only stretched as aforesaid, but horizontally *leveled*. And, when ascending and descending steep ground, hills, or mountains, the chain will have to be *shortened* to one-half its length (and sometimes more), in order accurately to obtain the true horizontal measure.

3. The careful plumbing of the tally pins, so as to attain precisely *the spot* where they should be stuck. The more uneven the surface, the greater the caution needed to set the pins.

MARKING LINES.

12. All lines on which are to be established the legal corner boundaries are to be marked after this method, viz: Those trees which may intercept your line must have two chops or notches cut on each side of them without any other marks whatever. These are called "*sight trees*" or "*line trees*." A sufficient number of other trees standing within 50 links of the line, on either side of it, are to be *blazed* on two sides diag-

onally, or quartering toward the line, in order to render the line conspicuous, and readily to be traced, the blazes to be opposite each other, coinciding in direction with the line where the trees stand very near it, and to approach nearer each other the farther the line passes from the blazed trees. Due care must ever be taken to have the lines so well marked as to be readily followed, and to cut the blazes deep enough to have recognizable scars as long as the trees stand.

Where trees 2 inches or more in diameter are found, the required blazes must not be omitted.

Bushes on or near the line should be bent at right angles therewith, and receive a blow of the ax at about the usual height of blazes from the ground sufficient to leave them in a bent position, but not to prevent their growth.

ON TRIAL, OR RANDOM LINES,

the trees are not to be blazed, unless occasionally, from indispensable necessity, and then it must be done so guardedly as to prevent the possibility of confounding the marks of the trial line with the *true*. But bushes and limbs of trees may be lopped, and *stakes set* on the trial or random line, at every *ten* chains, to enable the surveyor on his return to follow and correct the trial line and establish therefrom the *true line*. To prevent confusion the temporary stakes set on the trial or random lines must be *pulled up* when the surveyor returns to establish the true line.

INSUPERABLE OBJECTS ON LINE—WITNESS POINTS.

13. Under circumstances where your course is obstructed by impassable obstacles, such as ponds, swamps, marshes, lakes, rivers, creeks, &c., you will prolong the line across such obstacles by taking the necessary right angle offsets; or, if such be inconvenient, by a traverse or trigonometrical operation, until you regain the line on the opposite side. And in case a north and south, or a true east and west, line is regained in advance of any such obstacle, you will prolong and mark the line back to the obstacle so passed, and state all the particulars in relation thereto in your field-book. And at the intersection of lines with both margins of impassable obstacles, you will establish a *witness point* (for the purpose of perpetuating the intersections therewith), by setting a post, and giving in your field-book the course and distance therefrom to two trees on opposite sides of the line, each of which trees you will mark with a blaze and notch facing the post; but on the margins of navigable water-courses, or navigable lakes, you will mark the trees with the proper number of the fractional section, township, and range.

☞The best marking tools adapted to the purpose must be provided for marking neatly and *distinctly* all the letters and figures required to be made at corners, *arabic* figures being used exclusively; and the deputy is always to have at hand the necessary implements for keeping his marking irons in order.

ESTABLISHING CORNERS.

To procure the faithful execution of this portion of a surveyor's duty is a matter of the utmost importance. After a true coursing and most exact measurements the establishment of corners is the consummation of the work. If, therefore, the corner be not perpetuated in a permanent and workmanlike manner the *great aim* of the surveying service will not have been attained.

The following are the different points for perpetuating corners, viz:

1. For township boundaries, at intervals of every 6 miles.
2. For section boundaries, at intervals of every mile, or 80 chains.
3. For quarter-section boundaries, at intervals of every half mile, or 40 chains. Exceptions, however, occur, as fully set forth hereafter in that portion of the manual showing the manner of running township lines and method of subdividing.
4. Meander corners are established at all those points where the lines of the public surveys intersect the banks of such rivers, bayous, lakes, or islands as are by law directed to be meandered.

DESCRIPTION OF CORNERS.

The following is the form and language to be used by deputy surveyors in describing the establishment of corners in their field-notes, and their work in the field must strictly comply with the same:

STANDARD TOWNSHIP CORNERS.

Stone with Pits and Mound.

SEC. 1. Set a — stone —X—X— ins. — ins. in the ground, for Standard Cor. to (e. g.) Tps. 5 N., R's 2 & 3 W., marked S. C. with 6 notches on N., E. & W. edges, dug pits 24×18×12 ins. crosswise on each line, N.,

E. & W. of stone 6 ft. dist. and raised a mound of earth, 2½ ft. high, 5 ft. base alongside.

Stone with Mound of Stone.

SEC. 2. Set a — stone —×—×— ins. — ins. in the ground, for Standard Cor. to (e. g.) Tps. 5 N., R's 2 & 3 W., marked S. C., with 6 notches on N., E. & W. edges, and raised a mound of stone alongside. Pits impracticable.

Stone with Bearing Trees.

SEC. 3. Set a — stone —×—×— ins. — ins. in the ground, for Standard Cor. to (e. g.) Tps. 5 N., R's 2 & 3 W., marked S. C., with 6 notches on N., E & W. edges, from which

A —, — ins. diam. bears N —° E. — lks., dist. marked T. 5 N. R. 2 W. S. 31, B. T.
A —, — ins. diam., bears N. —° W. —lks., dist. marked T. 5 N. R. 3 W. S. 36, B. T.
A —, — ins. diam., bears S —° W. — lks. dist. marked T. 4 N. R. 3 W. S. 1, B. T.

Post in Mound.

SEC. 4. Set a post, 4½ ft. long, 4 ins. square, with marked stone (charred stake or quart of charcoal), 12 ins. in the ground, for Standard Cor. to (e. g.) Tps. 5 N., R's 2 & 3 W., marked S. C. T. 5 N. on N.

R. 2 W. S. 31, on E. and

R. 3 W. S. 36 on W. faces, with 6 notches on N., E. & W. faces, dug pits, 24×18×12 ins. crosswise on each line, N., E. & W. of post, 6 ft. dist. and raised a mound of earth 2½ ft. high, 5 ft. base, around post.

Post with Bearing Trees.

SEC. 5. Set a post, 4½ ft. long, 4 ins. square, 24 ins. in the ground, for Standard Cor. to (e. g.) Tps. 5 N., R's 2 & 3 W. marked

S. C. T. 5 N. on N.

R. 2 W. S. 31, on E. and

R. 3 W. S. 36 on W. faces, with 6 notches on N., E. & W. faces; from which

A —, — ins. diam., bears N —° E. — lks., dist. marked T. 5 N. R. 2 W. S. 31, B. T.
A —, — ins. diam., bears N —° W. — lks., dist. marked T. 5 N. R. 3 W. S. 36, B. T.
A —, — ins. diam., bears S —° W. — lks., dist. marked T. 4 N. R. 3 W. S. 1, B. T.

Mound without Post or Stone.

SEC. 6. Deposited a marked stone (charred stake or quart of charcoal) 12 ins. in the ground, for Standard Cor. to (e. g.) Tps. 5 N., R's 2 & 3 W., dug pits. 24×18×12 ins. crosswise on each line, N., E. & W. of cor., 6 ft. dist. and raised a mound of earth 2½ feet high, 5 ft. base, over it. In E. pit drove a stake 2 ins. square, 2 ft. long, 12 ins. in the ground, marked

S. C. T. 5 N. on N.

R. 2 W. S. 31, on E. and

R. 3 W. S. 36 on W. faces, with 6 notches on N., E. & W. faces.

Tree Corner without Bearing Trees.

SEC. 7. A—, — ins. diam., which I marked (e. g.) S. C. T. 5 N. on N.

R. 2 W. S. 31, on E. and

R. 3 W. S. 36 on W. faces, with 6 notches on N., E. & W. faces, dug pits 24×18×12 ins. crosswise on each line, N., E. & W. of tree 6 ft. dist., and raised a mound of earth round tree, for Standard Cor. to Tps. 5 N., R's 2 & 3 W.

Tree Corner with Bearing Trees.

SEC. 8. A —, — ins. diam., which I marked (e. g.) T. 5 N. S. C. on N.

R. 2 W. S. 31, on E. and

R. 3 W. S. 36 on W. faces, with 6 notches on N., E. & W. faces, for Standard Cor. to Tps. 5 N., R's 2 & 3 W.; from which

A —, — ins. diam., bears N — ° E. — lks. dist. marked T. 5 N. R. 2 W. S. 31, B. T.
A —, — ins. diam., bears N — ° W. — lks. dist. marked T. 5 N. R. 3 W., S. 36, B. T.
A —, — ins. diam., bears S — ° W. — lks. dist. marked T. 4 N. R. 3 W. S. 1, B. T.

CLOSING TOWNSHIP CORNERS.

Stone with Pits and Mound.

SEC. 1. Set a — stone — × — × — ins. — ins. in the ground for Closing Cor. to (e. g.) Tps. 4 N., R's 2 & 3 W., marked C. C. with 6 notches on S. E. & W. edges, dug pits, 24×18×12 ins., crosswise on each line, S., E. & W. of stone, 6 ft. dist., and raised a mound of earth, 2½ ft. high, 5 ft. base alongside.

Stone with Mound and Stone.

SEC. 2. Set a — stone — × — × — ins. —ins. in the ground for Closing Cor. to (e. g.) Tps. 4 N., R's 2 & 3 W., marked C. C. with 6 notches on S. E. & W. edges, and raised a mound of stone alongside. Pits impracticable.

Stone with Bearing Trees.

SEC. 3. Set a — stone — × — × — ins. — ins. in the ground for Closing Cor. to (e. g.) Tps. 4 N., R's 2 & 3 W., marked C. C. with 6 notches on S., E., & W. edges; from which

A—, — ins. diam. bears S — ° E. — lks. dist. marked T. 4 N. R. 2 W. S. 6, B. T.
A—, — ins. diam. bears S — ° W. — lks. dist. marked T. 4 N. R. 3 W. S. 1, B. T.
A—, — ins. diam. bears N — ° W. — lks. dist. marked T. 5 N. R. 2 W. S. 31, B. T.

Post in Mound.

SEC. 4. Set a post, 4½ ft. long, 4 ins. square, with marked stone (charred stake or quart of charcoal) 12 ins. in the ground for Closing Cor. to (e. g.) Tps. 4 N., R's 2 & 3 W., marked

C. C. T. 4 N. on S.

R. 2 W. S. 6, on E. and
R. 3 W. S. 1 on W. faces, with 6 notches on S., E., & W. faces, dug pits 24 × 18 × 12 ins., crosswise on each line, S., E., & W. of post, 6 ft. dist., and raised a mound of earth 2½ ft. high, 5 ft. base around post.

Post with Bearing Trees.

SEC. 5. Set a post, 4½ ft. long, 4 ins. square, 24 ins. in the ground, for Closing Cor. to (e. g.) Tps. 4 N., R's 2 & 3 W., marked
C. C. T. 4 N, on S.
R. 2 W. S. 6, on E. and
R. 3 W. S. 1 on W. faces, with 6 notches on S., E. & W. faces; from which
A —, — ins. diam. bears S — ° E. — lks. dist. marked T. 4 N. R. 2 W. S. 6, B. T.
A —, — ins. diam. bears S — ° W. — lks. dist, marked T. 4 N. R. 3 W. S. 1, B. T.
A —, — ins. diam. bears N — ° W. — lks. dist. marked T. 5 N. R. 2 W. S. 31, B. T.

Mound without Post or Stone.

SEC. 6. Deposited a marked stone (charred stake or quart of charcoal) 12 ins. in the ground for Closing Cor. to (e. g.) Tps. 4 N., R's 2 & 3 W., dug pits 24 × 18 × 12 ins. crosswise on each line, S., E., & W. of corner, 6 ft. dist., and raised a mound of earth 2½ ft. high, 5 ft. base, over it. In E. pit drove a stake 2 ins. square, 2 ft. long, 12 ins. in the ground, marked
C. C. T. 4 N. on S.
R. 2 W. S. 6, on E. and
R. 3 W. S. 1 on W. faces, with 6 notches on S., E. & W. faces.

Tree Corner without Bearing Trees.

SEC. 7. A —, — ins. diam., which I marked (e. g.)
C. C. T. 4 N. on S.
R. 2 W. S. 6, on E. and
R. 3 W. S. 1 on W. faces, with 6 notches on S., E. & W. faces, dug pits 24 × 18 × 12 ins. crosswise on each line S. E. & W. of tree, 6 ft. dist. and raised a mound of earth around tree, for Closing Cor. to Tps. 4 N. R's. 2 & 3, W.

Tree Corner with Bearing Trees.

SEC. 8. A —, — ins. diam., which I marked (e. g.)
C. C. T. 4 N. on S.
R. 2 W. S. 6, on E. and
R. 3 W. S. 1 on W. faces, with 6 notches on S., E. & W. faces for Closing Cor. to Tps. 4 N., R's 2 & 3 W.; from which
A —, — ins. diam. bears S — ° E. — lks. dist. marked T. 4 N. R. 2 W. S. 6, B. T.
A —, — ins. diam. bears S — ° W. — lks. dist. marked T. 4 N. R. 3 W. S. 1, B. T.
A —, — ins. diam. bears N — ° W. — lks. dist. marked T. 5 N. R. 2 W. S. 31, B. T.
SEC. 9. All Closing Township Corners must be connected with the nearest corner on the Standard line.

STANDARD SECTION CORNERS.

Stone with Pits and Mound.

SEC. 1. Set a — stone — × — ins., in the ground, for Standard Cor. to (e. g.) Secs. 35 & 36, marked S. C., with 1 notch on E. and 5 notches on W. edges, dug pits, 18×18×12 ins., N., E. & W. of stone, 5½ ft. dist., and raised a mound of earth, 2 ft. high, 4½ ft. base alongside.

Stone with Mound of Stone.

SEC. 2. Set a — stone — × — × — ins., — ins. in the ground, for Standard Cor. to (e. g.) Secs. 33 & 34, marked S. C., with 3 notches on E. & W. edges, and raised a mound of stone alongside. Pits impracticable.

Stone with Bearing Trees.

SEC. 3. Set a stone — × — × — ins., — ins. in the ground, for Standard Cor. to (e. g.) Secs. 35 & 36, marked S. C., with 1 notch on E and 5 notches on W. edges; from which
A —, — ins. diam. bears N — ° E. — lks. dist. marked T. 5 N. R. 3 W. S. 36, B. T.
A —, — ins. diam. bears N — ° W. — lks. dist. marked T. 5 N. R. 3 W. S. 35, B. T.
A —, — ins. diam. bears S — ° E. — lks. dist. marked T. 4 N. R. 3 W. S. 2, B. T.

Post in Mound.

SEC. 4. Set a post, 4 ft. long, 4 ins. square, with marked stone (charred stake or quart of charcoal) 12 ins. in the ground, for Standard Cor. to (e. g.) Secs. 35 & 36, marked
S. C. T. 5 N. R. 3 W., on N.
S. 36, on E. and
S. 35 on W. faces, with 1 notch on E. and 5 notches on W. faces, dug pits, 18×18×12 ins., N., E. and W. of post, 5½ ft. dist. and raised a mound of earth 2 ft. high, 4½ ft. base round post.

Post with Bearing Trees.

SEC. 5. Set a post 4 ft. long, 4 ins. square, 24 ins. in the ground, for Standard Cor. to (e. g.) Secs. 35 & 36, marked
S. C. T. 5 N. R. 3 W., on N.
S. 36, on E. and
S. 35 on W. faces, with 1 notch on E. and 5 notches on W. faces; from which
A —, — ins. diam. bears N — ° E. — lks. dist. marked T. 5 N. R. 3 W. S. 36, B. T.
A —, — ins. diam. bears N — ° W. — lks. dist. marked T. 5N. R. 3 W. S. 35, B. T.
A —, — ins. diam. bears S — ° E. — lks. dist. marked T. 4 N. R. 3 W. S. 2, B. T.

Mound without Post or Stone.

SEC. 6. Deposited a marked stone (charred stake or quart of charcoal) 12 ins. in the ground, for Standard Cor. to (e. g.) Secs. 33 & 34, dug pits, 18×18×12 ins., N., E. and W. of corner, 5½ ft. dist., and raised a mound

of earth 2 ft. high, 4½ ft. base over it. In E. pit drove a stake 2 ins. square, 2 ft. long, 12 ins. in the ground, marked
T. 5 N. R. 3 W., S. C. on N.
S. 34 on E. and
S. 33 on W. faces, with 3 notches on E. & W. faces.

Tree Corner without Bearing Trees.

SEC. 7. A —, — ins, diam., which I marked (c. g.)
S. C. T. 5 N. R. 3 W., on N.
S. 36 on E. and
S. 35 on W. faces, with 1 notch on E. and 5 notches on W. faces, dug pits, 18×18×12 ins. N., E. & W. of tree, 5½ ft. dist. and raised a mound of earth around tree, for Standard Cor. to Secs. 35 & 36.

Tree Corner with Bearing Trees.

SEC. 8. A —, — ins. diam., which I marked (c. g.)
S. C. T. 5 N. R. 3 W., on N.
S. 36, on E. and
S. 35 on W. faces, with 1 notch on E. and 5 notches on W. faces, for Standard Cor. to Secs. 35 & 36; from which
A —, — ins. diam. bears N —° E. — lks. dist. marked T. 5 N. R. 3 W. S 36, B. T.
A —, — ins. diam. bears N —° W.— lks. dist. marked T. 5 N. R. 3 W. S. 35, B. T.
A —, — ins. diam. bears S —° E. — lks. dist. marked T. 4 N. R. 3 W. S. 2, B. T.

SECTION CLOSING CORNERS.

Stone with Pits and Mound.

SEC. 1. Set a — stone — × — × — ins., — ins. in the ground, for Closing Cor. to (c. g.) Secs. 1 & 2, marked C. C., with 1 notch on E. and 5 notches on W. edges, dug pits, 18×18×12 ins. S., E. & W. of stone, 5½ feet dist., and raised a mound of earth 2 ft. high, 4½ ft. base alongside.

Stone with Mound of Stone.

SEC. 2. Set a — stone — × — × — ins., — ins. in the ground, for Closing Cor. to (e. g.) Secs. 3 & 4, marked C. C., with 3 notches on E. and W. edges, & raised, a mound of stone alongside. Pits impracticable.

Stone with Bearing Trees.

SEC. 3. Set a — stone — × — × — ins. — ins. in the ground, for Closing Cor. to (c. g.) Secs. 1 & 2, marked C. C., with 1 notch on E. and 5 notches on W. edges; from which
A —, — ins. diam. bears S —° E. — lks. dist. marked T. 4 N. R. 3 W. S. 1, B. T.
A —, — ins. diam. bears S —° W. — lks. dist. marked T. 4 N. R. 3 W. S. 2, B. T.
A —, — ins. diam. bears N —° E. — lks. dist. marked T. 5 N. R. 3 W. S. 36, B. T.

Post in Mound.

SEC. 4. Set a post 4 ft. long, 4 ins. square, with marked stone, (charred stake or quart of charcoal) 12 ins. in the ground for Closing Cor. to (e. g.) Secs. 1 & 2, marked.
C. C. T. 4 N. R. 3 W., on S.
S. 1. on E. and
S. 2 on W. faces, with 1 notch on E. and 5 notches on W. faces dug pits, 18×18×12 ins., S., E. & W. of post 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base around post.

Post with Bearing Trees.

SEC. 5. Set a post 4 ft. long, 4 ins. square, 24 ins. in the ground, for Closing Cor. to (e. g.) Secs. 1 & 2, marked
C. C. T. 4 N. R. 3 W., on S.
S. 1, on E. and
S. 2 on W. faces, with 1 notch on E. and 5 notches on W. faces; from which
A —, — ins. diam. bears S — ° E. — lks. dist. marked T. 4 N. R. 3 W. S. 1, B. T.
A —, — ins. diam. bears S — ° W. — lks. dist. marked T. 4 N. R. 3 W. S. 2, B. T.
A —, — ins. diam. bears N — ° E. — lks. dist. marked T. 5 N. R. 3 W. S. 36, B. T.

Mound without Post or Stone.

SEC. 6. Deposited a marked stone (charred stake or quart of charcoal) 12 ins. in the ground, for Closing Cor. to (e. g.) Secs. 3 & 4, dug pits, 18×18×12 ins., S., E. & W. of Cor., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base over it. In E. pit drove a stake, 2 ins. square, 2 ft. long, 12 ins. in the ground, marked
C. C. T. 4 N. R. 3 W., on S.
S. 3, on E. and
S. 4 on W. faces, with 3 notches on E. & W. faces.

Tree Corner without Bearing Trees.

SEC. 7 A —, — ins. diam., which I marked (e. g.) C. C. T. 4 N. R. 3 W., on S.
S. 1, on E. and
S. 2 on W. faces, with 1 notch on E. and 5 notches on W. faces, dug pits 18 × 18 × 12 ins. S., E. & W. of tree, 5½ ft. dist., and raised a mound of earth around tree, for closing Cor. to Secs. 1 & 2.

Tree Corner with Bearing Trees.

SEC. 8. A —, — ins. diam., which I marked (e. g.) C. C. T. 4 N. R. 3 W., on S.
S. 1, on E. and

S. 2 on W. faces, with one notch on E. and 5 notches on W. faces, for Closing Cor. to Secs. 1 & 2; from which

A —, — ins. diam. bears S — ° E. — lks. dist. marked T. 4 N. R. 3 W. S. 1, B. T.
A —, — ins. diam. bears S — ° W. — lks. dist. marked T. 4 N. R. 3 W. S. 2, B. T.
A —, — ins. diam. bears N — ° E. — lks. dist. marked T. 5 N. R. 3 W. S. 36, B. T.

Connection Lines.

SEC. 9. All Section Closing Corners must be connected with the nearest corner on the Standard line.

CORNERS COMMON TO 4 TOWNSHIPS.

Stone with Pits and Mound.

SEC. 1. Set a — stone — × — × — ins., — ins. in the ground for Cor. to (e. g.) Tps. 2 & 3 N. R's 2 & 3 W., marked with 6 notches on each edge, dug pits, 24 × 18 × 12 ins. lengthwise on each line, N., S., E. & W. of stone, 6 ft. dist., and raised a mound of earth 2½ ft. high, 5 ft. base alongside.

Stone with Mound of Stone.

SEC. 2. Set a — stone — × — × ins., — ins. in the ground, for Cor. to (e. g.) Tps. 2 & 3 N. R's 2 & 3 W. marked with 6 notches on each edge, and raised a mound of stone alongside. Pits impracticable.

Stone with Bearing Trees.

SEC. 3. Set a — stone — × — × — ins., — ins. in the ground, for Cor. to (e. g.) Tps. 2 & 3 N. R. 2 & 3 W. marked with 6 notches on each edge; from which

A —, — ins. diam. bears N — ° E. — lks. dist. marked T. 3 N. R. 2 W. S. 31, B. T.
A —, — ins. diam. bears S — ° E. — lks. dist. marked T. 2 N. R. 2 W. S. 6, B. T.
A —, — ins. diam. bears S — ° W. — lks. dist. marked T. 2 N. R. 3 W. S. 1, B. T.
A —, — ins. diam. bears N — ° W. — lks. dist. marked T. 3 N. R. 3 W. S. 36, B. T.

Post in Mound.

SEC. 4. Set a post, 4½ ft. long, 4 ins. square, with marked stone (charred stake or quart of charcoal) 12 ins. in the ground, for Cor. to (e. g.) Tps. 2 & 3 N. R's 2 & 3 W. marked

T. 3 N. S. 31, on N. E.
R. 2 W. S. 6, on S. E.
T. 2 N. S. 1, on S. W. and
R. 3 W. S. 36 on N. W. faces, with 6 notches on each edge, dug pits, 24 × 18 × 12 ins., lengthwise on each line, N., S., E. & W. of post, 6 ft. dist., and raised a mound of earth 2½ ft. high, 5 ft. base around post.

Post with bearing Trees.

SEC. 5. Set a post 4½ ft. long, 4 ins. square, 24 ins. in the ground, for Cor. to (e. g.) Tps. 2 & 3 N. R's 2 & 3 W. marked

T. 3 N. S. 31, on N. E.
R. 2 W. S. 6, on S. E.
T. 2 N. S. 1, on S. W. and
R. 3 W. S. 36 on N. W. faces, with 6 notches on each edge; from which

A —, — ins. diam. bears N — ° E. — lks. dist. marked T. 3 N. R. 2 W. S. 31, B. T.
A —, — ins. diam. bears S — ° E. — lks. dist. marked T. 2 N. R. 2 W. S. 6, B. T.
A —, — ins. diam. bears S — ° W. — lks. dist. marked T. 2 N. R. 3 W. S. 1, B. T.
A —, — ins. diam. bears N — ° W. — lks. dist. marked T. 3 N. R. 3 W. S. 36, B. T.

Mound without Post or Stone.

SEC. 6. Deposited a marked stone (charred stake or quart of charcoal) 12 ins. in the ground for Cor. to (e. g.) Tps. 2 & 3 N. R's 2 & 3 W., dug pits, 24 × 18 × 12 ins., lengthwise on each line, N., S., E. & W. of cor., 6 ft. dist., and raised a mound of earth 2½ ft. high, 5 ft. base over it. In S. E. pit drove a stake 2 ins. square, 2 ft. long, 12 ins. in the ground, marked

T. 3 N. S. 31, on N. E.
R. 2 W. S. 6, on S. E.
T. 2 N. S. 1 on S. W. and
R. 3 W. S. 36, on N. W. faces, with 6 notches on each edge,

Tree Corner without Bearing Trees.

SEC. 7. A —, — ins. diam., which I marked (e. g.) T. 3 N. S. 31, on N. E.
R. 2 W. S. 6, on S. E.
T. 2 N. S. 1, on S. W. and
R. 3 W. S. 36 on N. W. faces, with 6 notches on each edge, dug pits, 24 × 18 × 12 ins. lengthwise on each line, N., S., E. & W. of tree, 6 ft. dist., and raised a mound of earth around tree, for Cor. to Tps. 2 & 3 N. R's 2 & 3 W.

Tree Corner with Bearing Trees.

SEC. 8. A —, — ins. diam., which I marked (e. g.) T. 3 N. S. 31, on N. E.
R. 2 W. S. 6, on S. E.
T. 2 N. S. 1, on S. W. and
R. 3 W. S. 36, on N. W. faces, with 6 notches on each edge, for Cor. to Tps. 2 & 3 N. R's 2 & 3 W. from which

A —, — ins. diam. bears N — ° E. — lks. dist. marked T. 3 N. R. 2 W. S. 31, B. T.
A —, — ins. diam. bears S — ° W. — lks. dist. marked T. 2 N, R. 3 W. S. 1, B. T.
A —, — ins. diam. bears S — ° E. — lks. dist. marked T. 2 N. R. 2 W. S. 6, B. T.
A —, — ins. diam. bears N — ° W. — lks. dist. marked T. 3 N. R. 3 W. S. 36, B. T.

CORNERS COMMON TO 4 SECTIONS.

Stone with Pits and Mound.

SEC. 1. Set a — stone — × — × — ins. — ins. in the ground for Cor. to (e. g.) Secs. 25, 26, 35 & 36, marked with 1 notch on S. & E. edges, dug pits, 18 × 18 × 12 ins. in each Sec., 5½ ft., dist., and raised a mound of earth 2 ft. high, 4½ ft. base alongside.

Stone with Mound Stone.

SEC 2. Set a — stone — × — × — ins. — ins. in the ground, for Cor. to (e. g.) Secs. 14, 15, 22 & 23, marked with 3 notches on S. and 2 notches on E. edges, and raised a mound of stone alongside. Pits impracticable.

Stone with Bearing Trees.

SEC. 3. Set a — stone — × — × — ins. — ins. in the ground, for Cor. to (e. g.) Secs. 9, 10, 15 & 16, marked with 4 notches on S. & 3 notches on E. edges, from which

A —, — ins. diam. bears N — °E.— lks. dist. marked T. 2 N. R. 2 W. S. 10, B. T.
A —, — ins. diam. bears S — °E.— lks. dist. marked T. 2 N. R. 2 W. S. 15, B. T.
A —, — ins. diam. bears S — °W.— lks. dist. marked T. 2 N. R. 2 W. S. 16, B. T.
A —, — ins. diam. bears N.— °W.— lks. dist. marked T. 2 N. R. 2 W. S. 9, B. T.

Post in Mound.

SEC. 4. Set a post 4 ft. long, 4 ins. square, with marked stone (charred stake or quart of charcoal) 12 ins. in the ground, for Cor. to (e. g.) Secs. 15, 16, 21, & 22, marked

T. 2 N. S. 15, on N. E.
R. 2 W. S. 22, on S. E.
S. 21, on S. W. and

S. 16 on N. W. faces, with 3 notches on S. & E. edges, dug pits, 18×18×12 ins. in each Sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base around post.

Post with Bearing Trees.

SEC. 5. Set a post 4 ft. long, 4 ins. square, 24 ins. in the ground, for Cor. to (e. g.) Secs. 25, 26, 35 & 36, marked

T. 2 N. S. 25, on N. E.
R. 2 W. S. 36, on S. E.
S. 35, on S. W. and

S. 26, on N. W. faces, with 1 notch on S. & E. edges; from which

A —, — ins. diam. bears N — °E.— lks. dist. marked T. 2 N. R. 2 W. S. 25, B. T.
A —, — ins. diam. bears S — °E.— lks. dist. marked T. 2 N. R. 2 W. S. 36, B. T.
A —, — ins. diam. bears S — °W.— lks. dist. marked T. 2 N. R. 2 W. S. 35, B. T.
A —, — ins. diam. bears N — °W.— lks. dist. marked T. 2 N. R. 2 W. S. 26, B. T.

Mound without Post or Stone.

SEC. 6. Deposited a marked stone (charred stake or quart of charcoal) 12 ins. in the ground, for Cor. to (e. g.) Secs. 25, 26, 35 & 36, dug pits, 18×18×12 ins. in each Sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base over it.

In S. E. pit drove a stake 2 ins. square, 2 ft. long, 12 ins in the ground, marked

T. 2 N. S. 25, on N. E.
R. 2 W. S. 36, on S. E.
S. 35, on S. W. and

S. 26 on N. W. faces, with 1 notch on S. & E. edges.

Tree Corner without Bearing Trees.

SEC. 7. A —, — ins. diam., which I marked (e. g.)
T. 2 N. S. 29, on N. E.
R. 2 W. S. 32, on S. E.
S. 31, on S. W. and

S. 30, on N. W. faces, with 1 notch on S. and 5 notches on E. edges, dug pits, 18×18×12 ins. in each sec. 5½ ft. dist. and raised a mound of earth around tree, for Cor. to Secs. 29, 30, 31 & 32.

Tree Corner with Bearing Trees.

SEC. 8. A—, — ins. diam., which I marked (e. g.) T. 2 N. S. 5, on N. E.
R. 2 W. S. 8, on S. E.
S. 7, on S. W. and

S. 6, on N. W. faces, with 5 notches on S. & E, edges, for Cor. to Secs. 5, 6, 7 & 8; from which

A —, — ins. diam. bears N —° E. — lks. dist. marked T. 2 N. R. 2 W. S. 5, B. T.
A —, — ins. diam. bears S —° E. — lks. dist. marked T. 2 N. R. 2 W. S. 8, B. T.
A —, — ins. diam. bears S —° W. — lks. dist. marked T. 2 N. R. 2 W. S. 7, B. T.
A —, — ins. diam. bears N —° W. — lks. dist. marked T. 2 N. R. 2 W. S. 6, B. T.

ARTICLE X.

QUARTER SECTION CORNERS.

Stone with Pits and Mound.

SEC. 1. Set a — stone — × — × — ins., — ins. in the ground, for ¼ Sec. Cor., marked ¼ on N. (or W.) face, dug pits, 18×18×12 ins., N. & S., (or E. & W.) of stone 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base alongside.

Stone with Mound of Stone.

SEC. 2. Set a — stone —×—×— ins. — ins. in the ground, for ¼ Sec. Cor., marked ¼ on N. (or W.) face, and raised a mound of stone alongside. Pits impracticable.

Stone with Bearing Trees.

SEC. 3. Set a — stone —×—×— ins., — ins. in the ground, for ¼ Sec. Cor. marked ¼ on N. (or W.) face; from which

A —, — ins. diam. bears N —° E. — lks. dist. marked ¼ S. B. T.

A —, — ins. diam. bears S —° W. — lks. dist. marked ¼ S. B. T.

Post in Mound.

SEC. 4. Set a post 3 ft. long, 3 ins. square, with marked stone (charred stake or quart of charcoal) 12 ins. in the ground, for ¼ Sec. Cor., marked ¼ S. on N. (or W.) face, dug pits, 18×18×12 ins., N. & S., (or E. and W.) of post 5½ ft. and dist., raised a mound of earth 1½ ft. high, 3½ ft. base around post.

Post with Bearing Trees.

SEC. 5. Set a post 3 ft. long, 3 ins. square, 24 ins. in the ground, for ¼ Sec. Cor., marked ¼ S. on N. (or W.) face; from which

A —, — ins. diam., bears N. —° E., —lks., dist. marked ¼ S. B. T.

A —, — ins. diam., bears S. —° W., —lks., dist. marked ¼ S. B. T.

Mound without Post or Stone.

SEC. 6. Deposited a marked stone (charred stake or quart of charcoal) 12 ins. in the ground, for ¼ Sec. Cor., dug pits, 18×18×12 ins., N. & S., (or E. & W.) of post 5½ ft. dist. and raised a mound of earth 1½ ft. high, 3½ ft. base over it. In E. (or N.) pit drove a stake 2 ft. long, 2 ins. square, 12 ins. in the ground, marked ¼ S. on N. (or W.) face.

Tree Corner without Bearing Trees.

SEC 7. A—, — ins. diam., which I marked ¼ S. on N. (or W.) face, for ¼ Sec. Cor., dug pits, 18×18×12 ins. N. & S. (or E. & W.) of tree, 5½ ft. dist. and raised a mound of earth around tree.

Tree Corner with Bearing Trees.

SEC. 8. A —, — ins. diam., which I mark ¼ S. on N. (or W.) face, for ¼ Sec Cor.; from which

A —, — ins. diam. bears N —° E. — lks. dist. marked ¼ S. B. T.

A —, — ins. diam. bears S —° W. — lks. dist. marked ¼ S. B. T.

Marks.

SEC. 9. On N. and S. lines the marks must be made on W. side, and on E. and W. lines on N. side of the stone, post or tree.

Pits.

SEC. 10. On N. & S. lines, the pits must be dug N. & S. of Cor. and on E. & W. lines, E, & W, of Cor.

Stakes in Pits.

SEC. 11. On N. & S. lines, the stakes must be driven in N. pit, and on E. & W. lines, in E. pit.

STANDARD QUARTER SECTION CORNERS.

All Quarter Section Corners on Standard lines must be established in all respects like other Quarter Section Corners, with the addition of the letters S. C., and if bearing trees are established for such Corners, each tree must be marked S. C. ¼ S. B. T.

MEANDER CORNERS.

Stone with Pits and Mound.

SEC. 1. Set a — stone — × — × — ins., — ins. in the ground, for Meander Cor. to (e. g.) Fractional Secs. 1 & 2, marked M. C., dug a pit 3 ft. square, 1 ft. deep, 8 lks. — of stone, and raised a mound of earth 2 ft. high, 4½ ft. base alongside.

Stone with Mound of Stone.

SEC. 2. Set a — stone — × — × — ihs.,— ins. in the ground for Meander Cor. to (e. g.) Fractional Secs. 35 & 36, marked M. C., and raised a mound of stone 2 ft. high, 4½ ft. base alongside. Pits impracticable.

Stone with Bearing Trees.

SEC. 3. Set a — stone — × — × — ins., — ins. in the ground for Meander Cor. to (e. g.) Fractional Secs., 9 & 10, marked M. C.; from which

A —, — ins. diam. bears S —° E. — lks., dist. marked T. 2 N. R. 2 W. S. 10, M. C. B. T.

A —, — ins. diam. bears S —° W. — lks. dist. marked T. 2 N. R. 2 W. S. 9, M. C. B. T.

Post in Mound.

SEC. 4. Set a post 4 ft. long, 4 ins. square, with marked stone (charred stake or quart of charcoal) 12 ins. in the ground, for Meander Cor. to (e. g.) Fractional Secs. 35 & 36, marked M. C., with

T. 2 N. on N.

R. 2 W. S. 36, on E. and

S. 35 on W. faces, dug a pit, 3 ft. square, 1 ft. deep, 8 lks.— of post, and raised a mound of earth 2 ft. high, 4½ ft. base, around post.

Post with Bearing Trees.

SEC. 5. Set a post 4 ft. long, 4 ins. square, 24 ins. in the ground, for Meander Cor. to (e. g.) Fractional Secs. 20 & 21, marked M. C. with

T. 2 N. on S.

R. 2 W. S. 21 on E. and

S. 20 on W. faces; from which

A —, — ins. diam., bears S —° E. — lks., dist. marked T. 2 N. R. 2 W. S. 21, M. C. B. T.

A —, — ins. diam., bears S —° W. — lks., dist. marked T. 2 N. R. 2 W. S. 20, M. C. B. T.

Mound without Post or Stone.

SEC. 6. Deposited a marked stone (charred stake or quart of charcoal) 12 ins. in the ground, for Meander Cor. to (e. g.) Fractional Secs. 11 & 12, dug a pit, 3 ft. square, 1 ft. deep, 8 lks.— of Cor., and raised a mound of

earth 2 ft. high, 4½ ft. base, over it. In pit drove a stake 2 ins. square, 2 ft. long, 12 ins. in the ground, marked M. C. with
T. 2 N. on S.
R. 2 W. S. 12 on E. and
S. 11 on W. faces.

Tree Corner without Bearing Trees.

SEC. 7. A —, — ins. diam., which I marked (c. g.) M. C. with T. 2 N. on W.
R. 2 W. S. 13 on N. and
S. 24 on S. faces, for Meander Cor. to Fractional Secs. 13 & 24.

Tree Corner with Bearing Trees.

SEC. 8. A —, — ins. diam., which I marked (c. g.) M. C. with T. 2 N. on E.
R. 2 W. S. 6 on N. and
S. 7 on S. faces, for Meander Cor. to Fractional Secs. 6 & 7; from which
A —, — ins. diam. bears N — ° W.— lks. dist. marked T. 2 N. R. 2 W. S. 6, M. C. B. T.
A —, — ins. diam. bears S — ° W.—lks. dist. marked T. 2 N. R. 2 W. S. 7, M. C. B. T.

Pits.

SEC. 9. When a pit is dug at a Meander Cor. it must be 8 lks. from the Cor., on the side opposite the river or lake meandered.

Marks.

SEC. 10. The letters "M. C." for Meander Corner must be marked on the side facing the river or lake meandered.

WITNESS CORNERS.

A Witness Corner must bear the same marks that would be placed upon the Corner for which it is a witness, with the addition of the letters W. C., and be established in all respects like such Corner.

If bearing trees are established for a Witness Corner, each tree must be marked W. C., in addition to the usual marks.

MISCELLANEOUS.

Rock in Place.

SEC. 1. When a rock in place is established for a Corner, its dimensions above ground must be given, and a cross (×) marked at exact Corner point. In other respects form for stone corners will be used.

Mounds of Earth.

SEC. 2. Where mounds of earth are raised "alongside" of Corners, on N. and S. lines, they must be placed on the W. and on E. and W. lines on the N. side of Corner. In case the character of the land is such that this cannot be done, the deputy will state in his notes instead of "alongside," "S" (on E.)

Mounds of Stone.

SEC. 3. In case where pits are practicable, the deputy prefers raising a mound of stone, or stone covered with earth, as more likely to perpetuate the Corner, he will use the form given for mound of stone, omitting the words "pits impracticable," and adding "covered with earth," when so established.

Bearing Trees.

SEC. 4. Where the requisite number of trees can be found within 300 links of the Corner point, three (3) bearing trees should be established for every Standard or Closing Cor., four (4) for every Cor. common to 4 Townships or Sections, and two (2) for every Quarter Sec. Cor. or Meander Cor. In case the requisite number cannot be found within limits, the deputy must state in his field notes after describing those established, "no other trees within limits," and "dug pits in Secs. — & —," or "raised a mound of stone alongside."

Stones.

SEC. 5. Stones 18 ins. and less long must be set two-thirds, and over 18 ins. long, three-fourths of their length in the ground. No stones containing less than 504 cubic inches must be used for corners.

Objects to be Noted.

SEC. 6. Particular attention is called to the "Summary of objects and data required to be noted," on pages — and — of these instructions, and it is expected that the deputy will thoroughly comply with same in his work and field notes.

Lines Discontinued at Legal corners.

SEC. 7. No mountains, swampy lands, or lands not classed as surveyable are to be meandered, and all lines approaching such lands must be discontinued at the section or quarter section corner.

Fractional Townships.

SEC. 8. Where by reason of impassable objects the south boundary of a township cannot be established, an east and west line should be run through the Township, first random, then corrected, from one range line to the other, and as far south as possible, and from such line the section lines will be extended in the usual manner, except over any fractions south of said line, which

may be surveyed in the opposite direction from the Section Corners on the auxiliary base thus established.

Boundaries. SEC. 9. When no part of the east or west boundaries can be run, both the north and south boundaries will be established as true lines.

Convergency. SEC. 10. Allowance for the convergency of Meridians must be made whenever necessary.

Red Chalk. SEC. 11. All letters and figures cut in posts or trees must be marked over with red chalk to make them still more plain and durable.

Mode of Setting Corners. SEC. 12. Township corners common to four townships, and section corners common to four sections, are to be set diagonally in the earth, with the angles in the direction of the lines. All other corners are to be set square, with the sides facing the direction of the lines.

Size of Posts, etc. SEC. 13. The sizes of wooden posts, mounds, and pits noted in foregoing descriptions of corners are to be regarded as *minimum*, and whenever practicable to increase their dimensions it is desirable to do so.

Corner Materials. SEC. 14. In establishing corners, stones should be used wherever practicable; then, posts; and lastly, mounds, with stake in pit.

Examine Instructions. SEC. 15. It is expected that the deputy surveyors will carefully read and familiarize themselves with these instructions, and all others contained in this volume, and will instruct their assistants as to their duties before commencing work. Extra copies will be furnished the deputies for the use of their assistants.

MEANDERING.

SEC. 1. Proceeding *down* stream, the bank on the *left* hand is termed the "left bank," and that on the *right* hand the "right bank." These terms are to be universally used to distinguish the two banks of a river or stream.

SEC. 2. Both banks of *navigable* rivers are to be meandered by taking the general courses and distances of their sinuosities, and the same are to be entered in the field book.

At those points where either the township or section lines intersect the banks of a navigable stream, corners are to be established at the time of running these lines. These are called "meander corners"; and in meandering you are to commence at one of those corners, coursing the banks, and measuring the distance of each course from your commencing corner to the next "meander corner." By the same method you are to meander the opposite bank of the same river.

The crossing distance *between* the MEANDER CORNERS on same line is to be ascertained by triangulation, in order that the river may be protracted with entire accuracy. The particulars to be given in the field notes.

Rivers not embraced in the class denominated "navigable" under the statute, but which are well-defined natural arteries of internal communication, will only be meandered *on one bank*. For the sake of uniformity, the surveyor will traverse the *right bank* when not impracticable; but where serious obstacles are met with, rendering it difficult to course along the right bank, he may cross to the left bank and continue the meanders as far as necessary; but all changes from one bank to the other will be made at the point of intersection of some line of the public surveys with the stream being meandered.

The subdividing deputies will be required to establish meander corners on both banks of such meanderable streams at the intersection of all section lines, and the distances across the river will be noted in the field book.

In meandering water-courses, where a distance is more than *ten chains* between stations, even chains only should be taken; but if the distance is *less* than ten chains, and it is found convenient to employ chains and links, the number of links should be a multiple of ten, thereby saving time and labor in testing the closings both in the field and in the surveyor-general's office.

SEC. 3. You are also to meander, in manner aforesaid, all lakes, bayous, and deep ponds, which may serve as public highways of commerce. Shallow lakes or ponds, readily to be drained or likely to dry up, are not to be meandered. Lakes, bayous, and ponds lying entirely within a section are not to be meandered.

In meandering lakes, bayous, or ponds you are to commence at a meander corner, and proceed as above directed for meandering the banks of navigable streams; and from said corner take the courses and distances of the entire margin of the same, noting the intersections with all meander corners established thereon.

You will notice all streams of water falling into the river, lake, or bayou you are surveying, stating the width of the same at their mouth; also all springs, noting the size thereof and depth, and whether the water be pure or mineral; also the head and mouth of all bayous; and all islands, rapids, and bars are to be noticed, with inter-

sections to their upper and lower points to establish their exact situation. You will also note the elevation of the banks of rivers and streams, the heights of falls and cascades, and the length of rapids.

SEC. 4. Meander lines should not be established at the segregation line between dry and swamp or overflowed land, but at the ordinary low-water mark of the actual margin of the rivers or lakes on which such swamp or overflowed lands border. In cases where such meander lines were formerly established at the segregation line between dry and swamp or overflowed lands, new and proper meander lines may be established under the direction of the surveyor-general, and the township and section lines extended over such swamp or overflowed lands and the corners established, as hereinbefore provided, in order that the plats and field-notes of surveys may show the actual facts in the case.

5. The precise relative position of islands, in a township made fractional by the river in which the same are situated, is to be determined trigonometrically; sighting to a flag or other fixed object on the island, from a special and carefully measured base line, connected with the surveyed lines, on or near the river bank, you are to form connection between the meander corners on the river to points corresponding thereto, in direct line, on the bank of the island, and there establish the proper meander corners, and calculate the distance across.

6. In taking the connection of an island with the main land, when there is no meander corner in line, opposite thereto, to sight from, you will measure a special base from the meander corner nearest to such island, and from such base you will triangulate to some fixed point on the shore of the island, ascertain the distance across and there establish a *special* meander corner, wherefrom you will commence to meander the island.

7. The field-notes of meanders will be set forth in the field-books showing the dates when the work is performed, as illustrated in the specimen notes annexed. They are to state and describe particularly the meander corner from which they commenced, and each one upon which they close, and are to exhibit the meanders of each fractional section separately; following, and composing a part of such notes, will be given a description of the land, timber, depth of inundation to which the bottom is subject, and the banks, current, and bottom of the stream or body of water you are meandering. The utmost care must be taken to pass no object of topography, *or change therein*, without giving a particular description thereof in its proper place in your meander notes.

SURVEYING.

Initial points from which the lines of the public surveys are to be extended must be established whenever necessary under such special instructions as may be prescribed in each case by the Commissioner of the General Land Office. The locus of such initial points must be selected with great care and due consideration for their prominence and easy identification, and must be established astronomically.

The initial point having been established, the lines of the public surveys are to be extended therefrom as follows:

BASE LINE.

The base line shall be extended east and west from the initial point by the use of solar instruments or transits, as may be directed by the surveyor-general, in his special written instructions. Where solar instruments are used, the deputy must test said instruments in every 12 miles of line run, by taking the latitude, or by observation on the polar star; and in all cases where he has reason to suppose that said instrument is in error, he must take an observation on the polar star, and if error be found, must make the necessary corrections before proceeding with his survey. The proper corners shall be established at each 40 and 80 chains, and at the intersection of the line with rivers, lakes, or bayous that should be meandered, in accordance with the instructions for the establishment of corners. In order to check errors in measurement, two sets of chainmen, operating independently of each other, must be employed.

Where transits are used, the line will be run by setting off at the point of departure on the principal meridian, a tangent to the parallel of latitude, which will be a line falling at right angles to the said meridian. The survey will be continued on this line for twelve (12) miles, but the corners will be established at the proper points by offsets northerly from said line, at the end of each half mile. In order to offset correctly from the tangent to the parallel, the deputy will be guided by the table of offsets and azimuths contained in this volume. As the azimuth of the tangent is shown, the angle thence to the true meridian at each mile is readily found, thus indicating the direction of the offset line. The computations are made for a distance of 12 miles, at the end of which observations on the polar star must be taken for the

projection of a new tangent. The computations are also upon even degrees of latitude; offsets for intervening parallels can be readily determined by interpolation. Where offset distances to quarter-section corners exceed 50 links, their direction to the parallel can be determined in like manner by interpolation for azimuth.

Where said distances are less than 50 links interpolations for determining directions will not be required.

PRINCIPAL MERIDIAN.

The principal meridian shall be extended north and south from the initial point, by the use of solar instruments or transits, as may be directed by the surveyor-general in his special written instructions. Where solar instruments are used, the line will be run in the same manner as prescribed for running the base line by solar instruments. Where transits are used, observations upon the polar star must be taken within each 12 miles of line run. In addition to the above general instructions, it is required that in all cases where the establishment of a new principal meridian seems to be necessary to the surveyor-general, he shall submit the matter, together with his reasons therefor, to the Commissioner of the General Land Office, and the survey of such principal meridian shall not be commenced until written authority, together with such special instructions as he may deem necessary, shall have been received from the Commissioner.

STANDARD PARALLELS.

Standard parallels, which are also called correction lines, shall be extended east and west from the principal meridian, at intervals of every 24 miles north and south of the base line, in the same manner as prescribed for running the base line.

AUXILLARY MERIDIANS.

Auxiliary meridians shall be extended north and south from the base line, at intervals of every 24 miles east and west from the principal meridian, in the same manner as prescribed for running the principal meridian.

It is contemplated that these base, principal meridian, standard, and auxiliary meridian lines shall first be extended over the territory to be surveyed, and that afterwards township and section lines shall be run, where needed, within these tracts of 24 miles square, formed by the extension of these principal lines; and each surveyor-general will therefore cause said principal lines to be extended as rapidly as practicable.

EXTERIORS OR TOWNSHIP LINES.

The east and west boundaries of townships are always to be run from south to north on a true meridian line; and the north and south boundaries are to be run from east to west, or from west to east (according to the location of the township to be surveyed with reference to prior surveys), on a *random* or trial line and corrected back on a true line. The distance north or south of the township corner to be closed upon, from the point of intersection of these random lines with the east or west boundary of the township, must be carefully measured and noted. Should it happen, however, that such random line should fall short, or overrun in length, or intersect the east or west boundary more than *three chains'* distance from the township corner thereon, as compared with the corresponding boundary on the south (due allowance being made for convergency), the line, and if necessary the entire exterior boundaries of the township, must be retraced, so as to discover and correct the error. In running random lines temporary corners are to be set at each 40 and 80 chains, and permanent corners established upon the true line as corrected back, in accordance with instructions, throwing the excess or deficiency on the west half mile, as prescribed by law. Permanent corners are to be established in accordance with instructions on the east and west township boundaries at the time they are run. Whenever practicable the township lines within these tracts of 24 miles square, must be surveyed in regular order from *south* to *north*, *i. e.*, the exterior boundaries of the township in any one range lying immediately north of the south boundary of such tract of 24 miles square must first be surveyed, and the exteriors of the other three townships in said range extended therefrom, in regular order from *south* to *north*, and it is preferable to first survey the entire range of townships in such tract adjoining the east boundary or adjoining the west boundary, and the other three ranges in regular sequence. In cases, however, where the character of the land is such that this rule cannot be complied with, the following will be observed.

In extending the *south* or *north* boundaries of a township to the *west* where the *southwest* or *northwest* corners cannot be established in the regular way by running a north and south line, such boundaries will be run *west on a true* line, allowing for conver-

gency on the west half mile; and from the township corner established at the end of such boundary, the west boundary will be run *north* or *south*, as the case may be. In extending *south* or *north* boundaries of a township to the *east*, where the *southeast* or *northeast* corner cannot be established in the regular way, the same rule will be observed, except that such boundaries will be run *east on a true line*, and the *east* boundary run *north* or *south*, as the case may be. One set of chainmen only is required in running township lines.

METHOD OF SUBDIVIDING.

1. The first mile, both of the south and east boundaries of each township you are required to subdivide, is to be carefully traced and measured before you enter upon the subdivision thereof. This will enable you to observe any change that may have taken place in the magnetic variation, as it existed at the time of running the township lines, and will also enable you to compare your chaining with that upon the township lines.

2. Any discrepancy arising either from a change in the magnetic variation or a difference in measurement, is to be carefully noted in the field-notes.

3. After adjusting your compass to a variation which you have thus found will retrace the eastern boundary of the township, you will commence at the corner to sections 35 and 36, on the south boundary, and run a line parallel to the range line, forty chains, to the quarter-section corner, which you are to establish between sections 35 and 36; continuing on said course forty chains farther, you will establish the corner to sections 25, 26, 35 and 36.

4. From the section corner last named run a *random* line, without blazing, *due east*, for the corner of sections 25 and 36, on east boundary, and at forty chains from the starting point set a post for *temporary* quarter-section corner. If you intersect exactly at the corner, you will blaze your random line back, and establish it as the *true* line; but if your random line intersects the said east boundary, either north or south of said corner, you will measure the distance of such intersection, from which you will calculate a course that will run a *true* line back to the corner from which your random started. You will establish the *permanent* quarter-section corner at a point equidistant from the two terminations of the *true* line.

5. From the corner of sections 25, 26, 35, and 36, run due north between sections 25 and 26, setting the quarter-section post as before, at forty chains, and at eighty chains establishing the corner of sections 23, 24, 25, and 26. Then run a random *due east* for the corner of sections 24 and 25 on east boundary; setting temporary quarter-section post at forty chains; correcting back, and establishing *permanent* quarter-section corner at the equidistant point on the *true* line, in the manner directed on the line between sections 25 and 36.

6. In this manner you will proceed with the survey of each successive section in the first tier, until you arrive at the north boundary of the township, which you will reach in running up a random line between sections 1 and 2. If this random line should not intersect at the corner established for sections 1, 2, 35, and 36, upon the township line, you will note the distance that you fall east or west of the same, from which distance you will calculate a course that will run a true line south to the corner from which your random started. If the north boundary of a township is a base or standard line, the line between sections 1 and 2 is to be run north as a *true* line, and the closing corner established at the point of intersection with such base or standard line; and in such case the distance from said closing corner to the nearest section or quarter-section corner on such base or standard line must be carefully measured and noted as a *connection line*.

7. In like manner proceed with the survey of each successive tier of sections, until you arrive at the fifth tier; and from each section corner which you establish upon this tier you are to run random lines to the corresponding corners established upon the range line forming the western boundary of the township; setting, as you proceed, each *temporary* quarter-section corner at forty chains from the interior section corner, so as to throw the excess or deficiency of measurement on the extreme tier of quarter-sections contiguous to the township boundary; and on returning establish the *true* line, and establish thereon the *permanent* quarter-section corner.

8. It is not required that the deputy shall complete the survey of the first tier of sections from south to north, before commencing the survey of the second or any subsequent tier, but the corner on which the random line closes must have been previously established by running the line north on which it is established, except as follows: Where it is impracticable to establish such section corner in the regular manner it may be established by running the east and west line *east* or *west*, as the case may be, *on a true line*, setting the quarter-section corner at 40 chains and the section corner at 80 chains.

9. Quarter-section corners, both upon north and south, and upon east and west lines, are to be established at a point *equidistant* from the corresponding section cor-

ners, *except* upon the lines closing on the north and west boundaries of the township, and in those situations the quarter-section corners will always be established at precisely *forty chains* to the north or west (as the case may be) of the respective section corners from which those lines respectively *start*, by which procedure the excess or deficiency in the measurements will be thrown, according to law, on the extreme tier of quarter-sections.

PRESCRIBED LIMITS FOR CLOSINGS AND LENGTH OF LINES IN CERTAIN CASES.

1. Every north-and-south section line, except those terminating in the north boundary of the township, must be *eighty chains* in length.

2. The east-and-west *section lines*, except those terminating in the west boundary of the township, are to be within *eighty links* of the actual distance established on the south boundary line of the township for the width of said tier of sections, and must close within eighty links north or south of the section corner.

3. The north boundary and south boundary of any one section, except in the extreme western tier, are to be within *eighty links* of equal length.

4. The meanders within each fractional section, or between any two meander posts, or of an island in the interior of a section, must close within one chain and fifty links.

5. In running *random* township exteriors, if such random lines fall short or overrun in length, or intersect the eastern or western boundary, as the case may be, of the township, at more than *three chains* north or south of the true corner, the lines must be *retraced*, even if found necessary to remeasure the meridional boundaries of the township. One set of chainmen, only, is required in subdividing.

SUBDIVISION OF SECTIONS.

Under the provisions of the act of Congress approved February 11, 1805, the course to be pursued in the subdivision of sections is to run straight lines from the established quarter-section corners—United States surveys—to the opposite corresponding corners, and the point of intersection of the lines so run will be the corner common to the several quarter-sections, or, in other words, the legal center of the section.

In the subdivision of fractional quarter-sections where no opposite corresponding sections have been or can be fixed, the subdivision lines should be ascertained by running from the established corners due north, south, east, or west lines, as the case may be, to the water-course, Indian boundary line, or other external boundary of such fractional section.

The law presupposes the section lines surveyed and marked in the field by the United States deputy surveyors to be due north and south or east and west lines, but in actual experience this is not always the case; hence, in order to carry out the spirit of the law, it will be necessary, in running the subdivisional lines through fractional sections, to adopt mean courses where the section lines are not due lines, or to run the subdivision line parallel to the section line when there is no opposite section line.

Upon the lines closing on the north and west boundaries of a township, the quarter-section corners are established by the United States deputy surveyors at precisely forty chains to the north or west of the last interior section corners, and the excess or deficiency in the measurement is thrown on the outer tier of lots, as per act of Congress approved May 10, 1800.

In the subdivision of quarter-sections the quarter-quarter corners are to be placed at points equidistant between the section and quarter-section corners and between the quarter corners and the common center of the section, *except* on the last half mile of the lines closing on the north or west boundaries of a township, where they should be placed at twenty chains, proportionate measurement, to the north or west of the quarter-section corner.

The subdivisional lines of fractional quarter-sections should be run from points on the section lines intermediate between the section and quarter-section corners due north, south, east, or west, to the lake, water-course, or reservation which renders such tracts fractional.

When there are double sets of section corners on township and range lines the quarter corners for the sections south of the township lines and east of the range lines are not established in the field by the United States surveyors, but in subdividing such sections said quarter corners should be so placed as to suit the *calculations of the areas of the quarter-sections adjoining the township boundaries* as expressed upon the official plat, adopting proportionate measurements where the present measurements of the north or west boundaries of the sections differ from the original measurements.

RE-ESTABLISHMENT OF LOST CORNERS.

The original corners, when they can be found, must stand as the true corners they were intended to represent, even though not exactly where strict professional care

might have placed them in the first instance. (See circular March 13, 1882, given in full at the end of this chapter.)

* * * * * * *

As has been observed, no existing original corner can be disturbed, and it will be plain that any excess or deficiency in measurements between existing corners cannot in any degree affect the distances beyond said existing corners, but must be added or subtracted proportionately to or from the intervals embraced between the corners which are still standing.

RETRACING TOWNSHIP LINES.

If, in subdividing a township, it is found that the exterior boundaries have been improperly run, measured, or marked, or the corners established thereon have been obliterated, the deputy will resurvey so much of said exterior boundaries as may be necessary, and establish new corners upon the same wherever necessary. Where no subdivisions have been made on either side of a township boundary, it will be corrected, if necessary, in point of alignment as well as measurement, by establishing the section corners at lawful distances from the south or east boundaries of the township (as the case may be), and upon a right line extending between the township corners; and in such case, the old corners on said township boundaries will be destroyed.

Where subdivisional lines have been closed upon a township boundary in advance of the preliminary survey of the same, its alignment will not be changed. If it is found necessary to establish new corners on such boundary they will receive only the marks referring to the sections in the township being subdivided, and the marks on the old corners on such boundary, which refer to such sections, will be obliterated.

In all cases such necessary corrections will be made as will place the section corners at the aforesaid lawful distances from the south or east boundary, in order that a legal subdivision of the township may be made, and where new corners are thus necessarily established, the distance, be it one hundred links or more, and direction between new and old corners must be carefully noted.

New corners on township boundaries must be established by a survey of such lines, and *in no case* will such corners be established from *data* acquired in running lines closing on such boundaries. One set of chainmen only is required in retracing township lines.

If, in the subdivision of part of a township, the lands to be surveyed cannot be reached by lines extending from the south boundary of the township, a line corresponding to the south boundary of the same shall be extended from some section corner on the east boundary of the township to the west boundary thereof, in order that it may constitute the south boundary of the surveyable area; from which subdivisional meridian lines will be projected northward, and the surveys carried forward in the same manner as for the subdivision of a full township, in order that regular and fractional areas shall occupy their true and legal positions.

Fragmentary portions of surveyable lands lying south of the provisional base last described may be included in the survey by extending lines *south* from the same in harmony with the general system.

When the proper point for the establishment of a section corner is inaccessible, and a witness monument can be erected upon each of the two lines which approach the same at distances not exceeding twenty chains therefrom, the quarter-sections depending thereon will be disposed of in the same manner as if the corner had been regularly established.

The witness monument must be marked as conspicuously as a section corner, and bearing trees used wherever possible.

The deputy will be required to furnish good evidence that the section corner is actually inaccessible.

When township or subdivision lines intersect the boundaries of confirmed private land claims, the latter must be retraced so far as may be necessary to establish the corners to the fractional sections at their proper places, and such corners must be established, in all respects, like meander corners, except that instead of the letters "M. C." the letters used to designate such private land claim must be marked on corners. In retracing the boundary of such claim the deputy must set stakes thereon, at each forty chains, where the ground is level, and on broken ground, at every spur, ridge, or other prominent point, and also at each angle formed by a change in the direction of such boundary.

FIELD NOTES.

The deputy surveyor will provide himself with proper blank books for his field notes, or same will be furnished to him by the surveyor-general, and in such books he must make a faithful, distinct, and minute record of everything officially done and observed by himself and his assistants, pursuant to instructions, in relation to run-

ning, measuring, and marking lines, establishing corners, &c., and present, as far as possible, a full and complete topographical description of the country surveyed.

From the *data* thus recorded at the time when the work is done on the ground, the deputy must prepare *true* field notes of the surveys executed by him, in the manner hereinafter prescribed, and return same to the surveyor-general, together with the required sketches, at the earliest practicable date after the completion of his work in the field.

The field notes of the survey of base, meridian, standard, exterior, and subdivision lines are each to be written in separate books.

The first, or title, page of the field-note book is to describe the subject-matter of the same, the locus of the survey, by whom surveyed, date of contract, and the dates of commencement and completion of the work. The second page is to contain the names and duties of the assistants, and the index is to be placed on same or following page. Whenever a new assistant is employed, or the duties of any one of them changed, such facts are to be stated in an appropriate entry immediately preceding the notes taken under such changed arrangements.

The exhibition of every mile of surveying, whether on township or subdivisional lines, and of meanders in each section, must be *complete in itself*, and be separated by a black line drawn across the paper.

The variation of the *needle* must always occupy a *separate line* preceding the notes of measurements on line.

The description of the surface, soil, minerals, timber, undergrowth, &c., on *each mile* of line, is to follow the notes of survey of such line, and not be mixed up with them.

The date of each day's work must follow immediately after the notes thereof.

No abbreviations of words are allowable, except of such words as are *constantly* occurring, such as "*sec.*" for "*section*"; "*in. diam.*" for "*inches diameter*"; "*chs.*" for "*chains*"; "*lks.*" for "*links*"; "*dist.*" for "*distant*"; "*¼ sec. cor.*" for "*quarter-section corner*"; "*va.*" for "*variation*," &c.; for 14 inches long, 12 inches wide, and 3 inches thick, in describing a corner stone, use $14 \times 12 \times 3$, being particular to always observe the same order of length, width, and thickness. Proper names must never be abbreviated, however often their recurrence.

When the lines of survey cross hills or ravines, the height or depth of same, in feet, must be noted as nearly as practicable.

The corners established in previous surveys, from which the lines start, or upon which they close, must be fully described in the field notes. A full description of such corners will in all cases be furnished the deputy from the surveyor-general's office at the date authority is given for commencing work.

In all cases where a corner is re-established the field notes must describe fully the manner in which it is done.

Field notes of the survey of base, standard, and meridian lines must describe all corners established thereon, how established, the crossings of streams, ravines, hills, and mountains; character of soil, timber, minerals, &c.; and after the description of each township corner established in running such lines, the deputy will note particularly in the "general description" the townships on each side of the lines run.

Field notes of the survey of exterior boundaries of townships must describe the corners and topography, as above required, and the "general description" at the end of such notes must describe the townships as fully as may be, and also state whether or not they should be subdivided. The topography on the *true line* of exterior boundaries must be given, and not that on the random line.

Field notes of the subdivisional survey of townships must describe the corners and topography, as above required, and the "general description" at the end of such notes must state minutely the character of the land, soil, timber, &c., found in such townships.

A blank line must be left at the bottom of each page of the field notes, and the notes must be written in a plain, legible hand, and in clear and precise language, so that the figures, letters, words, and meaning will always be unmistakable, and erasures and interlineations avoided, as far as possible.

With the notes of the survey of principal lines forming a tract of 24 miles square the deputy will submit a plat of the lines run, on a scale of one-half inch to the mile, and with the notes of survey of the exterior lines of townships, a plat of the lines run, on the scale of two inches to the mile, on which are to be noted all the objects of topography on line necessary to illustrate the notes, viz, the distance on line at the crossings of streams, so far as such can be noted on the paper, and the direction of each by an arrow head pointing down stream; also, the intersection of line by prairies, marshes, swamps, ravines, ponds, lakes, hills, mountains, and all other matters indicated by the notes, to the fullest extent practicable.

With the instructions for making subdivisional surveys of townships into sections, the deputy will be furnished by the surveyor-general with a diagram of the *exterior* lines previously established of the townships to be subdivided (on the above-named scale), upon which are carefully to be laid down the measurements of each of the lines

on such boundaries whereon he is to close, and the magnetic variation of each mile And on such diagram the deputy who subdivides will make appropriate sketches of the various objects of topography as they occur on his lines, so as to exhibit not only the points on line at which the same occur, but also the direction and position of each between the lines, or within each section, as far as practicable, so that every object of topography may be properly completed or connected in the showing.

SUMMARY OF OBJECTS AND DATA REQUIRED TO BE NOTED.

1. The precise length of every line run, noting all necessary offsets therefrom, with the reason and mode thereof.

2. The kind and diameter of all "*bearing trees*," with the course and distance of the same from their respective corners; and the precise relative position of WITNESS CORNERS to the *true corners*.

3. The kind of materials of which corners are constructed.

4. *Trees on line.* The name, diameter, and distance on line to all trees which it intersects.

5. Intersections by line of *land objects*. The distance at which the line first intersects and then leaves every *settler's claim and improvement;* prairie, river, creek, or other "bottom"; or swamp, marsh, grove, and wind fall, with the course of the same at both points of intersection; also the distances at which you begin to ascend, arrive at the top, begin to descend, and reach the foot of all remarkable hills and ridges, with their courses, and *estimated* height, in feet, above the level land of the surrounding country, or above the bottom lands, ravines, or waters near which they are situated.

6. Intersections by line of *water objects*. All rivers, creeks, and smaller streams of water which the line crosses; the distances on line at the points of intersection, and their *widths on line*. In cases of *navigable* streams, their width will be ascertained between the *meander corners*, as set forth under the proper head.

7. The land's *surface*—whether level, rolling, broken, or hilly.

8. The *soil*—whether first, second, third, or fourth rate.

9. *Timber*—the several kinds of timber and undergrowth, in the order in which they predominate.

10. *Bottom lands*—to be described as wet or dry, and if subject to inundation, state to what depth.

11. *Springs of water*—whether fresh, saline, or mineral, with the course of the stream flowing from them.

12. *Lakes* and *ponds*—describing their banks and giving their height, and also depth of water, and whether it be pure or stagnant.

13. *Improvements*. Towns and villages; houses or cabins; fields, or other improvements; sugar-tree groves, sugar camps, mill seats, forges, and factories.

14. *Coal* banks or beds; *peat* or turf grounds; *minerals* and ores; with particular description of the same as to quality and extent, and all *diggings* therefor; also *salt* springs and licks. All reliable information you can obtain respecting these objects, whether they be on your immediate line or not, is to appear on the general description to be given at the end of the notes.

15. *Roads* and *trails*, with their directions, whence and whither.

16. Rapids, cataracts, cascades, or falls of water, with the estimated height of their fall in feet.

17. Precipices, caves, sink holes, ravines, stone quarries, ledges of rocks, with the kind of stone they afford.

18. *Natural curiosities*, interesting fossils, petrifications, organic remains, &c.; also all ancient works of art, such as mounds, fortifications, embankments, ditches, or objects of like nature.

19. The *variation* of the needle must be noted at all points or places on the lines where there is found any material *change* of variation, and the position of such points must be perfectly identified in the notes.

20. Besides the ordinary notes taken on line (and which must always be written down on the spot, leaving nothing to be supplied by memory), the deputy will subjoin, at the conclusion of his book, such further description or information touching any matter or thing connected with the township (or other survey) which he may be able to afford, and may deem useful or necessary to be known—with a *general description* of the township in the *aggregate*, as respects the face of the country, its soil and geological features, timber, minerals, waters, &c.

Following the "general description" of the township is to be "A list of the names of the individuals employed to assist in running, measuring, and marking the lines and corners described in the foregoing field notes of township No. ——— of the BASE LINE of range No. ——— of the ——— MERIDIAN, showing the respective capacities in which they acted."

AFFIDAVITS TO FIELD NOTES.

The following are the forms of official oaths to be taken by deputy surveyors and their assistants. The original oaths are to be affixed to the *true* field notes returned to the surveyor-general by the deputy surveyor; the preliminary oaths being placed immediately after the index of the first book, and the final oaths at the end of the last book or field notes of the surveys to which they refer:

Preliminary oaths of assistants.

I, ——— ———, do solmenly swear that I will well and truly perform the duties of compassman, according to instructions given me, and to the best of my skill and ability, in the survey of the ——— ———.

——— ———, *Compassman.*

Subscribed and sworn to before me this —— day of ———, 18—.

——— ———,
———.

We, ——— ——— and ——— ———, do solemnly swear that we will well and faithfully execute the duties of chain carriers; that we will level the chain upon even and uneven ground and plumb the tally pins, either by sticking or dropping the same; that we will report the true distance to all notable objects, and the true length of all lines that we assist in measuring, to the best of our skill and ability, and in accordance with instructions given us, in the survey of the ——— ———.

——— ———, *Chainman.*
——— ———, *Chainman.*
——— ———, *Chainman.*
——— ———, *Chainman.*

Subscribed and sworn to before me this —— day of ———, 18—.

——— ———,
———.

We, ——— ——— and ——— ———, do solemnly swear that we will well and truly perform the duties of axemen, in the establishment of corners and other duties, according to instructions given us, and to the best of our skill and ability, in the survey of ——— ———.

——— ———, *Axeman.*
——— ———, *Axeman.*

Subscribed and sworn to before me this —— day of ———, 18—.

——— ———,
———.

Final oaths for surveys.

List of names.

A list of the names of the individuals employed by ——— ———, United States deputy surveyor, to assist in running, measuring, and marking the lines and corners described in the foregoing field notes of the survey of ——— ———, showing the respective capacities in which they acted.

——— ———, *Compassman.*
——— ———, *Chainman.*
——— ———, *Chainman.*
——— ———, *Chainman.*
——— ———, *Chainman.*
——— ———, *Axeman.*
——— ———, *Axeman.*
——— ———, *Flagman.*

Final oaths of assistants.

We hereby certify that we assisted ——— ———, United States deputy surveyor, in surveying all those parts or portions of the ——— of the ——— base and ——— meridian, ——— of ———, as are represented in the foregoing field notes as having been surveyed by him and under his direction; and that said survey has been in all

respects, to the best of our knowledge and belief, well and faithfully surveyed and the corner monuments established according to the instructions furnished by the United States surveyor-general for ———.

——— ———, *Compassman,*
——— ———, *Chainman.*
——— ———, *Chainman.*
——— ———, *Chainman.*
——— ———, *Chainman.*
——— ———, *Axeman.*
——— ———, *Axeman.*
——— ———, *Flagman.*

Subscribed and sworn to before me this —— day of ———, 18—.

——— ———,
———.

Final oath of United States Deputy Surveyor.

I, ——— ———, United States deputy surveyor, do solemnly swear that in pursuance of instructions received from ——— ———, United States surveyor-general for ———, bearing date of the —— day of ——, 18—, I have well, faithfully, and truly, in my own proper person, and in strict conformity with the instructions furnished by the United States surveyor-general for ———, the surveying manual, and the laws of the United States, surveyed all those parts or portions of ——— ——— of the ——— base and ——— meridian in the ——— of ———, as are represented in the foregoing field notes as having been surveyed by me and under my directions; and I do further solemnly swear that all the corners of said survey have been established and perpetuated in strict accordance with the surveying manual, printed instructions, the special written instructions of the United States surveyor-general for ———, and in the specific manner described in the field notes, and that the foregoing are the *true* field notes of such survey; and, should any fraud be detected I will suffer the penalty of perjury, under the provision of an act of Congress, approved August 8, 1846.

——— ———,
United States Deputy Surveyor.

Subscribed and sworn to before me this —— day of ———, 18—.

——— ———,
———.

The final oath of the deputy surveyor must, in all cases, be taken before some officer duly authorized to administer oaths. It is preferable that all oaths—both preliminary and final—of assistants should also be taken before such officer. In cases, however, where great delay or inconvenience would result from a strict compliance with this rule, the deputy surveyor is authorized to administer the necessary oaths to his assistants, but in each case where this is done he must submit a full written report to the proper surveyor-general of the circumstances of such case.

To enable the deputy surveyor to fully understand and appreciate the responsibility under which he is acting, his attention is invited to the provisions of the second section of the act of Congress, approved August 8, 1846, entitled "An act to equalize the compensation of the surveyors-general of the public lands of the United States, and for other purposes," and which is as follows:

"SEC. 2. That the surveyors-general of the public lands of the United States, in addition to the oath now authorized by law to be administered to deputies on their appointment to office, shall require each of their deputies, on the return of his surveys, to take and subscribe an oath or affirmation that those surveys have been faithfully and correctly executed according to law and the instructions of the surveyor-general; and on satisfactory evidence being presented to any court of competent jurisdiction that such surveys, or any part thereof, had not been thus executed, the deputy making such false oath or affirmation shall be deemed guilty of perjury, and shall suffer all the pains and penalties attached to that offense; and the district attorney of the United States for the time being, in whose district any such false, erroneous, or fraudulent surveys shall have been executed, shall, upon the application of the proper surveyor-general, immediately institute suit upon the bond of such deputy; and the institution of such suit shall act as a lien upon any property owned or held by such deputy, or his sureties, at the time such suit was instituted.

SPECIMEN FIELD NOTES AND PLATS.

Diagram A illustrates the method of laying off tracts of land 24 miles square, as nearly as practicable, by the survey of principal lines, and the survey of exteriors or

township lines within such tracts, north of the base line and east of the principal meridian. The same general principles will apply equally to the survey of such tracts differently located with reference to the initial point. The topography noted on said diagram is on those portions of the lines of surveys for which specimen field notes are given.

Diagram B illustrates the method of laying off a township into sections and quarter-sections. In the subdivision of townships lying *south* of and *contiguous* to the base line, or to any standard parallel, the lines between the northern tier of sections will be run north as *true* lines; quarter-section corners will be established at 40 chains, closing section corners will be established at the points of intersection of such lines with the base or standard lines (as the case may be), and the *course* and *distance* from such corners to the nearest corner upon the line closed upon are to be accurately ascertained and set down in the field notes.

Diagram C illustrates the mode of establishing stone, post, and mound corners for townships, sections, and quarter-sections.

Specimen field notes Nos. 1, 2, 3, 4, and 5 illustrate, respectively, the mode and order of surveying standard lines, meridian lines, exteriors or township lines, resurveying exteriors or township lines, and subdividing a township into sections and quarter-sections. The attention of the deputy is particularly directed to these specimens, as indicating not only the method in which his work is to be conducted, but also the order, manner, language, &c., in which his field notes are required to be returned to the surveyor-general's office; and such specimens are to be deemed part of these instructions, and any *departure* from their details, without special authority, in cases where the circumstances are analogous in practice, *will be regarded as a violation of his contract and oath.*

The subdivisions of fractional sections into 40-acre lots (as near as may be) are to be so laid down on the official township plat in dotted black lines as to admit of giving to each a specific designation, if possible, according to its relative position in the fractional section, as per examples afforded by Diagram B, as well as by a number, in all cases where the lot cannot properly be designated as a quarter-quarter. Those fractional subdivision lots which are not susceptible of being described according to relative local position, are to be numbered in regular series; those bordering on the north boundary of a township to be numbered progressively from east to west, and those bordering on the west boundary of a township to be numbered progressively from north to south, in each section. As section 6 borders on both the north and west boundaries of the township, the fractional lots in same will be numbered as follows: Commencing with No. 1 in the northeast, thence progressively west to No. 4 in the northwest, and south to No. 7 in the southwest corner of the section.

In numbering fractional lots, other than those above specified (wherever practicable and as a general rule), the series should commence with No. 1 in the northeastern or the most easterly fractional lot, and continue from east to west, and west to east, alternately, to the end of the series, as shown in Diagram B; but such general rule is departed from under circumstances given as examples in said diagram.

Interior lots are to be, as nearly as possible, 20 chains long by 20 chains wide; and the excess or deficiency of measurement is always to be thrown on the lots bordering on the northern and western boundaries of the township, or those made fractional by meander lines.

The official township plat to be returned to the General Land Office is to show on its face, on the right-hand margin, the meanders of navigable streams, islands, and lakes. Such details are wanted in the adjustment of the surveying accounts, but may be omitted in the copy of the township plat to be furnished to the district land office by the surveyor-general. A suitable margin for *binding* is to be preserved on the left-hand side of each plat. Each plat is to be certified, with table annexed, according to the forms subjoined to "Diagram B," and is to show the areas of public land, of private surveys, and of water, with the aggregate area as shown on the diagram.

Each township plat is to be prepared in *triplicate:* one for the General Land Office, one for the United States district land office, and the third to be retained as the record in the office of the surveyor-general.

The plat for the local land office must not be forwarded until notice is received by the surveyor-general from the Commissioner of the General Land Office that the survey represented on said plat has been approved.

The plats must be prepared as nearly as possible in accordance with the specimen plat designated as "Diagram B." The use of all fluids, except a preparation of India ink of good quality, must be avoided by the draughtsman in delineations relating to the public surveys. All lines, figures, &c., must be sharply defined. All lettering on the plats must be clear and sharp in outline and design, and ornamentation of any kind is prohibited. These requirements are necessary in order that everything shown upon original plats may be fairly reproduced in making photolithographic copies of the same.

All towns, settlements, permanent buildings, private claims, reservations, water, courses, ditches, lakes, islands, mountains, buttes, cañons, roads, railroads, telegraph lines, canals, &c., will be shown upon the plats and designated by proper names where such are known.

The mean magnetic declinations determined at the date of the survey of the exterior and subdivisional lines will be entered upon each plat in the manner shown in Diagram B. This will be ascertained by taking the mean of the greatest and least magnetic declination found at the dates of surveys, excluding such changes as are clearly attributable to local attraction.

All plats are to be drawn to a uniform scale of 40 chains to 1 inch, United States standard.

Surveyors-general will require that the specimen plat shall be closely followed in order that uniformity of appearance and expression of drawings representing the public-land surveys may be attained.

The true field books, each bearing the *written approval* of the surveyor-general, are to be substantially bound into volumes of suitable size, and retained in the surveyor-general's office, and certified *transcripts* of such field books (to be of *foolscap* size) are to be prepared and forwarded, from time to time, to the General Land Office.

All transcripts of surveys must be written in a bold, legible hand, with durable black ink, and such transcripts of any series of surveys included in one account forwarded to the General Land Office must be firmly fastened together at the surveyor-general's office prior to transmittal.

With the copy of each township plat furnished to a district land office, the surveyor-general is required by law to furnish *descriptive notes* as to the character and quality of the soil and timber found on and in the vicinity of each surveyed line, and giving a description of each corner.

Printed blank forms for such notes will be furnished by the General Land Office. The forms provide eighteen spaces for *meander corners*, which, in most cases, will be sufficient,; but when the number shall exceed eighteen, the residue will have to be inserted on the face of the township plat, to be furnished to the register of the district land office, or on a supplemental blank form.

There is shown a series of meander corners on Diagram B, viz, from No. 1 to No. 12 on the river and island, and No. 1 to No. 5 on Lin's Lake.

THE MAGNETIC DECLINATION OR VARIATION OF THE NEEDLE.

The magnetic declination at any place is the angle which the compass needle, when it is correctly constructed and freely suspended, makes with the true meridian. The true meridian is fixed, but the declination varies because the direction in which the needle points is in a continuous state of change. Therefore, whenever a measure of the declination of the needle is taken, the exact time (year, day of month, and hour of the observations) should be recorded, as well as the geographical position of the place, or its latitude and longitude expressed to the nearest minutes of arc.

The declination is called "West" when the north end of the needle points to the west of the true meridian, and it is called "East" when the north end of the needle points east of the true meridian. In order to give an idea of the amount of the declination at present observable within the limits of the United States we instance the following places at or near which it reaches extreme value, which are given to the nearest whole degree:

At Eastport, Me., the declination is 18° west.
At the mouth of the Rio Grande, Texas, 8° east.
At San Diego, Cal., 14° east.
At Sitka, Alaska, 28° east.
At Fort Yukon, Alaska, 36° east.

The accuracy with which the declination may be determined depends chiefly upon the instrumental means, but also, and in a great measure, upon the care taken in the use of the instruments and the selection of the proper methods and times for observing.

The instruments ordinarily at the disposal of the surveyor are sufficiently described, but for a description and illustration of more refined ones, as used by scientists, we refer to the instructions for magnetical observations published as Appendix No. 16, Coast Survey Report for 1875.

Omitting any detailed notice of the irregular variations to which the magnetic needle is subject, it becomes important for the purposes of the surveyor to refer particularly to the changes which have a special bearing upon his observations. These are the *daily variation* and the *secular variation*.

The daily variation.—It has been found that at about the time of sunrise the north end of the needle has a slow motion towards the east which soon ceases. The needle is then said to be at its eastern elongation; its north end then begins a retrograde motion towards the west, and at about one o'clock in the afternoon reaches the point

at which it is said to be at its western elongation, after which it again turns back towards the east.

The times at which the needle reaches its eastern and western elongations vary with the seasons of the year (with the sun's declination), happening a little earlier in summer than in winter.

The angular range between the eastern and western elongations varies also with the seasons of the year.

The average position of the needle for the day is called the *mean magnetic meridian.*

At about six o'clock in the evening (and for about an hour before and after), throughout the year, the position of the needle coincides very nearly with the mean magnetic meridian, and this, therefore, is the time most favorable for making observations to obtain at once the mean declination.

For reducing the direction of the needle observed at other hours to the mean magnetic meridian the following table is furnished. It gives to the nearest minute the variations of the needle from its average position during the day, for each hour in the day for the four seasons of the year.

Table for reducing the observed declination to the mean declination of the day.

	The needle points east of the mean magnetic meridian.					The needle points west of the mean magnetic meridian.

Summer	4	5	5	4	1	2	4	6	5	4	3	2	1
Autumn	2	3	3	2	0	2	3	4	3	2	1	1	0
Winter	1	1	2	2	1	0	2	3	3	2	1	1	0

The secular variation of the magnetic declination is a subject of the greatest importance to surveyors. It manifests itself by a gradual change in one direction, which at first increases slowly, then more rapidly, diminishing again afterward until the needle becomes stationary and subsequently returns by similar changes to its former position, the whole period extending over nearly two and a half centuries. Thus it will be seen by a table given below that at Philadelphia the declination was $8\frac{1}{4}^{\circ}$ west in 1700, whence it diminished until in 1800 it reached a minimum 2°.1 (2° 6′), and will increase again to 6°.8 in 1880. At present all along the Atlantic and Gulf coasts the effect of the secular variation is to *increase* west declinations or to *decrease* east declinations by from 2′ to 5′, but on the Pacific coast the effect is opposite in direction, viz, *increasing* east declinations by from 1′ to 3′.

In Alaska, however, we have indications of a decrease of east declinations.

The following table of computed declinations at various places, taken from the Coast Survey Report for 1874, exhibits the effect of the secular variation for a number of places, and will be found especially useful where old lines have to be retraced.

The table should not be extended in time either way without the support of additional observations.

Table of decimal values of the magnetic declination.

[From the Coast Survey Report of 1874, Appendix No. 8, with improvements.]

This table has been constructed to facilitate the reduction of observed declinations from one epoch to another; it will be found specially useful when old lines run by compass have to be retraced, and for the construction of isogonic charts for a given epoch. A + sign indicates west; a — sign, east declination.

It will be observed that the amount of change is by no means the same even in places not far remote from each other, as New York and Philadelphia.

In grouping together a table of the present rate of change much allowance must therefore be made for possible local peculiarities that have not been ascertained.

The following statement of the present (1878) annual change in the magnetic declination, due to the secular variation, may serve to give a general idea of the *approximate* amount of change along our immediate sea-coast. For the interior States the information is very scanty, and therefore less trustworthy, or altogether wanting.

The annual change is expressed in minutes of arc, a + sign indicating increase of westerly or decrease of easterly declination.

Locality.	Annual change.
Maine, coast of	+2
Maine, interior	+3
New Hampshire	+3½
Vermont	+5½
Massachusetts, eastern part	+2½
Massachusetts, western part	+3 to 4
Rhode Island and Connecticut	+3½
New York, Long Island	+3
New York, northern and western part	+4½
New Jersey	+3
Pennsylvania	+3½
Ohio	+2½
Tennessee, eastern part	+2½
Tennessee, western part	+2
Missouri	+2
Delaware, Maryland, and Virginia	+3
West Virginia	+3½
North Carolina, South Carolina, and Georgia	+3½
Florida, northern part	+3½
Florida, southern part	+3
Alabama and Mississippi, Gulf coast of	+3
Louisiana, eastern part	+2½
Louisiana, western coast	+2
Texas, coast of	+1
Texas, southwestern part New Mexico and Southwestern Arizona	0 (probably.)
California, coast of	−1½
Oregon, coast of	−2 to 2½
Washington Territory, coast of	−2½ to 3

The negative sign indicates an increase of easterly direction.

METHOD OF ASCERTAINING THE TRUE MERIDIAN AND THEREBY THE MAGNETIC DECLINATION OR VARIATION OF THE COMPASS.

The following chapter, on the subject of the declination of the magnetic needle, is extracted from the revised edition of the work on surveying by Dr. Charles Davies, a graduate of the Military Academy at West Point. The work itself will be a valuable acquisition to the deputy surveyor, and his attention is particularly invited to the following chapter, which sets forth the usual easy modes by which the true meridian and magnetic declination may be approximately ascertained; his attention is also called to more complete statements on the subject given in the work "A treatise on land-surveying, &c.," by Dr. W. M. Gillespie, professor of engineering, Union College, in chapter treating of the declination of the magnetic needle. For more refined methods he may consult Coast Survey Report for 1875, Appendix No. 16.

METHOD OF ASCERTAINING THE TRUE MERIDIAN.

The best practical method of determining the true meridian of a place is by observing the north star. If this star were precisely at the point in which the axis of the earth, prolonged, pierces the heavens, then the intersection of the vertical plane passing through it and the place, with the surface of the earth, would be the true meridian. But the star being at a distance from the pole equal to 1° 30′ nearly, it performs a revolution about the pole in a circle, the polar distance of which is 1° 30; the time of revolution is 23 hours and 56 minutes.

To the eye of an observer this star is continually in motion, and is due north but twice in 23 hours and 56 minutes; and is then said to be on the meridian. Now, when it departs from the meridian, it apparently moves east or west for 5 hours and 59 minutes, and then returns to the meridian again.

When at its greatest distance from the meridian, east or west, it is said to be at its *eastern* or *western* elongation.

The following tables show the times of its eastern and western elongations:

Time of elongation of Polaris (a Ursæ Min.), April 1, 1883, to April 1, 1884, computed for north latitude 38°, and which will serve for all latitudes from 26° to 50° north, and for all dates from April, 1878, to April, 1888, with an error of less than five minutes.

[The times are reckoned from noon (astronomical time).]

EASTERN ELONGATIONS.

Day.	April.	May.	June.	July.	August.	September.
	h. m.	h. m.	h. m.	h. m.	h. m.	h. m.
1	18 37	16 39	14 37	12 39	10 37	8 36
7	18 14	16 16	14 14	12 16	10 14	8 11
13	17 50	15 52	13 50	11 52	9 50	7 48
19	17 26	15 28	13 26	11 29	9 57	7 25
25	17 03	15 05	13 03	11 05	9 03	7 01

WESTERN ELONGATIONS.

Day.	October.	November.	December.	January.	February.	March.
	h. m.	h. m.	h. m.	h. m.	h. m.	h. m.
1	18 27	16 25	14 28	12 26	10 24	8 30
7	18 04	16 02	14 04	12 02	10 00	8 06
13	17 40	15 38	13 40	11 39	9 37	7 43
19	77 17	15 15	13 17	11 15	9 13	7 19
25	16 53	14 51	12 53	10 51	8 49	6 55

The eastern elongations are put down from the beginning of April to the end of September, and the western from the beginning of October to the end of March. The time is computed from noon. The western elongations in the first case, and the eastern in the second, occurring in the-day time, cannot be used. Some of those put down are also invisible, occurring in the evening before it is dark, or after daylight in the morning.

In such case, if it be necessary to determine the meridian at that particular season of the year, let 5 hours 59 minutes be added to or substracted from the time of greatest eastern or western elongation, and the observation be made at night when the star is on the meridian.

The following table exhibits the angle which the meridian plane makes with the vertical plane passing through the pole-star when at its greatest eastern or western elongation; such angle is called the *azimuth*.

The mean angle only is put down, being calculated for the first of July of each year.

Azimuth of Polaris (a Ursæ Min.) at elongation, 1878 to 1888.

[Latitude 26° to 50° north.]

TO FIND THE TRUE MERIDIAN WITH THE THEODOLITE.

Take a board, of about one foot square, paste white paper upon it, and perforate it through the center; the diameter of the hole being somewhat larger than the diameter of the telescope of the theodolite. Let this board be so fixed to a vertical staff as to slide up and down freely; and let a small piece of board, about three inches square, be nailed to the lower edge of it, for the purpose of holding a candle.

About twenty-five minutes before the time of the greatest eastern or western elongation of the pole-star, as shown by the tables of elongations, let the theodolite be placed at a convenient point and leveled. Let the board be placed about one foot in front of the theodolite, a lamp or candle placed on the shelf at its lower edge; and let the board be slipped up or down until the pole-star can be seen through the hole. The light reflected from the paper will show the cross hairs in the telescope of the theodolite.

Then, let the vertical spider's line be brought exactly upon the pole-star, and if it is an eastern elongation that is to be observed, and the star has not yet reached the most easterly point, it will move from the line toward the east, and the reverse when the elongation is west.

At the time the star attains its greatest elongation, it will appear to coincide with the vertical spider's line for some time, and then leave it, in the direction contrary to its former motion.

As the star moves toward the point of greatest elongation, the telescope must be continually directed to it by means of the tangent screw of the vernier plate; and when the star has attained it greatest elongation, great care should be taken that the instrument be not afterward moved.

Now, if it be not convenient to leave the instrument in its place until daylight, let a staff, with a candle or small lamp upon its upper extremity, be arranged at thirty or forty yards from the theodolite, and in the same vertical plane with the axis of the telescope. This is easily effected, by revolving the vertical limb about its horizontal axis without moving the vernier plate, and aligning the staff to coincide with the vertical hair. Then mark the point directly under the theodolite; the line passing through this point and the staff, makes an angle with the true meridian equal to the azimuth of the pole-star.

From the table of azimuths, take the azimuth corresponding to the year and nearest latitude. If the observed elongation was east, the true meridian lies on the west of the line which has been found, and makes with it an angle equal to the azimuth. If the elongation was west, the true meridian lies on the east of the line; and, in either case, laying off the azimuth angle with the theodolite, gives the true meridian.

TO FIND THE TRUE MERIDIAN WITH THE COMPASS.

1. Drive two posts firmly into the ground, in a line nearly east and west; the uppermost ends, after the posts are driven, being about three feet above the surface, and the posts about four feet apart; then lay a plank, or piece of timber three or four inches in width, and smooth on the upper side, upon the posts, and let it be pinned or nailed, to hold it firmly.

2. Prepare a piece of board four or five inches square, and smooth on the under side. Let one of the compass sights be placed at right angles to the upper surface of the board, and let a nail be driven through the board, so that it can be tacked to the timber resting on the posts.

3. At about twelve feet from the stakes, and in the direction of the pole star, let a plumb be suspended from the top of an inclined stake or pole. The top of the pole should be of such a height that the pole star will appear about six inches below it; and the plumb should be swung in a vessel of water to prevent it from vibrating.

This being done, about twenty minutes before the time of elongation place the board to which the compass sight is fastened on the horizontal plank, and slide it east or west until the aperture of the compass sight, the plumb line, and the star are brought into the same range. Then if the star depart from the plumb line move the compass sight east or west along the timber, as the case may be, until the star shall attain its greatest elongation, when it will continue behind the plumb line for several minutes, and will then recede from it in the direction contrary to its motion before it became stationary. Let the compass sight be now fastened to the horizontal plank. During this observation it will be necessary to have the plumb line lighted; this may be done by an assistant holding a candle near it.

Let now a staff, with a candle or lamp upon it, be placed at a distance of thirty or forty yards from the plumb line, and in the same direction with it and the compass sight. The line so determined makes, with the true meridian, an angle equal to the azimuth of the pole star; and from this line the variation of the needle is readily determined, even without tracing the true meridian on the ground.

Place the compass upon this line, turn the sights in the direction of it, and note the angle shown by the needle. Now, if the elongation at the time of observation was west, and the north end of the needle is on the west side of the line, the azimuth, plus the angle shown by the needle, is the true variation. But should the north end of the needle be found on the east side of the line, the elongation being west, the difference between the azimuth and the angle would show the variation, and the reverse when the elongation is east.

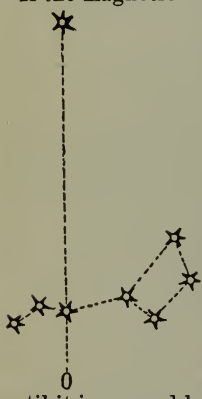
1. Elongation west, azimuth	2° 04′
North end of the needle on the west, angle	4° 06′
Variation	6° 10′ west.
2. Elongation west, azimuth	1° 59′
North end of the needle on the east, angle	4° 50′
Variation	2° 51′ east.
3. Elongation east, azimuth	2° 05′
North end of the needle on the west, angle	8° 30′
Variation	6° 25′ west.
4. Elongation east, azimuth	1° 57′
North end of the needle on the east, angle	8° 40′
Variation	10° 37′ east.

The variation at West Point in September, 1835, was 6° 32′ west.

The variation of the needle should always be noted on every survey made with the compass, and then if the land be surveyed at a future time the old lines can always be rerun.

It has been found by observation that heat and cold sensibly affect the magnetic needle, and that the same needle will at the same place indicate different lines at different hours of the day.

If the magnetic meridian be observed early in the morning, and again at different hours of the day, it will be found that the needle will continue to recede from the meridian as the day advances, until about the time of the highest temperature, when it will begin to return, and at evening will make the same line as in the morning. This change is called the *diurnal variation*, and varies, during the summer season, from one-fourth to one-fifth of a degree.



A very near approximation to a true meridian, and consequently to the variation, may be had, by remembering that the pole star very nearly reaches the true meridian when it is in the same vertical plane with the star Alioth in the tail of the Great Bear, which lies nearest the four stars forming the quadrilateral.

The vertical position can be ascertained by means of a plumb line. To see the spider's lines in the field of the telescope at the same time with the star, a faint light should be placed near the object glass. When the plumb line, the star Alioth, and the north star fall on the vertical spider's line, the horizontal limb is firmly clamped and the telescope brought down to the horizon; a light, seen through a small aperture in a board, and held at some distance by an assistant, is then moved according to signals, until it is covered by the intersection of the spider's lines. A picket driven into the ground, under the light, serves to mark the meridian line for reference by day, when the angle formed by it and the magnetic meridian may be measured.

OF THE SURVEY OF THE

THIRD STANDARD PARALLEL NORTH

THROUGH

Range No. 21 East

OF THE

PRINCIPAL BASE AND MERIDIAN,

IN THE

TERRITORY OF MONTANA,

AS SURVEYED BY

JAMES M. PAGE,
U. S. DEPUTY SURVEYOR,

UNDER HIS CONTRACT No. 97,
DATED JULY 23, 1880.

Survey commenced August 23, 1880.
Survey completed August 24, 1800.

INDEX.

PRELIMINARY OATHS OF ASSISTANTS.

We, Newton Orr, Barclay Jones, Peter Smith, and John Parker, do solemnly swear that we will well and faithfully execute the duties of chain carriers; that we will level the chain upon even and uneven ground, and plumb the tally pins, either by sticking or dropping the same; that we will report the true distance to all notable objects, and the true lengths of all lines that we assist in measuring, to the best of our skill and ability, and in accordance with instructions given us, in the survey of the third standard parallel north through range No. 21 east of the principal base and meridian in the Territory of Montana.

NEWTON ORR, *Chainman.*
BARCLAY JONES, *Chainman.*
PETER SMITH, *Chainman.*
JOHN PARKER, *Chainman.*

Subscribed and sworn to before me this 2d day of August, 1880.
[SEAL.] WILLIAM MARTIN,
Notary Public.

We, William Mauldin and Henry Newton, do solemnly swear that we will well and truly perform the duties of axemen, in the establishment of corners and other duties, according to instructions given us, and to the best of our skill and ability, in the survey of the third standard parallel north, through range No. 21 east of the principal base and meridian in the Territory of Montana.

WILLIAM MAULDIN, *Axeman.*
HENRY NEWTON, *Axeman.*

Subscribed and sworn to before me this 2d day of August, 1880.
[SEAL.] WILLIAM MARTIN,
Notary Public.

THIRD STANDARD PARALLEL NORTH, THROUGH RANGE 21 EAST.

On the night of August 22, 1880, I took an observation on the star Polaris, in accordance with instructions contained in the Manual of Surveys, and drove pickets on the line thus established.

Survey commenced August 23, 1880, with a Burt's improved solar compass.

Before commencing this survey I test my compass on the line established last night, and find it correct.

I begin at the standard cor. to townships 13 north, ranges 20 and 21 east, which is a post, 4 inches square, marked—

S. C., T. 13 N., on N.;
R. 21 E., S. 31, on E., and
R. 20 E., S. 36, on W. faces, with 6 notches on N., E., & W. faces, and pits N., E., and W. of post, 6 ft. dist., and mound of earth around post. Thence I run

Chains.	
	East, on S. boundary sec. 31. Va. 20¼° E.
	Ascend
18.00	A point about 200 ft. above township cor., top of ridge.
40.00	Set a sandstone 18 × 8 × 5 ins., 12 ins. in the ground, for standard ¼ sec. cor. marked S. C. ¼ on N. face, dug pits 18 × 18 × 12 ins. E. & W. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base alongside; thence over high, rolling prairie.
57.00	Enter pine timber.

Third standard parallel north, through range No. 21 east—Continued.

Chains.	
80.00	Set a sandstone, 24 × 10 × 7 ins., 18 ins. in the ground for standard cor. to secs. 31 and 32, marked S. C., with 5 notches on E. and 1 notch on W. edges; from which A pine, 12 ins. diam., bears N. 77° E., 41 lks. dist., marked T. 13 N., R. 21 E., S. 32 B. T.; A pine, 18 ins. diam., bears N. 50° W., 20 lks. dist., marked T. 13 N., R. 21 E., S. 31 B. T.; A pine, 7 ins. diam., bears S. 30° W., 119 lks. dist., marked T. 12 N., R. 21 E. S. 5 B. T.
	Land high, mountainous, hilly, and rolling.
	Soil sandy, gravel, and rocky; 4th rate.
	Timber, pine, 23 chs.; mostly dead and fallen.
	East, on S. boundary sec. 32.
	Through timber.
	Va. 20¼° E.
3.75	Ravine, course S., about 30 ft. deep.
21.85	Ravine, course S. 20° E., about 20 ft. deep.
40.00	Set a sandstone, 18 × 14 × 5 ins., 12 ins. in the ground, for standard ¼ sec. cor., marked S. C., ¼ on N. face, and raised a mound of stone alongside. Pits impracticable.
59.00	Top of ridge, about 100 ft. high.
68.90	Ravine, course S., about 40 ft. deep.
80.00	Set a post, 4½ ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for standard cor. to secs. 32 and 33, marked— S. C., T. 13 N., R. 21 E., on N.; S. 33, on E., and S. 32, on W. faces, with 4 notches on E. and 2 notches on W. faces, and raised a mound of stone 2 ft. high, 4½ ft. base, around post.
	Land, high and mountainous.
	Soil, sandy, gravelly, and rocky—4th rate.
	Timber, pine, and fir, 80 chs.; mostly dead and fallen; some thick undergrowth same.
	East, on S. boundary sec. 33.
	Through timber.
	Va. 20¼° E.
3.50	Old Indian trail, course N. 45° W.
6.00	Leave scattering and enter heavy timber.
13.50	Leave heavy timber, enter high, open prairie.
21.40	Old Indian trail, course S. 70° W.
30.00	Ascend.
40.00	Set a sandstone, 14 × 10 × 5 ins., 10 ins. in the ground, for standard ¼ sec. cor., marked S C. ¼ on N. face, and raised a mound of stone 1½ ft. high, 3½ ft. base, alongside. Pits impracticable.
45.10	Old Indian trail, course N. 70° W.
53.00	Top of ridge, about 300 ft. high, course N. 30° L.
69.00	Leave prairie, enter timber.
80.00	Set a sandstone, 20 × 15 × 3 ins., 15 ins. in the ground, for standard cor. to secs. 33 and 34, marked S. C., with 3 notches on E. and W. edges; from which A pine, 8 ins. diam., bears N. 89¼° E. 88 lks. dist., marked T. 13 N., R. 21 E., S. 34 B. T.; A pine, 7 ins. diam., bears N. 74° W., 6 lks. dist.; marked T. 13 N., R. 21 E., S. 33, B. T.; A pine, 9 ins. diam., bears S. 4¾° W., 62 lks. dist.; marked T. 12 N., R. 21 E., S. 3, B. T.
	Land, high and mountainous.
	Soil, sandy and rocky; 4th rate.
	Timber, pine and fir, 24.50 chs., with some thick undergrowth same.

Third standard parallel north, through range No. 21 east—Continued.

Chains.	
	East, on S. boundary sec. 34.
	Through timber.
	Va. 20¼° E.
9.40	Enter aspen thicket.
13.80	Ravine, about 12 ft. deep, and leave thicket. Ascend.
23.84	A pine, 12 ins. diam.
40.00	Set a sandstone, 16 × 12 × 5 ins., 11 ins. in the ground, for standard ¼ sec. cor.; marked S. C. ¼ on N. face; from which
	A pine, 11 ins. diam., bears N. 54¾° E., 39 lks. dist.; marked S. C. ¼ S. B. T.;
	A pine, 10 ins. diam., bears S. 56° W., 17 lks. dist.; marked S. C. ¼ S. B. T.
53.55	A pine, 6 ins. diam.
80.00	Top of mountain. Set a post, 4½ ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for standard cor. to secs. 34 and 35; marked—
	S. C., T. 13 N., R. 21 E., on N.;
	S. 35, on E., and
	S. 34, on W. faces, with 2 notches on E. and 4 notches on W. faces; from which
	A pine, 12 ins. diam., bears N. 45° E., 15 lks. dist.; marked T. 13 N., R. 21 E., S. 35 B. T.;
	A pine, 15 ins. diam., bears S. 48° W., 54 lks. dist.; marked T. 12 N., R. 21 E., S. 2 B. T.
	No other trees within limits, and raised a mound of stone around post.
	Land, high, mountainous, and rolling.
	Soil, sandy and rocky; 4th rate.
	Timber, pine and fir—some good quality—thick undergrowth of same and aspen; 80 chs.
	August 23, 1880.

	East, on S. boundary sec. 35.
	Va. 20¼° E.
	Descend through timber.
37.50	A point about 300 ft. below last sec. cor. on top of mountain; ravine, course N. 35° E. and ascend.
40.00	Set a sandstone 14 × 12 × 5 ins., 10 ins. in the ground, for standard ¼ sec. cor.; marked S. C. ¼ on N. face; from which
	A pine, 12 ins. diam., bears N. 79° E., 140 lks. dist., marked S. C. ¼ S. B. T.
	No other tree within limits, and raised a mound of stone alongside.
47.00	Top of ridge, about 150 ft. above ravine, and descend over broken, rolling ground.
80.00	Set a sandstone, 24 × 18 × 5 ins., 18 ins. in the ground, for standard cor. to secs. 35 and 36, marked S. C. on N., with 1 notch on E. and 5 notches on W. edges, and raised a mound of stone 2 ft. high, 4½ ft. base alongside. Pits impracticable.
	Land, high and broken.
	Soil, sandy and gravelly; 4th rate.
	Timber, pine and fir, mostly dead and fallen. Some thick undergrowth same; 80 chs.

	East on S. boundary sec. 36.
	Va. 20¼° E.
	Ascend, through timber.
7.50	Top of ridge, course N. 20° E., about 100 ft. high, and descend.
	A pine, 10 ins. diam.
22.00	Set a sandstone 16 × 10 × 6 ins. 11 ins. in the ground, for standard ¼ sec.
40.00	cor. marked S. C. ¼ on N. face; from which
	A pine, 12 ins. diam., bears N. 58° W., 12 lks. dist., marked S. C. ¼ S. B. T.;
	A pine, 11 ins. diam., bears S. 33° E., 36 lks. dist., marked S. C. ¼ S. B. T.

Third standard parallel north, through range No. 21 east—Continued.

Chains.	
47.42	A pine, 12 ins. diam.
72.38	A pine, 10 ins. diam.
79.40	A point about 450 ft. below top of ridge. Small ravine, course N. 65° E. and ascend.
80.00	Set a post, 4½ ft. long, 4 ins. square, with marked stone, 12 ins. in the ground for standard cor. to Tps. 13 N., Rs. 21 and 22 E., marked— S. C., T. 13 N., on N.; R. 22 E., S. 31, on E., and R. 21 E., S. 36, on W. faces; with 6 notches on N., E., and W. faces; and raised a mound of stone 2 ft. high, 4½ ft. base, around post.
	Land, high, mountainous, and rolling.
	Soil, sandy and rocky; 4th rate.
	Timber, pine; thick undergrowth same; 80 chs.

August 24, 1880.

GENERAL DESCRIPTION.

This line runs over the east slope of the Little Snowy Mountains. The townships on each side are rough and broken, but contain large groves of pine and fir timber of fair quality, and some springs and small streams of pure clear water.

JAMES M. PAGE,
United States Deputy Surveyor.

FINAL OATHS FOR SURVEYORS.

LIST OF NAMES.

A list of the names of the individuals employed by James M. Page, U. S. deputy surveyor, to assist in running, measuring, and marking the lines and corners described in the foregoing field notes of the survey of the third standard parallel north, through range No. 21 east of the principal base and meridian, in the Territory of Montana, showing the respective capacities in which they acted.

PETER SMITH	Chainman.
JOHN PARKER	Chainman.
WILLIAM MAULDIN	Axeman.
HENRY NEWTON	Axeman.
CLAYTON PAGE	Flagman.

FINAL OATHS OF ASSISTANTS.

We hereby certify that we assisted James M. Page, United States deputy surveyor, in surveying all those parts or portions of the third standard parallel north through range No. 21 east, of the principal base and meridian in the Territory of Montana, as are represented in the foregoing field notes as having been surveyed by him and under his direction; and that said survey has been in all respects, to the best of our knowledge and belief, well and faithfully surveyed, and the corner monuments established according to the instructions furnished by the United States surveyor-general for Montana.

FINAL OATH OF UNITED STATES DEPUTY SURVEYOR.

I, James M. Page, United States deputy surveyor, do solemnly swear that in pursuance of instructions received from Roswell H. Mason, United States surveyor-general for Montana, bearing date the tenth day of August, 1880, I have well, faithfully, and truly, in my own proper person, and in strict conformity with the instructions furnished by the United States surveyor-general for Montana, the Surveying Manual, and the laws of the United States, surveyed all those parts or portions of the third standard parallel north through range No. 21 east of the principal base and meridian in the Territory of Montana, as are represented in the foregoing field notes as having been surveyed by me and under my direction; and I do further solemnly swear that all the corners of said surveys have been established and perpetuated in strict accordance with the Surveying Manual, printed instructions, the special instructions of the United States surveyor-general for Montana, and in the specific manner described in the field notes, and that the foregoing are the *true* field notes of such survey; and should any fraud be detected I will suffer the penalty of perjury under the provisions of an act of Congress approved August 8, 1846.

JAMES M. PAGE,
United States Deputy Surveyor.

Subscribed and sworn to before me this 1st day of September, 1880.
[SEAL.] WILLIAM MARTIN, *Notary Public.*

SPECIMEN FIELD NOTES.—No. 2.

This specimen shows only the body of the field notes of the survey of the sixth auxiliary meridian, east through township No. 16 north of the base and principal meridian, in the Territory of Montana. The oaths and other portions omitted would be of like nature to those shown in Specimen Field Notes No. 1.

SIXTH AUXILIARY MERIDIAN EAST THROUGH TOWNSHIP NO. 16 NORTH.

On the night of September 2, 1880, I took an observation on the star Polaris, in accordance with instructions contained in the Manual of Surveys, and drove pickets on the line thus established.

Survey commenced September 3, 1880, with a Burt's improved solar compass.

Chains.	
	Before commencing this survey I test my compass on the line established last night, and find it correct.
	I begin at the cor. to Tps. 15 and 16 N., Rs. 24 and 25 E., which is a post, 4 ins. square, marked—
	T. 16 N., S. 31, on N. E.;
	R. 25 E., S. 6, on S. E.;
	T. 15 N., S. 1, on S. W., and
	R. 24 E., S. 36, on N. W. faces, with 6 notches on each edge, and pits N., S., E., and W. of post, 6 ft. dist., and mound of earth around post. Thence I run
	North, bet. secs. 31 and 36.
	Va. 20¼° E.
10.00	Dry channel, 10 lks. wide, course E.
40.00	Set a sandstone 18 × 10 × 3 ins. 12 ins. in the ground for ¼ sec. cor. marked ¼ on W. face; dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside.
42.60	Stream 6 lks. wide, course N. 70° W.
55.50	Enter timber.
56.45	Ravine about 30 ft. deep, course S. 60° W., and ascend.
60.70	Top of ridge about 50 ft. above ravine, and descend.
72.40	Foot of ridge about 50 ft. below top. Course E. and W.
80.00	Set a sandstone 18 × 11 × 3 ins. 12 ins. in the ground for cor. to secs. 25, 30, 31, and 36, marked with 5 notches on N. and 1 notch on S. edges; from which
	A pine, 6 ins. diam., bears N. 62° E., 41 lks. dist., marked T. 16 N., R. 25 E., S. 30 B. T.;
	A pine, 18 ins. diam., bears S. 41¼° E., 93 lks. dist. marked T. 16 N., R. 25 E., S. 30 B. T.:

Sixth auxiliary meridian east, through township No. 16 north—Continued.

Chains.	
	A pine, 12 ins. diam., bears S. 83¾° W., 109 lks. dist., marked T. 16 N., R. 24 E., S. 36 B. T.; A pine, 11 ins. diam., bears N. 47° W., 45 lks. dist., marked T. 16 N., R. 24 E., S. 25 B. T. Land, rolling. Soil, sandy and clay—2d and 3d rate. Timber, pine; large and good quality, with some thick undergrowth same; 24.50 chs.
	North, bet. secs. 25 and 30. Va. 20¼° E. Through timber.
2.75	Descend.
7.00	Leave timber.
18.90	Point about 40 ft. below last cor.; deep cut channel; stream 12 lks. wide; course N. 75° W.
40.00	Set a standstone 15 × 11 × 6 ins. 10 ins. in the ground for ¼ sec. cor., marked ¼ on W. face; dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised mound of earth 1½ ft. high, 3½ ft. base, alongside.
45.00	Enter bottom.
80.00	Set a post 4½ ft. long, 4 ins. square, with marked stone 12 ins. in the ground for cor. to secs. 19, 24, 25, and 30, marked— T. 16 N., S. 19, on N. E.; R. 25 E., S. 30, on S. E.; R. 24 E., S. 25, on S. W., and S. 24, on N. W. faces, with 4 notches on N. and 2 notches on S. edges; dug pits 18 × 18 × 12 ins. in each sec. 5½ ft. dist., and raised mound of earth 2 ft. high, 4½ ft. base, around post. Land, rolling and level. Soil, south 45 chs., clay and sandy—2d rate; north 35 chs.—1st rate. Timber, pine, of good quality; 7 chs.
	North, bet. secs. 19 and 24. Va. 20¼° E.
35.40	Dry channel, 20 lks. wide, course E.
40.00	Set a sandstone 16 × 8 × 4 ins. 11 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face; dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside.
42.45	Ford's Creek, 25 lks. wide, course E. and enter willow brush.
47.30	Bend in Ford's Creek, course N. 25° W., to avoid which and save two crossings, I offset W. 2.00 chs., thence N. on offset line 7.40 chs.; thence E. 2.00 chs. to line.
54.70	On line on N. side of bend, coures of creek at this point N. 45° E. and leave willow brush.
61.45	Dry channel, 25 lks. wide, course S. 70° E.
80.00	Set a sandstone 18 × 10 × 4 ins. 12 ins. in the ground, for cor. to secs. 13, 18, 19, and 24, marked with 3 notches on the N. and S. edges; dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, alongside. Land, nearly level bottom. Soil, sandy loam and clay—1st and 2d rate. No timber. Thick willow and box-elder brush along Ford's Creek.
	North bet. secs. 13 and 18. Va. 20¼° E. Leave bottom, and ascend gradually
33.00	A point about 40 ft. above bottom, top of low bluff.
38.00	Ravine, about 15 ft. deep, course E. and ascend gradually over rolling ground.
40.00	Set a sandstone 14 × 10 × 4 ins. 10 ins. in the ground for ¼ sec. cor., marked ¼ on W. face; dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised mound of earth 1½ ft. high, 3½ ft. base, alongside.
60.60	Top of low ridge, about 60 ft. high, and descend.

Sixth auxiliary meridian east, through township No. 16 north—Continued.

Chains.	
80.00	Set a post, 4½ ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for cor. to secs. 7, 12, 13, and 18, marked— T. 16 N., S. 7, on N. E.; R. 25 E., S. 18, on S. E.; R. 24 E., S. 13, on S. W., and S. 12, on N. W. faces, with 2 notches on N. and 4 notches on S. edges; dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth, 2 ft. high, 4½ ft. base, around post.
	Land rolling.
	Soil, sandy and clay loam—2d rate.
	No timber. *September* 3, 1880.

	North, bet. secs. 7 and 12. Var. 20¼° E.
	Ascend gradually.
3.40	A point about 20 ft. above last cor. top of low ridge, and descend.
39.50	Stream 3 lks. wide, course E., and ascend over rolling ground.
40.00	Set a sandstone 18 × 6 × 5 ins. 12 ins. in the ground, for ¼ sec. cor. marked ¼ on W. face; dug pits 18 × 18 × 12 ins. N. and S. of stone, and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside.
71.00	Descend steep bluff.
71.85	A point about 40 ft. below top of bluff. Stream 10 lks. wide, course E., and enter bottom land.
77.00	Leave bottom land and ascend bluff, course S. 70° E.
80.00	A point about 40 ft. above bottom, and set a sandstone 30 × 8 × 4 ins. 23 ins. in the ground for cor. to secs. 1, 6, 7, and 12, marked with one notch on N. and 5 notches on S. edges; dug pits 18 × 18 × 12 ins. in each sec. 5½ ft. dist., and raised a mound of earth 2 ft. high. 4½ ft. base, alongside.
	Land, rolling.
	Soil, sandy and clay—2d rate.
	No timber.

	North, bet. secs. 1 and 6. Va. 20½° E.
18.60	Stream, 4 lks. wide, course E.
40.00	Set a sandstone 30 × 9 × 4 ins. 23 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face; dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside.
61.00	Stream, 8 lks. wide, course S. 40° E.
78.42	Intersect the fourth standard parallel north at a point 6.95 chs. E. of the standard cor. to secs. 35 and 36, T. 17 N., R. 24 E., at which point I set a post 4½ ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, marked— C. C., T. 16 N., on S.; R. 25 E., S. 6, on E., and R. 24 E., S. 1, on W. faces, with 6 notches on S., E., and W. faces; dug pits 24 × 18 × 12 ins. lengthwise on each line, S., E., and W. of post, 6 ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, around post.
	Land, level.
	Soil, sandy loam—1st and 2d rate.
	No timber.
	September 4, 1880.

31.50 chs. of this line runs through timber.

GENERAL DESCRIPTION.

Townships 16 N., Rs. 24 and 25 E., are generally rolling table lands, producing an abundant growth of grass, and there is a large amount of good bottom land along Ford's Creek and its tributaries. About 2 miles east of the closing cor. is a lake some 2 miles wide, by 2½ miles long, lying in Tps. 16 and 17 N., R. 25 E.

JAMES M. PAGE,
U. S. Deputy Surveyor.

SEPTEMBER 4, 1880.

SPECIMEN FIELD NOTES.—No. 3.

These specimen field notes show only the body of the field notes of the survey of the west and north boundaries of T. 13 N., R. 24 E., of the base and principal meridian in the Territory of Montana, it being assumed that the south and east boundaries of said township have been previously established by running the third standard parallel north, and the sixth auxiliary meridian east. The oaths and other portions omitted would be of like nature to those shown in Specimen Field Notes No. 1, it being remembered that only *one* set of chainmen is required in the survey of township lines.

EXTERIOR BOUNDARIES T. 13 N., R. 24 E.

Survey commenced September 21, 1880, with a Burt's improved solar compass.

Chains.	
	I begin at the standard cor. to Tps. 13 N., Rs. 23 and 24 E., which is a post 4 ins. square, marked— S. C., T. 13 N., on N.; R. 24 E., S. 31, on E., and R. 23 E., S. 36, on W. faces, with 6 notches on N., E., and W. faces, and pits N. E., and W. of post 6 feet dist., and mound of earth around post. Thence I run
	North between secs. 31 and 36. Va. 20¼° E.
	Descend over rough, broken ground.
1.50	Ravine about 20 ft. deep, course N. 80° E., and ascend.
15.00	Top of hill, about 50 feet above ravine, and descend.
30.00	Head of ravine, course N. 30° E.
35.60	Descend abruptly.
40.00	A point about 150 ft. below top of hill—foot of broken bluff, course E. and W., and set a sandstone 16×16×6 ins., 11 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face, and raised a mound of stone alongside. Pits impracticable.
42.00	Stream, 4 lks. wide, course E., and ascend.
47.00	Top of ridge about 80 ft. above stream, and descend.
55.35	Ravine, about 30 ft. deep, course N. 45° E.
61.95	A point about 150 ft. below top of ridge. Spring branch, 4 lks. wide, course S. 70° E., ascend.
74.50	A point about 150 ft. above stream, and enter timber.
80.00	Set a sandstone 24×15×8 ins. 18 ins. in the ground for cor. to secs. 25, 30, 31, and 36, marked with 5 notches on N. and 1 notch on S. edges; from which A pine, 5 ins. diam., bears N. 22½° E., 30 lks. dist., marked T. 13 N., R. 24 E., S. 30 B. T. A pine, 12 ins. diam., bears S. 27¼° E., 87 lks. dist., marked T. 13 N., R. 24 E., S. 31 B. T. A pine, 10 ins. diam., bears S. 1° W., 40 lks. dist., marked T. 13 N., R. 23 E., S. 36 B. T. A pine, 17 ins. diam., bears N. 42° W., 65 lks. dist., marked T. 13 N., R. 23 E., S. 25 B. T.
	Land, mountainous, rough, and broken.
	Soil, sandy and stony—4th rate.
	Timber, pine, 5.50 chs., and cottonwood along streams.

	North, bet. secs. 25 and 30. Va. 20¼° E.
	Descend through timber.
8.85	Ravine, about 10 ft. deep, course N. 70° E.
19.00	A point about 175 ft. below cor., ravine, about 60 ft. deep, course S. 80° E. and ascend.
21.00	Leave timber.
24.00	A point about 100 feet above ravine, top of hill, and descend gradually over rolling ground.
40.00	Set a sandstone 16×13×3 ins. 11 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face and raised a mound of stone alongside.
75.50	Spring branch, 2 lks. wide, course E. and ascend.
80.00	A point about 40 ft. above stream, and set a post 4 ft. long, 4 ins. square, with marked stone 12 ins. in the ground for cor. to secs. 19, 24, 25, and 30, marked— T. 13 N., S. 19, on N. E.; R. 24 E., S. 30, on S. E.; R. 23 E., S. 25, on S. W., and S. 24 on N. W. faces, with 4 notches on N. and 2 notches on S. edges, and raised a mound of stone, 2 ft. high, 4½ ft. base, around post.

Exteriors T. 13 *N., R.* 24 *E.*—Continued.

Chains.	
	Land, hilly, rough, and broken. Soil, sandy and rocky—4th rate. Timber, pine, 21.00 chs., and undergrowth same.
	North, bet. secs. 19 and 24. Va. 20¼° E. Descend gradually.
4.20	A point about 40 ft. below cor. Spring branch 3 lks. wide, course S. 70° E.
18.50	A point about 50 ft. above stream, top of ridge, course E. and W., and descend over rolling ground.
40.00	Set a sandstone 14 × 14 × 4 ins. 10 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face, and raised a mound of stone alongside. Pits impracticable.
48.85	Stream, 4 lks. wide, course E.
64.95	Stream, 4 lks. wide, course S. 70° E.
80.00	Set a sandstone 24 × 18 × 6 ins. 18 ins. in the ground, for cor. to secs. 13, 18, 19, and 24, marked with 3 notches on N. and S. edges; dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth alongside.
	Land, broken and rolling. Soil, rocky and sandy loam—2d and 3d rate. Some scattering pine along streams, with yellow and rose brush.
	North, bet. secs. 13 and 18. Va. 20¼° E. Over rolling ground.
40.00	Set a sandstone 18×14×3 ins. 12 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face; dug pits 18×18×12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside.
80.00	Set a post, 4 ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for cor. to secs. 7, 12, 13, and 18, marked— T. 13 N., S. 7, on N. E.; R. 24 E., S. 18, on S. E.; R. 23 E., S. 13, on S. W., and S. 12, on N. W. faces, with 2 notches on N. and 4 notches on S. edges; dug pits 18×18×12 ins. in each sec., 5½ ft. dist., and raised a mound of earth, 2 ft. high, 4½ base, around post.
	Land, rolling. Soil, sandy loam—2d rate. No timber. *September* 21, 1880.
	North, bet. secs. 7 and 12. Va. 20¼° E.
40.00	Set a sandstone, 16×12×3 ins. 11 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face; dug pits 18×18×12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside.
54.00	Stream, 7 lks. wide, course N. 40° E.
80.00	Set a post, 4 ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for cor. to secs. 1, 6, 7, and 12, marked— T. 13 N,, S. 6, on N. E.; R. 24 E., S. 7, on S. E.; R. 23 E., S. 12, on S. W., and S. 1, on N. W. faces, with 1 notch on N. and 5 notches on S. edges; dug pits 18×18×12 ins. in each sec., 5½ ft. dist., and raised a mound of earth, 2 ft. high, 4½ ft. base, around post.
	Land, rolling. Soil, sandy loam—2d rate. No timber; willow brush along stream.

Exteriors T. 13 N., R. 24 E.—Continued.

Chains.	
	North, bet. secs. 1 and 6.
	Va. 20¼° E.
34.00	Stream, 6 lks. wide, course E.
40.00	Set a sandstone 22 × 8 × 3 ins. 16 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face; dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth, 1½ ft. high, 3½ ft. base, alongside.
80.00	Set a post, 4½ ft. long, 4 ins. square, with marked stone, 12 ins. in the ground for cor. to Tps. 13 and 14 N., Rs. 23 and 24 E., marked—
	T. 14 N., S. 31, on N. E.;
	R. 24 E., S. 6, on S. E.;
	T. 13 N., S. 1, on S. W., and
	R. 23 E., S. 36, on N. W. faces, with 6 notches on each edge; dug pits 24 × 18 × 12 ins. lengthwise on each line, N., S., E., and W. of post, 6 ft. dist., and raised a mound of earth, 2 ft. high, 4½ ft. base, around post.
	Land, rolling.
	Soil, sandy loam—2d rate.
	No timber.

From the cor. to Tps. 13 and 14 N., Rs. 23 and 24 E., I run east on a random line, between said townships, the variation of my compass being 20¼° E. I set temporary half-mile and mile corners at each 40 and 80 chains, and find the township line to be 5 miles 77 chs. and 95 lks. long, and the falling to be 45 lks. N. of the cor. to Tps. 13 and 14 N., Rs. 24 and 25 E. The correction for the *true* line will therefore be 7½ lks. south, and 2.05 chs. west per mile, and its course will be N. 79° 57′ W.

From the cor. to Tps. 13 and 14 N., Rs. 24 and 25 E., which is a post, 4 ins. square, marked—

T. 14 N., S. 31, on N. E.;
R. 25 E., S. 6, on S. E.;
T. 13 N., S. 1, on S. W., and
R. 24 E., S. 36, on N. W. faces, with 6 notches on each edge and pits N., S. E., and W. of post, 6 ft. dist., and mound of earth around post.
I run

	N. 79° 57′ W. on a true line bet. secs. 1 and 36.
	Va. 20° E.
	Over very nearly level ground.
9.28	Stream, 10 lks. wide, course S. 70° E.
15.40	Same stream, course, N. 50° E.
40.00	Set a red sandstone, 18 × 10 × 6 ins., 12 ins. in the ground, for ¼ sec. cor., marked ¼ on N. face; dug pits 18 × 18 × 12 ins. E. and W. of stone, 5½ ft. dist., and raised a mound of earth, 1½ ft. high, 3½ ft. base, alongside.
80.00	Set a sandstone, 18 × 14 × 6 ins., 12 ins. in the ground, for cor. to secs. 1, 2, 35, and 36, marked with 1 notch on E. and 5 notches on W. edges; dug pits 18 × 18 × 12 ins. N., S., E., and W. of stone, 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, alongside.
	Land, level.
	Soil, rich loam—1st class.
	No timber.

	N. 79° 57′ W. on a true line bet. secs. 2 and 35.
	Va. 20¼° E.
	Over nearly level ground.
40.00	Set a sandstone, 16 × 10 × 5 ins., 11 ins. in the ground, for ¼ sec. cor., marked ¼ on N. face; dug pits 18 × 18 × 12 ins. E. and W. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside.
45.70	S. fork of Spring Creek, 15 lks. wide, course N. 40° E.

Exteriors T. 13 *N., R.* 24 *E.*—Continued.

Chains.

80. 00 Set a post, 4 ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for cor. to secs. 2, 3, 34 and 35, marked—
T. 14 N., S. 35, on N. E.;
R. 24 E., S. 2, on S. E.;
T. 13 N., S. 3, on S. W., and
S. 34, on N. W. faces, with 2 notches on E. and 4 notches on W. edges; dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, alongside.
Land, level.
Soil, rich loam—1st rate.
No timber. *September* 22, 1880.

N. 79° 57′ W. on a true line, bet. secs. 3 and 34.
Va. 20¼° E.
Ascend gradually.

18. 60 Enter pine timber, in open grove.

40. 00 Set a sandstone 18 × 8 × 6 ins. 12 ins. in the ground, for ¼ sec. cor., marked ¼ on N. face; from which
A pine, 12 ins. diam., bears N. 23° W., 89 lks. dist., marked ¼ S. B. T.
No other tree in limits, and raised a mound of stone alongside.

52. 50 Spring branch, 3 lks. wide, course S. 50° E.

80. 00 A point about 150 ft. above last sec. cor. and set a sandstone 18 × 8 × 6 ins. 12 ins. in the ground, for cor. to secs. 3, 4, 33, and 34, marked with 3 notches on E. and W. edges; from which
A pine, 36 ins. diam., bears N. 45° E., 82 lks. dist. marked T. 14 N., R. 24 E., S. 34 B. T.;
A pine, 14 ins. diam., bears S. 24° W., 110 lks. dist., marked T. 13 N., R. 24 E., S. 4 B. T.
No other trees within limits, and raised a mound of stone alongside.
Land, slightly undulating.
Soil, sandy loam—2d rate.
Timber, pine of fine quality; 61.40 chs.

N. 79° 57′ W. on a true line, bet. secs. 4 and 33.
Va. 20½° E.

11. 60 Spring branch, 6 lks. wide, course N. 20° E.

17. 50 Leave timber.

40. 00 Set a sandstone 20 × 10 × 4 ins. 15 ins. in the ground for ¼ sec. cor., marked ¼ on N. face, and raised a mound of stone, covered with earth, 2 ft. high, 4½ ft. base, alongside.

76. 30 Spring branch, 2 lks. wide, course S. 50° E.

80. 00 Set a post 4 ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for cor. to secs. 4, 5, 32, and 33, marked—
T. 14 N., S. 33, on N. E.;
R. 24 E., S. 4, on S. E.;
T. 13 N., S. 5, on S. W., and
S. 32, on N. W. faces, with 4 notches on E. and 2 notches on W. edges; dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, around post.
Land, nearly level.
Soil, sandy loam—2d rate.
Timber, pine; 17.50 chs.

N. 79° 57′ W. on a true line, bet. secs. 5 and 32.
Va. 20¼° E.

36. 10 Spring branch, 2 lks. wide, course S. 50° E.

40. 00 Set a post, 3 ft. long, 3 ins. square, with marked stone, 12 ins. in the ground, for ¼ sec. cor., marked ¼ S. on N. face; dug pits 18 × 18 × 12 ins. E. and W. of post, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, around post.

Exteriors T. 13 *N., R.* 24 *E.*—Continued.

Chains.	
80.00	Set a sandstone 18 × 12 × 6 ins. 12 ins. in the ground, for cor. to secs. 5, 6, 31, and 32, marked with 5 notches on E. and 1 notch on W. edges; dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, alongside.
	Land, level.

	Va. 20¼° E.
40.00	Set a sandstone 22 × 10 × 3 ins. 16 ins. in the ground, for ¼ sec. cor., marked ¼ on N. side; dug pits 18 × 18 × 12 ins. E. and W. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside.
77.95	The cor. to Tps. 13 and 14 N., Rs. 23 and 24 E.
	Land, level.
	Soil, sandy loam—2d rate.
	No timber.

September 23, 1880.

2 miles 19 chs. and 90 lks. of these lines run over mountainous land, or through timber.

GENERAL DESCRIPTION.

The northwestern portion of this township is rough, hilly, and broken. The remainder consists of rolling land, with much rich bottom land along Spring Creek and its numerous tributaries. On the hilly and rolling land are large groves of pine timber. There is one settler near the center of the township. The township should be subdivided.

JAMES M PAGE,
U. S. Deputy Surveyor.

SPECIMEN FIELD NOTES.—No. 4.

Resurvey of a portion of the exterior boundaries of T. 25 N., R. 2 W., Willamette meridian, Oregon.

In subdividing this township I commenced by running north on a blank line, on the east boundary of sec. 36, va. 17° 55′ E., and at 40 chs. I found the ¼ sec. cor. to be N. 80° E. 16 lks. dist., and at 80 chs. the sec. cor. to be E. 30 lks. dist. I therefore continued the true line north, found that no portion of this east boundary was in alignment, and that many of the corners were nearly obliterated, but that the cor. to Tps. 25 and 26 N., Rs. 1 and 2 W., was due north of the starting cor. As T. 25 N., R. 1 W., had not been subdivided, and, consequently, no subdivision lines had been closed on either side of this east boundary, I resurveyed the same as follows:

Finding the standard cor. to Tps. 25 N., Rs. 1 and 2 W., was a post greatly decayed, and with the marks nearly obliterated, I destroyed all traces of old cor. and re-established it as follows:

Set a post, 4½ ft. long, 4 ins. square, 24 ins. in the ground, for standard cor. to Tps. 25 N., Rs. 1 and 2 W., marked—

S. C., T. 25 N., on N.;
R. 1 W., S. 31, on E., and
R. 2 W., S. 36, on W. faces, with 6 notches on N., E., and W. faces; from which

A black oak, 20 ins. diam., bears N. 37° E., 27 lks. dist., marked T. 25 N., R. 1 W., S. 31 B. T.;

A burr oak, 24 ins. diam., bears N. 43° W., 35 lks. dist., marked T. 25 N., R. 2 W., S. 36 B. T.;

A maple, 18 ins. diam., bears S. 27° W., 39 lks. dist., marked T. 24 N., R. 2 W., S. 1 B. T.

Exteriors T. 25 N., R. 2 W.—Continued.

Chains.	
	Thence I run
	North, bet. secs. 31 and 36.
	Va. 17° 55′ E.
	Through timber.
1.00	Brook, 5 lks. wide, course N. W.
18.00	Foot of hill, course N. W. and S. E.
20.00	Top of hill, about 50 ft. high.
40.00	Set a sandstone 20 × 8 × 3 ins. 15 ins., in the ground, for ¼ sec. cor., marked ¼ on W. side; dug pits 18 × 8 × 12 ins. N. and S. of stone 5½ ft. dist., and raised a mound of earth, 1½ ft. high, 3½ ft. base, alongside.
	From this point the old ¼ sec. cor., which is a decayed stake, with marks almost obliterated, bears N. 80° E., 16 lks. dist. I destroyed this stake, and also the marks on the stump of a beech tree, described as a bearing tree, in the field notes of original survey. No traces could be found of poplar tree described as bearing tree in said field notes.
55.00	Descend.
57.00	Foot of hill, about 40 ft. high, and enter rich level land.
72.60	A brook, 10 lks. wide, course N. 40° E.
80.00	Set a post, 4 ft. long, 4 ins. square, 2 ft. in the ground, for cor. to secs. 25, 30, 31, and 36, marked—
	T. 25 N., S. 30, on N. E.;
	R. 1 W., S. 31, on S. E.;
	R. 2 W., S. 36, on S. W., and
	S. 25, on N. W. faces, with 5 notches on N. and 1 notch on S. edges; from which
	A birch, 24 ins. diam., bears N. 30° E., 18 lks. dist., marked T. 25 N., R. 1 W., S. 30 B. T.;
	A white oak, 16 ins. diam., bears S. 25° E., 60 lks. dist., marked T. 25 N., R. 1 W., S. 31 B. T.;
	A white oak, 14 ins. diam., bears S. 80° W., 93 lks. dist., marked T. 25 N., R. 2 W., S. 36 B. T.;
	A poplar, 15 ins. diam., bears N. 60° W., 82 lks. dist., marked T. 25 N., R. 2 W., S. 25 B. T.
	From this cor. the old sec. cor., a decayed post, bears E., 30 lks. dist. I destroyed this post, and also the marks on old bearing trees.
	Land, rolling and level.
	Soil, N. and S. parts, rich loam—1st rate; middle part, sandy—2d rate.
	Timber, beech, poplar, white oak, and birch.
	North, bet. secs. 25 and 30.
	Va. 17° 55′ E.
	Through timber.
4.20	A maple, 16 ins. diam.
6.10	Foot of rising ground, slopes E. and N. W.
40.00	An elm, 18 ins. diam., which I mark ¼ S., on W. face, for ¼ sec. cor., from which
	A poplar, 30 ins. diam., bears N. 30° E., 100 lks. dist., marked ¼ S. B. T.
	A beech, 13 ins. diam., bears S. 24° W., 30 lks. dist., marked ¼ S. B. T.
	From this point a post, the old ¼ sec. cor., bears N. 75° E., 100 lks. dist. I destroyed this post, and also marks on the old bearing trees, a beech and poplar.
74.00	A white oak, 16 ins. diam.
80.00	Set a post, 4 ft. long, 4 ins. square, 24 ins. in the ground, for cor. to secs. 19, 24, 25, and 30, marked—
	T. 25 N., S. 19, on N. E.;
	R. 1 W., S. 30, on S. E.;
	R. 2 W., S. 25, on S. W., and
	S. 24, on N. W. faces, with 4 notches on N. and 2 notches on S. edges; from which
	A beech, 18 ins. diam., bears N. 30° E., 74 lks. dist., marked T. 25 N., R. 1 W., S. 19 B. T.
	A poplar, 26 ins. diam., bears S. 40° E., 28 lks. dist., marked T. 25 N., R. 1 W., S. 30 B. T.

Exteriors T. 25 N., R. 2 W.—Continued.

Chains.	
	A burr oak, 16 ins. diam., bears S. 80° W., 36 lks. dist., marked T. 25 N., R. 2 W., S. 25 B. T.;
	A white oak, 16 ins. diam., bears N. 45° W., 36 lks. dist., marked T. 25 N., R. 2 W., S. 24 B. T.
	From this point the old sec. cor., a post, bears N. 50° E., 40 lks. dist. I destroyed this post, and also the marks on old bearing trees.
	Land, rolling.
	Soil, rich loam—1st rate.
	Timber, beach, walnut, elm, and white oak.

	North, bet. secs. 19 and 24.
	Va. 17° 55′ E.
	Through timber, gradually descending.
22.10	A white walnut, 24 ins. diam.
40.00	Set a post, 3 ft. long, 3 ins. square, 2 ft. in the ground, for ¼ sec. cor., marked ¼ S. on W. face; from which
	An ash, 10 ins. diam., bears S. 40° E., 60 lks. dist., marked ¼ S. B. T.;
	An ash, 12 ins. diam., bears N. 6° W., 13 lks. dist., marked ¼ S. B. T.
	From this point the old ¼ sec. cor., a post, bears S. 10 E., 45 lks. dist. I destroyed this post, and also the marks on old bearing trees.
44.00	Foot of slope, about 80 ft. below last sec. cor. Road from Williamsburg to Astoria, course E. and W.
50.00	Elk Creek, 130 lks. wide, shallow at this point, and gentle current, general course W.
56.40	Brook, 10 lks. wide, course S. W.
65.20	Leave creek bottom, and enter upland, course E. and W.
72.00	A hickory, 14 ins. diam.
80.00	Set a granite bowlder, 20 × 12 × 4 ins., 15 ins. in the ground, for cor. to secs. 13, 18, 19, and 24, marked with 3 notches on N. and S. edges, and raised a mound of stone alongside.
	From this point, the old sec. cor., a limestone, bears N. 20° E., 16 lks. dist. I destroyed marks on this stone. Found stumps of trees, which had probably been established as bearing trees at date of original survey, but could not distinguish any marks on same.
	Land, rolling and level.
	Soil, rich loam—1st rate. Bottom is not subject to inundation.
	Timber, walnut, beech, maple, ash, and hickory.

	North, bet. secs. 13 and 18.
	Va. 17° 55′ E.
	Through timber.
12.30	A white oak, 16 ins. diam.
21.00	Foot of high, broken ridge, about 200 ft. above creek bottom, course E. and N. W.
30.40	Top of ridge, about 75 ft. high, descends abruptly.
40.00	Set a limestone, 16 × 10 × 4 ins., 11 ins. in the ground, for ¼ sec. cor., marked ¼ on W. side, from which
	A cherry, 8 ins. diam., bears N. 30° W., 16 lks. dist., marked ¼ S. B. T.
	A cherry, 10 ins. diam., bears S. 60° W., 80 lks. dist., marked ¼ S. B. T.
	I could find no traces of old ¼ sec. cor., but found an old cherry tree marked for bearing tree, and obliterated marks on same.
44.00	A burr oak, 30 ins. diam.
59.00	Foot of descent, about 300 ft. below top of ridge, and ascend.
80.00	Set a post, 4 ft. long, 4 ins. square, 24 ins. in the ground, for cor. to secs. 7, 12, 13, and 18, marked—
	T. 25 N., S. 7, on N. E.;
	R. 1 W., S. 18, on S. E.;
	R. 2 W., S. 13, on S. W., and
	S. 12, on N. W. faces, with 2 notches on N. and 4 notches on S. faces; from which
	A hickory, 18 ins. diam., bears N. 40° E., 14 lks. dist., marked T. 25 N., R. 1 W., S. 7 B. T.;
	A maple, 12 ins. diam., bears S. 42° E., 23 lks. dist., marked T. 25 N., R. 1 W., S. 18 B. T.;

Exteriors T. 25 N., R. 2 W.—Continued.

Chains.	
	A beech, 16 ins. diam., bears S. 36° W., 16 lks. dist., marked T. 25 N., R. 2 W. S. 13 B. T.;
	A hickory, 20 ins. diam., bears N. 39° W., 38 lks. dist., marked T. 25 N., R. 1 W. S. 12 B. T.
	The old sec. cor., a post, was lying on the ground near this cor. I destroyed this post. The bearing trees are those described in the field notes of original survey, and were all newly marked.
	Land (except S. 21.00 chs.), high, broken, and mountainous.
	Soil, sandy and rocky—3d and 4th rate.
	Timber, beech, hickory, maple, and black-jack.
	North, bet. secs. 7 and 12.
	Va. 17° 55′ E.
	Through timber.
13.10	A black oak, 16 ins. diam.
40.00	Set a limestone 20 × 8 × 2 ins., 15 ins. in the ground, for ¼ sec. cor., marked ¼ on W. side, from which
	An elm, 14 ins. diam., bears S. 40° W., 16 lks. dist., marked ¼ S. B. T.;
	An elm, 11 ins. diam., bears N. 23° W., 42 lks. dist., marked ¼ S. B. T.
	From this point, the old ¼ sec. cor., a post, bears N. 75° W., 60 lks. dist. I destroyed this post, and also the marks on old bearing trees.
68.00	A point about 100 ft. above last sec. cor., and foot of mountain, course E. N. W.
80.00	A granite rock in place 2 × 6 × 10 ft. above ground, which I marked for cor. to secs. 1, 6, 7, and 12, with a cross (×) at exact cor. point, and 1 notch N. and 5 notches S. of cross.
	This rock is on the top of the mountain about 300 ft. above foot. Fire has destroyed all traces of old sec. cor. and bearing trees.
	Land, mountainous and broken.
	Soil, stony and rocky—4th rate.
	Timber, hickory, oak, beech, and ash.
	The fire above referred to was confined to a space of about 30 acres on the the summit of the mountain.
	North, bet. secs 1 and 6.
	Va. 17° 55′ E.
	Descend abruptly.
6.00	A black oak, 16 ins. diam., and enter timber.
9.00	A point about 250 feet below summit; foot of mountain.
20.13	An ash, 12 ins. diam.
34.06	An ash, 20 ins. diam.
39.00	Edge of ravine, about 40 ft. deep.
40.00	Bottom of ravine, and set a limestone 18 × 7 × 4 ins., 12 ins. in the ground, for ¼ sec. cor., marked ¼ on W. side, from which
	A poplar, 16 ins. diam., bears N. 40° E., 34 lks. dist., marked ¼ S. B. T.;
	A poplar, 14 ins. diam., bears S. 13° W., 22 lks. dist., marked ¼ S. B. T.
	From this point the old ¼ sec. cor., a post bears S. 80° W., 10 lks. dist. I destroyed this post, and after a careful examination of all the trees within limits, was unable to distinguish any marks made for bearing trees.
44.10	Leave timber, and enter open prairie, course E. and N. W.
79.75	At this point I found the old township cor., a charred stake with remains of trench and mound. As Tps. 26 N., Rs. 1 and 2 W., had both been subdivided, I could not change the location of this cor. and therefore re-established it, as follows:
	Set a post, 4½ ft. long, 4 ins. square, 24 ins. in the ground, for cor. to Tps. 25 and 26 N., Rs. 1 and 2 W., marked—
	T. 26 N. S. 31 on N. E.;
	R. 1 W. S. 6 on S. E.;
	T. 25 N. S. 1 on S. W.; and
	R. 2 W. S. 36 on N. W. faces, with 6 notches on each edge; from which
	A cherry, 6 ins. diam., bears N. 40° E., 14 lks. dist., marked T. 26 N., R. 1 W. S. 31 B. T.;

Exteriors T. 25 N., R. 2 W.—Continued.

Chains.	
	A white oak, 5 ins. diam., bears S. 30° E., 24 lks. dist., marked T. 25 N., R. 1 W., S. 6 B. T.;
	A hickory, 8 ins. diam., bears S. 50° W., 30 lks. dist., marked T. 25 N., R. 2 W., S. 1 B. T.;
	A chestnut, 6 ins. diam. bears N. 28° W., 13 lks. dist., marked T. 26 N., R. 2 W., S. 36 B. T.
	Land, broken, rolling, and level.
	Soil, rocky and sandy loam—2d and 4th rate.
	Timber, oak, ash, poplar, chestnut, and hickory.
	In subdividing this township, and running the random line west bet. secs. 7 and 18, I was unable to find the cor. to secs. 7, 12, 13, and 18. I found the ¼ sec. cor. bet. secs. 13 and 18, which is
	A post, 3 ins. square, firmly set in the ground, and marked ¼ S. on W. side; from which
	A white oak, 27 ins. diam., bears N. 27° W., 27 lks. dist., marked ¼ S. B. T.;
	A white oak, 30 ins. diam., bears N. 28° E., 92 lks. dist., marked ¼ S. B. T.
	From this ¼ sec. cor. I run north bet. secs. 13 and 18.
	Va. 18° E.
6.50	Road from Williamsburg, course E. and W.
38.00	Fence, course E. and W., leave timber, and enter plowed ground.
40.00	At this point I again made careful search for the sec. cor., which is described as a post, with bearing trees, but was unable to find any traces of it, and therefore re-established cor. as follows:
	Set a post 4 ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for cor. to secs. 7, 12, 13, and 18, marked—
	T. 25 N. S. 7 on N. E.;
	R. 2 W. S. 18 on S. E.;
	R. 3 W. S. 13 on S. W. and
	S. 12 on N. W. faces, with two notches on N. and 4 notches on S. edges; dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, around post.
	Land, level.
	Soil, rich loam—1st rate.
	Timber, oak.

SPECIMEN FIELD NOTES.

TITLE PAGE.

FIELD NOTES

OF THE SURVEY OF THE

SUBDIVISION AND MEANDER LINES

OF

TOWNSHIP No. 6 NORTH, RANGE No. 34 EAST,

OF THE

PRINCIPAL BASE AND MERIDIAN

OF

MONTANA TERRITORY,

AS SURVEYED BY

WALTER W. de LACY,
U. S. DEPUTY SURVEYOR,

UNDER HIS CONTRACT,

NO. 87,

DATED JULY 3, 1880.

Survey commenced August 6th, 1880.
Survey completed August 16th, 1880.

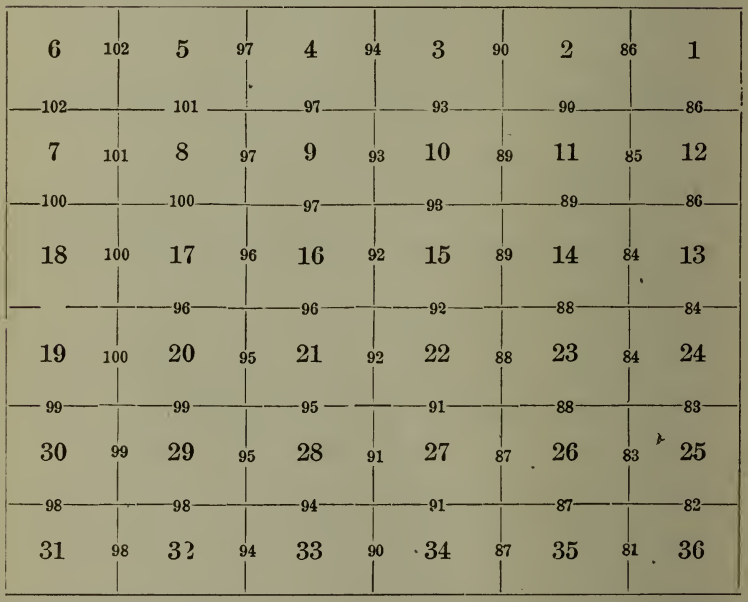
[Second page.]

NAMES AND DUTIES OF ASSISTANTS.

——— ———.....Compassman.
WLLLIAM MORAN.....Chainman.
PETER COOPER.....Chainman.
ARTHUR F. FOWLER.....Axeman.
FRANKLIN J. SAGE.....Axeman.
JOHN PARKER.....Flagman.

INDEX.

Township 25 north. R. 2 west.



PRELIMINARY OATHS OF ASSISTANTS.

We, William Moran and Peter Cooper, do solemnly swear that we will well and faithfully execute the duties of chain carriers; that we will level the chain over even and uneven ground, and plumb the tally pins either by sticking or dropping the same; that we will report the true distance to all notable objects, and the true lengths of all lines that we assist in measuring, to the best of our skill and ability, and in accordance with instructions given us in the survey of the subdivision and meander lines of Township No. 6 north, of Range No. 34 east, of the principal base and meridian in the Territory of Montana.

WILLIAM MORAN, *Chainman.*
PETER COOPER, *Chainman.*

Subscribed and sworn to before me this second day of August, 1880.

[SEAL.] JOHN JENKINS,
Notary Public.

We, Arthur F. Fowler and Franklin J. Sage, do solemnly swear that we will well and truly perform the duties of axemen in the establishment of corners and other duties, according to instructions given us, and to the best of our skill and ability, in the survey of the subdivision and meander lines of Township No. 6 north, of Range No. 34 east, of the principal base and meridian in the Territory of Montana.

ARTHUR F. FOWLER, *Axeman.*
FRANKLIN J. SAGE, *Axeman.*

Subscribed and sworn to before me this second day of August, 1880.

[SEAL.] JOHN JENKINS,
Notary Public

T. 6 N., R. 34 E.

Chains.	
	Preliminary to commencing this survey, I ran west on a blank line on the south boundary of Sec. 36, and at 39.97 chs. found the ¼ sec. cor. and at 80.01 chs. found the sec. cor. As the east boundary of Sec. 31 crosses the Yellowstone River it was not re-run. My compass will therefore run the same line as the exterior boundaries, and the chaining practically agrees.
	Survey commenced August 6, 1879, with a Burt's improved solar compass. I commenced at the cor. to Secs. 1, 2, 35, and 36, on the south boundary, which is a sandstone 30×8×2½ ins. firmly set in the ground, with one notch on E. and 5 notches on W. edges, and pits 18×18×12 ins. in each sec. 5½ ft. dist. with mound of earth 2 ft. high, 4½ ft. base alongside. Thence I run North bet. Secs. 35 and 36.
	Va. 18° 30′ E.
20.00	Enter scattering timber. Alexander's house bears N. 31° W.
31.00	Leave scattering timber.
40.00	Set a post 3 ft. long, 3 ins. square, with marked stone, 12 ins. in the ground, for ¼ sec. cor., marked ¼ S. on W. side, dug pits 18 × 18 × 12 ins. N. and S of post, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, around post.
	Alexander's house bears S. 53¼° W.
52.70	Enter brush.
53.82	Right bank of the Yellowstone River. Set a post 4 ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for meander cor. to fractional secs. 35 and 36, marked M. C., and T. 6 N. on S., R. 34 E. S. 36 on E., and S. 35 on W., faces, dug pit 3 ft. square, 12 ins. deep, 8 lks. S. of post, and raised mound of earth 2 ft. high, 4½ ft. base, around post.
	There being an island on line on N. side of channel, I send a flag across, and set it on line bet. secs. 35 and 36, on bar S. of island. I then go across to flag and run a base line W. 11.14 chs., to a point from which meander cor. on right bank bears S. 37° 50′ E., which gives for distance across the river to edge of bar 14.34 chs. I then run north from flag 66 lks. to south bank of island, making the whole distance 53.82 + 14.34 + 0.66 chs., or

Subdivisions, T. 6 N., R. 34 E.—Continued.

Chains.	
68.82	To south bank of island, which point I established by setting a post 4 ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for meander cor. to fractional secs. 35 and 36 on S. bank of island, marked M. C., and T. 6 N. on N., R. 34 E. S. 36 on E., and S. 35 on W., faces, dug p t 3 ft. square, 12 ins. deep, 8 lks. N. of post, and raised a mound of earth 2 ft. high, 4½ ft. base, around post.
	Thence continue on line across island, enter brush.
72.50	Leave brush, enter timber.
80.00	Set a post 4 ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for cor. to secs. 25, 26, 35, and 36, marked T. 6 N. S. 25 on N. E., R. 34 E. S. 36 on S. E., S. 35 on S. W., and S. 26 on N. W., faces, with 1 notch on S. and E. edges, from which A cottonwood, 12 ins. diam., bears N. 12¾° E., 180 lks. dist., marked T. 6 N., R. 34 E., S. 25 B. T. A cottonwood, 18 ins. diam., bears S. 82° E., 154 lks. dist., marked T. 6 N., R. 34 E., S. 36 B. T. A cottonwood, 10 ins. diam., bears S 29½° W., 56 lks., dist., marked T. 6 N., R. 34 E., S. 35 B. T. A cottonwood, 10 ins. diam., bears N. 46½° W., 119 lks. dist., marked T. 6 N., R. 34 E., S. 26 B. T.
	Land, level. Soil, rich loam—1st rate. Timber, cottonwood and willow undergrowth same, 12.30 chains.

	East, on a random line, bet. secs. 25 and 36. Va. 18° 20′ E.
	This line is wholly on the island.
1.33	A cottonwood, 20 ins. diam.
21.50	Leave timber.
31.00	Enter timber and brush.
35.00	Leave timber and brush.
40.00	Set temporary ¼ sec. cor.
47.50	Enter timber.
53.00	Leave timber.
61.00	Enter brush.
66.00	Leave brush, enter scattering timber.
79.54	Intersect the east boundary of the township at 58 lks. N. of the cor. to secs. 25, 30, 31, and 36, which is a post 4 ft. long, 4 ins. square, firmly set in the ground, marked T. 6 N. S. 30 on N. E., R. 35 E. S. 31 on S. E., R. 34 E. S. 36 on S. W., and S. 25 on N. W., faces, with 5 notches on N. and 1 notch on S. edges, from which A cottonwood, 20 ins. diam., bears N. 30½° E., 166 lks. dist., marked T. 6 N., R. 35 E., S. 30 B. T. A cottonwood, 24 ins. diam., bears S. 39° E., 67 lks. dist., marked T. 6 N., R. 35 E., S. 31 B. T. A cottonwood, 14 ins. diam., bears S. 89½° W., 170 lks. dist., marked T. 6 N., R. 34 E., S. 36 B. T. A cottonwood, 16 ins. diam., bears N. 23° W., 40 lks. dist., marked T. 6 N., R. 34 E., S. 25 B. T.
	Thence I run N. 89° 35′ W. on a true line, bet. secs. 25 and 36, with same va.
39.77	Set a post 3 ft. long, 3 ins. square, with marked stone, 12 ins. in the ground for ¼ sec. cor., marked ¼ S. on N. face, dug pits 18 × 18 × 12 ins. E. and W. of post, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, around post.
79.54	The cor. to secs. 25, 26, 35 and 36.
	Land, level

Subdivisions, T. 6 N., R. 34 E.—Continued.

Chains.	
	Soil, alluvial—1st rate. Timber, cottonwood and willow, undergrowth same, 36.50 chs. *August* 6, 1880.
	As the line bet. secs. 26 and 35 is fractional, I run West, on a true line, bet. secs. 26 and 35. Va. 18° 20′ E.
3.50	Leave timber.
4.83	West bank of island on river. Set a sandstone, 12 × 12 × 5 ins., 8 ins. in the ground, for meander cor. to fractional secs. 26 and 35, marked M. C., from which a double cottonwood, 16 ins. diam., bears N. 78° E., 157 lks. dist., marked T. 6 N., R. 34 E., S. 26 M. C. B. T. A cottonwood, 18 ins. diam., bears S. 29½° W., 140 lks. dist., marked T. 6 N., R. 34 E., S. 35 M. C. B. T. NOTE.—The remainder of this line was run east from cor. to secs. 26, 27, 34, and 35.
	I now return to the cor. to secs. 25, 26, 35, and 36, whence I run North bet. secs. 25 and 26. Va. 18° 20′ E. Through timber and brush.
3.64	North bank of island on river. Set a post 4 ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for meander cor. to fractional secs. 25 and 26, marked M. C., and T. 6 N. on N., R. 34 E. S. 25 on E., and S. 26 on W., faces; from which A cottonwood, 8 ins. diam., bears S. 52½° E., 58 lks. dist., marked T. 6 N., R. 34 E., S. 25 M. C. B. T. A cottonwood, 10 ins. diam., bears S. 31° W., 103 lks. dist., marked T. 6 N., R. 34 E., S. 26 M. C. B. T.
	From this meander cor. on island I run north on bar 3.60 chs. to water's edge and send flag across to left bank of river, and set it on line bet. secs. 25 and 26. I then run a base line east on bar 3.00 chs. to a point whence flag bears N. 55½° W., which gives for distance across 2.08 chs. by calculation. The whole distance from cor. to secs. 25, 26, 35, and 36 will therefore be 3.64 + 3.60 + 2.08 chs., making
9.32	To flag on left bank. This point I establish by setting a sandstone, 22 × 10 × 5 ins., 16 ins. in the ground, for meander cor. to fractional secs. 25 and 26, marked M. C., and raised a mound of stone alongside. Thence I run north on line, over level bottom.
40.00	Set a sandstone, 16 × 14 × 4 ins. 11 ins. in the ground, for ¼ sec. cor. marked ¼ on W. face, dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth, 1½ ft. high, 3½ ft. base alongside.
60.30	Telegraph line, course S. 55° E.
78.20	Road to Miles City.
80.00	Set a sandstone, 36 × 8 × 5 ins., 25 ins. in the ground, for cor. to secs. 23, 24, 25, and 26, marked with 2 notches on S. and 1 notch on E. edges; dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, alongside. Land, level. Soil, alluvial bottom—1st rate. Timber, cottonwood on island, 3.64 chs.
	East, on a random line, bet. secs. 24 and 25. Va. 18° 30′ E.
22.80	Short creek, spring water, 3 lks. wide, course S. E. Spring bears N. 20° W., about 5.00 chs. dist.
37.60	Stage station (Fletcher's) bears S. 41½° E.
40.00	Set temporary ¼ sec. cor.
44.20	Fletcher's stage station bears S. 24° E.

Subdivisions, T. 6 N., R. 34 E.—Continued.

Chains.	
79.90	Intersect east boundary of township 68 lks. N. of cor. to secs. 19, 24, 25, and 30, which is a post, 4 ins. square, marked T. 6 N. S. 19 on N. E., R. 35 E. S. 30 on S. E., R. 34 E. S. 25 on S. W., and S. 24 on N. W. faces, with 4 notches on N. and 2 notches on S. edges, and pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and mound of earth 2 ft. high, 4½ ft. base, around post.
	Thence I run
	N. 89° 31′ W., on a true line, bet. secs. 24 and 25, with same va.
39.95	Set a sandstone, 22 × 10 × 3 ins., 16 ins. in the ground, for ¼ sec. cor., marked ¼ on N. face, and raised a mound of stone alongside.
79.90	The cor. to secs. 23, 24, 25, and 26.
	Land, level.
	Soil, alluvial bottom; 1st rate.
	No timber.

	North, bet. secs. 23 and 24.
	Va. 18° 30′ E.
	Over nearly level ground.
21.00	Enter alkali flat.
40.00	Set a post 3 ft. long, 3 ins. square, with marked stone, 12 ins. in the ground, for ¼ sec. cor., marked ¼ S. on W. face; dug pits 18 × 18 × 12 ins. N. and S. of post, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, around post.
73.71	Alkali creek, dry, course E.
75.00	Leave alkali flat.
80.00	Set a sandstone 16 × 10 × 4 ins., 11 ins. in the ground, for cor. to secs. 13, 14, 23, and 24, marked with 3 notches on S. and 1 notch on E. edges; dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, alongside.
	Land, gently rolling and level.
	Soil, partly alluvial and alkali; 1st and 3d rate.
	A few scattering cottonwoods on creek.

	East, on a random line, bet. secs. 13 and 24.
	Va. 18° 30′ E.
	Over sage brush plain.
38.50	Left bank of Alkali Creek, dry, course N. E., thence in creek.
40.00	Set temporary ¼ sec. cor.
42.00	Leave creek, course S. E., thence over level ground.
79.80	Intersect east boundary of township 60 lks. north of cor. to secs. 13, 18, 19, and 24, which is a sandstone 20 × 8 × 4 ins., 15 ins. in the ground, marked with 3 notches on N. and S. edges, and mound of stone alongside.
	Thence I run
	N. 89° 34′ W., on a true line, bet. secs. 13 and 24, with same va.
39.90	The corner point being in creek, at a point 30 lks. N. on N. bank of creek, I set a post 3 ft. long, 3 ins. square, with marked stone, 12 ins. in the ground, for witness cor. to ¼ sec. cor., marked W. C. ¼ S. on N. face, dug pits 18 × 18 × 12 ins. E. and W, of post, 5½ ft. dist., and raised a mound of earth, 1½ ft. high, 3½ ft. base, around post.
79.80	The cor. to secs. 13, 14, 23, and 24.
	Land, level.
	Soil, alkali, and sandy loam—2d rate.
	A few scattering cottonwoods on creek.

August 7, 1880.

	North, bet. secs. 13 and 14.
	Va. 18° 45′ E.
34.00	Leave bottom and ascend.
36.00	Top of bench about 50 ft. high, course N. E., thence over gently rolling ground.

Subdivisions, T. 6 N., R. 34 E.—Continued.

Chains.	
40.00	Deposited a marked stone, 12 ins. in the ground, for ¼ sec. cor., dug pits 18 × 18 × 12 ins. N. and S. cor., 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, over it. In N. pit drove stake 2 ft. long, 2 ins. square, 12 ins. in the ground, marked ¼ S. on W. face.
	Foot of bluff, about 150 ft. high, course E., and ascend.
68.00	Top of bluff, enter pine timber, and thence descend along rocky slope, sloping westerly to
72.70	
80.00	A point about 100 ft. below top of bluff. This point falling on a flat rock in place I mark a cross (×) at exact cor. point, for cor. to secs. 11, 12, 13, and 14, with 4 notches S. and 1 notch E., and raised a mound of stone alongside. Pits impracticable.
	From corner point
	A pine, 10 ins. diam., bears N. 15° E., 27 lks. dist., marked T. 6 N., R. 34 E., S. 12 B. T.
	A pine, 10 ins. diam., bears S. 42° E., 46 lks. dist., marked T. 6 N., R. 34 E., S. 13 B. T.
	A pine, 6 ins. diam., bears S. 5° W., 86 lks. dist., marked T. 6 N., R. 34 E., S. 14 B. T.
	A pine, 9 ins. diam., bears N. 15° W., 90 lks. dist., marked T. 6 N., R. 34 E., S. 11 B. T.
	Land, 34 chs. bottom, remainder broken.
	Soil, alluvial and rocky—1st and 4th rate.
	Timber, pine, 7.30 chains.

	East, on a random line, bet. secs. 12 and 13.
	Va. 18° 30′ E.
	Ascend.
5.00	Top of ridge, about 125 ft. high, course S. Leave timber, thence over rolling ground to
14.00	Commence descending.
23.00	Couleé, 100 ft. deep, course S. E., thence ascend.
28.00	E. side of couleé, thence over rolling ground.
40.00	Set temporary ¼ sec. cor.
41.70	Couleé, about 30 ft. deep, course S. W.
80.00	Intersect E. boundary of township, 70 lks. N. of cor., to secs. 7, 12, 13, and 18, which is a post, 4 ins. square, marked
	T. 6 N. S. 7 on N. E.,
	R. 35 E. S. 18 on S. E.,
	R. 34 E. S. 13 on S. W., and
	S. 12 on N. W. faces, with 2 notches on N. and 4 notches on S. edges, and mound of stone, 2 ft. high, 4½ ft. base, around post.
	Thence I run
	N. 89° 30′ W., on a true line, bet. secs. 12 and 13, with same va.
40.00	Set a post, 3 ft. long, 3 ins. square, with marked stone, 12 ins. in the ground, for ¼ sec. cor., marked ¼ S. on N. face, and raised a mound of stone alongside.
80.00	The cor. to secs. 11, 12, 13, and 14.
	Land, rolling and broken.
	Soil, stony—4th rate.
	Timber, pine—5 chs.

	North, bet. secs. 11 and 12.
	Va. 18° 30′ E.
	Ascend along west side of hill, through timber.
8.00	Top of table land, about 30 ft. above la stcor., and leave timber, thence over rolling ground.
40.00	Deposited a marked stone 12 ins. in the ground, for ¼ sec. cor., dug pits 18 × 18 × 12 ins. N. and S. of cor., 5½ ft. dist., and raised a mound of earth, 1½ ft. high, 3½ ft. base, over it. In N. pit drove stake 2 ft. long, 2 ins. square, 12 ins. in the ground, marked ¼ S. on W. face.
61.10	Stream, 6 lks. wide, course E.

Subdivisions, *T.* 6 *N.*, *R.* 34 *E.*—Continued.

Chains.	
80.00	Set a sandstone 20 × 6 × 4 ins., 15 ins. in the ground, for cor. to secs. 1, 2, 11, and 12, marked with 5 notches on S. and 1 notch on E. edges, dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth, 2 ft. high, 4½ ft. base, alongside.
	Land, rolling.
	Soil, sandy—3d rate.
	Timber, pine, 8 chs.

	East, on a random line, bet. secs. 1 and 12. Va. 18° 30′ E.
5.00	Commence descending.
9.00	Enter pine timber.
21.60	Couleé, about 100 ft. deep, course N. W.
30.00	Couleé, about 15 ft. deep, course N. E.
38.00	Couleé, about 18 ft. deep, course N. E.
40.00	Set temporary ¼ sec. cor.
49.00	Couleé, about 12 ft. deep, course N. E., ascend about 75 ft. to
65.00	Top of ridge, course N. E.
67.00	Descend
69.00	Foot of ridge, about 100 ft. below top, and leave timber.
80.10	Intersect E. boundary of township at 42 lks. N. of cor. to secs. 1, 6, 7, and 12, which is a sandstone 20 × 4 × 3 ins., 15 ins. in the ground, marked with 1 notch on N. and 5 notches on S. edges, and mound of stone alongside.
	Thence I run
	N. 89° 42′ W., on a true line, bet. secs. 1 and 12, with same va.
40.05	Set a sandstone 18 × 14 × 3 ins. 12 ins. in the ground, for ¼ sec. cor., marked ¼ on N. face; from which
	A pine, 8 ins. diam., bears S. 31° E., 95 lks. dist., marked ¼ S. B. T.
	A pine, 12 ins. diam., bears N. 25° W., 25 lks. dist., marked ¼ S. B. T.
80.10	The cor. to secs. 1, 2, 11, and 12.
	Land, rolling and broken.
	Soil, sandy and rocky—3d and 4th rate.
	Timber, pine, of excellent quality—60 chs.

	North, on a random line, bet. secs. 1 and 2. Va. 18° 30′ E.
	Over rolling ground.
40.00	In coulcé, about 20 ft. deep, course S. E.
	Set temporary ¼ sec. cor.
49.00	Couleé, about 15 ft. deep, course S. E.
60.00	Couleé, about 20 ft. deep, course S. E.
79.77	Intersect north boundary of township at 45 lks. west of cor. to secs. 1, 2, 35, and 36, which is a sandstone 20 × 8 × 4 ins., firmly set in the ground, with pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and mound of earth 2 ft. high, 4½ ft. base, alongside.
	Thence I run
	S. 0° 19′ W., on a true line, bet. secs. 1 & 2, with same va.
39.77	A pine, 7 ins. diam., which I marked ¼ S. on W. face, for ¼ sec. cor., dug pits, 18 × 18 × 12 ins., N. and S. of tree, 5½ ft. dist., and raised a mound of earth around tree.
79.77	The cor. to secs. 1, 2, 11, and 12.
	Land, rolling.
	Soil, sandy and alkali—3d rate.
	Timber, scattering pines in couleés.

August 10, 1880.

	From the cor. to secs. 2, 3, 34, and 35, on the south boundary of the township, which is a post, 4 ins. square, marked T. 6 N. S. 35 on N. E., R. 34 E. S. 2 on S. E.,

Subdivisions, T. 6 N., R. 34 E.—Continued.

Chains.	
	T. 5 N. S. 3 on S. W., and S. 34 on N. W., faces, with 2 notches on E. and 4 notches on W. edges, and mound of stone, 2 ft. high, 4½ ft. base, around post; I run
	North, bet. secs. 34 and 35. Va. 18° 30′ E.
	Over level bottom.
40.00	Set a sandstone, 24 × 14 × 3 ins., 18 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face, dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside.
80.00	Set a post 4 ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for cor. to secs. 26, 27, 34, and 35, marked T. 6 N. S. 26 on N. E., R. 34 E. S. 35 on S. E., S. 34 on S. W., and S. 27 on N. W. faces, with 1 notch on S. and 2 notches on E. edges, dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth, 2 ft. high, 4½ ft. base, alongside.
	Land, level.
	Soil, alluvial bottom—1st rate.
	No timber.

	As a portion of the line bet. secs. 26 and 35 has been run west from the cor. to secs. 25, 26, 35, and 36, I run
	East, on a true line, bet. secs. 26 and 35. Va. 18° 30′ E.
	Over level bottom.
40.00	Deposited a marked stone, 12 ins. in the ground, for ¼ sec. cor., dug pits 18 × 18 × 12 ins. E. and W. of cor., 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, over it. In E. pit drove a stake 2 ft. long, 2 ins. square, 12 ins. in the ground, marked ¼ S. on N. face.
69.30	Left bank of Yellowstone River. Set a sandstone 20 × 10 × 6 ins., 15 ins. in the ground, for meander cor. to fractional secs. 26 and 35, marked M. C., and raised a mound of stone alongside.
	In order to get the distance across the river I run north 20 lks. to a point west of meander cor on island on this line. I then run a base line south 3.00 chs. to a point whence meander cor. on island bears N. 65° E., which gives for distance, by calculation, 6.43 chs.
	The length of the line bet. secs. 26 and 35 is as follows:

East of arm of river, on island	4.83 chs.
Across river	6.43 "
West of river, on main land	60.30 "
Total	80.56 "

	Land, level.
	Soil, alluvial bottom—1st rate.
	Timber, cottonwood, 3.50 chs. on island.

	I now return to the cor. to secs. 26, 27, 34, and 35, and run
	North, bet. secs. 26 and 27. Va. 18° 30′ E.
	Over gently rolling ground.
26.30	Telegraph line; course N. E.
40.00	Set a post 3 ft. long, 3 ins. square, with marked stone, 12 ins. in the ground, for ¼ sec. cor., marked ¼ S. on W. face; dug pits 18 × 18 × 12 ins. N. and S. of post, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, around post.
48.70	Spring branch 1 lk. wide, course S. 80° E.
	From this point a spring of pure, cold water, about 2 ft. diam., bears N. 70° W., 2.36 chs. dist.
57.40	Road to Miles City, course N. E.

Subdivisions, T. 6 N., R. 34 E.—Continued.

Chains.	
80.00	Set a post 4 ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for cor. to secs. 22, 23, 26, and 27, marked— T. 6 N. S. 23 on N. E., R. 34 E. S. 26 on S. E., S. 27 on S. W., and S. 22 on N. W. faces, with 2 notches on S. and E. edges; dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, around post.
	Land, gently rolling.
	Soil, sandy—2d rate.
	No timber.
	East, on a random line, bet. secs. 23 and 26. Va. 18° 30′ E.
	Over gently rolling ground.
27.00	Road to Miles City, course N. E.
40.00	Set temporary ¼ sec. cor.
78.40	Road to Miles City, course S. 50° E.
80.00	Intersect N. and S. line 37 lks. S. of cor. to secs. 23, 24, 25, and 26. Thence I run
	S. 89° 44′ W., on a true line bet. secs. 23 and 26, with same va.
40.00	Set a sandstone 14 × 10 × 6 ins., 9 ins. in the ground, for ¼ sec. cor., marked ¼ on N. side, dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside.
80.00	The cor. to secs. 22, 23, 26, and 27.
	Land, gently rolling.
	Soil, sandy—2d rate.
	No timber.
	North, bet. secs. 22 and 23. Va. 18° 45′ E.
	Over rolling ground.
40.00	Deposited a marked stone 12 ins. in the ground, for ¼ sec. cor., dug pits 18 × 18 × 12 ins. N. and S. of cor., 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, over it. In N. pit drove stake 2 ft. long, 2 ins. square, 12 ins. in the ground, marked ¼ S. on W. face. Thence ascend to
56.00	Top of table land, about 40 ft. above ¼ sec. cor.
64.30	Old Military Road, course S. E.
80.00	Set a sandstone 20 × 14 × 3 ins., 15 ins. in the ground, for cor to secs. 14, 15, 22, and 23, marked with 3 notches on S. and 2 notches on E. edges, dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, alongside.
	Land, rolling and table.
	Soil, sandy—2d rate.
	No timber.
	East, on a random line, bet. secs. 14 and 23. Va. 18° 35′ E.
	Over nearly level table land.
9.20	Old military road, course S.
40.00	Set temporary ¼ sec. cor.
61.00	Descend from table land to
70.50	Alkali creek, dry, course S. E., about 30 ft. below top of table land.
79.84	Intersect N. and S. line 14 lks. S. of cor. to secs. 13, 14, 23, and 24. Thence I run
	S. 89° 54′ W., on a true line, bet. secs. 14 and 23, with same va.
39.92	Set a sandstone, 18 × 12 × 4 ins., 12 ins. in the ground, for ¼ sec. cor., marked ¼ on N. face, and raised a mound of stone alongside.
79.84	The cor. to secs. 14, 15, 22, and 23.
	Land, table.
	Soil, sandy—2d and 3d rate.
	No timber.

August 9, 1880.

Subdivisions T. 6 N., R. 34 E.—Continued.

Chains.	
	North, bet. secs. 14 and 15. Va. 18° 35′ E.
11.00	Enter pine timber and ascend to
22.00	Top of small hill, about 30 ft. high, and nearly conical in shape. Descend to
31.00	Foot of hill, and leave timber.
34.00	Old military road, four wagon tracks, course N. W.
40.00	Set a sandstone, 15 × 15 × 3 ins., 10 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face, dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside.
41.80	Commence ascending.
43.90	Top of table land, about 50 ft. above last ¼ sec. cor. Thence over nearly level land to
80.00	Set a post, 4 ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for cor. to secs. 10, 11, 14, & 15, marked— T. 6 N. S. 11 on N. E., R. 34 E. S. 14 on S. E. S. 15 on S. W., and S. 10 on N. W. faces, with 4 notches on S. and 2 notches on E. edges, dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth, 2 ft. high, 4½ ft. base, around post. Land, rolling and table. Soil, sandy and gravelly—3d rate. Timber, pine—20.00 chs.

	East, on a random line, bet. secs. 11 and 14. Va. 18° 30′ E.
	Gradually ascending.
40.00	Set temporary ¼ sec. cor.
66.00	Point about 60 ft. above last sec. cor., foot of nearly perpendicular bluff, course N. and S., and enter scattering pine timber.
68.20	Top of bluff, about 75 ft. high.
80.06	Intersect N. & S. line, 50 lks. N. of cor. to secs. 11, 12, 13, and 14. Thence I run
	N. 89° 39′ W., on a true line, bet. secs. 11 and 14, with same va.
40.03	Deposited a marked stone, 12 ins. in the ground, for ¼ sec. cor., dug pits 18 × 18 × 12 ins. E. and W. of cor., 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, over it. In E. pit drove stake 2 ft. long, 2 ins. square, 12 ins. in the ground, marked ¼ S. on N. face.
80.06	The cor. to secs. 10, 11, 14, and 15.
	Land, table and broken.
	Soil, gravelly—3d rate.
	Timber, scattering pine.

	North, bet. secs. 10 and 11. Va. 18° 30′ E.
	Over table land.
26.00	Foot of spur of high mountain, ascend abruptly over broken ground.
34.00	Head of ravine, course S. 70° E.
40.00	Set a sandstone 20 × 8 × 4 ins., 15 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face, and raised a mound of stone alongside.
42.00	Foot of sharp ridge, course E. and W.
43.25	Top of ridge, about 40 ft. high, and about 500 ft. above last sec. cor. Descend abruptly.
44.00	Foot, about 30 ft. below top, and ascend over broken ground.
51.10	Enter heavy pine timber.
80.00	A point about 900 ft. above last sec. cor. Set a sandstone 24 × 6 × 4 ins., 18 ins. in the ground, for cor. to secs. 2, 3, 10, and 11, marked with 5 notches on S. and 2 notches on E. edges, from which A pine, 15 ins. diam., bears N. 67° E. 30 lks. dist., marked T. 6 N., R. 34 E., S. 2 B T. A pine, 27 ins. diam., bears S. 23° E. 67 lks. dist., marked T. 6 N., R. 34 E., S. 11 B. T. A pine, 12 ins. diam., bears S. 47° W. 110 lks. dist., marked T. 6 N., R. 34 E., S. 10 B. T.

Subdivisions, T. 6 N., R. 34 E.—Continued.

Chains.	
	A pine, 16 ins. diam., bears N. 50° W., 82 lks. dist., marked T. 6 N., R. 34 E., S. 3 B. T.
	Land, mountainous and broken.
	Soil, rocky—4th rate.
	Timber, pine—28.90 chs.
	54.00 chs. of line runs over mountainous land.
	East, on a random line, bet. secs. 2 and 11. Va. 18° 30′ E.
	Over rough, broken ground, through timber.
12.00	Descend into deep ravine, course S. 20° E.
18.30	Bottom of ravine, about 100 ft. deep, and ascend.
21.10	Across ravine.
24.35	Descend abruptly.
40.00	Set temporary ¼ sec. cor.
61.10	Stream 4 lks. wide, course S. E., and leave timber.
72.08	Foot of spur, thence over rolling ground.
80.00	Intersected N. and S. line at 48 lks. S. of cor. to secs. 1, 2, 11 and 12. Thence I run
	S. 89° 39′ W., on a true line, bet. secs. 2 and 11, with same va.
40.00	Set a sandstone, 16 × 4 × 4 ins., 11 ins. in the ground, for ¼ sec. cor., marked ¼ on N. face, from which
	A pine, 18 ins. diam., bears N. 17° E′., 48 lks. dist., marked ¼ S. B. T.
	A pine, 14 ins. diam., bears N. 40 W., 63 lks. dist., marked ¼ S. B. T.
80.00	The cor. to secs. 2, 3, 10, and 11.
	Land, mountainous and broken.
	Soil, rocky—4th rate.
	Timber, pine—61.10 chs.
	72.08 chs. of line runs over mountainous land.
	North, on a random line, bet. secs. 2 and 3. Va. 18° 30′ E.
	Ascend abruptly, through heavy pine timber.
40.00	Set temporary ¼ sec. cor.
75.30	Top of spur, about 850 ft. above last sec. cor. Leave timber and enter open ground.
80.10	Intersect N. boundary of township 50 lks. W. of cor. to secs. 2, 3, 34, and 35, which
	A post, 4 ins. square, marked
	T. 7 N. S. 35 on N. E.,
	R. 34 E. S. 2 on S. E.,
	T. 6 N. S. 3 on S. W., and
	S. 34 on N. W. faces, with 6 notches on E. and 4 notches on W. edges, and mound of stone around post.
	Thence I run
	S. 0° 21′ W., on a true line, bet. secs. 2 and 3, with same va.
40.10	A pine, 16 ins. diam., which I mark ¼ S. on W. face, for ¼ sec. cor., from which
	A pine, 14 ins. diam., bears S. 40° E., 78 lks. dist., marked ¼ S. B. T.
	A pine, 20 ins. diam., bears N. 70° W., 24 lks. dist., marked ¼ S. B. T.
80.10	The cor. to secs. 2, 3, 10, and 11.
	Land, mountainous and broken.
	Soil, rocky—4th rate.
	Timber, pine—75.30 chs.
	Whole line runs over mountainous land.
	August 11, 1880.
	From the cor. to secs. 3, 4, 33, and 34 on the S. boundary of the township, which is a sandstone, 23 × 4 × 3 ins., with 3 notches on E. and W. edges, and mound of stone alongside,
	I run
	North, bet. secs. 33 and 34. Va. 18° 30′ E.
	Over bottom land.

Subdivisions, T. 6 N., R. 34 E.—Continued.

Chains.	
40.00	Set a post 3 ft. long, 3 ins. square, with marked stone, 12 ins. in the ground, for ¼ sec. cor., marked ¼ S. on W. face; dug pits 18×18×12 ins. N. and S. of post, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, around post.
45.10	Stream, 8 lks. wide, course E., joins another stream about 20 chs. E. of line.
76.20	Stream, 8 lks. wide, course S. E., joins first stream.
80.00	Set a post 4 ft. long, 4 ins. square, with marked stone, 12 ins. in the ground, for cor. to secs. 27, 28, 33, and 34, marked T 6 N. S. 27 on N. E., R. 34 E. S. 34 on S. E., S. 33 on S. W., and S. 28 on N. W. faces, with 1 notch on S. and 3 notches on E. edges; dug pits 18×18×12 ins. in each sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, around post.
	Land level.
	Soil, rich black loam—1st rate.
	No timber.

East, on a random line, bet. secs. 27 and 34.
Va. 18° 30′ E.

	Over bottom land.
40.00	Set temporary ¼ sec. cor.
79.87	Intersect N. and S. line, 27 lks. S. of cor. to secs. 26, 27, 34, and 35.
	Thence I run
	S. 89° 48′ W., on a true line, bet. secs. 27 and 34, with same va.
39.94	Deposited a marked stone 12 ins. in the ground for ¼ sec. cor., dug pits 18×18×12 ins. E. and W. of cor., and raised mound of earth 1½ ft. high, 3½ ft. base, over it. In E. pit drove stake 2 ft. long, 2 ins. square, 12 ins. in the ground, marked ¼ S. on N. face.
79.87	The cor. to secs. 27, 28, 33, and 34.
	Land level.
	Soil, rich black loam—1st rate.
	No timber.

North, bet. secs. 27 and 28.
Va. 18° 30′ E.

	Over bottom land.
1.00	Creek, 7 lks. wide, course S. W.
3.80	Same creek, course S. E.
20.00	Telegraph line, course E.
27.10	Road to Miles City, course N. E.
40.00	Set a sandstone 17×6×3 ins. 11 ins. in the ground, for ¼ sec. cor., marked ¼ on W. side, dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside.
80.00	Set a sandstone 22×6×4 ins., 15 ins. in the ground, for cor. to secs. 21, 22, 27 and 28, marked with 2 notches on S. and 3 notches on E. edges; dug pits 18 × 18 × 12 in each sec., 5½ feet dist., and raised a mound of earth 2 ft. high, 4½ ft. base, alongside.
	Land, level.
	Soil, rich black loam—1st rate.
	No timber.

East, on a random line, bet. secs. 22 and 27.
Va. 18° 30′ E.

	Over level land.
40.00	Set temporary ¼ sec. cor.
58.00	Small coulée, about 2 ft. deep, course S. E., thence over gently rolling land.
79.80	Intersect N. and S. line, 23 lks. N. of cor. to secs. 22, 23, 26 and 27.
	Thence I run
	N. 89° 50′ W., on a true line, bet. secs. 22 and 27, with same va.

Subdivisions, T. 6 N., R. 34 E.—Continued.

Chains.	
39.90	Set a sandstone 16 × 5 × 4 ins. 11 ins. in the ground, for ¼ sec. cor., marked ¼ on N. side, dug pits 18×18×12 ins. E. and W. of stone, 5½ ft. dist., and raised mound of earth 1½ ft. high, 3½ ft. base, alongside.
79.80	The cor. to secs. 21, 22, 27 and 28.
	Land, level and rolling.
	Soil, black loam and sandy, 1st and 2d rate.
	No timber. *August* 9, 1880.

North, bet. secs. 21 and 22.
Va. 18° 30′ E.

	Over gently rolling ground, descending.
15.00	Enter swamp.
40.00	Set a sandstone 20×14×3 ins., 15 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face, dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside.
62.00	Leave swamp, thence over gently rolling ground.
76.20	Old military road, course N. W.
80.00	Deposited a marked stone, 12 ins. in the ground, for cor. to secs. 15, 16, 21, and 22, dug pits 18 × 18 × 12 ins. in each sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, over it. In S. E. pit drove stake 2 ft. long, 2 ins. square, 12 ins. in the ground, marked T. 6 N. S. 15 on N. E., R. 34 E. S. 22 on S. E., S. 21 on S. W., and S. 16 on N. W. faces, with 3 notches on S. and E. edges.
	Land, gently rolling, and swamp.
	Soil, sandy and wet loam—2d rate.
	No timber.
	NOTE.—Swamp can be drained into Yellowstone River.

East, on a random line, bet. secs. 15 and 22.
Va. 18° 30′ E.

	Over gently rolling ground.
40.00	Set temporary ¼ sec. cor.
66.25	Commence ascending to table land.
68.40	Top, about 40 feet high, thence over table land to
79.66	Intersect N. and S. line, 25 lks. N. of cor. to secs. 14, 15, 22, and 23. Thence I run
	N. 89° 49′ W., on a true line, bet. secs. 15 and 22, with same va.
39.83	Set a sandstone 16×14×5 ins., 11 ins. in the ground, for ¼ sec. cor., marked ¼ on N. face, and raised a mound of stone alongside.
79.66	The cor. to secs. 15, 16, 21, and 22.
	Land, rolling and table.
	Soil, sandy—2d rate.
	No timber. *August* 10, 1880.

North, bet. secs. 15 and 16.
Va. 18° 30′ E.

	Over gently rolling ground.
40.00	Set a sandstone 16 × 12 × 3 ins. 11 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face, dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth 1½ ft. high, 3½ ft. base, alongside. Wells' house bears N. W. 6.00 chs. dist.
50.00	Easterly end of pond bears W. about 10 chs. dist.
80.00	Set a sandstone 20 × 6 × 4 ins. 15 ins. in the ground, for cor. to secs. 9, 10, 15, and 16, marked with 4 notches on S. and 3 notches on E. edges, dug pits 18 × 18×12 ins. in each sec., 5½ ft. dist., and raised a mound of earth 2 ft. high, 4½ ft. base, alongside.
	Land, rolling.
	Soil, sandy—2d rate.
	No timber.

Subdivisions, T. 6 N., R 34 E.—Continued.

Chains.	
	East, on a random line, bet. secs. 10 and 15. Va. 18° 30′ E.

	Over rolling ground.
40.00	Set temporary ¼ sec. cor.
79.96	Intersect N. boundary of township 44 lks. W. of cor. to secs. 4, 5, 32, and 33, which is a post, 4 ins. square, marked T. 7 N. S. 33 on N. E., R. 34 E. S. 4 on S. E., T. 6 N. S. 5 on S. W., and S. 32 on N. W. faces, with 4 notches on E. and 2 notches on W. edges, and mound of stone, 2 ft. high, 4½ base, around post.
	Thence I run
	S. 0° 19′ W., on a true line, bet. secs. 4 and 5, with same va.

Subdivisions, T. 6 N., R. 34 E.—Continued.

Chains.	
39.96	Set a sandstone, 18 × 10 × 6 ins., 12 ins. in the ground, for ¼ sec. cor., marked ¼ on W. face, and raised a mound of stone, 1½ ft. high, 3½ ft. base, alongside.
79.96	The cor. to secs. 4, 5, 8, and 9.
	Land, rolling.
	Soil, sandy and light—2d and 3d rate.
	No timber. *August* 16, 1880.

From the cor. to secs. 5, 6, 31, and 32, on the south boundary of the township, which is a sandstone 20 × 8 × 4 ins. with mound of stone, 2 ft. high, 4½ ft. base alongside,
I run
North, bet. secs. 31 and 32.
Va. 18° 45′ E.
Over table land.

40.00	Set a sandstone, 16 × 12 × 6 ins. 11 ins. in the ground, for ¼ sec. cor., marked ¼ on W. side, dug pits 18 × 18 × 12 ins. N. and S. of stone, 5½ ft. dist., and raised a mound of earth, 1½ ft. high, 3½ ft. base, alongside.
	From this cor. a cor. of James Parker's desert land claim, a post, 8 ins. square, with mound of stone around post, marked J. P. D. L. C. 2, bears S. 20° E., 1.45 chs. dist. The land included in this claim was unsurveyed at date of location.
80.00	Set a sandstone 20 × 14 × 6 ins., 15 ins. in the ground, for cor. to secs. 29, 30, 31, and 32, marked with 1 notch on S. and 5 notches on E. edges, dug pits 18 × 18 × 12 ins. in each sec. 5½ ft. dist., and raised a mound of earth, 2 ft. high, 4½ ft. base, alongside.
	Land, level table.
	Soil, sandy—2d and 3d rate.
	No timber.

East on a random line, bet. secs. 29 and 32.
Va. 18° 45′ E.
Over table land.

40.00	Set temporary ¼ sec. cor. From this point a post 8 ins. square, with mound of stone around post, marked J. P. D. L. C. 4 for cor. to James Parker's desert land claim, bears S. 17° E. 64 lks. dist.
51.10	From this point a spring about 2 ft. diam. bears S. about 3 chs. dist. From spring a stream flows S. E.
65.40	Edge of table land, and descend about 70 ft. to
79.60	Intersect N. and S. line 19 lks. S. of cor. to secs. 28, 29, 32, and 33. Thence I run
	S. 89° 52′ W. on a true line, bet. secs. 29 and 32, with same va.
30.80	Set a sandstone, 17 × 8 × 6 ins., 11 ins. in the ground, for ¼ sec. cor., marked ¼ on N. face, dug pits 18 × 18 × 12 ins. E. and W. of cor., 5½ ft. dist., and raised a mound of earth 1½ ft. high, 4½ ft. base, alongside.
79.60	The cor. to secs. 29, 30, 31, and 32.
	Land, table and bottom.
	Soil, sandy and black loam—1st and 2d rate.
	No timber.

West on a random line bet. secs. 30 and 31.
Va. 18° 45′ E.
Over table land.

40.00	Set temporary ¼ sec. cor. From this point a post 8 ins. square, with mound of stone around post, marked J. P. D. L. C. 8, for cor. to James Parker's desert land claim, bears N. 80° E., 92 lks. dist.
79.18	Intersect west boundary of township 10 lks. N. of cor. to secs. 25, 30, 31, and 36, which is a post, 4 ft. long, 4 ins. square, marked T. 6 N. S. 30 on N. E., R. 34 E. S. 31 on S. E., R. 33 E. S. 36 on S. W., and S. 25 on N. W. faces, with mound of stone, 2 ft. high, 4½ ft. base, around post.

Subdivisions, T. 6 N., R. 34 E.—Continued.

Chains.	
	Thence I run
	N. 89° 56′ E. on a true line, bet. secs. 30 and 31, with same va.
39.18	Set a sandstone 20 × 12 × 8 ins., 15. ins. in the ground, for ¼ sec. cor., marked ¼ on N. face, dug pits 18 × 18 × 12 ins., E. and W. of stone, 5½ ft. dist., and raised a mound of earth, 1½ ft. high, 3½ ft. base, alongside.
79.18	The cor. to secs. 29, 30, 31, and 32.
	Land table.
	Soil, sandy—2d and 3d grade.
	No timber.
	North bet. secs. 29 and 30.

S. 77½° W.	3.50 "	Bank 6 ft. high.
N. 80½° W.	5.00 "	Leave Curran's field, fence course S.
N. 71° W.	2.40 "	

N. 25¼° W. 2.40 chs.
N. 71½° W. 3.50 " Low bank, 3 ft. high.
N. 76¾° W. 1.40 " To meander cor. to fractional secs. 35 and 36.
Land, 18 chs. W. part bluff, remainder level bottom.
Soil, black loam and sandy—1st and 2d rate.
No timber.

Thence in sec. 35.
Va. 18° 30′ E.
In dense brush and scattering timber,
S. 86¾° W. 2.30 chs.
S. 75¾° W. 3.30 "
S. 65° W. 2.30 " Upper end of bar.
S. 35½° W. 11.00 " At 6.00 chs. leave brush. At 7.50 chs. Curran's house bears S. 1.50 chs. At end of course, enter Alexander's field, fence course S.
S. 38½° W. 5.60 chs.
S. 46½° W. 9.00 "
S. 54½° W. 5.00 " At 3.00 chs. enter brush. At 4.00 chs. leave field.
S. 44½° W. 2.00 "
S. 65° W. 2.60 " At 50 lks. mouth of slough, 2.00 chs. wide.
S. 55½° W. 8.70 "
S. 55½° W. 2.80 "
S. 48¾° W. 5.80 " Leave scattering timber.
S. 56½° W. 8.70 " Banks, 4 ft. high.
S. 40¼° W. 16.12 " (At 12.00 chs. leave brush. Head of slough 1.00 ch. wide) to meander cor. to fractional secs. 2 and 35 on S. boundary of township, which is a sandstone 20 × 10 × 8 ins. marked M. C. with mound of stone 2 ft. high, 4½ ft. base, alongside.
Land, level bottom.
Soil, black loam—1st rate.
Timber and dense brush, cottonwood and willow, together 56.50 chs.
August 6, 1880.

MEANDERS OF ISLAND CONTAINED IN SECS. 25, 26, 35, AND 36.

This island is partly in this township and partly in T. 6, N., R. 35 E.
I go to the point for meander cor. to fractional secs. 21 and 36 on the south side of island, and finding cor. has been washed away, I re-establish it as follows: I go to a cottonwood tree on line, which is described in field notes of the survey of the east boundary of this township as being 26.23 chs. S. of cor. to secs. 30, 31, 35 and 36, and run S. 3.02 chs. to south bank of island, making altogether 29.25 chs. instead of 29.70 chs. as stated in said notes. At this point
Set a post, 4 ft. long, 4 ins. square, 12 ins. in the ground, for meander cor. to fractional secs. 31 and 36, marked—
T. 6 N. on N.
R. 35 E. S. 31 on E.
M. C. on S., and
R. 34 E. S. 36 on W. faces, dug pit 3 ft. sq., 1 ft. deep, 8 lks. N. of post, and raised mound of earth, 2 ft. high, 4½ ft. base, around post.
Thence I run with meanders in sec. 36,
Va. 18° 45′ E.
Through dense brush, up stream, banks 10 ft. high.
S. 70½° W. 2.40 chs. Lower end of bar bears S.
S. 86° W. 3.00 " Leave brush.
N. 81° W. 8.50 "
N. 68½° W. 7.00 " At 1.00 ch. enter timber and brush.
N. 73½° W. 7.30 " At 7.00 chs. leave timber and brush.
N. 84° W. 3.40 " At 1.50 chs. center of head of slough, 3.00 chs. wide. At end of course, head of bar bears S. Enter brush.
N. 61½° W. 1.50 chs.
N. 60¼° W. 3.50 "
N. 53¼° W. 2.50 "

Meanders, T. 6 N., R. 34 E.—Continued.

N. 61¼° W. 2.60 "
N. 57½° W. 4.90 chs. Enter timber, leave brush.
N. 62½° W. 8.20 "
N. 71½° W. 4.80 "
N. 77½° W. 5.80 "
N. 88¾° W. 5.40 " Leave timber.
S. 80° W. 9.60 " At 1.25 chs., mouth of slough, 2 chs. wide. At 2.50 chs. enter dense brush, and leave brush at end of course.
N. 88¾° W. 3.75 chs. (At 2.00 chs., center of head of slough, 2.50 chs. wide) to meander cor. to fractional secs. 35 and 36 on S. W. end of island.
Land, level.
Soil, alluvial—1st rate.
Timber and brush, cottonwood and willow, 71.70 chs.

Thence in sec. 35.
Va. 18° 20′ E.

7 miles 36 chs. and 82 lks. of the subdivision lines run over mountainous land, or through timber; and 3 miles 59 chs. and 69 lks. of the meander lines run through timber or dense brush.

GENERAL DESCRIPTION.

This township contains nearly every variety of land from plains to mountains, and the soil ranges from alkali to rich loam. The soil of the bottom land along the Yellowstone River and on the island is generally rich, black loam, capable of producing abundant crops without irrigation. The soil of the remaining portion of the township, except the alkali flat in secs. 23 and 24, and the mountainous land, can nearly all be classed as second rate, is covered with an abundant growth of rich and nutritious grasses, and will produce crops without irrigation. In the southwestern portion of the township only the grass is more scanty, and irrigation may be necessary.

Cottonwood timber is found along the Yellowstone River, on the island, and some scattering along the creeks. The mountain is covered with a dense growth of pine and fir timber, many of the trees being very large.

There is one limestone quarry in secs. 8 and 9 which affords excellent building stones, and, from surface indications, it is probable that large bodies of limestone and sandstone underlie other portions of the township. Iron ore was found in sec. 3.

The township is well watered by the Yellowstone River, which runs through the

southeastern portion, and many small springs and brooks. The eastern end, comprising only a small portion of Lin's Lake, is included in this township. This lake is about 10 miles long, and its greatest width about 4 miles. The water is clear and pure, and varies in depth from 10 to 200 feet.

The town of Williamsburg is the county seat of Custer County, contains a courthouse, two churches, two hotels, several stores, and about 50 dwelling houses. Its estimated population is 300.

There are two settlers in sec. 35, and one each in secs. 16, 17, 19, and 25.

James Parker has fenced a portion of his desert land claim, in sec. 36, and is boring an artesian well to bring water upon it.

WALTER W. DE LACY,
U. S. Deputy Surveyor.

FINAL OATHS FOR SURVEYS.

LIST OF NAMES.

A list of the names of the individuals employed by Walter W. de Lacy, U. S. deputy surveyor, to assist in running, measuring, and marking the lines and corners described in the foregoing field notes of the survey of the subdivision and meander lines of township No. 6 north, of range No. 34 east of the principal base and meridian, in the Territory of Montana, showing the respective capacities in which they acted:

——— ——— ..... Compassman.
WILLIAM MORAN ..... Chainman.
PETER COOPER ..... Chainman.
——— ——— ..... Chainman.
——— ——— ..... Chainman.
ARTHUR F. FOWLER ..... Axeman.
FRANKLIN J. SAGE ..... Axeman.
JOHN PARKER ..... Flagman.

FINAL OATHS OF ASSISTANTS.

We hereby certify that we assisted Walter W. de Lacy, U. S. deputy surveyor, in surveying all those parts or portions of the subdivision and meander lines of township No. 6 north, of range 34 east of the principal base and meridian, Territory of Montana, as are represented in the foregoing field notes as having been surveyed by him and under his direction; and that said survey has been in all respects, to the best of our knowledge and belief, well and faithfully surveyed, and the corner monuments established, according to the instructions furnished by the U. S. surveyor-general for Montana.

———, *Compassman.*
WILLIAM MORAN, *Chainman.*
PETER COOPER, *Chainman.*
———, *Chainman.*
———, *Chainman.*
ARTHUR F. FOWLER, *Axeman.*
FRANKLIN J. SAGE, *Axeman.*
JOHN PARKER, *Flagman.*

Subscribed and sworn to before me this twenty-third day of August, 1880.
[SEAL.] JOHN JENKINS,
Notary Public.

FINAL OATH OF U. S. DEPUTY SURVEYOR.

I, Walter W. de Lacy, U. S. deputy surveyor, do solemnly swear that in pursuance of instructions received from Roswell H. Mason, U. S. surveyor-general for Montana, bearing date of the third day of July, 1880, I have well, faithfully, and truly, in my own proper person, and in strict conformity with the instructions furnished by the U. S. surveyor-general for Montana, the surveying manual, and the laws of the United States, surveyed all those parts or portions of the subdivision and meander lines of township No. 6 north, of range No. 34 east of the principal base and meridian, in the Territory of Montana, as are represented in the foregoing field notes as having been surveyed by me and under my direction; and I do further solemnly swear that all the corners of said survey have been established and perpetuated in strict accordance with the surveying manual, printed instructions, the special written instructions of the U. S. surveyor-general for Montana, and in the specific manner described in the field notes,

RESTORATION OF LOST AND OBLITERATED CORNERS.

MARCH 13, 1883.—IN EFFECT JUNE 30, 1883.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., March 13, 1883.

The increasing number of letters from county and local surveyors received at this office, making inquiry as to the proper method of restoring to their original position lost or obliterated corners marking the survey of the public lands of the United States, or such as have been willfully or accidentally moved from their original position, have rendered the preparation of the following general rules necessary, particularly as in a very large number of cases the immediate facts necessary to a thorough and intelligent understanding are omitted. Moreover, surveys having been made under the authority of different acts of Congress, different results have been obtained, and no special law has been enacted by that authority covering and regulating the subject of the above-named inquiries. Hence the general rules here given must be considered merely as an expression of the opinion of this office on the subject, based, however, upon the spirit of the several acts of Congress authorizing the surveys, as construed by this office. When cases arise which are not covered by these rules, and the advice of this office is desired, the letter of inquiry should always contain a description of the particular corner with reference to the township, range, and section of the public surveys, to enable this office to consult the record.

To restore extinct boundaries of the public lands correctly, the surveyors must have some knowledge of the manner in which townships were subdivided by the several methods authorized by Congress. Without this knowledge he may be greatly embarrassed in the field, and is liable to make mistakes invalidating his work, and leading eventually to serious litigation. It is believed that the following synopsis of the several acts of Congress regulating the surveys of the public lands will be of service to county surveyors and others, and will help to explain many of the difficulties encountered by them in the settlement of such questions.

The differences resulting from Congressional legislation at different periods resulted in *two* sets of corners being established *on township lines* at one time; at another time *three* sets of corners were established on *range lines*, while the system now in operation makes but *one* set of corners on *township boundaries*, except on standard lines, *i. e.*, base and correction lines, and in some exceptional cases.

The following brief explanation of the modes which have been practiced will be of service to all who may be called upon to restore obliterated boundaries of the public land surveys:

Where two sets of corners were established on township boundaries, one set was planted at the time the exteriors were run, those on the north boundary belonging to the sections and quarter sections north of said line, and those on the west boundary belonging to the sections and quarter sections west of that line. The other set of corners was established when the township was subdivided. This method, as stated, resulted in the establishment of two sets of corners on all four sides of the townships.

Where three sets of corners were established on the range lines, the subdivisional surveys were made in the above manner, except that the east and west section lines, instead of being closed upon the corners previously established on the east boundary

of the township, were run due east from the last interior section corner, and new corners were erected at the points of intersection with the range line.

The method now in practice requires section lines to be initiated from the corners on the south boundary of the township, and to close on existing corners on the east, north, and west boundaries of the township, except when the north boundary is a base line or standard parallel.

SYNOPSIS OF ACTS OF CONGRESS.

Ordinance of the Congress of the Confederation, of May 20, 1785. U. S. Land Laws, p. 349. Edition 1828.

The first enactment in regard to the surveying of the public lands was an ordinance passed by the Congress of the Confederation, May 20, 1785, prescribing the mode for the survey of the "Western Territory," and which provided that said territory should be divided into "townships of six miles square, by lines running due north and south, and others crossing them at right angles" as near as might be.

It further provided that the first line running north and south should begin on the Ohio River, at a point due north from the western terminus of a line run as the south boundary of the State of Pennsylvania, and the first line running east and west should begin at the same point, and extend through the whole territory. In these initial surveys only the exterior lines of the townships were surveyed, but the plats were marked by subdivisions into section of one mile square, numbered from 1 to 36, commencing with No. 1 in the southeast corner of the township, and running from south to north in each tier to No. 36 in the northwest corner of the township; mile corners were established on the township lines. The region embraced by the surveys under this law forms a part of the present State of Ohio, and is generally known as "the Seven Ranges."

Act of May 18, 1796. U. S. Statutes at Large, vol. 1. p. 465. Section 2395., U. S. Revised Statutes.

The Federal Congress passed a law, approved May 18, 1796, in regard to surveying the public domain, and applied to "the territory northwest of the Ohio River, and above the mouth of the KentuckyRiver."

Section 2, of said act, provided for dividing such lands as had not been already surveyed or disposed of, "by north and south lines run according to the true meridian, and by others crossing them at right angles, so as to form townships of 6 miles square," &c. It is also provided that "one-half of said townships, taking them alternately, should be subdivided into sections containing, as nearly as may be, 640 acres each, by running parallel lines through the same each way at the end of every two miles, and marking a corner on each of said lines at the end of every mile." The act also provided that "the sections shall be numbered, respectively, beginning with the number one in the northeast section, and proceeding west and east alternately through the township, with progressive numbers till the thirty-sixth be completed." This method of numbering sections is still in use.

Act of May 10, 1800. U. S. Statutes at Large, vol. 2, p. 73. Section 2395, U. S. Revised Statutes.

An act amendatory of the foregoing, approved May 10, 1800, required the "townships west of the Muskingum, which are directed to be sold in quarter townships, be subdivided into half sections of 320 acres each, as nearly as may be, by running parallel lines through the same from east to west, and from north to south, at the distance of one mile from each other, and making corners, at the distance of each half mile on the lines running east and west, and at the distance of each mile on those running from south to north. And the interior lines of townships intersected by the Muskingum, and of all townships lying east of that river, which have not been heretofore actually subdivided into sections, shall also be run and marked. And in all cases where the exterior lines of the townships thus to be subdivided into sections or half sections shall exceed, or shall not extend six miles, the excess or deficiency shall be specially noted, and added to or deducted from the western or northern ranges of sections or half sections in such township, according as the error may be in running the lines from east to west or from south to north." Said act also provided that the northern and western tier of sections should be sold as containing only the quantity expressed on the plats, and all others as containing the complete legal quantity.

Act of June 1, 1796. U. S. Statutes at Large, vol. 1, p. 490.

The act approved June 1, 1767, "regulating the grants of land appropriated for military services,"&c., provided for dividing the "Virginia Military Tract," in the State of Ohio, into townships 5 miles square, each to be subdivided into quarter townships containing 4,000 acres.

Act of March 1, 1800 U .S. Statutes at Large, vol. 2, p. 14.

Section 6 of the act approved March 1, 1800, amendatory of the foregoing act, enacted that the Secretary of the Treasury was authorized to subdivide the quarter townships into lots of 100 acres, bounded as nearly as practicable by parallel lines 160 perches in length by 100 perches in width. These subdivisions into lots, however, were made upon the plats in the office of the Secretary of the Treasury, and the actual survey was only made at a subsequent time when a sufficient number of such lots had been located to warrant the survey.

It thus happened in some instances, that when the survey cams to be made the plat and survey could not be made to agree, and that fractional lots on plats were entirely crowded out. A knowledge of this fact may explain some of the difficulties met with in the district thus subdivided.

The act of Congress approved February 11, 1805, directs the subdivision of the public lands into quarter quarter sections, and provides that all corners marked in the field shall be established as the proper corners of the sections or quarter sections which they were intended to designate, and that corners of half and quarter sections not marked shall be placed as nearly as possible "equidistant from those two corners which stand on the same line." This act further provides that "the boundary lines actually run and marked" (in the field) "shall be established as the proper boundary lines of the sections or subdivisions for which they were intended; and the length of such lines as returned by the surveyors shall be held and considered as the true length thereof, and the boundary lines which shall not have been actually run and marked as aforesaid shall be ascertained by running straight lines from the established corners to the opposite corresponding corners, but in those fractional townships where no such opposite or corresponding corners have been or can be fixed, the said boundary line shall be ascertained by running from the established corners due north and south, or east and west, as the case may be, to the external boundary of such fractional township."

Act of February 11, 1805. U. S. Statutes at Large, vol. 2, p. 313. Section 2396, U. S. Revised Statutes.

The act of Congress approved April 24, 1820, provides for the sale of public lands in half quarter sections, and requires "that in every case of the division of a quarter section the line for the division thereof shall run north and south, and fractional sections, containing 160 acres and upwards, shall in like manner, as nearly as practicable, be subdivid into half quarter sections, under such rules and regulations as may be prescribed by the Secretary of the Treasury; but fractional sections, containing less than 160 acres, shall not be divided."

Act of April 24, 1820. U. S. Statutes at Large, vol. 3, p. 566. Section 2397, U. S. Revised Statutes.

The act of Congress approved May 24, 1824, provides "that whenever, in the opinion of the President of the United States, a departure from the ordinary mode of surveying land on any river, lake, bayou, or water-course would promote the public interest, he may direct the surveyor-general in whose district such land is situated, and where the change is intended to be made, under rules and regulations as the President may prescribe, to cause the lands thus situated to be surveyed in tracts of two acres in width, fronting on any river, bayou, lake, or water-course, and running back the depth of forty acres."

Act of May 24, 1824. U. S. Statutes at Large, vol. 4, p. 34.

The act of Congress approved April 5, 1833, directed the subdivision of the public lands into quarter quarters; that in every case of the division of a half quarter section the dividing line should run east and west, and that fractional sections shouldbe subdivided, under rnles and regulations prescribed by the Secretary of the Treasury. Under the latter provision the Secretary directed that fractional sections containing less than 160 acres, or the residuary portion of a fractional section, after the subdivision into as many quarter quarter sections, as it is susceptible of, may be subdivided into lots, each containing the quantity of a quarter quarter section as nearly as practicable, by so laying down the line of subdivision that they shall be 20 chains wide, which distances are to be marked on the plat of subdivision, as are also the areas of the quarter quarters and residuary fractions.

Act of April 5, 1832. U. S. Statutes at Large, vol. 4, p. 503. Section 2397, U. S. Revised Statutes.

These two acts last mentioned provided that the corners and contents of half quarters and quarter quarter sections should be ascertained as nearly as possible in the manner and on the principles prescribed in the act of Congress approved February 11, 1805.

From the foregoing synopsis of Congressional legislation it is evident—

1st. That the boundaries of the public lands established and returned by the duly appointed Government surveyors, when approved by the surveyors general and accepted by the Government, *are unchangeable.*

2d. That the original township, section, and quarter section corners established by the Government surveyors must stand as the true corners which they were intended to represent, whether the corners be in place or not.

3d. That quarter quarter corners not established by the Government surveyors must be planted equidistant and on line between the quarter section and section corner.

4th. That all subdivisional lines of a section must be straight lines, running from the proper corner in one exterior line to its opposite corresponding corner in the opposite exterior line.

5th. That in fractional sections where no opposite corresponding corner has been or can be established, any required subdivision line of such section must be run from the proper original corner in the boundary line due east and west, or north and south, as the case may be, to the water-course, Indian reservation, or other exterior boundary of such section.

From the foregoing it will be plain that extinct corners of the Government surveys must be restored to their original locations, whenever it is possible to do so; and hence resort should always be first had to the marks of the survey in the field. The locus of the missing corner should be first identified on the ground by the aid of the mound, pits, line trees, bearing trees, &c., described in the field notes of the original survey.

The identification of mounds, pits, and witness trees, or other objects noted in the field notes of survey, afford the best means of relocating the missing corner in its original position. If this cannot be done, clear and unquestioned testimony as to the locality it originally occupied should be taken, if such can be at all obtained. In any event, whether the locus of the corner be fixed by the one means or the other, such locus should always be tested and proven by measurements to *known* corners. No definite rule can be laid down as to what shall be sufficient evidence in such cases, and much must be left to the skill, fidelity, and good judgment of the surveyor in the performance of his work.

Where retracements of lines have to be made for the purpose of either testing the relocation of a missing corner, or by direct measurement between known corners intersecting at the point sought to be re-established, it will almost invariably happen that a difference of the measurement is developed between the original measurement, as stated in the field notes, and the new measurement made for that purpose of re-establishment or proof. When these differences occur, the surveyor must in all cases re-establish or prove his corners at intervals proportionate to those given in the field notes of the original survey. *From this rule there can be no departure*, since it is the basis upon which the whole operation depends for accuracy and truth.

TO RESTORE LOST OR OBLITERATED CORNERS.

1. *To restore corners on base and correction lines.*—Run a right line between the nearest existing corners on such line, whether base or correction line, which corners must, however, be fully identified, and at the point proportionate to the distance given in the field notes of the original survey, establish a new corner. This point should be verified by measurements to the nearest known corners north or south of the base or correction line, or both.

Where several corners are missing between the corners to be connected as directed above, their location will be determined upon the same principle and the same manner, that is to say, the original distance of the entire line between the recognized corners is to the entire distance remeasured between the same corners as the original distance of the first, second, third, &c., interval of the original survey is to the new distance to be laid off for the corresponding new interval. After having checked each new location by measurement to the nearest known corners north or south of the line, new corners will be established permanently, and new bearings and measurements taken to prominent objects, which should be of as permanent a character as possible, and the same recorded for future reference.

As has been observed, no existing original corner can be disturbed, and it will be plain that any excess or deficiency in measurements between existing corners cannot in any degree affect the distances beyond said existing corners, but must be added or subtracted proportionately to or from the intervals embraced between the corners which are still standing.

2. *Re-establishment of township corners common to four townships.*—Inasmuch as township lines are sometimes run in a direction not true north and south, or east and west, a line should first be run connecting the nearest known corners on the north and south township lines and a temporary corner established at the proportionate distance. This will establish the location of the township corner only so far as its relative position north and south is concerned. The nearest known corners on the east and west township lines will then be connected in the same manner, independent of the temporary corner previously set, and the proportionate point determined in that direction; any difference east or west of the temporary corner which may be developed by the last operation, by intersection with the line previously run north and south, will then be laid off in the direction required from the temporary corner, and a permanent corner established at such point, marked and witnessed as in the foregoing case.

3. *Re-establishment of corners common to two townships.*—The two nearest known corners on the township line, the same not being a base or a correction line, will be connected as in case No. 1, by a right line, and the missing corner established by proportionate distance as directed in that case; the location thus found will be checked upon by measurements to nearest known section or quarter section corners north and south, or east and west, of the township line, as the case may be.

4. *Re-establishment of closing corners.*—Measure from the quarter section, section or township corner east or west, as the case may be, to the next preceding or succeeding corner in the order of original establishment, and re-establish the missing closing

corner by proportionate measurement. The line upon which the closing corner was originally established should always be remeasured, in order to check upon the correctness of the new location.

5. *Re-establishment of interior section corners.*—This class of corners should be re-established in the same manner as corners common to four townships. In such cases, when a number of corners are missing on all sides of the one sought to be re-established, the entire distance must, of course, be remeasured between the nearest existing recognized corners both north and south and east and west, in accordance with the rule laid down, and the new corner re-established by proportionate measurement. The mere measurement in any one of the required directions will not suffice, since the direction of the several section lines running northwards through a township, or running east and west, are only in the most exceptional cases true prolongations of the alignment of the section lines initiated on the south boundary of the township; while the east and west lines running through the township, and theoretically supposed to be at right angles with the former, are seldom in that condition, and the alignment of the closing lines on the east and west boundaries of the township, in connection with the interior section lines, even less seldom in accord. Moreover, the alignment of the section line itself from corner to corner, in point of fact, also very frequently diverges from a right line, although presumed to be so from the record contained in the field notes and so designated on the plats, and become either a broken or a curved line. This fact will be determined, in a timbered country, by the blazes which may be found upon trees on either side of the line, and although such blazed line will not strictly govern as to the absolute direction assumed by such line, it will assist very materially in determining its approximate direction and should never be neglected in retracements for the re-establishment of lost corners of any description. Sight trees described in the field notes, together with the recorded distances to same, when fully identified, will, it has been held, govern the line itself, even when not in a direct or straight line between established corners, which line is then necessarily a broken line by passing through said sight trees. Such trees, when in existence and properly identified beyond a question of doubt, will very materially assist in evidencing the correct relocation of a missing corner. It is greatly to be regretted that the earlier field notes of survey are so very meager in the notation of the topography found on the original line, which might in very many instances materially lessen a surveyor's labors in retracement of lines and re-establishment of the required missing corner. In the absence of such sight trees and other evidences regarding the line, as in an open country, or where such evidence has been destroyed by time, the elements, or the progress of improvement, the line connecting the known corners should be run straight from corner to corner.

6. *Re-establishment of quarter section corners on township boundaries.*—Only one set of quarter section corners are actually marked in the field on township lines, and they are established at the time when the township exteriors are run. When double section corners are found, the quarter section corners are considered generally as standing midway between the corners of their respective sections, and when required to be established or re-established, as the case may be, they should be generally so placed; but great care should be exercised not to mistake the corners of one section for those of another. After determining the proper section corners marking the line upon which the missing quarter section corner is to be re-established, and measuring said line, the missing quarter section corner will be re-established in accordance with the requirements of the original field notes of survey by proportionate measurement between the section corners marking the line.

Where there are double sets of section corners on township and range lines, and the quarter section corners for sections south of the township or east of the range lines are required to be established in the field, the said quarter section corners should be so placed as to suit the calculation of areas of the quarter sections adjoining the township boundaries as expressed upon the official township plat, adopting proportionate measurements when the present measurements of the north and west boundaries of the section differ from the original measurements.

7. *Re-establishment of quarter section corners on section lines closing upon the north and west township boundaries.*—This class of corners must be re-established according to the original measurement at forty chains from the last interior section corner. If the measurements do not agree with the original survey, the excess or deficiency must be divided proportionately between the two distances, as expressed in the field notes of original survey. The section corner started from and the corner closed upon should be connected by a right line, unless the retracement should develop the fact that the section line is either a broken or curved line, as is sometimes the case.

8. *Re-establishment of interior quarter section corners.*—In some of the older surveys these corners are placed at variable distances, in which case the field notes of the original survey must be consulted, and the quarter section corner re-established at proportionate distances between the corresponding section corners, in accordance therewith. The later surveys being more uniform and in stricter accordance with

law, the missing quarter section corner must be re-established equidistant between the section corners marking the line, according to the field notes of the original survey. The marks made under § 5, in relation to section lines, apply with full force here also; the caution there given not to neglect sight trees is equally applicable; since the proper re-establishment of the quarter section corner may in some instances very largely depend upon its observance, and avoid one of the many sources of litigation.

8. *Where double corners were originally established, one of which is standing, to re-establish the other.*—It being remembered that the corners established when the exterior township lines were run belong to the sections in the townships north and west of those lines, the surveyor must first determine beyond a doubt to which sections the existing corner belongs. This may be done by testing the courses and distances to witness trees or other objects noted in the original field notes of survey, and by remeasuring distances to known corners. Having determined to which township the existing corner belongs, the missing corner may be re-established in line north or south of the existing corner, as the case may be, at the distance stated in the field notes of the original survey, by proportionate measurement, and tested by remeasurement to the opposite corresponding corner of the section to which the missing section corner belongs. These double corners being generally not more than a few chains apart, the distance between them can be more accurately laid off, and it is considered preferable to first establish the missing corner as above, and check upon the corresponding interior corner, than to reverse the proceeding; since the result obtained is every way more accurate and satisfactory.

9. *Where double corners were originally established, and both are missing, to re-establish the one established when the township line was run.*—The surveyor will connect the nearest known corners on the township line, by a right line, being careful to distinguish the section from the closing corners, and re-establish the missing corner at the point indicated by the field notes of the original survey, by proportionate measurement. The corner thus restored will be common to two sections either north or west of the township boundary, and the section north or west, as the case may be, should be carefully retraced; thus checking upon the re-established corner, and testing the accuracy of the result. It cannot be too much impressed upon the surveyor, that any measurements to objects on line noted in the original survey are means of determining and testing the correctness of the operation.

10. *Where double corners were originally established, and both are missing, to re-establish the one established when the township was subdivided.*—The corner to be re-established being common to two sections south or east of the township line, the section line closing on the missing section corner should be first retraced to an intersection with the township line in the manner previously indicated, and a temporary corner established at the point of intersection. The township line will of course have been previously carefully retraced in accordance with the requirements of the original field notes of survey, and marked in such a manner as to be readily identified when reaching the same with the retraced section line. The location of the temporary corner planted at the point of intersection will then be carefully tested and verified by remeasurements to noted objects and known corners on the township line, as noted in the original field notes of survey, and the necessary corrections made in such relocation. A permanent corner will then be erected at the corrected location on the township line, properly marked and witnessed, and recorded for future requirements.

11. *Where triple corners were originally established on range lines, one or two of which have become obliterated, to re-establish either of them.*—It will be borne in mind that only two corners were established as actual corners of sections, those established on the range line not corresponding with the subdivisional survey east or west of said range line. The surveyor will, therefore, first proceed to identify the existing corner or corners, as the case may be, and then re-establish the missing corner or corners in line north or south, according to the distances stated in the original field notes of survey in the manner indicated for the re-establishment of double corners and testing the accuracy of the result obtained, as hereinbefore directed in other cases. If, however, the distances between the triple corners are not stated in the original field notes of survey, as is frequently the case in the returns of older surveys, the range line should be first carefully retraced, and marked in a manner sufficiently clear to admit of easy identification upon reaching same during the subsequent proceedings. The section lines closing upon the missing corners must then be retraced in accordance with the original field notes of survey, in the manner previously indicated and directed, and the corners re-established in the manner directed in the case of double corners. The surveyor cannot be too careful, in the matter of retracement, in following closely all the recorded indications of the original line, and nothing, however slight, should be neglected to insure the correctness of the retracement of the original line; since there is no other check upon the accuracy of the re-establishment of the missing corners, unless the entire corresponding section lines are remeasured by proportional measurement, and the result checked by a recalculation of the areas as originally returned,

which, at best, is but a very poor check, because the areas expressed upon many plats of the older surveys are erroneously stated on the face of the plats, or have been carelessly calculated.

12. *Where triple corners were originally established on range lines all of which are missing, to re-establish same.*—These corners should be re-established in accordance with the foregoing directions, commencing with the corner originally established when the range line was run, establishing the same in accordance with previously given directions for restoring section and quarter section corners; that is to say, by remeasuring between the nearest known corners on said township line, and re-establishing the same by proportionate measurement. The two remaining will then be re-established in conformity with the general rules for re-establishment of double corners.

13. *Re-establishment of meander corners and meanders.*—Before proceeding with the re-establisment of missing meander corners, the surveyor will carefully rechain at least three of the section lines between known corners of the township within which the lost corner is to be relocated,in order to establish the proportionate measurement to be used. This requirement of preliminary remeasurement of section lines must in no case be omitted; since it is the only data upon which the fractional section line can be remeasured proportionately, the corner marking the terminus, or the meander corner being missing, and which it is intended to re-establish. The missing meander corner will be re-established on the section or township line retraced in its original location, by the proportionate measurement found by the preceding operations, from the nearest known corner on such township or section line, in accordance with the requirements of the original field notes of survey. To retrace the original meander lines, between the meander corners re-established as above, is generally an operation of much greater difficulty, owing to the fact that the line connecting the meander corners is, in most instances, a broken line, and is, moreover, unmarked at each point of change in direction intermediate between the said meander corners, thus affording no check upon the work as it progresses through a section. The several deflections of line comprising the meanders in any one section being originally run by compass, their retracement by compass at a later period offers too many opportunities for error; inasmuch as the variation of the needle, as noted in the original field notes of survey, may have undergone violent changes by removal of the cause, such as timber, &c., or increased attractions by exposure of minerals, thus giving no means of correction to be applied in that direction at the time of retracement. Moreover, the variation of the needle as noted is not to be implicitly depended upon, since the observations for variation are in many instances crude and rough, and at best afford but an approximation in such work. It is, therefore, deemed preferable, where such variation has been carefully noted in the original field notes of survey, and the lines have been run with a true meridian throughout, to retrace the meanders by the angles made by the several successive courses. For instance, supposing the first course of a meander in a section to be initiated from a north and south section line, and the course by compass to be N. 30° 15′ E., true meridian, the surveyor will lay off the angle of 30° 15′ in the direction required; the second course being N. 85° 45′ E., makes an angle with the preceding course of 55° 30′; the next course being S. 23° 30′ E. makes an angle with the preceding course of 66° 30′, and so on through the section. The required distances on each course being carefully chained, the excess or deficiency of the aggregate distance should be proportionately distributed on each course between the meander corners from the data thus found; also any error that may develop itself in the angles will be proportionately distributed upon the several angles and the entire meanders corrected in accordance therewith. Where no variation has been noted in the original field notes of survey, the meanders can only be retraced by trial lines, on the courses and distances originally given, and corrected by proportionate measurement of angle and distance as above. The surveyor will, of course, take cognizance of any information furnished by the original field notes of survey, as to objects on each course to which distances may be given or bearings taken, as well as at the meander stations themselves.

14. *Fractional section lines.*—County and local surveyors being sometimes called upon to restore fractional section lines closing upon Indian, military, or other reservations, private grants, &c., such lines should be restored upon the same principles as directed in the foregoing pages, and checked whenever possible upon such corners or monuments as have been placed to mark such boundary lines.

In some instances corners have been moved from their original position, either by accident or design, and county surveyors are called upon to restore such corners to their original positions, but, owing to the absence of any and all means of identification of such location, are unable to make the result of their work acceptable to the owners of the lands affected by such corner. In such cases the advice of this office has invariably been to the effect that the relocation of such corner must be made in accordance with the orders of a court of competent jurisdiction, the United States having no longer any authority to order any changes where the lands affected by such corner have been disposed of.

The original evidences of the public land surveys in the following States, viz: Ohio, Indiana, Illinois, Michigan, Wisconsin, Iowa, Missouri, Arkansas, Mississippi, Alabama, and Kansas have been turned over, under the provisions of sections 2218, 2219, and 2220, United States Revised Statutes, to the State authorities, to whom application should be made for such copies of the original plats and field notes as may be desired.

N. C. McFARLAND,
Commissioner.

Approved.

DEPARTMENT OF THE INTERIOR,
March 13, 1883.

H. M. TELLER,
Secretary.

METHOD OF SALE, PRICE, AND DISPOSITION OF THE PUBLIC DOMAIN FROM 1784 TO 1880.

[See Chap. VIII, pages 196 to 208.]

No change in this chapter to June 30, 1883. The system and prices remain the same. The throwing open to private purchase, at $1.25 per acre, in unlimited quantities, the public lands in the States of Arkansas, Louisiana, Mississippi, Alabama, and Florida, as ordered by the act of June 22, 1876, has resulted in the purchase of millions of acres by large holders and speculators. This still continues (see page 207, and annual reports of Commissioner of the General Land Office for 1880, '81, '82 and '83, and tables of sales herein, showing sales in these several States). Arable lands should be held for actual settlers.

DONATIONS OF LAND AND SPECIAL GRANTS.

TO JUNE 30, 1882.

[See Chapter IX, pages 209 to 213.]

Congress, having complete and entire control over the public domain, can sell it, give it away, or make such other disposition as it likes and as it believes best for the general welfare and public good.

In addition to those cited in Chapter IX, pages 209 to 213 herein, the following are given, having been enacted or put in operation since June 30, 1880:

[From Reports for 1881 and 1882 of General Land Office.]

WITHDRAWAL OF LANDS IN THE STATES OF WISCONSIN AND MINNESOTA FOR RESERVOIR PURPOSES.

By the provisions of the second section of an act of Congress entitled "An act making appropriations for the construction, repair, preservation, and completion of certain public works on rivers and harbors, and for other purposes," approved June 18, 1878, the Secretary of War was directed to cause an examination to be made of the sources of the Mississippi and Saint Croix Rivers, in the States of Wisconsin and Minnesota, and of the Chippewa and Wisconsin Rivers, in the State of Wisconsin, to determine the practicability and cost of creating and maintaining reservoirs upon the headwaters of said rivers and their tributaries, for the purpose of regulating the volume of water and improving the navigation of said rivers. Subsequently, by the provisions of the acts of March 3, 1879, June 14, 1880, and March 3, 1881, appropriations were made for the survey above referred to, and the construction of said reservoirs.

The Secretary of War, by letter of February 7, 1880, submitted to Congress the report of the United States engineer having in charge the survey provided for by the acts of June 18, 1878, and March 3, 1879 (House Ex. Doc. No. 39, Forty-sixth Congress, second session), from which it appeared that certain vacant public lands in the United States in the States of Wisconsin and Minnesota would be affected in the event of affirmative action by Congress on said report, in view of which fact the Secretary of War, by letter of March 3, 1880, addressed to the Secretary of the Interior a request that all public lands which it appeared from the engineer's report would be affected be withdrawn from sale or disposal pending action by Congress. The request of the Secretary of War having been referred to this office by the Assistant Secretary of the Interior, with an indorsement thereon directing a report to be made on the subject-matter thereof, there appearing to be no valid reason why the lands referred to should not be withdrawn from sale as requested, a list of same was prepared, together with

a draft of a proclamation withdrawing said lands from sale or disposal, which was transmitted to the Department March 19, 1880, which proclamation (No. 859, G. L. O. series) received the signature of the President March 22, 1880, and was at once promulgated by this office. By this proclamation some 70,000 acres of land in the districts of Falls Saint Croix, Eau Claire, Bayfield, and Wausau, in the State of Wisconsin, and 200 acres in the district of Taylor's Falls, Minnesota, were withdrawn from sale or disposal.

Under date of February 14, 1881, the Secretary of War transmitted a second report by the engineer in charge of survey, dated Saint Paul, Minn., June 12, 1880, containing a list of lands found to be within the limits of or necessary to be appropriated for the purposes of the reservoirs referred to, which list was referred to this office with directions for report thereon by the Department, under date of Febuary 15, 1881. In compliance with instructions, a list of said lands was prepared and forwarded, together with a draft of a proclamation of withdrawal, under date of March 25, 1881. This proclamation (No. 868, G. L. O. series) received the signature of the President April 5, 1881, and by it some 35,000 acres of land in the districts of Falls Saint Croix, Eau Claire, Bayfield, and Wausau, in the State of Wisconsin, and some 3,000 acres in the districts of Saint Cloud and Taylor's Falls, in the State of Minnesota, were withdrawn from sale or disposal.

This office also prepared lists of those lands included in the reports, the engineer having in charge the surveys above referred to which were found to be within the limits of the Leech Lake, Chippewa, and Cass Lake Indian reservations in the State of Minnesota, and the Court Oreille and Lac de Flambeau Indian reservations in the State of Wisconsin, which were forwarded to the Department with letter of March 25, 1881.

[Report of 1882.]

In accordance with the provisions of the acts mentioned, and upon requests of the Secretary of War, dated November 22, 1881, and January 13, 1882, lands liable to overflow by the construction of reservoirs have been withdrawn from sale or disposal, as follows:

In the Saint Cloud, Minn., land district, per proclamation No. 872 (General Land Office series), about 17,000 acres.

By proclamation No. 874, in the Wausau, Wis., land district, about 5,000 acres; in the Bayfield district, Wisconsin, about 4,000 acres; in the Eau Claire district, Wisconsin, about 500 acres; in the Falls of Saint Croix district, Wisconsin, about 1,600 acres; in the Saint Clond district, Minnesota, about 29,500 acres; in the Taylor's Falls district, Minnesota, about 200 acres.

The total area of lands withdrawn by the two proclamations is about 57,800 acres.

During the fiscal year ending June 30, 1881, about 108,200 acres of pubic lands were withdrawn for reservoir purposes, per proclamations Nos. 859 and 868.

On August 17, 1882, the Secretary of War, by a letter addressed to the honorable Secretary of the Interior and referred to this office, called attention to the fact that a number of tracts had been omitted from proclamations Nos. 872 and 874, and requested the withdrawal of the same from sale or disposal. These tracts are in the Saint Cloud district, Minnesota, and aggregate about 1,800 acres in area. By letter dated August 25, 1882, the Commissioner directed the register and receiver to withhold the same from disposal.

The total area of lands withdrawn by proclamation and withheld from disposal for reservoir purposes, under the acts referred to, approximates 168,000 acres, worth, at $1.25 per acre, $210,000.

By act of Congress of August 2, 1882, $300,000 were appropriated for reservoir purposes, and it is provided that—

"This sum shall be expended at such places on said headwaters of the Mississippi River and its tributaries as the Secretary of War shall determine: *Provided*, That the Secretary of War be, and he is hereby, authorized and empowered to enter upon, purchase, take, and hold any lands or premises, and any materials of stone, timber, or other kinds, that may be necessary and proper for the construction of said works. And in case the owner of such lands, premises, and materials and the Secretary of War cannot agree as to the value of the lands, premises, and materials taken or to be taken for said use, then the value thereof shall be determined by the appraisal of three disinterested commissioners, who may be appointed upon application by either party to the judge of the United States district court for the district in which such land, premises, or materials may be situate; and said commissioners, in their assessment of damages, shall appraise such lands, premises, and materials at what would have been the value thereof if said works had not been constructed; and upon return into said United States district court of such appraisement, and upon the payment into the same of the estimated value of said land, premises, and materials, so taken and appraised as aforesaid, said land, premises, and materials shall be deemed to be, and shall become, the property of the United States, which shall thereby acquire full title to the same. And either party feeling aggrieved at said appraisement may, within thirty days after the same has been returned into said court, file an appeal therefrom and demand a trial by jury in said court to estimate and ascertain the damages sus-

tained: *Provided further*, That the money hereby appropriated shall be used solely for the improvement of the navigation of the Mississippi River and its tributaries, and no part thereof shall be expended with the view to the improvement of private property. And the Secretary of the Interior is hereby authorized and directed to ascertain what, if any, injury is occasioned to the rights of any friendly Indians occupying any Indian reservation by the construction of any of the said dams, or the cutting or removing of trees or other materials from any such reservation for the construction or erection of any of said dams, and to determine the amount of damages payable to such Indians therefor; and all such damages to private property and to friendly Indians, when ascertained and determined in the manner herein directed and provided, shall be paid by the United States: *Provided, however*, That such damages shall not exceed 10 per centum of the sums hereby appropriated for the construction of said reservoirs."

ARTESIAN WELLS.

The act making appropriations for the Agricultural Department, approved June 16, 1880, authorized the Commissioner of Agriculture to contract for sinking *two* artesian wells on the plains east of the Rocky Mountains, and select the sites for the wells, and required, when the site of either well should be designated, the Secretary of the Interior to declare a reservation of four square miles, with the said site as nearly as possible in the centre thereof.

At the request of the Commissioner of Agriculture, lot 1 of section 33, of township 22 south, of range 51 west, containing forty-six one hundredths of an acre, was reserved for a well by letter to the Pueblo land officers, dated September 30, 1880. The tract reserved is situated a few miles northeast of the town of West Las Animas, and adjoins the Fort Lyon military reservation on the north. At this point a well has been sunk to a considerable depth, but water has not been reached. This is the only well site selected under the aforesaid appropriation.

The act of May 19, 1882, making appropriations for the Agricultural Department, contains the following provision:

"For locating and sinking not exceeding three artesian wells on the plains east of the Rocky Mountains, with a view to reclaiming arid and waste public lands, $20,000: *Provided*, That no part of this sum shall be expended in experiments upon the lands of individuals or corporations, but only upon the lands belonging to the United States. * * *"

Under this act two sites have been selected in Colorado for the sinking of wells by the Agricultural Department, to wit, sectons 4 and 5, township 2 north, of range 52 west, Denver district; and section 20, township 14 south, of range 44 west Pueblo district. The vacant lands in said sections 4 and 5 (about 1,080 acres) and said section 20 were reserved for the purpose by direction of this office, under date of August 21, 1882.

THE PRE-EMPTION ACTS, CASH ENTRIES THEREUNDER, AND VITAL AMENDMENTS NECESSARY TO EXISTING SETTLEMENT LAWS.

[See Chapter X, pages 214 to 216, inclusive, and 1247.]

TO JUNE 30, 1882.

No changes have been made in the pre-emption acts since June 30, 1880.

The number of entries thereunder cannot be given in detail, because the system of the General Land Office carries them into "cash entries," and they are, therefore, embraced in the annual cash receipts from sales of lands under various laws.

It is estimated that the disposals of lands under the pre-emption acts, since the beginning of the land system to June 30, 1882, have been about 173,000,000 of acres.

REPEAL OF THE PRE-EMPTION LAWS.

The several pre-emption laws have outlived their usefulness. Other and better laws have been passed containing pre-emption features, and affording proper facilities for honestly acquiring title to public lands. The pre-emption laws are now the hope of the land-grabber and are the land-swindler's darlings. Every attempt to repeal them by act of Congress is met with desperate hostility, and defeat follows. The Commissioner of the General Land-Office for four years past has asked for their repeal. The Secretary of the Interior has urged it for two years past. The Public Land Commission, charged with special powers to investigate abuses under the land system, urgently recommended their repeal. High officials have urged that the repeal of the pre-emption laws was the salvation of the remainder of the arable public domain.

The Secretary of the Interior, Hon. H. M. Teller, in his report for 1882, says, referring to the recommendation of the Commissioner of the General Land Office:

I fully agree with the Commissioner in this recommendation. The pre-emption law, intended as a means of enabling the citizen wishing to make a home to do so cheaply and speedily, has been used largely to aggregate large quantities of land for the benefit of the speculator, and not for those for whose benefit it was intended.

It should be the policy of the Government to preserve the public lands suitable for cultivation for the use of actual settlers, and this cannot be done under existing laws.

In the House of Representatives, second session, Forty-seventh Congress, December 19, 1882, Mr. Horace B. Strait, of Minnesota, from the Committee on the Public Lands, submitted a favorable report on the following bill (H. R. No. 4993), by Mr. William D. Washburn, of Minnesota, to repeal the laws allowing pre-emption of the public lands, and amending the homestead law.

IN THE HOUSE OF REPRESENTATIVES.

MARCH 6, 1882.—Read twice, referred to the Committee on the Public Lands, and ordered to be printed.
DECEMBER, 19, 1882.—Reported with an amendment, referred to the House Calendar, and ordered to be printed.

A BILL to repeal the laws allowing pre-emption of the public lands, and amending the homestead law.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the pre-emption laws of the United States relating to the public lands are hereby repealed: *Provided, however*, That such repeal shall not be construed to embrace special statutes relating to specific reservations or tracts of lands, which, to discharge treaty stipulations, or for other purpose separate and distinct from the general law, are required to be sold for cash to actual settlers or under the provisions of the laws allowing pre-emptions of the public lands.

SEC. 2. That all duly-qualified persons who, prior to the date of this act, have in good faith and compliance with existing laws made pre-emption settlements on the public lands subject thereto shall be entitled to perfect their entries and receive patents under said laws.

SEC. 3. That no person who has made, or shall hereafter make, a homestead entry on the public lands shall be entitled to avail himself of the provisions of section twenty-three hundred and one of the Revised Statutes of the United States until he shall have resided upon and cultivated the land embraced in such entry for the full period of thirty months: *Provided, however*, That in case of the death of a party who has made a homestead entry, it shall be competent for his successor in interest under the law to make entry under said section at any time thereafter.

[Report No. 1834, Forty-seventh Congress, second session.]

DECEMBER 19, 1882.—Referred to the House Calendar and ordered to be printed.

Mr. STRAIT, from the Committee on the Public Lands, submitted the following report, to accompany bill H. R. 4993.

The Committee on the Public Lands, to whom was referred the bill (H. R. 4993) to repeal the laws allowing pre-emption of the public lands, and amending the homestead law, submit the following report:

The pre-emption law and the various amendments which have been made to it from time to time were enacted for the purpose of reserving the public domain to the occupation of actual settlers, and for many years was the only law under which title could be acquired to unoffered lands.

The effect of this law throughout the entire region where the public lands were situated was of the most beneficent character, and saved a large region of country from being taken for the purpose of speculation. But, with the subsequent passage of the homestead act, there seemed to be little use for the pre-emption law, as those who, in good faith, desired to occupy the public lands for the purpose of establishing homes could do so to much better advantage under the provisions of the homestead law. And since the passage of the homestead law the pre-emption act, as a rule, has been "used only to be abused," and since that time the most extensive frauds have been committed under this law.

Your committee are informed that in many sections of the country the evasion of law has become a regularly organized business, and that offices are opened for the express purpose of pre-empting and selling lands located under the pre-emption law. Men are employed and paid definite amounts to make pre-emption locations, and agreements are made to transfer lands so acquired the moment the title vests in them.

But, beyond making such agreements in defiance of law, these locations, in many cases, are, in every respect, fraudulent; the parties to them never making the required improvements, and seldom going upon the land claimed. The consequence is that this law, which was so wisely enacted, and which for a long time after its enactment was so beneficent in its results, is now made use of almost exclusively to accomplish results that it was enacted to prevent, to wit, the passing or transferring of the public domain into the hands of speculators instead of reserving it for the actual settler; and not only this, but, in too many cases, passing into the hands of dishonest speculators, who are willing to become parties to perjury and fraud.

With this state of things existing to so alarming an extent in all sections of the country where there is any government land, and more especially in regions where the land is almost entirely valuable for its timber, coupled with the fact that the actual *bona fide* settler can acquire title to land for a home without money and without price, there seems no good reason why the pre-emption law should longer remain on the statute book, and your committee therefore recommend its repeal.

Your committee, in order to give effectiveness to this repeal and to prevent the consummation of the same class of frauds under the homestead act, commend the provision extending the time in which homestead claimants can commute payment. The bill under consideration extends this time from six to eighteen months. Your committee recommend that this time be further extended to thirty months.

The question of the repeal of the pre-emption law and the amendment of the homestead law is not a new one, but has been repeatedly urged by the Commissioner of the General Land Office. In his last report, June 30, 1882, he uses the following language:

"Previous to the passage of the homestead laws the pre-emption system afforded the only means by which settlers could acquire title to unoffered lands. The wise policy of Congress, maintained for many years, has been to withhold the public lands from disposal at ordinary cash sale, with a view to their occupation by actual settlers, and to prevent the appropriation of large bodies by individuals for speculative purposes. The pre-emption system was designed to enable actual settlers to establish their homes on the public domain, and thus to improve and build up the country.

"With the passage of the homestead act, however, the pre-emption law became of less importance, and recent supplemental legislation having placed homestead parties on an equal footing in all respects with pre-emptors, the special utility of the pre-emption law for purposes of *bona fide* settlement on the public lands has wholly ceased.

"Any person who could make a pre-emption entry can make a homestead entry. Any land that can be entered under the pre-emption laws can also be entered under the homestead laws. Under the homestead laws, also, the homestead party may purchase the land entered by him within the same time, upon the same terms, and by the same proofs as in pre-emption cases. There is, therefore, no practical necessity for continuing the double system in operation. A repeal of the pre-emption law would simplify the public business and be in the interest of public economy and good administration. Such repeal would, moreover, remove one of the causes of frauds in land entries which have approached great magnitude. The correspondence of this office, and reports from officers and special agents, indicate that a material proportion of the pre-emption entries now made are fraudulent in character, being chiefly placed upon valuable timber or mineral lands, or water rights, and made in the interest and by the procurement of others, and not for the purpose of residence and improvement by the professed pre-emptor."

Your committee, believing that the remainder of the public domain should be sacredly held for the actual settlers who are now crowding to the frontier in such large numbers, and that few opportunities would be left to speculators to acquire lands for speculation, urgently recommend the passage of this bill.

The bill did not become a law.

Mr. Frank Hiscock, of New York, February 19, 1883, reported to the House of Representatives, bill H. R. No. 7595, from the Committee of Appropriations, making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1884. It contained—lines 1706 to 1760—some almost vital (proposed) legislation in relation to the public domain. Mr. Hiscock had embraced three several propositions in the proposed repeal.

[Pages 70, 71, and 72, H. R. No. 7595, second session Forty-seventh Congress.]

"*Provided*, That the pre-emption laws, together with all laws authorizing the filing of declaratory statements for entries of the public lands, by agent or attorney, be, and the same are hereby, repealed: *Provided further*, That this repeal shall not affect the disposal of lands under treaty stipulations with Indian tribes, nor be deemed to

impair any legal rights heretofore acquired under the laws hereby repealed; but all existing settlements, entries, or filings may be perfected upon proper proof of the lawful and *bona fide* character of said claims and of due compliance with the provisions and requirements of the laws under which such entries, settlements, or filings were made: *And provided further*, That any person who has heretofore made, or may hereafter make, a *bona fide* entry of public lands under the homestead laws shall have the privilege of paying the minimum price for the quantity of land so entered at any time before the expiration of five years from the date of entry and after actual residence, improvement, and cultivation has been maintained for a period of not less than two and one-half years after entry; and it shall be the duty of the Commissioner of the General Land Office to require evidence of actual compliance with the requirements of law in respect to settlement, residence, improvement, and cultivation, in all cases in which title now is or may hereafter be claimed under the homestead or other settlement or improvement laws of the United States: *And provided further*, That any person applying for the benefits of the timber-culture laws shall make his entry in person, at the proper local land office, and shall make affidavit that he is an actual resident of the county and State or Territory in which the land is situated, and that he has not entered into any contract or agreement to relinquish the entry he may make, and that he has no present or prospective purpose of making any such relinquishment; and the offering for sale, as a matter of traffic or speculation, of relinquishments of entries made under the provisions of the timber-culture laws shall be deemed *prima facie* evidence that such entries were made for speculative purposes, and not in good faith, as required by law, and such entries shall thereupon be liable to cancellation by the Commissioner of the General Land Office, and the land covered thereby shall be deemed subject to entry by the first legal applicant; and the first section of the act of May fourteenth, eighteen hundred and eighty (authorizing lands covered by relinquished claims to be held as open to settlement and entry without further action by the Commissioner of the General Land Office), and all other acts and parts of acts inconsistent herewith are hereby repealed: *And provided further*, That when a timber-culture entry shall have once been made on a tract of public land subject to such entry and the same shall be canceled or relinquished, the land covered thereby shall thereafter be subject to entry only under the timber-culture laws, and no patent shall be issued for such land until the requirements of said laws shall have been fully complied with."

OPPOSITION TO THESE MEASURES.

At once after the introduction of this bill the mails and telegraph were burdened with letters, petitions, and messages demanding that these items be not enacted into laws. Indignation meetings were held in some localities, and stirring resolutions passed, denouncing the attempt of Congress to thus deprive speculators and grabbers of the splendid chances under existing laws of fraudulently gathering in the little remaining agricultural lands in the West, now a remanent of a once great arable area, the property of the nation.

The bill passed the House February 24, 1883, and went to the Senate. Remonstrances now poured in tenfold in number; the clauses given above were stricken from the bill by the Committee on Appropriations, and so reported to the Senate, March 1, 1883, and then returned to the House March 2, 1883. After conference the bill became a law March 3, 1883, without this most salutary and much needed and demanded legislation.

NEW LEGISLATION ASKED IN THE MATTER OF TIMBER-CULTURE LAWS.

The legislation recommended in relation to the timber-culture act, an act now generaly used to fraudulently acquire title, grew out of the recommendation of Mr. Commissioner McFarland in his annual report for 1882, wherein he says:

The period has but just commenced when the earlier entries made under the timber-culture act can be proven up. The fraudulent proceedings at the present time under the operations of this act are not, therefore, that legal title has actually been obtained by unlawful methods, but that fictitious entries are initiated for the purpose of holding the land out of market and selling to others relinquishments of the right af occupation so acquired.

It is alleged by numerous correspondents, and in the reports of officers and agents of this department, that operations of this character are carried on to a very great extent, notably at the present time in Dakota, Nebraska, and Minnesota, and that as a rule, in proportion as public surveys progress over territory subject to such entry, the

lands are covered with fictitious claims, and actual settlers are compelled to pay to speculators, or persons holding the claims, a bonus for the privilege of entering the land in a legal and proper manner under the public land laws.

THE NECESSITY FOR CHANGES IN EXISTING SETTLEMENT LAWS.

The Commissioner of the General Land Office, Hon. N. C. McFarland, in a communication of date February 12, 1883, addressed to the Hon. Thomas Ryan, M. C., Kansas, gives the reasons for an immediate change in the pre-emption, homestead, timber-culture and desert land acts, and the timber-land act of 1878. This letter furnishes argument for changes, and suggests remedies for the future by showing abuses and pointing out legal methods for their prevention. The letter is given in full, as its statements of the failure of existing laws to protect the nation were met by the proposed legislation in H. R. 7595.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D., C., February 12, 1883.

SIR: In compliance with your request, I hand you herewith a brief statement of the requirements of the general laws for the disposal of the public lands of the United States. These, not including the mineral laws, are :

The pre-emption laws.
The homestead laws.
The timber-culture laws.
The desert-land laws.
The timber-land laws.

The homestead laws include the provisions for the commutation of homestead entries and for the filing of soldiers' homesteads declaratory statements.

THE PRE-EMPTION LAWS.

The requirements of the pre-emption laws are settlement, inhabitancy, and improvement of land by the pre-emptor, for his own use, and not for speculation, nor for the benefit of another.

A pre-emptor has first to establish his residence on the land he wishes to enter. He may then file a pre-emption declaratory statement, which secures to him the preference right to acquire title to that land by inhabitancy and improving it for not less than six months, and by then paying the minimum price for it. If the land has been offered at public sale and is subject to private cash entry, he may purchase it, by virtue of his preference right, at any time within twelve months. If it is "unoffered" land, or land not subject to "private entry," he may have thirty-three months within which to pay for it. If no adverse claim intervenes he may pay for it any time after the expiration of the twelve or thirty-three months.

ABUSES.

The abuses are the evasion of the law for the speculative purposes by filing declaratory statements where there is no residence on the land, and the subsequent fraudulent acquirement of title by false affidavit of inhabitancy and improvement.

In these fraudulent proceedings the pre-emptor is generally the tool of others who suborn the perjury and reap the benefits of the unlawful acts they cause to be performed.

The objects sought are, generally:

1. To obtain title to large quantities of land in violation of the restriction of entry to actual settlers.

2d. To obtain valuable coal or iron lands at less than the Government price.

3d. To obtain lands that are valuable chiefly for timber.

4th. To control the ranges in grazing districts by obtaining title to valleys or to shores of streams and water courses.

5th. To control the land under color of claim of record and hold the same for sale on speculation.

As the actual settler can obtain title under the homestead laws without the payment of price, and as a homestead entry is more secure than a pre-emption claim (for even the United States cannot disturb a valid homestead entry), it follows that there is small legitimate occasion for pre-emption entries. Yet the number of pre-emption claims keeps fully abreast with the number of homestead entries.

A pre-emption declaratory statement may be sent to the land office by mail, or in any other way. It is not required to be sworn to or authenticated in any manner. The opportunity for fraud is therefore practically unlimited.

THE HOMESTEAD LAWS.

The requirements of the homestead laws are settlement, residence, and cultivation five years.

The party applying for the benefit of the homestead laws must make affidavit that his application is made for his own use and benefit, that he makes the entry for the purpose of actual settlement and cultivation, and not for the use or benefit of any other person. After making such affidavit he has six months within which to establish his residence on the land. If he or some other member of his family is residing on the land when he makes his application to enter, the affidavit may be made before the clerk of the county court. Otherwise the affidavit can be made only before the register or receiver.

ABUSES.

The abuses are the same in character under the homestead as under the pre-emption laws, and under the commutation provision, through which the land can be purchased in the same way as by pre-emption, the abuses are of the same extent as under the pre-emption laws. Where a fraudulent entry is made for the purpose of illegally obtaining title to the land, it is usually commuted to cash. When made for the purpose of controlling the land and speculating in the relinquishment, it is not commuted.

There is no provision for filing declaratory statements under the homestead laws except by or for soldiers and sailors. This provision is no advantage to the soldier or sailor. It gives him six months within which to establish his residence and make actual entry of the land. But he would have the same time without filing a declaratory statement, by making his application in the regular way.

Everybody, including the soldier and sailor, have the same privilege. The abuses of the soldier's declaratory statement are that soldiers are misled by land agents and attorneys into supposing that they have only to file a declaratory statement in order to obtain land, and that residence is not necessary to enable them to lawfully dispose of what they are told is their soldier's right.

The consequence is that a great many soldiers have been and are now being defrauded of their money which they send to such agents and never afterwards hear of either land or money. In other cases soldiers' discharge papers, or other evidence of their military service, are purchased from them, generally by promises, and used for making fraudulent filings for speculative purposes.

In both cases the declaratory statement is sold as a matter of common traffic, and when filed the relinquishment is offered for sale for the benefit of the speculator who controls it. The soldier gets nothing from these proceedings. He is made a party to a fraud without deriving any advantage from it. Actual settlers avail themselves of the general privileges of the homestead laws without preparatory filings and without commutation. Their difficulty is that the public lands are so largely covered by fraudulent claims that they can usually make a *bona fide* homestead entry only after buying off these claims.

THE TIMBER-CULTURE LAWS.

The requirements of the timber-culture laws are that entries shall be made for the cultivation of timber, and for the use and benefit of the person making the entry, and not for the benefit of any other person, and not for speculation.

Residence on the land is not required, and it is not necessary that the affidavit of entry should be made at the land office. Applications signed anywhere in the United States are filed by agents or attorneys, who cause a jurat to be attached thereto, either in their own offices or through some confederate in the land district.

Other abuses are that the land is not as a rule entered for the cultivation of timber, but exclusively for the purpose of speculating in the relinquishment of the entries.

A simple entry holds the land for a year. A few dollars expended in breaking five acres the first year, keeps the entry alive for the second year. A like small expenditure keeps it alive the third year. If these small expenditures are made, or are not proven to have been made, the entry holds good. Meanwhile the relinquishment is offered for sale. The purchaser makes, perhaps, or causes to be made, another fraudulent entry, the relinquishment of which he controls until he can find a purchaser at a profit, and the proceeding is kept up until some actual settler buys the land at a high price and enters it under the homestead or other laws. Timber is not cultivated under speculative timber-culture entries, and there is no way of reaching the fraud, except by a personal inspection of the land by officers appointed for that purpose, and not then until some years after entry, if a few acres are occasionally plowed as a pretence of compliance with law.

THE ACT OF MAY 14, 1880.

Fraudulent entries of the public lands have always been the drawback of the public land system, no provision for inspection ever having been made and no guards

thrown around the different methods of disposal. But entries fraudulently made or procured for the purpose of speculating in relinquishments, is a feature which has developed into greater proportions under the operation of the first section of the act of May 14, 1880.

This section provides that when a relinquishment of a pre-emption, homestead, or timber-culture entry is filed in the local land office, the land shall be held as open to entry without further action by the Commissioner of the General Land Office.

Previous to the passage of this act such relinquishments were forwarded to this office as a basis for the cancellation of the relinquished entry, and the land was not open to another entry until the former one had been canceled.

This proceeding did not prevent the sale of relinquishments of fraudulent entries, but was an impediment to wholesale traffic of that character, both because of the delay involved and because the transferee of the fraudulent entry had no certainty of securing the new entry. The relinquishment gave the purchaser no preference right to enter the land, which was open to entry to the first legal applicant after notice of cancellation was received at the local land office, and it was necessary for the parties to the scheme of transferring the fraudulent entry to keep a close watch for the receipt of the notice of cancellation in order to secure the new entry.

The first section of the act of May 14, 1880, removed all impediments to the easy and successful consummation of this class of frauds. Under the operation of this section the making and procurement of false, fictitious, and fraudulent filings and entries for the sole purpose of speculating in relinquishments of such entries and filings, has been organized into an established business of great extent. The necessary papers are prepared and signed and attested in blank in advance of township surveys, and as soon as the plats of survey are filed in the local land offices much of the lands in such townships are at once covered with the bogus claims, and then the operators have exclusive control of the land. The newspapers are filled with their advertisements of "relinquishments for sale," and settlers and persons seeking lands are compelled to go to these speculators and buy off the fraudulent claims before they can make legal settlement or entry of land so covered up and controlled.

As an example of this class of fraudulent entry and relinquishment, I inclose herewith copies of three duplicate homestead receipts, each bearing a relinquishment dated on the same day on which the entries were made, thus conclusively proving the fraudulent character of the transaction. These relinquishments were sold to other parties on the 3d of the present month.

Relinquishments are always made to the United States. The last party purchasing a relinquishment presents it at the land office simultaneously with his own application to enter the land. This secures an exclusive right of entry to the holder of the relinquishment, and it is this facility for which he pays, and it is the profit to be derived from selling such facility that inspires and promotes the making of fraudulent entries in the original instances.

THE DESERT LAND LAWS.

Desert land entries are restricted to lands which, without irrigation, will not produce some agricultural crop, and the amount of land permitted to be entered by any one person is limited to 640 acres.

The party making a desert entry pays 25 cents per acre at the time of application, and the remaining one dollar upon making final proof of compliance with law, which proof may be made within the period of three years. The abuses are that lands not desert in character are frequently entered, that the limitation of quantity is evaded by collusive entries, which are afterwards assigned to the real party in interest, and that the lands are held for various purposes of speculation, rather than for the objects contemplated by the law.

THE TIMBER LAND LAWS.

The timber land act of 1878 applies only to the States of California, Oregon, and Nevada, and to Washington Territory.

In other States and Territories timber lands are largely appropriated through fraudulent pre-emption and commuted homestead entries made in the interest and by the procurement of parties desiring to obtain the use or control of the timber. There is no special provision for the disposal of timber lands other than the act of 1878.

The conditions of that act are that the lands shall be valuable chiefly for timber, but unfit for cultivation; that no one person or association shall be permitted to enter more than 160 acres; that the entry shall not be made for speculation, nor for the benefit of any other person than the party making the entry. The applicant is required to swear, among other things, that he has made no contract or agreement by which the title he may receive from the United States shall inure in whole or part to the benefit of any person except himself. These provisions are widely evaded. It

is understood that large operators cause their employés and other persons to make the necessary affidavit, enter the lands, and then convey to their employers or principals. In this manner large tracts of timber land in California, Nevada, Oregon, and Washington Territory are controlled by single persons and firms, contrary to the intendment of the statute.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Hon. THOMAS RYAN,
House of Representatives.

FAILURE OF OFFICIAL EFFORTS TO EFFECT NECESSARY CHANGES.

The earnest efforts made by those officially charged with the administration of the public land laws and system to effect the repeal of the pre-emption laws, and the amendment of other settlement laws, in the interest of actual settlers, has resulted in nothing effective, save the placing on file in the Departments, the courts, and in Congress of a mass of evidence showing that the most glaring and unblushing frauds are perpetrated every day by scores of men and women, and the officers of the Government, through the failure of legislation, are powerless to prevent or suppress them. The pre-emption homestead and timber culture laws have become, in many instances, a premium for perjury and a reward for dishonesty.

CIRCULAR INSTRUCTIONS RELATIVE TO ENTRIES UNDER THE PRE-EMPTION LAWS.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., March 20, 1883.

To REGISTERS and RECEIVERS:

GENTLEMEN: You are instructed to deliver to applicants for land under the pre-emption acts a copy of this circular, and to especially call the attention of the applicant to the requirements of the law under which the application is made.

RESIDENCE OF APPLICANT.

1. The applicant *must* in *every case* state in his application his place of *actual residence,* and the *post office address* to which notices of contest or other proceedings relative to his entry shall be sent.

SECOND FILINGS AND ENTRIES.

2. A party making a legal filing or entry under any one of the foregoing acts exhausts his right under that act and cannot thereafter make another filing or entry under said act.

ALTERATIONS IN APPLICATIONS.

3. Applications to amend filings or entries should be filed with the register and receiver and be by them transmitted for the consideration of this office. Registers and receivers will not change an entry or filing so as to describe another tract or change a date after the same has been recorded.

RELINQUISHMENTS.

4. Entries and filings made for the purpose of holding the land for speculation and the sale of relinquishments are illegal and fraudulent, and every effort in the power of the Government will be exerted to prevent such frauds and to detect and punish the perpetrators.

5. The first section of the act of May 14, 1880, provides that when a pre-emption claimant shall file a written relinquishment of his claim in the land office, the land covered by such claim shall be held as open to settlement and entry without further action on the part of the Commissioner of the General Land Office.

6. This act refers to *bona fide* relinquishments of *bona fide* entries. An entry fraudulent in its inception is not an entry capable of being relinquished. It is an entry to be canceled upon a proper showing of the facts and circumstances of the case, whereupon the land will become subject to proper entry by the first legal applicant.

7. Purchasers of relinquishments of fraudulent filings or entries should understand that they purchase at their own risk so far as the United States is concerned, and must seek their own remedies under local laws against those who, by imposing such relinquishments upon them, have obtained their money without valuable consideration.

SETTLERS ON UNSURVEYED LANDS.

8. Pre-emption settlers on unsurveyed lands are allowed three months after the filing of the township plat of survey within which to put their claims on record. Accordingly no party will be permitted to make *final proof* in any case until after the expiration of said three months.

* * * * * * *

THE PRE-EMPTION LAW.

41. The qualifications required of a pre-emptor are that he (or she) shall be a citizen of the United States (or have declared an intention to become such); over twenty-one years of age or the head of a family; an actual inhabitant of the tract claimed; and not be the proprietor of 320 acres of land in any State or Territory.

42. A person who has removed from land of his own to reside on public land in the same State or Territory, or who has previously exercised his pre-emption right, is not a qualified pre-emptor.

43. Lands included in any reservation, or within the limits of an incorporated town, or selected as the site of a city or town, or actually settled and occupied for purposes of trade and business and not for agriculture, or on which there are any known salines or minerals, are not subject to pre-emption.

44. If the land is surveyed, but has not been "offered," the declaratory statement must be filed within three months from date of settlement. If upon "offered" land, the filing must be made within thirty days.

45. If the land is unsurveyed at the time of settlement, the declaratory statement must be filed within three months after the date of filing the township plat in the local office.

46. Failure to file a declaratory statement within the time prescribed makes the land liable to the claim of an adverse settler who does file notice of his intention at the proper time.

47. The land-office fee for filing a declaratory statement is $2, except in the Pacific States and Territories, where the fee is $3.

48. A pre-emption filing can be made only by an actual settler on the land. A filing without settlement is illegal, and no rights are acquired thereby.

49. The existence of a pre-emption filing on a tract of land does not prevent another filing to be made of the same land, subject to any valid rights acquired by virtue of the former filing and actual settlement, if any.

50. On *offered* lands proof and payment must be made within twelve months from date of settlement.

51. If the land is *unoffered*, proof and payment may be made within thirty-three months from date of settlement.

52. A failure to make proof and payment as prescribed by law renders the land subject to appropriation by the first legal applicant.

53. The requirements of actual inhabitancy and improvement must be observed as strictly under the pre-emption law as under the homestead law.

54. Failure to inhabit and improve the land in good faith, as required by law, renders the claim subject to contest and the entry to investigation and cancellation.

55. Final proof in pre-emption cases must be made to the satisfaction of the register and receiver, whose decision, as in other cases, is subject to examination and review by this office.

56. Publication of notice to make proof is required as in homestead cases.

57. The final affidavit must be made before the register or receiver, or before the clerk of a court of record in the county and State or Territory where the land is situated. If in an unorganized county the proof may be made in a similar manner in any adjacent county in the same State or Territory.

58. The pre-emptor is required to make oath that he has not previously exercised his pre-emption right; that he is not the owner of 320 acres of land; that he has not settled upon and improved the land to sell the same on speculation, but in good faith to appropriate it to his own exclusive use; that he has not made any contract or agreement, directly or indirectly, in any way or manner, with any person whomsoever, by which the title he may acquire from the United States shall inure in whole or in part to the benefit of any person except himself.

59. Any person swearing falsely *forfeits all right to the land and to the purchase-money paid*, besides being liable to prosecution under the criminal laws of the United States,

* * * * * * *

CAUTION TO APPLICANTS.

Persons making filings or entries under the * * * pre-emption acts are cautioned that the laws authorize entries to be made only for the use and benefit of the party making the same, and that entries or filings are not allowed by law to be made for the benefit of others nor for speculation, but all entries must be made in good faith and the requirements of law must be honestly and faithfully complied with.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Approved.

H. M. TELLER.
Secretary.

See sections 2246, 5392, 5393, 5440 and 5449 Revised Statutes of the United States for oaths and penalties..

RELINQUISHMENTS, JOINT ENTRIES, SECOND FILINGS, AND INSANE PRE-EMPTORS.

Pre-emption filings may be relinquished by the claimants in writing before the register or receiver of the proper district land office, or the relinquishment may be executed by the claimant on the back of the declaratory statement-receipt, duly witnessed and acknowledged in the manner requisite under the laws of the State or Territory in which the land is situated for the transfer of real estate. After relinquishment filed in the district land office, the tract embraced in the filing will be held subject to the claim of any other settler, according to the first section, act of May 14, 1880. If the receipt is lost, or from any other cause cannot be produced, the relinquishment must be accompanied by the affidavit of the party showing the fact.

When two or more settlers on unsurveyed land are found upon survey to be residing upon, or to have valuable improvements upon, the same smallest legal subdivision, they may make joint entry of such tract, and separate entries of the residue of their claims. This joint entry may be made in pursuance of contract between the parties, or without it. (Revised Statutes, section 2274.)

Should the settler in either of the aforesaid cases die before establishing his claim within the period limited by law, the title may be perfected by the executor, administrator, or one of the heirs, by making the requisite proof of settlement and paying for the land, the entry to be made in the name of "the heirs" of the deceased settler, and the patent will be issued accordingly. The legal representatives of the deceased pre-emptor are entitled to make the entry at any time within the period during which the pre-emptor would have been entitled to do so had he lived.

Section 2261 of the Revised Statutes prohibits the second filing of a declaratory statement by any pre-emptor qualified at the date of his first filing, where said filing has been in all respects legal. Where the first filing, however, is illegal, from any cause, not the willful act of the party, he has the right to make a second and legal filing.

Provision is made by act of Congress of June 8, 1880, whereby the rights of pre-emption claimants becoming insane may be proved up, and their claims perfected by any person duly authorized to act for them during their disability.

1. Such claims must have been initiated in full compliance with law, by persons who were citizens, or had declared their intention to become citizens, and were in other respects duly qualified.

2. The party for whose benefit the act shall be invoked must have become insane subsequent to the initiation of his claim, and the act will not be construed to cure a failure to comply with the law when such failure occurred prior to such insanity.

3. Claimant must have complied with the law up to the time of becoming insane, and proof of compliance will be required to cover only the period prior to such insanity.

4. The final proof must be made by a party whose authority to act for the insane person during such disability shall be duly certified under seal of the proper probate court.

Pre-emptors may, when desiring, change their filings to homestead entries. (See "*Homesteads,*" herein.)

PRE-EMPTIONS.

To December 1, 1883.

Any pre-emptor can apply for and enter at any United States district land office one quarter section of one hundred and sixty acres of public lands, also in the States of Alabama, Mississippi, Florida, Louisiana, and Arkansas.

Entries are admitted under sections 2257 to 2288 of the Revised Statutes of the United States, upon "offered" and "unoffered" lands, and upon any of the unsurveyed lands belonging to the United States to which the Indian title is extinguished, although in the case of unsurveyed lands no definite proceedings can be had as to the completion of the title until after the surveys shall have been extended and officially returned to the district land office.

A pre-emptor—may be heads of families, widows, or single persons over the age of twenty-one, who are citizens of the United States, or who have declared their intention to become citizens, as required by the naturalization laws—need not be a citizen. This does not include Indians, except such as have ceased their tribal relations and been declared citizens by treaties or acts of Congress.

The right of pre-emption, formerly extended by act of Congress of March 3, 1853, for one quarter section, or 160 acres, at the price of $2.50 per acre, to the alternate United States or reserved sections along the line of railroads, is continued by the Revised Statutes, sections 2257, 2559, and 2279.

HOW PAID FOR.

Pre-emptors in final payment for lands can use cash, military bounty land warrants, agricultural college scrip, or private claim scrip under act of January 28, 1879.

LIST OF FORMS USED IN PRE-EMPTION ENTRIES.

Declaratory statement.
Receipt for declaratory statement, register's and receiver's.
Notice of intention to make final proof.
Notice for publication of intention to make final proof.
Certificate as to posting notice.
Proof of publication of notice; affidavit of publisher or foreman of newspaper in which published.
Affidavit required of claimant.
Proof: testimony of claimant.
Proof: testimony of two witnesses taken separately.
Non-mineral affidavit of claimant.
Application, with register's certificate of payment.
Register's certificate for patent.
Record; status of case made by register and receiver.

CONTESTS.

For proceedings in case of contest, or objection to claimant proving up and paying for his or her claim, see "Rules of Practice, General Land Office," approved December 20, 1883; "Contests and Hearings," published in addenda to Chapter VI herein.

FORMS AND BLANKS USED IN PRE-EMPTION ENTRIES.

The pre-emptor, as the first step after settlement, files, in person or otherwise, in the district land office, where blanks are furnished free, one of the following declaratory statements:

[No. 4-535.]

Pre-emption declaratory statement for unoffered lands.

When lands are surveyed and unoffered the pre-emptor must file this statement within three months from settlement. Final proof must be made and land paid for within thirty-three months from date of settlement.

I, ——— ———, of ——, being ——, have, on the —— day of ——, A. D. 18—, settled and improved the —— quarter of section No. ——, in township No. ——, of range No.

——, in the district of lands subject to sale at the land-office at ——, and containing —— acres, which land has not yet been offered at public sale, and thus rendered subject to private entry; and I do hereby declare my intention to claim the said tract of land as a pre-emption right under section 2259 of the Revised Statutes of the United States.

Given under my hand this —— day of ——, A. D. 18—.

—— ——.

In presence of —— ——

[No. 4-534.]

Pre-emption declaratory statement for offered lands.

Where the lands have been offered at public sale the pre-emptor must file this statement within thirty days from settlement. Final proof must be made and land paid for within one year from date of settlement.

I, —— ——, of ——, being ——, have, since the 1st day of ——, A. D. 18—, settled and improved the —— quarter of section No. ——, in township No. ——, of range No. ——, in the district of lands subject to sale at the land office at——, and containing —— acres, which land *had been rendered subject to private entry* prior to my settlement thereon; and I do hereby declare my intention to claim the said tract of land as a pre-emption right, under section 2259 of the Revised Statutes of the United States.

Given under my hand this —— day of ——, A. D. 18—.

—— ——.

In presence of —— ——.

PRE-EMPTORS ON UNSURVEYED LANDS.

On unsurveyed lands, settlers must file one or the other of the above statements within three months after the township plat in which their land lies, is filed in the district land office.

[No. 4-536.]

Register and Receiver's Receipt and Notice.

$——. LAND OFFICE AT ——,
(*Date*) ——, 188–.

Mr. —— —— has this day paid —— dollars, the register's and receiver's fees, to file a declaratory statement, the receipt whereof is hereby acknowledged.

—— ——, *Receiver.*

No. ——.

Mr. —— —— having paid the fees, has this day filed in this office his declaratory statement, No. ——, for ——, section ——, township ——, of range ——, containing —— acres, settled upon ——, 18—, being —— offered.

Under the provisions of the pre emption laws, the time within which final proof is required to be made on unoffered lands expires in thirty-three months from date of settlement, or from date of filing of township plat in district land office in case of settlement on unsurveyed lands, and on offered lands in twelve months from date of settlement; and under act of March 3, 1879, notice of intention to prove up must be given by publication in a newspaper, to be designated by the register, for a period of thirty days, or in five consecutive issues of said paper, which notice must also contain the names of the witnesses by whom the necessary facts will be established.

Notice is, therefore, hereby given that this pre-emption filing expires on ——, 188–, after which date the tract will be subject to the claim of any other qualified party.

Very respectfully,

—— ——, *Register.*

See note in red ink, which registers and receivers will read and explain thoroughly to persons making application for lands where the affidavit is made before either of them.

Timber land embraced in a homestead, or other entry not consummated, may be cleared in order to cultivate the land and improve the premises, *but for no other purpose.*

If, after clearing the land for cultivation, there remains more timber than is required for improvement, there is no objection to the settler disposing of the same. But the question whether the land is being cleared of its timber *for legitimate purposes* is a question *of fact* which is liable to be raised at any time. If the timber is cut and removed *for any other purpose* it will subject the entry to cancellation, and the person who cut it will be *liable to civil suit* for recovery of the value of said timber, *and also to criminal prosecution* under Section 2461 of the Revised Statutes.

PROCEEDINGS TO PERFECT TITLE BY FINAL PAYMENT AFTER EXPIRATION OF LEGAL TIME, AS ABOVE NOTED.

Payment for acreage can be made, provided sufficient improvements have been made and cultivation necessary be shown, at the expiration of six months.

The pre-emptor files with the register of his district the following notice, which notice will be published by the register in a newspaper to be by him designated as

nearest the land, once a week for six weeks, at the applicant's expense, a deposit being first made:

[No. 4–348.]

Notice of intention to make final proof.

LAND OFFICE AT ———,
(*Date*) ———, 188–.

I, —— ———, of ——, who made pre-emption declaratory statement No. ——, for the ——— ———, do hereby give notice of my intention to make final proof to establish my claim to the land above described, and that I expect to prove my residence and cultivation before ——— ———, at ———, ——— —, 188–, by two of the following witnesses:

——— ———, of ———.
——— ———, of ———.
——— ———, of ———.
——— ———, of ———.

———— ————.
(*Signature of claimant.*)

LAND OFFICE AT ———,
(*Date*) ———, 188–.

Notice of the above application will be published in the ———, printed at ———, which I hereby designate as the newspaper published nearest the land described in said application.

——— ———, *Register.*

NOTICE TO CLAIMANT.—Give time and place of proving up, and name and title of the officer before whom proof is to be made; also, give names and post-office addresses of four neighbors, *two* of whom must appear as your witnesses.

The officer then issues the following:

[No. 4–347.]

Notice for publication.

LAND OFFICE AT ———,
(*Date*) ———, 188–.

Notice is hereby given that ——— ——— has filed notice of intention to make final proof before ——— ———, at ———, on ——— —, 188–, on homestead application No. —— (or pre-emption declaratory statement No. ——), for the ——— ———.
He names as witnesses —— ———, of ———, and ——— ———, of ———.

——— ———, *Register.*

NOTE.—This notice must also be posted in a conspicuous place in the land office for a period of thirty days prior to date of final proof.

Pre-emptor or homestead applicant may join in one notice for publication.

[No. 4–347½.]

CONSOLIDATED NOTICE FOR PUBLICATION.

LAND OFFICE AT ———,
(*Date*) ———, 188–.

Notice is hereby given that the following named settlers have filed notice of intention to make final proof on their respective claims before ——— ———, at ———, on ——— —, 188–, viz:

——— ———, on homestead application No. ——, for the ——— ———.

Witnesses: ——— ———, of ———, and ——— ———, of ———.

——— ———, on pre-emption declaratory statement No. ——, for the ——— ———.

Witnesses: ——— ———, of ———, and ——— ———, of ———.

——— ———, *Register.*

[No. 4-227.]

CERTIFICATE AS TO THE POSTING OF NOTICE.

LAND OFFICE AT ———,
(*Date*) ———, 18—.

I, ——— ———, register, do hereby certify that a notice, a printed copy of which is hereto attached, was by me posted in a conspicuous place in my office for a period of thirty days, I having first posted said notice on the —— day of ——, 18—.

——— ———, *Register.*

NOTE.—Proof of publication must be filed with final papers.

[No. 4-061.]

AFFIDAVIT REQUIRED OF PRE-EMPTION CLAIMANT OR APPLICANT.

May be made before register or receiver or clerk of court of record.

I, ——— ———, claiming the right of pre-emption, under section 2259 of the Revised Statutes of the United States, to the —— of section No. ——, of township No. ——, of range No. ——, subject to sale at ——, do solemnly —— that I have never had the benefit of any right of pre-emption under said section; that I am not the owner of 320 acres of land in any State or Territory of the United States, nor have I settled upon and improved said land to sell the same on speculation, but in good faith to appropriate it to my own exclusive use or benefit; and that I have not, directly or indirectly, made any agreement or contract, in any way or manner, with any person or persons whomsoever, by which the title which I may acquire from the Government of the United States should inure, in whole or in part, to the benefit of any person except myself.

——— ———.

I, ——— ———, of the land office at ——, do hereby certify that the above affidavit was subscribed and sworn to before me this —— day of ——, A. D. 188–.

[No. 4-375.]

PRE-EMPTION PROOF.

TESTIMONY OF CLAIMANT OR APPLICANT.

May be made before register or receiver or clerk of court of record.

——— ———, being called as a witness in —— own behalf in support of —— pre-emption claim to the ——, testifies as follows:

Question 1. What is your name? (Be careful to give it in full, correctly spelled, in order that it may be here written exactly as you wish it written in the patent which you desire to obtain.)

Answer. ——.

Ques. 2. What is your age?

Ans. ——.

Ques. 3. Are you the head of a family, or a single person; and, if the head of a family, of whom does your family consist?

Ans. ——.

Ques. 4. Are you a native-born citizen of the United States? If not, have you declared your intention to become a citizen, and have you obtained a certificate of naturalization?*

Ans. ——.

Ques. 5. Is the land embraced in your pre-emption claim, above described, included within the limits of an incorporated town; or has it been selected as the site of a city or town, and actually settled and occupied for purposes of trade and business?

Ans. ——

Ques. 6. Are there any indications of coal, salines, or minerals of any kind on this land? (If so, state what they are, and whether the springs or mineral deposits are valuable.)

Ans. ——.

Ques. 7. Is the land more valuable for agricultural than mineral purposes?

Ans. ——.

Ques. 8. What is your post-office address?

Ans. ——.

* In case the party has been naturalized, or has only declared his intention to become a citizen, a certified copy of his certificate of naturalization or declaration of intention, as the case may be, must be furnished.

Ques. 9. Are you the owner of 320 acres of land in any State or Territory?
Ans. ——.
Ques. 10. Have you left or abandoned a residence on land of your own in this —— to reside upon the land above described?
Ans. ——.
Ques. 11. Have you ever filed a pre-emption declaratory statement for other land than that above described? (If so, give, as nearly as you can, the date thereof and description of the land.)
Ans. ——.
Ques. 12. Have you heretofore made a pre-emption entry?
Ans. ——.
Ques. 13. Have you settled upon and improved the land for which you now apply to sell the same on speculation?
Ans. ——.
Ques. 14. Have you given any mortgage on this land, and have you made any agreement to sell the same?
Ans. ——.
Ques. 15. When did you make settlement on the land, and what constituted your first act of settlement?
Ans. ——.
Ques. 16. What improvements, if any, were on the land at date of your settlement? (If any, state who owned them, and whether they now belong to you.)
Ans. ——
Ques. 17. What improvements have you made on this land subsequent to your first act of settlement? (Describe them, and state the total value of the improvements owned by you thereon.)
Ans. ——.
Ques. 18. When did you first establish your residence upon the land?
Ans. ——.
Ques. 19. Have you resided upon the land ever since?
Ans. ——
Ques. 20. What use have you made of the land?
Ans. ——.
Ques. 21. How much of the land, if any, has been broken and cultivated since your settlement?
Ans. ——.
I hereby certify that each question and answer in the foregoing testimony was read to the claimant before —— signed —— name thereto, and that the same was subscribed and sworn to before me this —— day of ——, 188–.

——— ———,

NOTE.—The officer before whom the testimony is taken should call the attention of the witness to the following section of the Revised Statutes, and state to him that it is the purpose of the Government, if it be ascertained that he testifies falsely, to prosecute him to the full extent of the law.

TITLE LXX.—CRIMES.—CH. 4.

SEC. 5392. Every person who, having taken an oath before a competent tribunal, officer, or person, in any case in which a law of the United States authorizes an oath to be administered, that he will testify, declare, depose, or certify truly, or that any written testimony, declaration, deposition, or certificate by him subscribed is true, willfully and contrary to such oath states or subscribes any material matter which he does not believe to be true, is guilty of perjury, and shall be punished by a fine of not more than two thousand dollars, and by imprisonment, at hard labor, not more than five years, and shall, moreover, thereafter, be incapable of giving testimony in any court of the United States until such time as the judgment against him is reversed. (See sec. 1750.)

[No. 4–374.]

(The testimony of two witnesses, in this form, taken separately, required in each case.)

PRE-EMPTION PROOF.

TESTIMONY OF WITNESS.

May be made before register or receiver or clerk of court of record.

——— ———, being called as a witness in support of the pre-emption claim of ——— ——— to the ———, testifies as follows:
Question 1. What is your post-office address?
Answer. ———.

Ques. 2 What is your occupation?
Ans. ——.
Ques. 3. Are you well acquainted with ——— ———, the claimant in this case, and how long have you known ——?
Ans. ——.
Ques. 4. How old do you know or believe claimant to be?
Ans. ——.
Ques. 5. Is claimant the head of a family, or a single person; and, if the head of a family, of whom does the family consist?
Ans. ——.
Ques. 6. Is claimant a native-born citizen of the United States? (If not, state, if you can, what steps —— has taken to be naturalized.)
Ans. ——.
Ques. 7. Are you acquainted with the land above described?
Ans. ——.
Ques. 8. Do you live in the vicinity of the land?
Ans. ——.
Ques. 9. Is this land within the limits of an incorporated town, or has it been selected as the site of a city or town, and actually settled and occupied for purposes of trade and business?
Ans. ——.
Ques. 10. Are there any indications of coal, salines, or minerals of any kind on this land? (If so, state what they are, and whether the springs or mineral deposits are valuable.)
Ans. ——.
Ques. 11. Is the land more valuable for agricultural than mineral purposes?
Ans. ——.
Ques. 12. Is the claimant the owner of 320 acres of land in any State or Territory? (State your knowledge in this regard.)
Ans. ——.
Ques. 13. Has the claimant left or abandoned a residence on land of —— own in this —— to reside upon the land above described? (State your knowledge in this regard?
Ans. ——.
Ques. 14. Has the claimant ever filed a pre-emption declaratory statement for other land than that above described, or has —— heretofore made a pre-emption entry? (State your knowledge in this regard.)
Ans. ——.
Ques. 15. Do you know whether the claimant has given any mortgage on this land, or made any agreement to sell the same? (State your knowledge in this regard.)
Ans. ——.
Ques. 16. When did claimant first make settlement on the land, and what constituted his first act of settlement?
Ans. ——.
Ques. 17. What improvements does the claimant possess on the land, and what is the value of the same?
Ans. ——.
Ques. 18. When did claimant first establish a residence upon the land?
Ans. ——.
Ques. 19. Has claimant resided upon the land continuously ever since?
Ans. ——.
Ques. 20. For what purpose has the land been used by claimant?
Ans. ——.
Ques. 21. How much of the said land, if any, has been broken and cultivated since the claimant made settlement thereon?
Ans. ——.
Ques. 22. Is it your belief that ——— ——— has acted in good faith in the settlement and improvement of the said land under the pre-emption laws? Have you any knowledge to the contrary?
Ans. ——.
Ques. 23. Are you interested in this claim?
Ans. ——.

——— ———.

I hereby certify that witness is a person of respectability; that each question and answer in the foregoing testimony was read to —— before —— signed —— name thereto, and that the same was subscribed and sworn to before me this —— day of ——, 188–.

——— ———,
———.

NOTE.—The officer before whom the testimony is taken should call the attention of the witness to the following section of the Revised Statutes, and state to him that it

is the purpose of the Government, if it be ascertained that he testifies falsely, to prosecute him to the full extent of the law:

TITLE LXX.—CRIMES.—CH. 4.

SEC. 5392. Every person who, having taken an oath before a competent tribunal, officer, or person, in any case in which a law of the United States authorizes an oath to be administered, that he will testify, declare, depose, or certify truly, or that any written testimony, declaration, deposition, or certificate by him subscribed is true, willfully and contrary to such oath states or subscribes any material matter which he does not believe to be true, is guilty of perjury, and shall be punished by a fine of not more than two thousand dollars, and by imprisonment, at hard labor, not more than five years, and shall, moreover, thereafter, be incapable of giving testimony in any court of the United States until such time as the judgment against him is reversed. (See sec. 1750.)

NON-MINERAL AFFIDAVIT.

The claimant or applicant now files a

Non-mineral affidavit.

COUNTY OF ——,
—— *of* ——, *ss*:

—— ——, being duly sworn according to law, deposes and says that he is the identical —— who is an applicant for Government title to the ——; that he is well acquainted with the character of said described land, and with each and every legal subdivision thereof, having frequently passed over the same; that his knowledge of said land is such as to enable him to testify understandingly with regard thereto; that there is not, to his knowledge, within the limits thereof, any vein or lode of quartz or other rock in place bearing gold, silver, cinnabar, lead, tin, or copper, or any deposit of coal; that there is not within the limits of said land, to his knowledge, any placer, cement, gravel, or other valuable mineral deposit; that no portion of said land is claimed for mining purposes under the local customs or rules of miners or otherwise; that no portion of said land is worked for mineral during any part of the year by any person or persons; that said land is essentially non-mineral land, and that his application therefor is not made for the purpose of fraudulently obtaining title to mineral land, but with the object of securing said land for agricultural purposes.

—— ——.

Subscribed and sworn to before me this —— day of ——, A. D. 188–, and I hereby certify that the foregoing affidavit was read to the said —— —— previous to his name being subscribed thereto; and that deponent is a respectable person to whose affidavit full faith and credit should be given.

—— ——.

APPLICATION.

The claimant now signs the following application, which is certified to by the register and filed with the receiver:

No.——. LAND OFFICE AT ——,
(*Date*) —— —, 188–.

I, —— ——, of —— County, ——, do hereby apply to purchase the —— section ——, in township —, of range —, containing —— acres according to the returns of the surveyor-general, for which I have agreed with the register to give at the rate of —— per acre.

I, —— ——, register of the land office at ——, do hereby certify that the lot above described contains —— acres, as mentioned above, and that the price agreed upon is —— per acre.

—— ——, *Register.*

RECEIVER'S RECEIPT FOR PAYMENT.

(Issued in duplicate).

The receiver then issues the following:

No. ——. RECEIVER'S OFFICE AT ——,
(*Date*) —— —, 188–.

Received from —— ——, —— County, ——, the sum of —— dollars and —— cents; being in full for the —— quarter of section No. —, in township No. —, of range No. —, containing —— acres and —— hundredths, at $—— per acre.

—— ——, *Register.*

REGISTER'S CERTIFICATE FOR PATENT.

(*See title "Patents," below.*)

The register now issues to the claimant a certificate for patent.

No. ——.] LAND OFFICE AT ———,
(*Date*) ——— —, 188–.

It is hereby certified that, in pursuance of law, ——— ———, ——— County, State of ———, on this day purchased of the register of this office the lot or —— of section No. —, in township No. —, of range No. —, containing —— acres, at the rate of —— dollar and —— cents per acre, amounting to ——— dollars and —— cents, for which the said ——— ——— has made payment in full as required by law.

Now, therefore, be it known that, on presentation of this certificate to the Commissioner of the General Land Office, the said ——— ——— shall be entitled to receive a patent for the lot above described.

——— ———, *Register.*

RECORD OR STATUS OF EACH CASE.

The register and receiver will make for each and every case a record or brief of each pre-emption case, which is filed and returned with each case.

RECORD FILED WITH THE CASE.

(To be used in all cases of pre-emption entry.)

UNITED STATES LAND OFFICE AT ———,
(*Date*) ——— —, 18—.

In the matter of the pre-emption claim of ——— ——— to ———.

Declaratory statement No. —, for ———, filed on the —— day of ———, 188–, alleging settlement on the —— day of ———, 188–, and reported in the —— offered series.

Plat of survey filed in this office on the —— day of ———, 188–.

There are no adverse claims of record except ———.

REMARKS.

Under this head, if the land is within the limits of a railroad grant, the date of withdrawal should be given; and if the land has been returned by the surveyor-general or withdrawn by order of the Commissioner as mineral, the fact should be noted.

——— ———, *Register.*
——— ———, *Receiver.*

PATENTS.

[From circular of General Land Office, October 1, 1880.]

Parties interested in the issue of pre-emption and other patents are further advised that, in a decision of the honorable Assistant Secretary of the Interior, of July 27, 1880, in the case of Horace Whitaker *ex rel.* Nathan H. Garretson *v.* The Southern Pacific Railroad Company and Wesley M. Slater, the following instructions are promulgated:

* * * "I think it is not a correct practice to issue a pre-emption patent to an assignee in any case. The law as to the issuance of patents is well stated in the case of McGarrahan *v.* New Idria Co. (49 Cal., 335), thus: 'Neither the President, however, nor any officer, has other power * * * to sign or to cause the seal of the Land Office to be affixed to patents than such as is conferred by statute of the United States.' (See also Stoddard *v.* Chambers, 2 How., 318; McGarrahan *v.* Mining Co., *supra;* sections 450 and 453 of the Revised Statutes; and act of June 19, 1878, 20 Stat., 183.) I find nothing in the pre-emption law requiring the issuance of patents to assignees of pre-emptors, and the labor of examining into assignments ought not to be assumed by your office, to say nothing of the evils that may result from issuing patents to assignees in pre-emption cases. The same doctrine applies to all cases of the issuance of patents except where the statutes expressly recognize the right of an assignee to take patent in his own name."

SALINE LANDS.

TO JUNE 30, 1882.

[See Chapter XI, pages 217, 218, and 1247.]

No changes since June 30, 1880.

[Official Circular.]

SALINE LANDS—HOW RENDERED SUBJECT TO DISPOSAL.

IN EFFECT DECEMBER 1, 1883.

* * * * * * *

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE, *October* 1, 1880.

The act of Congress of January 12, 1877, provides a mode of proceeding by which public lands indicated, by the filed notes of survey or otherwise, to be *saline in character* may be rendered subject to disposal.

Should *prima facie* evidence that certain tracts are saline in character be filed with the register and receiver of the proper land district, they will designate a time for a hearing at their office, and give notice to all parties in interest, in order that they may have ample opportunity to be present with their witnesses.

At the hearing the witnesses will be thoroughly examined with regard to the true character of the land, and whether the same contains any known mines of gold silver, cinnabar, lead, tin, copper, or other valuable mineral deposit, or any deposit of coal.

The witnesses will also be examined in regard to the extent of the saline deposits upon the given tracts, and whether the same are claimed by any person; if so, the names of the claimants and the extent of their improvements must be shown.

The testimony should also show the agricultural capacities of the land, what kind of crops, if any, have been raised thereon, and the value thereof. The testimony should be as full and complete as possible, and, in addition to the leading points indicated above, everything of importance bearing upon the question of the character of the land should be elicited at the hearing.

The register and receiver will transmit the testimony to this office with their joint opinion thereon. When the case comes before this office, such a decision will be rendered in regard to the character of the land as the law and the facts may warrant.

Should the given tracts be adjudged agricultural, they will be subject to disposal as such. Should the tracts be adjudged *saline lands*, the register and receiver will be instructed to offer the same for sale, after public notice, at the local land office of the district in which the same shall be situated, and to sell said tract or tracts to the highest bidder for cash, at a price not less than $1.25 per acre.

In case said lands fail to sell when so offered, the same will be subject to private sale at such land office for cash, at a price not less than $1.25 per acre, in the same manner as other public lands are sold, and already indicated herein.

The provisions of this act do not apply to any lands within the Territories, nor to any within the States of Mississippi, Louisiana, Florida, California, and Nevada, none of which have had a grant of salines by act of Congress. * * *

SWAMP AND OVERFLOWED LANDS.

[See Chapter XII, pages 219 to 222, inclusive, and 1248.]

TO JUNE 30, 1882.

Total acres selected from date of first law to June 30, 1882, 70,006,769.41.

The Commissioner of the General Land Office, in his report for 1882, says:

An increasing demand is being made by the States to which the swamp-land grant applies, and their grantees, for a final adjustment of the claims arising thereunder. The principal cause for this demand is found in the fact that the public lands are being rapidly exhausted, and parties are seeking swamp lands as an investment, and in many cases settlers are purchasing them from the States and reclaiming them for homes. It is a well-known fact that thousands of acres of land that were so swampy or overflowed at the date of the principal grant (September 28, 1850) as to be thereby rendered unfit for cultivation, have since been reclaimed, and are now among the most valuable lands for agricultural purposes found in our country.

Again, the special appropriations by Congress for three years past for this work have contributed largely to stimulate the parties in interest to present their claims for

settlement; as prior to such appropriations this office labored under great embarrassment in prosecuting the work, especially that portion arising under the indemnity act of March 2, 1855, as extended by act of March 3, 1857.

SWAMP LANDS SELECTED BY STATES TO JUNE 30, 1882.

Statement exhibiting the quantity of land selected for the several States under acts of Congress approved March 2, 1849, September 28, 1850 (Revised Statutes of the United States, section 2479), and March 12, 1860 (Revised Statutes of the United States, section 2490), up to and ending June 30, 1882.

UNITED STATES SWAMP LAND LAWS.

IN EFFECT DECEMBER 1, 1883.

Owing to the large interests involved and the possibilities of litigation growing out of alleged frauds in obtaining title to swamp lands from the United States, and also on account of its historical value, the following circular is given in full:

REGULATIONS AND DECISIONS THEREUNDER.

GENERAL LAND OFFICE, *April* 18, 1882.

As soon as practicable after the passage of the swamp land grant of September 28, 1850, viz, on the 21st November, 1850, the Commissioner transmitted to the governors of the respective States to which the grant applied copies of office circular setting forth the provisions of said act, giving instructions thereunder, and allowing the States to elect which of two methods they would adopt for the purpose of designating the swamp lands, viz:

1st. The field-notes of Government survey could be taken as the basis for selections, and all lands shown by them to be swamp or overflowed within the meaning of the act, which were otherwise vacant and unappropriated September 28, 1850, would pass to the States.

2d. The States could select the lands by their own agents and report the same to the United States surveyor-general with proof as to the character of the same.

The following States elected to make the field-notes of survey the basis for determining what lands passed to them under the grant, viz: Michigan, Minnesota, and Wisconsin.

The authorities of the following States elected to make their selections by their own agents and present proof that the lands selected were of the character contemplated by the swamp grant, viz: Alabama, Arkansas, Florida, Illinois, Indiana, Iowa, Mississippi, Missouri, Ohio, and Oregon.

The authorities of California did not adopt either method, and the passage of the act of July 23, 1866, rendered such action on their part unnecessary.

In Louisiana the selections under the grant of March 2, 1849, forming the bulk of the selections in said State, are made in accordance with the terms of said act by deputy surveyors, under the direction of the United States surveyor-general, at the expense of the State. Lands claimed under the act of September 28, 1850, are selected by agents of the State, and proof of the character of the land is furnished.

All lands properly selected and reported to this office as swamp are placed of record in books especially prepared for that purpose. Thereafter the selections are compared with the other records of the office, and lists of such lands as are shown to be swamp or overflowed within the meaning of the act and that are otherwise free from conflict are made out by this office and are submitted to the Secretary of Interior with the recommendation that the same be approved.

When the lists have been approved by the Secretary and returned to this office duplicate copies of the same are made out, one of which is transmitted to the governor of the State, with the statement that on receipt of his request patent will issue to the State for the lands. The other list is transmitted to the register and receiver of the land office in which the lands are situated, and they are requested to examine the same with the records of their office and report any conflicts found.

Upon receipt of reply to the letters of this office as above patents issue to the State for all the lands embraced in said lists, so far as they are free from conflict.

Under the provisions of the act of March 2, 1849, granting swamp lands to the State of Louisiana, a certified copy of the list approved by the Secretary of the Interior, transmitted to the governor, has the force and effect of a patent.

The "list" referred to in section 2 of the act of September 28, 1850, is held to be the copy of the list approved by the Secretary of the Interior sent to the governor, upon which his request for patent is based.

The following are the swamp land laws, regulations, and decisions:

AN ACT to aid the State of Louisiana in draining the swamp lands therein.

March 2, 1849, 9 Stat., p. 352, ch. lxxxvii.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That to aid the State of Louisiana in constructing the necessary levees and drains to reclaim the swamp and overflowed lands therein, the whole of those swamp and overflowed lands, which may be or are found unfit for cultivation, shall be, and the same are hereby, granted to that State.

Certain swamp lands granted to State of Louisiana.

SEC. 2. *And be it further enacted*, That as soon as the Secretary of the Treasury shall be advised, by the governor of Louisiana, that that State has made the necessary preparation to defray the expenses thereof, he shall cause a personal examination to be made under the direction of the surveyor-general thereof, by experienced and faithful deputies, of all the swamp lands therein which are subject to overflow and unfit for cultivation; and a list of the same to be made out and certified by the deputies and surveyor-general, to the Secretary of the Treasury, who shall approve the same, so far as they are not claimed or held by individuals, and on that approval, the fee simple to said lands shall vest in the said State of Louisiana, subject to the disposal of the legislature thereof: *Provided, however*, That the proceeds of said lands shall be applied exclusively, as far as necessary, to the construction of the levees and drains aforesaid.

How said lands shall be selected.

Proceeds of lands, how to be applied.

SEC. 3. *And be it further enacted*, That in making out a list of these swamp lands, subject to overflow and unfit for cultivation, all legal subdivisions, the greater part of which is of that character, shall be included in said list; but when the greater part of a subdivision is not of that character, the whole of it shall be excluded therefrom: *Provided, however*, That the provisions of this act shall not apply to any lands fronting on rivers, creeks, bayous, water courses, &c., which have been surveyed into lots or tracts under the acts of third March, eighteen hundred and eleven, and twenty-fourth May, eighteen hundred and twenty-four: *And provided further*, That the United States shall in no manner be held liable for any expense incurred in selecting these lands and making out the lists thereof, or for making any surveys that may be required to carry out the provisions of this act.

How selection is to be made when only part of a subdivision is swamp land.

Proviso as to land on bayous, &c.

Approved March 2, 1849.

AN ACT to enable the State of Arkansas and other States to reclaim the "swamp lands" within their limits.

Sept. 28, 1850, 9 Stat., p. 519, ch. lxxxiv.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That to enable the State of Arkansas to construct the necessary levees and drains to reclaim the swamp and overflowed lands therein, the whole of those swamp and overflowed lands, made unfit thereby for cultivation which shall re-

Swamp and overflowed lands unfit for cultivation granted to Arkansas.

main unsold at the passage of this act, shall be, and the same are hereby, granted to said State.

Secretary of Interior to make out list and plats of said land, and when requested to grant a patent vesting the same in the State of Arkansas.

SEC. 2. *And be it further enacted*, That it shall be the duty of the Secretary of the Interior, as soon as may be practicable after the passage of this act, to make out an accurate list and plats of the lands described as aforesaid, and transmit the same to the governor of the State of Arkansas, and, at the request of said governor, cause a patent to be issued to the State therefor; and on that patent, the fee simple to said lands shall vest in the said State of Arkansas, subject to the disposal of the legislature thereof: *Provided, however*, That the proceeds of said lands, whether from sale or by direct appropriation in kind, shall be applied, exclusively, so far as necessary, to the purpose of reclaiming said lands by means of the levees and drains aforesaid.

Proviso.

When the greater part of a subdivision is unfit for cultivation, it shall be included in said plats; if the greater part be not of that character, it shall be excluded.

SEC. 3. *And be it further enacted*, That in making out a list and plats of the land aforesaid, all legal subdivisions, the greater part of which is "wet and unfit for cultivation," shall be included in said list and plats; but when the greater part of a subdivision is not of that character, the whole of it shall be excluded therefrom.

SEC. 4. *And be it further enacted*, That the provisions of this act be extended to, and their benefits be conferred upon, each of the other States of the Union in which such swamp and overflowed lands, known as designated as aforesaid, may be situated.

Approved September 28, 1850.

CONSTRUCTION OF ACTS OF 1849 AND 1850.

Swamp grant a grant *in presenti*.

The grant of swamp lands, under acts of March 2, 1849, and September 28, 1850, is a grant *in presenti*. See United States Supreme Court decisions, Railroad Company *vs.* Fremont County (9 Wallace, 89); Railroad Company *vs.* Smith (*id.*, 95); Martin *vs.* Marks (7 Otto, 345); decisions of Secretary of the Interior, December 23, 1851 (1 Lester's L. L., 549), April 25, 1852, and opinion of Attorney-General, Nov. 10, 1858 (1 Lester's L. L., 564).

Act of 1850 only granted swamp lands to States then in the Union.

The act of September 28, 1850, did not grant swamp and overflowed lands to States admitted into the Union after its passage. See decision of Secretary Interior, August 17, 1858; Commissioner G. L. O., May 2, 1871 (Copp's L. L., 474), affirmed by Secretary June 1, 1871, and Commissioner G. L. O., January 19, 1874 (Copp's L. L., 473), affirmed by Secretary July 9, 1875.

When method of determining swamp lands is agreed upon, State and Government both bound by same.

A State having elected to take swamp land by field notes and plats of survey is bound by them, as is also the Government. See Secretary's decisions, October 4, 1855 (1 Lester's L. L., 553), August 1, 1859 (*id.*, 571), December 4, 1877 (4 Copp's L. O., 149), and September 19, 1879.

10 Stat., p. 634, act Mar. 2, 1855, ch cxlvii.

AN ACT for the relief of purchasers and locators of swamp and overflowed lands.

Patents to issue for swamp lands to purchasers and locators prior to issuing of patents to the States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States cause patents to be issued, as soon as practicable, to the purchaser or purchasers, locator or locators, who have made entries of the public lands claimed as swamp lands, either with cash, or with land warrants, or with scrip, prior to the issue of patents to the State or States, as provided for by the second section of the act approved September twenty-eight, eighteen hundred and fifty, entitled "An act to enable the State of Arkansas and other States to reclaim the swamp lands within their limits," any decision of the Secretary of the Interior or other officer of the Government of the United States, to the contrary notwithstanding:

Provision for the case of a sale by a State prior to its obtaining a patent.

Provided, That in all cases where any State, through its constituted authorities, may have sold or disposed of any tract or tracts of said land to any individual or individuals prior to the entry, sale, or location of the same, under the pre-emption or other laws of the United States, no patent shall be issued by the President for such tract or tracts of land, until such State, through its constituted authorities, shall release its claim thereto, in such form as shall be prescribed by the Secretary of the Interior: *And provided further*, That if such State shall not, within ninety days from the passage of this act, through its constituted authorities, return to the General Land Office of the United States a list of all the lands sold as aforesaid, together with the dates of such sale, and the named of the purchasers, the patents shall be issued immediately thereafter, as directed in the foregoing section.

List of such sales to be returned

SEC. 2. *And be it further enacted*, That upon the proof, by the authorized agent of the State or States, before the Commissioner of the General Land Office, that any of the lands purchased were swamp lands within the true intent and meaning of the act aforesaid, the purchase money shall be paid over to the said State or States; and where the lands have been located by warrant or scrip, the said State or States shall be authorized to locate a quantity of like amount, upon any of the public lands subject to entry, at one dollar and a quarter per acre, or less, and patents shall issue therefor, upon the terms and conditions enumerated in the act aforesaid: *Provided, however*, That the said decisions of the Commissioner of the General Land Office shall be approved by the Secretary of the Interior.

Approved March 2, 1855.

Indemnity to the States when they lose swamp lands under this act.

AN ACT to confirm to the several States the swamp and overflowed lands selected under the act of September twenty-eight, eighteen hundred and fifty, and the act of the second March, eighteen hundred and forty-nine.

March 3, 1857, 11 Stat., p. 251, ch. cxvii.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the selection of swamp and overflowed lands granted to the several States by the act of Congress approved September twenty-eight, eighteen hundred and fifty, entitled "An act to enable the State of Arkansas and other States to reclaim the swamp lands within their limits," and the act of the second of March, eighteen hundred and forty-nine, entitled "An act to aid the State of Louisiana in draining the swamp lands therein," heretofore made and reported to the Commissioner of the General Land Office, so far as the same shall remain vacant and unappropriated, and not interfered with by an actual settlement under any existing law of the United States, be and the same are hereby confirmed, and shall be approved and patented to the said several States, in conformity with the provisions of the act aforesaid, as soon as may be practicable after the passage of this law: *Provided, however*, That nothing in this act contained shall interfere with the provisions of the act of Congress entitled "An act for the relief of purchasers and locators of swamp and overflowed lands," approved March the second, eighteen hundred and fifty-five, which shall be and is hereby continued in force, and extended to all entries and locations of lands claimed as swamp lands made since its passage.

Approved March 3, 1857.

CONSTRUCTION AND RULES AS TO INDEMNITY.

Swamp lands for which indemnity is claimed may be selected at any time.

The claim of the States for indemnity for swamp lands sold or located subsequent to September 28, 1850, and prior to March 3, 1857, is not barred by failure of said States to have selected the lands prior to March 3, 1857. See Attorney-General's opinion of April 20, 1866 (2 Lester, p. 382), adopted by the Department April 23, 1866.

Agent from G. L. O. must examine land before indemnity proof is made by State.

Under provisions of act of Congress approved March 2, 1855, as extended by act of March 3, 1857, indemnity proof must be taken by the State before an agent from the General Land Office, after the land for which indemnity is claimed shall have first been examined in the field by said agent. See Secretary's decision June 6, 1878 (5 Copp's L. O., p. 125.)

Rules and regulations adopted by the General Land Office, with the approval of the Secretary of the Interior, in regard to the proof required in claims for indemnity, under the act of March 2, 1855, extended by the act of March 3, 1857 (sections 2482, 2483, and 2484, Revised Statutes of the United States), "for swamp and overflowed lands" sold by the United States prior to March 3, 1857.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., August 12, 1878.

In order to dispose of the claims for indemnity provided for by the act of Congress approved March 2, 1855, entitled "An act for the relief of purchasers and locators of swamp and overflowed lands," which act was extended by the act of March 3, 1857 (as revised, now sections 2482, 2483, and 2484 of the Revised Statutes of the United States), the following rules and regulations in regard to the "due proof" to be made to the Commissioner of the General Land Office, under the second section of said first mentioned act (as revised, now section 2082, Revised Statutes of the United States), in order to obtain the indemnity aforesaid, are adopted:

The governor, or other duly authorized officer or agent, of the State claiming indemnity will be required to furnish this office with a list of the lands for which indemnity

is claimed. As soon as practicable after the receipt of this list an agent will be appointed to make an examination in the field of each of the tracts therein described, and secure such reliable information as to the character thereof as can be obtained from personal examination and observation, and by inquiry of the owner or resident thereon, if any there be, and of persons residing in the vicinity having personal knowledge of the past and present character of the land. Upon the completion of this examination at least thirty days' notice will be given the State, or claimants under the State, of the time and place when and where testimony will be received touching the character of the lands described in the lists filed in this office.

At the times and places thus fixed the agent of this office will attend for the purpose of examining witnesses and adopting such other measures as may be necessary to protect the interests of the Government.

The evidence offered by the State, or its agent, as to the character of the land, must be the testimony of at least two respectable and disinterested persons who have personal and exact knowledge of the condition of the land during a series of years extending to the date of the swamp grant (September 28, 1850).

Where the testimony of witnesses having a knowledge of the condition of the land at the date of the grant cannot be obtained, the evidence of at least two respectable and disinterested persons, who have a knowledge of the land during a series of years extending as near to the date of the grant as possible, may be presented; but before presenting this secondary evidence the State agent should file his own affidavit setting forth fully and satisfactorily the reasons for the failure to present the testimony of the first-mentioned class of witnesses, and also setting forth that the witnesses whose testimony he offers have the best knowledge of the land extending nearest to September 28, 1850, of any that can be obtained.

The testimony of each witness should not only show that at the time when he first knew the land the greater part of each forty-acre tract, or other smallest legal subdivision, was swamp or overflowed within the meaning of the grant, but it must be full and explicit on the following points:

The cause of the swampy character or overflow, with the time of the year and the length of time such was the condition of the land, and how much or what proportion of the tract was thus rendered unfit for cultivation in its natural condition;

The nature and extent of the means necessary to reclaim the land;

The kinds of timber, plants, shrubs, grasses, &c., growing on the land, and whether or not plowing and the removal of timber or other natural growth would not have caused the land to become dry enough for cultivation without ditching, draining, or protection from overflow;

The names of water-courses, lakes, &c., on or near the land, with a description of the size of the same, and, where not on the tract, the direction and distance from it;

The general character of the adjacent and surrounding lands;

The present condition of the land, and in case any changes have taken place within the knowledge of the witnesses the nature and cause of such changes, with a full description of such artificial means of reclamation as have had any effect on the character of the land, and all other facts known to the witnesses which may tend to show the true condition of the land.

The witnesses should be required to state facts, not opinions, and their testimony should be as full and complete and as to every fact within their knowledge as if it were needed to establish the character of the land to the satisfaction of a judge or jury.

Ex parte affidavits will not be considered, and all testimony must be taken in the presence of the agent of this office.

Depositions may be taken before any officer authorized by law to administer oaths; provided that if taken before an officer other than the clerk of a court of record having a seal, the official character of such offer shall be established by the certificate of the clerk of the proper court of record under the official seal thereof.

In all cases the disinterestedness of the witnesses must be established under oath, and the credibility of the witnesses must be certified to by the officer taking the depositions, or established by the oath of witnesses to whose credibility he certifies.

In cases where the agent of this office shall be satisfied, from the previous examination in the field, that any tract or tracts are of the character contemplated by the swamp grant, the testimony of two witnesses, as above mentioned, will be deemed sufficient proof; but in cases where said agent shall not be so satisfied from the previous examination in the field, he will take measures to secure such additional evidence as may be necessary to fully determine the character of the land, by obtaining the testimony of the owner or occupant of the land, or, if those persons have testified, other well-informed persons residing in the vicinity of the land, allowing the agent of the State full opportunity to cross-examine such witnesses should he desire to do so.

If the agent of this office shall be in doubt as to the amount of a particular tract which is swampy or overflowed, he will have a survey and plat made of the tract by a competent surveyor, in order that the exact amount of swampy or overflowed land in the tract may be shown.

After the testimony is taken the agent will make a full report to this office upon each of the tracts upon which testimony is taken, together with his opinion as to the real character of each of said tracts.

These regulations will supersede all former regulations; but cases where proof has heretofore been taken and filed in this office will be examined and determined upon such proof, if it is found to be in strict accordance with the regulations existing at the time of taking the same.

J. A. WILLIAMSON,
Commissioner.

DEPARTMENT OF THE INTERIOR,
August 20, 1878.

Approved.

A. BELL,
Acting Secretary.

In States where the field notes of survey govern in adjusting claims for lands under the act of 1850 said notes are the basis for adjusting claims for indemnity. (Secretary's decision of April 17, 1880.)

AN ACT to extend the provisions of "An act to enable the State of Arkansas and other States to reclaim the swamp lands within their limits" to Minnesota and Oregon, and for other purposes. 12 Stat., p. 3, act March 12, 1860, ch. v.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the provisions of the act of Congress entitled "An act to enable the State of Arkansas and other States to reclaim the swamp lands within their limits," approved September twenty-eight, eighteen hundred and fifty, be and the same are hereby extended to the States of Minnesota and Oregon: *Provided*, That the grant hereby made shall not include any lands which the Government of the United States may have reserved, sold, or disposed of (in pursuance of any law heretofore enacted) prior to the confirmation of title to be made under the authority of the said act. Provisions of act of 1850 extended to Minnesota and Oregon.

SEC. 2. *And be it further enacted*, That the selection to be made from lands already surveyed in each of the States, including Minnesota and Oregon, under the authority of the act aforesaid, and of the act to aid the State of Louisiana in draining the swamp lands therein, approved March second, one thousand eight hundred and forty-nine, shall be made within two years from the adjournment of the legislature of each State at its next session after the date of this act, and, as to all lands hereafter to be surveyed, within two years from such adjournment, at the next session, after notice by the Secretary of the Interior to the governor of the State that the surveys have been completed and confirmed. Selections under said act, and the act of 1849, when to be made.

Approved March 12, 1860.

Provisions of sec. 2 repealed as to all States except Minnesota and Oregon by enactment in Revised Statutes. See sec. 5596.

RULINGS.

The grant of swamp lands to the States of Oregon and Minnesota was a grant *in presenti*, and the land so granted cannot be otherwise disposed of by the Government. See Secretary's decisions, April 15, 1880. Crowley *vs.* State of Oregon (7 Copp's L. O., 28), and the State of Oregon *vs.* United States, June 4, 1880 (*id.*, 53). Swamp grant to Oregon and Minnesota a grant *in presenti*.

Status of lands within the meander lines of shallow bodies of water at date of survey that might have been temporarily overflowed considered. See Secretary's decision, December 2, 1874 (Copp's Land Laws, 475.) Shallow bodies of water.

CHAP. CCXIX.—AN ACT to quiet land titles in California. 14 Stat., p. 218, July 23, 1866.

* * * * * * * *

SEC. 4. *And be it further enacted*, That in all cases where township surveys have been, or shall hereafter be made under authority of the United States, and the plats thereof approved, it shall be the duty of the Commissioner of the General Land Office to certify over to the State of California, as swamp and overflowed, all the lands represented as such upon such approved plats, within one year from the passage of this act, or within one year from the return and approval of such township plats. Where township surveys have been made, and plats approved, swamp and overflowed lands to be certified to State within one year.

Segregation maps, &c., of swamp and overflowed land, made by State, to be examined, &c.

The Commissioner shall direct the United States surveyor-general for the State of California to examine the segregation maps and surveys of the swamp and overflowed lands made by said State, and where he shall find them to conform to the system of surveys adopted by the United States, he shall construct and approve township plats accordingly, and forward to the General Land Office for approval: *Provided*,

If found to conform to United States surveys.

That in segregating large bodies of land notoriously and obviously swamp and overflowed, it shall not be necessary to subdivide the same, but to run the exterior lines of such body of land. In case such State

If found not to conform.

surveys are found not to be in accordance with the system of United States surveys, and in such other townships as no survey has been made by the United States, the Commissioner shall direct the surveyor-general to make segregation surveys upon application to said surveyor-general by the governor of said State, within one year of said application, of all the swamp and overflowed land in such townships, and to report the same to the General Land Office, representing and describing what land was swamp and overflowed under the grant, according

If State claims, as swamp, &c., lands, any not so represented in map, character of land how to be determined.

to the best evidence he can obtain. If the authorities of said State shall claim as swamp and overflowed any land not represented as such upon the map or in the returns of the surveyors, the character of such land at the date of the grant, September twenty-eight, eighteen hundred and fifty, and the right to the same, shall be determined by testimony to be taken before the surveyor-general, who shall decide the same, subject to the approval of the Commissioner of the General Land Office.

List of lands selected and of swamp, &c., lands claimed by State to be sent to General Land Office.

SEC. 5. *And be it further enacted*, That it shall be the duty of the Commissioner of the General Land Office to instruct the officers of the local land offices, and the surveyor-general, immediately after the passage of this act, to forward lists of all selections made by the State referred to in section one of this act, and lists and maps of all swamp and overflowed lands claimed by said State or surveyed as provided in this act, for final disposition and determination, which final disposition shall be made by the Commissioner of the General Land Office without delay.

Act March 5, 1872, 17 Stat., p. 37, ch. xxxix.

AN ACT for the relief of Lucas, O'Brien, Dickinson, and other counties in the State of Iowa.

Selections of swamp lands in certain counties in Iowa to be received, &c.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Commissioner of the General Land Office is hereby authorized and required to receive, and examine the selections of swamp-lands in Lucas, O'Brien, and Dickinson and such other counties in the State of Iowa, as formerly presented their selections to the surveyor-general of the district including that State, and allow or disallow said selections, and indemnity provided for according to the acts of Congress in force touching the same at the time such selections were made, without prejudice to legal entries or the rights of *bona fide* settlers under the homestead and pre-emption laws of the United States prior to the date of this act.

Approved March 3, 1872.

Act December 27, 1872, 17 Stat., p. 494, ch. xvii.

AN ACT to quiet the title to certain lands in the State of Missouri.

Whereas by an act of the Congress of the United States, approved on the twenty-eighth day of September, eighteen hundred and fifty, the State of Missouri, with other States, acquired title to all swamp and overflowed lands within their limits; that the State of Missouri, by an act of its general assembly, approved February twenty-third, eighteen hundred and fifty-three, passed the title thus acquired to the several counties in which said lands were situated, for the purpose and to the end that the same should be drained and reclaimed as provided by said act of Congress; and that after the donation as aforesaid, a commissioner was appointed, charged with the duty to select and locate such swamp-lands, who did make such selections and locations in said county of Scott and State of Missouri, making due report of the same, which report was, by proper authority, approved, and the lands so located patented by the Government of the United States to the State of Missouri, and on the twenty-ninth day of April, eighteen hundred and seventy, by said State to said county of Scott; and whereas said commissioner, in his report, described other lands situated in said county as unsurveyed swamp lands, and that in the year eighteen hun-

dred and sixty said lands were ordered to be surveyed by the General Government, which survey was approved by the surveyor-general of Missouri on the second day of July, eighteen hundred and sixty-one; and that by act of Congress approved March the twelfth, eighteen hundred and sixty, said county was given two years in which to present its claim and make proof to its title to said lands, which could not be done, owing to the existence of civil war then afflicting the people of said county; and whereas said county, believing further time would be given to make said claim and proof, did sell to actual settlers the greater portion of said lands, which purchasers, relying on said title, have made, in many instances, permanent and valuable improvements: Therefore,

Certain swamp, &c., lands granted to Scott County, Missouri.

Be it enacted by the Senate and House of Representatives of the United States in Congress assembled, That the lands above referred to be, and the same are hereby, granted to the county of Scott, in the State of Missouri, which lands, in the aggregate, amount to four thousand four hundred and ten and seventy-one hundreths acres, and described as follows: Parts of sections one, two, three, eleven, twelve, thirteen, twenty-four, and twenty-five, all in township number twenty-seven, range 12: *Provided*, That nothing in this act shall prejudice the rights of any homestead or other entry made, by any person whatsoever, under the laws of the United States on said lands.

Existing rights not affected.

Approved December 27, 1872.

AN ACT authorizing and requiring the issuance of a patent for certain lands to the county of Scott, in the State of Missouri.

18 Stat., p. 282, act June 23, 1874, ch. 484.

Whereas, by the act of Congress of the United States entitled "An act to quiet the title to certain lands in the State of Missouri," approved December twenty-seventh, eighteen hundred and seventy-two, certain lands therein mentioned were granted to the county of Scott, in the State of Missouri, which were not specifically described; and

Whereas, no provision for the issuance of a patent for said lands was made in said act: Therefore,

Patent to issue to Scott County, Missouri, for certain lands.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall be the duty of the Commissioner of the General Land Office to cause a patent to be issued to said county of Scott, in the State of Missouri, for all the lands included in that portion of township numbered twenty-seven north of range twelve east, of the fifth principal meridian lying east of Little River, as the same appears on the plat of survey on file in the General Land Office: *Provided*, That nothing in this act shall prejudice the rights of any person claiming any of said lands by virtue of any homestead, pre-emption, or other entry made under the laws of the United States.

Not to prejudice rights of homestead, pre-emption, or other claimants.

Approved June 23, 1874.

AN ACT for the relief of actual settlers on lands claimed to be swamp and overflowed lands in the State of Missouri.

19 Stat., p. 334, ch. 99.

Purchasers of lands in Missouri as swamp lands to have priority to pre-empt or homestead, if land not in fact swamp.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in all cases in the State of Missouri where lands have heretofore been selected and claimed as swamp and overflowed lands by said State, and the various counties therein, by virtue of any act of Congress, and said lands have been withheld from market in consequence thereof by the General Government, and the said State and counties have sold said lands to actual settlers, and said settlers have improved the same to the value of one hundred dollars; said settlers, their heirs, assigns, and legal representatives, who have continued to reside thereon, shall have priority of right to pre-empt or homestead all such lands as may be rejected by the United States as not being in fact swamp and overflowed lands; and it shall be the duty of the Secretary of the Interior to make such rules and regulations as may be necessary to carry into effect the provisions of this act: *Provided*, That nothing herein contained shall prejudice the rights of any person who may have made actual settlement upon such lands under the pre-emption or homestead laws prior to the passage of this act.

Approved February 23, 1875.

CIRCULAR IN RELATION TO PROOF REQUIRED TO OBTAIN RELIEF FOR ACTUAL SETTLERS UPON REJECTED SWAMP LANDS IN THE STATE OF MISSOURI.

DEPARTMENT OF THE INTERIOR,
General Land Office, March 23, 1875.

GENTLEMEN: Annexed is an act of Congress approved February 23, 1875, "for the relief of actual settlers on lands claimed to be swamp and overflowed lands in the State of Missouri."

In order to enable persons entitled thereto to avail themselves of the provisions of this act the following regulations are prescribed, with the approval of the Secretary of the Interior.

In addition to compliance with existing regulations governing entries under the pre-emption and homestead laws, claimants must establish the following facts:

1st. That the land was duly selected as swamp land and withheld from market in consequence of such selection.

2d. Purchase in good faith from the State or county, with settlement upon, and improvement of the land, to the value of one hundred dollars.

3d. That the purchaser from the State or county, or his heirs, assigns, or legal representatives, has continued to reside thereon.

4th. That the claim of the State under the swamp land grant has been rejected for the reason that the land was not in fact swamp and overflowed.

All pre-emption settlements and homestead entries made prior to February 23, 1875, where the requirements of law have been fully complied with, will take precedence of claims presented under this act.

S. S. BURDETT.
Commissioner.

REGISTERS and RECEIVERS *of U. S. Land Offices in the State of Missouri.*

Approved:

C. DELANO,
Secretary.

19 Stat., p. 395, act March 3, 1877, ch. 116,

AN ACT granting to the State of Missouri all lands therein selected as swamp and overflowed lands.

Swamp and overflowed lands to Missouri.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all lands in the State of Missouri selected as swamp and overflowed lands, and regularly reported as such to the General Land Office, and now withheld from market as such, so far as the same remain vacant and unappropriated and not interfered with by any pre-emption, homestead, or other claim under any law of the United States, and the claim whereto has not been heretofore rejected by the Commissioner of the General Land Office, or other competent authority, be, and the same are hereby, confirmed to said State, and all title thereto vested in said State; and it is hereby made the duty of the Secretary of the Interior to cause patents to issue for the same.

Patents to issue.

Approved March 3, 1877.

[PUBLIC—No. 97.]

21 Stat., p. 171, chap. 171.

AN ACT to confirm certain entries and warrant locations in the former Palatka military reservation in Florida.

Homestead entries of confirmed swamp-land selections in Palatka military reservation in Florida confirmed.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in all cases in which lands lying within the limits of the former Palatka military reservation in Florida have been entered by settlers under the homestead laws, and their entries are found to conflict with selections by the State of Florida under the grant of swamp lands by act of Congress of September twenty-eighth, eighteen hundred and fifty, which are confirmed by the act of March third, eighteen hundred and fifty-seven, and in which said settlers have in good faith complied with the requirements of the homestead laws, their entries be, and the same are hereby, confirmed, on the State filing with the Commissioner of the General Land Office its relinquishment of all claim thereto; and the State shall thereupon be entitled to select in lieu thereof an equal quantity of land from any of the vacant and unappropriated public lands of the United States in Florida, and patents shall be issued to the State for the lands so selected in lieu of the tracts taken by the settlers.

Other lands to be patented to the State.

SEC. 2. That in all cases in which lands lying within said reservation have been entered at private entry or located by military land-warrants, and which conflict with said selections, the same are also hereby confirmed on the State relinquishing all claim thereto, and the State shall thereupon be entitled to indemnity in the same manner as indicated in the first section of this act. Approved June 9, 1880.

Cash entries and warrant locations also confirmed and indemnity allowed the State.

EDUCATIONAL LAND GRANTS BY THE UNITED STATES TO PUBLIC-LAND AND OTHER STATES.

TO JUNE 30, 1882 AND 1883.

[See Chapter XIII, pages 223 to 231, and 1249.]

For changes in the areas as set out in the above chapter to June 30, 1883, see page 1249.

IMPORTANT CHANGE IN THE AGRICULTURAL COLLEGE LAW.

The following act, approved March 3, 1883, materially changed the acts of July 2, 1862, and the amendatory acts:

[PUBLIC—No. 53.]

AN ACT to amend an act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the fourth section of the act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts, approved July second, eighteen hundred and sixty-two, be, and the same is hereby, amended so as to read as follows:

"SEC. 4. That all moneys derived from the sale of lands aforesaid by the States to which the lands are apportioned, and from the sales of land-scrip hereinbefore provided for, shall be invested in stocks of the United States or of the States, or some other safe stocks; or the same may be invested by the States having no State stocks, in any other manner after the legislatures of such States shall have assented thereto, and engaged that such funds shall yield not less than five per centum upon the amount so invested and that the principal thereof shall forever remain unimpaired: *Provided,* That the moneys so invested or loaned shall constitute a perpetual fund, the capital of which shall remain forever undiminished (except so far as may provided in section five of this act), and the interest of which shall be inviolably appropriated, by each State which may take and claim the benefit of this act, to the endowment, support, and maintenance of at least one college where the leading object shall be without excluding other scientific and classical studies, and including military tactics, to teach such

branches of learning as are related to agriculture and the mechanic arts, in such manner as the legislatures of the States may respectively prescribe, in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions in life."

Approved, March 3, 1883.

AGRICULTURAL COLLEGE SCRIP.

[Official: General Land Office.]

* * * * * * *

This scrip may be used—

First. In the location of land at "*private entry*," but when so used is only applicable to lands not mineral which may be subject to private entry at $1.25 per acre, and is restricted to a technical "*quarter section*"—that is, land embraced by the quarter section lines indicated on the official plats of survey; or it may located on a *part* of a "quarter section," where such part is taken as in full for a quarter; but it cannot be applied to different subdivisions to make an area equivalent to a quarter section. The manner of proceeding to acquire title with this class of paper is the same as in cash and warrant cases, the fees to be paid being the same as on warrants. The location of this scrip at private entry is restricted to *three* sections in *each township* of land, and *one million acres* in *any one State*.

Second. In payment of pre-emption claims, in the manner and under the same rules and regulations as govern the pre-emption of military land warrants; this, too, without regard to the limitation as to the quantity located in the township or in any State.

Third. In payment for homesteads commuted under section 2301 of the Revised Statutes of the United States. * * *

FORMS USED AND PROCEDURE IN DISTRICT LAND OFFICE.

In pre-emption entries or commutation of homesteads, proving up, agricultural-college scrip can be used in place of cash; when so used, the forms used in chapter X, addenda "Pre-emptions", are used, with the addition of an "excess receipt by the receiver," if any there be, and a "certificate of location," signed by register and receiver.

In cash entries on offered land, when a person buys the land outright without settlement, the scrip is used in lieu of cash (see "Existing methods of disposition," chapter XXXII, and addenda).

LAND BOUNTIES FOR MILITARY AND NAVAL SERVICES.

[See Chapter XIV, pages 232 to 237, and 1250.]

TO JUNE 30, 1882.

The grants for military and naval land bounties from the origin of these laws to June 30, 1882, amount to 61,058,110 acres, as follows:

Statement under acts of 1847, 1850, 1852, *and* 1855 *showing the issues and locations from the commencement of operations under said acts to June* 30, 1882.

Outstanding warrants June 30, 1882, 21,568, embracing 2,454,340 acres.

CIRCULAR RESPECTING THE LOCATION AND ASSIGNMENT OF BOUNTY LAND WARRANTS.

IN EFFECT, DECEMBER 1, 1883.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
July 20, 1875.

TO REGISTERS AND RECEIVERS OF THE UNITED STATES LAND OFFICES:

GENTLEMEN: Section 2414 of the Revised Statutes of the United States, which statutes embrace all laws, general and permanent in their nature, in force on the 1st day of December, 1873, provides that "All warrants for military bounty lands which have been or may hereafter be issued under any law of the United States, and all valid locations of the same which have been or may hereafter be made, are declared to be assignable by deed or instrument of writing, made and executed according to such form and pursuant to such regulations as may be prescribed by the Commissioner of the General Land Office, so as to vest the assignee with all the rights of the original owner of the warrant or location."

Under the authority conferred by the said section, the following *compilation* of rules and regulations governing the assignment of bounty-land warrants is prepared for the guidance of registers and receivers of district offices in ascertaining the title to such warrants when the same are presented in payment of entries of public lands, and for the information of all concerned.

To avoid, as far as possible, complications of land titles arising in consequence of the location of fraudulent or imperfectly assigned warrants, registers and receivers *are peremptorily enjoined to refuse all warrants* presented when the assignments thereof do not accord in every *essential particular* with the rules herein prescribed; and in all cases *when the question of title is in doubt* they must decline to receive the warrants until the holders thereof have submitted the *same to this office* for examination, and have obtained a favorable decision thereon.

I.—OF ASSIGNMENTS.

1. No assignment of a warrant executed *prior to the date of the issue thereof* can be recognized by this office.—Revised Statutes, section 2436.

2. The assignment is required to be *indorsed*, as far as practicable, upon the warrant transferred. Should it be found unecessary in any case to write the entire assignment on a separate paper, *which can only occur when prior assignments have filled entirely the blank space on the warrant*, it must be *so* attached as to show unmistakably that the warrant assigned was in the hands of the party making the transfer. In such cases the signature of the assignor must be affixed in the presence of the officer before whom it is acknowledged, who must certify that at the date of the assignment the warrant was presented by and in possession of the assignor. (See Form No. 5.)

3. The same requirement must be observed in the preparation and acknowledgment of powers of attorney *to sell or l ocate* bounty-land warrants.

4. Blank assignments are *void*, and will not be recognized by this office. The name of an assignee should be written in the assignment before the warrant is sent to the *local or General* Land Office.

5. Each assignment must be attested by *two subscribing witnesses;* the *mark* of a *witness* will not be respected.

6. Parties in interest as assignees are not recognized as legal attesting witnesses to an asignment; neither can an officer take an acknowledgment of an assignment to himself.

7. The execution of assignments is required to be *acknowledged* by the assignor, in the presence of a register or receiver of a land office, a judge or clerk of a court of record—when authorized to take acknowledgments—a notary public, justice of the peace, a commissioner of deeds resident in the State from which he derives his appointment, or a commissioner of a circuit court of the United States, who shall certify to the fact of the acknowledgment, and to the identity of the assignor; and the *official seal* of said court, notary public, or commissioner shall be affixed to the certificate. When the acknowledgment is taken before a justice of the peace, or other officer *without an official seal* (except a register or receiver of a land office), it must be accompanied by an additional certificate, under seal of the proper authority, establishing the *official character* of the person before whom the acknowledgment was made and the *genuineness of his signature.* (See Form No. 15.)

Powers of attorney must be acknowledged in like manner.

8. Assignments executed by *unmarried females* must be accompanied by evidence that they have attained the age of twenty-one years; and when married women assign, their husbands must unite with them in making the transfer.

9. Assignments executed by a commissioner, or other designated person, alleged to be acting under a decree of court, must be accompanied by a duly certified copy of such decree, in which all the proceedings had in the case should be recited, and from which it must appear that due notice of the pending suit had been given, by publication or otherwise, to all the parties interested.

10. Where *two* assignments exist, executed by the same party but made in favor of different individuals, the person first named as assignee must execute a transfer in favor of the second grantee, whether the assignment to him had been completed or not.

11. When the name of a person has been *inadvertently* inserted in an assignment of a warrant, and *erased* therefrom, there should be filed an affidavit, duly authenticated, from such person, stating that his name had been *erroneously* written in said transfer, and erased with his *knowledge and consent*, and that he claims *no right or interest* in the warrant; when such person cannot be found, the title of the party whose name has been written over the erasure will not be respected by this office until the validity thereof has been satisfactorily affirmed by a court of competent jurisdiction. When the name of a *bona fide assignee* has been erased from a transfer, an assignment from said assignee to the present holder of the warrant will be required to perfect the chain of title to the warrant.

12. When the assignment of a warrant is executed in a foreign country, and the acknowledgment thereof taken by an officer authorized by the laws thereof to perform such duties, the attestation of the American consul in such country should be obtained as to the official character and genuineness of the signature of the person before whom the acknowledgment of the said assignment was made; or if the official character, &c., of such foreign magistrate is attested by a consular agent of such foreign government residing in this country, his official character must be certified by the diplomatic representative of such Government in the United States. When such assignments are executed in a foreign language, duly authenticated translations thereof must be furnished. Secretaries of legation and consular officers of the United States are authorized to take acknowledgments, but they must certify the same under their *official seals.*

13. When the persons named as warrantees are described in the warrant as being

minors, their assignments thereof must be accompanied by satisfactory evidence that they had attained their majority at the date of the transfer.

14. When an assignment has been *executed* and *witnessed*, but not acknowledged, it may be proved in open court, but a certified transcript of the proceedings in the case must be attached to the warrant; when, however, such assignment has not been *properly attested*, it must be made *anew*.

15. When an assignment is made by an Indian residing among the whites, the prescribed form will be adopted, with this single addition, that the officer taking the acknowledgment shall certify that the Indian is capable of contracting, also the amount paid to him for the warrant, and that he saw the same paid to the Indian.

16. Where it is made by an Indian holding tribal relations, his identity and ability to contract must be certified by the superintendent of Indian Affairs, or Indian agent, either of his own knowledge, or on the testimony of the chiefs, certifying to the amount paid for said warrant, that the same was paid in his presence, and that the transaction was fair and regular. In either case, if the amount paid is not a fair consideration, the assignment will be disregarded.

17. Where a warrant for the services of an Indian is issued, or descends to minors who no longer retain their tribal relations, it must be located or sold by a guardian duly appointed and authorized by the proper court for that purpose.

Where the minor or minors retain there tribal relations, the agent or superintendent must certify that they are entitled to the warrant under the laws, usages, and customs of the tribe; and when sold or located, that it was done by the guardian or such proper representative as, according to said laws, usages, and customs, was fully authorized.

In all cases where the signature of the superintendent or Indian agent is herein required, the genuineness of the signature of that officer must be attested by the Commissioner of Indian Affairs.

18. Prior to June 3, 1858, military land warrants were regarded as *real estate*, consequently a transfer of such warrant before that date by an *administrator;* must be accompanied by evidence that the same was made in pursuance of an order of court for the sale of the real estate of the decedent.

But by the act of June 3, 1858, which was re-enacted by section 2444 of the Revised Statutes, bounty-land warrants were declared to be *personal chateles*, and as such to be assignable by the warrantees, by their widows in certain cases, by their heirs or devisees, or by the *legal representatives* of the deceased claimant, "for the use of the heirs or legatees only."

It follows that the right to assign inures to the assignees of the vendors named above, and to their heirs, devisees, or legal representatives; but these latter are *not* required to assign "for the use of the heirs only."

19. Where a warrant has been issued in the name of a deceased soldier who had applied therefor before his death, the title thereto is declared by the said section 2444, Revised Statutes, to vest in the *widow*, if there be one, and if there be no widow, then in the *heirs or legatees* of the claimant.

20. If the claimant died and left a widow, who also was deceased before the issue of the warrant, then the title thereto vests in heirs or legatees of the warrantee.

21. To make a warrant issued in the name of a deceased person available, it should be accompanied by a certificate, under seal, from the proper court having probate jurisdiction, showing the fact of the death of the warrantee at a *specified date*, and stating whether he left a *widow*, giving her name if there was one. If there was no widow, the said certificate should state whether the warrantee died testate or intestate, and give the names of all his heirs-at-law, specifying such as are *adults* and such as are *minors*.

22. If it shall appear from such certificate that the warrantee died *before* the issue of the warrant and left a *widow*, the assignment of such widow, *her* heirs or legal representatives, will be regarded as a sufficient conveyance of the title to the warrant.

23. If the warrantee died *after* the issue of the warrant, or if he died *before* such issue and left no *widow*, the title vests in his heirs-at-law or legatees.

24. If he died *intestate*, his heirs, shown to be such by the required certificate of court, may assign the warrant, the adults for themselves, and the minors by their guardians, who shall file with the warrant a certified copy of their letters of guardianship, or a certificate from the clerk of the proper court stating that such letters had been issued and that they were in force at the date of the assignment.

Or the administrator of the estate of the *deceased warrantee*, who died intestate, may assign the warrant "*for the use of the heirs only*," upon filing therewith a certified transcript of the letters of administration, or a certificate from the clerk of the proper court that the said letters had been issued, and that they were in force at the date of the assignment. (See Form No. 6.)

25. If the warrantee died *testate*, a certified transcript of the will must accompany the warrant. If the will *specifically* disposes of the warrant, the devisee or devisees may assign, if adults, in the usual form; if minors, by their guardians, as aforesaid. If the will does not *specifically* dispose of the warrant, the executor of the estate of the warrantee

may assign "*for the use of the heirs or legatees only;*" but in that case a certified transcript of the letters testamentary, or a certificate from the proper authority that such letters had been granted, and were in force at the date of the assignment, must accompany the transfer. (See Form No. 8.)

26. An assignment executed by an *administrator de bonis non with the will annexed* of the estate of the deceased warrantee must be prepared in accordance with the Form No. 8 prescribed to be used by an executor, and accompanied by evidence of his authority to act, as required in the case of an administrator of the estate of a warrantee who had died intestate.

II.—AS TO LOCATIONS.

27. Military bounty-land warrants may be located upon any vacant public lands of the United States that are subject to sale at *private entry*, and they may be used in payment of pre-emption claims, or in commutation of homestead entries, even when the same embraced *unoffered lands*.

28. A warrant issued to several parties, or assigned to three or more persons, cannot be located if assigned by one of the owners to another, or to other persons, so as to invest any one of the parties with a greater interest than any other. In other words, each owner of a warrant, at the time of its location, must have an *equal* share or interest therein.

29. A warrant may be located either at a district land office, or through the agency of this office (Revised Statutes, section 2437). If located at a district office, it must be accompanied by a tender of the fees to which the register and receiver are entitled, and by a written application to locate, containing a description of the tracts desired, and signed by the locator or his attorney in fact. If by the latter, his authority to act must be evidenced by a power of attorney, which must be prepared in accordance with Form No. 14, and indorsed, if practicable upon the warrant. (See Rule No. 2.)

30. If the location is made through *this office*, the warrant must be sent to the Commissioner with a request that the same be located in a specified land district, and accompanied by a receipt from the register and receiver for the fees to which they may be severally entitled under section 2238, Revised Statutes.

31. Each warrant is required to be distinctly and separately located upon a *compact* body of land; and if the area of the tract claimed should exceed the number of acres called for in the warrant, the locator must pay for the excess in cash; but if it should fall short, he must take the tract in full satisfaction for his warrant. A person cannot enter a *body of land* with a number of warrants without specifying the particular tract or tracts to which each shall be applied; and for each warrant there must be a distinct location, certificate, and patent.

32. Where the desired tract is subject to entry at a greater minimum than $1.25 per acre, the locator, in addition to the surrendered warrant, must pay in cash the difference between the value of such warrant at $1.25 per acre and that of the said land; or present a warrant of such denomination as will, at its legal value of $1.25 per acre, cover the rated price of the tract, and pay the excess in value of the land, if any, in cash. For example: A tract of 40 acres of land held at $2.50 per acre may be entered by the location of a warrant calling for 40 acres and the payment of $50 in cash; or by locating thereon a warrant for 80 acres, the 40 acres embraced in the entry being received in full satisfaction of the same; or, a tract containing 80 acres rated at $2.50 per acre may be entered by the location of *two* 80-acre warrants, or of *one* for 160 acres, and so on. It will be required, however, in the entry of a tract held at a greater minimum than $1.25 per acre, by the location of *two or more* warrants, that *each warrant* shall be located upon a *specific legal subdivision thereof*, which legal subdivision shall be received in full satisfaction of the warrant surrendered therefor; and that the excess in value of the lands, if any there be, shall in each case be paid in cash. Hence, a tract containing 40 acres or less, of double minimum lands, cannot be entered by the location of *two* 40-*acre warrants*.

33. A pre-emptor of lands held at $1.25 per acre may enter the tract embraced in his claim by the location of one, two, or more warrants; but each warrant must be applied to a specific subdivision thereof; that is, a warrant for 40 acres must be located upon a described subdivision containing as nearly as possible 40 acres of land; a warrant for 80 acres upon a tract embracing 80 acres, and so on. Where the pre-emption claim is composed of lands subject to entry at a greater minimum than $1.25 per acre the rules set forth in the preceding section will apply.

34. When a subdivision is fractional, a warrant approximating nearest the number of acres embraced therein may be located thereon, but the fractional excess in area must be paid for with cash, and will be conveyed in the same patent with the lands covered by the location of the warrant; a *legal subdivision*, however, other than those entered by the location of the warrant, will not be regarded as a legitimate fractional excess over such location, but will be required to constitute a *separate entry*. Thus a person will not be permitted to make *one entry* of a quarter section of land by the location of a warrant for 120 acres and a cash payment for the remaining subdivision.

35. Registers and receivers of the local land offices are entitled to the following fees for their services in locating warrants, and the several amounts mentioned must be paid *at the time of location:*

For a 40-acre warrant, $0.50 each to the register and receiver; total, $1.
For a 60-acre warrant, $0.75 each to the register and receiver; total, $1.50.
For an 80-acre warrant, $1 each to the register and receiver; total, $2.
For a 120-acre warrant, $1.50 each to the register and receiver; total, $3.
For a 160-acre warrant, $2 each to the register and receiver; total, $4.

36. In all cases the patent will be transmitted to the local office where the location was made, for delivery by the register, unless the duplicate certificate of location shall have been previously filed in this office with a request that the patent be delivered as requested by the person sending the same; and in no case will the patent be delivered, either by this or the local land office, unless upon receipt of the duplicate certificate of location, or of an affidavit of ownership of the lands conveyed by the patent, and of the loss or destruction of the said duplicate certificate.

III.—MISCELLANEOUS PROVISIONS.

37. Bounty-land warrants for military services, granted under general laws, are issued only by the *Commissioner of Pensions;* and persons supposing themselves entitled to such warrants should address their applications therefor to that officer.

38. Neither bounty-land warrants nor the lands entered therewith are liable to be sold or made subject to the payment of any debt or claim incurred *by the warrantees* until after the issue of the patent. (Revised Statutes, section 2436.)

39. Warrants that may have been *reissued* under the provisions of Revised Statutes, section 2441, are subject to the same rules respecting assignments that apply to original warrants; but, in default of an assignment from the warrantee, a decree of title must be obtained from a court of competent jurisdiction, and a transcript thereof appended to the reissued warrant.

40. When an entry, made by the location of a warrant *properly assigned to the locator*, has been canceled, the warrant will be returned, with a certificate attached thereto authorizing its *relocation* by the said locator or his assignees, without a further payment of location fees. In no case, however, will such a certificate be attached to a warrant the assignments whereof are not such as would receive the approval of this office if presented for that purpose.

41. When a valid entry is withheld from patent on account of the objectionable character of the warrant located thereon, the parties in interest may procure the issue of a patent by filing in the office for the district in which the lands are situate an acceptable substitute for the said warrant. The substitution must be made in the name of *the original locator*, and may consist of a *warrant, cash, or any kind of script legally applicable* to the class of lands embraced in the entry. *Two* warrants cannot be substituted for the *one* originally located, nor will any payment be received that would destroy *the identity* of the entry.

42. A *five-cent internal-revenue stamp* is required to be affixed to each *assignment and certificate*—excepting certificates of acknowledgment—and a *fifty-cent* stamp to each *power of attorney* executed and issued *after* October 1, 1862, and *prior* to October 1, 1872.

43. Each warrant transmitted to this office for the purpose of obtaining the Commissioner's official approval of the assignments thereof must be accompanied by the sum of *one dollar*, the legal fee for a certificate of verification; and each assignment indorsed upon or attached to such warrant must contain the *name of an assignee.*

If a certificate of approval should be attached to the warrant, a blank form of assignment will accompany the same, which may be used in making a subsequent transfer.

S. S. BURDETT,
Commissioner.

FORM No. 1.

For the assignment of a warrant by the warrantee.

For value received I, A B, to whom the within warrant, No. ——, was issued, do hereby sell and assign unto C D, of ——— county, ———, and to his heirs and assignees forever, the said warrant, and authorize him to locate the same and receive a patent therefor.

Witness my hand and seal this —— day of ———, 187—.

A B. [SEAL.]

Attest:
E F.
G H.

See Rules Nos. 2 and 5.

FORM No. 2.

Of acknowledgment where the vendor is known to the officer taking the same.

STATE OF ———,
——— *County, ss:*

On this —— day of ———, 187—, before me, personally came A B, to me well known, and acknowledged the foregoing assignment to be his act and deed, and I certify that said A B is the identical person to whom the within warrant issued, and who executed the foregoing assignment thereof.

(*Officer's signature.*)

See Rule No. 7.

FORM No. 3.

Of acknowledgment where the vendor is not known to the officer, and his identity has to be proven.

STATE OF ———,
——— *County, ss:*

On this —— day of ———, 187—, before me personally came A B and E F, of the county of ———, in the State of ———, and the said E F, being well known to me as a credible and disinterested person, was duly sworn by me, and on his oath declared and said that he well knows the said A B, and that he is the same person to whom the within warrant issued, and who executed the foregoing assignment; and his testimony being satisfactory evidence to me of that fact, the said A B thereupon acknowledged the said assignment to be his act and deed.

(*Officer's signature.*)

FORM No. 4.

For the assignment of a warrant by the assignee.

For value received I, C D, to whom the within warrant, No. ——, was assigned, do hereby sell and assign unto E F, of ——— county, ———, and to his heirs and assigns forever, the said warrant, and authorize him to locate the same and receive a patent therefor.

Witness my hand and seal this —— day of ———, 187—.

C D. [SEAL.]

Attest:
G H.
I J.

See Rules Nos. 2 and 5.

FORM No. 5.

For the certificate of acknowledgment of an assignment when the same is written on a separate paper and attached to the warrant.

STATE OF ———,
——— *County, ss:*

On this —— day of ———, 187—, before me personally came ———, to me well known, and acknowledged the foregoing assignment to be —— act and deed, and in my presence this day subscribed —— name thereto; and I certify that the said ——— is the identical person to whom the annexed warrant, No. ——, was assigned, and that the said warrant, at the time of making the foregoing assignment, was presented by and in the possession of him, the said ———.

———. [SEAL.]

See Rules Nos. 2 and 7.

FORM No. 6.

For the assignment of a warant by an administrator.

For value received I, A B, administrator of the estate of C D, deceased, who died intestate, to whom the within warrant, No. ——, was issued, do hereby sell and assign, "for the use of the heirs only," unto E F, of ——— county, ———, and to his heirs and assigns forever, the said warrant, and authorize him to locate the same and receive a patent therefor.

Witness my hand and seal this —— day of ———, 187—.

A B, [SEAL.]
Administrator.

Attest:
G H.
I J.

See Rule No. 24.

NOTE.—A certified copy of these letters of administration must accompany this assignment, or a certificate filed from the clerk of the proper court that said letters had been duly issued and *were in force at the date of the assignment.*

If the *date* of the death of the warrantee is not stated in the letters of administration, or other evidence as above mentioned, the same *must* appear in the *clerk's certificate* appended thereto.

FORM No. 7.

For the acknowledgment.

STATE OF ———,
——— *County, ss:*

On this —— day of ———, 187—, before me personally came ——— ———, to me well known, and acknowledged the foregoing assignment to be —— act and deed, and in my presence subscribed —— name thereto; and I certify that the said —— is administrator of the estate of the warrantee ——, deceased, to whom the within warrant, No. ——, was issued, and who executed the foregoing assignment thereof.

Witness my hand and official seal the day and year above written.

(*Officer's Signature.*)

NOTE—In assignments made by an administrator of the estate of a deceased *assignee* the words "*for the use of the heirs only*" may be omitted, but in all other respects the foregoing form of assignment and acknowledgment will be required.

FORM No. 8.

For the assignment of a warrant by an executor.

For value received I, A B, executor of the estate of C D, deceased, who died testate, to whom the within warrant, No. ——, was issued, do hereby sell and assign ("*for the use of the heirs only,*" " or *for the use of the legatees as mentioned in the will,*" as the case may be), unto E F, of ——— county, State of ———, and to his heirs and assigns forever, the said warrant, and authorize him to locate the same and receive a patent therefor.

Witness my hand and seal this —— day of ———, 187—.

A B, [SEAL.]
Executor.

Attest:
G H.
I J.

(See Rule No. 25.)

NOTE—A certified copy of the *will*, and also of the *letters testamentary* or other proper evidence, under the seal of said court, showing that said executor was duly appointed and authorized to act as such *at the date of said assignment*, must accompany the same.

If the date of the death of the warrantee is not stated in the *letters testamentary or other* evidence, as above mentioned, it must appear in the *certificate of the clerk* appended thereto, as taken from the records of said court. The certificate of the acknowledgment may be the same as in Form No. 7, except that the word "*executor*" must be used instead of "*administrator.*"

FORM No. 9.

For the assignment and acknowledgment of a warrant by the heirs at law of a deceased warrantee.

For value received we, A B, C D, and E F, the only heirs at law of G H, deceased, to whom the within warrant, No. ——, was issued, do sell and assign unto I J, of, ——— county, State of ———, and to his heirs and assigns forever, the said warrant, and authorize him to locate the same and receive a patent therefor.

Witness our hands and seals this —— day of ———, 187—.

——— ———. [SEAL.]
——— ———. [SEAL.]
——— ———. [SEAL.]

Attest:
K L.
M N.

(See Rule No. 24.)

FORM No. 10.

For the acknowledgment.

STATE OF ———,
——— *County, ss:*

On this —— day of ———, 187—, before me personally came A B, C D, and E F, to me well known, and acknowledged the foregoing assignment to be their act and

deed, and I certify that the said A B, C D, and E F are the identical persons named in the attached certificate * as the only heirs at law of said warrantee, deceased, and who executed the foregoing assignment thereof.

Witness my hand and official seal the day and year above written.

(*Officer's signature.*)

NOTE.—For the evidence of the *death and heirship* above mentioned it will be necessary to procure and attach a certificate, under seal, from a *court* having probate jurisdiction, showing that it has been proven to the satisfaction of said *court*, in *open* court, that said warrantee, E H, is dead, the *date* of his *death*, whether he died testate or intestate; whether or not he left a *widow*, and who are his heirs and *only* heirs at law, with their respective ages. If any of such heirs are *femme coverts*, their husbands must join in the assignment. ☞ This rule will apply *to all* assignments made by married women.

FORM NO. 11.

For the assignment of a warrant by a guardian.

For value received I, A B, guardian of the person and estate of C D, a minor warrantee, to whom the within warrant, No. ———, was issued (or "*a minor heir at law, as mentioned in the attached certificate*—see the note following *Form No.* 10), do hereby sell and assign, *for the benefit of said minor*, unto E F, of the county of ———, State of ———, and to his heirs and assigns forever, the said warrant, and authorize him to locate the same and receive a patent therefor.

Witness my hand and seal this —— day of ———, 187—.

——— ———, [SEAL.]
Guardian.

Attest:
G H.
I J.
(See Rule No. 24.)

FORM NO. 12.

For the acknowledgment.

STATE OF ———,
——— *County, ss:*

On this —— day of ———, 187—, before me personally came ——— ———, to me well known, and acknowledged the foregoing assignment to be his act and deed, and in my presence subscribed his name thereto, and I certify that the said ——— ——— is guardian of the person and estate of said minor, and who executed the foregoing assignment thereof.

Witness my hand and official seal the day and year above written.

(*Officer's signature.*)

NOTE.—A certified copy of the letters of guardianship, or other legal evidence under the seal of the probate *court*, showing that the said guardian was duly appointed and authorized to act as such *at the date of said assignment*, must accompany the same.

FORM NO. 13.

Of a power of attorney to sell a warrant.

Know all men by these presents, that I (*here insert the name of the warrantee or owner of the warrant*), of the county of———, in the State of ———, do hereby constitute and appoint ——— ———, of the county of———, in the State of———, my true and lawful attorney, for me and in my name, to sell and convey the within land warrant, No. ——, for ——— acres, issued under the act of———, 18—.

Witness my hand and seal this —— day of———, 187—.

(*Warrantee's or owner's signature.*) [SEAL.]

Signed in presence of—
A B.
C D.
See Rules Nos. 2 and 3.

NOTE.—The form of acknowledgment of a power of attorney must be the same as for the sale of the warrant, and both must be indorsed upon the warrant if there is sufficient blank space thereon that can be used for that purpose; otherwise, it must be certified to as in the certificate of acknowledgment stated in Form No. 5.

FORM No. 14.

For a power of attorney to locate a warrant.

Know all men by these presents, that I (*here insert the name of the warrantee or assignee*), of the county of ——, in the State of ——, do hereby constitute and appoint A B, of the county of ——, in the State of ——, my true and lawful attorney, for me and in my name, to locate land warrant No. ——, for —— acres of land, which issued under the act of ——, 18—.

Witness my hand and seal this —— day of ——, 187—.

(*Warrantee's or assignee's name.*) [SEAL.]

Signed in presence of—
C D.
E F.

See Rules Nos. 2, 3, and 29.

FORM No. 15.

Of the certificate of the clerk of the court, judge, or other person who is authorized to certify, under seal, to the official character of the officer who takes acknowledgments of assignments.

STATE OF ——,
—— *County, ss:*

I, A B, clerk of the court ——, in the county and State aforesaid, hereby certify that John Jones, whose genuine signature is affixed to the above acknowledgment, was, at the time of assigning the same, a justice of the peace (*notary public or other officer*), duly authorized by law to take such acknowledgment, and that full faith and credit are due to all his official acts as such.

Given under my hand and the seal of said court this —— day of ——, 187.—

A B, *Clerk.* [SEAL.]

See Rule No. 7.

NOTE.—Where any acknowledgment is taken before a clerk of a court, judge, notary public, or other officer duly authorized by law, with their respective *official seals* affixed, the above certificate will not be required. Nor is such certificate required when the acknowledgment is taken before a register or receiver of a United States land office.

The following sections of the *Revised Statutes of the United States* refer to the assignment of military bounty-land warrants and locations made therewith; and to the application of such warrants to the location of public lands, viz:

Military bounty-land warrants and locations assignable.

22 March, 1852, c. 19, s. 1., v. 10, p. 3.
3 June, 1858, c. 84, s. 2, v. 11, p. 309.

SEC. 2414. All warrants for military bounty lands which have been or may hereafter be issued under any law of the United States, and all valid locations of the same which have been or may hereafter be made, are declared to be assignable by deed or instrument of writing, made and executed according to such form and pursuant to such regulations as may be prescribed by the Commissioner of the General Land Office, so as to vest the assignee with all the rights of the original owner of the warrant or location.

Warrants located at $1.25; excess paid in cash.

22 March, 1852, c. 19, s. 1, v. 10, p. 3.

SEC. 2415. The warrants which have been or may hereafter be issued in pursuance of law may be located according to the legal subdivisions of the public lands in one body upon any lands of the United States subject to private entry at the time of such location at the minimum price. When such warrant is located on lands which are subject to entry at a greater minimum than one dollar and twenty-five cents per acre, the locator shall pay to the United States in cash the difference between the value of such warrants at one dollar and twenty-five cents per acre and the tract of land located on. But where such tract is rated at one dollar and twenty-five cents per acre, and does not exceed the area specified in the warrant, it must be taken in full satisfaction thereof.

Death of claimant after establishing right and before issuing of warrant.

3 June, 1858, c. 84, s. 1, v. 11, p. 308.

SEC. 2444. When proof has been or hereafter is filed in the Pension Office, during the life-time of a claimant, establishing, to the satisfaction of that office, his right to a warrant for military services, and such warrant has not been, or may not be, issued until after the death of the claimant, and all such warrants as have been heretofore issued subsequent to the death of the claimant, the title to such warrants shall vest in his widow, if there be one, and if there be no widow, then in the heirs or legatees of the claimant; and all military bounty-land warrants issued pursuant to law shall be treated as personal chattels, and may be conveyed by assignment of such widow, heirs, or legatees, or by the legal representatives of the deceased claimant, for the use of such heirs or legatees only.

SEC. 2277. All warrants for military-bounty lands, which are issued under any law of the United States, shall be received in payment of pre-emption rights at the rate of one dollar and twenty-five cents per acre, for the quantity of land therein specified; but where the land is rated at one dollar and twenty-five cents per acre, and does not exceed the area specified in the warrant, it must be taken in full satisfaction thereof.

Military bounty-land warrants receivable for pre-emption payments.

22 March, 1852, c. 19, s. 1, v. 10, p. 3.

SEC. 2436. All sales, mortgages, letters of attorney, or other instruments of writing, going to affect the title or claim to any warrant issued, or to be issued, or any land granted, or to be granted, under the preceding provisions of this chapter, made or executed prior to the issue of such warrant, shall be null and void to all intents and purposes whatsoever; nor shall such warrant, or the land obtained thereby, be in anywise affected by, or charged with, or subject to, the payment of any debt or claim incurred by any officer or soldier, prior to the issuing of the patent.

Sales, mortgages, letters of attorney, &c., made before issue of warrant to be void.

28 Sept., 1850, c. 85, s. 4, v. 9, p. 521.

Sec. 2238. registers and receivers, in addition to their salaries, shall be allowed each the following fees and commissions, namely:

Fees and commissions of register and receiver.

* * * * * * *

Fifth. For locating military bounty-land warrants issued since the eleventh day of February, eighteen hundred and forty-seven, and for locating agricultural college land-scrip, the same commission, to be paid by the holder or assignee of each warrant or scrip, as is allowed for sales of the public lands for cash, at the rate of one dollar and twenty-five cents per acre.

22 March, 1852, c. 19, s. 2, v. 10, p. 4.

2 July, 1862, c. 130, s. 7, v. 12, p. 505.

FORMS USED AND PROCEDURE IN DISTRICT LAND OFFICE.

In pre-emption entries or commutation of homesteads, military bounty-land warrants can be used as cash. Where cash is paid in excess of acreage of warrants, the receiver issues duplicate receipts, one for claimant, one for the files, and a joint certificate of location by register and receiver is issued. (See rules 27 *et seq.*, above, as to details of method of location under settlement or cash purchase laws. See also "Existing Methods of Disposition," chap. XXXII, and addenda.)

TWO, THREE, AND FIVE PER CENT. FUNDS.

[See Chapter XV, pages 238, 239, 1251.]

TO JUNE 30, 1882.

Statement of the amounts which have accrued to the following named States on account of the two, three, and five per cent. upon the net proceeds of the sales of public lands to June 30, 1882, inclusive.

FIVE PER CENT. FUND.

The following opinion, by the Hon. A. G. Porter, First Comptroller of the Treasury, as to the claim of the State of Kansas for five per cent. of the net proceeds of sales of public lands within her borders, contains much historical matter pertinent to the subject. It is given in full. The amount held to be due was paid.

[Senate Ex. Doc. No. 185, Forty-sixth Congress, second session.]

Letter from the Secretary of the Treasury, transmitting, in response to resolution of the Senate of the 18th instant, information relative to what action has been taken in the matter of the claim of the State of Kansas for five per centum of the net proceeds of sales of public lands in that State.

MAY 25, 1880.—Referred to the Committee on Appropriations and ordered to be printed.

TREASURY DEPARTMENT, *May* 22, 1880.

Hon. WILLIAM A. WHEELER,
President of the Senate:

SIR: I have the honor to acknowledge the receipt of a resolution of the Senate of the 18th instant as follows:

"*Resolved*, That the Secretary of the Treasury be directed to inform the Senate what action has been taken by the Treasury Department in the matter of the claim of the State of Kansas for five per centum of the net proceeds of sales of public lands in that State."

In reply thereto I have to state that the claim has been examined by the accounting officers and the sum of $190,268.27 found to be due the State of Kansas, which cannot be paid without an appropriation by Congress.

A copy of the opinion of the First Comptroller of the Treasury in the case, together with a copy of his letter of the 17th instant upon the subject, which were furnished to the House Appropriation Committee on the 18th instant, are herewith inclosed.

As the claim was allowed subsequent to the date of the annual report of claims made to Congress under the provisions of section 4 of the act June 14, 1878 (20 Stat., 130), it will be included in the report to be made at the next regular session of Congress.

Very respectfully,

JOHN SHERMAN, *Secretary.*

Opinion of the Hon. A. G. Porter, First Comptroller of the Treasury, in the matter of the claim of the State of Kansas for five per centum of the net proceeds of sales of public lands in said State.

TREASURY DEPARTMENT,
FIRST COMPTROLLER'S OFFICE,
Washington, D. C., May 6, 1880.

The State of Kansas has presented a claim against the United States amounting to $190,566.08, being for five per cent. on the net proceeds of sales from the 29th of January, 1861, to the 30th of June, 1877, inclusive, of lands within the limits of that State heretofore embraced in Indian reservations. The reservations were known as the Shawnee Absentee, Miami, Kansas Trust, Kansas Trust and Diminished Reserve, Osage Ceded, Osage Trust and Diminished Reserve, New York Indian, and Cherokee Strip. The entire claim has been allowed by the Commissioner of the General Land Office, and the account is now before this office for examination.

The claim is founded upon the fifth clause of section three of the act for the admission of Kansas into the Union, approved January 29, 1861. That clause enacts that five per centum of the net proceeds of sales of all public lands lying within said State which shall be sold by Congress after the admission of the State into the Union, after deducting all expenses incident to the same, shall be paid to said State for the purpose of making public roads and internal improvements, or for other purposes, as the legislature shall direct.

The clause is subject to the condition that the State shall never interfere with the primary disposal of the soil within the same by the United States, or with any regulations Congress may find necessary for securing the title in the soil to *bona-fide* purchasers thereof, and that the State shall never tax the land or property of the United States therein.

The case turns upon a proper answer to be given to the question, what lands were "public lands lying within said State" within the meaning of this clause?

At the date of the passage of the act there were Indian reservations within the exterior limits of the State which embraced about 13,800,000 acres. Of these lands,

1,824,000 acres had been assigned to the New York Indians under a stipulation by treaty that the same should never be included within any State or Territory of the Union. Eight hundred thousand acres had been sold in fee to the Cherokee Indians, and formed into a reservation known as the Cherokee Neutral Lands. They were held under an agreement that they were at no future time, without the consent of the Indian owners, to be included withiu the Territorial limits or jurisdiction of any State or Territory. And 74,937 acres were occupied by the Ottawa tribe of Indians under an engagement similar to that under which the Cherokee Neutral Lands were held. The two last-mentioned reservations have no connection with this account.

The reservation of the New York Indians was ceded to them by the treaty of January 15, 1838 (7 Stat., 550). This treaty granted to them in fee simple 1,824,000 acres of land, being 310 acres for each person, as their numbers were then computed. The grant was made subject to the condition, however, that such of the tribes of the New York Indians as did not agree to remove to the country set apart for their new homes within five years, or such other time as the President might appoint, should forfeit to the United States all interest therein. Only thirty-two of the Indians removed to the reservation and fulfilled the conditions of the treaty. To them were issued certificates of allotment for 10,215.63 acres, which was as nearly 320 acres to each allottee as the location of the allotments would permit. On the 16th of June, 1860, the Secretary of the Interior decided that the remainder of the 1,824,000 acres had been forfeited by the Indians in consequence of their failure to occupy it, and that it was therefore still public land. The State has already received five per cent. of the proceeds of that part of the forfeited tract which has been sold since the admission of the State. The account under examination applies only to the 10,215.63 acres of their reservation, being the alloted lands above mentioned.

A small part of the Indian reservations in the State at the passage of this act consisted of lands the fee simple of which, under the provisions of treaties made by the United States with these tribes, belonged to the tribes occupying them.

The rest of the lands included within Indian reservations were held by the tribes occupying them in the manner in which lands have usually been held by Indians occupying reservations. This title is popularly known as the "Common Indian Title."

In lands of the last-named class, the Indians have no other title than a mere right of occupancy. The fee is in the United States subject only to such right of occupancy. (United States *v.* Cook, 19 Wallace, 591.) The possession, when abandoned by the Indian occupants, attaches itself to the fee without further grant. (*Id.*) So restricted is their estate that, though they may clear the lands of timber to such an extent as may be reasonable for a profitable use for agriculture, and may sell the timber thus removed, they may not sever timber except for this use. They may not sever it for the purpose exclusively of sale. If they do, the severance is wrongful, and the timber, when cut, becomes the absolute property of the United States. (*Id.*)

In the case just cited an action of replevin was maintained by the United States against a purchaser to recover possession of logs thus severed, as having been cut and carried away from public lands of the United States. The court said: "That the United States may maintain an action for cutting and carrying away timber from the public lands was decided in Cotton *v.* The United States. The principles recognized in that case are decisive of the right to maintain this action." "The United States may at its pleasure dispose of these lands to whomever it may choose, subject only to this right of occupancy." (Beecher *v.* Wetherby, 95 U. S. Reports, 517.)

The right of the United States to dispose of the fee of lands occupied by Indians under the common Indian title has always been recognized by the courts of the United States from the foundation of the Government. Thus, a grant of the sixteenth section of the public lands in every township in the State of Wisconsin was held to include whatever became the sixteenth section in every township then embraced in Indian reservations, as such townships and sections should turn out to be, after the Indian occupancy ceased and they had been surveyed. (Beecher *v.* Wetherby, above cited.)

Not only have the courts uniformly decided that lands held by the common Indian title are public lands, but that they are such has been repeatedly assumed in the legislation of Congress. Two only, among many instances, will be cited.

By a resolution of April 10, 1869 (16 Stats., 55), provision was made for the sale to actual settlers of land of the Great and Little Osages; and it was also provided that sections 16 and 36 should be reserved for school purposes "in accordance with the provisions of the act of admission." They were, as part of the "public lands" within the State, and by no other or clearer designation, granted by the act of admission for school purposes.

By an act passed March 2, 1855, entitled "An act to settle certain accounts between the United States and the State of Alabama," the Commissioner of the General Land Office was required to include in the accounts the several reservations under the various treaties with the Chickasaw, Choctaw, and Creek Indians within the limits of

Alabama, and allow and pay to that State five per centum thereof as in case of sales; and by an act of March 3, 1857, the Commissioner was also directed to state an account between the United States and each of the other States upon the same principles, and to allow and pay to each State such amount as should thus be found due, estimating all lands and permanent reservations at $1.25 an acre.

Not only were the reservations mentioned in this act treated as public lands, but a policy seems to have been adopted by Congress of paying to States in which public lands were situate five per cent. of the estimated value of such as were contained in reservations, where a considerable period might be expected to elapse before the Indian titles would be extinguished.

Lands, therefore, held by Indians in reservations by the common Indian title are public lands. They will pass, subject only to the Indian right of occupancy, by a grant of public lands by the United States; and in the absence of language evincing a different intent, a grant to a State by Congress of five per cent. of the proceeds of sales of the public lands within the State will be held to include five per cent. of the proceeds of sales of lands held by Indians by the common Indian title.

There is a provision in the act for the admission of Kansas that nothing contained in the constitution of the State respecting the boundary thereof shall be construed to impair the rights of person or property pertaining to the Indians in said Territory, so long as such rights shall remain unextinguished by treaty between the United States and such Indians, or to affect the authority of the Government of the United States to make any regulation respecting such Indians, their lands, property, or other rights by treaty, law, or otherwise, which it would have been competent to make if the act had never passed.

This provision evinces no intent on the part of Congress to exclude Indian lands from the list of public lands, five per centum of the net proceeds of which the act directs shall be paid to the State of Kansas for the purposes therein named. It does not say that Indian lands shall not be held to be public lands within the act; it does not vest in the Indians a title more extensive than they had theretofore possessed; and it precedes the clause which declares that five per centum of the net proceeds of all public lands lying within said State shall be paid to the State for the purposes specified. The provision was meant merely to retain in Congress and the treaty-making power exclusive jurisdiction to make regulations with respect to the property and other rights of Indians within the State without interference by the State. (See opinion of the Attorney-General addressed to the Secretary of the Interior, January 21, 1880.)

The grant of the five per centum having been made, it could not afterwards be revoked. The right of the State became, by the grant, a vested right which Congress could not recall. By treaties, made after the admission of the State with the several tribes who occupied these lands, it was stipulated that the net proceeds of the sales of all but one of the reservations, viz, the Kansas Trust, should be invested by the United States for the benefit of the respective tribes. Without doubt, these treaties, together with subsequent acts of Congress passed to carry out their provisions, entitled these tribes to a sum equal to these net proceeds; but they did not destroy the antecedent right of the State of Kansas to the five per cent. which had been granted when the United States, holding the fee in said lands, had capacity to make the grant, and made it without provision for any subseqnent limitation.

The disposition of Congress with respect to lands lying within the States, the primary disposal of which belonged to the United States, seems to have grown more and more liberal as new States have been admitted.

Thus, on the admission of Michigan into the Union, seventy-two sections were set apart for the use and support of a university. Previously, upon the admission of new States, thirty-six sections only had been set apart for a like purpose. On the admission since of each successive new State in which there were public lands seventy-two sections have been set apart for the use of a university.

Prior to the admission of Minnesota one section only in a Congressional township had ever been set apart for the use of schools, but on that State becoming a member of the Union, two sections in each township were reserved for schools, and a similar grant has been made, on its admission, to each succeeding new State.

Before the admission of Michigan four sections had usually been granted for the erection of public buildings at the seat of government. Five sections were given to that State for that purpose, and a like number afterward to the new State of Iowa.

Subsequently, upon the admission of Wisconsin, Oregon, and Kansas, ten sections were granted for a like use, and twenty subsequently to the States of Nevada, Nebraska, and Colorado.

On the admission of Nevada, twenty sections were granted for the erection of a penitentiary. In previous statutes admitting States no grant had been made for such a use. When Nebraska and Colorado were admitted, fifty sections were granted to each for a like object.

In the light of this legislation and of the clear provisions of the act for admitting Kansas, it would appear to be doing violence to the terms of the act and to the policy of Congress to construe the five per cent. clause to be applicable only to lands to which the Indian title had been extinguished prior to the admission of the State.

The gross amount realized from the sale of the eight reservations included in the present account is $3,866,036.03. The expenses of sale were $54,714.34. The net proceeds, therefore, are $3,811,321.69; five per cent. of which is $190,566.08—the amount reported to this office by the Commissioner of the General Land Office as owing to the State. But from this sum must be deducted five per cent. of the net proceeds of the sale of the New York Indian Reservation. The Indians did not hold the lands included in this reservation by mere right of occupancy. The lands were not public lands, because the United States, before the admission of the State, had granted the fee to said Indians, and had therefore no further estate in them. The United States, in effecting the sale of these lands, acted merely in the capacity of an agent. The State of Kansas cannot set up a claim to five per cent. of the net proceeds of the sales of these lands.

There must also be deducted from the sum allowed by the Commissioner five per cent. of the net proceeds of the sales of the Kansas Trust Reservation. Before the admission of Kansas the United States had engaged by treaty that, when these lands should be sold, the proceeds of the sales should be paid to the Indian occupants. From the time that this engagement was made, the United States became a trustee, holding merely a naked legal title, the beneficial interest being in the Indians. The lands then ceased to be public lands.

The net proceeds of the sale of the New York Indian lands were $3,956.73, five per cent. of which is $197.84. The net proceeds of the sale of the Kansas Trust Reservation were $1,999.48, five per cent. of which is $99.97. This sum, together with the five per cent. upon the net proceeds of the sales of the New York Reservation, being deducted from the amount found due the State by the Commissioner of the General Land Office, a balance remains of $190,268.27, which amount I find to be due to the State of Kansas upon this account.

It has been assumed, in considering this claim, that the clause in the act for the admission of Kansas which declares that five per cent. of the net proceeds of the sales of all public lands lying within said State shall be paid to the State, carried with it an appropriation of that amount. In the acts containing a like provision with respect to sales of public lands in other States, the clause has uniformly been held, in the Treasury Department, to contain an appropriation. Section 3689 of the Revised Statutes, which establishes permanent annual appropriations for the payment to certain States of five per centum of the net proceeds of sales of public lands lying within their limits, treats clauses in the acts for the admission of Wisconsin, Minnesota, Oregon, and Nevada, expressed in precisely the same terms, as carrying an appropriation. That section does not, however, include Kansas in the list of States for which an appropriation is there provided, and it is the only section in those statutes that makes appropriations for payment to States of five per cent. of the proceeds of the public lands therein.

The act for the admission of Kansas does not seem to have entirely escaped the notice of the revisers, for the substance of some of its provisions has been incorporated into their revision.

A question might, therefore, arise whether the five per cent. appropriation in the Kansas act is not repealed by the first clause of section 5596 of said revision. The two sections that are relevant to the question are as follows:

"SEC. 5596. All acts of Congress passed prior to said first day of December, one thousand eight hundred and seventy-three, any portion of which is embraced in any section of said revision, are hereby repealed, and the section applicable thereto shall be in force in lieu thereof; all parts of such acts not contained in such revision having been repealed or superseded by subsequent acts, or not being general and permanent in their nature: *Provided*, That the incorporation into said revision of any general and permanent provision, taken from an act making appropriations, or from an act containing other provisions of a private, local, or temporary character, shall not repeal or in any way affect any appropriation, or any provision of a private, local, or temporary character contained in any of said acts, but the same shall remain in force; and all acts of Congress passed prior to said last-named day, no part of which are embraced in said revision, shall not be affected or changed by its enactment.

"SEC. 5597. The repeal of the several acts embraced in said revision shall not affect any act done, or any act accruing or accrued, or any suit or proceeding had or commenced in any civil cause before the said repeal, but all rights and liabilities under said acts shall continue, and may be enforced in the same manner as if said repeal had not been made; nor shall said repeal in any manner affect the right to any office or change the term or tenure thereof."

It will be observed that the reason given in the first section for treating as repealed

all acts of Congress passed prior to December 1, 1873, any portion of which is embodied in any section of said revision, is that all parts of such acts have been repealed or superseded by subsequent acts or are not general and permanent in their nature. The fact, however, in relation to said appropriation clause in the Kansas act, is that it has never been repealed or superseded by any subsequent act. In a letter written on the 24th of November, 1877, by Chief Justice Waite to Mr. Middleton, late clerk of the Supreme Court of the United States, and by the latter filed in this office, the Chief Justice, after quoting section 5596, says:

"This clause, as is seen, contains not only the repeal but the reason of it. It asserts as such reason the assumed fact that all portions not included in the Revised Statutes of acts which have been partially incorporated therein, either have been repealed or superseded by subsequent acts, or are not general and permanent in their nature. It seems clear from this that if a particular section of an act has neither been repealed nor superseded by subsequent acts nor incorporated into the Revised Statutes, and is general and permanent in its nature, it is not within the reason and ground of the repeal, but has been accidentally overlooked or omitted by the revisers, and should not be regarded as within the intent and meaning of the repealing clause."

The Chief Justice adds that, in an informal manner, he had consulted his brethren upon the matter, and that they concurred with him in this opinion.

Upon the back of the letter is an indorsement made by the Secretary of the Treasury in the following words:

"Upon the clear opinion of the Chief Justice, concurred in, as it seems, by his associates, I think you [First Comptroller Tayler] will be entirely justified in acting upon his construction of the law in passing the accounts referred to. Other omissions in the Revised Statutes covered by the same reasoning have been called to my attention, and, without seeking to strengthen the opinion of the Chief Justice, I only express my concurrence in it."

I feel justified by these opinions, from sources so authoritative, in concluding that if the 5 per cent. appropriation in the Kansas act was not preserved by other clauses in the section above quoted, as I am strongly inclined to think it was, it was at any rate not repealed by the first clause of the first of said sections.

But section 5 of the act approved June 20, 1874 (18 Stat., 110), directs the Secretary of the Treasury to cause all unexpended balances of appropriations which shall have remained upon the books of the Treasury for two fiscal years to be carried to the surplus fund and covered into the Treasury. And the Secretary of the Treasury, on the 20th of April, 1877, decided that the appropriations contained in section 3689, Revised Statutes, came within the operation of this act.

As the amount owing to the State was not ascertained to be due within two fiscal years since the claim accrued, the appropriation from which it would properly be payable has, therefore, been covered into the Treasury.

The fourth section of the act approved June 14, 1878, makes it the duty of the several accounting officers of the Treasury to continue to receive, examine, and consider the justice and validity of all claims under appropriations the balances of which have been exhausted or carried to the surplus fund that may be brought before them within a period of five years. And the Secretary of the Treasury is, by the act, directed to report the amount due each claimant, at the commencement of each session, to the Speaker of the House of Representatives, who shall lay the same before Congress for consideration.

The amount ascertained to be due to the State of Kansas on the account under examination will, therefore, be reported to the Secretary of the Treasury, under the provisions of the last-mentioned act.

A. G. PORTER,
First Comptroller.

TREASURY DEPARTMENT,
FIRST COMPTROLLER'S OFFICE,
Washington, D. C., May 17, 1880.

Hon. JOHN SHERMAN,
Secretary of the Treasury:

SIR: I have the honor to acknowledge the receipt, by reference to this office, of a letter addressed to you on the 10th instant by Hon. John D. C. Atkins, in relation to the sum of $190,268.27, being five per cent. of the net proceeds of the sales, from January 29, 1861, to June 30, 1877, inclusive, of certain public lands in the State of Kansas, which sum has been found to be due to that State from the United States.

The sum of $190,566.08 was, on the 19th day of April, 1878, ascertained by the Commissioner of the General Land Office to be due upon said account, and the account was transmitted by him to this office for examination and decision thereon.

The account has been carefully examined in this office, and the first-named sum has been found to be owing by the United States to said State. But, because more than

TO ACCOMPANY "PUBLIC DOMAIN"

BY THOMAS DONALDSON.

two fiscal years have elapsed since the claim accrued, the appropriation out of which it would properly be payable has been covered into the Treasury. A new appropriation, therefore, must be made by Congress before the claim can be paid.

The reasons for the decision made by this office on the examination of said account are fully set forth in the opinion of which a copy is herewith transmitted.

Very respectfully,

A. G. PORTER,
First Comptroller.

TREASURY DEPARTMENT,
FIRST COMPTROLLER'S OFFICE,
Washington, D. C., May 20, 1880.

Hon. JOHN SHERMAN,
Secretary of the Treasury:

SIR: I have received, by reference from your office, a certified copy of Senate resolution of May 18, 1880, inquiring what action has been taken by the Treasury Department in the matter of the claim of the State of Kansas for five per cent. of the net proceeds of sales of certain public lands within that State.

In reply, I have the honor to transmit herewith a copy of my opinion in the case, from which it appears that there is due to said State from the United States the sum of $190,268.27, for the payment of which no appropriation now exists.

Very respectfully,

A. G. PORTER,
First Comptroller.

INDIAN RESERVATIONS FROM THE PUBLIC DOMAIN.

[See Chapter XVI, pages 240–248, and 1251.]

TO JUNE 30, 1882.

NUMBER AND LOCATION OF RESERVATIONS.

The total number of Indian reservations in the United States, June 30, 1882, was 149, two-thirds of the area of which will eventually be restored to the public domain for sale and disposition, after purchase of occupancy title from the Indians, and setting aside portions of the same to be held by the Indians in severalty or otherwise, as may be ordered by Congress.

These reservations contain 143, 525,960 acres, with an estimated population of 259,632 or about 552.80 acres to each Indian, and are situated in the following States and Territories:

The total number of reservations includes the twenty Indian pueblos in New Mexico, sixteen of which have been patented to the Indians; also the Moqui pueblos in Arizona.

Schedule showing the names of Indian reservations in the United States, agencies, denomination formerly nominating agents, tribes occupying or belonging to the reservation, area of each reservation in square miles and acres, and reference to treaty, law, or other authority by which reservations were established.

a Surveyed. b Partly surveyed. c Outboundaries surveyed.

NOTE.—The spelling of the tribal names in the column "Name of tribe occupying reservation" has been submitted to Maj. J. W. Powell, and revised by him where the correct name of such tribe is known. In many cases corrupted names have come into such general use as to make it impolitic to change them.

Table of population of various Indian tribes.

MILITARY RESERVATIONS UPON THE PUBLIC DOMAIN.

[See Chapter XVII, pages 249 to 254, 1258.]

TO JUNE 30, 1882.

The following list shows that the total number of military reservations in the public-land States and Territories is 179; containing 3,141,129.87 acres:

Military reservations in public-land States and Territories, July 1, 1882.

	Acres.
Alabama (1 reservation):	
A small reserve at Mobile Bay, area not known.	
Alabama and Mississippi:	
Islands in Gulf of Mexico	6,061.64
Arizona (14 reservations):	
Fort Huachuca, area not known.	
Camp Apache	7,421.14
Camp Crittenden	3,278.08
Camp Bowie	23,040.00
Camp Grant (old)	2,031.70
Camp Grant (new)	42,341.00
Camp Goodwin	23,040.00
Camp Mojave	6,486.81
Camp McDowell	24,750.15
Camp Lowell	49,920.00
Camp Thomas	10,487.00
Camp Verde	12,293.79
Fort Whipple	1,730.00
Timber reserve for Fort Whipple	720.00
Fort Yuma, mostly in California, small part in Arizona	51.66
Area of military reservations in Arizona not counting Camp Thomas, which is mostly comprised in Camp Goodwin Reservation	197,104.33
Arkansas (3 reservations):	
Fort Smith Cemetery	14.81
Quarrying reservation	260.96
Hot Springs, block 94	6.76
Total in Arkansas	282.53
California (17 reservations):	
Angel and Alcatraz Islands, area not known.	
Benicia	344.90
Fort Bidwell	3,201.45
Camp Cady	1,562.00
Deadman's Island	2.00
Camp Gaston	451.50
Fort Hill or Monterey, area not known.	
Camp Independence	2,650.18
Molate Island or Golden Rock	7.52
Presidio Reserve No. 1	1,479.94
Point San José (less the area relinquished to city and county of San Francisco by act of Congress approved July 1, 1870)	57.89
Peninsula Island, area not known.	
Point Loma, area not known.	
San Solito Bay Point, area not known.	
Three Brothers, Three Sisters, and Marin Islands at San Pablo Bay entrance, area not known.	
Yerba Buena Island, area not known.	
Fort Yuma	5,214.30
Total in California as far as the areas are known	14,971.68

	Acres.
Colorado (8 reservations):	
Old Fort Lyon	38,000.00
Fort Garland	2,560.00
Fort Lyon	5,864.00
Pike's Peak	8,192.00
Fort Sedgewick	40,960.00
Fort Pagosa	22,400.00
Camp on White River	40,960.00
Fort Lewis	30,720.00
Total in Colorado	189,656.00
Dakota (10 reservations):	
Fort Abraham Lincoln, area not known.	
Fort Buford, partly in Montana	576,000.00
Fort Pembina	1,899.08
Fort Randall, estimated at	96,000.00
Fort Rice, estimated at	102,400.00
Fort Stevenson, estimated at	48,000.00
Fort Sully, estimated at	28,800.00
Fort Totten, estimated at	46,000.00
Fort Wadsworth	78,400.00
Fort Meade	11,184.83
Total area in Dakota, not including Fort Abraham Lincoln, but including one-half of Fort Buford in Montana	988,683.91
Florida (16 reservations):	
North end of Amelia Island	419.44
Fort McRee, area not known.	
Battard Island and adjacent lands, area not known.	
Fort Brooke	148.11
Cedar Keys	211.65
Islands in Charlotte Harbor	2,143.38
Dry Tortugas, area not known.	
Egmont Island	392.77
Fort Barrancas, area not known.	
Neck of land at Saint Andrew's Sound, area not known.	
Fort Marion and blocks in Saint Augustine and land at Matanzas Inlet, area not known.	
At Saint George's Sound, lands mostly disposed of, they constituting a part of what is known as "Forbes's Purchase."	
Saint Joseph's Bay, Point Saint Joseph	3,851.21
Saint Mark's	305.75
At Santa Rosa Sound	5,958.20
Key West Shoals, area not known.	
Total area of reservations in Florida, as far as known	13,430.51
Idaho (5 reservations):	
Fort Boise	1,225.55
Fort Hall	646.50
Fort Lapwai	1,226.00
Camp Three Forks, Owyhee	4,800.80
Fort Cœur d'Alene	1,280.00
Total in Idaho	9,178.05
Illinois:	
Fort Armstrong (Rock Island), area not known.	
Kansas (6 reservations):	
Fort Dodge	14,661.00
Fort Hays	7,600.00
Fort Larned	10,240.00
Fort Leavenworth	2,750.00
Fort Riley	19,899.22
Fort Wallace	8,960.00
Total in Kansas	64,110.22

	Acres.
Louisiana (7 reservations):	
Battery Bienvenue, area not known.	
Baton Rouge	44.17
On the coast of the Gulf of Mexico quite a number of reserved tracts, area not known.	
Fort Jackson	740.97
Fort Pike, area not known.	
Fort Saint Philip	556.12
Tower Dupres, area not known.	
Total in Louisiana, as far as known	1,341.26
Michigan (4 reservations):	
Fort Brady, exact area not known.	
Fort Mackinac, area not known.	
Bois Blanc Island	9,199.43
Fort Wilkins	148.35
Total in Michigan, as far as known	9,347.78
Minnesota (2 reservations):	
Fort Snelling, area not known.	
Reserve on Saint Louis River	7.32
Missouri (3 reservations):	
Grand Tower Rock, area not known.	
Island in Missouri River, township 50 north, range 33 west	54.70
Fort Leavenworth, area not known.	
Montana (9 reservations):	
Camp Baker	2,400.00
Fort Benton, area not known.	
Fort Buford (see under Dakota).	
Fort Ellis	32,160.00
Fort Shaw	32,000.00
Fort Keogh	57,619.00
Fort Assiniboine, estimated	704,000.00
Fort Missoula	2,777.64
Fort McGinnis, estimated	31,000.00
Total in Montana, as far as known	861,956.64
Nebraska (6 reservations):	
On North Fork of Loup River	3,251.41
Fort McPherson	19,500.00
Fort Niobrara, increased in area to	35,012.27
Fort Robinson	15,360.00
Camp Sheridan	18,225.00
Fort Sidney	3,835.35
Total in Nebraska	95.184.03
New Mexico (13 reservations):	
Fort Bayard	8,840.00
Fort Butler (never declared)	76,800.00
Fort Craig	24,895.00
Fort Cummings, increased in area to	23,040.00
Fort Marcy	17.77
Fort McRae	2,560.00
On Moro River	5,120.00
Fort Selden	9,613.74
Fort Stanton	10,240.00
Fort Sumner Cemetery	320.00
Fort Thorn	23,040.00
Fort Union	66,880.00
Fort Wingate, increased in area to	83,200.00
Total in New Mexico, not including Fort Butler, never declared	257,766.51

	Acres.
Nevada (3 reservations):	
Carlin	920.00
Camp Halleck	10,900.93
Camp McDermitt	10,374.40
Total in Nevada	22,195.33
Oregon (4 reservations):	
Fort Klamath	3,135.68
Sand Island	192.07
Point Adams	1,250.11
Fort Orford, area not known.	
Total in Oregon, as far as known	4,577.86
Utah (4 reservations):	
Fort Cameron	23,378.00
Camp Douglas	2,560.00
Camp Floyd	94,550.00
Rush Lake Valley	5,131.47
Total in Utah	125,599.47
Washington Territory (36 reservations):	
Port Angeles and Ediz Hook, area not known.	
Canoe Island	43.10
Fort Cascades	320.21
Fort Colville	1,070.00
Cape Disappointment	536.20
Lopez Island	1,233.90
Straits Juan de Fuca	2,098.60
Point Roberts	2,434.55
On San Juan Island	1,148.33
Shaw Island	1,110.20
Fort Three Tree Point	640.00
Port Townsend	621.97
Fort Vancouver	640.00
Fort Walla Walla corrected area	612.93
On north side of New Dungeness Harbor	300.00
South side New Dungeness Harbor	640.00
West side of entrance to Washington Harbor	640.00
East side of entrance to Washington Harbor	640.00
Challam Point	640.00
Opposite Challam Point	640.00
Opposite Protection Island	640.00
Vancouver Point	640.00
Point Wilson	640.00
Admiralty Head	640.00
Marrowstone Point	640.00
North of entrance to Deception Pass (including islands)	640.00
South of entrance to Deception Pass	640.00
Two islands east of Deception Pass	200.00
Tala Point, near Hood's Canal	640.00
Hood's Head, near Hood's Canal	640.00
Foulweather Point	640.00
Double Bluff	640.00
Point Defiance	640.00
Three tracts on west side of narrows of Puget Sound (each 640)	1,920.00
Most northerly point of Whidbey's Island	640.00
Fort Spokane	640.00
Total area reserved in Washington Territory, including some lands disposed of prior to date of the orders declaring reservations	26,079.36
Wisconsin (1 reservation):	
Stone Quarry Reservation in township 28 north, range 25 east	1,046.10

Wyoming (9 reservations):

	Acres.
Fort Bridger	10,240.00
Fort Fetterman	89,680.00
Fort Laramie increased in area to	74,280
Fort D. A. Russell	4,512.00
Fort Sanders	21,882.64
Fort Fred Steele increased in area to	25,600,00
Sulphur creek (for coal)	100.00
Fort McKinney	25,600.00
Depot McKinney	640.00
Total in Wyoming	252,494.64

CANAL, WAGON, MILITARY WAGON, AND RAILROAD GRANTS.

[See Chapter XX, pages 257–288, and 1260.]

TO JUNE 30, 1882.

No change in the statistics of canal, wagon road, and military wagon road grants has taken place since June 30, 1880. The area granted remains the same. See pages 258, 259, 260, and 279.

LAND GRANTS TO RAILROADS—AREA NECESSARY TO FILL.

The estimates of acreage of public lands requisite to comply with grants already made, including lands already patented or selected, to June 30, 1880 (see pages 268, 269, 270, 271, 272, 273, and 287), have not been materially changed, viz, 155,504,994.59 acres. The area of patented or certified railroad grant lands, being to June 30, 1882, was 46,526,823.06 acres, leaving a balance not yet certified or patented of 108,978,171.48 acres.

VALUE OF LANDS GRANTED RAILROADS.

November 1, 1880, the Auditor of Railroad Accounts estimated the value of public lands granted railroads at $391,804,610.16. (See tables of operations of land departments of land-grant railroads for the years 1878–'82, pages 772–787.)

CONSTRUCTION OF LAND-GRANT RAILROADS.

[See pages 268 and 1260.]

TO JUNE 30, 1881, AND JUNE 30, 1882.

IN THE YEAR ENDING JUNE 30, 1881.

The reports of construction of land-grant railroads during the fiscal year ending June 30, 1881, show an aggregate of 200 miles, which, with those previously reported (15,430.14 miles), make a total of 15,630.14 miles of such road, distributed as follows:

States and Territories.	Miles.	States and Territories.	Miles.
Alabama	822.00	Mississippi	406.00
Arkansas	620.16	Missouri	703.00
California	1,228.89	Nebraska	832.00
Colorado	298.00	Nevada	460.00
Dakota	346.00	New Mexico	50.00
Florida	247.00	Oregon	227.00
Illinois	705.72	Texas (where there are no U. S. lands)	342.87
Indian Territory	155.00	Utah	255.00
Iowa	1,672.00	Washington	106.00
Kansas	1,654.00	Wisconsin	553.00
Louisiana	152.00	Wyoming	400.00
Michigan	1,005.00		
Minnesota	2,389.50	Total	15,630.14

IN THE YEAR ENDING JUNE 30, 1882.

The reports of construction of land-grant railroads during the fiscal year ending June 30, 1882, show an aggregate of 608.96 miles, which, with those previously reported (15,640.14 miles), make a total of 16,239.10 miles, distributed as follows:

States and Territories.	Miles.	States and Territories.	Miles.
Alabama	822.00	Mississippi	406.00
Arkansas	620.16	Missouri	703.00
California	1,228.89	Montana	25.00
Colorado	298.00	Nebraska	832.00
Dakota	421.00	Nevada	460.00
Florida	247.00	New Mexico	150.00
Idaho	45.00	Oregon	227.00
Illinois	705.72	Texas (where there are no U. S. lands)	342.87
Indian Territory	155.00	Utah	255.00
Iowa	1,672.00	Washington	286.00
Kansas	1,654.00	Wisconsin	593.00
Louisiana	152.00	Wyoming	400.00
Michigan	1,148.96		
Minnesota	2,389.50	Total	16,239.10

PATENTED AND CERTIFIED CANAL, WAGON, AND MILITARY WAGON ROAD AND RAILROAD LANDS.

[See pages 1261 and 1263.]

TO JUNE 30, 1882.

Statement showing number of acres certified or patented during the year, to June 30, 1882, and up to June 30, 1882, for canal, wagon road, and military wagon roads and railroads to States and corporations.

RECAPITULATION.

State.	Number of acres certified or patented for the year ending June 30, 1882.	Total number of acres certified or patented up to June 30, 1882.
Illinois		2,595,053.00
Mississippi		935,158.70
Alabama	51,313.41	2,882,076.40

a In the adjustment of this grant the road was treated as an entirety, and without reference to the State line; hence Alabama has approved to her more, and Mississippi ess, land than they would appear to be entitled to in proportion to the length of road line in the respective States.

b 192 acres deducted from the amount heretofore reported to correct an error in addition.

c No evidence of the construction of any part of these roads, as required by the acts, having been filed in the General Land Office, the grants are presumed to have lapsed, but the lands have not been restored to the mass of public lands, Congress having taken no action to that end.

d 8,199.11 acres heretofore erroneously reported as certified for the Florida, Atlantic and Gulf Central Railroad.

e 366.59 added to correct an error in the amount heretofore reported.

f 8,199.11 acres deducted from the amount heretofore reported and added to the amount certified for the Florida Railroad (now Atlantic, Gulf and West India Transit).

g 51,452.03 earned by the construction of eighty miles of road prior to June 3, 1866; 227,879.94 acres within the limits of the grant of March 3, 1871, to the New Orleans, Baton Rouge and Vicksburg Railroad Company, and 439,861.82 acres, restored to market in March, 1873, under the act of July 14, 1870.

h 292.53 acres relinquished by the company deducted from the amount heretofore reported.

i 841.91 acres relinquished by the company deducted from the amount heretofore reported; 2,760 acres also deducted to correct an error in the report for 1879.

j 63.91 acres added to make the correct amount certified.

k 40 acres relinquished deducted from the amount heretofore reported.

l 160 acres relinquished and deducted; 729.61 acres also deducted to make the correct area patented.

m 429,084.18 acres certified to the State and 3,130.97 acres patented under this grant, lying southwest of Springfield, Mo., deducted from the amount previously reported and charged to the grant of July 27, 1866, to the Atlantic and Pacific Railroad Company. 40 acres relinquished and deducted.

n 320 acres relinquished deducted from amount given in previous reports.

o 120 acres relinquished deducted from amount given in previous reports.

p Includes 35,685.49 acres of the Chicago, Rock Island and Pacific Railroad, 109,756.85 acres of the Cedar Rapids and Missouri River Railroad, and 77,535.22 acres of the Dubuque and Sioux City Railroad, situated in the old Des Moines River grant of August, 1846, which amounts are a loss to the roads by the decision of the United States Supreme Court in the case of Wolcott *vs.* Des Moines Company (5 Wallace, 681).

q 40 acres relinquished deducted from amount previously reported.

r 320 acres outside the limits of the grant deducted from amount previously reported.

s 97.39 acres relinquished deducted from amount previously reported.

t 10,911.41 acres approved in 1874 not heretofore reported.

Statement exhibiting land concessions by Congress to States and corporations for railroad purposes, &c.—Continued.

Do	July 1, 1862	12	489	Union Pacific (Kansas division)	10		*l* 917,520.70
Do	July 2, 1864	13	356	.....do	20		
Do	July 3, 1866	14	79	Act requiring the company to designate route before December 1, 1866.			
Do	May 7, 1866	14	355	Resolution extending time for completion of road			
Do	Mar. 6, 1868	15	39	Act restoring the even-numbered sections on line of Pacific Railroad and branches at $2.50 per acre.			
Do	Mar. 3, 1869	15	324	Act extending the Union Pacific Railway, eastern division, line of road to Denver City, and authorizing transfer of lands by said company to the Denver Pacific Railroad Company between Denver and Cheyenne.			

a 53,619.45 acres deducted from the amount heretofore reported for the Saint Paul and Sioux City grant and charged to the grant for the Southern Minnesota, under which the land was approved.

b 2,716.95 acres deducted from the amount heretofore reported for the Southern Minnesota Extension grant and charged to the grant for the Southern Minnesota, under which the land was approved.

c 1,836.74 acres relinquished deducted from the amount heretofore reported.

d Includes 186,936.72 acres in the "Osage ceded reservation," which are a loss to the road under the decision of the Supreme Court in the case of the Leavenworth, Lawrence and Galveston Railroad Company *v.* The United States (2 Otto, 733).

e Includes 270,970.78 acres in the "Osage ceded reservation," which are a loss to the road under the decision cited in the preceding note. (The note in previous reports to the effect that the amount reported included 260,425.35 acres in said reservation is incorrect, as will appear upon comparison of the reports for 1876 and 1877.) 63,388.22 acres inadvertently omitted in 1877, and 1,663.36 acres in joint list No. 1, chargeable to this grant, have been added and several minor errors corrected.

f 9,465.28 acres relinquished deducted from the amount heretofore reported.

g 80 acres relinquished and 80 acres twice approved deducted from the amount heretofore reported.

h 20,814.83 acres reconveyed to the United States by the company, under the act of March 3, 1877, deducted from the amount heretofore reported.

i 25,847.46 acres (being one-half the amount contained in joint patents Nos. 1 and 2, issued to the Union Pacific and Sioux City and Pacific companies) heretofore omitted.

j 3,000 acres omitted from previous reports.

k 160 acres relinquished, deducted from the amount heretofore reported.

l 7,535.25 acres inadvertently omitted from previous reports.

a 800 acres relinquished deducted from the amount heretofore reported.
b 120 acres relinquished deducted from amount heretofore reported.
c 1,086.28 acres relinquished deducted from amount heretofore reported.
d 1,240.90 acres omitted since 1873 now included; 58.27 acres erroneously added in 1877, and 1,764.87 acres relinquished or twice patented deducted from amount heretofore reported; 429,084.90 acres certified and 3,130.97 acres patented to the State of Missouri under the grant of June 10, 1852, for the southwest branch of the Pacific Road (all lying southwest of Springfield, Mo.) have been deducted from the amount formerly reported under that grant and charged to the Atlantic and Pacific grant.

Official:

GENERAL LAND OFFICE,
June 30, 1882.

ATTACHMENT OF RAILROAD RIGHTS.

[See pages 280–284 and 1261]

Owing to various important changes made by the several corporations in withdrawals or changes in location of line of road, the corrected table to June 30, 1882, is given as follows:

Table showing the time when the various railroad rights attached to the lands granted, so far as at present determined.

States.	Names of roads.	Dates.
Illinois	Illinois Central	September 20, 1850. (Grant fully adjusted.)
Mississippi	Mobile and Ohio River	September 20, 1850. (Grant fully adjusted.)
	Vicksburg and Meridian	August 31, 1850. (Grant fully adjusted.)
	Gulf and Ship Island	*November, 1860.
Alabama	Mobile and Ohio River	September 20, 1850. (Grant fully adjusted.)
	Alabama and Florida	*August 30, 1856.
	Selma, Rome and Dalton	May 20, 1857.
	Coosa and Tennessee	*December 27, 1858.
	Coosa and Chattanooga	*July 3, 1858.
	Mobile and Girard	*May 13, 1858.
	Alabama and Chattanooga	October 11, 1858.
	South and North Alabama	May 22, 1866, between Decatur and a junction with the Alabama and Tennessee Railroad in township 22 south, range 2 west, and May 30, 1871, between that point and Montgomery.
Florida	Florida Railroad	From Fernandina to Cedar Keys, survey in the field, which was between May 17, 1856, and January 10, 1857, and from Waldo to Tampa, December 14, 1860.
	Florida and Alabama	*From May 17 to 31, 1856.
	Pensacola and Georgia	March 3, 1857, between Tallahassee and Alligator, in township 13 south, range 17 east, and from September 1 to October 22, 1857, between Tallahassee and Pensacola.
	Florida, Atlantic and Gulf Central.	*February 17, 1857, in the granted, and September 7, 1857, in the indemnity limits.
Louisiana	North Louisiana and Texas	January 27, 1857.
	New Orleans, Opelousas and Great Western.	†October 9, 1856, between New Orleans and Brashear City.
Arkansas	Little Rock and Fort Smith	August 13, 1855, and, under the reviving act, May 13, 1867.
	Saint Louis, Iron Mountain and Southern.	January 17, 1855, and, under the reviving act, July 28, 1866.
	Memphis and Little Rock	August 18, 1855, and, under the reviving act, May 13, 1867.
Missouri	Hannibal and Saint Joseph	March 8, 1853, in the granted, and June 16, 1853, in the indemnity limits. (Grant fully adjusted.)
	Pacific and Southwestern Branch.	1853. (Grant fully adjusted.)
	Saint Louis and Iron Mountain Extension.	‡April 7, 1870.
Iowa	Burlington and Missouri River	March 24, 1857. (See Supreme Court Reports, 9 Wallace, p. 80, Railroad Company *vs.* Fremont County.)
	Chicago, Rock Island and Pacific.	Survey in the field, which was from October 21, 1856, to March 2, 1857.
	Cedar Rapids and Missouri River.	Survey in the field, which was from September 1, 1856, to July 12, 1857.
	Dubuque and Sioux City	Survey in the field, which was from May 30 to August 31, 1856.
	Iowa Falls and Sioux City	Survey in the field, which was from May 30 to August 31, 1856.
	Chicago, Milwaukee and Saint Paul.	*August 19, 1864, from McGregor to section 12, township 95 north, range 35 west.

* Time taken as definite location from data on file in the General Land Office, subject, however, to correction upon receipt of evidence to the contrary.

† By the act of July 14, 1870, the lands granted west of Brashear City were declared forfeited to the Government, and have since been restored to homestead entry, excepting those falling within the limits of the grant of March 3, 1871, to the New Orleans, Baton Rouge and Vicksburg Railroad.

‡ The grant has never been accepted by the company, but the lands are still reserved, awaiting action by Congress.

Table showing the time when the various railroad rights attached, &c.—Continued.

States.	Names of roads.	Dates.
Iowa	Chicago, Milwaukee and Saint Paul.	From that point to the southwest corner section 18, township 96 north, range 38 west, between November 30 and December 5, 1868, and from that point to a connection with the Saint Paul and Sioux City Road, between June 28 and 30, 1869, the dates of survey in the field.
	Sioux City and Saint Paul	Survey in the field, which was between September 27 and October 4, 1866.
Michigan	Jackson, Lansing and Saginaw	August 4, 1858.
	Flint and Pere Marquette	August 3, 1857.
	Grand Rapids and Indiana	November 17, 1857, between Grand Rapids and the Straits of Mackinac.
	Bay de Noquet and Marquette	March 15, 1856, between Grand Rapids and Fort Wayne, Indiana.
	Houghton and Ontonagon	December 1, 1857. (See Secretary's decision of April 12, 1859.—Lester.)
	Chicago and Northwestern	June 23, 1859.
Wisconsin	Wisconsin Central	September 7, 1869.
	Chicago and Northwestern	From Fond du Lac to the north boundary of the State survey in the field, which was between May 1, 1856, and October 16, 1857.
	Chicago, Saint Paul and Minneapolis.	July 13, 1857, from Tomah to Lake Saint Croix; March 23, 1865, to additional grant under act May 5, 1864.
	Madison and Portage	June 16, 1857.
	Wisconsin Railroad Farm Mortgage Company.	July 13, 1857.
	Saint Croix and Lake Superior, and branch to Bayfield.	November 2, 1857, entire main line, except between Prescott and the south line of township 34 north, which was from November 24 to December 8, 1857. Survey in the field.
		Branch line from survey in the field, which was between May 3 and June 10, 1858.
		April 22, 1865, to additional grant under act of May 5, 1864.
Minnesota	Saint Paul and Pacific	November 9, 1857, within 6-mile limits, and January 16, 1858, between 6 and 15 mile limits of the main line and branch to Crow Wing, and March 3, 1865, to additional grant under that act.
	Saint Paul, Minneapolis and Manitoba.	From survey in the field, which was between May 18 and September 21, 1871.
	Winona and Saint Peter	July 17, 1857, from Winona to the west line of township 110, range 31 west, in the 6-mile limits, and March 22, 1858, between the 6 and 15 mile limits.
		From that point to the west line of township 108, range 37 west, from survey in the field, which was in April, 1864. (See Secretary's decision of August 15, 1874.)
		January 19, 1867, from that point to the Big Sioux River, in Dakota Territory.
	Minnesota Central	To original grant, from survey in the field, which was between June 8 and July 25, 1857, and to additional grant under act of March 3, 1865, date of act.
	Saint Paul and Sioux City	From Saint Paul to section 28, township 106 north, range 34 west, survey in the field, which was from June 8 to October, 1857, in the 6-mile limits, and March 28, 1858, between the 6 and 15 mile limits.
		From that point to section 30, township 104 north, range 39 west, from October 31 to November 8, 1858, within both 6 and 15 mile limits.
		From that print to the southern boundary of Minnesota, June 29, 1866.
		To the additional grant under the act of May 12, 1864, from date of act where the road was already definitely located.
	Lake Superior and Mississippi	September 25, 1866.
	Hastings and Dakota	March 7, 1867.
	Southern Minnesota	From the Mississippi River to Houston, survey in the field, which was from July 21 to August 5, 1867.
		From Houston to section 22, township 104 north, range 8 west, July 4, 1866.
		From that point to section 2, township 103 north, range 18 west, January 1, 1867.
		From that point to section 21, township 104 north, range 37 west, November 29, 1866.

Table showing the time when the various railroad rights attached, &c.—Continued.

States.	Names of roads.	Dates.
Minnesota	Southern Minnesota	From that point to section 4, township 104 north, range 39 west, October 24, 1866.
		From that point to the western boundary of the State, from survey in the field, which was between October 18 and 26, 1870.
Kansas	Missouri, Kansas and Texas	From Junction City to Humboldt, December 3, 1866.
		From Humboldt to Southern boundary of State, January 7, 1868.
	Leavenworth, Lawrence and Galveston.	November 15, 1866, from Lawrence to the north boundary of the Osage lands.
		November 26, 1867, to the southern boundary of Kansas.
	Saint Joseph and Denver City	March 21, 1870.
	Atchison, Topeka and Santa Fé	From Atchison to Emporia, survey in the field, which was from November 28, 1865, to January 13, 1866.
		From Emporia to Wichita, survey in the field, which was from May 18 to July 13, 1869.
		From the sixth principal meridian, near Newton, to section 27, township 23 south, range 5 west, September 23, 1871.
		From that point west to section 33, township 22 south, range 6 west, October 8, 1870.
		From that point west to the mouth of Pawnee Creek, in township 22 south, range 16 west, survey in the field, which was from June 21 to December 1, 1870.
		From that point to the west line of range 27 west, March 22, 1872.
		From that point to the western boundary of the State, May 30, 1872.
	CORPORATIONS.	
	Union Pacific	First one hundred miles west from Omaha, October 19, 1864.
		Second one hundred miles, June 20, 1866.
		From the 200th to the 380th mile post, November 23, 1866.
		From the 380th mile post to Brown's Summit (nearly to the 700th mile post), survey in the field, which was from April 1 to November 15, 1867.
		From Brown's Summit to Ogden, survey in the field, which was from May 1 to July 30, 1868.
		Withdrawal takes effect for the first hundred miles of road within 15-mile limits December 16, 1863, the date when the company filed their map of general route in the Department, and between the 15 and 20 mile limits July 2, 1864, date of additional grant. Withdrawal takes effect from the 100th mile post west from Omaha to Salt Lake City June 28, 1865, the date when the map of general route was filed in the Department. (See Secretary's decision of February 27, 1875.)
	Central Pacific	From Sacramento east to the south line of township 13 north, range 8 east, within ten miles of the road, June 2, 1863, and within twenty miles, July 2, 1864, date of act.
		*From that point to the east line of township 17 north, range 13 east, September 14, 1866.
		*From that point of the Big Bend of the Truckee River, in township 20 north, range 24 east, Nevada, October, 25, 1867.
		From that point to Humboldt Wells, December 18, 1866.
		From that point to Monument Point (head of Salt Lake), January 16, 1867.
		From that point to Ogden, July 18, 1868.
	Western Pacific	First twenty miles northward from San José, October 3, 1866.
		From that point to Sacramento, from survey in the field, which was between January 28 and December 15, 1868.
	Kansas Pacific	From the boundary line between Missouri and Kansas to section 17, township 11 south, range 18 east, Kansas, February 13, 1864.

*Time taken as definite location from data on file in the General Land Office, subject, however, to correction upon receipt of evidence to the contrary.

Table showing the time when the various railroad rights attached, &c.—Continued.

Corporations.	Names of roads.	Dates.
	Kansas Pacific	From that point to Fort Riley, from survey in the field, which was between February 13, 1864, and February 18, 1865. From Fort Riley to the 405th mile post (Sheridan, Kans.), July 11, 1866. From that point to Denver City, from survey in the field, beginning June 29, 1869, and ending April 25, 1870, at the 635th mile post.
	Denver Pacific	March 3, 1869, date of act.
	Central Branch Union Pacific	January, 1864, within the 10-mile limits, and July 2, 1864, date of act, within the 20-mile limits.
	Burlington and Missouri River	June 15, 1865.
	Sioux City and Pacific	November 9, 1866, in Nebraska, and in Iowa, from survey in the field, which was between November 20 and December 7, 1866.
	Northern Pacific	From a junction with the Lake Superior and Mississippi Road, in Minnesota, to the Red River of the North, November 21, 1871. From the Red River of the North to the Missouri River, in Dakota Territory, May 26, 1873. From the Missouri River, in Dakota Territory, to the Little Missouri River, in said Territory, July 20, 1880, the date of filing map of definite location in General Land Office. From a point near Wallula, in Washington Territory, to a point near Spokane Falls, in said Territory, October 4, 1880. From the Little Missouri River, in Dakota Territory, to the Yellowstone River, at the mouth of Glendive Creek, Montana Territory, October 25, 1880. From Glendive Creek, Montana Territory, to the Tongue River, in said Territory, June 25, 1881, and from said Tongue River to the eastern boundary line of Crow Indian Reservation, in said Territory, June 25, 1881. From the eastern boundary line of Crow Reservation, in Montana Territory to the western boundary of said Crow Reserve, in said Territory, June 27, 1881. From Spokane Falls, in Washington Territory, to Lake Pend d'Oreille, in Idaho Territory, August 30, 1881. From Kalama, Washington Territory, north to Tenino, sixty-five miles, September 13, 1873. From Tenino to Tacoma, on Puget Sound, May 14, 1874. According to a decision of the Secretary of the Interior, dated March 22, 1873, the first withdrawal of lands takes effect from the acceptance of the map of general route by the Department, from which time settlement is excluded from the granted sections, and the alternate reserved sections are raised to $2.50 per acre. The first map of general route through Minnesota and a portion of Washington Territory was accepted August 13, 1870, subsequently amended in parts, both in Minnesota and Washington Territory. The map of general route through Dakota, Montana, Idaho, and a portion of Washington Territory was accepted February 21, 1872. The map of general route of the branch line in Washington Territory was accepted August 15, 1873, and the map of amended route of branch line was accepted June 11, 1879, but the withdrawal takes effect, so far as respects the lands affected by the change, from the receipt of the letters at the district offices.
	Atlantic and Pacific	From Springfield, Mo., to the western boundary of the State, December 17, 1866. From that point to the mouth of Kingfisher Creek, in Indian Territory, December 2, 1871. From that point to the eastern boundary of New Mexico, February 7, 1872. From that point to the eastern boundary of California, March 12, 1872. From San Francisco to San Miguel, Cal., March 12, 1872.

Table showing the time when the various railroad rights attached, &c.—Continued.

Corporations.	Names of roads.	Dates.
	Atlantic and Pacific	Through the county of Los Angeles and part of San Bernardino, Cal., March 12, 1872. From San Miguel Mission to the Los Angeles County line, August 15, 1872. From a point in township 7 north, range 7 east, S. B. M., San Bernardino County, to the Colorado River, August 15, 1872.
	Texas Pacific	Road not yet definitely located. Lands withdrawn upon a preliminary line, withdrawal taking effect from date of receipt of the order at the district land offices, which was as follows: New Mexico Territory, December 4, 1871; Arizona Territory, December 26, 1871; California, October 15, 1871.
	New Orleans, Baton Rouge and Vicksburg.	Road not yet definitely located. Lands withdrawn upon a preliminary line, taking effect from date of receipt of the order at the district offices, which was as follows: Letter of November 29, 1871, received at New Orleans December 11, 1871; letter of November 29, 1871, received at Natchitoches December 20, 1871; letter of March 27, 1873, received at New Orleans April 3, 1873.
	Oregon Branch of the Central Pacific, formerly California and Oregon.	From Roseville (on the Central Pacific Railroad) to Salt Creek, in township 32 north, of range 5 west, September 13, 1867. From that point to north line of township 46 north, of range 5 west, August 5, 1871.
	Southern Pacific	First withdrawal became effective January 3, 1867, date of filing the map of general route in the General Land Office. (See Secretary's decision of April 23, 1875, in case of Alfred Queen, and decision of August 2, 1878, in Samuel Tome *et al.*) Withdrawal for branch line, under act of March 3, 1871, became effective April 3, 1871. Right of road attaches from the date of filing the maps of definite location in the General Land Office.
	Oregon and California	From Portland, Oreg., south to township 10 south, range 2 west, February 16, 1870. From that point to the south line of township 13 south, April 28, 1870. From that point to the south line of township 27 south, April 25, 1870. From that point to near the south line of township 30 south, April 13, 1871.
	Oregon Central	From Portland, Oreg., to the Yamhill River, near McMinnville, and from a junction near Forest Grove toward Astoria, twenty miles, May 29, 1871. From Astoria to Castor Creek, in the direction of Portland, January 31, 1872.

Official:

GENERAL LAND OFFICE,
June 30, 1882.

RIGHT OF WAY GRANTED TO CERTAIN RAILWAY COMPANIES IN CERTAIN STATES AND TERRITORIES.

[See pages 285, 286, and 1263.]

Owing to alterations in, and changes of names of several railroad corporations, the correctod list to June 30, 1882, is given below:

Rights of way granted to railway companies in certain States and Territories.

States and Territories.	Date of laws.	Statutes.	Page.	Name of company.
Arizona	Mar. 3, 1875	18	482	Arizona and Nevada Railroad and Navigation.
	Mar 3, 1875	18	482	Arizona Northern Railway.
	Mar. 3, 1875	18	482	Arizona Southern Railroad.

d Sales made during years 1875, '76, '77, not being reported, are not included in this amount.
e All lands sold for $800,000 to the Iowa Railroad Land Company on September 15, 1860.
f The West Wisconsin Railroad Company, of which this organization is the successor, had disposed of 252,752.73 acres before the property came into the hands of the new company.
g Of this quantity 317,061.26 acres were conveyed for purchase of the first 105 miles of road.

OFFICE COMMISSIONER OF RAILROAD ACCOUNTS, *November* 1, 1882.

LANDS GRANTED RAILROADS—LANDS PATENTED TO CERTAIN RAILROAD COMPANIES—RAILROADS NOT COMPLETED IN TIME FIXED BY LAW.

The three following communications from pages 789 to 873 from the Commissioner of the General Land Office in response to congressional inquiries being subjects of vital and present interest, and containing a mass of most interesting and useful statistics and information, are given in full.

A letter from the Commissioner to the Secretary of the Interior of date March 28, 1882, in relation to resolution of House of Representatives of January 9, 1882, as to lands granted railroads. (See pages 789 to 823.)

A letter from the Secretary of the Interior of date December 29, 1882, in answer to resolution of House of Representatives passed December 14, 1882, as to land patents to certain railroad companies. (See pages 824 to 860.)

A letter from the Secretary of the Interior of date January 13, 1883, in answer to letter of Hon. T. C. Pound, chairman Committee on Public Lands, House of Representatives, as to certain land-grant railroads not completed within the period fixed by law. (See pages 861 to 873.)

LAND-GRANT RAILROADS- OFFICIAL REPORTS AND LETTERS.

Additional information is also inserted relating to land-grant railroads as follows:

A letter from the Secretary of the Interior transmitting to the Congress information in relation to a certain decision of the Commissioner of the General Land Office and the opinion of the Attorney-General relating to the Northern Pacific Railroad of date January 19, 1882. (See pages 874 to 879.)

Also one of like purport dated February 2, 1882. (See page 879.)

Report No. 1283, Part 1, of the House Committee on the Judiciary, in relation to the Northern Pacific Railroad, dated June 6, 1882. (See page 880.)

Report No. 1283, Part 2, of Mr. Payson of the House Committee on the Judiciary, submitting the views of the minority of said committee as to the Northern Pacific Railroad, dated July 24, 1882. (See page 882.)

Report No. 1803 of the House Committee on the Judiciary in relation to the Texas and Pacific Railroad land grant, dated August 3, 1882, together with the views of the minority of the committee. (See page 892.)

Report No. 1284 from the House Committee on the Judiciary in relation to railroad land grants to certain States and recommending their forfeiture, dated June 6, 1882. (See page 895.)

Letter from the Secretary of the Interior in relation to alleged excess in certification of lands to certain railroad companies, dated July 10, 1882. (See page 898.)

Report No. 906 from the Senate Committee on the Judiciary reporting a bill (S. No. 2301), providing a method of forfeiting railroad land grants, dated January 2, 1883. (See page 908.)

A letter from the Auditor of Railroad Accounts to the Hon. R. M. McLane, relative to land grants to Pacific railroads, February 7, 1880, and amount of bond subsidies. (See pages 911 to 935.)

Letter and decision of Secretary of the Interior of July 11, 1883, as to indemnity lands of Northern Pacific Railroad, and letter and circular of General Land Office of May 22, 1883. (See page 891.)

A letter from the Secretary of the Interior to the House dated February 27, 1883, giving information in relation to telegraph lines along land-grant railroads. (See page 910.)

LANDS GRANTED RAILROADS.

For areas certified or patented to June 30, 1883, see pages 756 et seq., and report for 1883, Commissioner General Land Office.

[H. Ex. Doc. 144, Forty-seventh Congress, first Session.]

Letter from the Secretary of the Interior, in response to a resolution of the House of Representatives, February 9, 1882, relative to lands granted by the Government to certain railroads.

DEPARTMENT OF THE INTERIOR,
Washington, March 28, 1882.

SIR: In answer to House resolution of the 9th ultimo, calling on me for information concerning land-grant railroads, I have the honor to transmit herewith report on the subject, under date of yesterday, by the Commissioner of the General Land Office, to whom the resolution was referred. This report gives the material information called for, so far as it can be obtained from the records of this Department, as I am advised by the Commissioner of the General Land Office.

Very respectfully,

S. J. KIRKWOOD,
Secretary.

The SPEAKER
of the House of Representatives.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., March 27, 1882.

SIR: I have the honor to acknowledge the receipt on the 11th ultimo, by reference from the Department on the 10th, for report, of a resolution of the House of Representatives, passed the 9th ultimo, as follows:

"*Resolved*, That the Secretary of the Interior be requested to inform the House, at his earliest convenience, the names of all the railroad companies to which the Government has granted lands to aid in the construction of their railroads, and the names of all States and railroad companies where grants of public lands have been made by the Government to said States for the benefit of said railroad companies in the construction of their railroads, which have not completed their said roads within the time provided by law; the amount of land embraced in each grant, and the amount disposed of by each of said railroad companies and States, and the dates of all acts of Congress relating to each of said grants, and the number of miles of each of said railroads completed under and pursuant to the acts making each grant, as well as the number of miles of each remaining uncompleted at the date at which said acts required the completion of the same; and he is also requested to give the name of each of said railroad companies and States which are required by law to reimburse the Government for moneys expended by it in the surveying, selecting, or conveying said lands comprised within each of their said grants, and what amount; and also what amount, if any, is now due from each of said companies and States by way of reimbursement for the cost of said surveying, selecting, and conveying said lands, stating the amount in full by debit and credit on said indebtedness."

The States and corporations to which grants have been made, for the benefit of roads which have not been constructed, in whole or in part, within the time required by the granting acts, and which I understand to fall within the terms of the inquiry, are specified in the accompanying tabular statement marked A. Said statement also shows the several acts making grants and increasing same, together with the acts granting an extension of time for the completion of several of the roads; the date when each road should have been completed; the date when (if at all) each road was completed; the length in miles of each road as definitely located or proposed; the number of miles completed within the period required by the granting act; the number of miles completed after such period; the number of miles uncompleted at the time when the road should have been completed, and the number of miles now uncompleted.

Said statement also shows the number of sections "in place" granted for each mile of road; and grants "to the amount of" a certain number of sections per mile; also the number of acres certified, approved, or patented to each State or corporation.

Unless otherwise indicated, the number of acres given in the column headed "approximate estimate of the number of acres so granted," is the result obtained by multiplying the number of acres granted per mile (allowing 640 acres to each section) by the number of miles of located road.

No deductions whatever, unless expressed, are made for lands that may be situated in limits common to two or more roads. Neither does the statement show the cases where it would be impossible to find sufficient land within the limits of a grant to satisfy it, as such fact could not be clearly demonstrated except by adjusting such grant tract by tract, which it is not possible to do for reasons hereinafter stated. The resolution asks the amount of land embraced in each grant. Such amount cannot be stated specifically. At the beginning it was held that the grants to States to aid in the construction of roads were present grants, and it was believed by the Department that the duty of "disposal" was properly in the States charged with executing the trusts. Accordingly, in all the earlier grants, immediately upon the location of the roads and determination of the limits of the grants, this office and the Department certified, in whole, to the States, the lands to which companies would ultimately have been entitled, had the roads been completed as required; and, in some cases, even in excess of that amount. This certification was on the theory that the grants were of absolute quantity, restricted only by certain lateral limits; that is, that the States were entitled to "indemnity" for lands lost, for any reason, in the granted limits, to the extent of such loss, provided only that the quantity of the grants could be found available within the limits to which they were restricted.

The Supreme Court of the United States (October term, 1875), in the case of the Leavenworth, Lawrence and Galveston Railroad Company *vs.* The United States (2 Otto, 733), decided, in effect, that grants would be entitled to indemnity only for lands in granted limits lost to them between the date of the granting acts and the definite location of the roads. Following this rule, it would, of course, be necessary in determining the actual quantity of any grant to examine tract by tract the lands in the granted limits, and ascertain what lands were lost prior to the date of the grant, and from that date up to the definite location of the road, thus ascertaining the amount to be made up from the indemnity limits to adjust the grant.

This rule was modified by your predecessor October 16, 1880, following the opinion of the Attorney-General, dated June 5, 1880, in the case of the Western Railroad of Minnesota, wherein it was held and decided that properly construed such grants would be entitled to indemnity for lands lost in the granted limits, either before or after the granting act and up to the definite location of the roads, excepting only *reserved* lands.

It was also held and decided that such grants were not of absolute quantity, like the Pacific railroad grants, but were grants in place, to the amount of whatever might be the actual area of the granted sections for so many sections in width, whether such sections were full or fractional and contained more or less land (see pages 158 to 163, inclusive, annual report of this office, for 1881). This modified rule would still require the detailed examination of grants above suggested, and it would not have been practicable to have accomplished the same up to the present time as to more than a few grants.

Some grants were under examination under the rule, when, in connection with the grant to Minnesota, for the Saint Paul, Minneapolis and Manitoba Railroad (formerly the Saint Paul and Pacific, Saint Vincent extension), the whole question as to what losses would entitle the State to indemnity was presented to and taken under consideration by you. I have not been informed of your decision in the matter, and am therefore not in a position to determine the exact number of acres granted were it practicable to do so in time for this report. For this reason, and after consultation with you, I have, in the accompanying table, unless otherwise indicated, estimated the quantity granted as if the grant were full and the company entitled to that quantity.

As a matter of fact many of the grants could not receive so much, for the reason that there is not available within the prescribed limits enough land to satisfy them.

Where grants are made "to the amount of" a certain number of sections per mile, such amount is stated in the column headed "Estimated quantity of land (in acres) embraced in the limits of the grant," and is produced, unless otherwise stated, by multiplying the number of acres granted per mile by the number of miles of road located.

The resolution asks the amount of land disposed of by each company and State. This office has no information whatever on the subject. The disposition of the lands by States and companies, after their certification or patenting by the United States, is not a matter of record in the Department.

The grants to States and corporations which are included in the tabular statement herewith are more particularly described, and the status of each road, to aid in the construction of which the grants were made, more clearly shown in the following detailed statement:

GULF AND SHIP ISLAND.

Under the act of August 11, 1856, a grant of six sections of land per mile was made to the State of Mississippi for a road from "Brandon to the Gulf of Mexico." Provision was made in the act for sale by the State of the lands granted, the quantity

sold to be proportionate to the miles of road constructed from time to time, except in the case of the sale of the first one hundred and twenty sections, which could be sold in advance of the construction of any portion of the road. It was also provided that if the road was not completed within ten years the lands unsold should revert to the United States.

On August 15, 1856, prior to location of the road, the lands falling within the probable limits of the road were withdrawn from sale or location by Notice 567. A map of definite location of the road was filed in this office November 27, 1860. No lands have been approved to the State for said road, neither has any portion of the road been constructed. The reservation of lands for the road ceased on August 11, 1866.

The same act provides for a road from

TUSCALOOSA TO MOBILE RAILROAD.

within the State of Mississippi, granting for said purpose the same quantity of land and in the same manner, upon the same limitations and restrictions in every respect, as in the case of the Gulf and Ship Island Road. The withdrawal from sale or location of lands falling within the probable limits of the road was made August 15, 1856, by Notice 567. No map of location has been filed, neither has any portion of the road been constructed. No lands have been approved to the State of Mississippi for said road. The reservation of lands for the road ceased on August 11, 1866.

A like grant was made by section 6 of the same act (August 11, 1856) to the States of Alabama, Mississippi, and Louisiana, to aid in constructing a road from

MOBILE TO NEW ORLEANS.

The withdrawal of lands for this road was made August 15, 1856, by Notice 557. No map of location has been filed. No portion of the road has been constructed. No lands have been approved to either of the States named for the benefit of said road. The reservation of lands for the road ceased August 11, 1866.

RAILROADS IN ALABAMA.

The act of June 3, 1856, granted to the State of Alabama, for the purpose of aiding in the construction of certain railroads named below, every alternate section of land designated by odd numbers for six sections in width on each side of each of said roads. The act provides indemnity for lands within the limits of the grant, sold or preempted prior to the definite location of each road. It also provides that the lands granted to the State "shall be subject to the disposal of the legislature thereof for the purposes aforesaid and no other." Section 4 of the act provides—

"That the lands hereby granted to said State shall be disposed of by said State only in the manner following, that is to say: That a quantity of land, not exceeding one hundred and twenty sections for each of said roads, and included within a continuous length of twenty miles of each of said roads, may be sold; and when the governor of said State shall certify to the Secretary of the Interior that any twenty continuous miles of any of said roads is completed then another quantity of land hereby granted, not to exceed one hundred and twenty sections for each of said roads having twenty continuous miles completed as aforesaid, and included within a continuous length of twenty miles of each of said roads, may be sold; and so, from time to time, until said roads are completed; and if any of said roads is not completed within ten years, no further sale shall be made, and the lands unsold shall revert to the United States."

The lands falling within the probable limits of the several roads provided for in the act were withdrawn from sale or location by Notice 565, June 21, 1856. The following railroads were provided for in said act:

COOSA AND TENNESSEE.

This road was authorized by that portion of the act which provided for a railroad "from the Tennessee River at or near Gunter's landing, to Gadsden, on the Coosa River." A map of definite location, showing 36½ miles, was filed in this office, January 18, 1859. Under the provisions of said section, 67,784.96 acres of land were approved June 27, 1860, to the State of Alabama for the benefit of the said railroad. (See Railroad Land Company *vs.* Courtright, 21 Wall., 310, as to patent for 120 sections.) Whether said lands were transferred to the company by the State is not known by this office. No portion of the road has been constructed. The lands withdrawn and not approved to the road have not been restored to market, as they are within the limits of the withdrawal for the Wills Valley (now Alabama and Chattanooga) Railroad, the grant for which is not fully adjusted.

COOSA AND CHATTOOGA.

This road was authorized by that portion of the act which provided for a railroad from "Gadsden to connect with the Georgia and Tennessee and Tennessee line of railroads, through Chattooga, Wills, and Lookout Valleys," to be completed within ten years. The Coosa and Chattooga Railroad Company was organized under said act, and filed in this office, September 20, 1858, a map of definite location of a railroad from Gadsden, on the Coosa River, through the Chattooga Valley east of Lookout Mountain, to the Georgia State line, a distance of about 37½ miles. No portion of the road has been constructed. The lands withdrawn have not been restored to market, as they lie within the limits of the Wills Valley (now Alabama and Chattanooga) Railroad, the grant for which is not fully adjusted.

(NOTE.—Both the Wills Valley Railroad Company and the Coosa and Chattooga Railroad Company were organized under the grant above named, the Wills Valley Company locating [and *building*] through the Wills and Lookout Valleys, and the Coosa and Chattooga Railroad Company through the Chattooga Valley. The grant was conferred on the Wills Valley Railroad Company by a joint resolution of the legislature of Alabama, approved January 30, 1858.)

ELYTON AND BEARD'S BLUFF.

This road was authorized by that portion of the act which provided for a railroad "from Elyton to the Tennessee River, at or near Beard's Bluff, Alabama." No map of location has been filed, neither has any portion of the road been constructed. The reservation of lands for the benefit of this road ceased June 3, 1866, the date of the expiration of the grant. It is not known to this office that any corporation or company organized under the act ever existed.

MEMPHIS AND CHARLESTON.

This road was authorized by that portion of the act which provided for "the Memphis and Charleston Railroad, extending from Memphis, on the Mississippi River, in Tennessee, to Stevenson, on the Nashville and Chattanooga Railroad, in Alabama." The State of Alabama refused to accept the grant for said road, and the lands withdrawn were restored to market, by Notice 595, February 19, 1858.

MOBILE AND GIRARD.

This road was authorized by that portion of the act providing for a road from "Girard to Mobile, Ala." A map of definite location of the road from Girard to Blakely, Alabama, on Mobile Bay, a distance of 223.6 miles, was filed in this office on the 1st of June, 1858. Under the construction of the act as held by this Department until October, 1875, and hereinbefore referred to, there were nine lists of land, aggregating 504,145.86 acres, approved to the State of Alabama for the benefit of said road, between *April* 26, 1860, and *January* 3, 1861, inclusive. There is no evidence on file in this office, or in the Department, of the construction of any portion of said road, yet it is known unofficially that a railroad has been constructed and is in operation from Girard to Troy, a distance of 84 miles, on the line (or very nearly so) of definite location. It was held by this office, January 15, 1874, by Commissioner Drummond, that if any portion of the road had been constructed in time, it would, upon a proper showing to that effect, be entitled to an amount proportionate to the number of miles so constructed. Under this theory the road would, upon proper evidence of the construction of 84 miles of road, be entitled to 322,560 acres of land, but there had been (as before stated) 504,145.86 acres, or an excess of 181,585.86 acres, approved to the State for this road in 1860–'61.

Commissioner Drummond recommended the restoration to entry, by formal revocation on the part of Congress, of the portions of the grant not earned. No restoration of such lands, however, has yet been made by Congress, nor has any restoration been attempted, or declaration of forfeiture made in the case of any similar grant, by this office or the Department, because of the decision by the Supreme Court of the United States, October, 1874, in the case of Schulenberg *vs.* Harriman (21 Wallace, 44), where the conclusion was reached that acts of Congress containing provisions and restrictions such as are found in the act of June 3, 1856, import a present grant to the extent of passing over to the State the legal title to the odd sections designated; that a provision—

"That all lands remaining unsold after ten years shall revert to the United States if the road be not then completed, is no more than a provision that the grant shall be void if a condition subsequent be not performed; * * * [that] it is settled law that no one can take advantage of the non-performance of a condition subsequent

annexed to an estate in fee but the grantor or his heirs, or the successors of the grantor if the grant proceed from an artificial person; and if they do not see fit to assert their right to enforce a forfeiture on that ground, the title remains unimpaired in the grantee. * * * In what manner the reserved right of the grantor for breach of the condition must be asserted so as to restore the estate, depends upon the character of the grant. If it be a private grant, that right must be asserted by entry or its equivalent. If the grant be a public one, it must be asserted by judicial proceedings authorized by law, * * * or there must be some legislative assertion of ownership of the property for breach of the condition, such as an act directing the possession and appropriation of the property, or that it be offered for sale or settlement."

Upon the question of sales by the State after failure to complete the road within the statutory period, the court says:

"The provision in the act of Congress of 1856, that all lands remaining unsold after ten years shall revert to the United States if the road be not then completed, is no more than a provision that the grant shall be void if a condition subsequent be not performed. * * * The prohibition against further sales if the road be not completed within the period prescribed adds nothing to the force of the provision. A cessation of sales in that event is implied in the condition that the lands shall then revert; if the condition be not enforced, the power to sell continues as before its breach, limited only by the objects of the grant and the manner of sale prescribed in the act."

It was also held in said decision that where no action had been taken by legislative or judicial proceedings to enforce a forfeiture of the estate granted by the act of 1856, the title remains—

"In the State as completely as it existed on the day when the title by location of the route of the railroad acquired precision and became attached to the adjoining alternate sections."

SELMA, ROME AND DALTON, FORMERLY ALABAMA AND TENNESSEE.

This road was authorized by that portion of the act which provided for the "Coosa and Alabama Railroad, from Selma to Gadsden." A map of definite location of the line of route from Selma, via Calera, Rome, Talladega, and Jacksonville, to Gadsden, a distance of 167.35 miles, was filed in this office March 27, 1858. The line of route, although indirect and tortuous, was approved by the Secretary of the Interior May 15, 1858.

On the 8th of June, 1859, a certificate of the governor of Alabama, dated June 4, 1859, was filed in this office, showing the construction of 100 miles of the road from Selma north. No further evidence of construction was received in this office until February 13, 1869, when a certificate was filed in this office by the governor of Alabama, dated January 13, 1869, showing the construction of a railroad from Selma, by way of Montrevalle, Columbia, Talladega, and Jacksonville, and thence to the Georgia State line, a distance of 171.754 miles.

The road as constructed did not follow the line of location beyond Jacksonville, neither was it ever completed to Gadsden, the line built running northeast from Jacksonville to the Georgia State line, instead of running from Jacksonville northwest to Gadsden, leaving 23.42 miles (from Jacksonville to Gadsden) of the located line unconstructed. It will be observed that only 100 miles of the road were constructed within the period required by law, 143.93 miles were constructed upon the located line (43.93 miles being constructed after the time required by law), and had so much of the road been constructed within the proper period it would have been entitled to 552,691 acres, provided there was that quantity of vacant lands within the limits of its grant.

On May 24, 1859, and May 7, 1860, there were selections of land aggregating 440,700.16 acres, approved to the State of Alabama for the benefit of this road, and a portion of the lands so approved lie opposite the 23.42 miles of unconstructed road.

The act of May 23, 1872, confirmed to the State of Alabama for the sole use and benefit of the Selma, Rome and Dalton Railroad Company, the successors of the Alabama and Tennessee Railroad Company, all the lands previously certified to the said State for the benefit of the last-named company. Since the passage of said act, but 16,515.21 acres have been approved (May 19, 1875) to the State for the benefit of said road (Selma, Rome, and Dalton). The grant has not been adjusted, and the vacant odd sections within the limits of the grant are still withdrawn for the benefit of the road.

SAVANNAH AND ALBANY.

The seventh section of the act of March 3, 1857, granted to the State of Alabama for the purpose of aiding in the construction of a railroad

"From the line of Georgia on the Chattahoochee River to the City of Mobile, Ala-

bama, * * * alternate sections of the public lands to the same extent and in the same manner, and upon the same limitations and restrictions in every respect, as was granted to aid in the construction of other railroads.

Under the act of June 3, 1856, above referred to, granting lands to the State of Alabama, April 21, 1857, the lands falling within the probable limits of the road were withdrawn from sale or location. No map of location was filed, and no portion of the road was ever constructed. The reservation of lands for said road ceased March 3, 1867.

RAILROADS IN FLORIDA.

The act of May 17, 1856, granted to the State of Florida, to aid in the construction of certain railroads in said State, every alternate section of land designated by odd numbers, for six sections in width on each side of such roads. The provisions in said act for indemnity, for disposition of the lands by the legislature of said State, for the sale of such lands, and for the reversion of the unsold lands to the United States, in the event of failure to complete the roads within ten years, are identical with those contained in the act of June 3, 1856, above quoted, granting lands to the State of Alabama. The following described railroads are provided for by the act (May 17, 1856):

ATLANTIC, GULF, AND WEST INDIA TRANSIT, FORMERLY FLORIDA RAILROAD.

This road was authorized by that portion of the act which provides for a road "from Amelia Island, on the Atlantic, to the waters of Tampa Bay, with a branch to Cedar Key on the Gulf of Mexico." The lands falling within the probable limits of the road (main line and branch) were withdrawn from sale and location, by telegram, on the 17th May, 1856, and by Notice 568, September 9, 1856. On the 22d September, 1857, a map of definite location of that portion of the road from Fernandina to Cedar Keys, 155 miles in length, was filed in this office. Eighty-four miles of the road so located was on the main line, and 71 miles (from Waldo to Cedar Keys) was the branch line complete. The whole of said 155 miles was completed in 1860, entitling the State to, say, 595,200 acres for the benefit of the road. Up to the present time but 290,183.28 acres have been approved to the State under this grant. Said lands were approved prior to January 7, 1860.

The reservation of lands on that part of the main line from Waldo to Tampa Bay, 150 miles in length, was not respected by this office after May 17,1866, entries being permitted of all lands (unless otherwise reserved) outside and south of the 15-mile indemnity limits of the constructed portion of the road. Under date of December 7, 1875, the president of the company, Mr. Yulee, transmitted a map showing the proposed route of the main line from Waldo to Tampa, and asked that the lands along the said line and within the limits prescribed by the act of May 17, 1856, be withdrawn for the benefit of the road. The map and accompanying papers were submitted to Secretary Chandler, who declined to receive or approve the map, and directed, by letter of April 27, 1876, that it be returned to Mr. Yulee. Secretary Chandler says in said letter that he does not question the principle established in the case of Schulenberg *vs.* Harriman; that the title which vested in the State by the grant and definite location of the road thereunder could not be divested by the mere failure to complete the road *so located* within the time fixed by the act, but that he finds nothing in that case to sustain the doctrine that the State retains the right for an indefinite period and long after the date fixed for the completion of the road to designate its route and thus give effect to the grant. He also held that failure to *locate* the road before the time fixed for the completion of the road should be regarded as evidence of abandonment of the grant.

On October 29, 1879, the company, through its attorney, filed in this office the map rejected by Secretary Chandler, and asked that it might, together with new and material evidence bearing upon the original location of the road, which accompanied it (the map), be submitted to the then Secretary of the Interior (Schurz) for review.

On the 10th of November, 1879, the map, evidence, and application for review were submitted to the Secretary. The evidence submitted showed conclusively that a map of definite location of the road from Waldo to Tampa was filed in this office by the engineer of the company *December* 14, 1860; which map being returned to him January 22, 1861, for the procurement of the governor's certificate, was lost or mislaid; and that the last map presented was a duplicate of the original map of definite location.

Secretary Schurz, after due consideration of the facts presented, held in effect that the return of the map as above related was unnecessary; that it should have been accepted by this office, as it was undoubtedly recognized by the officers of the company, and by the State authorities, as the definite location of the road; and that the map was filed in the same manner as the surveys of previous portions of the line had been filed in the office of the secretary of state of Florida. The Secretary therefore

approved the map and directed that the necessary withdrawal of lands be made to protect the rights of the company and secure the proper adjustment of the grant upon the line designated. Such withdrawal was ordered by this office and took effect March 26, 1881. It may be proper to state in this connection that the company have filed a formal waiver of all claims to lands within the limits of the road occupied by *bona fide* settlers at the date of said withdrawal. Upon the question of certifying lands to the State under the grant, the Secretary decided that the lands could be legally certified, referring to the case of Schulenberg *vs.* Harriman hereinbefore quoted, opinions of Attorney-General, November 29, 1879, case of Southern Minnesota Railroad Company, and October 26, 1880, case of Atlantic and Pacific Railroad Company. The governor of Florida, under date of July 16, 1881, certifies to the completion of 44.88 miles of road from Waldo to Ocala.

PENSACOLA AND GEORGIA.

This road was authorized by that portion of the act which provides for a railroad "from Saint John's River at Jacksonville to the waters of Escambia Bay, at or near Pensacola."

The Pensacola and Georgia Railroad Company was organized to construct that portion of the road running from Lake City to Pensacola, and the grant for that portion of the road conferred upon them by the State. Said company filed maps of definite location for said portion, which covered about 307 miles of road, prior to May 30, 1858. The lands falling within the probable limits of this road were withdrawn by telegram and letter of May 17, 1856, and May 23, 1856, by Notice 558.

No evidence of the construction of any portion of this road has been filed in this office, but the road is believed to be constructed and in operation from Lake City to Chattahoochee River, a distance of, say, 150 miles. Had the whole length of road located (307 miles) been constructed the State would have been entitled to 1,178,880 acres of land, provided so much vacant and unappropriated land could have been found within the limits of the grant. Prior to *October* 30, 1860, 1,275,579.52 acres were approved to the State for the benefit of this road. It will be observed that said amount exceeds, by 96,779.52 acres, the entire amount that the State would have been entitled to had the whole length of road (307 miles) been constructed; also, that it exceeds by 699,579.52 acres the amount the State could properly receive and sell upon evidence of the construction of 150 miles of road. It should be stated, however, that, although the 1,275,579.52 acres lie opposite that portion of the road from Lake City to Pensacola, which was to be constructed by the Pensacola and Georgia Railroad Company, the whole quantity was approved to the State of Florida for the benefit of the road "from Saint John's River, at Jacksonville, to the waters of Escambia Bay, at or near Pensacola."

Whether the State conferred any portion of the said 1,275,579.52 acres upon the Florida, Atlantic and Gulf Central Railroad Company (below referred to), which constructed that portion of the road from Jacksonville to Lake City, is not known to this office; but it is not probable that such action was taken, as the last-named road would only be entitled to a portion of the *indemnity* lands so certified. The vacant unapproved and unselected lands in odd sections within the limits of the withdrawal for this road have not been restored to market for sale or entry.

FLORIDA, ATLANTIC AND GULF CENTRAL.

The company bearing the above name was authorized by the State to construct that portion of the road "from Saint John's River at Jacksonville to the waters of Escambia Bay, at or near Pensacola," which was located from Jacksonville to Lake City, a distance of 59 miles. Said road is believed to be constructed and in operation, but no evidence to that effect is on file in this office of Department. The construction of 59 miles of road within the proper period would entitle the State to 226,560 acres of land. Prior to October 6, 1860, 29,384.18 acres were approved to the State for the benefit of this road. No further approvals have been made for the benefit of said road; neither have the unselected or unapproved vacant odd sections within the limits of the grant been restored to sale or entry.

RAILROADS IN LOUISIANA.

VICKSBURG, SHREVEPORT AND TEXAS, NOW NORTH LOUISIANA AND TEXAS.

The grant of this road was by the act of June 3, 1856, and was to aid in the construction of a railroad from the Texas line in the State of Louisiana, west of the town of Greenwood, via Greenwood, Shreveport, and Monroe, to a point on the Mississippi River opposite Vicksburg. The lands granted were the alternate, odd-numbered sections, for six sections in width, on each side of said road; and in case the

United States had, when the line of said road was definitely fixed, sold any sections granted as aforesaid, or to which the right of pre-emption had attached, the State was authorized to select from the lands nearest to the tiers of sections granted, but not farther than 15 miles from the line of the road, so much land in alternate sections as would be equal to the lands sold by the United States, or to which the right of pre-emption had attached.

The road was definitely located from the Mississippi River, opposite Vicksburg, to the Texas State line, a distance of 189 miles, in the year 1857. The act required that the road should be completed within ten years. On September 20, 1872, the governor of Louisiana certified to the completion, within the time specified in the granting act, of 94 miles of said road, to wit, 20 miles extending from the Texas State line to the Red River, at Shreveport, and 74 miles from the Ouachita River, at Monroe, to the Mississippi River, opposite Vicksburg. That portion of the line between Monroe and Shreveport, 95 miles, has never been constructed.

On October 7, 1859, there were certified to the State for the benefit of the said road 353,212.68 acres, and on January 10, 1874, 100,652.76 acres (being a part of the lands theretofore certified and lying opposite the *constructed* portion of the road) were *re-certified* to the State.

All the vacant unselected and unapproved lands in odd sections within the limits of the grant are still withdrawn or reserved for the benefit of said road. The company has recently filed in this office copies of affidavits to the effect that it is now proceeding with the construction of the uncompleted portion of its road as rapidly as possible.

By the same act as that making the grant for the Vicksburg, Shreveport and Texas Road (act of June 3, 1856), a grant identical in its terms was also made to the State of Louisiana to aid in the construction of a railroad from *New Orleans to the State line*, in the direction of Jackson, Miss. This road was never definitely located or constructed. A withdrawal of lands for its benefit was ordered by letter from this office, dated June 16, 1856.

By telegraphic dispatch, dated February 6, 1857, the governor of Louisiana advised this office that he did not think the grant would be accepted. The restoration of the lands which had been withdrawn was ordered July 27, 1857.

RAILROADS IN ARKANSAS.

LITTLE ROCK AND FORT SMITH.

The original grant for this road was by act of Congress approved February 9, 1853, and embraced every alternate section of land designated by even numbers for six sections in width on each side of the road; and in case the United States had, when the line of said road was definitely fixed, sold any section or part of section so granted, or if the right of pre-emption had attached to any of said lands, then the State, through its duly appointed agent or agents, was authorized to select from the lands most contiguous to the lands granted, and within 15 miles from the line of the road, so much land in the alternate sections as would be equal to the lands sold by the United States, or to which the right of pre-emption had attached.

In pursuance of this act the road was definitely located from Little Rock to Fort Smith in the year 1855.

The act required the completion of the road within ten years, to wit, by February 9, 1863. No portion of the road was constructed within the time required.

The act of July 28, 1866, reviving and extending the grant, granted all the alternate odd-numbered sections and parts of sections lying along the outer line of lands theretofore granted, and within five miles on each side thereof, excepting lands reserved or otherwise appropriated by law, or to which the right of pre-emption or homestead settlement had attached, with the proviso that the additional quantity of lands granted, when added to the lands theretofore granted, should not exceed ten sections for each mile of railroad. It was provided that if the whole of said road was not completed within ten years from the time when said act should take effect the lands unpatented should revert to the United States. It was further provided that the said act, so far as the same related to this road, should not take effect until the Secretary of the Interior should make and file a certificate in his office and the office of the secretary of state of Arkansas, stating that the said company had reorganized its board of directors in a lawful manner, &c.

The certificate of the Secretary of the Interior, as above required, was made and filed May 13, 1867, on which date this office holds that the act, so far as it relates to this road, took effect. The road, therefore, should have been completed by May 13, 1877.

The road was fully completed from Little Rock to a point on the Arkansas River, opposite Fort Smith, prior to August, 1876, but as a small portion of the road (1.92 miles) was found to lie within the Indian Territory, the Department declined to accept

such portion of the road. The Commissioner of Indian Affairs subsequently required the company to remove their road from the Territory. In consequence of this action, 5.73 miles of the road were not completed within the time required by the act. This section of 5.73 miles was accepted by the then Secretary of the Interior February 25, 1879.

This office has always considered and treated this road as having been constructed in time.

On January 9, 1882, you approved two lists containing, respectively, 139,567.37 acres and 720 acres, which, added to the amount heretofore certified and patented, would be sufficient to satisfy the grant. In view, however, of proposed legislation, the land embraced in said lists has not been patented to the company.

IRON MOUNTAIN RAILROAD (IN ARKANSAS).

This grant was made by the second section of the act of July 4, 1866, for the purpose of aiding in the construction of a railroad from the point where the Iron Mountain Railroad intersects the southern boundary of Missouri to a point at or near the town of Helena, Ark., and was of the alternate odd-numbered sections for ten sections in width on each side of the road, with the right to indemnity for any lands, granted as aforesaid, which had been sold or disposed of when the line of said road was definitely fixed; such indemnity lands to be selected from the alternate odd-numbered sections not further than 20 miles from the line of the road.

The act required the completion of the road within five years from the 1st day of July, 1866, or by July 1, 1871.

No portion of the road has ever been definitely located or constructed, nor has any withdrawal of lands been made for its benefit. Consequently no estimate of the number of acres embraced in the grant is submitted.

RAILROADS IN MISSOURI.

IRON MOUNTAIN, NOW SAINT LOUIS, IRON MOUNTAIN AND SOUTHERN.

The grant for this road was by act of Congress approved July 4, 1866, and was of the alternate odd-numbered sections for ten sections in width on each side of the road, with the right to indemnity for any lands so granted which had been sold or disposed of by the United States when the line of the road was definitely fixed, such indemnity to be selected from the lands of the United States nearest to the tiers of sections granted as aforesaid and not more than twenty miles from the line of the road.

The road was required to be constructed within five years from the first day of July, 1866. Under this act the road was definitely located from Pilot Knob, Mo., to the Arkansas State line, in the year 1867.

In the month of January, 1871, the company applied to the Department for authority to change the line of its road to a more westerly one.

By letter, dated February 27, 1871, addressed to Thomas Allen, president of the company, the then Secretary of the Interior refused this application, holding that the State and company were concluded by their own acts, and must be held to the original line. On June 8, 1871, the governor of Missouri certified to the completion of twenty consecutive miles of said road from Pilot Knob southwardly, toward the southern boundary of the State. This section of twenty miles was accepted by the Department June 19, 1871, and is the only part of said road which was completed within the required period, so far as is known to this office.

In July, 1873, more than two years after the time for completing the road had expired, the company filed a map showing the line of its constructed road. This map showed that the road had been constructed by the more westerly route, being the one which the Department had theretofore refused to recognize.

In a letter, dated July 1, 1873, accompanying said map, Mr. Allen, the president of the company, stated that the company claimed title to the lands granted along the line designated on the map therewith filed, by virtue of the construction and completion of the road.

The road as represented on said map was never accepted by the Department, and no action other than to place the map and letter on file has been taken in relation thereto.

From Poplar Bluff, Mo., to the south boundary of the State, a distance of about twenty miles, the road is identical with the Cairo and Fulton, now Saint Louis, Iron Mountain and Southern Railroad Company's constructed road, which company having received the grant made to the State of Missouri by acts of February 9, 1853, and July 28, 1866, filed on the 22d of January, 1875, a map of its constructed road in said State. I am advised that the company (Iron Mountain) does not claim the lands

granted, and that it has applied to the War Department for relief from the obligations imposed by the granting act. As to these facts, however, this office has no official information. No lands have been certified or patented to the company. Although the company has not for the last eight or nine years asserted its claim to the lands granted, the odd sections within ten miles and both the odd and even sections outside of ten and within twenty miles of the line of its road as definitely located, are withdrawn and reserved for its benefit.

RAILROADS IN MICHIGAN.

DETROIT AND MILWAUKEE AND PORT HURON AND MILWAUKEE.

The grant for these companies was by act of June 3, 1856, and was for a road from Grand Haven to Flint and thence to Port Huron. The lands granted were the alternate odd-numbered sections for six sections in width on each side of the road, and in case when the line of said road was definitely fixed any of the lands granted as above had been sold or disposed of the State was authorized to select in alternate sections, and not further than fifteen miles from the line of the road, so much land as would be equal to the lands so sold or disposed of.

The act required the road to be completed within ten years.

That portion of the grant between Grand Haven and Owasso was conferred by the State upon the Detroit and Milwaukee Railroad Company, and the portion between Owasso and Port Huron upon the Port Huron and Milwaukee Company.

The Detroit and Milwaukee road was definitely located in 1858, and the Port Huron and Milwaukee in 1857.

The grants were subsequently declared forfeited to the State, and were conferred on the

PORT HURON AND LAKE MICHIGAN RAILROAD COMPANY.

The time for completing the road expired June 3, 1866.

On April 13, 1874, the governor of Michigan certified to the completion of 60 continuous miles of the Port Huron and Lake Michigan Railroad. This certificate, however, did not show the time of completion or the location of the portion completed.

I find, however, from certain papers on file, that the portion so completed lies between Lapeer and Port Huron. The road has evidently been fully completed from Grand Haven to Port Huron, although no evidence of such completion, except as to the 60 miles above mentioned, is on file in this office.

There have been certified for the Detroit and Milwaukee 30,998.75 acres, and for the Port Huron and Milwaukee 6,468.68 acres, being practically all the vacant lands in the limits of the grants.

By joint resolution of March 3, 1879, the reversionary interest of the United States in the lands certified for said roads was released to the State of Michigan.

JACKSON, LANSING AND SAGINAW, AND NORTHERN CENTRAL MICHIGAN, FORMERLY AMBOY, LANSING AND TRAVERSE BAY.

This grant was to aid in the construction of a road from Amboy, by Hillsdale and Lansing, to some point on or near Traverse Bay, by act of June 3, 1856. The odd sections for six sections in width on each side of the road, were granted, with indemnity from the alternate sections within 15 miles of the line of the road, for any lands lost in the granted limits.

The State conferred the grant upon the Amboy, Lansing and Traverse Bay Railroad Company.

The road was definitely located from Amboy to a point on Little Traverse Bay, in the year 1858.

That portion of the grant which lies north of Michigan avenue, Lansing, was subsequently transferred to the Jackson, Lansing and Saginaw Railroad Company, and the portion south of that point to the Northern Central Michigan Railroad Company.

The act of June 3, 1856, required the entire road to be completed within 10 years. By the act of July 3, 1866, the time for completing the road was extended seven years from June 3, 1866, or until June 3, 1873.

The Amboy, Lansing and Traverse Bay Company had, prior to September 17, 1863, completed 28 miles of its road, extending from Lansing to Owasso.

November 1, 1873, the governor of Michigan certified to the completion of the Northern Central Michigan Railroad from Lansing southward to Jonesville, a distance of 60 miles. The certificate does not show whether the said 60 miles were completed prior to June 3, 1873, or not.

Between Jonesville and Amboy, a distance of about 20 miles, the road has not been built.

The Jackson, Lansing and Saginaw Company had completed its road from Owasso to a point in section 20, township 29 north, range 3 west, Otsego County, Michigan, a distance of 160.10 miles, prior to the expiration of the grant.

June 6, 1876, the governor certified to the completion of an additional section of 9.95 miles, and on January 17, 1882, the completion of $63\frac{95}{320}$ miles terminating at Mackinaw City, was certified to.

The road as constructed is some 50 miles longer than the line as definitely located. This is accounted for by the fact that the company, as authorized by the act of March 3, 1871, changed the northern terminus of its road from Traverse Bay to Mackinaw City, on the Straits of Mackinaw.

It was provided in this act that only the lands embraced within the limits of the grant as the same was originally located under the act of June 3, 1856, should be applicable to aid in building the road.

In the adjustment of this grant, it has been treated as a whole and the lands certified to the State accordingly. The odd sections within the limits of this grant are withdrawn.

MARQUETTE AND ONTONAGON.

The original grant for this road was by act of June 3, 1856, and was to aid in the construction of a railroad from Marquette to Ontonagon. The lands granted were the alternate odd-numbered sections for six sections in width on each side of the road, with indemnity from the alternate sections within fifteen miles of the line of the road. The road was definitely located from Marquette to Ontonagon in 1859.

By the act of March 3, 1865, the grant was increased to ten sections per mile, to be selected from the alternate odd-numbered sections within twenty miles of the line of the road.

The act of June 3, 1856, required the completion of the road within ten years. By act of June 18, 1864, the time was extended five years beyond the time fixed for the completion by the original act, and by joint resolution of May 20, 1868, the time was further extended until December 31, 1872.

The various other acts relating to this road and the effect of the same will be found in the accompanying tabular statement.

The road was constructed from a point on the Bay de Noquet and Marquette Rails road, about 20 miles west of Marquette to L'Anse, a distance of 52 miles, prior to December 31, 1872.

From L'Anse to Ontonagon the road has not been constructed. The odd section-within the 20-mile limits of this grant are still withdrawn for the benefit of the road.

ONTONAGON AND STATE LINE, NOW ONTONAGON AND BRULE RIVER RAILROAD.

The grant for this road was by the act of June 3, 1856, and was for a railroad from Ontonagon to the Wisconsin State line. The grant was of the alternate odd-numbered sections for 6 sections in width on each side of the road, with indemnity to be selected from the alternate sections within 15 miles on each side of the road. The grant was conferred by the State upon the Ontonagon and State Line Railroad Company.

A grant of lands was also made to the State of Michigan by the act June 3, 1856, to aid in the construction of a road from Marquette to the Wisconsin State line. This grant was conferred by the State upon the Marquette and State Line Railroad Company.

The Ontonagon and State Line and the Marquette and State Line Railroad Companies were subsequently consolidated with the Chicago, Saint Paul and Fond du Lac Railroad Company under the name of the latter.

The rights and franchises of this company were sold under a mortgage sale in 1859, and a new company known as the Chicago and Northwestern Railroad Company was formed by the purchasers.

On April 24, 1862, the board of control of the State of Michigan conferred the grant of lands which had been made for the road from Marquette to the State line upon the Peninsula Railroad Company. This transfer was subsequently confirmed by the State legislature. On October 21, 1864, the Peninsula Railroad Company was consolidated with the Chicago and Northwestern Railroad Company under the latter name. Under the articles of consolidation all the rights, franchises, and property of the Peninsula Railroad Company became vested in the consolidated company. The road from Ontonagon to the Wisconsin line was definitely located in the year 1857. On April 10, 1860, the vacant lands outside of the 6-mile limits of the grant, were directed to be restored to market on June 18, 1860. On December 12, 1861, there were certified of the lands in the 6-mile limits: For the Ontonagon and State Line Railroad, 142,430.23 acres; for the Ontonagon and State Line, and the Marquette and State Line Railroads, 41,649.25 acres; for the Ontonagon and State Line, and the Marquette and Ontonagon Railroads, 68,659.71 acres.

By joint resolution of July 5, 1862 (12 Stat., 620), it was provided that the words "Wisconsin State line" in the act of June 3, 1856, should be construed to authorize the location of the line of road provided for in said act from Marquette to the Wisconsin State line, upon any eligible route from Marquette to the Wisconsin State line, near the mouth of the Menomonee River, touching at favorable points on Green Bay.

The State was further authorized to surrender to the United States all the lands which had been theretofore certified for the benefit of said railroad, and to receive in lieu thereof a like quantity of lands to be selected upon the line as relocated.

Under this resolution the road from Marquette to the Wisconsin State line was relocated, and on May 1, 1868, the governor of Michigan relinquished to the United States the lands which had been certified for the benefit of the Marquette and State Line Railroad Company, for the joint benefit of the Marquette and State Line and the Ontonagon and State Line Railroad Companies, and also for the joint benefit of the Ontonagon and State Line and the Marquette and Ontonagon Railroad Companies, the Chicago and Northwestern Railroad Company having previously released to the State its interest in said lands.

By letter, dated July 13, 1868, addressed to the solicitor of the Chicago and Northwestern Railroad Company, the then Commissioner of this office requested the company and the State to relinquish to the United States the 142,430.23 acres which had been certified for the benefit of the Ontonagon and State Line Railroad Company. On June 17, 1870, the Chicago and Northwestern Railroad Company relinquished to the State of Michigan its interest in said lands, and on August 14, 1870, the governor of said State, acting under the written opinion of the attorney-general of the State, relinquished the same to the United States.

The restoration of said lands was ordered by this office, and notice thereof was given by the district land officers at Marquette, Mich., June 27, 1873, to take effect August 6, 1873.

In a letter, dated July 10, 1873, addressed to the Secretary of the Interior, the then governor of Michigan claimed that as Congress had never annulled the grant, or the legislature of Michigan authorized the surrender of said lands, their surrender was made without authority of law, and that the lands rightfully belonged to the State of Michigan.

The order for their restoration was thereupon, on July 30, 1873, suspended, and has never been carried into effect.

The time for completing the said road from Ontonagon to the Wisconsin State line expired June 3, 1866. No portion thereof was completed within that time.

On September 17, 1880, the board of control of the State of Michigan, ignoring the release to the United States, declared the grant to the Ontonagon and State Line Railroad Company forfeited to the State, and conferred the same upon the Ontonagon and Brule River Railroad Company.

The action of the board of control was confirmed by the legislature of the State on June 7, 1881.

On February 24, 1882, the governor of Michigan certified to the completion of 20 continuous miles of the Ontonagon and Brule River Railroad, commencing at Ontonagon and running thence southwestwardly by the way of Rockland to a point in section 10, township 50 north, range 38 west.

The question as to whether the title to the relinquished lands along the line of this road is now in the State of Michigan or in the United States has not been fully determined.

RAILROADS IN IOWA.

SIOUX CITY AND SAINT PAUL.

The grant for this road was to the State of Iowa by act of May 12, 1864, to aid in the construction of a railroad from Sioux City, in said State, to the south line of the State of Minnesota at such point as the State might select between the Big Sioux and the West Fork of the Des Moines River, and was of every alternate section of land, designated by odd numbers, for ten sections in width on each side of said road, with a provision for indemnity for lands lost within the granted limits to be taken within 10 additional miles.

The fourth section of the act provided that if the road was not completed within ten years from the date of the acceptance of the grant, the lands should revert to the State, for the purpose of securing the completion of the road, and if the State should not complete the road within five years from the expiration of the ten years aforesaid, then the lands should revert to the United States.

The State accepted the grant April 3, 1866, and conferred it upon the Sioux City and Saint Paul Company, and the company accepted the grant September 20, 1866.

The road was located definitely in 1867, and the line as located was 83 miles 52 rods in length.

On February 4, 1873, the governor certified to the construction of 56¼ miles of the road, extending from the Minnesota State line to Lemars, Iowa. No road has been constructed beyond Lemars.

The area of the grant upon a basis of 82 miles of road as given in a former report of this office was 524,800 acres. The area for 56¼ miles of road is 360,000 acres.

There have been patented to the State for this company 407,910.21 acres, but it is understood some 85,000 acres have been withheld from the company.

This office is now in correspondence with the governor of Iowa, in pursuance of instructions from you, looking to the reinvestment of the United States with title to the lands patented to said State in excess of the quantity earned by the railroad company.

RAILROADS IN WISCONSIN.

WEST WISCONSIN, FORMERLY LA CROSSE AND MILWAUKEE, AND TOMAH AND SAINT CROIX RAILROADS, KNOWN SINCE AUGUST 8, 1878, AS CHICAGO, SAINT PAUL AND MINNEAPOLIS RAILWAY.

By act of June 3, 1856, a grant was made to Wisconsin to aid in the construction of a railroad from Madison or Columbus, by way of Portage City, to Saint Croix River or Lake, between townships 25 and 31, of every alternate section of land for six sections in width on each side thereof. Madison was selected as the initial point, and the road was definitely located therefrom. By act of May 5, 1864, the grant was increased to ten sections per mile between the town of Tomah and Saint Croix Lake or River, with the usual provision for indemnity, and the time for the completion of the whole road was extended five years from that date.

By joint resolution of July 13, 1868, the time for the completion of the road from Tomah to Lake Saint Croix was extended three years, or until May 5, 1872. The road from Portage to Tomah was certified by the governor as completed January 25, 1869, and from Tomah to Lake Saint Croix April 16, 1872.

That portion of the road between Madison and Portage (39 miles) should have been completed May 5, 1869. The governor on December 16, 1874, certified to its completion in January, 1871.

The estimated area of the grant is 1,305,600 acres. The State has received 842,866 acres; of this amount 40,049.11 acres were certified for the Wisconsin Railroad Farm Mortgage Land Company, under the act of July 27, 1868 (which is amendatory of the act of June 3, 1856), but is properly chargeable against the grant.

There has been no restoration of the lands withdrawn under the act of May 5, 1864.

SAINT CROIX AND LAKE SUPERIOR RAILROAD AND BRANCH TO BAYFIELD, AFTERWARDS THE NORTH WISCONSIN, AND NOW KNOWN AS CHICAGO, SAINT PAUL, MINNEAPOLIS AND OMAHA.

By act of June 3, 1856, there was, among others, a grant made to Wisconsin to aid in the construction of a railroad from a point on Saint Croix River or Lake to the west end of Lake Superior and to Bayfield, to be completed within ten years. By act of May 5, 1864, a new grant was made by which the old was increased from six to ten sections per mile, the time for the completion of the road extended five years from its date, and the State authorized to select a point on the main line for a junction with the Bayfield branch. The usual provision was made for indemnity. No road was constructed under the original grant. The legislature of Wisconsin, by an act approved March 4, 1874, conferred the grant for the road from Lake Saint Croix to Bayfield upon the North Wisconsin Railway Company, and the grant from the junction of the Bayfield branch, as located, upon the Chicago and Northern Pacific Air Line Railway Company. No road has been built by the latter company.

The North Wisconsin company under its original name constructed 80 miles of road, and after its consolidation, on May 26, 1880, with the Chicago, Saint Paul and Minneapolis Railway, under the name of the Chicago, Saint Paul, Minneapolis and Omaha Railway Company, constructed 40 miles more, making 120 miles, all built after the expiration of the time when the road should have been completed.

The constructed road begins in the north half of the northeast quarter of section 20, township 29 north, range 19 west, and is continuous to the southeast quarter of the northwest quarter of section 18, township 43 north, range 7 west.

The estimated area of the grant is 1,408,452.69 acres. The State has received 843,497.56. The area of the grant for 120 miles (constructed road) is 768,000 acres. One hundred and six miles of the road as located are now unconstructed. The lands along the unconstructed road are still reserved from sale or entry.

WISCONSIN CENTRAL, FORMERLY PORTAGE, WINNEBAGO AND SUPERIOR.

The grant for this road was made by act of May 5, 1864, and required that the road should be completed in ten years. The original definite location by way of Ripon and Berlin to Stevens Point, and from thence to Bayfield and Superior, covering a

distance of about 367 miles, was authorized by the act of June 21, 1866 (14 Stat., 360). By act of April 9, 1874, the time for the completion of the road was extended until December 31, 1876. By act of March 3, 1875, the company was authorized to straighten the line of its road between Portage City and Stevens Point, but it was provided that no lands south of Stevens Point, which might be found beyond 10 miles from the modified line when located, should go to the company under its grant, but such lands should revert to the United States and become part of the public domain, to be disposed of as other public lands, and that the acceptance of the provisions of the act by the company should be held to be a relinquishment of the same; and further provided that the act should not be construed as increasing the grant, or as granting to the company any lands whatever.

By straightening the line of the road between the points mentioned the length thereof was decreased about 26 miles, leaving the line as thus finally located about 341 miles long.

The estimated area of the grant for 341 miles, after making a deduction because of the proximity of the line to Lake Superior, is 1,800,000 acres. By accepting the act of March 3, 1875, the company lost between Portage City and Stevens Point about 251,680 acres. The road constructed by the company from Portage City, by way of Stevens Point, to Ashland is continuous, and is 257 miles in length. As shown in the accompanying table, 231 miles thereof were built within the life of the grant, and 26 miles were constructed after it had expired.

The area of the grant for 257 miles is 1,644,800 acres, which, decreased by the lands lost between Portage and Stevens Point, leaves 1,393,120 acres. There has been approved to the State for this road 575,844.56 acres. No road has been constructed beyond Ashland.

The lands relinquished by the company in accepting the act of March 3, 1875, have been restored to homestead and pre-emption entry.

There has been no restoration of the lands withdrawn north of Stevens Point.

RAILROADS IN MINNESOTA.

The act of March 3, 1857, granted to the (then) Territory of Minnesota, for the purpose of aiding in the construction of certain railroads therein specified, every alternate section of land designated by odd numbers for six sections in width on each side of each of the roads so authorized. The act provides indemnity for lands within the primary limits of the grant that were sold, pre-empted, or otherwise appropriated prior to the definite location of each road. It also provides that the lands granted to the Territory "shall be subject to the disposal of the legislature thereof, for the purpose aforesaid and no other"; also—

"That the lands hereby granted to said Territory or future State shall be disposed of by said Territory or future State only in the manner following, that is to say: That a quantity of land not exceeding 120 sections for each of said roads and branches, and included within a continuous length of 20 miles of each of said roads and branches, may be sold; and when the governor of said Territory or future State shall certify to the Secretary of the Interior that any 20 continuous miles of any of said roads or branches is completed, then another quantity of land hereby granted, not to exceed 120 sections for each of said roads and branches having 20 continuous miles completed as aforesaid, and included within a continuous length of 20 miles of each of such roads or branches, may be sold; and so from time to time until said roads and branches are completed; and if any of said roads or branches is not completed within 10 years no further sale shall be made, and the lands unsold shall revert to the United States."

An act of Congress, approved March 3, 1865, increased the grant for all roads and branches provided for in the act of March 3, 1857, to ten sections per mile, enlarged the limits within which indemnity lands might be taken, provided that said indemnity lands should in all cases be indicated by the Secretary of the Interior. Said act also provided for the *patenting* to the State of all lands selected thereunder, to the extent of ten sections per mile, extending along and opposite sections of 10 consecutive miles (in length) as fast as constructed and the construction certified to by the governor, and that the lands granted by this and prior acts should not be disposed of in any manner, except as the same were patented under the provisions of the act. The time for the completion of the several roads and branches was extended to eight years from the passage of the act, or to March 3, 1873, and in the event of failure to so complete said roads or branches, the lands undisposed of are to revert to the United States.

The following described roads were provided for in the act (March 3, 1857) first named:

SAINT VINCENT EXTENSION OF SAINT PAUL AND PACIFIC, FORMERLY BRANCH LINE OF SAINT PAUL AND PACIFIC, NOW SAINT PAUL, MINNEAPOLIS AND MANITOBA.

This road was authorized by that portion of the act which provided for a "branch" (of main line Saint Paul and Pacific) "via Saint Cloud and Crow Wing to the navigable waters of the Red River of the North, at such point as the legislature of said State may determine." The northern terminus of said branch was fixed by the legislature of said Territory at Saint Vincent. An act of Congress approved July 12, 1862, authorized a new branch line to extend northeasterly to the waters of Lake Superior, in lieu of that part of the original branch extending "northwesterly from the intersection of the tenth standard parallel with the fourth guide meridian." An act of Congress approved March 3, 1871, provided—

"That the Saint Paul and Pacific Railroad Company may so alter its branch lines that instead of constructing a road from Crow Wing to Saint Vincent, and from Saint Cloud to the waters of Lake Superior, it may locate and construct, in lieu thereof, a line from Crow Wing to Brainerd, to intersect with the Northern Pacific Railroad, and from Saint Cloud to a point of intersection with the line of the original grant at or near Otter Tail or Rush Lake, so as to form a more direct route to Saint Vincent, with the same proportional grant of lands, to be taken in the same manner along said altered lines as is provided for the present lines by existing laws."

Said act also provided for a proper release by said company of all lands along the abandoned line. By an act approved March 3, 1873, the time for the completion of the road from Saint Cloud to Saint Vincent was extended nine months from the time limited by previous acts of Congress, or to December 3, 1873.

An act of Congress, approved June 22, 1874, extended the time for the completion to March 3, 1876, upon certain conditions to be accepted by the officers of the road before the act should become operative. Said conditions were not accepted by the company, and the act has been held by this office and the Department to be inoperative.

The road was definitely located November 7, 1871, for a distance of 314 miles, between East Saint Cloud and Saint Vincent; 140 miles were constructed prior to December 3, 1873, and the remaining 174 miles December 23, 1879. It is proper to state, in this connection, that the legislature of Minnesota, by an act approved March 1, 1877, extended the time (so far as the State was concerned) for the completion of the road to January 1, 1881, upon the condition that the company should not, in any manner, directly or indirectly, become seized of any right, title, interest, claim, or demand in or to any parcel of land lying and being within the granted or indemnity limits of the road, to which legal title had not been perfected in the company, upon which any person or persons had, in good faith, settled or acquired valuable improvements thereon prior to the passage of the act. Acceptance of the provisions of the act by the company was to be considered as a relinquishment of all the lands, to the extent of not to exceed 160 acres for each settler, so occupied by actual settlers. I have not been advised of the acceptance of the provision of said act by the company. Up to the present time 1,174,330.03 acres have been patented to the State for the benefit of the road. No portion of said amount (lands) was patented in advance of the construction of 10 miles opposite thereto. The whole road has been accepted by the Department. (See Secretary's decision, June 10, 1880, General Land Office Report for that year, page 124.)

WESTERN RAILROAD, FORMERLY BRAINERD BRANCH SAINT PAUL AND PACIFIC.

This road was authorized by that portion of the act providing for a "branch" (of main line Saint Paul and Pacific) "via Saint Cloud and Crow Wing, to the navigable waters of the Red River of the North, at such point as the legislature of said State may determine," and embraced that portion of the original Saint Vincent branch located from near Saint Cloud (Watab) to Crow Wing, together with a "line from Crow Wing to Brainerd to intersect with the Northern Pacific Railroad," authorized by the act of March 3, 1871, which also provided for the same proportional grant of lands, to be taken in the same manner as provided in the acts of March 3, 1857, and March 3, 1865, as above quoted. The act of March 3, 1873, extended the time for the completion of the road until *December* 3, 1873.

The act of June 22, 1874, referred to in connection with the Saint Vincent road, also applied to the Western Railroad, but is inoperative for the same reason as stated in said connection. The act of the legislature of Minnesota approved March 1, 1877, and above referred to, also embraced the Western Railroad in its provisions, and extended the time for completion to March 1, 1878. The road is definitely located from Watab to Brainerd covered a distance of 54.21 miles, which was completed January 1, 1878; 16.13 miles of the road as located is within the Fort Ripley military reservation, and therefore the State is not entitled to any grant of land for said portion of the road. (See opinion of Attorney-General in annual report of this office for 1881, pages 158 to 163, inclusive.) The State would be entitled to lands opposite 38.08 miles of road, or

243,712 acres, of which amount 121,462.31 acres were patented to the State April 11, 1879. Of this amount 12,346.24 acres lying within the Fort Ripley military reservation and erroneously patented have been relinquished by the State and company to the United States. The State and company have also relinquished 9,177.99 acres of said patented lands in favor of actual settlers, as provided by the act of legislature of March 1, 1877, hereinbefore referred to. Congress has not, however, authorized the acceptance of said release.

An act of Congress, approved July 4, 1866, granted to the State of Minnesota, to aid in the construction of certain railroads below named, every alternated section of land designated by odd numbers to the *amount of* five alternate sections per mile *on each side* of said river.*

Indemnity was provided by the act for such lands as the United States had sold, reserved, or otherwise appropriated, or to which the right of homestead settlement or preemption had attached prior to the definite location of each road. The lands granted were to be subject to the disposal of the legislature of Minnesota, for the purposes indicated by the act, and in no other way. Upon the completion of any section of 10 consecutive miles, patents are to issue for all the lands in alternate sections, designated by odd numbers, situated within twenty miles of the road so completed, and lying coterminous to said completed section of 10 miles, for the benefit of the road completing said section. The coterminous principle does not extend to such lands as may be taken to make up deficiencies, and no land to make up such deficiencies can be taken within 10 miles of the line of said roads. The roads authorized by the act were to be completed within ten years from the acceptance of the grant, failing which the lands granted and not patented "shall revert to the United States."

THE SOUTHERN MINNESOTA RAILWAY EXTENSION

was authorized by that portion of the act which provided for a road "from Houston, in the county of Houston, through the counties of Fillmore, Mower, Freeborn, and Faribault, to the western boundary of the State," the grant having been accepted by the legislature of the State of Minnesota, February 25, 1867, and conferred upon the Southern Minnesota Railroad Company, and subsequently upon the Southern Minnesota Railway Extension Company.

The road should have been completed by the first company chartered by the State, but as said company only completed the line from Houston to Winnebago City, a distance of $149\frac{144}{280}$ miles, prior to February 25, 1877, the State, by act of legislature approved March 6, 1878, conferred the privileges appertaining to the uncompleted portion of the line upon the Southern Minnesota Railway Extension Company, under certain conditions, among others that the road should be constructed to Jackson, in Jackson County, before the end of the year 1879, and to the west line of the State before the end of the year 1880. The road was constructed to the west boundary of the State by December 8, 1879, although the line, as constructed, deviated from the located line to a considerable extent, but only to such extent as was necessary to make it conform to the requirements of the act of State legislature. The matter of deviation from located line, and a complete history of the grant, together with the acceptance by the Secretary of the Interior of the line as constructed for 43 miles beyond Winnebago City, and a decision by the Secretary of the Interior that the grant was earned to the extent of the miles constructed, is fully shown in the anual report of this office for 1880, pages 116 to 118, inclusive. That portion of the line beyond the point (near Jackson City) above referred to was accepted by the Secretary of the Interior March 26, 1880, in a letter of that date addressed to this office, in which he also decided that the State of Minnesota was entitled to the land granted and earned, and directed the adjustment of the grant accordingly.

HASTINGS AND DAKOTA.

This road was authorized by that portion of the act of July 4, 1866, which provided for a road—

"From Hastings, through the counties of Dakota, Scott, Carver, and McLeod, to such point on the western boundary of the State as the legislature of the State may determine."

This grant was accepted by the State March 7, 1867. Prior to that time the governor of the State had approved a map of definite location fixing the western terminus of the road (which was not changed materially by the legislature), and on June 26, 1867, said map was approved by the Secretary of the Interior. The road as constructed is 202.1 miles in length, and was completed December 15, 1879. Certain modifications and adjustments were made to carry the construction of the road through several towns named in the act of acceptance. All departures in construction from

* This grant is a grant of "quantity" as distinguished from a grant of "lands in place."

the located line have, however, been approved by the Department (see letter of Secretary of the Interior, dated April 17, 1880, on page 123 of annual report of this office for 1880), and this office directed to certify the lands in satisfaction of the grant. The State is entitled under the grant "to the amount of" 1,293,400 acres of land, if so much can be found vacant and unappropriated within the limits of the grant. Up to the present time but 312,770.27 acres have been conveyed to the State for the benefit of said road.

LAKE SUPERIOR AND MISSISSIPPI.

By the act of May 5, 1864, a grant was made to the State of Minnesota for a road "from the city of Saint Paul to the head of Lake Superior," of every alternate section of land designated by odd numbers *to the amount of* five alternate sections per mile on each side of the said railroad on the line thereof. The usual provision was made for indemnity lands, to be selected within twenty miles from the line of road. The act provides that upon certification by the governor of the State of the completion of any 20 miles of the road, patents shall be issued for the amount of land coterminous with the completed section, to which the State is entitled under the act; that the land shall be subject to disposal by the State for the purpose indicated by the act, and no other; also, that if the road is not completed within eight years from the date of the act, "no further patent shall be issued for said lands, and no further sale shall be made, and the lands unsold shall revert to the United States."

An act of July 13, 1866, provided that if when the line of the road was located it should be found that the quantity of land intended to be granted by the act of May 5, 1864, was deficient by reason of the line thereof running near the boundary-line of the State, the company should be entitled—

"To take from other public lands of the United States within 30 miles of the west line of said road such an amount of lands as shall make up such deficiency: *Provided*, That the same shall be taken in alternate odd sections, as provided for in said act."

The road as located is 154.42 miles in length, and it was completed *February* 28, 1873, instead of *May* 5, 1872, as required by the act. The quantity of land granted by the act is 988,288 acres, provided so much can be found vacant and unappropriated within the limits of the grant. Up to the present time 860,564 acres have been approved to the State for the benefit of said road. The road as constructed has been accepted by the Department.

An act of Congress approved July 13, 1866, granted indemnity lands to the State of Minnesota in lieu of lands theretofore granted for the purpose of aiding in the construction of railroads that the United States might have sold or disposed of after the definite location of the road and prior to the withdrawal of said lands from sale. It was provided, however, that such grant should not be so construed as to diminish the quantity of lands previously granted to aid in the construction of the Lake Superior and Mississippi Railroad. Section 3 of the act provides for the *certification* of lands to the State.*

Also that—

"On the completion of any 10 miles of road the State may sell one-half the quantity of lands which said State is authorized to dispose of on the completion of 20 miles."

It will be observed that sections 1, 3, and 4 of said act apply to all previous grants. No restoration of lands withdrawn and reserved for the benefit of railroads in the State of Minnesota has been made.

In several instances I have stated that by the construction of a certain number of miles of road a State would be entitled to a certain number of acres of land.

In estimating such number of acres I have simply multiplied the number of miles constructed by the number of sections per mile granted, and have not added to that amount the 120 sections or 76,800 acres authorized by several of the acts referred to to be sold in advance of the construction of any portion of the road, preferring to leave the matter of determining how much land shall revert to the United States, in case of a forfeiture of a grant, to Congress.

This completes the statement of all facts deemed pertinent relative to grants of land made to States to aid in the construction of railroads.

CORPORATIONS.

The estimate of the areas within the limits of these grants herewith submitted, unless otherwise stated, embraces all the odd-numbered sections within the limits fixed by the granting acts as laid down upon the maps and diagrams in this office. Except where the area of the grant has been ascertained by actual examination of the

* The act of March 3, 1865, provides for patenting lands to the State.

records as stated, the amount given is without deduction for Indian or other reservations, overlapping grants, or other causes which operate to except land from the grants.

Owing to sinuosities in the lines of these roads the quantities given are less than would be obtained by multiplying the number of sections granted per mile by the number of miles of road. The latter amount cannot be acquired under any grant restricted to lateral limits unless the road is practically a straight line.

NORTHERN PACIFIC RAILROAD COMPANY.

By the act of Congress approved July 2, 1864 (13 Stat., p. 365), lands were granted to aid this company in the construction of a railroad from a point on Lake Superior to Puget Sound, with a branch via the Valley of the Columbia River to a point at or near Portland, Oreg. The grant is of every alternate odd-numbered section to the amount of twenty alternate sections per mile on each side of the road where the line passes through the Territories, and ten alternate sections per mile on each side where it passes through States, excluding mineral lands, and lands reserved, sold, granted, or otherwise appropriated, or to which homestead, pre-emption, or other rights shall have attached at the date of filing of maps of definite location of the road in this office. Provision is made for indemnifying the company for lands lost to the grant by sale, reservation, homestead, and pre-emption settlements, or other disposition thereof, prior to the filing of such maps, out of alternate odd-numbered sections not more than 10 miles beyond the limits of the sections granted. The indemnity limits were extended 10 miles farther on each side by joint resolution of May 31, 1870 (16 Stat., p. 378).

The grant is upon certain conditions, one being that the company should complete the entire road by the 4th day of July, 1876.

The second section of the joint resolution approved May 7, 1877 (14 Stat., p. 355), extended the time, for the completion of the road, two years.

The joint resolution approved July 1, 1868 (15 Stat., p. 255), amended the granting act, so as to require the completion of the entire road by July 4, 1877. Under date of June 11, 1879, the Secretary of the Interior held that the effect of the resolutions here cited was to extend the time for the completion of the road to July 4, 1879 (see General Land Office Report for 1879, p. 109 to 111).

The road, as definitely located or proposed, extends from the mouth of the Montreal River, in Wisconsin, to the headwaters of Puget Sound, in Washington Territory, an estimated distance of 2,055 miles. The length of the branch as estimated is 215 miles.

Maps on file in this office show that the road has been constructed as follows: From Northern Pacific Railroad Junction, in Minnesota, about 23 miles southwest of Duluth, to a point on the east bank of the Yellowstone River, in Montana, a distance of 675 miles; from Wallula, Wash., northeastwardly to a point near Lake Pend d'Oreille, in Idaho, 225 miles, and from Kalama, Wash., northward to Tacoma, on the headwaters of Puget Sound, 106 miles, making the total amount constructed 1,006 miles.

For detailed information respecting the length of the road in each of the several States and Territories through which the line passes; the estimated area of land embraced within the limits of the grant; number of miles constructed and uncompleted at the date fixed (July 4, 1879, see decision of Secretary Schurz before referred to) for completion of the entire road, as well as at the present time, and the number of acres patented to the company, reference is made to the accompanying tabulated statement.

CALIFORNIA AND OREGON RAILROAD COMPANY.

A grant of lands in aid of the construction of that portion of a road from the Central Pacific Railroad, in California, to Portland, Oreg., to be constructed in California, was made to this company by the act of Congress approved July 25, 1866 (14 Stat., p. 239).

The grant is of every odd-numbered alternate section of the public lands, not mineral, to the amount of twenty alternate sections per mile (ten on each side) of said railroad line. Provision is made for indemnity for any land within said limits lost to the grant by other grants, sales, reservations, homestead, pre-emption, or other claims, out of alternate odd-numbered sections nearest to and not more than 10 miles from the limits of the sections granted.

This act required the completion of the entire road on or before July 1, 1875.

By the act of June 25, 1868 (15 Stat., p. 80), the time for completing the road was extended to July 1, 1880. The estimated length of the line in California is 288 miles, of which the company constructed 152 miles, from a junction with the Central Pacific Railroad to Redding, prior to the time fixed for completing the road. No evidence of construction beyond Redding has been furnished this office.

This road is now known as the Oregon Branch of the Central Pacific Railroad.

OREGON CENTRAL RAILROAD COMPANY, NOW OREGON AND CALIFORNIA RAILROAD COMPANY.

The act approved July 25, 1866 (14 Stat., p. 239), made a grant of lands to aid in the construction of a railroad from the Central Pacific Railroad in California to Portland, Oregon. It provided that that portion of the road in Oregon should be built by, and the grant for the same conferred upon, such company as the legislature of said State should designate. This company was so designated.

The grant is of every alternate section of the public lands, not mineral, designated by odd numbers, to the amount of twenty alternate sections per mile (ten on each side) of said railroad line. Indemnity is provided for lands lost to the grant by other grants, sales, reservations, homestead, pre-emption, or other claims out of alternate odd-numbered sections nearest to and not more than 10 miles from the limits of the sections granted. The act required the completion of the entire road on or before July 1, 1875. By the act of June 25, 1868, the time for completing the road was extended to July 1, 1880.

The estimated length of the line in Oregon is 315 miles. Prior to July 1, 1880, 197 miles of road, from Portland to Roseburg, were constructed. No evidence of further construction has been furnished this office.

ATLANTIC AND PACIFIC RAILROAD COMPANY.

By the act of Congress approved July 27, 1866 (14 Stat., p. 292), lands were granted to this company to aid in the construction of a railroad from a point at or near the town of Springfield, in Missouri, to the Pacific coast, with a branch from the point at which the road strikes the Canadian River eastwardly to a point in the western boundary of the State of Arkansas at or near the town of Van Buren.

The grant is of every alternate section of the public land designated by odd numbers, to the amount of twenty alternate sections per mile, on each side of the line of the road through the Territories, and ten alternate sections per mile on each side when the road passes through States, excepting mineral lands, and lands sold, otherwise granted or appropriated, or to which pre-emption or other claims shall have attached at the time the line of said road is designated by a map thereof filed in this office. Indemnity is provided out of alternate odd-numbered sections not more than 10 miles beyond the limits of the sections granted, for lands lost within the granted limits by reason of grants, sales, reservations, homestead, pre-emption, and other claims, prior to the filing of the map of the line of the road.

The third section of the act provides—

"That if said route [Atlantic and Pacific] shall be found upon the line of any other railroad route, to aid in the construction of which lands have been heretofore granted by the United States, as far as the routes are upon the same general line, the amount of land heretofore granted shall be deducted from the amount granted by this act; [also] that the railroad company receiving the previous grant of land may assign their interest to said 'Atlantic and Pacific Railroad Company,' or may consolidate, confederate, and associate with said company upon the terms named in the first and seventeenth sections of this act."

The Atlantic and Pacific consolidated with the Pacific and Southwestern Branch Railroad (a railroad authorized by act of June 10, 1852, from Saint Louis to the west boundary of Missouri), as to that portion of the road from Springfield to the west boundary of Missouri.

The whole of the main line was required to be completed by July 4, 1878. No time was fixed for the completion of the branch.

The length of the main line is estimated at 2,126 miles and the branch at 300, making in all 2,426 miles.

Prior to July 4, 1878, the road had been completed and accepted from Springfield, Mo., to Vinita, Ind. T., a distance of 125 miles; that portion between Springfield and Pierce City, Mo., being constructed by the Pacific and Southwestern Branch Railroad Company. Since that date 200 miles of road, from a point near Isleta, N. Mex., to a point in Arizona, has been completed and accepted.

The first section of this portion of the road was accepted, and patent issued for 23,037.36 acres along said section, in accordance with the opinion of the Attorney-General, dated October 26, 1880 (Opinions of Attorneys General, vol. 16, p. 572).

It is understood that this company has completed and is now operating its road a distance of 150 miles west of the point in Arizona last mentioned, but no official evidence of such construction has reached this office. In addition to this it is claimed that the road has been graded a long distance beyond the terminus of this constructed road, but of course this office is without official evidence of this fact.

SOUTHERN PACIFIC RAILROAD COMPANY.

By section 18 of the act of July 27, 1866 (14 Stat., p. 292), granting lands to the Atlantic and Pacific Railroad Company, this company was authorized to connect with said company at such point near the boundary of California as they should deem most suitable for a railroad line to San Francisco.

To aid in the construction of such railroad it was enacted that this company should have grants of land similar to those to said Atlantic and Pacific Railroad Company, subject to all the conditions and limitations of said grants, with the same requirements as to time and manner of construction.

The grant, therefore, is to the amount of ten alternate odd-numbered sections per mile on each side of said road, with the same exceptions and the same provisions for indemnity as in the grant for the Atlantic and Pacific Railroad above recited. The road was also required to be completed by July 4, 1878.

The length of this road is estimated at 522 miles. Of this 232 miles were constructed and accepted prior to July 4, 1878, as follows: From San José southward to Tres Pinos, 50 miles, and from Huron east to Goshen and southeasterly to Mojave, 182 miles.

This office has no evidence of the construction of any portion of this road between San Francisco and San José, Tres Pinos and Huron, and Mojave and the State line, 290 miles in all.

It is understood that at San José a connection for San Francisco is made with another road over practically the same route.

OREGON CENTRAL RAILROAD COMPANY.

The act of May 4, 1870 (16 Stat., p. 94), made a grant of lands to aid this company in the construction of a railroad from Portland to Astoria, in Oregon, with a branch from a point near Forest Grove to the Yamkill River, near McMinville.

The grant is of each alternate section of the public lands, designated by odd numbers, nearest to said road, to the amount of ten alternate sections per mile on each side thereof. Mineral lands, and lands otherwise reserved or held by valid pre-emption or homestead rights at the date of the grant, are excepted. It is provided that in case the quantity of ten full sections per mile cannot be found on each side of the road, other lands, designated as aforesaid, on either side of any part of said road nearest to and not more than 25 miles from the track thereof may be selected to make up such deficiency.

The entire road was to be completed within six years from the passage of this act.

The length of the main line is estimated at 122 miles, and the branch 22½, making a total of 144½ miles. Prior to the time fixed for the completion of the road 25 miles of the main line west of Portland and the entire branch line were constructed and accepted. No proof of the construction of any other portion of this road has been filed in this office.

The limits of this grant are partly in Washington Territory. No lands have been withdrawn for the grant in said Territory, and under date of December 20, 1877, the Secretary of the Interior declined a request for an order for such withdrawal, for the reason that the time fixed by the granting act for the completion of the road had expired and the greater part of the road was uncompleted. For this reason no estimate of the area embraced in the limits in Washington Territory has been made.

TEXAS PACIFIC RAILROAD COMPANY, NOW THE TEXAS AND PACIFIC RAILWAY COMPANY.

By act of Congress approved March 3, 1871 (16 Stat., p. 573), a grant of lands was made to this company to aid in the construction of a railroad from a point at or near Marshall, Tex., to San Diego, Cal.

The grant is of every alternate section of public land, not mineral, designated by odd numbers, to the amount of twenty alternate sections per mile on each side of the line as adopted by the company through the Territories of the United States, and ten alternate sections per mile on each side of the line in California. Exception is made of lands sold, reserved, or otherwise disposed of, and lands to which a pre-emption or homestead claim may have attached at the time the line of the road is definitely fixed. Indemnity is provided for lands thus lost to the grant out of alternate odd-numbered sections not more than ten miles from the limits of the sections granted. Provision is also made for indemnity for lands lost by reason of the near approach of the line of the road to the boundary of Mexico, and also for mineral lands excluded from the grant out of odd-numbered sections nearest the line of the road.

The company was required to commence the construction of its road simultaneously at San Diego, Cal., and from a point at or near Marshall, Tex., and to complete the entire road within ten years after the passage of the act. The act, approved May 2, 1872 (17 Stat., p. 59), required that the road be so commenced and constructed as to

secure the completion of the entire road between the points above named within ten years after the passage of said act. This extended the time for completion to May 2, 1882, and the grant is not strictly within the class to which the resolution now before me applies; but in view of the failure of the company to construct any part of its road eastward from San Diego, I have decided to submit the facts in the matter.

The length of the entire line is estimated at 1,483 miles. Proof of the construction of 181 miles of this road in Texas has been furnished, but no evidence of construction beyond that has reached this office.

From the western boundary of Arizona to the western boundary of Texas the Southern Pacific Railroad Company, having no land grant, has built and is operating a road almost entirely within the limits of the grant to the Texas Pacific Railroad Company, and for the greater portion of the distance practically on the line adopted by the Texas Pacific Company.

NEW ORLEANS, BATON ROUGE, AND VICKSBURG RAILROAD COMPANY, NOW NEW ORLEANS PACIFIC RAILWAY COMPANY.

By section 22 of the act approved March 3, 1871 (16 Stat., p. 573), granting lands to the Texas Pacific Railroad Company, this company was granted the same number of alternate sections of public lands in Louisiana as were by that act granted in California to said Texas Pacific Railroad Company (to the amount of ten alternate odd-number sections per mile), on each side of the line of the road.

The company was required to complete its road within five years from the passage of the act. The estimated length of the line of the road is 318 miles. No evidence of the completion of any portion of this road within the time required by law has been furnished.

Other information respecting the grants to corporations above described appears in the tabulated statement herewith transmitted.

All roads not hereinbefore mentioned are believed to have been constructed within the statutory period.

The following statement completes the imformation asked for by the resolution:

COSTS OF SURVEYING, SELECTING, AND CONVEYING LANDS GRANTED TO AID IN THE CONSTRUCTION OF RAILROADS.

By the act of Congress approved July 1, 1864 (13 Stat., p. 335), as revised, paragraph 7, section 2238 Revised Statutes, fees to be paid the registers and receivers upon selections of lands under grants for railroad purposes were fixed.

Such fees have been paid on all selections forwarded to this office since July 1, 1864, the same having been fully collected by registers and receivers upon presentation of each list of selections.

A proviso in the act making appropriations for sundry civil expenses of the Government, approved July 15, 1870 (16 Stat., p. 305), declares that before any land granted to the Northern Pacific Railroad Company shall be conveyed to any party entitled thereto under the grant, the cost of surveying, selecting, and conveying the same shall be paid by the company or party in interest.

The act making appropriations for the same purpose, approved July 31, 1876, contained the following proviso:

"That before any land granted to any railroad company by the United States shall be conveyed to such company, or any persons entitled thereto under any of the acts incorporating or relating to said company, unless such company is exempted by law from the payment of such cost, there shall be first paid into the Treasury of the United States the cost of surveying, selecting, and conveying the same by said company or persons in interest." (19 Stat., p. 121.)

Being in an act making appropriations, the proviso of July 15, 1870, requiring the Northern Pacific Company to pay the costs of surveying and conveying lands granted to it escaped the attention of the branch of this office then charged with the adjustment of railroad grants, and I find no reference to it in the records until 1874. By letter of May 27, 1874, the resident attorney of said company was informed that no more patents would issue to the company until the expense of surveying and patenting 743,493.44 acres of land in Minnesota, for which patents had issued in 1873, should be paid.

The amount due from the company for the expense of surveying said land is $26,020.53; expense of conveying same, $161.85; making a total of $26,182.38.

It is understood that at the next session of Congress, after the date of said letter, the company sought relief from the payment of the cost of surveying, &c., and this may account for the fact that no further action was taken in the premises.

With the exception of one for 3,016.80 acres in Washington Territory, issued April 8, 1880 (upon which all costs were paid), no patents have issued to said company since May 27, 1874.

The provision in the act of 1876, making appropriations as stated, also escaped notice until 1878, when attention was called to it in connection with an application for patents to the Southern Pacific Railroad of California. The matter was presented to the Department October 26, 1878, with an opinion that said company was exempt from the operation of this requirement so far as lands earned by construction prior to July 31, 1876, were concerned. In his decision of February 20, 1879 (Annual Report General Land Office for 1879, p. 115), your predecessor overruled this opinion.

Pursuant to this decision, on March 12, 1879, a demand was made upon the resident attorney of said company for the payment of the expense of surveying and conveying 230,500.30 acres, patented October 20, 1877. To this the attorney replied, on the 14th of the same month, that he had advised the officers of the company of the demand and would communicate their answer as soon as received. No response by the company has reached this office.

I find that said company is indebted to the Government for costs of surveying and conveying lands embraced in several smaller patents, for which no demand appears to have been made.

The amount due from said company is as follows:

Expense of surveying 320 acres in patent No. 8, dated September 30, 1876	$14 40	
Expense of conveying same	1 90	
		$16 30
Expense of surveying 22,600.48 acres in patent No. 9, dated February 27, 1877	1,017 02	
Expense of conveying same	4 80	
		1,021 82
Expense of surveying 230,500.30 acres in patent No. 10, dated October 20, 1877	10,718 52	
Expense of conveying same	26 30	
		10,744 82
Expense of surveying 40 acres in patent No. 11, dated January 31, 1878	1 80	
Expense of conveying same	2 50	
		4 30
Total amount due		11,787 24

The following amounts are due from the Central Pacific Railroad Company as successor to the California and Oregon Railroad Company. I find no record of any demand made therefor:

Expense of conveying 45,282.79 acres in patent No. 4, dated April 19, 1877		$11 75
Expense of surveying 238.26 acres in patent No. 5, dated May 21, 1877.	$10 72	
Expense of conveying same and 320 acres additional in same patent, (surveys paid for)	2 60	
		13 32
Expense of surveying 10,904.62 acres in patent No. 6, dated February 28, 1878	490 70	
Expense of conveying same	4 20	
		494 90
Total amount due		519 97

The Oregon and California Railroad Company are also indebted to the Government for the expense of surveying 86,622.17 acres of land embraced in patent No. 5, dated June 18, 1877, $3,940.15, and expense of conveying the same, $26—making the total indebtedness $3,966.15, for which no demand appears to have been made.

For reference, the amounts above given are here tabulated:

Name of company.	Amount due for expense of surveys.	Amount due for conveying lands.	Total amount due from each company.
Northern Pacific	$26,020 53	$161 85	$26,182 38
Southern Pacific	11,751 74	35 50	11,787 24
Central Pacific, successor, &c	501 42	18 55	519 97
Oregon and California	3,940 15	26 00	3,966 15
Aggregate indebtedness	42,213 84	241 90	42,455 74

It will be observed that in the case of the three companies last referred to the patents were all issued prior to the decision of your predecessor upon the act of 1876.

The failure to make and renew demands for payment was undoubtedly an oversight and due to the great pressure of business which has always existed in the division of this office charged with the adjustment of these grants. Now that the facts are brought to my attention, demands will be made for the several amounts due, and the result promptly reported to the Department.

The proviso in the act of 1876, before quoted, applies to all the "corporations" herein named, but the above are the only ones to which patents have issued that have failed to reimburse the Government for the expense of surveying and patenting lands.

In conclusion, I have to state that the information asked for by the resolution covered a wide range of subjects, and that to answer the same satisfactorily has required the unremitting labor of all the available clerks in the railroad division for the past forty days. The delay has been caused almost entirely by the failure on the part of this office in the past, at the time when land grants to aid in the construction of railroads were first extensively made, to adopt and perfect a comprehensive system of procuring and keeping in a concise and convenient form all matters of information relative to each particular grant. It has been necessary, in collecting much of the information here presented, to examine correspondence relative to a particular grant, covering a period of twenty-five years; also to measure, in almost every case, the line of definite location of a road in order to determine its length "as located," because of failure on the part of railroad companies to state the length of road, and because such information was not necessary to this office in the adjustment of a grant, and had not therefore been previously ascertained. In order to determine what roads had not been completed in the time named in the granting acts and amendments thereto, it was necessary to examine *every* grant made to a State or corporation, such fact, like the preceding one referred to, not being a necessary concomitant in the adjustment of a grant since the Schulenberg *vs.* Harriman case, hereinbefore referred to.

For many years past the majority of the force of the railroad division of this office has been engaged in the settlement of contests between settlers and railroad companies, and the increase of that class of cases has been so rapid, the rulings of the executive and judicial departments of the Government so diversified, and new legislative acts relative to land grants so numerous, that but a small portion of the division could have been assigned to the adjustment of railroad grants without detriment to the interests of settlers, which have been considered paramount to others in conducting the business. When it is understood that to properly adjust all the grants in question the status of each 40-acre tract must be examined and determined; that there are not only hundreds of thousands but millions of said tracts, and that the status of many tracts involves not one but many questions of law, the magnitude of the work to be performed will be apparent.

The interests of settlers within the limits of these grants, the interests of the railroad companies and those of the people of the United States, demand that these grants should be adjusted at the earliest possible date and the lands now withdrawn not needed to satisfy grants restored to entry, and that the proper force of competent clerks should be provided for such purpose.

The resolution does not call for any copies of papers or correspondence bearing upon the subject therein involved, consequently none have been prepared. Of course there is on file and of record a vast amount of correspondence pertaining to the business of these various railroad companies, and their controversies with individual settlers. To give copies of the same would require a long time and indefinitely postpone this report. If, however, Congress should desire and designate copies of any such correspondence, they will be furnished.

The resolution is herewith returned.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Hon. S. J. KIRKWOOD,
Secretary of the Interior.

A.—*Statement showing States and corporations to which grants have been made to aid in the*

†12,346.24 acres in Fort Ripley reservation relinquished August 10, 1881, leaving 109,116.07 acres chargeable to road.

NOTES TO TABLE A. (Pages 812 to 815.)

a Grant treated as forfeited after August 11, 1866.

b No map of location or evidence of construction on file.

c No map of location filed. Grants treated as forfeited after August 11, 1866.

d No evidence of construction on file.

e State refused to accept grant.

f No evidence of construction on file. Believed to be constructed from Girard to Troy, 84 miles.

g Road beyond Jacksonville not built on located line for 23.42 miles. Act May 23, 1872, confirms all the lands certified for the company up to that date.

h No map of location filed.

i No evidence of the construction of any portion of the road on file. Believed to be constructed a distance of 150 miles.

j Believed to be constructed. No evidence of construction on file.

k No map of definite location filed.

l Act July 28, 1866, increases grant to 10 sections per mile. Act of April 19, 1869, extends time for completion of first 20 miles of road. Act of March 8, 1870, repeals the proviso of the act of April 10, 1869.

m Road never definitely located.

n Road constructed by a different line from that of definite location, and 74 miles thereof never accepted.

o No evidence of construction on file. Road believed to be constructed. The act of March 3, 1879, released to the State the reversionary interests of the United States in the lands certified.

p Believed to be completed. The act of March 3, 1879, released to the State the reversionary interest of the United States in the lands certified.

q Act of March 2, 1867, extends the time for completion of first 20 miles of road. Act of March 3, 1871, authorizes change of northern terminus of road.

r Joint resolution of June 18, 1864, explains the act of that date extending time for completion of road. The act of March 3, 1865, increases grant to ten sections per mile. Act of April 20, 1871, authorizes a relocation of a portion of the road.

s The lands certified were afterwards relinquished to the United States.

t The act of May 12, 1864, required the completion of the road within fifteen years from date of acceptance. Company accepted grant September 20, 1866.

u Act of May 5, 1864, increases grant to ten sections per mile from Tomah to Saint Croix Lake. The act of March 3, 1873, authorizes the company to select indemnity for certain lands lost.

v Act of May 5, 1864, increases grant to ten sections per mile.

w June 21, 1866, resolution explanatory of the act of May 5, 1864. Act of March 3, 1875, authorizes the company to straighten their road.

x Act of March 3, 1857, authorizes branch via Saint Cloud and Crow Wing to Red River. Joint resolution July 12, 1862, changes route of branch to Lake Superior. Act of March 3, 1865, extends time and increases grant. Act July 13, 1866, grants indemnity in certain cases. Act March 3, 1871, authorizes change of route. Act June 22, 1874, extends time for completion. Not operative.

Notes ce able "A," pages 812 to 815—Continued.

y Act March 3, 1865, extends time and increases grant. Act July 13, 1866, grants indemnity in certain cases. Act March 3, 1871, authorizes extension of time from Crow Wing to Brainerd. Act June 22, 1874, extends time for completion of road. Not operative, 16.13 miles of road within Fort Ripley reservation, and company not entitled to lands.

z The act of July 4, 1866, required the road to be completed within ten years from date of acceptance. Grant accepted February 25, 1867. Act July 13, 1866, provides for certification, &c.

aa The act of July 4, 1866, required the road to be completed within ten years from date of acceptance. Grant accepted March 7, 1867. Act of July 13, 1866, provides for certification, &c.

bb The act of July 13, 1866 (14 Stats., 93), authorizes deficiency to be of made up of lands within 30 miles west of line of road. Act of July 13, 1866 (14 Stats., 97), provides for indemnity in certain cases. Not to diminish grant to this road.

A.—*Statement showing States and corporations to which grants have*

CORPOR

Names of corporations to which grants have been made.	Dates of acts making grants and acts supplemental thereto.	Statutes.	Page.	Effect of acts.	Location of the grants.
Northern Pacific Railroad Company.	July 2, '64	13	365	Granting act. Required completion of entire road by July 4, 1876.	
	May 7, '66	14	355	Resolution. Extended the time for commencing and completing the road two years.	
	July 1, '68	15	255	Resolution. Extended the time for commencing work on the road two years, and required the completion of the entire road by July 4, 1877.	Wisconsin, main line..
					Minnesota, main line..
	Mar. 1, '69	15	346	Resolution. Consented to the issue of bonds, &c.	Dakota, main line.....
	Apr. 10, '69	16	57	Resolution. Authorized the extension of the branch line from Portland, Oreg., to Puget Sound.	Montana, main line...
					Idaho, main line.....
					Oregon, main line.....
					Washington, main line
					Washington, branch..
	May 31, '70	16	378	Resolution. Authorized the issue of mortgage bonds; reversed the location of the main line and branch in Washington Territory, extended the indemnity limits, &c.	
	July 15, '70	16	305	Proviso. Required the company to pay the cost of surveying, selecting, and conveying lands granted before the issue of patents.	
California and Oregon Railroad Company, now Oregon Branch of the Central Pacific Railroad.	July 25, '66	14	239	Granting act. Required completion of the entire road on or before July 1, 1875.	
	June 25, '68	15	80	Extended the time for completing the road to July 1, 1880.	
	Apr. 10, '69	16	47	Provided that the lands granted shall be sold to actual settlers only, in quantities not greater than one-quarter section to one purchaser, and for a price not exceeding $2.50 per acre.	California .....
Oregon Central Railroad Company, now Oregon and California Railroad Company.	July 25, '66	14	239	Granting act. Required completion of the entire road on or before July 1, 1875.	
	June 25, '68	15	80	Extended the time for completing the road to July 1, 1880.	
	Apr. 10, '69	16	47	Amended granting act. Also, provided that the lands granted shall be sold to actual settlers only, in quantities not greater than one-quarter section to one purchaser, and for a price not exceeding $2.50 per acre.	Oregon .....

been made to aid in the construction of railroads, &c.—Continued.

ATIONS.

Length of road, in miles, as located or proposed.	Number of sections (of 640 acres) granted for each mile of road.	Estimated quantity of land (in acres) embraced in the grant.	Date when the road should have been completed.	Number of miles completed before the date fixed for completion of the road.	Number of miles uncompleted at the date fixed for completion of the road.	Number of miles completed after the date fixed for completion of the road.	Number of miles now uncompleted.	Number of acres patented to the company.	Remarks.
92	20	907,520 00	July 4, '79	...	92	....	92	.....	The date given for the completion of this road is that fixed by the decision of the Secretary of the Interior, dated June 11, 1879 (see General Land Office Report for 1879, pp. 109 to 111). The limits of the main line and branch in Washington Territory overlap and the area in the overlapping limits is estimated as part of the grant for the main line only.
236	20	4,301,440 00	.....	228	8	....	8	743,493.44

									Proof of construction, under the act of 1872, of a road from Marshall to the eastern boundary of Texas, a distance of 20 miles, has been filed.
									The company has also filed maps showing 221 miles of branch lines in Texas constructed or acquired under authority of the act of 1874.
									The area within the limits of this grant here given is the amount of vacant land available for the grant, found by actual examination heretofore.
318	20	903,218.61	Mar. 3, '76	....	318	....	318	None.....	This company has recently filed in the Department proof of the completion of 130 miles of road, 60 of which were constructed by the New Orleans, Mobile and Texas Railroad Company, but this office has not been advised of the acceptance of any portion thereof.

[H. Ex. Doc. No. 29, Forty-seventh Congress, second session.]

LAND PATENTS TO CERTAIN RAILROAD COMPANIES.

In answer to a resolution of the House of Representatives of December 14, 1882.

Letter from the Secretary of the Interior, in response to a resolution of the House of Representatives in relation to land patents to certain railroad companies.

DEPARTMENT OF THE INTERIOR,
Washington, December 29, 1882.

SIR: In answer to House resolution of the 14th instant, calling on me for information as to lands patented to railroad companies after the time fixed by law for their completion and copies of decisions and opinions on this subject, I have the honor to transmit herewith copy of the report of the Commissioner of the General Land Office on the resolution of this date, with the accompanying papers; also copy of the opinion of the Attorney-General of the 13th June last, in relation to lands claimed by the New Orleans Pacific Railway Company, in answer to questions submitted to him by my immediate predecessor. On this opinion no action has been taken by this Department.

Very respectfully,

H. M. TELLER,
Secretary.

The Hon. the SPEAKER
of the House of Representatives.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., December 29, 1882.

SIR: I have the honor to acknowledge the receipt on the 16th instant, by reference from you for report, of a resolution of the House of Representatives, passed the 14th instant, as follows:

"*Resolved*, That the Secretary of the Interior be, and he is hereby, directed to inform the House, at the earliest practicable period, whether any of the lands heretofore granted by Congress to any railroad company to aid in the construction of its railroad, and to which such company was not entitled to patents at the time when the period expired within which, by the terms of the law making such grant, such railroad was required to be completed, have been patented to such company since the expiration of the period within which such railroad was required by law to be completed; and if any such patents have been issued to any such companies that he inform the House how much land has been patented to each of the land-grant railroad companies for land to which they were not entitled to patents when the period within which their respective railroads were required to be completed expired, and the date of such patents; and that he also inform the House by and under what authority such patents were issued, and furnish to the House copies of all decisions made by the Secretary of the Interior in relation to the issuing of patents to any of such land-grant railroad companies for lands for which they were not entitled to patents at the expiration of the period above named; and also copies of all opinions and decisions made by any officer of the Government in relation thereto and filed in the Department of the Interior."

The railroads for the benefit of which patents or certificates (as the case may be) have been issued for lands lying opposite portions of such roads not completed within the period required by the law making the grant, and for which the patents or certificates have been issued *since* the expiration of said period, are as follows:

RAILROADS IN MINNESOTA.

SAINT VINCENT EXTENSION OF SAINT PAUL AND PACIFIC, FORMERLY BRANCH LINE OF SAINT PAUL AND PACIFIC, NOW SAINT PAUL, MINNEAPOLIS AND MANITOBA RAILROAD.

The grant for this road was made by act of March 3, 1857, and amendments thereto of July 12, 1862, March 3, 1865, March 3, 1871, and March 3, 1873. The road should have been completed December 3, 1873. On that date only 140 miles had been completed, leaving 174 miles unfinished, and which was not completed until December 23, 1879. The following described patents issued to the State of Minnesota for the benefit of

said road conveyed the amount of land specified, which lies opposite portions of the road not constructed December 3, 1873:

	Acres.
Patent No. 1, January 14, 1875	157,731.45
Patent No. 2, July 12, 1880	355,746.67
Patent No. 3, February 19, 1881	33,524.14
Patent No. 4, June 23, 1881	517.70
Total	547,519.96

Said patents were issued under the provisions of the sixth section of the act of March 3, 1865. Patent No. 1 embraces 155,345.92 acres of indemnity land which, under the provisions of section 4 of the act of July 13, 1866, the State might dispose of, although it was not coterminous to a completed portion of the road. This would leave 2,385.53 acres of granted land included in said patent lying opposite a section of the road not completed in time. No specific authority appears for the patenting of said 2,385,53 acres. Said lands appear, however, to have been embraced in lists *certified* in April and July, 1874, to the State under the act of July 13, 1866. (14 Stats., 97.) It will be observed that the third section of said act provides—

"That all lands heretofore granted to the Territory and State of Minnesota to aid in the construction of railroads shall be certified to said State by the Secretary of the Interior, from time to time, whenever any of said roads shall be definitely located, and shall be disposed of by said State in the manner and upon the conditions provided in the particular act granting the same as modified by the provisions of this act. * * *"

Certification was therefore made without regard to construction. Up to September 29, 1874, it was held by this office and Department that the title to lands granted to Minnesota for railroad purposes passed by certification, and that no further conveyance was required. On said date (September 29, 1874), Acting Secretary Cowen decided (copy of decision herewith, marked A) that as the sixth section of the act of March 3, 1865, expressly provides for the issue of patents, and as such provision is not repealed in express terms by the act of July 13, 1866, patents must necessarily issue in order to convey title. Following this decision, or on January 14, 1875, all the lands that had previously been certified to the State for the benefit of this road were patented to the State. Among the lands so patented are the 2,385.53 acres before mentioned.

Patents numbered 2, 3, and 4 were issued after the completion of the road, and under decision of Secretary Schurz, dated June 10, 1880, a copy of which, marked B, is herewith submitted.

WESTERN RAILROAD, FORMERLY BRANCH OF SAINT PAUL AND PACIFIC RAILROAD.

(Acts of March 3, 1857, March 3, 1865, July 13, 1866, March 3, 1871, and March 3, 1873.)

No portion of this road was completed in time. Only one patent has been issued to the State for its benefit. Said patent issued April 21, 1879, and conveyed 121,462.31 acres. Of this amount 12,346.24 acres were subsequently relinquished by the State, and also by the company, leaving 109,116.07 acres chargeable to the road. Said patent was issued after completion of the road and under instructions contained in a decision made by Secretary Schurz on February 18, 1879. (Copy of said decision herewith, marked C; also copy of letter of this office, dated January 27, 1879, referred to in said decision, marked C_1; copy of letter of this office, dated November 7, 1879, marked C_2, and copy of decision, marked D, of Secretary Schurz, made October 16, 1880, together with opinion of Attorney-General Devens, of June 5, 1880, relative to this road.)

SOUTHERN MINNESOTA RAILWAY EXTENSION.

(Acts of July 4, 1866, and July 13, 1866.)

This road was not completed until December 8, 1879. It should have been completed February 25, 1877, but on that date only $149\frac{144}{320}$ miles had been constructed, leaving $130\frac{97}{320}$ miles uncompleted. No patents have been issued to the State for its benefit. The company appears to have been satisfied with a conveyance by certification, under act of July 13, 1866. On April 27, 1880, two lists of land, aggregating 169,553.13 acres, lying opposite sections of the road not completed February 25, 1877, were certified to the State of Minnesota for the benefit of this road. Said certification was made in accordance with instructions of Secretary Schurz, issued December 5, 1879, and accompanied by an opinion of Attorney-General Devens, dated November 29, 1879. (Copy of said instructions and opinion herewith, marked E.)

HASTINGS AND DAKOTA RAILROAD.

(Acts of July 4, 1866, and July 13, 1866.)

This road should have been completed March 7, 1877, but at that time only 74 miles were completed, leaving 128.1 miles uncompleted. The entire road was completed December 15, 1879. No patents have been issued to the State for the benefit of this road, all the land approved for the road having been certified to the State under the act of July 13, 1866. On May 4, 1880, and October 16, 1880, two lists aggregating 144,816.20 acres, lying opposite sections of the road not completed March 7, 1877, were certified to the State of Minnesota for the benefit of this road. Said lists were prepared under instructions contained in decision of Secretary Schurz, made April 17, 1880. (Copy herewith, marked F.)

LAKE SUPERIOR AND MISSISSIPPI RAILROAD.

(Acts of May 5, 1864, and July 13, 1866.)

This road should have been completed May 5, 1872. On that date, so far as the records of this office show, but 30 miles were completed, leaving 124.42 miles uncompleted, which were finished, according to certificate of governor of Minnesota, on February 28, 1873. Since the report of March 27, 1882, relating to railroads not completed within the time required by law was made to you, I have been unofficially informed that this road was completed in August, 1870, but the proper certificates to that effect have never been filed in this office or Department, hence I include said road in this report. No patents have been issued to the State of Minnesota for the benefit of this road, all the land approved to the State for same having been certified under the act of July 13, 1866. (14 Stats., 97.) On June 7, 1873, May 17, 1875, and September 28, 1875, after completion of the road, three lists, aggregating 193,215.51 acres, lying opposite sections of the road not completed (per certificates) May 5, 1872, were certified to the State of Minnesota for the benefit of this road.

RAILROADS IN WISCONSIN.

WISCONSIN CENTRAL, FORMERLY PORTAGE, WINNEBAGO AND SUPERIOR RAILROAD.

(Acts of May 5, 1864, June 21, 1866, and April 9, 1874.)

This road as located is 341 miles long, and should have been completed December 31, 1876. At that time only 231 miles of the 257 miles between Portage City and Ashland had been constructed, leaving a gap of 26 miles, commencing at Fifield and running north in the direction of Ashland. Said 26 miles were completed August 22, 1877, or about eight months after the proper time, and made a continuous road between Portage City and Ashland. Eighty-four miles of the located road are still uncompleted. The following is a summary of the lands lying opposite sections of the road not constructed December 31, 1876, which have been patented to the State of Wisconsin for the benefit of said road since said date:

	Acres.
In patent No. 8, January 9, 1878	12,387.69
Patent No. 9, August 10, 1878	29,398.51
In patent No. 11, November 23, 1882	40,679.91
Total	82,466.11

The first patent named (No. 8) was issued after the approval of a list (No. 8) of selections by the State and company, submitted to Secretary Schurz, with letter of this office dated November 16, 1877 (copy herewith inclosed, marked G), and returned by him approved, with letter of December 26, 1877 (copy herewith, marked H). It is proper to say that the statement made in said letter of November 16, 1877, to the effect that there was but 1,377,383.93 acres in the limits of the grant for this road, evidently relates only to that part of the road between Portage City and Ashland, and does not include the land within the limits of the road as located beyond Ashland. Patent No. 9 was issued after the approval by Secretary Schurz of a list (No. 9) of selections sub-

mitted to him, with letter of this office dated July 29, 1878 (copy herewith, marked L, also copies of its inclosures marked L_1, L_2, L_3), and returned by him approved with letter of July 30, 1878 (copy herewith, marked K). It will be observed that the Secretary directs in effect in this (said) letter, that no more patents shall issue for the benefit of this road, "until otherwise instructed by this Department." Mention is made in said correspondence of requiring a relinquishment of 41,800 acres of indemnity land held to have been erroneously patented to the State, in view of the decision of the Supreme Court in the case of the Leavenworth, Lawrence and Galveston Railroad Company *vs.* The United States (2 Otto, 733), which seems to hold that indemnity can only be taken for lands lost between the dates of the granting act and of the definite location of the road. Grants were adjusted upon that theory until the receipt by this office of the decision (hereinbefore referred to in connection with Western Railroad of Minnesota, and herewith, marked D), by Secretary Schurz, October 16, 1880, and opinion of Attorney-General Devens, of June 5, 1880, in which it was held that indemnity might be selected for losses on account of sales, pre-emptions, and other appropriations (excepting reservations) under the land laws, made *before* or *after* the date of the granting acts. This change in the rule rendered it unnecessary for the Wisconsin Central or the State to relinquish the 41,800 acres referred to, as they would under the new rule be entitled to more indemnity than they had received prior to October 16, 1880. On the 20th of February, 1882, the Wisconsin Central Railroad Company, through its attorney, applied to your predecessor (Secretary Kirkwood), by letter of that date, for patents for lands within their granted and indemnity limits, and stated that they had filed a list of indemnity land selections in this office, which was ready for submission to your Department for approval preparatory to issue of patent; also that "the selections embrace lands due for road constructed within the limitation of the law." (See copy herewith, marked L_4.) Secretary Kirkwood referred said letter to this office with the following indorsement:

"Has the entire line of the road been completed; if so, was it all done within the time prescribed by the law making the grant?"

On March 30, 1882, by letter of that date (copy inclosed, marked M), I informed Secretary Kirkwood that the road had not been completed in time, and that 110 miles remained uncompleted December 31, 1876, since which date only 26 miles had been built. I also said (in effect) that if it were fully determined that the company was entitled to the full complement of lands for 231 miles of road constructed in time, it would be entitled to much more land than had theretofore been patented for its benefit, but I suggested, in view of the fact that "the whole question concerning grants which have lapsed by failure to complete the road within the statutory period is now before Congress," that no further steps should be taken at present looking to the patenting of more lands for the benefit of the grant named. Previous to said date (March 30, 1882), during the early part of the last session of Congress, Secretary Kirkwood verbally instructed me to take no action looking to the certification or patenting of lands to or for any grant where the road had not been wholly completed in time, involved in the Congressional inquiry then pending, and I verbally instructed the clerks in charge of such matters accordingly. All action relative to listing lands for this road was accordingly suspended. On September 18, 1882, the company, by letter of that date (copy herewith, marked N), again applied (to you) for the issue of patents for lands earned by the construction of sections of road in time. On October 2, 1882, by letter of that date (copy herewith inclosed, marked N_1), you directed me to submit to you for approval the list of indemnity selections in question. You approved said list (No. 10) on October 13, 1882, and patent (No. 10) was issued for the land (all of which lies opposite sections of the road constructed in time) on October 21, 1882. On the 13th ultimo, with letter of that date (copy herewith, marked N_2), I submitted to you for approval a list of granted lands aggregating 43,280.99 acres. In said letter, through the carelessness of the clerk or clerks in charge of the matter, it is incorrectly stated (in effect) that said lands lie opposite portions of the road constructed in time, whereas 40,679.19 acres of the same lie opposite the 26 miles mentioned not reported to this office as constructed until eight months after the expiration of the time limited for completion. It is absolutely impossible for me to examine personally details of this character, but I have taken measures to fix the responsibility of this erroneous statement where it belongs, and will report the same to you for proper action. Said certified list, however, when correctly stated, is in accord with your recommendations and instructions in the case of the Atlantic and Pacific Railroad hereinafter referred to, and also with the case of the Northern Pacific Railroad, referred to in your letter of September 18, 1882, not yet reached in the due course of business, in both of which I am directed to issue patents for lands lying opposite portions of the roads recently constructed out of time.

Nevertheless, had I been truly advised of the situation I would not have forwarded said list to you without previous consultation. You approved said list on the 15th ultimo, and on the 23d ultimo a patent (No. 11) was issued for the lands embraced in said list.

CORPORATIONS.

ATLANTIC AND PACIFIC RAILROAD.

Act of July 27, 1866 (14 Stats., 292).

The main line of this road was required to be completed by July 4, 1878. No time was fixed for the completion of the branch. The length of the main line is estimated at 2,126 miles and the branch at 300 miles, making in all 2,426 miles. Prior to July 4, 1878, the road had been completed and accepted from Springfield, Mo., to Vinita, Indian Territory, a distance of 125 miles; that portion between Springfield and Pierce City, Mo., having been constructed by the Pacific and Southwestern Branch Railroad Company. It appears from the records of this Department that Secretary Schurz, on October 15, 1880, requested the opinion of the Attorney-General (Devens) on the application of the Atlantic and Pacific Railroad Company for the appointment of three commissioners to examine a section of 25 miles of its road constructed west from Albuquerque, N. Mex.

On October 26, 1880, Attorney-General Devens rendered an opinion (copy herewith, marked P) on the matter, to the effect that the grant had not been forfeited by a breach of the condition named in the granting act, and until some action should be taken by Congress in the nature of a declaration of forfeiture of the grant it would be the duty of the Executive Department to give the company the benefit of its grant. On December 15, 1880, with letter of that date (copy herewith inclosed, marked R), Secretary Schurz submitted to the President of the United States a report of the commissioners appointed by him to examine that section of road beginning at a point in township 8 north, range 2 east, near Isleta, N. Mex., and running westwardly 50 miles, constructed by the Atlantic and Pacific Railroad Company. Secretary Schurz recommended that said section be accepted, and "that patents for lands earned by the construction thereof be issued to said company pursuant to the fourth section of the act approved July 27, 1866 (14 Stats., 295)." On December 17, 1880, President Hayes approved the recommendations of Secretary Schurz, who notified this office accordingly by letter of same date (copy herewith inclosed, marked S). On January 3, 1881, my immediate predecessor, with letter of that date (copy herewith inclosed, marked T) submitted to Secretary Schurz a list (No. 1) embracing 23,037.36 acres of land lying opposite the section of road accepted December 17, 1880, above mentioned. On January 7, 1881, he approved said list, and on January 10, 1881, a patent was issued for said 23,037.36 acres. On April 18, 1881, 50 miles of this road was accepted, upon the recommendation of your predecessor, Secretary Kirkwood. On January 5, 1882, 100 miles, and on December 14, 1882, 250 miles of this road, all constructed since July 4, 1878, were accepted by the President of the United States, but no patents have yet been issued for lands opposite said sections of road.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Hon. H. M. TELLER,
Secretary of the Interior.

SAINT PAUL AND PACIFIC RAILROAD, SAINT VINCENT EXTENSIGN.

A.

DEPARTMENT OF THE INTERIOR,
Washington, September 29, 1874.

SIR: I have examined the appeal of the Saint Paul and Pacific Railroad, Saint Vincent Extension, from your decision of August 13, 1874, rejecting its application for patents under the act of March 3, 1865, instead of certified transcripts. You founded your ruling upon the third section of the act of July 13, 1866, and the practice that has grown up in your office under it.

The sixth section of the act of March 3, 1865, expressly provides that patents shall issue for the lands granted when the governor shall certify that any section of 10 consecutive miles is completed in a good, substantial, and workmanlike manner, and the Secretary of the Interior shall be satisfied that the State has complied in good faith with the requirements of law. It further provides that said lands "shall not in any manner be disposed of except as the same are patented under the pro visions of this act." This language is clear, plain, and explicit. It requires the issuing of patents, and forbids any sale until after patent. Has this requirement been repealed? There is no express repeal. If repealed at all, it is by implication. Repeals by implication are not favored. It is presumed that Congress, if it intends to repeal one of its acts, or any part thereof, will use apt words to express that intent.

You held that it had repealed this provision by the third section of the act of July 13, 1866. I cannot agree with you. That section provides "that all the lands heretofore granted to the Territory and State of Minnesota to aid in the construction of

railroads shall be certified to said State by the Secretary of the Interior from time to time, whenever any of said roads shall be *definitely located*, and shall be disposed of by said State in the manner and upon the conditions provided in the particular act granting the same, as modified by the provision of this act." We have already seen that one of the conditions upon which the lands may be disposed of, as "provided in the particular act granting the same," is that patents shall issue before sale. The section under consideration provides that the lands shall be certified to the State by the Secretary of the Interior whenever the line shall be definitely located; that is, before construction and before the State has done anything to earn the lands. If certification is equivalent to a conveyance, the State becomes the owner without complying with the law in constructing its road.

I prefer to construe the certification referred to as intended to inform the State in advance what lands it will be entitled to have patents for when its road is built in accordance with law. This construction gives force to the provisions of both acts, and allows both to stand. It also leaves in force the provisions of the act of August 3, 1854, cited in your decision. That act authorizes the Commissioner of the General Land Office to make a certified list of lands which shall operate as a conveyance in fee-simple, when the law making the grant "does not convey the fee-simple title of such lands, or require patents to be issued therefor." In the case under consideration the law making the grant does require "patents to be issued," and therefore it is not one where a certificate can be substituted for a patent.

To hold otherwise is to say that the act of August 3, 1854, is also repealed by implication by the third section of the act of July 13, 1866.

I am of opinion that there is no such repeal. I reverse your decision, and herewith return the papers transmitted with your letter of the 26th instant.

Very respectfully,

B. R. COWAN,
Acting Secretary.

The COMMISSIONER GENERAL LAND OFFICE.

B.

DEPARTMENT OF THE INTERIOR,
Washington, June 10, 1880.

SIR: I am in receipt of your report of the 27th of May last upon the status of the grant of lands made to the State of Minnesota to aid in the construction of a railroad from Saint Cloud to Saint Vincent in that State.

The report and accompanying map show that a road has been constructed between the above-named points by a company recognized by the State authorities as being entitled to the benefits of the grant; that the road was not completed within the time directed by the statutes of the United States; that no forfeiture of the grant has been declared, and that the line of the road as constructed deviates in some places from the line of definite location indicated by the map filed in this Department in 1871, upon which the withdrawal for the benefit of the grant was made, the largest deflections being between Glyndon and Saint Vincent.

Upon these facts you submit two questions for my consideration, and request to be instructed in the premises.

1st. Whether, considering the failure to complete the road within the time directed by the statute, the State is entitled to patents for the benefit of the Saint Paul, Minneapolis and Manitoba Railway Company, the present owner of said road.

2d. Whether, in view of the deviations in the line of construction from the line of definite location, the State is entitled to patents under the grant for the benefit of said company.

Upon the first point you express the opinion, in effect, that notwithstanding the road was not completed within the time mentioned in the act of March 3, 1873 (17 Statutes, p. 631), the State is entitled to patents under the grant. I fully agree with you upon this point, the act of June 22, 1874 (18 Statutes, p. 203), the conditions of which have not been accepted by the company, being held as neither enforcing nor declaring a forfeiture of the grant. (Kemper *vs.* Saint Paul and Pacific Railroad Company, Copp's L. O., vol. 3, p. 170.) The law controlling this question is well settled. (Schulenberg *vs.* Harriman, 21 Wall., 44.)

Upon the second point you express no opinion. The only question for determination, however, is whether the deflections in the line of the constructed road are of such character as to make it a different road from that contemplated by the granting acts, and for which the withdrawal was intended. If the constructed road is not the one contemplated by the grant and withdrawal then the State has no right to patents for the lands claimed. But it is the road so contemplated if the deflections became necessary in order to avoid engineering obstacles which could not be otherwise overcome without exaggerated expense, or to remedy defects in the original location. In other words, if the road as constructed is a substantial compliance with the granting acts, the State is entitled to the benefits of the grant. (Opinion of the Attorney-General of February 2, 1880, Copp's L. O., vol. 7, 12; case of McGregor and Western Rail-

road Company, *id.*, 27; case of Hastings and Dakota Railroad Company, decided April 14, 1880.)

Since your report was received the said company has filed in this Department affidavits showing why the road between Glyndon and Saint Vincent was not constructed on the line as located in 1871. The affidavits were made by the following parties respectively: Charles A. F. Morris, who was chief engineer of the Saint Paul and Pacific Railroad Company in the years 1871 and 1872, and who surveyed and located the line in 1871, and re-examined it preparatory to constructing the road between Glyndon and Saint Vincent, in 1872; Charles J. A. Morris, civil engineer, who was employed by said company, in 1871 and 1872, in the location and construction of said road between the points aforesaid; Andrew De Graff, railroad constructor for said company, under whose personal supervision a large part of the Saint Vincent extension road was built; Norman W. Kittson, whose business for many years required him to make journeys yearly from Saint Paul to Manitoba, via the Red River Valley, and who is well acquainted with the country through which said road is built; James J. Hill, who was engaged from 1868 to 1879 in the transportation business on the Red River of the North, between Saint Paul and Winnipeg, in Manitoba, and who has passed through the Red River Valley at all seasons of the year, and is well qualified to depose as to the facts alleged by him; and William P. Payte, a civil engineer, well acquainted with the topography of the country through which the said road passes.

The affidavits of these witnesses show that there are extensive swamps and marshes in townships 143, 144, 145, 146, 147, and 154, ranges 47 and 48, and in townships 156, 157, and 158, in ranges 49 and 50; that the season during which the location of 1871 was surveyed was very dry in the section of country through which the road was so located; that at that time the said swamps and marshes were comparatively dry, and the surveyors walked over them without difficulty; that the line was located over said swamps in the belief that it was a feasible route, and upon which the necessary material could be easily obtained for grading and ballasting; that in the winter of 1871–'72 there were heavy falls of snow in that vicinity, and the weather of the spring and summer of 1872 was very wet; that upon a re-examination of said line in 1872, preparatory to commencing the construction of said road, it was found that the country for a great distance in the above-named townships, and over which the line of 1871 was located, was under water to the depth of several feet; that earth in sufficient quantities to raise the road-bed above water could not be obtained except by hauling it for a long distance at great expense; that the largest of said swamps was in township 147, ranges 47 and 48, and was twelve miles wide; that said swamps were under water at certain seasons almost every year, and presented engineering difficulties in the way of building said road of such a character as to make it necessary to locate the line of construction far enough to the east to avoid the same; that the point of crossing the margin of the large swamp above mentioned governed the location of the road for many miles north and south thereof; that upon careful examination it was found that no ground over which it was practicable to build the road could be found nearer to the definitely located line than to the east of said swamps and marshes where the road is constructed; that the point of crossing of Red Lake River at Crookston was the most feasible one and the best adapted for bridging that could be found for many miles in either direction; that no lands in that vicinity were settled upon or entered with reference to the line of definite location prior to the establishment of the line of actual construction; that the progress of settlement kept pace with the construction of the road, and that the road as built is the shortest and best practicable one that could be had between Glyndon and Saint Vincent.

From the foregoing it is apparent that the deflections from the line located in 1871, between the points last above mentioned, were necessary to the proper construction of the road.

It is clear that the road as now constructed is of immeasurably more value to the inhabitants of the Red River Valley along its line, and better adapted to the purposes for which the road was intended than it would have been had it been built through said swamps and marshes, to say nothing of the extra expense of building and keeping it in repair over the latter route.

One of the principal objections to varying from the line of definite location in constructing a land-grant road does not exist in this case, viz, that settlers locate and purchase lands at the advanced rates in view of the definite location and for convenience to the road.

The deflections south of Glyndon do not appear to be material.

I am therefore of opinion that the said road was built in substantial compliance with the requirements of the granting acts, and that the State is entitled to patents for the granted lands; and you will proceed in the work of the adjustment of the grant accordingly, having due regard to all conflicting claims to the lands.

The affidavits aforesaid are herewith transmitted for filing in your office.

Very respectfully,

C. SCHURZ, *Secretary.*

The COMMISSIONER OF THE GENERAL LAND OFFICE.

C.

WESTERN RAILROAD, FORMERLY BBANCH OF SAINT PAUL AND PACIFIC RAILROAD—DECISIONS AS TO LAND GRANT BY COMMISSIONER OF GENERAL LAND OFFICE, SECRETARY OF THE INTERIOR, AND ATTORNEY-GENERAL.

DEPARTMENT OF THE INTERIOR,
Washington, February 18, 1879.

SIR: I have received your communication of the 27th ultimo in relation to the lands relinquished to the United States by the governor of the State of Minnesota, and also by the Western Railroad Company of Minnesota, said lands being the same formerly included in the grant to the Saint Paul and Pacific Railroad Company, Brainerd Branch.

On the receipt of your letter above mentioned, the deeds of relinquishment were transmitted to the governor of said State for correction in the particulars referred to by you. Said deeds have been returned corrected. This removes every objection now known to this Department to the approval of the lands to the latter named company. You will therefore proceed, upon the proper application by the governor of the State of Minnesota, to prepare the list of lands inuring to the grant, not already approved and patented for the approval of this Department.

The deeds and accompanying papers are herewith transmitted.

Very respectfully,

C. SCHURZ, *Secretary.*

THE COMMISSIONER OF THE GENERAL LAND OFFICE.

C1.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., January 27, 1879.

SIR: I have the honor to acknowledge the receipt, through reference by you for report, of a letter from the Hon. J. S. Pillsbury, dated Saint Paul, November 21, 1878, transmitting a deed, executed by him as governor of Minnesota, relinquishing to the United States certain lands within the limits of the grant by act of Congress approved March 3, 1857, and the acts amendatory thereof to said State, to aid in the construction of the so-called Brainerd Branch of the Saint Paul and Pacific Railroad. Accompanying the letter and deed are various papers, more particularly referred to hereinafter.

I have the honor to submit the following in reply:

By an act of Congress, approved March 3, 1857, there was granted to the then Territory, now State, of Minnesota, to aid in the construction of certain railroads, among which was a road "from Stillwater, by way of Saint Paul and Saint Anthony, to a point between the foot of Big Stone Lake and the mouth of Sioux Wood River, with a branch via Saint Cloud and Crow Wing, to the navigable waters of the Red River of the North, * * * every alternate section of land, designated by odd numbers, for six sections in width on each side of said road and branches," and indemnity was provided for within limits of 15 miles on each side.

By an act of the legislature, approved May 19, of the same year, the grant of March 3 was accepted on the terms, conditions, and restrictions therein contained, and an act passed on the 22d of May, granted to the Minnesota and Pacific Railroad Company, to aid in the construction of several lines and branches of roads, including the branch from Saint Cloud to Crow Wing and the navigable waters of the Red River, all the interest, present and prospective, of the Territory and future State of Minnesota on said lines and branches, to any and all lands granted to the Territory by said act of March 3, together with all the rights, privileges, and immunities conferred, or intended by said act. A map of the definite location of the branch from Saint Anthony to Crow Wing, was filed in this office December 5, 1857, and in 1860, 1861, and 1864 the lands inuring to the grant were certified and approved to the State.

In 1862 (March 10) the legislature of the State, on account of the failure of the Minnesota and Pacific Railroad Company aforesaid to build and complete the road in accordance with the terms of the grant of May 22, 1857, aforesaid, created the Saint Paul and Pacific Railroad Company, and granted to it all the rights, benefits, and privileges, property, and franchises of the first-named company, including the lands.

By joint resolution, approved July 12, 1862, Congress provided that in lieu of the branch via Saint Cloud and Crow Wing to the navigable waters of the Red River there might be constructed a new branch line, having its southwestern terminus at

any point on the existing line between the Falls of Saint Anthony and Crow Wing, and extending in a northeasterly direction to the waters of Lake Superior; and in its aid a grant like the one of 1857 was made.

By an act, approved March 3, 1865, Congress extended the time for the completion of the road, and increased the grant to ten sections per mile, with the right to select indemnity within 20 miles.

By an act, approved March 3, 1871, Congress provided, upon certain conditions, that the Saint Paul and Pacific Railroad Company "may so alter and amend its branch lines that instead of constructing a road from Crow Wing to Saint Vincent, and from Saint Cloud to the waters of Lake Superior, it may locate and construct in lieu thereof, a line from Crow Wing to Brainerd to intersect with the Northern Pacific, * * * with the same proportional grant of lands to be taken in the same manner along said altered lines as is provided for the present lines by existing laws."

By act of March 3, 1873, the time for the completion of the road from Saint Anthony to Brainerd was extended to December 3, 1873.

By act of June 22, 1874, the time for the completion of said branch (among others) was extended until March 3, 1876, and no longer, upon the following conditions: "That all rights of actual settlers and their grantees who have heretofore, in good faith, entered upon and actually resided on any of said lands prior to the passage of this act, or who otherwise have legal rights in any of such lands shall be saved and secured to such settlers or such other persons in all respects the same as if said lands had never been granted to aid in the construction of the said lines of railroads." The second section provided "that the company taking the benefit of this act shall, before acquiring any rights under it, by a certificate made and signed by the president and a majority at least of the directors, and sealed with the corporate seal, accept the conditions in this act, and file such acceptance with the Secretary of the Interior for record and preservation."

Under that act many persons who had, prior to its passage, settled upon lands within the limits of the grant to said Brainerd Branch line presented their claims, which, with few exceptions, were admitted or recognized, subject to appeal by the company to the Secretary. In a few instances patents issued, but in most cases their claims never reached the status of entries.

When the question was brought to the attention of your predecessor, the Hon. Z. Chandler (in a case, by appeal from the decision of this office in favor of the settler), he decided that the company not having accepted the conditions of the act it was inoperative for any purpose, and that the right of settlers were not saved by the first section thereof.

Further action by Congress has not been taken; and the grant has been, for three years past, subject to forfeiture for non-fulfillment of the terms of the granting act.

The legislature of the State of Minnesota, by an act approved March 1, 1877, resumed the grant theretofore held by the Saint Paul and Pacific Company, appertaining to the uncompleted portion—between Watab and Brainerd—and conferred it upon a railroad company to be organized of at least five persons, who were to be the holders of a majority of the $15,000,000 bonds, commonly known as the "extension line bonds," upon certain conditions. In the event of a failure by those persons to do and perform certain things within a specified period, then any company or corporation then organized or to be thereafter organized, might "succeed to and acquire the right to complete, own, maintain, and operate the uncompleted portions of said line of railroad mentioned * * * by filing with the governor a written notice of its desire and intention, under and subject to the provisions of this act, to complete, equip, maintain, and operate the then uncompleted portions of said line of railroad."

The company, to be composed of the bondholders aforesaid, did not perform the acts required; but the Western Railroad Company of Minnesota, a corporation duly qualified, has completed and equipped the said line of road between Watab and Brainerd aforesaid.

The tenth section of the act of the State legislature provides that "The Saint Paul and Pacific Railroad Company, or any other company or corporation taking the benefits of this act, shall not in any manner, directly or indirectly, acquire or become seized of any right, title, interest, claim, or demand in or to any piece or parcel of land lying or being within the granted or indemnity limits of said branch lines of road to which legal and full title has not been perfected in said Saint Paul and Pacific Railroad Company, or their successors or assigns upon which any person or persons have in good faith settled and made or acquired valuable improvements thereon on or before the passage of this act, or upon any of said lands upon which has been filed any valid pre-emption or homestead filing or entry not to exceed 160 acres to any one actual settler; and the governor of this State shall deed and relinquish to the United States all pieces or parcels of said lands so settled upon by any and all actual settlers, as aforesaid, to the end that all such actual settlers may acquire title to the lands upon which they actually reside from the United States as homesteads or otherwise; and upon the acceptance of the provisions of this act by said company it shall be

deemed by the governor of this State as a relinquishment by said company of all such lands so occupied by such actual settlers; and in deeding to the United States such lands the governor shall receive, as *prima facie* evidence of actual settlement on said lands, the testimony and evidence, or copies thereof heretofore, or which may, be hereafter, taken in cases before the local United States land offices, and decided in favor of such settlers."

Under and by authority contained in that act the governor has deeded and relinquished unto the United States certain lands for the use and benefit of the settlers named in the deed. Accompanying the deed is a certificate by the governor, bearing even date therewith, that the relinquishment executed by him in behalf of the State of Minnesota to the United States "embraces a description of all lands within the limits of the grant pertaining to the line of railroad constructed by the 'Western Railroad Company of Minnesota,' upon which any person or persons have in good faith settled and made or acquired valuable improvements, or upon which there had been filed any valid pre emption homestead filing or entry prior to March 1, 1877," &c.

A deed of relinquishment by the Western Railroad Company of Minnesota to the United States of the same lands, and in favor of the same settlers described and named in the deed from the State, dated December 6, 1878, accompanies the papers.

The resolution of the board of directors authorizing the president of the company to execute the relinquishment, and under which authority it was executed, contains, however, the following reservation: "That in the event that any of such settlers shall fail, or, for any cause, be unable to acquire title to said lands from the United States upon settlement and improvements made prior to March 1, 1877, that the president make application to the Interior Department to have such lands again certified to the State for the benefit of this corporation."

The deeds from the State and the company have been carefully compared, and are found to agree in the description of the lands released, but in the names of the settlers in whose favor the relinquishments are made some few discrepancies are found, and note thereof have been made, in pencil, upon the deed from the company. An examination of the tract-books of this office shows that none of the lands have been clouded by erroneous conveyances.

In many instances the proofs of settlement, as presented under the act of June 22, 1874, are before me, and show satisfactorily the good faith of the claimants, but only in cases where entries were permitted have proofs of the qualifications of the claimants been filed; and I am, therefore, unable to state whether or not all of the persons named in the relinquishments can acquire title to the lands released.

In many instances entries have been made; in other, applications to enter only been received, while many of the parties named have never, so far as I can find, presented any proofs or claims. Several entries admitted under the act of June 22, 1874, have been canceled in accordance with decisions by the Department denying the rights of the claimants. In a few instances I find that the party in whose favor a tract is released has no claim of record, while declaratory statements were filed under the act of 1874 by persons not included in the list. In one case—viz, that of Rasmus Hanson—the party has a homestead entry of record for 160 acres, while the deed releases but one-half that quantity in his favor. No reason therefor is given, and I cannot understand why the whole tract embraced in his entry was not included in the relinquishment.

I find some few claims before this office which are not included in the deeds, but as the governor certifies that the relinquishment embraces all tracts upon which any person had in good faith settled, it is presumed that the persons referred to have abandoned the lands and do not assert claims thereto.

And I desire to state that no complaints have, thus far, reached me from any source to the effect that any claims have been overlooked or omitted. As stated, it is not known whether all of the persons named in the deeds are qualified to enter, and without specific proof in each case that point cannot, of course, be determined. But, after a careful consideration of the whole subject, I can see no reason why the relinquishments should not be accepted. If it should appear, in carrying out the details of executing the intention and wish of the State that any of the persons named in the deeds are not properly qualified, through any cause, to acquire titles to the lands relinquished in their favor, no wrong could be done either the State or the company, for the remedy was intended for those only who had settled upon the lands prior to the 1st of March, 1877, and does not extend to persons who may hereafter seek to enter any of the tracts relinquished.

In the certificate of the governor hereinbefore referred to is the following, in addition to the language quoted:

"And I do further certify and return that the following described pieces and parcels of lands lying within the said granted or indemnity limits of the line of railroad above mentioned are not included in the accompanying deed of relinquishment, for the reason that the same had been patented by the United States to the persons whose

names are set opposite the descriptions, respectively, prior to the passage of said act of March 1, 1877."

Then follows a description of the lands so patented with the names of the patentees.

In his letter the governor gives very fully the reasons why those tracts were not embraced in the deeds.

Accompanying the papers referred by you, I find a protest and argument by William Lochren, esq., of Minneapolis, attorney for some of the claimants under the patented entries, against the action of the governor in omitting from the relinquishment the tracts embraced in their claims; but as the facts are clearly stated and the question is entirely a legal one I deem it unnecessary to submit any remarks thereon, but leave it for your consideration.

The papers received with the governor's letter are herewith returned.

Very respectfully, your obedient servant,

J. A. WILLIAMSON,
Commissioner.

Hon. C. SCHURZ,
Secretary of the Interior.

C_2.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., November 7, 1879.

SIR: I have the honor to acknowledge receipt, by reference from the Department on the 4th instant, of an application by W. P. Clough, esq., attorney for the State of Minnesota, for the patenting to said State of "lands granted by the United States to aid in the construction of that certain line of railroad therein situated, which extends from Watab northwardly to Brainerd."

The application sets forth the legislation by Congress and the State in the premises, and concludes by presenting as the claim of the grantee the following:

1. That patents should issue for every alternate section of land not sold, reserved, or otherwise appropriated, lying within a strip of territory bounded on either side by a line running parallel with the line of the road, and six miles distant therefrom; and

2. That patents should also issue for enough lands in alternate sections, not otherwise appropriated, to be selected from two other strips of territory lying on either side of the line of road, each bounded laterally by lines running parallel with the line of road, and respectively 6 and 20 miles distant therefrom.

It was referred for report upon the matters therein stated, and the reasons, if any exist, why the request, as therein made, should not be granted.

I have the honor to submit the following in reply:

By an act of Congress approved March 3, 1857 (11 Stat., 195), there was granted to the then Territory of Minnesota, to aid in the construction of certain railroads, among which was a road "from Stillwater, by way of Saint Paul and Saint Anthony, to a point between the foot of Big Stone Lake and the mouth of Sioux Wood River, with a branch via Saint Cloud and Crow Wing to the navigable waters of the Red River of the North, * * * every alternate section of land, designated by odd numbers, for six sections in width on each side of said road and branches." It provided that "in case it shall appear that the United States have, when the lines or routes of said roads and branches are definitely fixed, sold any sections or any parts thereof, granted as aforesaid, or that the right of pre-emption has attached to the same, then it shall be lawful for any agent or agents, to be appointed by the governor of said Territory or future State, to select, subject to the approval of the Secretary of the Interior, from the lands of the United States nearest to the tiers of sections above specified, so much land, in alternate sections or parts of sections, as shall be equal to such lands as the United States have sold, or otherwise appropriated, or to which the rights of pre-emption have attached, as aforesaid: * * * *Provided*, That the land to be so located shall in no case be further than 15 miles from the lines of said roads or branches, and selected for and on account of each of said roads or branches." Any and all lands theretofore reserved to the United States for the purpose of aiding in any object of internal improvement, or for any other purpose whatever, were reserved from the operation of the said grant.

Section 4 declared "that the lands hereby granted to said Territory or future State shall be disposed of by said Territory or future State only in the manner following: That is to say, that a quantity of land not exceeding 120 sections for each of said roads and branches, and included within a continuous length of 20 miles of each of said roads and branches may be sold; and when the governor of said Territory or future State shall certify to the Secretary of the Interior that any 20 continuous miles of any of said roads or branches is completed, then another quantity of land hereby granted, not to exceed 120 sections for each of said roads and branches having 20 continuous miles completed as aforesaid, and included within a continuous length

of 20 miles of each of such roads or branches, may be sold; and so from time to time until said roads and branches are completed; and if any of said roads or branches is not completed within ten years no further sale shall be made and the lands unsold shall revert to the United States."

By an act of the legislature approved May 19, of the same year, the grant of March 3 was accepted on the terms, conditions, and restrictions therein contained; and an act passed May 22, granted to the Minnesota and Pacific Railroad Company, to aid in the construction of several lines and branches of roads, including the branch from Saint Cloud to Crow Wing and the navigable waters of the Red River of the North, all the interest, present and prospective, of the Territory and future State of Minnesota, on said lines and branches to any and all lands granted to the Territory by said act of March 3, together with all the rights, privileges, and immunities conferred or intended, by said act. A map of the definite location of the branch from Saint Anthony to Crow Wing was filed in this office December 5, 1857.

In 1862 (March 10) the legislature of the State, on account of the failure of the said Minnesota and Pacific Railroad Company to build and complete the road in accordance with the terms of the grant of May 22, 1857, aforesaid, created the Saint Paul and Pacific Railroad Company and granted to it all the rights, benefits, and privileges property, and franchises of the first-named company, including the lands.

By joint resolution, approved July 12, 1862 (12 Stat., 624), Congress provided that in lieu of the branch via Saint Cloud and Crow Wing to the navigable waters of the Red River, there might be constructed a new branch line having its southwestern terminus at any point on the existing line between the Falls of Saint Anthony and Crow Wing, and extending in a northeasterly direction to the waters of Lake Superior; and in its aid there were granted "the alternate sections within 6 mile limits of such new branch line of route, * * * with a right of indemnity between the 15 mile limits thereof."

By an act approved March 3, 1865 (13 Stats., 526), Congress extended the time for the completion of certain railroads, among which was the one under consideration, and declared "that the quantity of lands granted to the State of Minnesota to aid in the construction of certain railroads in said State, as indicated in the first section of an act entitled 'An act making a grant of land to the Territory of Minnesota, in alternate sections, to aid in the construction of certain railroads, in said Territory,' * * * approved March 3, 1857, shall be increased to ten sections per mile for each of said railroads and branches, subject to any and all limitations contained in said act and subsequent acts, and as hereinafter provided."

Section 2 provided that the first proviso in the first section of the act aforesaid should be so amended as to read as follows, to wit: "*Provided*, That the land to be so located shall in no case be further than 20 miles from the lines of said roads and branches, to aid in the construction of which said grant is made."

By section 3, similar exception to that contained in the grant of 1857, was made of lands reserved to the United States, for purposes of internal improvement; but it was provided "that any lands which may have been granted to the Territory or State of Minnesota for the purpose of aiding in the construction of any railroad, which lands may be located within the limits of this extension of said grant or grants, shall be deducted from the full quantity of lands hereby granted," &c.

The sixth section of the act provided for the disposal of the lands; the certification by the governor to the Secretary of the Interior upon the completion of any section of 10 consecutive miles, and the patenting of lands granted, not exceeding ten sections per mile.

By an act of March 3, 1871 (16 Stats., 588), Congress provided that upon certain conditions the Saint Paul and Pacific Railroad Company "may so alter and amend its branch lines that instead of constructing a road from Crow Wing to Saint Vincent, and from Saint Cloud to the waters of Lake Superior, it may locate and construct in lieu thereof a line from Crow Wing to Brainerd, to intersect with the Northern Pacific, * * * with the same proportional grant of lands, to be taken in the same manner, along said altered line as is provided for the present lines by existing laws."

By act of March 3, 1873 (17 Stats., 631), the time for the completion of the road from Saint Anthony to Brainerd was extended to December 3, 1873.

By act of June 22, 1874 (18 Stats., 203), the time for the completion of said branch (among others) was extended, upon certain conditions, until March 3, 1876. The company did not accept the condition of that act, and upon that ground it has since been declared by the Department inoperative.

Further legislation by Congress has not been taken; but the State, by an act approved March 1, 1877, resumed the grant theretofore held by the said Saint Paul and Pacific Railroad Company appertaining to the uncompleted portion between Watab and Brainerd, and conferred it upon a company to be organized in manner provided. In the event of a failure by said company to do and perform certain things within a specified time, then any company or corporation then organized, or to be thereafter

organized, upon the performance of certain requirements was to succeed [to] the rights intended to be conferred by the act, &c.

Under this legislation the Western Railroad Company of Minnesota, a corporation duly qualified, succeeded to those rights, and completed and equipped the said line of road between Watab and Brainerd aforesaid, as appears from satisfactory evidence presented to this Department.

In a letter to this office, of 18th February last, you stated that every objection known to the Department to the approval of the lands due to the company was removed, and directed the preparation of lists of lands inuring to the grant to be submitted for your approval.

Accordingly, on the 8th of April last a list containing 121,502.31 acres of lands, found to be vacant, and lying within 10 miles of the road, was submitted. It received your approval April 11, and on April 21 patent was regularly executed. A request was then made by the company for patent on the lands embraced in the indemnity selection, covering 153,089.34 acres, but it became necessary under the rule announced by the Supreme Court in Leavenworth, Lawrence and Galveston *vs.* United States (2 Otto, 733), and adopted by the Department December 26, 1877, in the case of the Wisconsin Central grant, and followed in several others, to know the quantity of lands the State was entitled to receive before complying with the request. To this end a careful examination of the records was made, and it was thereby disclosed that the disposals contemplated by the said rule were very limited, scarcely exceeding 2,000 acres, along this road. This fact (and that in consequence thereof patent as desired could not issue) was verbally communicated to the company; and further action by this office in the premises has not been taken.

The State, through her agent, Mr. Clough, has, as before stated, presented an application to have patents issued, and in an elaborate and exhaustive argument seeks to show that the rule aforesaid and upon which the examination of the records was made, does not in any manner affect this grant.

The principle referred to, and which was adopted by the Department as aforesaid, is that in railroad grants not of specific quantity indemnity was not given for land within the granted limits disposed of prior thereto, but only for such lands as might have been disposed of subsequent to the date of the granting act and prior to the time when the grant vested by definite location.

The reason of the rule, as I understand it, is that Congress could only grant what it possessed, and not owning lands theretofore disposed of, it did not intend to give equivalent therefor by the employment of words authorizing indemnity for any of the lands "hereby granted" which might have been sold, pre-empted, or otherwise disposed of.

An examination of the original grant of 1857 shows clearly that so far as the language there used is concerned the decision cited would apply with like force as to that of the grant to the Leavenworth, Lawrence and Galveston Railroad by act of March 3, 1863; but as respects the act of 1865 it is, in my opinion, different. That act in very plain language declares that the grant made by the act of 1857 shall be increased to *ten sections* per mile; and to the end that that quantity may be secured enlarged the territory within which the selections can be made to lateral limits of 20 miles, and in so doing Congress undoubtedly, from its language, recognized the former grant as having been one of quantity, and the change was not made by substituting in the latter grant words of larger import for those used in the former but by express declaration. It is true that the enlarged quantity was granted "subject to any and all limitations contained in said act and subsequent acts," but those words do not affect the extent of the grant so much as the conditions thereof. So far as I am able to see no words of limitation save those contained in the third section of the act of 1865 are used.

If my construction be correct, the question then arises is the State entitled to *ten* full sections per mile for each mile of constructed road? The road as built by the said Western Railroad Company is from Watab to Brainerd, yet the company has never located the line north of Crow Wing, some 8 miles distant from Brainerd, at least no map of such location has ever been filed. Notwithstanding, therefore, the construction of the road between Crow Wing and Brainerd, I do not think it can be considered as entitled to the lands within the grant "in place" or "indemnity" for such as may have been disposed of. Nor do I believe the company entitled to indemnity for lands relinquished on the 6th of December last in favor of certain settlers under the tenth section of the act of the State legislature of March 1, 1877, aforesaid, nor for lands reserved from the grant by the third section of the act of 1865.

The application of Mr. Clough is herewith returned.

Very respectfully, your obedient servant,

J. M. ARMSTRONG,
Acting Commissioner.

Hon. C. SCHURZ,
Secretary of the Interior.

D.

DEPARTMENT OF THE INTERIOR,
Washington, October 16, 1880.

SIR: Referring to your report of November 7, 1879, in the matter of the right of the State of Minnesota to receive from the United States, under the acts of March 3, 1857 (11 Stat., 195), and March 3, 1865 (13 Stat., 526), embracing, among others, what is known as the Western Railroad, the full quantity of ten sections per mile of public lands along the line of constructed road, I have to state that the subject was, on the 4th of June last, submitted to the Hon. Attorney General for an authoritative expression of his views; and a copy of his opinion, rendered June 5, 1880, is transmitted herewith for your information and guidance, the same having been fully examined and concurred in by this Department.

The opinion holds, in effect, that the grants made by these and similar acts for railroad purposes, where the language employed is descriptive of "every alternate section for six or ten sections in width," as the case may be, are grants of lands in place as distinguished from grants of quantity, such as are made by descriptive words, "to the amount of any designated number of sections per mile," &c.

The Minnesota grants, and all others governed by the same limitations, are therefore to be treated as grants in place, conveying only such amount of lands as fall within the lines of every alternate section for the prescribed distance in width on each side of the respective lines of road.

The opinion further holds that these grants embrace all lands contained in such sections not sold, pre-empted, nor reserved at the date when said grants attach, and indemnity for such sections or parts of sections as may have been sold or pre-empted prior to such date, whether before or after the date of the granting acts. Such indemnity grant does not, however, apply to lands lost by reservation, made by competent authority, prior to the date of the respective acts. Such lands are held to have been absolutely reserved, by express provision, from the operation of the grants, and consequently cannot be considered within them nor affected by them for any purpose.

Entertaining these views of the law, the Attorney-General advises a return to the practice in vogue before the promulgation of the Supreme Court decisions in the cases of the Leavenworth, Lawrence and Galveston Railroad Company *vs.* The United States (2 Otto, 733), and United States *vs.* Burlington and Missouri River Railroad Company (8 Otto, 334), which seems to hold that indemnity can only be taken for lands lost between the dates of the granting act and of the definite location of the road.

Upon consideration and comparison of these with other decisions of the courts he arrives at the conclusion that the weight of authority is in favor of the doctrine that reservations alone are altogether excepted from the operation of the grants, while indemnity may be selected for losses on account of sales, pre-emptions, and other appropriations under the land laws, and that this doctrine is not inconsistent with the real import of the decisions in the cases cited.

The foregoing suggestions are believed to be sufficiently explicit to enable your office to adjust the indemnity rights of the various grantees, care being necessary in determining the exact status of lands alleged to be lost in place, keeping well in mind the distinction between reservations and other appropriations as defined in the opinion of the Attorney-General.

The papers accompanying the case are forwarded herewith.

Very respectfully,

C. SCHURZ, *Secretary.*

The COMMISSIONER OF THE GENERAL LAND OFFICE.

DEPARTMENT OF JUSTICE,
Washington, June 5, 1880.

SIR: The letter of the Acting Commissioner of the General Land Office, accompanying your communication of the 4th instant, submits the following facts:

By an act of Congress approved March 3, 1857 (11 Stat., 195), there was granted to the then Territory of Minnesota, to aid in the construction of certain railroads, among which was a road from "Stillwater, by way of Saint Paul and Saint Anthony, to a point between the foot of Big Stone Lake and the mouth of Sioux Wood River, with a branch via Saint Cloud and Crow Wing to the navigable waters of the Red River of the North, * * * every alternate section of land designated by odd numbers, for six sections in width on each side of said roads and branches."

It provided that "in case it shall appear that the United States have, when the lines or routes of said roads and branches are definitely fixed, sold any sections or any parts thereof, granted as aforesaid, or that the right of pre-emption has attached to the same, then it shall be lawful for any agent or agents, to be appointed by the

governor of said Territory or future State, to select, subject to the approval of the Secretary of the Interior, from the lands of the United States nearest to the tiers of sections above specified, so much land in alternate sections, or parts of sections, as shall be equal to such lands as the United States have sold, or otherwise appropriated, or to which the rights of pre-emption have attached as aforesaid. * * * Provided, that the land to be so located shall in no case be further than fifteen miles from the lines of said roads or branches, and selected for and on account of each of said roads or branches." Any and all lands theretofore reserved to the United States for the purpose of aiding in any object of internal improvement, or for any other purpose whatever, were reserved from the operation of the said grant.

Section 4 declared "that the lands hereby granted to said Territory or future State shall be disposed of by said Territory or future State only in the manner following, that is to say: That a quantity of land not exceeding one hundred and twenty sections, for each of said roads and branches, and included within a continuous length of twenty miles of each of said roads and branches, may be sold; and when the governor of said Territory or future State shall certify to the Secretary of the Interior that any twenty continuous miles of any of said roads or branches is completed, then another quantity of land hereby granted, not to exceed one hundred and twenty sections for each of said road and branches having twenty continuous miles completed as aforesaid, and included within a continuous length of twenty miles of each of such roads or branches, may be sold; and so from time to time until said roads and branches are completed; and if any of said roads or branches is not completed within ten years, no further sale shall be made and the lands unsold shall revert to the United States."

By an act of the legislature, approved May 19 of the same year, the grant of March 3 was accepted on the terms, conditions, and restrictions therein contained; and an act passed May 22 granted to the Minnesota and Pacific Railroad Company, to aid in the construction of several lines and branches of roads, including the branch from Saint Cloud to Crow Wing and the navigable waters of the Red River of the North, all the interest, present and prospective, of the Territory and future State of Minnesota, on said lines and branches to any and all lands granted to the Territory by said act of March 3, together with all the rights, privileges, and immunities conferred or intended by said act. A map of the definite location of the branch from Saint Anthony to Crow Wing was filed in the General Land Office December 5, 1857.

In 1862 (March 10) the legislature of the State, on account of the failure of the said Minnesota and Pacific Railroad Company to build and complete the road in accordance with the terms of the grant of May 22, 1857, aforesaid, created the Saint Paul and Pacific Railroad Company, and granted to it all the rights, benefits, and privileges, property, and franchises of the first-named company, including the lands.

By joint resolution approved July 12, 1862 (12 Stat., 624), Congress provided that in lieu of the branch via Saint Cloud and Crow Wing to the navigable waters of the Red River there might be constructed a new branch line having its southwestern terminus at any point on the existing line between the Falls of Saint Anthony and Crow Wing, and extending in a northeasterly direction to the waters of Lake Superior; and in its aid there were granted "the alternate sections within six mile limits of such new branch line of route * * * with a right of indemnity between the fifteen mile limits thereof."

By an act approved March 3, 1865 (13 Stat. 526), Congress extended the time for the completion of certain railroads, among which was the one under consideration, and declared: "That the quantity of lands granted to the State of Minnesota, to aid in the construction of certain railroads in said State, as indicated in the first section of an act entitled 'An act making a grant of land to the Territory of Minnesota in alternate sections, to aid in the construction of certain railroads in said Territory * * * approved March 3, eighteen hundred and fifty-seven,' shall be increased to ten sections per mile for each of said railroads and branches, subject to any and all limitations contained in said act and subsequent acts, and as hereinafter provided."

Section 2 provided that the first proviso in the first section of the act aforesaid should be so amended as to read as follows, to wit: "*Provided*, That the land to be so located shall in no case be further than twenty miles from the lines of said roads and branches, to aid in the construction of which said grant is made."

By section 3 similar exception to that contained in the grant of 1857 was made of lands reserved to the United States for purposes of internal improvement; but that it was provided "that any lands which may have been granted to the Territory or State of Minnesota for the purpose of aiding in the construction of any railroad, which lands may be located within the limits of this extension of said grant or grants, shall be deducted from the full quantity of lands hereby granted," &c.

The fourth section provided "that the sections and parts of sections of land, which by said acts and this grant shall remain to the United States, within ten miles on each side of said roads and branches, shall not be sold for less than double the minimum price of public lands when sold, nor shall any of said lands become subject to sale at

private entry until the same shall have been first offered at public sale to the highest bidder at or above the minimum price as aforesaid."

The sixth section of the act provided for the disposal of the lands, the certification by the governor to the Secretary of the Interior upon the completion of any section of ten consecutive miles, and the patenting of lands granted not exceeding ten sections per mile.

By an act of March 3, 1871 (16 Stat., 588), Congress provided that, upon certain conditions, the Saint Paul and Pacific Railroad Company "may so alter and amend its branch lines that instead of constructing a road from Crow Wing to Saint Vincent, and from Saint Cloud to the waters of Lake Superior, it may locate and construct in lieu thereof a line from Crow Wing to Brainerd, to intersect with the Northern Pacific, * * * with the same proportional grant of lands, to be taken in the same manner along said altered line as is provided for the present lines by existing laws."

By act of March 3, 1873 (17 Stat., 631), the time for the completion of the road from Saint Anthony to Brainerd was extended to December 3, 1873.

By act of June 22, 1874 (18 Stat., 203), the time for the completion of said branch (among others) was extended upon certain conditions, until March 3, 1876. The company did not accept the conditions of that act, and upon that ground it has since been declared by the Interior Department inoperative.

Further legislative action by Congress has not been taken, but the State, by an act approved March 1, 1877, resumed the grant theretofore held by the said Saint Paul and Pacific Railroad Company, appertaining to the uncompleted portion between Watab and Brainerd, and conferred it upon a company to be organized in manner provided. In the event of a failure by said company to do and perform certain things within a specified time, then any company or corporation then organized, or to be thereafter organized, upon the performance of certain requirements was to succeed to the rights intended to be conferred by the act, &c.

Under this legislation the Western Railroad Company of Minnesota, a corporation duly qualified, succeeded to those rights, and completed and equipped the said line of road between Watab and Brainerd aforesaid, as appears from satisfactory evidence presented to your Department.

All objections known to the Interior Department to the approval of the lands due to the company having been removed, on February 18, 1879, you directed the General Land Office to prepare lists of lands inuring to the grant and submit them for your approval. Accordingly, on April 8 of that year, a list containing 121,502.31 acres of land, found to be vacant, and lying within ten miles of the road, was submitted to you and received your approval on the 11th of the same month, and on the 21st patent was regularly executed.

A request is now made by the company for patent of the lands embraced in the indemnity selection, covering 153,089.34 acres; and in order to properly decide upon this request, you submit to me two inquiries:

1. Is the grant of March 3, 1857, as altered or amended by the act of March 3, 1865, to be treated as a grant of quantity in the sense that the railroad is to be entitled to receive ten sections of land for each and every mile of road constructed by it?

2. Whether this be so or not, is the railroad company entitled to indemnity for the sections of land which may have been sold by the United States, or pre-empted, previous to the original grant of March 3, 1857?

1. The grant of March 3, 1857, was a grant of "every alternate section of land, designated by odd numbers, for six sections in width on each side of each of said roads and branches." This grant was therefore a grant of lands in place. It was a grant of *particular parcels* (sections) of land lying within prescribed lateral limits to the road, each of which was definitely marked out and numbered by the public surveys, and to each of which the grant attached by distinct terms of description. The indemnity which was provided for by the grant of lands in lieu of such of the lands thereby granted as might be found, upon the definite location of the road, to have been pre-empted or sold, was equally precise, as such lieu lands were to be selected "from the lands of the United States nearest to the tiers of sections above specified, so much land, in alternate sections or parts of sections, as shall be equal to such lands as the United States have sold, or otherwise appropriated, or to which the rights of pre-emption have attached, as aforesaid." Such indemnity lands so located were to be in no case farther than fifteen miles from the lines of said roads or branches.

The fourth section of the act provided for a disposition by the Territory or future State of the lands granted, and contemplated that the road itself was to be built in divisions of a continuous length of twenty miles each, the Territory or future State being entitled to sell a quantity of land not exceeding 120 sections for each division of twenty miles.

Upon consideration of this act, I am of opinion that no grant was intended which should be considered one of quantity as distinguished from a grant of lands in place. The location of the lands granted, and of the indemnity lands, is definitely stated.

Both the granted lands and the indemnity lands together are in point of quantity not to exceed 120 sections for every twenty miles of road. The quantity might obviously be less than 120 sections; as under the grant (which is limited to the odd numbered sections lying within the width of six sections on each side of the road, and does not call for an amount of land equal to the one-half of six sections in width on each side of the road) a claim to six sections for every linear mile of the road and its branches, including all sinuosities and deflections from a straight line, would not be tenable; and this according to what is deemed by me to be well-settled law. (5 Opin., 518.)

If this was not a grant of quantity, but a grant of lands in place, did it become a grant of quantity by the operation of the statute of 1865?

The word "quantity" is undoubtedly used as a convenient mode of designating the possible amount of lands granted, and the first section of the act of 1865 increased the quantity of lands granted to the State of Minnesota, by the act of 1857, "to ten sections per mile for each of said railroads and branches, subject to any and all limitations contained in said act and subsequent acts, and as hereinafter provided." The effect of this is to amend the act of 1857 by substituting for the word "six" the word "ten," and, if the rest of the act be taken into consideration, it will be satisfactorily seen that this is the full scope of the first section. An attempt is made to give to the word "limitations" in the clause above quoted the narrow and peculiar sense which it bears in the real estate law; but this seems to me to be unwarranted. The meaning to be attributed to this clause is not different from that which it would have if it read "subject to all the terms and conditions in the act of March 3, 1857."

The second section of the act of 1865, provides that the location of the land "shall in no case be further than twenty miles from the lines of said roads and branches, to aid in the construction of each of which said grant is made." The granted limits having been extended from six to ten, the indemnity limits are thus extended from fifteen to twenty.

The fourth section of the same act renews the provision in the original act, that the lands which "shall remain to the United States, within ten miles on each side of said roads and branches, shall not be sold for less than double the minimum price of public lands when sold," contemplating that the United States is under this act, as under the act of 1857, to own the even sections.

The sixth section provides for the construction of the road in divisions of ten miles in length each, and the lands granted and selected, not exceeding ten sections per mile, are to be selected opposite to and within a limit of twenty miles of the line of the completed division, extending along the whole length thereof. The use of the phrase "not exceeding ten sections per mile" indicates that, owing to the sinuosities of the road, less than ten sections per mile may actually become due to the State for the construction of a mile of road. By this section it is also contemplated that it may be that the indemnity lands within particular divisions of ten miles, may not be sufficient to compensate the loss in the granted lands appertaining to such divisions, and provision is made for such deficiency by a clause which may, perhaps, better be considered in connection with the second branch of your inquiry.

This case is readily distinguishable from the case of the United States *vs.* The Burlington and Missouri River Railroad Company, in Nebraska, where the grant was held to be one of quantity as distinguished from a grant of land in place. From the language used in that case, the grant was distinctly a grant to the amount of ten alternate sections; there were no lateral limits to the grant, and there was no indemnity provision. It was thus well held to be a grant of an amount of land by way of compensation for the public service of constructing the railroad.

In the view of the applicant it would seem that this grant is at first a grant of lands in place, and that afterwards it becomes a grant of lands by the quantity. It can hardly bear this double character. Were this so, the indemnity would be used, not to compensate the applicant for that which it had lost alone, but, further, to give it the benefit of an additional grant.

In direct answer to your first inquiry, I am, then, of opinion that the grant is to be treated as a grant of lands in place, as distinguished from a grant of an amount or quantity of land.

2. The second inquiry proposed, in view of the remarks that have been made in opinions of the learned judges of the Supreme Court, undoubtedly presents a question of considerable difficulty.

It is understood that up to the time of the decision of the case of the Leavenworth, Lawrence and Galveston Railroad Company *vs.* The United States (2 Otto, 733), the rule of the Department had been to indemnify the railroad, not only for lands which had been sold or pre-empted after the date of the passage of the granting act, but previous thereto, and that in consequence of the remarks made in that case the rule has been changed.

The case referred to involved the title to the Osage Indian lands in the State of Kansas; the question being whether said lands were reserved to the United States under the provisions of the Indian treaty, and also under the last proviso of the first

section of the act of March 3, 1863, or were granted to the State of Kansas, under the act of 1863, to aid in the construction of railroads. It was held that those lands never passed by the grant to the State of Kansas or the railroad companies; that they were reserved and excepted out of it, and, therefore, that the patents which had issued therefor had improvidently issued. To that extent the decision is undoubted authority, and it must be held, therefore, that all lands reserved to the United States by an act of Congress, or in any other manner by competent authority, for the purpose of aiding in any object of internal improvement, or for any other purpose whatever, under the last proviso of the first section of the act of March 3, 1857, do not pass to the railroad companies, nor are said companies entitled to indemnity therefor. In commenting, *arguendo*, upon the indemnity clause, Mr. Justice Davis remarks: "The words employed show clearly that its only purpose is to give sections beyond that limit" (the original ten mile limit), "for those lost within it by the action of the Government, between the date of the grant and the location of the road." But it is to be observed that he does not rest his decision upon this point, but upon the fact heretofore adverted to, that the lands in question (whose ownership he was then discussing) were excepted from the grant made. His remark, therefore, is a dictum entitled only to the weight which is given to the dicta of eminent judges.

In the case of the United States *vs.* The Burlington and Missouri River Railroad (8 Otto, 334), the main question under discussion was whether the grant was or was not a grant of a specific amount of quantity of land. It was held to be one of quantity, and the selection of the land was subject, in the opinion of Mr. Justice Field, to certain limitations, the fourth of which was that it must not have been sold, reserved, or otherwise disposed of by the United States, and a pre-emption or homestead claim must not have attached to it at the time the line of the road was definitely located. In this case, however, there was no question of indemnity. Upon this part of the case, the grant being held to be one of quantity, the only inquiry was where the lands were to be selected which were to make up the quantity to which the road was entitled. The mere fact that in considering this question Mr. Justice Field, speaking of many other grants, incidentally remarks that they are intended to provide "for the selection of land elsewhere, to make up any deficiency arising from the disposition of a portion of it within such limit, between the date of the act and the location of the road," cannot be considered as a distinct expression of opinion by that learned judge that in a case like this only deficiencies were to be compensated when land had been disposed of by sale or pre-emption after the date of the act.

On the other hand, Mr. Justice Harlan, in an opinion (concurred in by the circuit and district judges) in the case of the Madison and Portage Railroad Company *vs.* The Treasurer of the State of Wisconsin, &c. (circuit court of the United States for the western district of Wisconsin), in commenting upon the mode in which deficiencies of lands *in place* were to be made up from indemnity limit, says:

"In supplying deficiencies, it must be by sections, whether full or fractional, and by legal subdivisions. Deficiencies *in place*, limits caused by sales or pre-emption previous to the location of routes, whether before or after the passage of the acts, may be supplied from the indemnity limits."

In view of these conflicting expressions, it would seem to me that the safer course for the Department would be to return to its original construction; and, while it holds that all lands reserved to the United States by any act of Congress, or in other manner by competent authority, do not pass to the railroad company, and that there can be no indemnity therefor, also to hold that, when lands have been sold or pre-empted along the line of the road within its granted limits, there should be indemnity for the lands thus lost, even if such sale or pre-emption took place previous to the date of the grant. This construction is in no wise in conflict with the decision made in the case of the Leavenworth, Lawrence and Galveston Railroad. It gives the company no title to indemnity for lands reserved from and excepted out of the grant, but does entitle it to indemnity when within the granted limits there are found lands which have been sold by the United States, or pre-empted, whether such sale or pre-emption took place prior or subsequently to the passage of the act of 1857, and prior or subsequently to the definite location of the road. But this indemnity can be carried no further than to compensate the railroad for the lands which it has thus lost. It cannot be extended so far as to indemnify the road for lands which were never included within its grant. Where, therefore (act of March 6, 1865, sec. 6), a division of ten consecutive miles of road has been completed, the railroad is entitled to lands, not exceeding ten sections a mile, situated opposite to and within the limits of 20 miles of the line of said road, and within the lateral limits of the division. If such lands are not found within the granted limits of ten miles on each side of the road, then they may be obtained by the road within the corresponding indemnity limits. Until the road is finally completed, this is to be the arrangement as division after division is finished. As it may happen, however, that on certain divisions there may be neither within the granted limits, nor within the indemnity limits, sufficient public lands to satisfy the grant for such divisions, while on other divisions there may have been no

deficiency, or there may have been more than enough within the indemnity limits to satisfy the deficiency, provision is made by which, at the completion of the railroad, the Secretary of the Interior "shall issue to the said State patents to all the remaining lands granted for and on account of said completed road and branches in this act, situate within the said limits of 20 miles from the line thereof throughout the entire length of said road and branches." This language must be construed as intending that when the road is fully completed, as required by law, the company so completing is entitled to lands in any or all divisions of its entire length to make up the losses sustained in any one division. But the scheme of the act distinctly shows that these selections are confined to such alternate odd-numbered sections as remain undisposed of in the respective divisions. It was only these sections which were included within either the granted or the indemnity limits. And the indemnity is not made in order that the road shall have necessarily a hundred sections of land for each ten miles in length of its road, but only so far as it is required to make the grant good. If there were, therefore, reservations within the granted limits to the United States, or if the road was not entitled to one hundred sections of land for any ten miles constructed by it in consequence of the curvature or sinuosities of the road in that division, there can be no indemnity for a deficiency thus arising. The indemnity is limited strictly by the sections lost *in place*, which were granted by the United States, but were previously or subsequently sold or pre-empted.

In direct answer to your second inquiry, I am, therefore, of opinion that the road is entitled to indemnity, provided the lands can be found within the proper limits, for the lands which it may have lost by reason of the fact that lands within the granted limits were sold or pre-empted previously or subsequently to the date of the grant.

In view of the interest manifested in the questions submitted by you, on account of their relation to other railroads as well as the one immediately concerned, I have felt it my duty fully to hear arguments of all other parties who have deemed that rights might be affected by any opinion which should be given in the present case.

Very respectfully, your obedient servant,

CHAS. DEVENS,
Attorney-General.

Hon. CARL SCHURZ,
Secretary of the Interior.

E.

OPINION OF SECRETARY OF THE INTERIOR AND ATTORNEY-GENERAL IN CASE OF SOUTHERN MINNESOTA RAILWAY EXTENSION COMPANY'S CLAIM FOR LANDS.

DEPARTMENT OF THE INTERIOR,
Washington, December 5, 1879.

SIR: I transmit herewith a copy of the opinion of the Attorney-General, dated the 29th ultimo, in reply to certain inquiries submitted by me February 19 last, in connection with the application of the governor of Minnesota to have certain lands certified for the benefit of the Southern Minnesota Railway Extension Company.

It will be observed that the Attorney-General is of the opinion that the lands opposite the four sections of 10 miles each constructed since February 25, 1877, the date when the grant became subject to forfeiture, should be certified to the State, in view of the fact that no act, legislative or judicial, has been taken to revest the title of the United States.

I concur in this opinion, and your office will be governed accordingly in the adjustment of the grant. The papers and maps submitted to the Attorney-General are herewith returned to your office.

Very respectfully,

C. SCHURZ,
Secretary.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

DEPARTMENT OF JUSTICE,
Washington, November 29, 1879.

SIR: Your letter of February 19, 1879, informs me that by an act of Congress approved July 4, 1866 (14 Statutes, 87), there was granted to the State of Minnesota certain lands to aid in the construction of a line of railroad from Houston, through the counties of Fillmore, Mower, Freeborn, and Faribault, to the western boundary of the State. This grant was accepted by the legislature of the State of Minnesota February 25, 1867, and the lands in question granted to the Southern Minnesota Railroad Company.

Maps of the definite location of this road were approved by the board of directors

of the company, and filed in the General Land Office, as follows: From a point in township 104, range 8 west, to a point in township 103, range 18 west, adopted by resolution of the board of directors of the company January 1, 1867, received at the General Land Office February 11, 1867; from a point in township 103, range 18 west, to a point in township 104, range 37 west, adopted by resolution of the board of directors November 29, 1866, and received at the General Land Office December 10, 1866; from a point in township 104, range 37 west, to a point in township 104, range 39 west, adopted by resolution of the board of directors October 24, 1866, received at the General Land Office December 10, 1866; from a point in township 104, range 39 west, to the western boundary of the State. Survey ordered by resolution of the board of directors December 2, 1869, and the map received at the General Land Office May 4, 1871.

The company constructed the road from Houston to Winnebago City, in township 104, range 28 west, prior to February 25, 1877, at which date, in the event of a failure to complete the road, it was provided that the lands granted and not patented should revert to the United States. (See the proviso to the fourth section of the act of July 4, 1866, above mentioned.)

By an act of the legislature of the State of Minnesota, approved March 6, 1878, all the lands, rights, powers, and privileges granted to and conferred upon the State of Minnesota by the act of Congress approved July 4, 1866, appertaining to the uncompleted line of road of the Southern Minnesota Railroad Company (viz, the line from Winnebago City to the western boundary of the State), were granted, transferred, and vested in the Southern Minnesota Railway Extension Company, under certain conditions, among others that the road should be constructed to the village of Jackson, in Jackson County, before the end of the year 1879, and to the west line of the State before the end of the year 1880.

The Department of the Interior is in receipt of a map and accompanying evidence, establishing the fact that the Southern Minnesota Railway Extension Company, between April 16, 1878, and December 2, 1878, constructed a line of railroad from Winnebago City (the western terminus of the road constructed prior to February 25, 1877), to a point in township 102, range 35 west, in Jackson County, a distance of forty-three continuous miles of road. From Jackson to the western boundary of the State is a distance of nearly one hundred miles; and under the act of the Minnesota legislature, approved March 6, 1878, the road must be completed to the west line of the State before the end of the year 1880. It appears by your letter that the governor of Minnesota has filed with the Department a request for a patent to the State of the lands granted opposite the four sections of constructed road, of ten consecutive miles each, between Winnebago City and the village of Jackson, in Jackson County, as provided in the fourth section of the granting act.

You state that you have hesitated to comply with this request, as the time provided in the granting act for the completion of the road expired February 25, 1877, ten years from the date of the acceptance of the grant by the State of Minnesota.

The line of road constructed in the year 1878 by the Southern Minnesota Railway Extension Company deviates from the line of definite location of the road adopted by the board of directors of the Southern Minnesota Railroad Company November 29, 1866. At Jackson, the western terminus of the road, the variation is ten miles. East of that point, and between the same and Winnebago City, the variation is from one to six or eight miles from the line as located in 1866.

It will be observed that the granting act only designated through what counties the road shall pass east of and including Faribault County.

In view of these facts you submit to me the following questions:

"1. Is this Department authorized, under the law, to issue patents to the State of Minnesota for the lands opposite that portion of the road constructed in sections of ten consecutive miles each since February 25, 1877, the date at which, according to the fourth section of the act of July 4, 1866, it was provided, in the event that the road was not completed, that the lands not patented should revert to the United States?

"2. Should the Department accept proof of the construction of the road on a line different from the one originally adopted and approved, if constructed within the limits of the grant as first located?

1. *As to the effect of the proviso to the fourth section of the act of July* 4, 1866:

While the part of the road to which your inquiries relate was not completed within the time limited by law, no attempt has been made to enforce any forfeiture of the lands granted to the State of Minnesota, or by any means, legislative or other, to revest the title in the United States. The question whether the State of Minnesota may still claim, under the act of Congress, lands which have been earned by the construction of the road since the expiration of the period is determined by the case of Schulenberg *v.* Harriman (21 Wall., 44). This was the case of a grant of lands to the State of Wisconsin, to aid in the construction of a certain railroad within that State, by an act of June 3, 1856. The language there used in reference to the condition upon which the grant might be defeated by non-completion of the road within ten years was as

follows: "No further sales shall be made, and the lands unsold shall revert to the United States." The road had not been completed within the time required for its construction, which had not been extended, and Congress had passed no act, nor taken any judicial proceeding to enforce any forfeiture of the grant for failure to construct the road within the period prescribed. Upon this state of facts it was held that a present interest was passed by the grant to the State of Wisconsin; that the proviso was in the nature of a condition subsequent; that the prohibition against further sales if the road were not completed added nothing to the force of the proviso, because a cessation of sales was necessarily implied in the condition that the lands should revert, but that if the condition were not enforced the power to sell continued as before its breach, limited only by the objects of the grant and the manner of sale prescribed by the act; and that, as no action had been taken either by legislation or judicial proceedings, to enforce a forfeiture or revest the title in the United States, that title remained in the State as completely as it existed on the day that the title by location of the line of the railroad acquired precision and became attached to the adjoining alternate sections. In direct answer to your inquiry upon this point, I therefore reply that the Department is authorized by law to issue patents to the State of Minnesota opposite that portion of the road constructed in sections of ten consecutive miles February 25, 1877, the date at which, according to the fourth section of the act of July 4, 1866, it was provided, in the event that the road was not completed, that the lands not patented should revert to the United States, and this for the reason above stated, that no act, legislative or judicial, has been taken to revest the title of the United States.

Supplementary to this inquiry, I perhaps should add that, on examination of the relations between the Southern Minnesota Railway Extension Company and the Southern Minnesota Railroad Company, it appears that the title granted to the old company was forfeited to the State of Minnesota by reason of the fact that the conditions annexed to it were not performed; and that this forfeiture was impliedly asserted in the act making a grant to another company. (Farnsworth *vs.* Minnesota and Pacific Railroad Company, 2 Otto, 50.)

2. *As to the effect of change of line:*

So far as the lands now in question are concerned, it is not important whether the road was completed on the location of 1866 or whether it is completed on the present constructed line, since, under the terms of the grant, precisely the same lands will be found in place within the ten-mile limit in either case. They are alike within ten miles of the location of 1866 and ten miles of the constructed road. The fact that if the constructed line had been the line of original location other lands in addition to these now sought would have been withdrawn from the market, cannot affect the question of the right to these lands which actually were withdrawn from the market.

How far a railroad is authorized, after having made and filed a map of its location, to change such location and build upon a new and different line, does not seem necessary to be considered in the present case.

The facts in the present case, as they appear from your statement and an examination of the legislative act, indicate that there was no proper location by which the road, or any other parties interested, could be bound until after the act of the State legislature of February 25, 1867. A location was made in 1866, after the act of Congress had been passed granting the lands to the State of Minnesota, but before the legislature had accepted the trust connected with the land grant. That location is what is termed the old line or location of 1866. The maps of this location were transmitted by the governor to the Secretary of the Interior December 4, 1866. When, however, the legislature of the State accepted the grant—which was on February 25, 1867—the act by which they accepted it (referred to in your letter) required the line as constructed to run to Fremont and thence to Jackson.

This was a legislative modification of the line which constituted a statutory direction to its own officers, and to the company, and appears to have been fully understood at the General Land Office. The road cannot be considered to have received an official definite location until after the acceptance by the legislature, which acceptance contemplated this modification. The present constructed road appears to deviate only from the original survey to such an extent as was necessary to cause it to conform to the requirements of the legislative act. Waiving, therefore, as before indicated, any discussion of the question how far railroads which have filed locations are generally authorized in construction to deviate therefrom, I answer your inquiry by saying that the Department should accept proof of the construction of the road, although on a line different from the one originally approved, and certify the lands in question.

Very respectfully, your obedient servant,

CHAS. DEVENS,
Attorney-General.

Hon. CARL SCHURZ,
Secretary of the Interior.

F.

HASTINGS AND DAKOTA RAILROAD, DECISION OF SECRETARY OF THE INTERIOR AS TO LAND GRANT OF.

DEPARTMENT OF THE INTERIOR,
Washington, April 17, 1880.

SIR: By act of July 4, 1866 (14 Statutes, p. 87), a grant was made to the State of Minnesota in aid of a railroad from Hastings, through the counties of Dakota, Scott, Carver, and McLeod, to such point on the western boundary of the State as the legislature might determine.

This grant was accepted by the State March 7, 1867. Prior to that time, viz, on the 4th of January, 1867, the governor had approved a map of definite location, which was, at some time prior to the 4th day of April, 1867, placed on file in this Department.

Certain modifications and adjustments were made to carry the construction of the road through several towns named in the act of acceptance, and all questions relating to the location of the road as far west as Glencoe, in the county of McLeod, are considered as settled. I think the action of the State authorities and of the company grantee in allowing the line to remain unchanged from Glencoe westward and to rest in the Department files unchallenged, the lands along the route having been also withdrawn within the lateral limits of such line to satisfy the grant, must be treated as a clear recognition of the same as a line of definite location from which the grant cannot now be floated.

January 10, 1879, the governor forwarded a certified map of construction running from Glencoe to Montevideo, a distance of eighty miles, and on the 12th of January last he supplemented the same by a map from the latter point westward to Ortonville on the boundary of the State, a distance of forty-five miles; and request is now pending for certification of the granted lands in favor of the Hastings and Dakota Railroad Company, upon whom the grant has been conferred by the State. An inspection of the maps filed shows a departure in construction from the line of definite location, the variation in distance amounting at some points to six or seven miles on the portion east of Montevideo, and from a few rods to about three or four miles to the westward of that station. The road from a point in range 38 runs north of the Minnesota River, while the original line crossed at that point and followed the south bank. Notwithstanding these deviations it is claimed by the grantee that the road has been completed in substantial compliance with law, and whatever deviation is shown has been caused by material difficulties and obstructions, which rendered the old route impracticable, and fully explain and justify the modification and correction of the line.

To establish these allegations certain letters and statements of engineers of the company were filed, which, not being upon oath, were not recognized as sufficient.

I am now in receipt of corroborative affidavits from the following parties: Gates A. Johnson, who, as engineer of the company, made the original survey and located the line as filed in 1867; A. B. Rodgers, the present chief engineer, who has had charge of the location and construction of the completed road; D. C. Shepard, a civil engineer of thirty years' experience; and R. H. L. Jewett, civil engineer and surveyor, who executed in the field the United States surveys of the townships for fifty miles along the route, and who has acted, by appointment from the governor, as State inspector of construction and equipment of newly-built railroads in Minnesota.

These all speak from personal examination and knowledge of the locality and lines. From their statements it appears that the line as originally run crossed a very rough country of deep gorges and ravines, called "Coolies," which would have rendered very difficult and expensive the construction of the road; that the Minnesota bottoms are composed almost entirely of granite, rendering earthwork impossible and compelling the use of trestle-work and bridging; that a bridge across the river must have been a mile or more in length, costing from one-half million to one million dollars; that the tributary known as Hawk Creek is an immense gorge lying along and nearly parallel to the river, and that it could not be crossed successfully below the present line near its head; that to cross lower down would necessitate a steep grade to reach the summit and again descend to the river, the distance being so short as to render the attempt impracticable; that to cross the river at the point fixed would also require a bridge across the Yellow Medicine, and the bridging of numerous creeks, also requiring miles of embankments across river bottoms subject to overflow, where embankments would be liable to wash out; that these and other difficulties and expenses, recited in detail, have been avoided by the present location, which is on a direct and practicable route, and accommodates thriving and well-populated settlements, while the lands south of the river and on the Sioux Reserve are comparatively unsettled and unproductive. Without further discussion of these papers, which are transmitted with the other papers before me for your files, I conclude that the deviations in question cannot justly

be objected to or held to destroy the identity of the road, and, following the principles indicated in my communication of the 9th instant in the case of the McGregor road, I have to direct that the lands be certified in satisfaction of the grant.

Very respectfully,

C. SCHURZ, *Secretary.*

The COMMISSIONER OF THE GENERAL LAND OFFICE.

G.

RAILROADS IN WISCONSIN—WISCONSIN CENTRAL RAILROAD, AS TO LAND GRANT TO, FORMERLY PORTAGE, WINNEBAGO AND SUPERIOR RAILROADS.

[Decisions and accompanying papers, exhibits G, H, K, L^1, L^2, L^3, M, N^1, N^2.]

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., November 16, 1877.

SIR: I have the honor to submit herewith for approval list No. 8 of selections by the Wisconsin Central Railroad Company, containing 102,732.49 acres, granted in the Eau Clare, Wausau, and Bayfield districts, Wisconsin, by the act of Congress approved May 5, 1864.

In this connection I desire to state that an examination of the records of this office show that the number of acres in odd-numbered sections within the granted or ten-mile limits of said road is 1,377,383.93.

The number of acres disposed of by the Government prior to the passage of the granting act is 789,622.00, the number of acres disposed of subsequent to said date, but prior to the definite location of the line of the road, is 161,659.53. The quantity patented to the company within the granted limits aggregated 240,363.54 acres, and the quantity patented within the *indemnity* limits amounts to 203,459.62 acres.

It has been the practice of this office and Department, since the inauguration of the railroad land-grant system, to allow indemnity for all lands lost to the grant by reason of sale, reservation, &c., prior to the definite location of the road, but by the decision of the Supreme Court of the United States in the case of the Leavenworth, Lawrence and Galveston Railroad Company *vs.* United States (2 Otto), it would appear that that practice was erroneous; that indemnity could only be allowed for land sold or disposed of after the passage of the granting act.

On this subject the court says: "* * * the only purpose of that clause [indemnity] is to give lands outside of the ten-mile limits for those lost inside by the action of the Government in keeping the land offices open between the date of the granting act and the location of the road."

Applying this rule to the grant under consideration the company has received patents for 41,820.09 acres in excess of the indemnity authorized by the granting act.

The tracts embraced in the list herewith, together with those heretofore selected and patented, aggregate 343,096.03 acres, leaving yet unselected 83,006.37 acres in the granted limits.

It is proposed by Mr. W. K. Mendenhall, resident attorney for the company, that the Government issue patents for the tracts embraced in the list now submitted, and authorize the selection of the 83,006.37 acres aforesaid, but that the last amount shall be withheld from patent until arrangements can be made by which the excess indemntiy patented can be reconveyed to the United States.

I would recommend that this proposition be acceded to.

The company has selected and paid fees upon 167,072.14 acres of *indemnity lands*, which have not, as yet, been patented. It is desired that the fees thus paid may be applied to the tracts in the granted limits yet to be selected. I would recommend that this request be denied. The selections were made under a supposed correct construction of the grant, and the fees paid thereon were for services performed by the local officers. I do not believe that because the selections were erroneously made that the additional labor of examining and certifying a second list should be imposed upon the local officers.

Under the first section of the act of July 1, 1864, it is held that the registers and receivers are each entitled to receive a fee $1 for each selection of 160 acres, and I am of opinion that the company should be required to pay the prescribed fees thereby, should the selection of the tracts in the granted limits be authorized.

I inclose herewith two letters from Mr. Mendenhall upon the subject of this communication, dated October 4 and 18, 1877.

Very respectfully, your obedient servant,

J. A. WILLIAMSON,
Commissioner.

Hon. C. SCHURZ,
Secretary of the Interior.

H.

DEPARTMENT OF THE INTERIOR,
Washington, December 26, 1877.

SIR: Referring to your letter of the 16th ultimo, transmitting for approval list No. 8 of selections by the Wisconsin Central Railway Company, containing 102,732.49 acres, granted in the Eau Claire, Wausau, and Bayfield districts, Wisconsin, by the act of Congress approved May 5, 1864, I have to state that I have this day approved the same, and it is herewith returned.

In your communication you state that the records show that there are 1,377,383.93 acres within the granted or 10-mile limits of said company's road; that the number of acres disposed of by the Government prior to the granting act was 789,622 acres; and that the number of acres disposed of between the date of the granting act and the definite location of the road was 161,659.53 acres; and that the quantity patented to the company within the idemnity limits amounts to 203,459.62 acres.

The Supreme Court of the United States, in its elaborate decision in the case of the Leavenworth, Lawrence and Galveston Railroad Company *vs.* The United States, reaffirmed the doctrine formerly announced "that a tract lawfully appropriated to any purpose becomes thereafter severed from the mass of public lands, and that no subsequent law or proclamation will be construed to embrace it or to operate upon it, although no exception be made of it.

It follows that land *lawfully sold or disposed of* by the United States prior to the passage of the act granting lands to the State of Wisconsin was excepted from the operation of said grant, and, if so, no indemnity can be obtained for the land thus lost.

On this point the court, in the case before cited, says:

"The idemnity clause has been insisted upon. We have before said that the grant itself was *in præsenti*, and covered all the odd sections which should appear, on the location of the road, to have been within the grant when it was made. The right to them did not, however, depend on such location, but attached at once on the making of the grant. It is true they could not be identified until the line of the road was marked out on the ground; but, as soon as this was done, it was easy to find them. If the company did not obtain all of them within the original limit, by reason of the power of sale or reservation retained by the United States, it was to be compensated by an equal amount of substituted lands. The latter could not, on any contingency, be selected within that limit; and the attempt to give this effect to the clause receives no support, either in the scheme of the act or in anything that has been urged by counsel. It would be strange, indeed, if the clause had been intended to perform the office of making a new grant within the ten-mile limit, or enlarging the one already made. Instead of this, the words employed show clearly that its only purpose is to give sections beyond that limit for those lost within it by the action of the Government between the date of the grant and the location of the road. This construction gives effect to the whole statute, and makes each part consistent with the other. But, even if the clause were susceptible of a more extended meaning, it is still subject to and limited by the proviso, which excludes all lands reserved at the date of the grant, and not simply those found to be reserved when the line of the road shall be definitely fixed. The latter contingency had been provided for in the clause; and, if the proviso did not take effect until that time, it would be wholly unnecessary. And these lands being within the terms of the proviso, as we construe it, it follows that they are absolutely and unconditionally excepted from the grant; and it makes no difference whether or not they subsequently became a part of the public lands of the country."

The indemnity clause in the act of May 5, 1864 (13 Stat., 66), is in substance the same as the indemnity clause in the act of March 3, 1863 (12 Stat., 772). Applying this rule to the grant now under consideration, it will be seen that there has been patented to the Wisconsin Central Railroad Company 41,800.09 acres in excess of what it is entitled to.

You are therefore instructed to call upon the company to relinquish its claim to the said quantity of land, in order that the same may be restored to the public domain.

It appears from the statement of Mr. Mendenhall, attorney for the company, that it has caused to be selected 167,072.14 acres as indemnity land, and paid the fees thereon, amounting to $2,087.13.

Under the rule announced by the court, above cited, these lands cannot be patented to the company, and the request is made that credit be given for the fees thus paid, to apply on the lands to be selected in place.

The fees thus received by the local officers were paid as compensation under the provision of section 2238 of the Revised Statutes, for labor actually performed at the request of the company; and there is no law which authorizes this Department to require the local officers to perform the additional labor of making new selections without compensation. Your recommendation that the request be denied is approved.

The company also request that in view of the changed practice in the adjustment of indemnity lands, it be permitted to relinquish its claim to the lands already patented and select others within its indemnity limits, where most convenient and desirable. The basis of this request is that, under the rule of this Department in force prior to the decision of the Supreme Court above cited, the company would have received all the vacant lands in the indemnity limits; hence its selections were made in a body, taking all the vacant lands in the several sections along the line of the road; but under the rule now in force in the Department, the selections would be differently made.

The lands for which patents have issued were voluntarily selected by the company. The Government and the public have been influenced in their action by this adjustment, and I see no sufficient reason why it should be set aside and the additional labor and expense incident to the adjustment of new selections incurred.

The request is therefore denied.

The papers in the case are herewith returned.

Very respectfully,

C. SCHURZ,
Secretary.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

K.

DEPARTMENT OF THE INTERIOR,
Washington, July 30, 1878.

SIR: I herewith return, with my approval, list No. 9, containing 29,398.51 acres of land in place inuring to the Wisconsin Central Railroad Company, under the act of Congress approved May 5, 1864, submitted by you on the 29th instant.

I also return the stipulation, dated May 20, 1878, and signed by the company, to the effect that said company will ask for no further certificates or patents for lands within the limits of its grant, "until the question as to the excess of indemnity, which it is alleged has heretofore been patented to the company to the amount of 41,800 acres, shall be settled by a relinquishment of the same or by a decision of a proper tribunal."

You will be governed by the terms of this agreement, until otherwise instructed by this department.

Very respectfully,

C. SCHURZ,
Secretary.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

L.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., July 29, 1878.

SIR: I have received selections by the Wisconsin Central Railroad Company, under act of Congress approved May 5, 1864, of lands within the 10-mile limits of the grant, amounting, as shown by the accompanying clear list (No. 9), to 29,398.51 acres.

In connection therewith I have also received a letter from the president of the company inclosing an agreement on behalf of the company, conditioned upon approval and patenting of these selections, "not to ask for any further certificates or patents of lands within the limits of its grant until the question as to the excess of indemnity, which it is alleged has heretofore been patented to the company to the amount of 41,800 acres, shall be settled by a relinquishment of the same, or by a decision of a proper tribunal."

From the tenor of the communication accompanying this agreement, and of one of the 20th instant, referred to this office by you, both of which, and the agreement, are herewith transmitted, I infer that the selection of these lands is the result of an understanding, between the Department and the company in the matter.

I have therefore examined and certified to the selections in the usual manner, and lay the list of the same before you for your action.

I have the honor to be, sir, very respectfully, your obedient servant,

J. A. WILLIAMSON,
Commissioner.

Hon. C. SCHURZ,
Secretary of the Interior.

L_1.

WISCONSIN CENTRAL RAILROAD COMPANY,
Milwaukee, Wis., May 20, 1878.

DEAR SIR: I inclose herewith an agreement, as required by the Secretary of the Interior, which will entitle this company to an approval of the lists for 30,000 acres of its grant recently filed in the Wausau, Eau Claire, and Bayfield offices.

I request that the rule of the Department which requires that lists for approval shall remain on file five months before patent shall issue may be set aside in this case.

I understand that the rule was adopted in order to give parties having adverse claims an opportunity to present proof of their claims and have them acted upon by the Department.

As the lands embraced in our lists were withdrawn from sale in 1869, all claims adverse to the title of this company must have been disposed of, and therefore the necessity for the rule no longer exists. It is of the utmost importance that the company should receive patents for the lands embraced in these lists immediately, and I hope the usual five months' delay may be avoided.

I have sent you by express a map properly certified by the governor of Wisconsin and the chief engineer of the company, showing the completion of the seventh section—26 miles—north from Stevens Point. This map, with those previously filed in the General Land Office, completes the line of route of the railroad from Portage to Stevens Point and from Stevens Point to Ashland.

Very respectfully,

CHAS. L. COLBY,
President.

Hon. J. A. WILLIAMSON,
Commissioner of General Land Office, Washington, D. C.

Mr. Marble, solicitor of the Interior Department, drew up the agreement inclosed.

L_2.

[Wisconsin Central Railroad Company, Charles L. Colby, president.]

MILWAUKEE, WIS., *July* 20, 1878.

DEAR SIR: A few months ago I had the pleasure of an introduction to you through Gov. William E. Smith, and you favored me with one or two personal interviews in regard to our land grant, which you doubtless remember.

The following are some of the points alluded to: I explained—

1st. That we had invested many millions of dollars in the construction of our road, the principal inducement for which was our *land grant*, which we were informed was large and valuable, and which the United States Land Commissioner in an official letter informed us amounted to 1,357,000 acres. The printed circulars issued by the Department states the amount of the grant to our company to be 1,800,000 acres.

2d. It now appears that the official statements are fearfully incorrect, and that there are only about 800,000 acres unsold in the whole limits of our grant south of Bayfield, including the indemnity.

3d. Under recent decisions of the Supreme Court you have deemed it necessary to cut down even this amount about 25 per cent. more.

4th. We are very anxious to receive our patents for all the lands to which we are entitled, and the cutting down of our grant is ruinous to our company.

5th. A short time ago you declined to give us further patents, even for lands in place, on the ground that if you should give us all we are entitled to in place, you would then have patented to us 41,800 acres more than under the decision referred to you would consider us entitled to.

At our personal interview, to which I refer, I asked that patents be issued to us for 30,000 acres more, and the balance (some 57,000 acres) to be withheld until we should either relinquish 41,800 acres from lands already patented us for indemnity, or until the question of excess of indemnity be definitely settled by some competent tribunal.

On May 9 I had my last interview with your solicitor, Mr. Marble, to whom the matter was referred. He then advised me to apply for 30,000 acres in 10-mile limits, and with this list file an agreement not to ask for more patents until the question at issue should be settled. He also very kindly worded for me the form in which the agreement should be expressed.

Probably this statement will remind you and Mr. Marble of all the circumstances of our interviews. And I desire here to express my appreciation of the courtesy and kindness with which you listened to all my explanations.

In accordance with Mr. Marble's advice, the necessary lists were prepared and filed

in the Department. The agreement, as proposed by him, was forwarded to the Commissioner of the General Land Office at Washington on May 20, 1878, with my letter of explanation.

The summer is fast slipping away, and with it my opportunities to sell the land applied for and bring in new settlers. You know how important time is to us, and that a few weeks more or less in the right season makes a difference of thousands of dollars.

Am I trespassing too much upon your kindness in asking you to instruct the Commissioner of the General Land Office to make this a special case, and to make and deliver the patents to us immediately? This is a matter of great importance to us. Thanking you again for your several courtesies.

I am, yours, very truly,

CHAS. L. COLBY,
President Wisconsin Central Railroad Company.

Hon. CARL SCHURZ,
Secretary of the Interior, Washington, D. C.

L3.

[Wisconsin Central Railroad Company, Charles L. Colby, president.]

MILWAUKEE, WIS., *May* 20, 1878.

SIR: In applying for approval of list for 30,000 acres, in Wausau, Eau Claire, and Bayfield districts, filed in May, 1878, and for patent for lands therein described, the Wisconsin Central Railroad Company hereby agrees not to ask for any further certificates or patents of lands within the limits of its grant until the question as to the excess of indemnity, which it is alleged has heretofore been patented to the company to the amount of 41,800 acres, shall be settled by a relinquishment of the same or by a decision of a proper tribunal.

WISCONSIN CENTRAL RAILROAD COMPANY,
By CHAS. L. COLBY, *President.*

L4.

WASHINGTON, D. C., *February* 20, 1882.

SIR: The Wisconsin Central Railroad Company is an applicant for patents for lands within their granted and indemnity limits for which selections have been made, and to the extent of the indemnity tracts are ready for submission to your Department for approval preparatory to issue of patent, but I learn informally from the Commissioner of the General Land Office that for the present it is not your desire that lists of railroad selections shall be submitted for approval, this because of the several resolutions and bills before Congress relative to railroad land grants.

While these resolutions are broad in their scope, yet we know of none that reach to or are intended to reach to or affect in any way lands earned by the companies by construction of road *within* the statutory limitation. This is the status of the Wisconsin Central Railroad Company upon its present applications.

The selections embrace lands due for road constructed within the limitation of the law.

The files of the General Land Office will, we are confident, show that the company had constructed within the legal time not less than 200 miles of its road, which would entitle it to about 1,200,000 acres of land; and that all the lands patented to it to date, together with those which we have selected and for which we desire patents, will not near satisfy this lien. The company has received patents for only 575,000 acres. Hence to approve these lands and give the company patents therefor will in no way be against the spirit or letter of these legislative resolutions or present your Department as showing a disregard for their possible effect. We therefore ask that you will direct that our lists may be submitted for and that [they] will receive your approval for patent.

Very respectfully,

W. K. MENDENHALL,
Attorney Wisconsin Central Railroad Company.

Hon. S. J. KIRKWOOD,
Secretary of the Interior.

[Indorsement.]

DEPARTMENT OF THE INTEEIOR.

Commissioner MCFARLAND:

Has the entire line of the road been completed; if so, was it all done within the time prescribed by the law making the grant?

S. J. K.

M.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., March 30, 1882.

SIR: I am in receipt of a letter from W. K. Mendenhall, esq., addressed to you and referred by you to this office for a report, in which he requests that you will direct that certain lists of selections, made by the Wisconsin Central Railroad Company, be submitted by this office for your approval, and that the same may be approved for patent.

You ask, "Has the entire line of road been completed; if so, was it all done within the time prescribed by the law making the grant?"

The grant for this railroad was made by act of May 5, 1864 (13 Stat., 64), and is for every alternate section, designated by odd numbers, for ten sections in width on each side of the road, with indemnity limits of 20 miles, or 10 miles additional, upon each side of the line of route.

Indemnity may be had for all lands found to have been reserved or otherwise disposed of, or to which pre-emption or homestead rights had attached, prior to the date of definite location of the road.

The granting act was amended by act of June 21, 1866 (14 Stat., 360), to authorize the location of the line of route as specified in said amendatory act.

The act of April 9, 1874 (18 Stat., 28), extended the time for completion of the road until December 31, 1876.

The act of March 3, 1875 (18 Stat., 511), allowed the company to straighten the line of road between Portage City and Stevens Point, taking, however, only such lands, falling *within* the 10-mile limits of the amended line, as were included in the original withdrawal; those falling outside the said 10-mile limits of the amended line reverted to the United States.

The length of the line as finally located from Portage City to Superior is 341 miles, of which 231 miles were constructed prior to December 31, 1876, the date of expiration of the time limited, and 26 miles have been constructed since said date, making a total of 257 miles of constructed road, leaving uncompleted at expiration of the time limited 110 miles, and now remaining uncompleted 84 miles.

The grant, at ten sections per mile for 341 miles, would give an aggregate of 2,182,400 acres, but as the line is located along the lake from Ashland to Superior the area of the grant is lessened thereby, and the total area is estimated at about 1,800,000 acres, or the entire line.

The records of this office show that 575,844.56 acres have been patented for said railroad.

The list, now ready for submission for approval for patent, and referred to by Mr. Mendenhall, contains 23,578.08 acres.

Were it fully determined that the company is entitled to the full complement of lands granted for that portion of the road constructed before the expiration of the time named for the completion of the entire road, there would be, in my opinion, no valid objection to the approval of the list in question, as it is apparent from the above statement that the company has earned, by the construction of the 231 miles built prior to December 31, 1876, much more than the aggregate of the lands heretofore patented, plus those in the list under consideration. As, however, the whole question concerning grants which have "lapsed" by failure to complete the roads within the statutory period is now before Congress, it is my judgment that no steps should be taken, at present, looking to the patenting of further lands for the benefit of the grant in question.

Mr. Mendenhall's letter is herewith returned.

Very respectfully,

N. C. MCFARLAND,
Commissioner.

Hon. S. J. KIRKWOOD,
Secretary of the Interior.

N.

WASHINGTON, D. C., *September* 18, 1882.

SIR: On the 20th February last I had the honor to address your Department on behalf of the Wisconsin Central Railroad Company, upon the subject of receiving patents for lands earned by the construction of road prior to the expiration of the grant.

This communication was referred by your predecessor to the Commissioner of the General Land Office for a report as to the construction of the road. That report shows that the company had constructed within the limitation of the statute 231 miles of road, which entitled it to 1,400,000 acres of land; that only 575,844 acres have been patented, and that the list of selections for which we ask approval and patent cover

but 230,578 acres, leaving nearly 600,000 acres yet due the company for the road constructed in time, but which we cannot obtain because of the want of lands to satisfy it. The Commissioner adds to his report as follows: "Were it fully determined that the company is to have the full complement of lands granted for that portion of road constructed before the expiration of time there would be no valid objection to the approval of the list;" but he suggests that as the whole question concerning grants which have lapsed by failure to complete the road within the statutory period is now before Congress, no steps should be taken at present looking to the patenting of further lands for the benefit of the grant in question.

No action has been taken as yet by your Department upon our application and said report, and we beg to again call your attention to the subject and to the following remarks:

As to our right to the lands earned by construction within the limitation we cannot believe you entertain a doubt. There is no room for argument on the subject. The grant itself decides it so and the courts have so held. The seventh section of the act (May 5, 1864) provides that as each 20 miles of road is constructed patents shall issue for the lands earned on said 20 miles, and so far as the road is completed. In section 9 it provides that if the road is not completed within ten years "no further patents shall be issued to said company;" that is, no patents further than the company may have earned by construction—no further patents than are authorized to be issued by section 7, to wit, for the number of miles of road constructed within the time imposed. This is the strictest construction which can be given to the statute. Assume that the company is now before you for the first time asking for patents for lands earned by construction of road before expiration of grant, will it be held that because none have issued, none could issue because of such expiration, and thus that we must lose the whole? Yet the argument applies to the whole as to a part. Such reasoning makes the grant a mere matter of diligence in procuring patents and is too fallacious to stand.

That this is a grant *in presenti* needs not to be argued; that question is *stare decisis*.

The title became perfect and indefeasible when the conditions subsequent were performed; and the Department is directed to issue the patents upon the performance of such conditions.

To the extent of our present request the company has done its part. Every requirement of the statute has been fulfilled—we have located our line, built our road, and it has been accepted by the State; the title has become complete; the absolute fee to any and every concession or grant made by the act has vested; the Supreme Court of the United States has so decided in Schulenberg *vs.* Harriman (24 Wall., 44); the court there goes even further and says, relative to the prohibition against further sales (patents in our case), "If the condition be not enforced *the power to sell continues as before the breach*, limited only by the objects of the grant and the manner of sale prescribed by the act." So in the matter of the Atlantic and Pacific Railroad Company the Attorney General expressed the opinion that the Company is entitled to patents for lands earned by construction of the road *subsequent* to the expiration of the grant, and your department issued patents to it accordingly. Much stronger, then, is our present claim for patents for lands earned by construction prior to such expiration; clearly and indubitably earned before any forfeiture could attach; earned by a full compliance with every condition imposed by the Government; so fully earned that our right cannot be taken away by any "Be it enacted" of Congress.

There is, then, no legal question for consideration; all conditions of the law have been complied with, and the only duty remaining to the Department is purely ministerial, to wit, the issue of the patents.

We therefore ask that our patents be given us for these lands. The questions before Congress do not involve us in this respect, because it would be futile to so consider us. The questions there bear upon and are considered only as bearing upon that portion of grants not earned by construction prior to their expiration; and that body certainly does not desire or expect the Department to withhold (because of the legislation they are considering) patents for lands completely earned and over which they have, and can have, no jurisdiction; lands, the title to which has, beyond peradventure, vested in the company.

We are urgently in need of the patents asked for and the delay in their issue is embarrassing to the company.

We therefore ask your attention to this matter at the earliest moment, and that you will authorize the issue of patents to us for all lands earned by construction of road prior to the date of expiration of the grant, December 31, 1876.

Very respectfully,

W. K. MENDENHALL,
Attorney for Wisconsin Central Railroad Company.

Hon. H. M. TELLER,
Secretary of the Interior.

N1.

DEPARTMENT OF THE INTERIOR,
Washington, October 2, 1882.

SIR: I herewith inclose letters from W. K. Mendenhall, esq., dated, respectively, February 20 and September 18, 1882, on behalf of the Wisconsin Central Railroad Company, in which a request is made for the patenting of lands earned by the construction of that railroad prior to the expiration of the grant.

By your letter of the 30th of March ultimo it appears that the road has received 575,844.56 acres, and that the lists ready for submission for approval contain 23,578.08 acres, and that these two amounts will fall short of the number of acres earned by the construction of 231 miles of road completed prior to December 31, 1876.

In the matter of the grant to the Wisconsin Central Railroad there is no question that the road was entitled to alternate sections so soon as progressive sections of the road should be completed. That being the case, I see no reason why the list mentioned in your letter should not be submitted to me for approval, and you are directed accordingly.

Very respectfully,

H. M. TELLER,
Secretary.

Hon. N. C. MCFARLAND,
Commissioner of the General Land Office.

N2.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., November 13, 1882.

SIR: Referring to your communication of the 2d ultimo, authorizing the submission to you for approval of lists of lands inuring to the grant for the Wisconsin Central Railroad, to the extent that said lands were earned by construction of road prior to the expiration of the grant, I submit herewith list No. 11, containing 43,280.99 acres within the granted ten-mile limits in the Eau Claire, Bayfield, and Wansau districts, Wisconsin.

Very respectfully, your obedient servant,

N. C. MCFARLAND,
Commissioner.

Hon. H. M. TELLER.
Secretary of the Interior.

P.

ATLANTIC AND PACIFIC RAILROAD LAND GRANT, OPINIONS OF ATTORNEY-GENERAL, COMMISSIONER GENERAL LAND OFFICE, AND SECRETARY OF THE INTERIOR, EXHIBITS P, R, S, T.

DEPARTMENT OF JUSTICE,
Washington, October 26, 1880.

SIR: Your letter of the 15th instant presents for my consideration the application of the Atlantic and Pacific Railroad Company for the appointment of three commissioners to examine a section of 25 miles of its road west from Albuquerque, N. Mex., under section 4 of the act of Congress of July 27, 1866.

The Atlantic and Pacific Railroad Company was created by and organized under the act of Congress above mentioned, and was granted the right of way and the public lands of the United States within certain defined limits from Springfield, Mo., through the Indian Territory and New Mexico, to the Pacific coast.

Before 1871, it appears that the company constructed its road from Springfield to the western boundary line of the State of Missouri, and this portion of the road was duly accepted by the President, and patents for the land issued. This action was in accordance with the provision of section 4 of the granting act, which provides that when the company shall have 25 consecutive miles of any portion of said railroad ready for the service contemplated, the President of the United States shall appoint three commissioners to examine the same; and if it shall appear that 25 consecutive miles of road have been completed in all respects required by the act, the commissioners shall so report to the President of the United States, and patents to lands, as provided for by the third section of the act, shall be issued to the company.

The company next completed 34 miles in the Indian Territory prior to 1871; but because the United States had not extinguished the Indian title, no steps were taken for the issuance of patents along the road in that Territory.

From the early part of the year 1871 down to August or September of the present year, no section or portion of the road was constructed by the company; in fact no work of any kind or description was done by the company on the road.

Section 8 of the act makes it a condition of each and every grant, right, and privilege given to the company, that the company "shall commence the work on said road within two years from the approval of this act by the President, and shall construct, equip, furnish, and complete the main line of the whole road by July 4, 1878."

The company has not conformed to this condition, as it appears that for six years prior to July 4, 1878, no road was constructed; and, in addition, that for two years subsequent to that date no portion of the road was constructed.

The ninth section of the act recites that the conditional grants were made and accepted upon the further condition that "if the company make any breach of the conditions and allow the same to continue for upwards of one year, then in such case, at any time hereafter, the United States may do any and all acts and things which may be needful and necessary to insure a speedy completion of the said road."

By section 20 Congress has retained the right to add to, alter, amend, or repeal this act, having due regard for the rights of said railroad company.

Having in view the provisions and conditions of the granting act, and the failure on the part of the railroad company to perform the conditions prescribed in the manner recited, you request my opinion upon the following question:

"Is it within the power and the duty of the Executive to appoint commissioners to examine the section of road submitted by the Atlantic and Pacific Railroad Company, to accept the same if completed in all respects required by the act of July 27, 1866, and to cause patents to be issued to said company for lands situated opposite to and coterminus with the section of road, if completed?"

As I think the grant to this railroad must be treated as a present grant, to be made afterwards definite, as from time to time the various portions of the road are completed, the only inquiry would seem to be whether or not the conditions upon which the company received the grant are in their nature conditions precedent or subsequent. If conditions precedent, the failure to perform such conditions would deprive the road of its right to make application for the benefits of the act, if, after such conditions were violated, it proceeded to build portions of the road. If conditions subsequent, then it would be necessary for the United States to take advantage of such conditions by acting under the ninth section of the act, and proceeding itself to do acts and things which might be safe or necessary to insure a speedy completion of the road, or by declaring a forfeiture of the grant by legislative action or by providing for enforcing the same by a judicial proceeding. If the United States were disposed to revest in itself or to enforce a forfeiture of the lands granted, it would be necessary to take some action indicative of that intention.

The case of Schulenberg *vs.* Harriman is apparently decisive of the present inquiry. That was the case of a grant of lands to the State of Wisconsin, to aid in the construction of a certain railroad within that State, by the act of June 3, 1856. The language of the first section of that act was, "That there be, and hereby is, granted to the State of Wisconsin," the lands specified. Similar language is found in the third section of the act of July 27, 1866, "That there be, and hereby is, granted to the Atlantic and Pacific Railroad Company," &c. In that case the grant was made upon a condition that if the road be not completed within ten years "no further sale shall be made, and the lands unsold shall revert to the United States." The road had not been completed within the time required for its construction, which had not been extended, and Congress had passed no act nor provided for any judicial proceedings to enforce any forfeiture of the grant for failure to construct the road within the period prescribed. Upon this state of facts it was held that the grants to the State of Wisconsin were grants *in præsenti*, which required precision, as the route of the road became fixed by its location, and that the lands had not reverted to the United States, although the road was not constructed within the period prescribed, no action having been taken either by legislation or judicial proceedings to enforce a forfeiture of the grants.

The conditions in the present case must be held in view of this authority to be conditions subsequent. Apparently they are much more strongly so than in the case referred to. The section nine, in which they are found, distinctly contemplates that the United States will do some act and may do certain acts upon the breach of the conditions.

I am, therefore, of opinion that the grant to the railroad has not been forfeited by its failure to build its road within the time named in the act, no action by reason of its failure to perform the conditions having been taken by authority of Congress. It having then a present grant, even if it be treated as one liable to forfeiture, it has still a right to proceed to construct the road, and until in some form advantage shall be taken of the breach of the conditions it would be the duty of the executive department to give it the benefit of the grant.

I am also of opinion, therefore, that it would be within the power and duty of the Executive to appoint commissioners to examine the section of road submitted by the Atlantic and Pacific Railroad Company, to accept the same if completed in all respects required by the act of July 27, 1866, and to cause patents to be issued to said company for lands situated opposite to and coterminous with the section of road if completed.

I have the honor in this connection to refer to the opinion delivered to your Department by me, of the date of November 29, 1879 (upon which I understand the Department has acted), in which the case of Schulenberg *vs.* Harriman, *supra*, was considered.

Very respectfully, your obedient servant,

CHAS. DEVENS,
Attorney-General.

Hon. CARL SCHURZ,
Secretary of the Interior.

R.

DEPARTMENT OF THE INTERIOR,
Washington, December 15, 1880.

SIR: I have the honor to submit herewith, for your consideration, the report of Messrs. Hoyt Sherman, J. E. Bloom, and A. B. Nichols, who were appointed by you commissioners to examine the sixth section of the railroad and telegraph line constructed by the Atlantic and Pacific Railroad Company. Said section begins at a point in township 8 north, range 2 east, near Isleta, at the junction with the New Mexico and Southern Pacific Railroad, runs westwardly, and ends at a point 50 miles from the place of beginning, all in the Territory of New Mexico.

The commissioners report said section to be built in "a workmanlike and creditable manner," and in substantial conformity with law and the instructions of this Department. I therefore recommend that said section be accepted by you, and that patents for lands earned by the construction thereof be issued to said company, pursuant to the fourth section of the act approved July 27, 1866. (14 Stat., 295.)

Very respectfully,

C. SCHURZ,
Secretary.

The PRESIDENT.

S.

DEPARTMENT OF THE INTERIOR,
Washington, December 17, 1880.

SIR: I inclose herewith copy of letter addressed to the President by me, on the 15th instant, transmitting report of commissioners appointed by him to examine 50 miles of the Atlantic and Pacific Railroad, lying immediately westward of the Rio Grande, at Isleta, N. Mex., and recommending that the section (sixth) be accepted, and that the lands earned by the construction thereof be issued to the Atlantic and Pacific Railroad Company, together with copy of the President's indorsement thereon, approving the recommendations.

I also transmit herewith the map and profile of said section, which accompanied the report of the commissioners, that you may carry out the President's order.

Very respectfully,

C. SCHURZ,
Secretary.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

T.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., January 3, 1881.

SIR: By act of Congress approved July 27, 1866, certain lands were granted to aid in the construction of a railroad and telegraph line from the States of Missouri and Arkansas to the Pacific coast, and the Atlantic and Pacific Railroad Company was incorporated and made the beneficiary. Section 8 of the said act provided that the company should commence work on the road within two years from its approval, build not less than 50 miles per year after the second year, and complete the whole line by July 4, 1878.

Section 9 enacted that if any of the conditions of the grant were broken, and continued so one year, "the United States may do any and all acts and things which may be needful and necessary to insure a speedy completion of the said road."

The road has not been completed, but there has been no further action by Congress concerning the grant.

There is no provision in the granting act for a forfeiture of the same. In the case of Schulenberg *et al. vs.* Harriman (21 Wallace, 44) the Supreme Court of the United States decided, concerning a grant for railroad purposes, which provided in case of a breach of its conditions that the lands should revert to the United States, that there could be no reversion or forfeiture without judicial proceedings or legislative action, and that in the absence of such proceedings or action the title remained unimpaired in the grantee.

It is clear that the same principle will apply with greater force to the grant to the Atlantic and Pacific Railroad Company, which does not provide for any reversion of the lands nor for a forfeiture of the grant. With your letter of December 18, 1880, you transmitted a map and profile of the road as constructed from a point in township 8 north, range 2 east, near Isleta, westwardly, a distance of 50 miles, all in the Territory of New Mexico.

Your letter also transmitted a copy of the letter addressed by you to the President on the 15th ultimo, transmitting the report of commissioners appointed to examine said section of road, recommending its acceptance, and that the lands earned by the construction aforesaid be patented to the company. The copy of your letter to the President bears a copy of his indorsement, dated the 17th ultimo, approving your recommendation. Thus the grant is fully recognized by the courts and the Executive as being in full force and effect. By letter of December 8, 1880, the register at Santa Fé transmitted a list of selections by the company, duly executed, of lands within its "granted" limits. The list was received in this office the 14th ultimo.

It is the rule to hold lists of selections by railroad companies five months before submitting lists for approval upon which to issue patents, in order that full protection may be given to valid adverse claims.

It has been represented to me that it is very desirable that the company shall receive patent at an early day for the lands in question, to show the recognition of the grant.

Under the circumstances I think the request a reasonable one, and have concluded to waive the stated rule, inasmuch as the lands in question have been long surveyed.

I submit herewith, for your approval, list No. 1 of lands in the Santa Fé district, New Mexico, containing 23,037.36 acres.

The records and returns, so far as received, have been carefully examined, and the lands included in the list are found free from any conflict or adverse claim.

Very respectfully, your obedient servant,

J. A. WILLIAMSON,
Commissioner.

Hon. C. SCHURZ,
Secretary of the Interior.

NEW ORLEANS PACIFIC RAILWAY, SUCCESSOR TO THE NEW ORLEANS, BATON ROUGE AND VICKSBURG RAILROAD COMPANY, AS TO TRANSFER OF LAND GRANT, OPINION OF ATTORNEY-GENERAL UNITED STATES.

DEPARTMENT OF JUSTICE,
Washington, D. C., June 13, 1882.

SIR: By a letter dated the 5th of January last, your predecessor submitted to me a number of questions arising upon an application of the New Orleans Pacific Railway Company for certain lands claimed under the land grant made to the New Orleans, Baton Rouge and Vicksburg Railroad Company by the act of Congress of March 3, 1871, chapter 122.

The land grant mentioned is contained in the twenty-second section of that act, which provides:

"That the New Orleans, Baton Rouge and Vicksburg Railroad Company, chartered by the State of Louisiana, shall have the right to connect, by the most eligible route to be selected by said company, with the said Texas Pacific Railroad at its eastern terminus, and shall have the right of way through the public land to the same extent granted hereby to the said Texas Pacific Railroad Company; and in aid of its construction from New Orleans to Baton Rouge, thence by way of Alexandria, in said State, to connect with the said Texas Pacific Railroad Company at its eastern terminus, there is hereby granted to said company, its successors and assigns, the same number of alternate sections of public lands per mile, in the State of Louisiana, as are by this act granted in the State of California to said Texas Pacific Railroad Company; and said lands shall be withdrawn from market, selected, and patents issued therefor, and opened for settlement and pre-emption, upon the same terms and in the same manner and time as is provided for and required from said Texas Pacific Railroad Company, within said State of California: *Provided*, That said company shall complete the whole of said road within five years from the passage of this act."

The eastern terminus of the Texas Pacific Railroad, as fixed by the same act, was a point at or near Marshall, Tex.

The New Orleans, Baton Rouge and Vicksburg Railroad Company was incorporated by an act of the legislature of Louisiana passed December 30, 1869, which authorized it to construct and operate a railroad "from any point on the line of the New Orleans, Jackson and Great Northern Railroad, within the parish of Livingston, running from thence to any point on the boundary line dividing the States of Louisiana and Mississippi," the route here indicated lying east of the Mississippi River. It was also authorized to construct and operate a branch railroad from its main line (above described) to the city of Baton Rouge; and for the purpose of connecting its railroad with the railroads of other companies, &c., it was furthermore authorized "to construct, maintain, and use, by running thereon its engines and cars, such branch railroads and tracks as it may find necessary and expedient to own and use;" and such branch railroads were, for all the purposes of the act, to be deemed and taken to constitute a part of the main line of its railroad within the State of Louisiana.

On November 11, 1871, that company filed in the General Land Office a map designating the general route of a road projected thereby from Shreveport, by way of Alexandria, to Baton Rouge, and thereupon the withdrawal of the public lands along the same was ordered, which became effective in December following.

Subsequently, by an act of the legislature of Louisiana, passed December 11, 1872, the same company was given "full power and authority to commence the construction of their road in the city of New Orleans, or Shreveport, or at any intermediate point on their line of road as may best suit the convenience of said company and facilitate the speedy construction of a continuous line from the city of New Orleans to the city of Shreveport, or perfect railroad communication with the Texas Pacific Railroad, or any other railroad in Northwestern Louisiana, at or near the Louisiana State line: *Provided, however*, That the said company shall construct the line of its road between the city of New Orleans and the city of Baton Rouge on the east side of the Mississippi River, to the corporate limits of the said city of Baton Rouge, or adjacent thereto."

In the mean time, by the act of Congress of May 2, 1872, chapter 132, the Texas and Pacific Railway Company (formerly styled the Texas Pacific Railroad Company) was "authorized and required to construct, maintain, control, and operate a road between Marshall, Texas, and Shreveport, Louisiana, or control or operate any existing road between said points, of the same gauge as the Texas and Pacific Railroad." The same act further provided that "all roads terminating at Shreveport shall have the right to make the same running connections, and shall be entitled to the same privileges, for the transaction of business in connection with the said Texas and Pacific Railway, as are granted to roads intersecting therewith."

On February 13, 1873, a second map was filed in the General Land Office by the New Orleans, Baton Rouge and Vicksburg Railroad Company, designating the general route of a road projected thereby from New Orleans to Baton Rouge, and a withdrawal of the public lands along the same was ordered, which took effect in April, 1873. The route between those places, those designated, lies on the east side of the Mississippi River. That company has not constructed any part of its road, either on the route between New Orleans and Baton Rouge or on the route between the latter place and Shreveport; nor, indeed, has there been a *definite location* of its road anywhere between the points mentioned. Nothing beyond the designation of the general route thereof appears.

Pursuant to a resolution of its board of directors, adopted December 29, 1880, all the right, title, and interest of that company in and to the aforesaid grant of public lands made by the act of March 3, 1871, were deeded by it to the New Orleans Pacific Railway Company. This action of the board of directors and officers of the former company was afterwards approved and ratified by the stockholders thereof at a meeting held in December, 1881.

The New Orleans Pacific Railway Company was originally incorporated under the general laws of the State of Louisiana, in June, 1875. Its charter was subsequently amended by acts of the Louisiana legislature, passed February 19, 1876, and February 5, 1878. It is thereby authorized to construct a railroad "beginning at a point on the Mississippi River, at New Orleans or between New Orleans and the parish of Iberville, on the right bank of the Mississippi, and Baton Rouge, on the left bank, &c., or from any point within the limits of this State, and running thence towards and to the city of Shreveport," which is made its northwestern terminus.

The route of this company as projected is understood to extend from New Orleans to Baton Rouge, and thence by way of Alexandria to Shreveport. Between New Orleans and Baton Rouge it lies on the west side of the Mississippi River; while the designated route of the New Orleans, Baton Rouge and Vicksburg Railroad Company, between the same points, lies on the east side of that river. Between Baton Rouge and Shreveport its general course and direction correspond, in the main, with the route designated by the last-named company. It is throughout its entire length

from New Orleans to Shreveport within the limits of the before-mentioned withdrawals of public lands.

In October, 1881, the president of the New Orleans Pacific Railway Company made affidavit that three sections of its road were then completed and ready for examination by the Government; whereupon a commissioner was appointed to examine the same, the result of whose examination appears in a report made by him to the Secretary of the Interior, under date of the 26th of that month. One of the sections embraces 68 miles of road, beginning on the west bank of the Mississippi River, opposite New Orleans, and ending near the town of Donaldsonville; another embraces 20 miles of road near Alexandria; and the third embraces 50 miles of road terminating at Shreveport. For each of these sections lands are claimed by that company under the aforesaid land grant, as assignee of the New Orleans, Baton Rouge and Vicksburg Railroad Company.

No map of definite location of any portion of its road has been filed, other than those of constructed portions.

It appears that in February, 1881, the New Orleans Pacific Railway Company purchased from Morgan's Louisiana and Texas Railroad and Steamship Company, the road constructed on the west bank of the Mississippi River by the New Orleans, Mobile and Texas Railroad Company, from Westmego to White Castle, a distance of 68 miles, and that the same has become a part of the main line of the road of the New Orleans Pacific Railway Company.

The following are the questions submitted:

"1. Was the grant to the New Orleans, Baton Rouge and Vicksburg Railroad Company a grant *in præsenti*?

"2. Had the New Orleans, Baton Rouge and Vicksburg Railroad Company, at the date of its alleged transfer of lands to the New Orleans Pacific Railway Company, such an interest in the lands, under said act, as was assignable?

"3. Is the New Orleans Pacific Railway Company such a successor to or assignee of the New Orleans, Baton Rouge and Vicksburg Railroad Company as is contemplated by said act?

"4. Should it appear that the 68 miles of the New Orleans, Mobile and Texas Railroad was constructed *prior* to the act of March 3, 1871, granting lands to *aid in the construction* of the New Orleans, Baton Rouge and Vicksburg Railroad, can the New Orleans Pacific Company (its assignee) claim any benefit from the grant? Or in case of such prior construction, and the non-construction of any portion of the New Orleans, Baton Rouge and Vicksburg Road, has the purpose for which the grant was made failed, and the grant consequently lapsed?

"5. If the New Orleans, Mobile and Texas Road was constructed, subsequently to the date of said act, is so much of its road as is now owned by the New Orleans Pacific Company such a road as is contemplated for acceptance by the President within the meaning of said act, and may patents issue to the latter for lands opposite to and coterminous with such constructed portion of road?"

These questions are accompanied by a request for an opinion upon such other questions of law as may suggest themselves touching the transfer of said land grant, to which reference is above made.

Of the above-stated questions the first three may be considered together in connection with the following inquiry, which presents itself at the outset, whether the *assent of Congress* to the transfer made by the New Orleans, Baton Rouge and Vicksburg Railroad Company of all its interest in said land grant to the New Orleans Pacific Railway Company is necessary (by reason of anything in the provisions of the grant itself) to entitle the latter company to the benefit of said grant in aid of the construction of the road projected by it.

The act of March 3, 1871, passed to the New Orleans, Baton Rouge and Vicksburg Railroad Company a *present interest* in a certain number of alternate sections of public lands per mile within the limits there prescribed. Its language is, "there is hereby granted to the said company" the number of alternate sections mentioned; words which import a grant *in præsenti*, and not one *in futuro*, or the promise of a grant. (97 U. S. Rep., 496.) But the grant thus made is in the nature of a float. It is of sections to be afterward located, their location depending upon the establishment of the line of the road. Until this is definitely fixed the grant does not attach to any specific tracts of land. Upon the line of the road being definitely located the grant then first acquires precision, and the company becomes invested with an inchoate title to the particular lands covered thereby, which can ripen into a perfect title only as the construction of each section of 20 miles of road is completed and approved, when the right to patents for the lands opposite to and coterminous with such constructed section accrues.

The *proviso* in the grant that the company shall complete the whole of its road within five years from the date of the act is a condition subsequent, the failure to perform which does not *ipso facto* work a forfeiture of the grant, but only gives rise to a right in the Government to enforce a forfeiture thereof. Yet in order to enforce a for-

feiture such right must be asserted by a judicial proceeding, authorized by law, or by some legislative action amounting to a resumption of the grant. (Schulenberg *vs.* Harriman, 21 Wall., 44.) Hence, until advantage is taken of the non-performance of the condition, under legislative authority, the interest of the grantee in the grant remains unimpaired thereby.

Such being the nature and effect of the grant and its accompanying condition, and no action having been taken either by legislation or judicial proceedings to enforce a forfeiture thereof, it follows that at the period of said transfer by the New Orleans, Baton Rouge and Vicksburg Railroad Company this company was invested with a present interest in the number of alternate sections of public lands per mile granted by the act of 1871, notwithstanding it was already in default in the performance of the condition referred to, and that it still retained a right to proceed with the construction of the road in aid of which the grant was made until advantage should be taken of the default. But as it had not then definitely fixed the line of its road, although a map designating the general route thereof was duly filed, that interest did not attach to any specific tracts of land, but remained afloat, as it were, needing a definite location of the road before it could become thus attached. Was the interest here described assignable to another company, so as to entitle the latter to the benefit of the grant in aid of the construction of *its* road between the places named therein, without the assent of Congress?

Doubt has perhaps arisen on this point in view of the fact that in one or two instances it has been thought expedient to obtain legislation by Congress confirming or authorizing a similar assignment (see section 2 of the act of March 3, 1865, chapter 88, and section 1 of the act of March 3, 1869, chapter 127), and also in view of the adverse ruling of this Department in the case of the Oregon Central Railroad Company. (13 Opin., 382.) However, a similar assignment made in 1866 by the Hannibal and Saint Joseph Railroad Company to the Pike's Peak Railroad Company, afterward known as the Central Branch Company, was held to be valid by Attorney-General Stanbury in an opinion given to the Secretary of the Treasury under date of July 25, 1866.

In the latter case the Hannibal and Saint Joseph Company, which was incorporated by the State of Missouri, with authority to construct a railroad between Hannibal and Saint Joseph, within that State, was, by the Pacific Railroad act of July 1, 1862 (section 13), authorized to "extend its road from Saint Joseph, via Atchison, to connect and unite with the road through Kansas, * * * and may for this purpose use any railroad charter which has been or may be granted by the legislature of Kansas," &c., and by the fifteenth section of the same act it was provided that "wherever the word company is used in this act it shall be construed to embrace the words their associates, successors, and assigns the same as if the words had been properly added thereto." Subsequently, in 1863, an assignment was made by that company of all its rights under said act (which included an interest in both a land and a bond subsidy) to the Atchison and Pike's Peak Railroad Company, a company previously organized under a charter granted by the legislature of Kansas. The latter company having constructed a section of 20 miles of the proposed road west from Atchison claimed the benefit of the grant made to the Hannibal and Saint Joseph Company, as its assignee, and this claim was recognized and allowed, in accordance with the opinion of the Attorney-General. It will be observed, however, that the Hannibal and Saint Joseph Company was authorized to "use any railroad charter which has been or may be granted by the legislature of Kansas," and this, together with the provision in the fifteenth section quoted above, may have been regarded as sufficient to sustain the assignment.

In the case of the Oregon Central Railroad Company, mentioned above, a grant of a right of way through the public lands, and also of alternate sections thereof, was made to that company, "and to their successors and assigns," by the act of May 4, 1870, chapter 69, for the purpose of aiding in the construction of a railroad and telegraph line between certain places in Oregon. In August following an instrument was executed by the company assigning all its interest in the grant to the Willamette Valley Railroad Company, and thereupon the question arose whether the grant was susceptible of being thus transferred. The Attorney-General (Mr. Akerman), to whom the question was submitted, after reviewing the various provisions of the act, some of which (see section 5) imposed certain duties and required certain important acts to be performed by the company, decided in the negative, holding that, upon consideration of those provisions, the Oregon Central Company was alone within the contemplation of Congress in respect of the donation made and duties imposed by that act. The words "their successors and assigns," as used in the act, were regarded as words of limitation merely.

But the grounds upon which that decision appears to have been based are not found to exist in the case now under consideration. Here a grant of a certain number of alternate sections of public lands per mile is made to the New Orleans, Baton Rouge and Vicksburg Railroad Company, its successors and assigns, in aid of the construction of a road from New Orleans, by the route indicated, to connect with the eastern

terminus of the Texas and Pacific Railroad, which lands are required to be "withdrawn from the market, selected, and patents issued therefor, and opened for settlement and pre-emption upon the same terms and in the same manner and time as is provided for and required from said Texas Pacific Railroad Company." The grant is coupled with no special duties or trusts, for the performance of which there is reason to believe the particular company named therein was more acceptable to Congress than any other. Its purpose is to secure the construction of a railroad between the points designated, and whether this purpose be fulfilled by that company or by another company must be deemed unimportant in the absence of any provision indicative of the contrary. The interest derived by the grantee, though it remain only afloat, is a vested interest, and it is held under the same limitations which apply after it develops into an estate in particular lands until extinguished by ferfeiture for non-performance of the condition annexed to the grant. I perceive no legal obstacle arising out of the grant itself to a transfer of such interest by the grantee to another company, and should the latter construct the road contemplated agrecably to the requirements of the grant, and thus accomplish the end which Congress had in view, I submit that it would clearly be entitled to the benefits thereof.

The question of the assignability of the interest of the grantee would be more difficult if, after definitely locating the line of its road, and thus attaching the grant to particular lands along the same it was proposed to transfer that interest to another company for the benefit of a road to be constructed by the latter on a different line, though following the general course of the other road. But in the present case the facts give rise to no such difficulty. The grant had not previous to the transfer become thus identified with a particular line of road, and was thereafter susceptible of location upon the line of the road projected by the assignee (the New Orleans Pacific Company), provided this road met the requirements of the grant in other respects, as to which no doubt is suggested.

My conclusion is that the assent of Congress to the assignment made by the New Orleans, Baton Rouge and Vicksburg Railroad Company, as above, is not necessary in order to entitle the assignee to the benefit of the land grant in question.

The remaining questions relate to the 68 miles of railroad formerly belonging to the New Orleans, Mobile and Texas Railroad Company, but now owned by the New Orleans Pacific Company, and made a part of its main line between New Orleans and Baton Rouge.

The land grant in question was, as its language imports, made in *aid of the construction* of a railroad between certain termini, contemplating a road to be constructed, not one already constructed. It has not been the policy of Congress thus to aid constructed roads. Had a constructed road existed at the date of the grant, which extended from one terminus to the other, and afterward the New Orleans, Baton Rouge and Vicksburg Railroad Company, instead of entering upon and completing the construction of a road, had purchased the road already constructed, this, it seems to me, would not have satisfied the purposes of the grant so as to entitle the company to the benefit thereof. The same objection would apply where the constructed road extended over only a part of the route contemplated by the grant. So far as I am advised, the action of the Government hitherto has accorded with this view. On the other hand, if such road was constructed subsequently to the date of the grant, and is owned by the grantee or the assignee of the latter, I see no ground for excluding it from the benefit of the grant should it otherwise fulfill the requirements thereof.

Agreeably to the foregoing views, and in direct response to the several questions submitted, I have the honor to reply as follows: The first, second, and third questions I answer in the affirmative. The fourth question (including the alternative added thereto) I answer in the negative. The fifth question I answer in the affirmative—assuming, as I do, the company named therein to be an assignee of the grantee in the act referred to.

I have the honor to be, very respectfully,

BENJAMIN HARRIS BREWSTER,
Attorney-General.

Hon. H. M. TELLER,
Secretary of the Interior.

RAILROADS NOT COMPLETED IN TIME FIXED BY LAW.

The House Committee on Public Lands, through its chairman, requested information from the General Land Office as to land-grant railroads not completed in time fixed by law. The information so furnished is in House Misc. Doc. No. 17, Forty-seventh Congress, second session.

Letter from the Secretary of the Interior inclosing a report by the Commissioner of the General Land Office, transmitting further information concerning railroads that were not completed within the period fixed by law.

DEPARTMENT OF THE INTERIOR,
Washington, January 13, 1883.

SIR: Your letter of the 21st ultimo, calling for further information concerning railroads that were not completed within the period fixed by law, was received and referred to the Commissioner of the General Land Office. I have the honor to transmit herewith copy of his report on the subject, under date of the 11th instant.

Very respectfully,

H. M. TELLER,
Secretary.

Hon. T. C. POUND,
Chairman Committee on Public Lands, House of Representatives.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., January 11, 1883.

SIR: I am in receipt, by reference from you for report, of a letter addressed to you by Hon. T. C. Pound, chairman of the Public Lands Committee of the House of Representatives, in which he says:

"On the 28th day of March last you transmitted to the House of Representatives a report of the Commissioner of the General Land Office giving information respecting land-grant railroads, called for by a house resolution of February 9, 1882. That report contained the names of a number of railroads to whom grants of land have been made, either directly or through the State, who had not completed their roads within the time prescribed by law, and other information called for by that resolution. This report was printed as House Ex. Doc. No. 144. Supplementary to that report, and for the purpose of action on pending bills before this committee, I respectfully request that you cause this committee to be informed at the earliest moment practicable."

Here follows a series of questions, seven in number, which I shall endeavor to answer in the order in which they are presented, by arranging the questions under separate heads, and giving a question and answer under each head.

I.—"Whether any companies therein named have since said report made any progress in building or towards completion of their lines of railroad."

Since March 27, 1882, the date of report referred to, the following described evidence of construction of railroads has been received at this office:

ATLANTIC, GULF, AND WEST INDIA TRANSIT RAILROAD.

Certificate of the governor of Florida, dated August 5, 1882, of the construction of $26\frac{52}{280}$ miles of road from Ocala, Marion County, in the direction of Tampa.

PENSACOLA AND GEORGIA (NOW PENSACOLA AND ATLANTIC) RAILROAD.

Two certificates of the governor of Florida, dated December 6, 1882, of the completion of two sections of 20 miles each of road.

First section.—Commencing in Walton County, at a point 60 miles east of connection with Alabama and Florida (now the Pensacola) Railroad, and running eastwardly towards Chattahoochee, on the Apalachicola River.

Second section.—Commencing on the east bank of the Choctawhatchee River, in Washington County, and running eastwardly toward Chattachoochee. Total, 40 miles.

NORTH WISCONSIN RAILROAD.

Certificate of the governor of Wisconsin, dated July 20, 1882, of the completion of 20 miles of road beginning at a certain point in section 18, township 43, range 7 west,

and ending at station 1,056 in section 14, township 45, range 6 west. Certificate of governor of Wisconsin, dated July 20, 1882, of the completion of 20 miles of road, beginning at a certain point in section 35, township 40, range 12 west, and ending in section 25, township 43, range 12 west. Certificate of the governor of Wisconsin, dated October 23, 1882, of the completion of 20 miles of road, beginning at a certain point in section 25, township 43, range 12 west, and ending in section 22, township 46, range 12 west. Total, 60 miles.

NORTHERN PACIFIC RAILROAD.

On September 19, 1882, six maps, showing 200 miles of constructed road in Montana Territory, beginning at a point on the south bank of the Yellowstone River, about 1½ miles west of O'Fallon Creek, and ending at a point on west bank of Canyon Creek, 7 miles west of the town of Billings, in section 22, township 1 south, range 25 east, accepted by the President of the United States on September 16, 1882. On September 19, 1882, one map showing 25 miles of constructed road, beginning at the Northern Pacific Junction near Thomson, and ending near Bluff Creek in Superior, Wisconsin, accepted by the President of the United States September 16, 1882. On October 12, 1882, a map showing 50 miles of constructed road, beginning at a point 3 miles south of Sand Point, in Idaho Territory, and ending at a point on the west bank of Clark's Fork of the Columbia River, about 5 miles south of Elk Creek, Montana Territory, accepted by the President of the United States October 9, 1882.

On October 22, 1882, a map showing 25 miles of constructed road in Montana Territory, beginning at a point 275 miles eastward of Wallula Junction, in Washington Territory, and ending at a point 300 miles distant from said junction, accepted by the President October 20, 1882.

On December 7, 1882, three maps, showing 100 miles of constructed road, beginning at a point on the west bank of Canyon Creek, 7 miles west of the town of Billings, Montana Territory, and ending at a point on the south bank of the Yellowstone River, west of Little Boulder Creek, and opposite the old Crow Agency, accepted by the President of the United States December 5, 1882.

On December 7, 1882, a map showing 4.58 miles of constructed road, accepted by the President of the United States December 5, 1882, beginning at a point in the city of Bismarck, on the east bank of the Missouri River, in section 4, township 138 north, range 80 west, fifth principal meridian, and ending at a point on the west bank of the Missouri River, in the village of Mandan, in section 26, township 139 north, range 81 west. Total 404.58 miles.

ATLANTIC AND PACIFIC RAILROAD.

On December 19, 1882, two maps showing sixth and seventh sections of 25 miles each of the central division of road, constructed in the Indian Territory, beginning at a point 1.54 miles west of the crossing of the Missouri, Kansas and Texas Railway, and ending at point 50 miles west of place of beginning; also eight maps showing sections 9 to 16, inclusive, of road constructed in the Territory of Arizona, beginning at a point 200 miles west of junction of this railroad with the New Mexico and Southern Pacific Railroad, near Isleta, N. Mex., and ending at a point 200 miles westward of the place of beginning. Total, 250 miles, accepted by the President of the United States December 14, 1882.

II.—"All cases of such grants where no work has been done toward building the road so far as the Department is advised."

I have not been advised of the construction of any portion of the following-named railroads since March 27, 1882, viz:

In Mississippi.—Gulf and Ship Island, Tuscaloosa and Mobile, Mobile and New Orleans (also in Alabama and Louisiana).

Alabama.—Coosa and Tennessee, Coosa and Chattanooga, Elyton and Beard's Bluff, Memphis and Charleston.

Louisiana.—Railroad from New Orleans to the State line, in direction of Jackson, Miss.

Arkansas.—Iron Mountain, authorized by second section of act of July 4, 1866, from southern boundary line of Missouri to Helena, Ark.

III.—"All cases where efforts are now being made to complete the proposed roads and earn the grants."

All of said cases are stated under the first head, except that of the Oregon Central Railroad hereinafter referred to under the fifth head, and the Vicksburg, Shreveport and Texas Railroad, hereinafter referred to under the seventh head.

IV.—"The quantity of and, if any, patented to the said several roads, if any, since said report."

No lands have been approved or patented for any uncompleted road since said report of March 27, 1882, was made, except in the case of the Wisconsin Central Railroad, hereinafter referred to under the seventh head.

V.—"All cases where claims for the completion or further construction of any of said roads have been made or filed as a basis for the claim that further quantities of land be patented to the State or companies."

The following-named roads are embraced in the terms of this inquiry: Atlantic, Gulf and West India Transit, Pensacola and Georgia, North Wisconsin, Northern Pacific, Atlantic and Pacific. All of said roads are named under the first head, portions of the same having been constructed during the past year.

The Oregon and California, formerly the Oregon Central Railroad Company, in April and September of last year filed certain maps of definite location of road in Oregon and asked for a withdrawal of lands lying opposite said road. I referred said maps to you with letter of September 23, 1882 (copy herewith inclosed, marked A), and declined to recommend the withdrawal asked for. No action has been ordered by you in said case since said date. I have been unofficially advised that the New Orleans Pacific Railway Company, formerly New Orleans, Baton Rouge and Vicksburg Railroad Company, have filed in your office evidence of the construction of the major portion of their located road, and have made claim for the lands lying opposite thereto, but I have not received any official information on the subject. The Vicksburg, Shreveport and Texas Railroad might properly be included under this head, but its status will be found hereinafter under the seventh head.

VI.—"As to the roads, toward the building of which nothing has been done, whether the building of them has been probably abandoned, if known, and the cause of delay in building the same."

I am not in possession of any information which leads me to believe that any of the roads named under the second head will be constructed.

The president of the Gulf and Ship Island Railroad Company, however, as shown by the records of this office, applied to you July 17, 1882, by letter (copy herewith, marked B), for a withdrawal of lands along the line of the road as located in 1860. You referred said letter to this office for report, which was submitted to you on July 24, 1882 (copy herewith, marked C), and on October 20, 1882, by letter of that date (copy herewith, marked D), you rejected said application. No cause is assigned for the delay and failure in building this road.

VII.—"Any information the Department may possess which may be useful in determining whether any of the said grants should be declared forfeited and the lands to revert to the Government."

No attempt has been made, nor is any contemplated, so far as I am informed, to earn the grant for any of the roads named under the second head except the Gulf and Ship Island Railroad, the action in regard to which is hereinbefore fully explained. The grants for the roads named in the State of Mississippi were made by act of August 11, 1856 (11 Stats., 30), and the grants for the roads named in the States of Alabama and Louisana, by act of June 3, 1856 (11 Stats., 17, 18).

The grant for the Iron Mountain Railroad in Arkansas was made by the second section of the act of July 4, 1866 (14 Stats., 83).

No lands are reserved for the benefit of any of the roads named in said States, except for the Coosa and Chattanooga, in Alabama. Nothing further appears to have been done since my report of March 27, 1882, by the Mobile and Girard Railroad Company looking to the completion of that portion of the road lying between Troy and Mobile, regarding which I made certain recommendations to your predecessor, Hon. S. J. Kirkwood, by letter of April 14, 1882 (copy herewith, marked E).

In my report of March 27, 1882, as to the Vicksburg, Shreveport and Texas Railroad, I stated that the company had filed affidavits to the effect that it was proceeding with the construction of the uncompleted portion of its road as rapidly as possible. As said affidavits and the communication accompanying them give reasons for the delay and difficulty in completing the road, I submit herewith copies of same, marked F, G, and H. No certificate, however, of the construction of any portion reported March 27, 1882, as unconstructed, has been filed in this office. The Wisconsin Central Railroad is referred to in said report as having 84 miles of located road unconstructed. I have not been advised of the construction of, or intent to construct, any portion of said 84 miles. On October 21, 1882, there were 23,223.92 acres, and on November 23, 1882, 43,280.99 acres, patented to the State of Wisconsin for the benefit of this road, as explained in my report of December 29, 1882, printed as House Ex. Doc. No. 29.

I return herewith the letter of Hon. T. C. Pound.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Hon. H. M. TELLER,
Secretary of the Interior.

A.

OREGON AND CALIFORNIA RAILROAD CO.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., September 23, 1882.

SIR: On the 6th of April, 1882, you referred to this office, without instructions, a letter dated April 5, 1882, from H. Villard, president of the Oregon and California Railroad Company, addressed to Hon. John H. Mitchell, with two maps of the definite location of said road, to wit:

Map No. 1, showing an amended line of route of the said railroad from the south line of section 36, 27 south, 6 west, to a point in section line between sections 5 and 6, 30 south, 5 west, or from station 1,131 × 50 to station 1,298 of the original located line, as shown by the original map of location which was accepted by the Department, and upon which a withdrawal of lands was made by letter from this office of March 31, 1871. This change in location is a very limited one, and was found necessary in order to obtain a better crossing of the Umpqua River, and would not affect the withdrawal of the lands made on the original location.

Map No. 2, showing the location of a section of 20 miles south of that described above, commencing at station 1,320 × 50 in section 6, 30 south, 5 west, and ending at station 2,376 × 50 in township 31 south, 7 west.

On the 5th September, 1882, you referred to this office, for report and recommendation, a letter dated August 24, 1882, filed by W. K. Mendenhall, attorney for the Oregon and California Railroad Company, and map accompanying the same, showing the definite location of the line of said railroad from station 2,376 × 50, in township 31 south, 7 west, to the north line of section 33, 34 south, 6 west.

Mr. Mendenhall requests that you direct the withdrawal of the lands along the line of definite location, as shown by these maps, in accordance with the act of July 25, 1866, granting lands to aid in the construction of said road.

The line of road, as shown upon the said maps, appears to have followed the direction indicated in the granting act, to a point in section 33, 34 south, 6 west, about 38 miles north of the State boundary, and in a direction to connect with the line of the California and Oregon Company of California, which has located its road to the north line of township 46 north, 5 west, in a northerly line from its starting point on the Central Pacific road.

The act approved July 25, 1866 (14 Stats., p. 239), provided for the construction of a railroad from Portland, Oregon, to the Central Pacific in California; the California and Oregon Railroad Company to construct that part of the road in California, beginning at a point on the Central Pacific Railroads and running thence northerly to the northern boundary of the State, and the Oregon and California Company to construct that part of the said road in Oregon, beginning at Portland, and running thence southerly to the southern boundary of Oregon, where the same should connect with that part of the said line to be built by the first-named company.

The act required the completion of the entire road on or before July 1, 1875. By the act of June 25, 1868 (15 Stats., p. 80), the time for completing the said road was extended to July 1, 1880.

The estimated length of the lines of said road in Oregon is 315 miles. Prior to July 1, 1880, 197 miles of road, from Portland to Roseburg, were completed. No evidence of further construction has been received at this office.

In view of the fact that the statutory period within which the entire road should have been constructed has long since expired, and of the further fact that legislation concerning all grants in like condition has been proposed and is now pending, this office is not prepared at this time to recommend the acceptance, by the Department, of these maps nor any further withdrawal of lands for the benefit of the grant in question.

The maps are accordingly returned herewith, together with the letters filed with the same.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Hon. H. M. TELLER,
Secretary of the Interior.

B

GULF AND SHIP ISLAND RAILROAD COMPANY. EXHIBITS B, C, D.

JACKSON, MISS., ——, 1882.

To the Hon. Secretary of the Interior:

The undersigned, president of the Gulf and Ship Island Railroad Company, corporated under the laws of the State of Mississippi, would respectfully represent to the Hon. Secretary of the Interior:

That Congress, by the act of 11th of August, 1856, granted to the State of Mississippi, for the construction of the Gulf and Ship Island Railroad, alternate sections of public lands for a width of 6 miles, &c. (vol. 11, Statutes at Large U. S., p. 30). (A like grant was by the same act made for two other roads.)

In 1860, a definite location of the Gulf and Ship Island road was made, map of which was filed in the Interior Department. This location and map was intended to give notice to the United States and the Land Office Department of the area and location of the land granted, so that the same should be reserved from further sales. The undersigned would further represent that the legal effect and operation of said act of Congress was to vest in the State of Mississippi a present estate in fee in said lands, subject to a condition subsequent; that is to say, subject to a right in the United States, by positive act, to claim a restoration of said lands to the public domain on the non-completion of the railroad within the time limited, namely, ten years.

The undersigned insists that by virtue of the said act of Congress the State of Mississippi became owner in fee of said lands, in trust from the railroad, and will so continue owner until Congress resumes the grant.

The undersigned further insists that the grant by Congress separated said lands from the public domain and devoted them to the use and purpose named in the act of Congress; and that a disposition of any of said lands, by sales by the local land office, is absolutely illegal and violative of the terms of the grant in the act of 11th of August, 1856. This is clearly the ruling of the Supreme Court of the United States, in Schulenberg *vs.* Harriman, 21 Wallace, 44. Unless Congress by unequivocal act declares a forfeiture, the estate in fee, subject to the trust, remains in the State.

The undersigned represents to the Hon. Secretary that the officers of the local land office in Mississippi, in plain violation of law and their duty in the premises, have from time to time sold parcels of land within the area of the grant, and claim and are exercising the right so do to.

Bills are pending in both houses of Congress to waive the forfeiture and extend the time for building the road.

The premises considered, the undersigned, on behalf of the company which he represents, prays the Hon. Secretary to issue the proper order to the local land officers to refrain from further sales of said lands until Congress shall take definite action on the subject.

And, as in duty bound, &c.

WIRT ADAMS,
President Gulf and Ship Island Railroad.

C.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., July 24, 1882.

SIR: I am in receipt, by reference from you, for immediate consideration, of a letter addressed to you by Mr. Wirt Adams, president Gulf and Ship Island Railroad, requesting that the local land officers in the State of Mississippi may be directed to refrain from further sales or disposition of lands in even sections within the limits of the grant for said road by act of August 11, 1856. He refers to the fact that in 1860 (November 27) a map of definite location of said road was filed in this office, and holds that the said map identified the lands granted; also that the subsequent disposition of said lands by the local land officers was absolutely illegal and a violation of the terms of the act of August 11, 1856. In reply I have to advise you that by the act of August 11, 1856 (11 Stat., p. 30), a grant of six sections of land per mile was made to the State of Mississippi for a road from Brandon to the Gulf of Mexico. Provision was made in the act for the sale by the State of the lands granted, the quantity sold to be proportionate to the miles of road constructed from time to time, except in the case of the sale of the first one hundred and twenty sections, which could be sold in advance of the construction of any portion of the road. The act also provides that if the road be not completed within ten years "the lands unsold shall revert to the United States."

On August 15, 1856, prior to location of the road, the lands falling within the probable limits of the road were withdrawn from sale or location by Notice 567. A map of definite location of the road was filed in this office November 27, 1860, and "accepted as the basis of adjustment of the grant." No withdrawal was ever made upon the map of definite location, because of the outbreak of the war of the rebellion, which occurred while the diagrams of withdrawal were in course of preparation. By letter of August 22, 1856, the local land officers in Mississippi were directed to allow pre-emption settlements and entries upon *any* of the lands withdrawn by Notice 567 of August 15, 1856, up to the time when the line or route of the said road (and others provided for by the act of August 11, 1856) should be "definitely fixed." On October 22, 1856, said officers were instructed to the effect that upon the filing in their office of a certified map of the line of route of said road as "definitely fixed," they must, without awaiting further instructions from this office, cease to permit pre-emption entries or locations for any purpose upon "the lands within 15 miles of said route." No map of definite location appears to have been filed in any of the local land offices in Mississippi; consequently pre-emption entries were permitted within the limits of the road up to the date of the close of the offices by the war referred to. Said war closed in the year 1866. The act of June 21, 1866, reserved all the public lands in Mississippi and other Southern States for homestead purposes, and as soon as the local land offices in Mississippi were reopened, homestead entries only were permitted upon the lands in question. This condition prevailed until June 22, 1876, when an act was passed restoring lands in said States to pre-emption entry, and directing the offering at public sale of the vacant public lands in said States from time to time, as soon as practicable. Under this act all the vacant lands (no reservation of lands being made for the road in question) in Mississippi were offered in 1878 and 1879, and such as were not disposed of at public sale have since been held subject to homestead, pre-emption, or private entry. During all the years from 1860 until the receipt of Mr. Adams's letter on yesterday, a period of twenty-two years, no claim has been made in behalf of the State, or of any company organized under her laws, to any lands under or by virtue of the act of August 11, 1856.

No lands have been approved to the State for the benefit of the road, and no portion of the road has been constructed. There is not any evidence on file as to the disposition made by the legislature of Mississippi of the grant made for the benefit of this road. A bill (H. R. 6390) is now pending before Congress providing for the repeal of so much of the act of August 11, 1856, as makes a grant for the benefit of the road in question.

There is also a bill (H. R. 868) pending before Congress which proposes to grant to the State of Mississippi to aid in the construction of the Gulf and Ship Island Railroad "all the public lands heretofore granted for the same purpose" by the act of August 11, 1856. In view of the facts above stated I decline to recommend the withdrawal asked for by Mr. Adams.

I return herewith Mr. Adams's letter.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Hon. H. M. TELLER,
Secretary of the Interior.

D.

DEPARTMENT OF THE INTERIOR,
Washington, October 20, 1882.

SIR: I have considered the contents of letter (without date, but received July 17 last) from Wirt Adams, esq., president of the Gulf and Ship Island Railroad Company, in which he requests that the local officers of the State of Mississippi be directed to refrain from further sales or disposition of lands in the even sections within the limits of the grant for said road by act of August 11, 1856; also your report to me of July 24 thereon.

Briefly, the facts appear as follows:

Congress, by act of August 11, 1856 (11 Stat., 30), made a grant of six sections of land per mile to the State of Mississippi for a road from Brandon to the Gulf of Mexico. The act provided for the sale by the State of the lands granted as follows: The first 120 sections could be sold in advance of the construction of any portion of the road, and a like quantity following the completion of any continuous twenty miles of road. The act also provides that if the road be not completed within ten years "the lands unsold shall revert to the United States." A map of definite location of the road was filed in your office November 27, 1860, and "accepted as the basis of the grant." No withdrawal was ever made upon the map of definite location. On the 22d of October, 1856, the local land officers in Mississippi were instructed in effect by your office, that upon the filing in their respective offices of a certified map of a line

of route of said road as "definitely fixed," they should, without awaiting further instructions, cease to permit pre-emption entries or locations, for any purpose, upon "the lands within fifteen miles of said route."

No map of definite location appears to have been filed in any of the local land offices in Mississippi, and pre-emption entries were therefore permitted within the limits of the road up to the commencement of the war of the rebellion, when said local offices were closed.

When these offices were reopened following the war, homestead entries only were permitted upon the lands in question, for the reason that an act of Congress approved June 21, 1866, reserved all the public lands in Mississippi and other Southern States for homestead purposes.

On June 22, 1876, an act was passed restoring lands in said States to pre-emption entry after having first been offered at public sale.

Under the provisions of this act all the vacant lands in Mississippi were in 1878 and 1879 offered, and such as were not disposed of at public sale have since been held subject to homestead, pre-emption, or private entry. No reservation was made for the road in question. This condition has continued all these years since 1860 without protest or objection from any quarter, and no claim has been made in behalf of the State, or any company organized under her laws, to any lands under or by virtue of the act of August 11, 1856, until the receipt of Mr. Adams's letter a few weeks ago.

There is no evidence on file in this Department as to what disposition, if any, was made by the legislature of Mississippi of the grant made for the benefit of this road. A bill (H. R. 6390) is now pending before Congress, providing for the repeal of so much of the act of August 11, 1856, as makes a grant for the benefit of the road in question.

There is also pending a bill (H. R. 868) which proposes to regrant to the State of Mississippi, to aid in the construction of the Gulf and Ship Island Rrailroad, "all the public lands heretofore granted for the same purpose" by the act of August 11, 1856.

In view of the foregoing facts, I must decline to direct the withdrawal of the lands asked for by Mr. Adams.

You will inform him of my action in the matter, furnishing him a copy of this letter.

Very respectfully,

H. M. TELLER,
Secretary.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

E.

MOBILE AND GIRARD RAILROAD COMPANY.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., April 14, 1882.

SIR: I have the honor to transmit herewith the report of Mr. P. J. Glover, a special agent of this office, relative to the present condition of the lands embraced in the grant made by Congress, June 3, 1856 (11 Stat., 17), for the construction of a railroad from Girard to Mobile, in the State of Alabama.

The granted lands were included within six alternate sections in width on each side of the contemplated road, exclusive of lands previously sold, pre-empted, reserved, or otherwise appropriated. Indemnity selections for specified losses were authorized to be made within 15 miles from the line of the road.

Among the material conditions of the grant were the following:

1. The lands were to be exclusively applied to the construction of the road.
2. They were to be disposed of only as the work progressed.
3. They were to be subject to disposal by the legislature of the State solely for the purpose mentioned.
4. No more than one hundred and twenty sections included within a continuous length of twenty miles of the road could be disposed of by the State in advance of construction.
5. When the governor should certify to the Secretary of the Interior that twenty continuous miles of the road had been completed, another 120 sections of the granted lands within a continuous length of 20 miles might be sold, and so on until the road was finished.
6. The road was to be completed within ten years from the date of the act.
7. If the road was not completed within ten years, no further sale of the granted lands was to be made, but the lands then unsold were to revert to the United States.

The map of the definite location of the road was filed June 1, 1858.

No record is found in this office of any certificate from the governor as to the completion of any part of said road, but it appears that up to January 31, 1861, there had

been certified to the State of Alabama, on account of this grant, an aggregate of 504,145 acres of public land, being all, or nearly all, the land then vacant within both the granted and indemnity limits between Girard and Mobile. Of the land so certified, 208,767 acres were within the granted limits, and 295,377 acres within the indemnity limits.

It further appears as a matter of fact, as shown by Mr. Glover's report, which corresponds to the general information of this office, that the road was completed from Girard to Union Springs, a distance of 54 miles, in 1861, and that a further portion, from Union Springs to Troy, a distance of 30 miles, was commenced after the close of the war, and completed in 1871, making the total length of constructed road 84 miles. It is understood that construction definitely ceased at Troy.

Mr. Glover finds that the whole amount of public land available for the purpose of this grant between Girard and Union Springs, was 1,601 acres within the granted limits, and 1,399 acres within the indemnity limits.

The records of this office show that these were the amounts certified to the State between said points, and that the amount certified between Union Springs and Troy was 9,327.88 acres within the granted limits and 9,397.84 acres within the indemnity limits, or a total of 18,725.72 acres between the latter points. The total amount certified between Girard and Troy, and which was all the public land of the United States remaining between those points at the date of the definite location of the road, was 21,723.31 acres. The amount of land certified to the State in excess of the amount that could be claimed as inuring to the grant along the line of actually constructed road is therefore 482,421 acres.

It does not appear that any portion of the land certified to the State had been sold or used for the purpose of the road at the date of the expiration of the time allowed for construction, neither does it appear that any portion of the land had been certified over to the railroad company at that period.

By the act of the legislature of the State of Alabama, approved February 1, 1858, the State accepted the grant in aid of the construction of the Girard and Mobile Railroad, upon the terms, conditions, and restrictions contained in the act of Congress making the grant.

The second section of the legislative act provided that the lands, powers, and privileges granted and conferred by Congress to aid in the construction of a railroad from Girard to Mobile "are hereby granted to and conferred upon the Mobile and Girard Railroad Company * * * for the purpose and under the restrictions specified in said act of Congress, as soon as said company shall execute and deliver to the governor of this State a bond, faithfully to use said lands for the purpose of its donation, and to abide by and perform the provisions and conditions in the said act of Congress contained."

In a letter addressed to Mr. Glover by the private secretary of the governor of Alabama, dated August 19, 1881 (copy herewith), it is stated that in the records of the executive office there is nothing to show when the road was begun, the progress of its construction, or the date of its completion to its present terminus at Troy, and no evidence that the company ever executed a bond "to faithfully use said lands for the purpose of its donation and abide by and perform the provisions and conditions" of the act of the general assembly approved February 1, 1858, or that the governor ever certified to the Secretary of the Interior the completion of any twenty continuous miles of the road.

In June, 1857 (9 Opinions, 41), Mr. Attorney-General Black expressed the opinion that grants to States, similar to the grant in question, vested in the States a fee simple title to the granted lands without a patent; that the definite location of the road would locate the grant, and that lists of lands embraced in the grant might be furnished for information just as any other information would be given from the records of this Department, but that such lists would have no influence on the title.

It is to be presumed, and is, I believe, a matter of fact, that the lists of lands within the limits of railroad grants which in 1860, and prior thereto, were certified to States, as in the present instance, were so certified under the opinion of the Attorney-General as information from the records of this office, and that the same did not purport to convey the title. Whatever title the State had was derived from the granting act and was subject to its provisions, conditions, and limitations. The lists defined the lands which were supposed to be subject to the operation of the grant, leaving the question of the title to the described lands where it was left by the statute, and as it would have remained if no lists had been certified, and as it did remain after as well as before such certification.

This I conclude to be the fact as to lands certified within granted limits. As to the lands embraced within indemnity limits which were certified to the State in advance of the construction of the road, and before any right of indemnity selection had been acquired, and to which no such right has ever been acquired, the question arises whether under the act of Congress of August 3, 1854 (section 2449 Rev. Stat.), said certifications were not wholly without legal force or effect.

In any event it would appear that whatever title the State might have had, or might claim, to any of the lands described in the certified lists, whether such lands were within the originally granted, or the indemnity limits, was subject to the forfeiture provision of the granting act after June 3, 1866.

Subsequent to that period application was made to this office for copies of the originally certified lists, which were furnished under date of November 29, 1870, coupled with a statement from the Commissioner that the title to the described lands had lapsed to the United States because of the non-completion of the road.

By the act of the legislature of the State, approved February 10, 1876, the governor was authorized and required to transmit to the proper railroad companies the lists of all lands certified from time to time by the Commissioner of the General Land Office, and to indorse on the same his approval, and it was provided that the lists so indorsed should operate as a conveyance to the railroad companies, respectively, of all the right, title, and interest the State may have derived under the act of Congress of June 3, 1856.

It appears from a printed statement purporting to be a memorial to Congress by the Mobile and Girard Railroad Company, a copy of which has unofficially been furnished me and is herewith inclosed, that on December 3, 1879, the governor of Alabama indorsed over to said company the lists of lands certified to the State in 1860 and 1861, as hereinbefore recited. It is to be presumed that the certified copies obtained in 1870 were the lists mentioned as having been so indorsed.

It is stated in this memorial that the company disposed of about 96,000 acres of the land "in payment of services to commissioners and agents in selecting said lands and obtaining certificates for the same."

Mr. Glover reports the result of his investigations into this transaction, by which it appears that on April 25, 1868, the Mobile and Girard Railroad Company entered into a contract with Abraham Edwards, then register of the United States land office at Montgomery, by which the company agreed to convey to said Edwards an amount of land equal to 10 per cent. of all such land as should be acquired by the railroad company; that on June 24, 1868, the company conveyed to said Edwards one undivided tenth part of the lands that had been certified to the State, but which had not then been indorsed over to the company; that by a resolution of the board of directors, passed October 31, 1868, the railroad company agreed to convey to said Edwards 5 per cent. additional of all such lands for which the said Edwards should secure patents to the company; that on January 21, 1871, and after certified copies of the original lists had been obtained from the General Land Office, a partition was made of the lands, and three-twentieths thereof, amounting to 96,476 acres, were selected and conveyed to Edwards by deed from the company, he relinquishing the undivided one-tenth previously conveyed. It also appears that John A. Pickersgill, of New York, and Thomas Ewing, of Ohio, were parties in some interest with Edwards in this transaction. These facts, Mr. Glover states, are matters of record.

It would appear from this recital that the 96,476 acres reported by the company as having been disposed of "in payment of services to commissioners and agents in selecting said lands and obtaining certificates for same," were so disposed of without legitimate purpose. The selection of the lands for certification by the Commissioner of the General Land Office was made prior to 1861, and hence it is apparent that the comparatively small expense attending such selection could not have been an element in the consideration for which this deed was given. The only "selection" to which some expense to the company may have been involved must have been the selection made by the "commissioners" or "arbitrators" who made the partition above referred to, while the "services" contracted for by the company and satisfied by the deed of 96,476 acres of land, would appear to have been of an imaginary character. I conclude that the conveyance of said 96,476 acres did not amount to a *bona fide* disposal of the lands.

The company further set forth that they have sold to sundry parties about 164,000 acres more of the land, of which 116,000 acres were sold at less than 5 cents per acre, which the company say was its full value.

It was stated by Mr. Glover in the paper transmitted to me by you relative to his appointment as special agent, that a considerable purchaser from the company was, and for some time had been, engaged in cutting timber from the lands, and using the same in the construction of railroads in Georgia.

If such cutting and removal have taken place on the 116,000 acres referred to, it is presumable that whatever may be the value of the land for agricultural purposes, it must have an additional and considerable value for the timber upon it. A sale of available timber lands at 5 cents per acre could hardly, I suppose, be held to be a *bona fide* sale.

But whatever the facts may have been in respect to these attempted conveyances by the railroad company, the parties assuming to derive under the company's claim of title had knowledge of the defective character of that claim, and cannot therefore be regarded as innocent purchasers.

I am not advised whether the company now operating this road, and which is presumed to have constructed that portion of the line between Union Springs and Troy, is or is not the same company that built the road from Girard to Union Springs; nor am I advised of the terms upon which the present company, if different from the former one, acquired the property and franchises of the original corporation, nor whether the price paid would indicate that the contingent expectation of coming into the possession of the forfeited land grant was or was not a consideration in the case.

But it is shown that no apparent title to any of the lands was acquired by any corporation until 1879, and I do not know upon what ground it could be assumed that the State then had authority to transfer this grant.

There can be no doubt, I think, that any disposal of the land by the State, except as authorized by the act of Congress making the grant, was illegal and void, and conferred no rights upon the assignees of the State.

As previously stated, the total amount of land that could be claimed as inuring to the State by virtue of the actual construction of the road from Girard to Troy, is 21,723.31 acres. Whether or not the legal title to this land should be sought to be recovered to the United States, would, I suppose, be a proper subject for legislative consideration.

The legal title to the remainder of the lands described in the certified lists, amounting to 482,422 acres, should, I think, be recovered by judicial proceedings, which may doubtless be instituted to enforce the forfeiture of the granted lands, and to vacate the title, if any, that passed by the erroneous certifications of lands within indemnity limits.

I respectfully recommend proper action to this end. Should this view meet with your concurrence, the necessary description of the lands embraced in the certified lists will be furnished whenever the same may be desired.

The following papers are inclosed herewith:

1. Mr. Glover's report, with accompanying papers.
2. Memorial of the Mobile and Girard Railroad Company.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Hon. S. J. KIRKWOOD,
Secretary of the Interior.

F.

VICKSBURG, SHREVEPORT AND TEXAS RAILROAD, EXHIBITS F, G, H.

WASHINGTON, D. C., *February* 20, 1882.

SIR: Inasmuch as the House of Representatives has recently called upon you by resolution for information relative to the progress of construction and other facts regarding certain railroad land grants, and it is understood to be your desire and intention to respond to said resolution by giving a full and detailed report of all the facts and statistics falling within the scope thereof, I have the honor to file herewith the affidavits of Francis P. Stubbs, of Monroe, La., and F. Y. Dabney, chief engineer, showing the progress of the work of construction and the reasons which have operated to prevent the construction of the road known as the Vicksburg, Shreveport and Pacific Railroad of Louisiana, viz: The affidavit of Francis P. Stubbs shows that that portion of the road lying between Red River (at Shreveport) and the Texas State line, a distance of 20 miles, and that portion lying between Vicksburg and Monroe, a distance of 74 miles, had been built prior to the commencement of the late civil war (1861); that the eastern division of the road was almost entirely destroyed by the hostile armies in the year 1863, and has been rebuilt since the close of the war; that after the close of the war, in 1866, an owner of four of the first-mortgage bonds of the road successfully succeeded, under a decree of the State courts, in obtaining control of the road and its franchises, whereupon an action in chancery was commenced in the United States circuit court of Louisiana to annul this sale, which action finally resulted in the setting aside the action of the State courts, and the sale of the road to its present owners in 1880, under a decree of the Supreme Court of the United States; that this litigation absolutely destroyed the credit of the road and its ability to raise money to continue the work of construction; that the new company, on coming into possession, immediately commenced building the unconstructed portion of the road, and the work of construction is now progressing with great energy.

The affidavit of F. Y. Dabney, chief engineer and superintendent, showing that the unfinished portion of the road is being built as rapidly as men and money can accomplish that result, and that an iron bridge over the Ouachita River costing upwards of $150,000 has been built in the past few months.

There are other important facts to which I desire to invite your attention, viz:

By the construction of 94 miles of road this company earned 360,960 acres of land, of which amount it has received title for 353,212 acres, leaving a balance due and uncertified of 7,748 acres.

An examination of the records of your office relating to the lands throughout the entire limits of this grant has been made within the past three months under my immediate supervision, and the uncontrovertible fact is revealed that there now remains of vacant unappropriated lands subject to selection in satisfaction of this grant, in both 6 and 15 mile limits, but 20,632.30 acres.

If the 7,748 acres earned and not listed be deducted from this 20,632.30 acres of vacant lands, the remainder, 12,904.30 acres, will be found to truthfully represent the whole amount of lands subject to forfeiture for failure of the company to complete its road within ten years from the date of the granting act.

I invite your especial attention to these facts, as they refute the false and malicious statements which have been made that hundreds of thousands of acres of land were withdrawn from market under this railroad grant.

Very respectfully,

M. D. BRAINARD,
Attorney for V., S. and P. R. R. Co.

Hon. N. C. McFARLAND,
Commissioner General Land Office.

G.

STATE OF LOUISIANA,
Ouachita Parish:

Before me, Julius Ennemoser, United States commissioner for the western district of Louisiana, duly qualified commissioner and sworn, on this the 17th of January, A. D. 1882, personally came and appeared before me Francis P. Stubbs, a citizen of said parish and State, and to me well known, who, having been duly sworn by me, deposes and says:

He has been a resident of said parish and State for more than thirty years last past. That he was one of the original stockholders of the Vicksburg, Shreveport and Texas Railroad Company, organized in the year 1853, for the purpose of constructing a railroad from a point opposite Vicksburg, on the Mississippi River, westward through the parishes of Ouachita and Caddo, to the Texas State line. That he was elected a director in said corporation in the year 1858, and served as such until his resignation in 1863.

That the said company, at the commencement of the war between the States, had constructed that portion of their line extending from the Mississippi River to Monroe, on the Ouachita, called the Eastern Division—had in 1863 nearly completed the Western Division, the portion comprised between the Red River and the Texas State line, altogether about ninety-four miles, and had done some work on the Middle Division, that comprised between the Ouachita and the Red Rivers.

That this work was done with means obtained from the stock subscribed, but principally with the proceeds of the first-mortgage bonds of the company, secured by a mortgage executed upon the railroad, its property, rights, and franchises, and the lands donated to through the State of Louisiana by the United States Government, as per act approved June 3, 1856, to the railroad company. That many of these bonds were sold, the entire proceeds thereof, between seven and eight hundred thousand dollars, used in the construction of the road.

That in 1863 that portion of the road between the Mississippi and Ouachita Rivers exposed to the devastating overflows incident to the destruction of the levee system—the prey to ceaseless and successive efforts on the part of the Federal as well as the Confederate armies under special orders from their commanding officers—was almost totally destroyed, and the wonderfully prosperous country through which it ran became a barren wilderness, which was not improved during the continuance of the war. Its destruction by the armies of both contending parties was full and complete.

That in 1866, shortly after the close of hostilities, an owner of a few (4) of the first-mortgage bonds obtained from the State courts an order of seizure and sale for the whole debt against the whole property, and at sheriff's sale the property was adjudicated to the plaintiff and six other gentlemen associated with him for the price of fifty thousand dollars. The property so adjudicated included all the lands donated by the United States to aid in building the railroad, estimated then to be about (400,000) four hundred thousand acres.

The purchasers at this sale took possession and control of the property, and being organized into the North Louisiana and Texas R. R. Co. by the legislature of Louisiana, proceeded to rebuild that portion of the road which had been destroyed as aforesaid.

A large majority of the holders of the mortgage bonds refused to acquiesce in this sale and the actions of the purchasers, and an action in chancery was brought in the United States circuit court for Louisiana to annul the sale made by the authorities.

This suit of Henry R. Jackson *et al. vs.* V., S. & T. R. R. Co., Ladeling, and others had also for its object and purpose a foreclosure of the mortgage.

The litigation absolutely destroyed the ability of the new organization, the North Louisiana and Texas R. R. Co., to raise, by the means ordinarily resorted to, the funds necessary to rebuild and furnish the road, and in consequence of the litigation the work of finishing [the] road [was] suspended until the final termination of the same adverse to the claims of the purchasers—the North Louisiana and Texas R. R. Co.—and in December, 1879, the V., S. & T. R. R. Co., all its rights, privileges, and franchises, with its lands, right of way, &c., especially including the lands derived from the United States and specially included in the mortgage, was sold under a decree of the Supreme Court of the United States permitting it, was purchased by a committee of and representing the holders of the original first-mortgage bonds, as above described.

This committee, acting for their constituents, under the laws of Louisiana, organized the present company, investing it with all its property, rights, franchises, land, &c.

Thus the Vicksburg, Shreveport and Pacific Railroad Company, the present organization, derived its right to own and control the property, and its corresponding duty of building and furnishing the road, long delayed by no fault of the original corporation, or of the holders of its securities, or those who now own it, under the final settlement of the wasting proceeding in chancery.

Immediately on coming into possession, the present company entered actively the work of finishing the railroad in accordance with the original purpose of its projectors, and now, with the eastern [and] western divisions in successful operation, the company is actively engaged in building the unfinished portions of the line, many contractors are in the field, and the times and conditions of the contracts require, under heavy penalties, the completion within the current year.

[That] the utmost energy will to complete the work is manifest by the management. Coupled with the undoubted ability of the company, financially, the public now feel little doubt of the final completion in the early future.

Affiant states further that the facts above set forth are within his personal knowledge, he having been in some capacity connected with the organization having for their object the building of the railroad ever since its inception.

All of which affiant swears to the best of his knowledge and belief.

FRANK P. STUBBS,

Sworn and subscribed before me this 17th January, 1882.

JULIUS ENNEMOSER,
U. S. Commissoiner, West District Louisiana.

DISTRICT OF COLUMBIA,
County of Washington:

W. A. Smith, being duly sworn, on oath says that the foregoing is a correct copy of the original affidavit of Frank P. Stubbs.

W. A. SMITH.

Sworn and subscribed to before me this 16th day of February, 1882.

[SEAL.] F. M. HEATON,
Notary Public.

H.

STATE OF LOUISIANA,
Ouachita Parish:

Before me, Justice Ennemoser, United States commissioner for the western district of Louisiana, duly qualified, commissioned and sworn, on this the 18th day of January, A. D. 1882, personally came and appeared F. Y. Dabney, a resident of said parish and State, and to me well known, who, having been duly sworn by me, deposes and says:

That he is the chief engineer and superintendent of the Vicksburg, Shreveport and Pacific Railroad, and has been filling that position since the first of July last past; that previously to that time and since January, 1880, he was in the service of said railroad company as engineer; that the present management assumed control of said railroad on the first day of June last, and that the following results have been accomplished by them, looking to a speedy completion of the unfinished portion of the line between the town of Monroe and the city of Shreveport, a distance of ninety-five and a half miles by the line of survey:

First. That the eastern half of this gap, extending from Monroe to Arcadia, about forty-eight miles, has already been put under contract—one firm having recently taken

the entire work of graduation, bridging, and cross-ties for that distance. That about 2,300,000 cubic yards of earthwork are involved in this contract—145,000 cross-ties, and over 10,000 linear feet of bridging. That the contractors are under pledge (with heavy forfeit in case of failure) to complete it, as follows:

The first 12 miles out of Monroe, by or before July 30, 1882. The second 12 miles out from Monroe, by or before August 30, 1882. The third 12 miles out from Monroe, by or before Sept. 30, 1882. And the fourth and last 12 miles out from Monroe, by or before October 30, 1882. That work on this division was commenced about the first instant; that clearing and grading forces are being distributed gradually over the entire distances; that cross-tie cutters are at work, and that he is safe in asserting that the whole will be pushed as rapidly as the seasons will permit.

Second. That on the western half of the gap, extending from Arcadia to Shreveport, a distance of forty-seven and a half miles, the final location of the route was finished in the early part of last month (December), since which time he has had several of his assistants busily engaged in working up the profiles and estimates of that portion of the line, preparatory to letting it out by contract; that this work has been unusually hurried, in response to repeated letters and telegrams from the consulting engineer of their railroad system at Cincinnati, urging the necessity for haste in order to put the work under contract as soon as possible; that all the calculations of estimates and preparation of profiles were finished on the 16 inst., and have gone forward to Cincinnati; and that he thinks he can safely assert here that it is the company's intention to lose no more time in awarding a contract for this second division of the "gap" than is absolutely necessary for enabling the newspaper advertisements of the letting to become properly disseminated throughout the country.

Third. That a first-class railroad iron draw-bridge, spanning the Ouachita River at this place (Monroe), has been under construction for 12 months or more past; that it consists of four spans; two spans of about 250 feet each; one (the draw span) of 300 feet, and one of 100 feet; that these spans are supported by solid piers of brick masonry on substantial pile foundations; that the bridge is now approaching completion, and will probably be finished within the next thirty days, and that it will cost about $150,000.

Fourth. That among the most important matters presenting themselves for immediate consideration by the present management on assuming charge of the road was the condition of the roadbed on the operated portion of the line from Delta to Monroe; that out of a total distance between these points of seventy-three (73) miles, about forty (40) miles are inundated annually by the winter and spring rise in the Mississippi River; that the river water, after reaching a certain stage, discharged itself through what is known as "Ashton Crevasse," near the Arkansas line; that this surplus water is conducted by the Bayou Macon, and other intervening streams, upon the line of their road, gradually filling up the swamps and low basins, and eventually overflowing their track; that these overflows involve an almost total suspension of business, and for periods of time varying from one to four months; that so serious an incubus upon the prosperity of the road demanded prompt action, and that the management lost no time in taking the necessary steps for remedying the evil; that a contract was entered into about the first of September last for the raising of the track over this entire distance of forty miles, involving over 700,000 cubic yards of earth and some 6,000 additional feet of bridging, to say nothing of the cost of track-raising.

That although the work may not have been pushed with that vigor which the urgency of the case demanded, it is through no failure on the part of the railroad company, and that it is safe at least to assume that in no event will they be subjected to another overflow after the one which is now threatening has passed.

All of which affiant swears to the best of his knowledge and belief.

F. Y. DABNEY.

Sworn to and subscribed before me this 18th January, A. D. 1882.

[SEAL.] JULIUS ENNEMOSER,
U. S. Commissioner, West Dist. Louisiana.

DISTRICT OF COLUMBIA,
County of Washington:

W. A. Smith, being duly sworn, on oath says that the foregoing is a correct copy of the original affidavit of F. Y. Dabney.

NORTHERN PACIFIC RAILROAD COMPANY.

[Senate Ex. Doc. No. 64, Forty-seventh Congress, first session]

Letter from the Secretary of the Interior, transmitting information in relation to Senate resolution of January 12, 1882, calling for a certain decision of the Commissioner of the General Land Office and the opinion of the Attorney-General relating to the Northern Pacific Railroad Company, &c.

JANUARY 19, 1882.—Referred to the Committee on the Judiciary and ordered to be printed.

DEPARTMENT OF THE INTERIOR,
Washington, January 19, 1882.

SIR: In answer to Senate resolution of the 12th instant, directing me to communicate to the Senate a certain decision of the Commissioner of the General Land Office, a decision of my immediate predecessor, and the opinion of the Attorney-General, all relating to the Northern Pacific Railroad Company, with all papers, orders, correspondence, and memoranda in this Department bearing on the said decisions and opinion; also the number of acres for which patents have been issued to said company or its assigns since the 4th day of July, 1877, I have the honor to transmit herewith the report of the Commissioner of the General Land Office on the subject.

From this report it will be seen that patents for lands in the Olympia district, Washington Territory, were issued on the 8th April, 1880, for 3,016.08 acres opposite a portion of the road constructed by said company previously to 1875. No patents for lands have been issued for the 475 miles of said road constructed, examined, and accepted in 1880 and 1881.

Very respectfully,

S. J. KIRKWOOD,
Secretary.

The honorable the PRESIDENT *pro tempore of the Senate.*

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., January 16, 1882.

SIR: I am in receipt, by reference from the Department on the 13th instant, for report, of Senate resolution passed the 12th instant, as follows:

"*Resolved*, That the Secretary of the Interior be directed to communicate to the Senate the decision of the Commissioner of the General Land Office, declaring the land grant made to the Northern Pacific Railroad Company lapsed under the operation of the law granting the same; and, also, the full text of the decision, order, or instructions of his predecessor, Hon. Carl Schurz, overruling the decision of the Commissioner of the General Land Office and restoring the grant of lands to the Northern Pacific Railroad without reference of the subject to the consideration of Congress; and that he be further directed to communicate all papers, orders, correspondence, and memoranda in his Department touching or relating to the decision of the Commissioner of the Land Office aforesaid, the order of the Secretary of the Interior overruling the same, and the decision of the Secretary of the Interior restoring and confirming to the said Northern Pacific Railroad Company said grant of land, including an opinion of the Attorney-General on the subject; also, the number of acres for which patents have been issued to said company or its assigns since the 4th day of July, 1877."

In accordance with instructions, I have to report as follows:

I know of no decision, in any actual *case* presented by the Commissioner of the General Land Office, declaring the grant to the Northern Pacific Railroad Company lapsed, which has been reversed by the Secretary of the Interior.

I inclose a copy (marked A) of a letter to the register and receiver at Bozeman, Montana Territory, October 12, 1877, by the then Commissioner, stating that the time for the completion of the road, under the grant, expired July 4, 1877, but that, under cited decisions, there was no power in the office to enforce forfeiture. There may have been other letters of similar import.

May 10, 1879, George Gray, esq., attorney for the company, transmitted to your predecessor a map of the amended branch line of the proposed road in Washington Territory and asked that it be accepted by the Department, and the withdrawal of lands adjusted accordingly. The said letter and map were referred to this office for report. The report called for was made May 21, 1879, and Mr. Gray's letter returned therewith to the Department, where it is now on file. A copy of my predecessor's said report is herewith, marked B. It will be observed that it presented to the Secretary the question whether or not the grant in question had lapsed.

June 11, 1879, your predecessor returned, approved, the amended route map with his decision upon the questions involved. In said decision (copy herewith, marked C), the Secretary held that the grant was in full force and effect, fully stating the reasons.

The above recited decision by your predecessor is the only one of which I am aware, touching the lapsing of the grant in question.

I know of no opinion of the Attorney-General in the premises.

A full report, with maps, showing the several lines of road proposed by the company, and the history of the withdrawals for the grant, was made by the Acting Commissioner of this office March 8, 1880, and by your predecessor communicated to the Senate March 12, 1880. (See Senate Ex. Doc. No. 120, 46th Congress, 2d session.)

The only patent issued to the company since July 4, 1877, was dated April 8, 1880, covering 3,016.08 acres in the "granted" limits, Olympia Land District, Washington Territory, opposite a portion of the road constructed previous to 1875.

On October 26, 1880, the Attorney-General rendered an opinion on similar questions relating to the grant to the Atlantic and Pacific Railroad Company. (See Opinions of Attorneys-General, vol. 16, page 572.) (See page 853, herein.)

The copy of the Senate resolution is inclosed.

I am, sir, very respectfully, your obedient servant,

N. C. McFARLAND,
Commissioner.

Hon. S. J. KIRKWOOD,
Secretary of the Interior.

NOTE—See Senate Ex. Doc. No. 120, 2d sess. 46th Cong., "containing information concerning the general lines of location of the Northern Pacific Railroad, the changes in said location, the lands withdrawn under the several locations, and the extent to which the rights of settlers have been affected," with maps.

See also Report of Acting Commissioner of General Land Office, Feb. 11, 1880; Report Commissioner General Land Office, 1880, page 108, on railroad grants lapsed by reason of the non-completion of roads within the time fixed by law.

NORTHERN PACIFIC RAILROAD LANDS, EXHIBITS A, B, C, DECISIONS OF COMMISSIONER OF GENERAL LAND OFFICE AND SECRETARY OF THE INTERIOR.

A.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., October 12, 1877.

REGISTER AND RECEIVER,
Bozeman, Mont.:

GENTLEMEN: I have received your letter of July 14, last, asking whether the odd sections withdrawn from the Northern Pacific Railroad Company are subject to entry, the company having failed to construct its road within the period prescribed by the statute.

By the terms of the grant the time within which the company was required to complete the road expired on the 4th of July last.

The Supreme Court of the United States, however, in the case of Schulenberg *et al. vs.* Harriman, announced that the provision for reversion is a condition subsequent and cannot operate until a declaration of forfeiture, either by some judicial proceeding authorized by law or by legislative assertion of ownership on the part of the Government has been made.

This office, therefore, has no power to enforce a forfeiture of the grant, or restore the lands, and until action of the above character is taken the lands will continue in their present state of reservation.

Very respectfully,

J. A. WILLIAMSON,
Commissioner.

B.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., May 21, 1879.

Hon. C. SCHURZ,
Secretary of the Interior:

SIR: I have received, through reference by you, a letter from George Gray, esq., attorney of the Northern Pacific Railroad Company, dated New York, 10th inst., accompanied by a map representing the amended location of the branch line of said rail-

road in Washington Territory which it is desired be accepted and approved by the Department. You ask for an expression of my views as to whether any reasons exist why the request of Mr. Gray should not be granted. I have the honor to submit the following in reply:

By act of Congress approved July 2, 1864 (13 Stats., 365), a grant of lands was made to the Northern Pacific Railroad Company to aid in the construction of a railroad from a point on Lake Superior, in Wisconsin or Minnesota, to some point on Puget Sound, with a branch, via the valley of the Columbia River, to a point at or near Portland in Oregon.

By joint resolution of May 31, 1870 (16 Stats., 378), the company was authorized to locate and construct its main line to some point on Puget Sound *via the valley of the Columbia River*, with the right to locate and construct its branch from some convenient point on its main trunk line across the Cascade Mountains.

The map of the general route of the main line as filed by the company fixes a point at or near the international boundary on Puget sound as the western terminus.

By a map filed August 15, 1873, the branch line was represented as leaving the main line at a point near Lake Pend D'Oreille, in Idaho Territory, running thence across Washington Territory to a point on Puget Sound.

This map was filed under the sixth section of the act of 1864, as amended by the resolution of 1870, and was considered as a map of *general route*. The odd sections were regularly withdrawn for forty miles on each side of the line of road, and that reservation has never been revoked or changed.

On the 18th November, 1876, this office received, by reference for report from the Department, a letter from W. K. Mendenhall, accompanied by a map showing a desired amendment by the company of the branch line aforesaid.

This map represented the amended line as beginning at Snake River, a tributary of the Columbia, in the southeastern part of Washington Territory, running thence along the Yokama and Nachess Rivers to Tocoma, its present western terminus of the main line, thereby greatly shortening the line as fixed by map previously filed.

On the 22d November I returned the map, with the statement that I could see no objections to the change proposed, it appearing that a very large body of land withdrawn along the first line would be released and opened to settlement, while the tract affected by the amendment would not be so large.

On the 24th November your predecessor, the Honorable Z. Chandler, approved the map and directed this office to prepare the necessary instructions for withdrawing the lands along the new line and restoring those along the old.

Pending the preparation of the maps necessary to give effect to the Secretary's directions, the Honorable Orange Jacobs filed in the Department a motion for a reconsideration of the action of the Secretary, which, with a reply by Mr. Mendenhall, was referred to me for report. Report was made January 17, 1877.

On the 15th October following you reviewed the whole subject and, for reasons fully set forth in your letter to me, declined to disturb the action of your predecessor in approving the map, and directed me to execute the previous instructions.

Accordingly instructions were drawn, but, prior to their receiving my signature, I was directed by the honorable Assistant Attorney-General to suspend action in the premises until further ordered. Meantime the matter has been held in abeyance.

The company has now filed a new map and renewed its request of 1876.

An examination of the map shows a route very different from that represented upon the first amended map, and is, with the exception of a few miles, a new location.

It is a map of general route and was adopted by the company, as shown by certificate of the president thereto attached. Though it is not certified to as having been made from actual survey, I have been informed by officers of the company that the location of the portion of the line through and across the mountains is the result of careful engineering.

The fact that the present location differs from the line as represented upon the map filed by the company in 1876, cannot in my opinion be considered an objection, for it accomplishes the purpose of the change by greatly shortening the length of the branch, and immaterially affects the quantity of lands to be restored to entry.

That the company has the power to change the line of general route, and the Department the authority to recognize the change, is determined by your decision approving the action of Secretary Chandler; but two questions have presented themselves to my mind to which I deem it proper to direct your attention.

1st. Has the grant to the company lapsed by reason of the failure of the company to perform certain acts within the time specified in the granting statutes?

2nd. If it has so lapsed can the Department recognize any acts by the company looking to the initiation of new rights or the enlargement of old ones?

Upon these points I do not desire to express an opinion, preferring to leave them for your consideration. Aside from these possible objections, no new reasons are known why the map should not be accepted, and the previous instructions by the Department carried into effect. On the contrary, I am of opinion that the best inter-

est of the public requires that the desired change should be allowed. At present a very large body of land is withheld from settlement and entry which by the amended line would be released and restored to the Government, whilst the tract that would be required to be withdrawn is not so large by some four million acres.

The communication from Mr. Gray and the map are herewith returned.

Very respectfully, your obedient servant,

J. A. WILLIAMSON,
Commissioner.

C.

DEPARTMENT OF THE INTERIOR,
Washington, June 11th, 1879.

SIR: I have received your letter of the 21st ultimo, returning the letter of George Gray, esq., attorney of the Northern Pacific Railroad Company, dated New York the 10th ultimo, presenting a map of amended location of the general route of the branch line of said railroad in Washington Territory, and requesting that it be accepted and approved by this Department.

The letter of Mr. Gray was referred to you for an expression of your views as to whether any reason existed why his request should not be granted.

In returning the letter, and map accompanying it, you call my attention to two questions, which, I understand, you deem material in determining whether said company has the right now to file this map, and have the same approved, viz:

"1. Has the grant to the company lapsed by reason of the failure of the company to perform certain acts within the time specified in the granting statutes?

"2. If it has so lapsed, can the Department recognize any acts by the company looking to the initiation of new rights or the enlargement of old ones?"

You further state: "Aside from those possible objections no new reasons are known why the map should not be accepted, and the previous instructions by the Department carried into effect. On the contrary, I am of opinion that the best interest of the public requires that the desired change should be allowed. At present a very large body of land is withheld from settlement and entry, which by the amended line would be released and restored to the Government, whilst the tract that would be required to be withdrawn is not so large by some four millions acres."

The previous instructions referred to are those given by my predecessor, dated November 24, 1876, in approving the map of amended location in Washington Territory, then presented by said company.

The first question suggested by you requires an examination of the act of Congress making the grant to said company, and the acts supplementary thereof.

By the eighth section of the act of July 2, 1864 (13 Statutes, 370), it is provided:

"SEC. 8. *And be it further enacted,* That each and every grant, right, and privilege herein are so made and given to, and accepted by said Northern Pacific Railroad Company, upon and subject to the following conditions, namely: That the said company shall commence the work on said road within two years from the approval of this act by the President, and shall complete not less than fifty miles per year, after the second year, and shall construct, equip, furnish, and complete the whole road by the fourth day of July, anno Domini eighteen hundred and seventy-six."

"SEC. 9. *And be it further enacted,* That the United States make the several conditioned grants herein, and that the said Northern Pacific Railroad Company accept the same, upon the further condition that if the said company make any breach of the conditions hereof, and allow the same to continue for upwards of one year, then, in such case, at any time hereafter, the United States, by its Congress, may do any and all acts and things which may be needful and necessary to insure a speedy completion of the said road."

By section 2 of a joint resolution approved May 7, 1866 (14 Statutes, 355), entitled "A resolution extending the time for the completion of the Union Pacific Railway, eastern division," it is provided:

"SEC. 2. *And be it further resolved,* That the time for commencing and completing the Northern Pacific Railroad, and all its several sections, is extended for the term of two years."

By a joint resolution approved July 1, 1868 (15 Statutes, 255), entitled "Joint resolution extending the time for the completion of the Northern Pacific Railroad," it is provided:

"*Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That section eight of an act entitled 'An act granting lands to aid in the construction of a railroad and telegraph line from Lake Superior to Puget Sound, on the Pacific coast,' is hereby so amended as to read as follows: 'That each and every grant, right, and privilege herein, are so made and given to and accepted by said Northern Pacific Railroad Company upon and subject to the following conditions, namely: That the said company shall commence the work on said road within

two years from and after the second day of July, eighteen hundred and sixty-eight, and shall complete not less than one hundred miles per year, after the second year thereafter, and shall construct, equip, furnish, and complete the whole road by the fourth day of July, anno Domini eighteen hundred and seventy-seven.'"

Did the second section of the joint resolution of 1866 extend the time originally provided for the commencement and completion of said road, or did it extend the time provided in section 8 of said act as amended by the joint resolution of 1868?

It will be observed that the joint resolution of 1868 is entitled "Joint resolution extending the time for the completion of the Northern Pacific Railroad." If it be held that the act of 1868 repealed the extension in the act of 1866, then, instead of extending the time, it shortened the time one year, for, by the resolution of 1866, the time for the completion of the road would have been July 4, 1878.

Unless there is a clear repugnancy between statutes *in pari materia* they are to be construed so as to give effect to each. It is also a well settled rule that statutes are not repealed by implication. Numerous cases might be cited in support of this rule.

Can the acts above cited be so interpreted as to give effect to each?

It will be noticed that the amendment of the act of 1868 is an amendment so as to make the original act read as follows: "That each and every grant, right, and privilege herein, are so made and given to and accepted by said Northern and Pacific Railroad Company," etc.

In the case of the Missouri, Kansas, and Texas Railway Company *vs.* the Kansas Pacific Railway Company, decided at the last term of the Supreme Court, the court say, "It is true the act of 1864 enlarged the grant of 1862, but this was done, not by words of a new and an additional grant, but by a change of words in the original act, substituting for those there used words of larger import. This mode was evidently adopted that the grant might be treated as if thus made originally, and therefore, as against the United States, the title of the plaintiff to the enlarged quantity, with the exceptions stated, must be considered as taking effect equally with the title of the less quantity as of the date of the first act."

Applying the rule thus announced, it must be held that said company was to commence work on said road within two years from the second day of July, 1868, and to complete the same on or before the fourth day of July, 1877; and that such must be taken as the terms of the original charter to said company.

With the terms of the charter thus fixed, the joint resolution of 1866 extends the time for the completion of the road until July 4, 1879.

It will be observed, also, that this act, unlike most of the acts making grants to railroad companies, does not provide that at the expiration of the time fixed for the completion of the road the lands granted shall revert to the United States, but does provide "that if the said company make any breach of the conditions hereof, and allow the same to continue for upwards of one year, then, in such case, at any time hereafter, the United States, by its Congress, may do any and all acts and things which may be needful and necessary to insure a speedy completion of said road." (See 9th section.)

It will thus be seen that no proceedings can be taken even by Congress to declare a forfeiture of this grant, if breaches thereof have occurred, until one year after the time fixed for the completion of the road, viz, July 4, 1880.

If this be not the true construction of the various provisions of the acts of Congress in relation to this grant, still, under the rule announced by the Supreme Court in the case of Schulenberg *vs.* Harriman (21 Wallace, 44), it must be held that until Congress does take some steps to declare a forfeiture of said grant the same is in full force and effect.

In the case cited, the court say: "At common law the sovereign could not make an entry in person, and, therefore, an office found was necessary to determine the estate, but, as said by this court in a late case, 'the mode of asserting or of resuming the forfeited grant is subject to the legislative authority of the Government. It may be after judicial investigation, or by taking possession directly under the authority of the Government without these preliminary proceedings." In the present case no action has been taken, either by legislation or judicial proceedings, to enforce a forfeiture of the estate granted by the acts of 1856 and 1864. The title remains, therefore, in the State as completely as it existed on the day when the title by location of the route of the railroad acquired precision and became attached to the adjoining alternate sections." I am not advised that any proceedings have been taken to declare a forfeiture of the grant to this company; and if my views of the law above expressed are correct, the time has not yet arrived when Congress could take any proceedings to declare such a forfeiture; but, in either event, the grant to-day must be held to be the same as it existed on the day when it was made and accepted by the company.

Your second question being predicated upon the first, and involved therein, is unnecessary to answer.

The grant being held to be in full force and effect to-day, I can perceive of no

reason why the amended map should not be filed. The map of the general route originally filed, and the withdrawal made thereon, was for the protection of the company in reserving the tracts of land included therein for it, if the road was built on that line. It was not a map of definite location of the road, and hence the grant did not attach to specific tracts of land.

The right of the company under its grant only attaches to specific tracts upon the definite location of its road.

The company, by its attorney, has filed with me, and the same is herewith transmitted, a relinquishment of all its right and interest in any of the lands first withdrawn on the branch route in Washington Territory. By this relinquishment, as stated by you, a very large quantity of land will be released from the reservation and become subject to disposal under the laws of the United States. The particular route upon which the branch line was to be built in Washington Territory was not specified in the act, and it must, therefore, be considered that Congress intended to leave this selection of the route to the company.

The company, after considerable difficulty, has finally selected a route upon which it deems it to be practicable to build the road provided for by Congress.

The map of amended route is herewith transmitted approved, and you will cause the lands on said route within the limits specified in the granting act to be withdrawn for the benefit of said company, and those on the route heretofore selected to be restored.

No withdrawal having been made on the route indicated on the map filed with and approved by my predecessor November 24, 1876, no further action in relation to said map and route will be taken.

The rights of settlers upon the lands included within the limits of the withdrawal to be made under this amended route must be protected, if settlements and entries be made before the receipt of notice of withdrawal at the local office.

Very respectfully,

C. SCHURZ,
Secretary.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

[House Ex. Doc., No. 63, Forty-seventh Congress, first session.]

LAND GRANT OF THE NORTHERN PACIFIC RAILROAD.

Letter from the Secretary of the Interior, in answer to the resolution of the House of January 30, relative to the action of the Interior Department and General Land Office as to the land grant to the Northern Pacific Railroad Company.

FEBRUARY 4, 1882.—Referred to the Committee on Pacific Railroads and ordered to be printed.

DEPARTMENT OF THE INTERIOR,
Washington, February 2, 1882.

SIR: In answer to resolution of the House of Representatives of the 30th ultimo, calling for information as to the action of this Department and the General Land Office as to the land grant to the Northern Pacific Railroad Company, I have the honor to transmit herewith the report of the Commissioner of the General Land Office on the subject, under date of the 1st instant.

Very respectfully,

S. J. KIRKWOOD,
Secretary.

The honorable the SPEAKER
of the House of Representatives.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., February 1, 1882.

SIR: I am in receipt, by reference from the Department, on the 31st ultimo, for report, of a resolution passed by the House of Representatives on the 30th ultimo, as follows:

"*Resolved*, That the Secretary of the Interior be requested to communicate to this House the decision of the Commissioner of the General Land Office declaring the land grant made to the Northern Pacific Railroad lapsed under the operation of the law granting the same; and also the full text of the decision, order, or instructions of his predecessor, Hon. Carl Schurz, overruling the decision of the Commissioner of the

General Land Office, and restoring the grant of lands to the Northern Pacific Railroad without reference of the subject to the consideration of Congress. And that he be further requested to communicate all papers, orders, correspondence, and memoranda in his Department touching or relating to the decision of the Commissioner of the General Land Office aforesaid, the order of the Secretary of the Interior overruling the same, and the decision of the Secretary of the Interior restoring and confirming to the said Northern Pacific Railroad Company the said grant of land to it."

Under date 16th ultimo I had the honor to make a report to you upon a Senate resolution, passed the 12th ultimo, to the same effect and in words almost identical with that now under consideration. My said report was by you communicated to the Senate on the 19th ultimo, and is printed in Senate Ex. Doc. No. 64, present session.

Inasmuch as the information called for is fully given therein, I inclose herewith a copy of the Senate executive document above referred to, deeming it unnecessary to consume the time of clerks or delay this report in making written copies of the same papers.

The House resolution referred by you is herewith returned.

I am, sir, very respectfully, your obedient servant,

N. C. McFARLAND,
Commissioner.

[See S. Ex. Doc. 64, first session, Forty-seventh Congress, page 874, herein.]

Hon. S. J. KIRKWOOD,
Secretary of the Interior.

[House Report No. 1283, Forty-seventh Congress, first session.]

NORTHERN PACIFIC RAILROAD LAND GRANTS.

REPORTS OF CONGRESSIONAL COMMITTEES.

JUNE 6, 1882.—Ordered to be printed.

Mr. T. B. REED, of Maine, from the Committee on the Judiciary, submitted the following report:

The Committee on the Judiciary, to whom were referred sundry bills relating to land grants to railroads, have had the same under consideration, and report, as to the Northern Pacific Railroad, as follows.

The Northern Pacific Railroad Company derives its chartered rights from the act of July 2, 1864 (13 Statutes, 365). The road is to be constructed from a point on Lake Superior to Puget Sound, with a branch, *via* the valley of the Columbia, to a point at or near Portland, Oreg. Twenty alternate odd-numbered sections per mile on each side of the road in Territories and ten in States were granted to the company, with a right under that and subsequent statutes to make up out of a twenty-mile limit on either side all losses arising from prior disposal by the United States of lands the company would have otherwise been entitled to.

By the terms of the original act the road should have been completed July 4, 1876. By joint resolutions approved May 7, 1866 (14 Stat., 355), and July 1, 1868 (15 Stat., 255), such changes were made as to time of completion that the Secretary of the Interior, June 11, 1879, held that the effect of them was to require the completion of the road July 4, 1879. Whether this was the exact date or not, it is sufficient to say that the time for completion has now expired beyond question. Eleven hundred and eighty miles of the road have been completed. On the western side it is finished from Puget Sound to the western boundary of Montana, and on the eastern side from Lake Superior to the crossing of the Big Horn, in Montana. About 600 miles remain to be built. These figures we understand to refer to the main line.

Under the provisions of section 3 of the act of July 2, 1864, the land was granted; under those of sections 8 and 9 the conditions were imposed.

The important granting words of section 3 are as follows:

"SEC. 3. *And be it further enacted*, That there be, and hereby is, granted to the Northern Pacific Railroad Company * * * * every alternate section of public land," &c.

The conditions are as follows, in full:

"SEC. 8. That each and every grant, right, and privilege herein are so made and given to and accepted by said Northern Pacific Railroad Company upon and subject

to the following conditions, namely: That the said company shall commence the work on said road within two years from the approval of this act by the President, and shall complete not less than fifty miles per year after the second year, and shall construct, equip, furnish, and complete the whole road by the 4th day of July, anno Domini 1876.

"SEC. 9. That the United States make the several conditioned grants herein, and that the said Northern Pacific Railroad Company accept the same, upon the further condition that if the said company make any breach of the conditions hereof and allow the same to continue for upwards of one year, then, in such case, at any time hereafter, the United States, by its Congress, may do any and all acts and things which may be needful and necessary to insure a speedy completion of the said road."

Upon this state of facts your committee are called upon to state their opinion as to the legal rights of the United States, and to advise what legislative action, if any, ought to be taken.

The legal effect of the sections as quoted above is to make a present grant to the company of the lands in question, subject to the provisions and conditions stated in sections 8 and 9. The sections taken together vest in the company an estate upon condition subsequent. If section 9 had not been enacted, it would be quite clear that the estate of the company would have been determinable at the pleasure of the United States on the happening of any one of three things: 1st, a failure to begin the road in two years; 2d, a failure in any one year to build fifty miles; and, 3d, a failure in ten years to build, equip, and complete the whole road. To secure this right of forfeiture it was not necessary to mention it in the act. The words "upon condition" were the only words needed. They are as potent as if the words had been added, "and if these conditions are not fulfilled the land shall revert to the United States." But the severity of the words in section 8 Congress had a perfect right to modify. It had a right to say just what should be the effect of a breach of the conditions of the grant. It could rest its reserved rights on the words "upon condition," and then the legal effect would be to retain the right of revertiter, or it could claim that right in so many words, as was done in all the railroad grants made to States. Instead of either of these things, Congress enacted section 9, limiting and defining the effect of a breach of the conditions named in section 8. By that limitation the sole right which remains in the United States at the present time is the right, "by its Congress, to do any and all acts which may be needful and necessary to insure the speedy completion of the road." Of course this still leaves to Congress a wide range of power, but its power is necessarily subordinate to the speedy completion of the road. If Congress deems the forfeiture of the lands needed for the speedy completion of the road it would have a right so to forfeit the lands. It might give them to another company, sell them, and apply the proceeds, provided it adjudged such a course "needful and necessary to secure the speedy completion of the road."

The purposes and intention of Congress in passing the act of July 2, 1864, appear throughout all the act to be the speedy completion of the road. Every provision has that in view. All the limitations and conditions are to that end, and the limitations of time had that purpose only. Even the right to amend and repeal is subject to the same controlling desire.

Section 20 reads as follows:

"SEC. 20. *And be it further enacted*, That the better to accomplish the object of this act, namely, to promote the public interest and welfare by the construction of said railroad and telegraph line, and keeping the same in working order, and to secure to the Government at all times (but particularly in time of war) the use and benefits of the same for postal, military, and other purposes, Congress may, at any time, having due regard for the rights of said Northern Pacific Railroad Company, add to, alter, amend, or repeal this act."

The United States did not want back its lands. It wanted a great public thoroughfare across the continent, and it took every precaution to insure its completion.

The remaining question, therefore, for us to consider is, "what is needful and necessary to insure the speedy completion of the road?"

As has already been stated, 1,180 miles of the road have been completed; 600 or less remain. Work is going on at both interior termini and on the tunnels in the heart of Montana. It appears that 150 miles were approved by President Hayes in 1880, and 325 miles by President Arthur last year. The company assert that by September, 1883, they will finish the road; that they are progressing as fast as can possibly be done. No testimony or suggestion to the contrary has been made by any one. Your committee do not see how the transfer of the lands to another company could hasten the completion of the road, nor would it be regarded as advisable for the Government to complete the road by its own direct action. Congress would hardly regard either course as needful and necessary to insure the speedy completion of the road.

We can conceive of no legislation which would hasten the completion of the road, and therefore recommend none.

[House Report 1283, Part 2, Forty-seventh Congress, first session.]

NORTHERN PACIFIC RAILROAD LAND GRANT.

July 24, 1882.—Ordered to be printed.

Mr. LEWIS E. PAYSON, of Illinois, from the Committee on the Judiciary, submitted the following as the views of the minority:

Unable to agree with the majority of the committee in its conclusions as to the legal rights of the United States as to the land grant in aid of this railroad, we submit our views.

Two questions are presented under the bill before us.

1st. Is there the right of forfeiture as to all unpatented lands within the limits of the grant to this road, so that the United States may revest itself with the title thereto, as in its former estate, by declaration of forfeiture? and

2d. If the right of such forfeiture is found to exist, is it policy to exercise it?

Of course the first question is purely a legal one, and, if determined in the negative, renders absolutely unnecessary any inquiry as to the second.

The eminent counsel for the railroad company have, in the elaborate briefs filed with the committee, as well as in their oral arguments before it, assumed that by the acts of Congress making the grant and the acts amendatory thereto the title to all these lands was absolute in the company; that because no power was reserved to Congress in express terms to declare a forfeiture for breach of the condition as to the time of the completion of the road, therefore no such power exists; and they also insist that, in any event, by the provisions of the ninth section of the act of July 2, 1864, the grant is irrevocably pledged to the construction of this particular road, and that by that section of the act Congress has restricted its right and power to this: that the land or its proceeds must be appropriated to the completion of the road, irrespective of the time required for its completion.

This latter view the majority of the committee adopt, and, while not assenting to the views of the company as to the necessity of an express reservation in the granting act of the right to declare a forfeiture, yet hold that—

"By that limitation (section 9) the *sole* right which remains in the United States at the present time is the right by its Congress to do any and all acts which may be needful and necessary to insure the speedy completion of the road. * * * All the limitations and conditions are to that end."

And conclude:

"We can conceive of no legislation which would hasten the completion of the road, and therefore recommend none."

The minority do not agree with these views; we assert that the power to declare an absolute forfeiture of this land grant is in Congress, and that the question of the policy of action to that end should be considered and be decided after a careful examination of existing conditions as well as past transactions, and with a broad and liberal view of what has been done under the disadvantageous surroundings of the promoting, constructing, and equipping a railroad through the unimproved section of the country traversed by this road.

The questions are important, involving the title to upwards of 39,900,000 acres of land, estimated by the company to be worth $2.50 per acre, or $99,750,000. (Report of Commissioner of Railroads, 1881, p. 185.)

The legislation necessary to be noticed is as follows:

The act incorporating the company and making the grant was passed July 2, 1864 (13 Stat., 365), sections 3, 8, 9, and 20 being the only ones deemed essential to be noticed in this inquiry, and they are as follows:

"SEC. 3. *And be it further enacted*, That there be, and hereby is, granted to the Northern Pacific Railroad Company, its successors and assigns, for the purpose of aiding in the construction of said railroad and telegraph line to the Pacific coast, and to secure the safe and speedy transportation of the mails, troops, munitions of war, and public stores over the route of said line of railway, every alternate section of public lands, not mineral, designated by odd numbers, to the amount of 20 alternate sections per mile, on each side of said railroad line, as said company may adopt, through the Territories of the United States, and 10 alternate sections of land per mile on each side of said railroad whenever it passes through any State. * * *

"SEC. 8. That each and every grant, right, and privilege herein are so made and given to and accepted by said Northern Pacific Railroad Company upon and subject to the following conditions, namely: That the said company shall commence the work on said road within two years from the approval of this act by the President, and shall

complete not less than 50 miles per year, and shall construct, equip, furnish, and complete the whole road by the 4th day of July, 1876.

"SEC. 9. That the United States make the several conditioned grants herein, and that the said Northern Pacific Railroad Company accept the same, upon the further condition that if the said company make any breach of condition hereof and allow the same to continue for upward of one year, then in such case, at any time hereafter, the United States by its Congress may do any and all acts and things which may be needful and necessary to insure a speedy completion of the said road.

"SEC. 20. *And be it further enacted*, That the better to accomplish the objects of this act, namely, to promote the public interest and welfare by the construction of said railroad and telegraph line, and keeping the same in working order, and to secure to the Government at all times (but particularly in time of war) the use and benefits of the same for postal, military, and other purposes, Congress may at any time, having due regard for the rights of said Northern Pacific Railroad Company, add to, alter, amend, or repeal this act."

By joint resolutions of May 7, 1866, and July 1, 1868 (as ruled by the Department), the time of the completion of the road was extended to July 1, 1879; so that absolute default has occurred so far as time is concerned.

It is perfectly clear, under the authorities, that the interest acquired by the company by the act of 1864 to the lands in question was an estate *in præsenti*, with the conditions subsequent created by the eighth and ninth sections of the act. (R. R. Co. *vs.* Smith, 9 Wall., 95; Schulenburg *vs.* Harriman, 21 Wall., 60; Leavenworth, &c., R. R. Co. *vs.* U. S., 92 U. S., 741.)

By the eighth section of the act it was distinctly asserted—

"That *each* and *every* grant, right, and privilege herein are so made and given to and accepted by said Northern Pacific Railroad Company upon and subject to the following conditions, namely, (1) that the said company shall commence the work on said road within two years from the approval of this act by the President; and (2) shall complete not less than 50 miles per year; and (3) shall construct, equip, furnish, and complete the whole road by the 4th day of July, 1876."

These are the conditions of the eighth section of the act. Nothing could be clearer than that upon a default in the performance of either of these conditions the right attached of declaring a forfeiture for the breach by the Government. The right existed independent of any express reservation in the grant. The law gives the right; it follows as an incident to the estate "upon condition subsequent" as fully and absolutely in the grantor as though expressly reserved; indeed, it is believed that no respectable authority can be found which holds that the power to determine, by the grantor, an estate on condition subsequent for breach thereof is strengthened by express reservation of the power.

The majority of the committee concede this, and say:

"To secure this right of forfeiture it was not necessary to mention it in the act; the words 'upon condition' were the only words needed."

It is perfectly clear, then, that to this point in the legislation the position of the company was that of an ordinary grantee of such an estate, one determinable at the pleasure of the grantor on the happening of either of the three contingencies named in the eighth section.

To this the majority of the committee agree with us.

The divergence in opinion between us begins with the introduction of the ninth section. The majority says:

"But the *severity* of the words in section 8 Congress had a perfect right to modify. It had a right to say just what should be the effect of a breach of the conditions of the grant. It could rest its reserved rights on the words 'upon condition,' and then the legal effect would be to retain the right of revertiter, or it could claim the right in so many words. * * * *Instead of either of these things*, Congress enacted section 9, limiting and defining the effect of a breach of the conditions named in section 8. By that limitation *the sole right* which remains in the United States at the present time is the right, by its Congress, to do any and all acts which may be needful and necessary to insure the speedy completion of the road."

Is this conclusion warranted? That is the question to be first considered.

It should be observed that the language of the ninth section is peculiar, viz:

"That the United States make *the several conditional grants herein*, and the said Northern Pacific Railroad Company accept the same upon the *further condition*," &c.

Is it not absolutely certain, leaving no room for interpretation or the entertainment of any doubt, that to this point in the legislation, by breach of any of the conditions named in section 8, *every* right of the company, not only to the land grant, but its very franchises as a corporation, were determinable at the option of the Government, expressed by Congressional action? There is no foundation for even conjecture on this point; the language is explicit, and there is no conflict of authority in the text-books or reports as to the right of revertiter of all rights granted by the act, upon breach of any condition, if forfeiture should be declared by Congress.

So well established is this proposition that it would appear to be an affectation of learning to cite authorities in support of it.

Now, it is insisted that because Congress inserted the provisions of section 9, that "the United States makes the several *conditional grants* herein" (plainly referring to the condition in section 8; there can be no question as to this), "and the said Northern Pacific Railroad Company accept the same" (that is, the grant of land, as well as the franchise and privileges in the act conferred, subject to the conditions named in section 8), "upon the *further condition* that if the company make any breach of conditions hereof and allow the same to continue for upwards of one year, then * * * the United States * * * may do any and all acts which may be needful and necessary to insure a speedy completion of the said road," this was, in express terms, inserted as a *further* condition upon the already "conditional grants" of the act; a condition superadded to those in the eighth section, and, by apt expression in the act, the company accepted the "conditional grants" created by the eighth section, with the additional burden imposed by the "further conditions" of the ninth section.

How can it be pretended that the provisions of the ninth section were intended to "modify the severity of the words in section 8"?

No reference is made in the language of the ninth section to any intention to divest the Government of any rights it had reserved by the provisions of the eighth section by operation of law; indeed, we insist that no language could be used which would more forcibly convey the idea that Congress reserved all rights which it had under the eighth section than by using the expression that it did in the ninth section, that "the conditional grants" are made and accepted on the "*further* (additional) condition," &c.

Undoubtedly Congress had the right to "modify the severity of the words in section 8;" equally clear is it that it had the right "to say just what should be the effect of a breach of the condition of the grant." But has Congress "modified the severity of the words of section 8?" *Has it said* just "what the effect of a breach of the condition of the grant" should be? Not a word as to this in express terms. Keeping in mind that to reserve the right of forfeiture it was not necessary to mention it in the act; that all that was needed was to use the expressions that were used, viz, "that every grant, right, and privilege herein are so made and given to and accepted by said Northern Pacific Railroad Company upon and subject to the following condition," and that the right of declaring a forfeiture for breach of condition is not in the least strengthened by an express reservation of the right in the act, if Congress did modify the severity of the words of section 8, the modification must arise from the legal effect of the provisions of section 9, because no express words are used showing such intention, and the modification, if it exists, must be by an interpretation of the ninth section.

The difficulty with the report of the majority is that it assumes this interpretation of the provisions of section 9, that by imposing a *further* condition on the company, viz, giving Congress the right to exercise power in its discretion as to the details of business management of the company, and to say what should or should not be done by the company affecting its methods of advancing the work, &c.—a right that Congress would not have had without such a provision—Congress relinquished and absolutely lost all the rights of declaring a forfeiture for breach of condition which the law gave it, and which rights, as we have seen, were as well preserved by operation of law as though saved by express reservation in the grant.

In other words, the majority assert that because, in express terms, Congress imposed a *further* condition on an already existing "conditional grant," which *further* condition was not inconsistent with the prior conditions and correlative rights and liabilities under them, the imposition of such *further* condition was, in legal effect, an abrogation of all legal rights beneficial to the Government growing out of the *prior* conditions, and the grantee took the estate practically discharged therefrom.

As this is the material portion of the inquiry, let us examine it further.

Under section 8, for a breach of either of the conditions, Congress could determine the estate in the company and revest itself with the granted title, and here its power would end. It could not give direction as to any of the details of the business of the company; it would be powerless to command any act to be done with reference to a speedy completion of the road, or to coerce in any way any action on the part of the company. It was in a position simply of ability to restore itself to its former position, if it chose to exercise its right, leaving the company perfectly free to do as it chose as to either manner or time of completion of the road. Congress assuming that perhaps it might be to the advantage of the Government to have the power, in certain contingencies, to give such direction to the company in any matter that would insure more speedy action on its part in the construction of its road, in case default should continue as to any condition for more than a year, the ninth section was added, not as a substitute for the provisions of section 8, but, as stated in the section, as a *further* condition to the already "conditional grants." This is the only reason which can properly be assigned for inserting section 9.

There is no inconsistency between the two sections.

For breach of either condition of the eighth section a power to declare forfeiture existed. This power might or might not be exercised, in the discretion of Congress.

A mere delay to assert the right would not interfere with the subsequent exercise of it, nor relieve the grant of its conditional character. Nothing is better settled than that *laches* is not imputable to the Government. (See U. S. *vs.* Kirkpatrick 9, Wheat., 720.) The doctrine is reaffirmed in 11 Wheat., 184; 7 Otto, 584; 8 Otto, 489.

If Congress did not choose to assert the right it had, and the default continued for more than a year, then the provisions of section 9 became operative, and *all* the rights growing out of the conditions in both sections were in a condition to be enforced by the Government, at its pleasure.

It could, as it did, extend the time for the performance of the work, the conditions meanwhile being none the less operative on the grant; no one pretending, however, that the mere extension of time relieved the grant of any of the conditions imposed by the original act.

All parts of a statute must be construed together and effect given to all the provisions, if possible. It is never to be presumed that the legislature enacts useless provisions; effect must always be given to every provision of a statute, if that be possible, and in the construction of the grants that interpretation should always be given which strengthens the rights reserved by or for the Government.

The courts have frequently held that these grants are laws as well as conveyances, and that such effect must be given them as will carry out the intent of Congress. (Mo. R. R. Co., &c., 7 Otto, 491; Hall *vs.* Russell, 11 Otto, 503.) In Leavenworth, &c., R. R. *vs.* U. S. (92 U. S., 740), citing approvingly Dubuque, &c., *vs.* Litchfield (23 Howard, 66), the court say:

"All grants of this description are construed strictly against the grantee."

And further:

"A grant like this should be neither *enlarged by ingenious reasoning* nor diminished by strained construction. If the terms used are plain and unambiguous, there can be no difficulty in interpreting them; if they admit of different meanings, they must be accepted in a sense favorable to the grantor."

"What is not expressly given or follows by necessary implication is withheld."

These views are substantially indorsed by Attorney-General Devens (16 Op. Attorney-General, p. 572), when, in giving a construction to the charter of the Atlantic and Pacific Railroad Company, where the provisions were identical with those being considered here, that officer held, under these two sections, in case of default continued for more than a year, that it would be necessary for the United States to take advantage of such condition by acting under the ninth section, *or* by declaring a forfeiture of the grant by legislative action, *or* by proceeding for enforcing a forfeiture by a judicial proceeding; and he concludes:

"If the United States were disposed to revest in itself or enforce a forfeiture of the lands granted, it would be necessary to take some action indicative of that intention."

Showing that the common-law right of declaring a forfeiture exists, in his judgment.

Nor is the character of the grant changed or the rights of the company enlarged as to the estate granted by the resolution of May 31, 1870, which authorized the issuing of bonds and securing them by mortgage, as that resolution only authorized the pledging of "its *property* and *rights of property* of all kinds and description," &c.

No language is used which in any way changes the legal character of the original grant or makes the estate in the company other than one "on condition subsequent."

Nothing is better settled than that a grantee of such an estate cannot, by any act less than performance, defeat the condition and convert such estate into an absolute fee.

This committee, in its report in the matter of "Title to certain lands in Michigan," No. 1266, asserted the true doctrine on this question, and if further authorities were needed, Foxcroft *vs.* Mallett (4 Howard, 353) would appear decisive.

We conclude, then, on the legal question of power in Congress (and we are only dealing with the abstract legal question now), that it has the right—

1st. To declare the title to all unpatented lands in the grant forfeited, and revest the United States with it, so that it can be restored to the public domain, open to sale and settlement under existing laws, under section 8.

2d. To take any steps it may deem advisable to insure a speedy completion of the road, under section 9.

So much on the questions of power and the legal *status* of the grant.

The first question presented by the bill being answered affirmatively, an examination of the second is necessary, viz, Is it wise and prudent policy to exercise the power to forfeit?

The company has contented itself with resting its case before the committee on the legal arguments against the right of forfeiture.

Of course, the majority being of the opinion that no right of absolute forfeiture exists, the facts, figures, conditions, &c., upon which the question of policy must necessarily be decided have not been presented to the committee, and this report does not assume to deal with aught but the legal aspects of the case. The House will determine the question of policy.

Under the law, as we understand it, we are driven to the conclusion above stated.

M. A. McCOID, *Iowa.*
J. PROCTOR KNOTT, *Kentucky.*
VAN H. MANNING, *Mississippi.*
R. W. TOWNSHEND, *Illinois.*

Mr. J. PROCTOR KNOTT, of Kentucky, submitted the following additional views:

On the 6th day of June last the Committee on the Judiciary submitted to the House a report in relation to the land grant made to the Northern Pacific Railroad Company, asserting as a legal conclusion that

"The sole right which remains in the United States at the present time in respect to the lands granted to that company, is the right, by its Congress, to do such acts as may be needful and necessary to insure the speedy completion of the road," and denying *in toto* the right of the Government to declare the lands forfeited, notwithstanding a breach of the conditions upon which the grant was made, and which are distinctly set out in section 8 of the act from which the company derived its existence and its chartered rights.

From this remarkable conclusion seven out of the fifteen members of the committee dissented, and as the majority deemed it incompatible with their opinion of the law as thus expressed to recommend any action, or even to enter upon an examination of the facts in relation to the grant which had been made to this company, the undersigned prepared a brief statement of their views, deduced from the only data at their command, namely, the report of the Auditor of Railroad Accounts, made in response to a resolution of the House of Representatives and published with the last annual report of the Secretary of the Interior, from which it seemed that, waiving the Government's rights of forfeiture thus far, the probable value of the lands which the company had earned by construction up to the first of January last, would considerably exceed the cost of the entire line for which the subsidy had been granted, and in view of which they recommended the forfeiture of all lands remaining unearned at that date.

After this had been done, the committee, for the better enlightenment of the minority, who had dissented from its views, caused a series of interrogatories to be propounded to the president of the company, whose answers thereto, together with certain suggestions which had not been called for, were read to the committee on the 6th and submitted to the several members in print on the 9th instant. It is to be regretted, however, that notwithstanding this effort to procure them additional light, the members of the minority, to say nothing of the world at large, have been furnished with very little more information than they had before, while the answers themselves exhibit discrepancies with other statements in relation to the same subject which it will be found difficult if not impossible to completely reconcile.

For example: The president of the company, in response to the inquiries proposed by the committee, states the cost of constructing 1,203¼ miles of completed road and 170 miles of finished grade at $51,019,402.99, and estimates the cost of constructing 1,206 miles yet to be built at $42,507,265.87, making $93,526,668.86 for 2,409¼ miles, or $38,815.79 per mile; while the Auditor, in the report above referred to, after having, as he says, "made special inquiry in order to obtain the fullest information," and, as the undersigned understand, from data furnished by the company itself, estimates the entire cost of 2,700 miles at about $75,000.000, or at the rate of $28,000 per mile. After some remarks concerning the work which had already been done, he says:

"The road yet to be constructed and accepted may be stated as follows, with the estimated cost of the same, namely:

Wisconsin division—Montreal River to Thompson Junction, 122 miles, at $20,000 per mile	$3,440,000 00
Missouri Division—Missouri River to Yellowstone River, 217 miles, at $12,000 per mile, including an iron bridge over the Missouri River at Bismarck, the cost of which is estimated at nearly $1,000,000, or about	3,500,000 00
Yellowstone, Rocky Mountain, and Clark's Ford divisions—Yellowstone River to Lake Pend d'Oreille, 820 miles, at $30,000 per mile	24,600,000 00
Pend d'Oreille division—Lake Pend d'Oreille to Columbia River, 209 miles, at $21,500 per mile	4,500,000 00

Columbia River division—Junction of Columbia and Snake Rivers to Portland, 238 miles, at $31,500 per mile	$7,500,000 00
Cascade Mountain division—Junction of Columbia and Snake Rivers to Puget Sound, 219 miles, at $30,000 per mile	6,570,000 00
Pacific division—Portland to Kalama, 40 miles, at $25,000 per mile	1,000,000 00
Total road to be constructed, 1,865 miles, at an estimated average cost of $26,868 per mile, amounting to	50,110,000 00

"The entire road when completed, 2,700 miles, will have cost about seventy-five million dollars, or at the rate of $28,000 per mile." (Report Secretary of Interior, Vol. II, p. 575.)

Notwithstanding that due allowance is made by the Auditor for the million-dollar bridge over the Mississippi River, as well as for those portions of the road of more difficult construction, it will be observed that the discrepancy between these two estimates is $10,815 per mile, or $26,048,732 for the whole line of 2,409¼ miles. Which is nearer correct may possibly be ascertained by a little closer analysis.

In 1874 the company, in its report to the Department of the Interior, made an itemized statement of the amounts it had expended up to that date in surveys, construction, equipment, &c., in which it appears that the actual construction of 530 miles of the road then built had cost $14,446,356.54, and that the "general and incidental expenses during construction" had been $635,454.71, making a total of $15,081,811.25, or $28,456.24 per mile; and this, it will be remembered, was prior to the crash which took place in the fall of 1873, when labor and material commanded higher prices than they have since. But deduct this $15,081,811.25 from the $51,019,402.99 which the president of the company reports as the total amount expended in the construction of 1,203½ miles of completed and 170 miles of graded road, and there will remain $35,937,591.74, from which deduct, say, $2,550,000, probable cost of grading the 170 miles, and there will be left $33,377,591.74 as the cost of the remaining 673½ miles, or $49,558.41 per mile! By referring to the report it will be seen that the total amount expended up to the completion of the first 530 miles was only $21,353,416, or $40,289 per mile, including $1,108,278.05 for surveys (!), $2,728,980.09 for "auxiliary and connecting rail and water lines," $2,434,346.25 for equipment, and $635,454.71 for "general and incidental expenses during construction," whatever that may mean. Yet, if the president's estimate is correct, the simple *construction* of the 673½ miles which have been completed since has cost $9,000 more, mile for mile, and that, too, under far more favorable circumstances so far as the prices of labor and material are concerned. Why this should be so the company has failed to explain, and perhaps cannot explain. Assuming, however, that "the truth lies between the two extremes," the cost would be $33,407.65 per mile—$80,585,732.75 for the whole line of 2,409¼ miles.

To aid in the construction of this road, Congress granted to the company, on certain conditions, 57,920,000 acres of land, of which the Auditor in the report already referred to says, according to the latest estimates, 42,500,000 will be available to the company; and the president, in his answer to the committee, remarks with seemingly some surprise that "the discovery has been made during the present session of Congress that the value of the grant, as a whole, is in the neighborhood of a hundred millions of dollars."

In this, however, the president is mistaken. Whether the value of the grant was ever considered chimerical the undersigned do not know, but the fact that it is worth a hundred million dollars or more was discovered long ago. The Auditor reports that the company has sold, up to June 30, 1880, 2,600,000 acres for $9,000,000, and adds: "The value of the company's lands vested and unvested may be reasonably estimated at $2.50 per acre, so that the lands unsold are worth, say, 39,900,000 at $2.50, $99,750,000"; which would be $108,750,000 for the whole.

That portions of this enormous grant are worthless for any purpose will not be denied, and it is also admitted that its real value will be available to the company only in the future, but, whatever attempts may be made to disparage it, the estimate of the Auditor quoted above is probably lower than the facts would actually justify.

The company has only offered its agricultural lands for sale, withholding its coal and timber lands until the country shall be occupied. Yet, the answers of the president discloses the fact that 3,083,953 acres have been sold for $11,565,466.65, or at an average price of more than $3.75 per acre, and it is not at all improbable that much of the grant now considered worthless may prove to be extremely valuable. The president says: "It is a matter of record that those in charge of the management previous to 1873 had no idea that the extraordinary fertile lands in Dakota, which now form the granary, so to speak, of the Northwest, were other than sterile plains," and the same will doubtless prove true of large portions of the grant yet to be developed.

Some idea of the character of the lands embraced by this grant may be gathered from

the following remarks, to be found in the report of Mr. A. B. Nichols, engineer, made to the Auditor of Railroad Accounts November 1, 1880:

"From the commencement of the company's grant at the western edge of the grant to the Saint Paul and Duluth Railroad Company to about 40 miles west of Brainerd the country is a succession of swamps and low uplands, interspersed with numerous lakes. The swamps are mostly covered with a growth of tamarack, cedar, and spruce, while on the uplands are found white pine, oak, some elm, and various other kinds of wood usual in a forest in the Northern United States.

"From about 40 miles west of Brainerd to about 35 miles east of Fargo the country is prairie, with numerous lakes, patches of swamp, and occasional timber, and much of it good for agricultural purposes. From this latter point westward to the Missouri River stretches the great wheat region, embracing the celebrated valley of the Red River of the North.

"This country is rapidly filling up with settlers, apparently of a good class, the neat, well-painted farm buildings, so noticeable in this region, bearing witness thereto.

"West of the Missouri River, on the portion of road recently accepted by the Government and opened for use, the country is as yet almost uninhabited, and but little of the land surveyed. This region is all open 'plain' country, somewhat more broken and undulating than that between the Red and Missouri Rivers, but the greater portion of it is apparently good wheat land, and will, doubtless, produce good crops, though not, perhaps, so large as in the Red River Valley. Extensive beds of lignite are found on this portion of the road, and extend much farther west, furnishing a fuel available for all domestic purposes. The company are now using this fuel in their locomotives, mixed in equal quantities with other coal.

"On the Pacific division the line from Kalama to Tacoma passes through a well-watered, timbered country, with occasional open prairies. These prairies do not appear to be very rich, but there are, doubtless, lands in the river bottoms good for farming purposes.

"The magnificent timber embraced in the company's grant on this coast must become valuable as soon as communication is opened with the treeless district east of the mountains. At present, as shipments are chiefly made by sea, only those lands bordering on the sound are available.

"The large beds of cretaceous coal lying within the grant must also prove valuable. During the late inspection, the mines at Wilkeson were visited. Owing to an improper system of mining, these mines have not hitherto been successful. The coal lies in large veins, with a dip of about 65°, with the ravine through which the stream runs cutting across the strata, so that every natural facility is afforded for economical working. Some of the veins are said to produce good smith coal, while the coke made from coal mined here (specimens of which were brought away) appears to be of excellent quality.

"On the Pend d'Oreille division, after leaving Ainsworth, the line passes through about 24 miles of open, sandy country, and then enters a treeless, rolling region, with soil of volcanic ash, and covered with a growth of 'bunch grass.' This continues as far as my journey reached—is said to extend to Spokane Falls—and constitutes a portion of the great wheat country of Eastern Washington Territory."

From the foregoing it is by no means difficult to conclude that the coal and timber lands belonging to this grant are, under the peculiar circumstances, immensely more valuable than those adapted to agricultural purposes only; and that, where one acre of the latter may be found to be worth less than $3.70, the price realized by the company for that already sold, several of the former will be found of many times that value. It is not unreasonable, therefore, to suppose that, conceding 30 per cent. of the entire area to be worthless, the ultimate value of the remainder will be sufficient to yield an average price of at least $3 per acre for the entire grant.

Proceeding, then, upon the hypothesis that the data upon which the Auditor of Railroad Accounts made the report above referred to were correct, and that the entire grant shall be confirmed, the result will be as follows:

Value of land grant	$108,750,000
Cost of 2,409½ miles road, at $28,000	67,466,000
Surplus	41,284,000

Or, adopting the extravagant estimates submitted by the president in his response to the committee, the figures will stand thus:

Value of land sold	$11,565,466 65
The residue, 39,416,047 acres, at $2.50	98,540,117 50
	110,105,584 15
Cost of 2,409½ miles of road	93,526,668 86
Surplus	16,578,915 29

Or, taking the mean between the two, the following will result:

Value of lands sold and unsold, estimated as last above	$110,105,584 15
Cost of 2,409½ miles road, at $33,407.65	80,495,732 75
Surplus	29,609,851 40

The undersigned suppose that all that could be asked of the Government in the exercise of the most prodigal generosity would be a sufficient amount of lands to enable the company to construct its road without costing it a single dollar of its own money, and as either of the foregoing hypotheses shows a surplus of many millions more than are necessary for that purpose, it has occurred to them that it might be to the interest of the people of the United States generally to look somewhat after that surplus, whatever it may be.

There is a farther view to be taken of this subject, however. The undersigned have no means of knowing precisely how much land has been *earned* by the company, but estimating it at 30,000,000 acres, and appraising the portion unsold at $2.50 per acre, which the Auditor supposes to be reasonable, and we have the following:

3,083,953 acres sold for	$11,565,466 65
26,916,047 acres unsold, at $2.50	67,290,117 50
Total	78,855,584 15

Or $3,854,584 more than the Auditor's estimate of the entire cost of the company's lines, subsidized and unsubsidized. But when applied to the line as constructed, and to be constructed, namely, 2,409½ miles, the result stands as follows:

Value of lands already earned	$78,855,584 15
Cost of 2,409½ miles, at $28,000	67,466,000 00
Surplus	11,389,584 15

Or, assuming the mean between the estimates of the Auditor and the president of the company, and also the mean between the average price of the lands already sold and the Auditor's estimate of $2.50 per acre, the following will be the result:

Proceeds of lands already sold	$11,565,466 65
26,919,947 acres unsold, at $3.12½	84,100,146 87
Total	95,665,613 52
Cost 2,409½ miles road, at $33,407.65	80,495,732 75
Surplus	15,169,880 77

Or, applying this estimate of the value of the lands earned to the estimated cost of the entire road, as submitted by the president of the company, the figures stand thus:

Value of lands earned as above	$95,665,613 52
Estimated cost of entire road	93,526,668 86
Surplus	2,138,944 66

It is reasonable, therefore, to conclude that this company has already received, and will receive, if only so much land as it has "earned by construction, say to January 1, 1882, shall be patented to it, an amount sufficient to pay for the construction of its entire subsidized line, even upon the estimates furnished by its own chief officer. But in addition to the foregoing considerations the undersigned beg leave to submit, that when the various acts making grants of land to aid in the construction of railroads were passed by Congress, it was the settled belief of those by whom the grants were made that unless the roads were constructed within the time limited in these acts no right to the lands would pass.

This is abundantly shown by the contemporaneous debates; and it requires judicial legislation to establish the doctrine that affirmative action by Congress was necessary to revest the United States with the title to the portions of the public domain thus conditionally granted.

Legally all unpatented lands embraced in this grant belong to the United States freed from all claims of the company, if Congress shall choose to assert that right, and under the rule asserted by the committee in the Ontonagon and Brulé River Railroad case, the undersigned think such action should be taken. While the company may assert equities, it is but one party to the controversy. The people are the other, and their interests are certainly entitled to *some* consideration.

As the law is construed by the Department of Justice and acted upon by the Department of the Interior, in which, however, the undersigned do not concur, unless and until Congress takes some contrary action, the company is entitled to patents for the lands conditionally granted as earned; consequently, declining or neglecting to assert the right of forfeiture is equivalent to making a new grant. This the undersigned are opposed to, and they believe the people are opposed to it. If the proposition were presented of making a new grant of these lands, such as is now claimed by the company, they think it would be almost unanimously rejected by public sentiment.

It may be set down as a certainty not only that this road will be completed by some company without the aid of the lands unearned by construction, but that it will be worth all it may cost, and there are no good reasons yet apparent why the people should pay the cost of its construction and present the company with a colossal fortune besides. They will certainly profit nothing by the additional millions donated, as experience shows that every road which has been subsidized has after completion been operated upon the principle that freight and passengers should be taxed just "what the traffic will bear," and there is no reason to believe that there will be an exception in this instance. So far as they are concerned, therefore, it is simply a question whether the residue of this empire of territory shall be abandoned as a mere act of grace to the company, and a precedent be set for similar action as to other grants which are in like condition as to compliance with the conditions upon which they were made.

Asserting the right of forfeiture is no attack upon any right of the corporation; it is a mere incident to the contract. The lands are the property of the United States, and the undersigned believe that sound policy, as well as the demands of the people, require that the remainder of this vast grant unpatented to this date should be restored to the public domain for occupation by actual settlers under existing laws.

In view of these considerations, the undersigned think it due alike to the House and the country that the subject of this land grant should be fully explored and fairly discussed, and that Congress should take such prompt and decisive action in relation thereto as will do justice to the people as well as to the company. They therefore ask that the accompanying joint resolution be placed upon the calendar and recommend its adoption; and in view of the fact that many millions of [acres of] the most valuable lands, forfeited by non-compliance with the conditions upon which they were granted, are liable, notwithstanding such forfeiture, to slip away from the people forever, simply by reason of non-action and delay, the undersigned would respectfully urge the consideration and passage of said resolution during the present session of Congress.

J. PROCTOR KNOTT, *Kentucky.*
DAVID B. CULBERSON, *Texas.*
R. W. TOWNSHEND, *Illinois.*
VAN H. MANNING, *Mississippi.*

JULY 11, 1882.

I have not verified the figures above, but indorse the final conclusions and recommendations.

L. E. PAYSON, *Illinois.*

I have not sufficient time now to examine the facts connected with this matter; but, that it may come before the House and be considered by this Congress, I concur in wishing the resolution to be put upon the Calendar.

N. J. HAMMOND, *Georgia.*

JULY 21, 1882.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled as follows, That all the lands granted to the Northern Pacific Railroad Company under an act of Congress entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Lake Superior to Puget Sound, on the Pacific coast, by the northern route," approved July 2, 1864, which had not been patented to said company on the 1st day of July, 1882, be, and they are hereby, declared forfeited to the United States by reason of a breach of the conditions upon which said grant was made, and that said lands are hereby restored to the public domain and made subject to sale and settlement under existing laws.

NORTHERN PACIFC RAILROAD COMPANY, TIME OF SELECTION OF INDEMNITY LANDS FOR.

CIRCULAR.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., May 22, 1883.

REGISTERS AND RECEIVERS:

GENTLEMEN: It appears that under certain decisions of this office and the Department a practice has grown up at several district land offices of admitting pre-emption claims or homestead entries for land in sections withdrawn for indemnity under grants to aid in the construction of railroads to remain of record awaiting the final adjustment of the grant when, if the land is not needed in satisfaction thereof, such entries or claims may be perfected.

Under date 17th instant, the honorable Secretary of the Interior decided that he had authority to order withdrawals of lands within the indemnity limits of the grant to the Northern Pacific Railroad Company under the act of Congress approved July 2, 1864 (13 Stat., 365), and the joint resolution of May 31, 1870 (16 Stat., 378), and that the withdrawals for that purpose should be maintained, at least for the present.

In view of the probability that a large proportion of the land in the indemnity limits will be required to satisfy the several grants in which indemnity is provided, it is evident that a continuance of the practice of allowing entries of such lands will result in detriment rather than benefit to settlers, many of whom would find that the lands entered by them were needed to make up the losses within the granted limits. In such an event the settler must either purchase the land at the price fixed by the company or lose his improvements and the benefits of his labor.

In the decision cited, the Secretary says:

"The intention of the legislature, as manifest in these land-grant acts, must in good faith be carried out by the land department. At the same time, the rights and interests of settlers must be regarded, and the policy of the country in respect to speedy settlement of the public lands not unnecessarily restricted.

"I cannot shut my eyes to the fact that vast areas of lands (public but for the right of selection), lying within indemnity limits, are barred to settlement, and that the area of arable lands open to settlement is not great when compared with the increasing demand, and is rapidly diminishing.

"It becomes the somewhat difficult duty of your office and this Department to administer the laws relating to these grants and the public lands, and to the rights of settlers, in such manner as to preserve, as far as possible, the rights and interests of all parties.

"It was clearly the intention of the legislature that within the indemnity limits fixed by the Northern Pacific acts the company should have the opportunity to take lands, acre for acre, for all those lost in place. * * *

"The work of ascertaining what lands in place have been lost to the company ought to go forward as rapidly as possible, and the company be enjoined to make selections in lieu of such lost lands without delay.

"If the company neglects to make its selections, and takes advantage of the withdrawals heretofore made, or that may be made hereafter, to withhold lands within the indemnity limit from the operation of the settlement laws, not actually needed to make good losses they have sustained, it will be the duty of the Department to revoke such order of withdrawal."

The advantage to settlers in awaiting the adjustment of the claims of the railroad companies for indemnity, and the restoration to unconditional entry of the lands withdrawn but not needed for that purpose, over the practice of admitting entries and holding them to await the result of the adjustment of the grants, by which settlers are kept in doubt for an indefinite period, with ultimate loss to many, is too plain for further remark.

The Secretary's decision being applicable to all withdrawals for indemnity purposes under railroad grants, you are directed to refuse applications for lands thus withdrawn, except where the applicant alleges settlement prior to the date of receipt of the order of withdrawal at the local office.

Very respectfully,

L. HARRISON,
Acting Commissioner.

DEPARTMENT OF THE INTERIOR,
May 26, 1883.

Approved.

H. M. TELLER,
Secretary.

NORTHERN PACIFIC RAILROAD COMPANY.

INDEMNITY LANDS.—WISCONSIN AND MINNESOTA.—The indemnity lands within these States must be selected within three months from notice to the railroad. Indemnity for the lands lost within those States must be selected within those States.

DEPARTMENT OF INTERIOR,
Washington, D. C., July 11, 1883.

I call your attention to my letters of May 17 and 28 last, relating to the Northern Pacific land grant, and particularly to the indemnity part of such grant.

In those letters I indicated that the indemnity lands should not be closed to settlement any longer than was necessary to enable the company to make selection of lands in lieu of those lost within the granted limits.

All lands lying within both limits in the States of Wisconsin and Minnesota are now surveyed, and I see no reason why the company should not at once complete its selections within those States.

I therefore direct you to give immediate notice to said company, that all selections must be made in those States within three months from the time you shall give such notice; and that at the end of that time all orders of withdrawals heretofore made of indemnity lands within those States, whether lying within the first or second indemnity limits, will be revoked and set aside and all such lands will be restored to the public domain and opened to settlement under the laws relating to the public lands.

Under the authority conferred and in discharge of the duty imposed upon me by the act, which provides that the selections shall be made under the direction of the Secretary of the Interior, I deem it best to indicate at the outset what, in my opinion, the practice should be in relation to selections. The amount of lands lost within each of the States named should be made up by selections within such State, without regard to quality, if there be sufficient within the indemnity limits for that purpose. I do not think it was the intention of the granting act, nor do I deem it just or equitable to the Government or to the settlers, to permit the company to cull the lands within such limits, leaving portions unselected because they are poor, and then selecting other lands farther along the line, in place of lands lost within the granted limits of those States.

I am aware that, at the expiration of the time herein fixed for a completion of selections, there will remain undetermined a large number of contests involving lands in the granted and indemnity limits, and that new contests will arise growing out of selections and otherwise, and that by reason of such contests the company will not be able to complete its selections within such time as to lands which it shall lose in those contests. As these contests are, from time to time, determined, the company should have an equal right (but not a preference right) with the settlers to select lands within the indemnity limits in those States, although the orders of withdrawal shall at that time have been revoked. And for lands lost in such contests not made up by selections in that way, the company should be allowed to make selections elsewhere within indemnity limits upon the line of said road.

I have thus referred to such matters as I deem it important now to be considered. Necessarily many questions must be reserved until the final adjustment of the grant.

What is herein said will apply to the State of Wisconsin and the land grant therein, only so far as said road is built within that State, and the grant earned.

H. M. TELLER,
Secretary of the Interior.

Hon. N. C. MCFARLAND,
Commissioner General Land Office.

[House Report No. 1803, Forty-seventh Congress, first session.]

TEXAS AND PACIFIC RAILROAD LAND GRANT.

AUGUST 3, 1882.—Referred to the House Calendar and ordered to be printed.

Mr. T. B. REED, of Maine, from the Committee on the Judiciary, submitted the following report, to accompany H. Res. 286.

The Committee on the Judiciary, to whom was referred H. Res. 286, *submit the following report:*

The Texas and Pacific Railroad Company was incorporated under the name of the Texas Pacific by the act of March 3, 1871. By section 1 of that act the route was defined and described as follows:

"From a point at or near Marshall, county of Harrison, State of Texas; thence by the most direct and eligible route, to be determined by said company, near the thirty-

second parallel of north latitude, to a point at or near El Paso; thence by the most direct and eligible route, to be selected by said company, through New Mexico and Arizona, to a point on the Rio Colorado at or near the southeastern boundary of the State of California; thence by the most direct and eligible route to San Diego, Cal., to Ship's Channel, in the bay of San Diego, in the State of California, pursuing in the location thereof, as near as may be, the thirty-second parallel of north latitude."

Section 23 provides—

"That for the purpose of connecting the Texas Pacific Railroad with the city of San Francisco, the Southern Pacific Railroad Company of California is hereby authorized (subject to the laws of California) to construct a line of railroad from a point at or near Tehachapa Pass, by way of Los Angeles, to the Texas Pacific Railroad at or near the Colorado River, with the same rights, grants, and privileges, and subject to the same limitations, restrictions, and conditions, as were granted to said Southern Pacific Railroad Company of California by the act of July 27, 1866."

Section 9 provides for a land grant which, as described by the Secretary of the Interior, Ex. Doc. 144, Forty-seventh Congress, first session, is—

"A grant of every alternate section of public land, not mineral, designated by odd numbers, to the amount of twenty alternate sections per mile on each side of the line as adopted by the company through the Territories of the United States, and ten alternate sections per mile on each side of the line in California. Exception is made of lands sold, reserved, or otherwise disposed of, and lands to which a pre-emption or homestead claim may have attached at the time the line of the road is definitely fixed.

"Indemnity is provided for lands thus lost to the grant out of alternate odd-numbered sections not more than ten miles from the limits of the sections granted. Provision is also made for indemnity for lands lost by reason of the near approach of the line of the road to the boundary of Mexico, and also for mineral lands excluded from the grant out of odd-numbered sections nearest the line of the road."

The same authority estimates the quantity of land embraced in the grant at 14,309,760 acres.

The Texas and Pacific Company was required to commence the construction of its road at San Diego and at Marshall simultaneously, and to complete it in ten years. The act of May 2, 1872 (17 Statuest, 59), extended the time of completion to May 2, 1882, which time at the date of this report has expired.

The Secretary of the Interior further reports that—

"The length of the entire line is estimated at 1,483 miles. Proof of the construction of 181 miles of this road in Texas has been furnished, but no evidence of construction beyond that has reached this office."

The committee are informed that the construction has proceeded much farther in the State of Texas than the last figures indicate, but the exact number of miles is not material, as none of it is west of El Paso, on the Texas line.

To this should be added the fact that at the hearing before the committee it seemed that whatever railroad had been built from San Diego eastward had been built by another company.

This statement shows that the Texas and Pacific have never completed any part of the route for which the land grant was made to them, and have never earned or claimed to have earned any part of the land. It is also understood that they do not propose to build any such road or to attempt to do it. In fact, they have agreed not to do so, and have attempted to transfer to another company all their title to and rights in the land grant in question. So far from intending to earn the lands, they have renounced them. They have abandoned the undertaking so far as this part of their route is concerned, and it is understood that they have agreed not to build, in accordance with the charter, west of El Paso.

While the ten years which were allowed for the building of the Texas and Pacific were passing another corporation, the Southern Pacific, started out of San Francisco to meet the Texas and Pacific at the Colorado River. When it reached the Colorado it found that the Texas and Pacific had not built in the Territories, and was asking Congress for a guarantee of the interest on its bonds, in addition to the grant, to enable it to go on.

The Southern Pacific thereupon began to build to El Paso, claiming that no guaranty was needed, and no land grant even, and without guaranty or land grant it occupied substantially the route on which the act of March, 1871, contemplated that the Texas and Pacific would build. After the completion of the Southern Pacific to El Paso, it entered into an agreement with the Texas and Pacific, which was not produced before the committee. It was admitted, however, that the latter company had released its title to the land grant to the Southern Pacific, and that that corporation was now the claimant of the lands.

If the Texas and Pacific still claimed the lands, the strongest argument which it could have urged would have been found in the seventeenth section of the act of March, 1871. The language of that section, while not identical with that contained

in the eighth and ninth sections of the charter of the Northern Pacific, nevertheless resembles it, and under that section an argument might have been advanced that the only right which the United States had reserved for themselves was to complete the road. Had the facts shown that the Texas and Pacific had begun its work in good faith, had already expended large sums of money in an effort to build the road, was in the act of building it as rapidly as was possible, that there was no pretense that it could be finished earlier than it was being finished, there might have arisen a very serious question as to the power and duty of Congress in the premises. But the Texas and Pacific, one party to the grant or contract, having made no effort to carry it out, having renounced it, both informally and formally, both by acts and by writing, there can be no question of the right of the United States, the other party, to resume possession of the proposed grant, unless the Southern Pacific have acquired some rights by virtue of some deed of release.

On behalf of the Southern Pacific it is urged that the words used in the ninth section, "and assigns," in the phrase "there is hereby granted to the said Texas and Pacific Railroad Company, its successors *and assigns*, every alternate section," &c., authorize the latter company to transfer the lands in question in bulk to any other person who would receive it charged with the same trust; that the Southern Pacific, having received the lands at a time when they had completed a railroad, which was the same, or nearly the same, in location as that described in the act of March, 1871, received the lands discharged from the trust by reason of its fulfillment. In the opinion of the committee the words "and assigns" do not, in this case, have this meaning. We think these words describe the nature of the estate, are words of limitation, and do not constitute the grantee an agent of the United States to select another corporation which has performed similar work and make it the beneficiary of the grant. Nor do they constitute the grantee an agent to bestow a gratuity. It is further claimed on behalf of the Southern Pacific that the sections—notably section 4—authorizing consolidations give the authority needed for the transfer. Whether these sections would, under any state of facts, confer such power need not now be determined, for no facts have been laid before us which show any consolidation whereby the Texas and Pacific has absorbed the Southern Pacific. So far as this transaction is concerned the process would seem to have been reversed.

The consolidations contemplated by sections 4, 5, and 6 were those whereby other companies were to become part and parcel of the Texas and Pacific. If the Southern Pacific had become part and parcel of the Texas and Pacific, it could not be the claimant here.

It is further urged on behalf of the Southern Pacific that, inasmuch as that company have done what the United States offered to give the granted land to the Texas and Pacific if it would do it, equity requires that the land grant should be transferred.

To this, as a request for a gratuity, no objection can be made. That would rest in the sound judgment of Congress. But this request is put upon the ground of a claim founded upon equity and good conscience. The reply seems simple. Congress would never have been justified in offering the lands had it not deemed the offer necessary to secure the road. Now that events have demonstrated its non-necessity, the reason for offering it has entirely failed. The Southern Pacific was not induced by it to build. It built from other motives; not at the request of the United States, nor even for the benefit of the United States. It happened for its own purposes to build the road the United States wanted, and prevented the company from building it which the United States had authorized. It is difficult to see how this state of facts lays the United States under any obligation, either in equity or good conscience.

To these considerations may be added the fact that action on the part of the United States is necessary to enable the United States to restore this land to the public domain. Whatever legal rights parties have can be ascertained better after an act of forfeiture than before, and none of them will be lost.

No question of policy can arise here such as would arise if this were an enterprise not yet completed, but in the process of completion, which such an act would interrupt. Whatever road is to be built has been built.

The committee therefore recommend the passage of the accompanying resolution:

JOINT RESOLUTION to declare the forfeiture of lands granted the Texas Pacific Railroad Company under act of March third, eighteen hundred and seventy one, and acts amendatory thereof and supplemental thereto.

Resolved, by the Senate and House of Representatives of the United States of America, in Congress assembled, That all lands granted to the Texas Pacific Railroad Company under the act of Congress entitled "An act to incorporate the Texas Pacific Railroad Company and to aid in the construction of its road, and for other purposes," approved March third, eighteen hundred and seventy-one, and acts amendatory thereof or supplemental thereto, be, and they are hereby, declared forfeited, and that the whole of said lands be restored to the public domain and made subject to sale and settlement under existing laws of the United States.

NOTE.—This resolution did not become a law.

Mr. J. PROCTOR KNOTT, of Kentucky, from the Committee on the Judiciary, submitted the following as the views of the minority:

While concurring in the recommendation of the committee, the undersigned are unwilling to be committed, even by the remotest implication, to the doctrine that the United States might be deprived of its right to enforce a forfeiture of the lands granted to this or any other railroad company for breach of the conditions upon which such grant was made simply because Congress may have reserved the power "to adopt such measures as it may deem necessary and proper to secure the speedy completion of the road" in aid of which the lands were granted, and because the company, notwithstanding the breach, may be proceeding with its work.

The undersigned are aware that it is substantially so argued in the report of the committee in the case of the Northern Pacific Railroad, as they are unable to perceive any difference in the legal effect of the language upon which the conclusion was made to hinge in that instance and that employed in the seventeenth section of the act granting lands to the Texas Pacific Company; but they dissented from the doctrine then, and dissent from it now.

Nothing could be better settled or more universally conceded than that the grantor of an estate upon conditions subsequent may, unless his right be expressly waived or lost by his own laches, re-enter upon a breach of *any* condition upon which the estate may depend, and that upon such re-entry the estate of the grantor becomes void *ab initio*, the person who re-enters being seized of his original estate in the same manner as if he had never conveyed it away; and it is equally as well settled that laches are never to be imputed to the Government. Both of these principles were recently asserted by this committee with great clearness and force in the case of the Ontonagon and Brulé land grant.

If, therefore, the Government, as grantor, has the right, without regard to the lapse of time, to reinvest itself of such an estate for a breach of *any* of the conditions upon which it had previously granted it, it is impossible to see how it can be deprived of the power to do so simply because it has reserved to itself the right to do something in addition to the exercise of the mere right of forfeiture. A question as to the policy of insisting upon such forfeiture is one thing; the naked legal *right* to enforce it is quite another.

The undersigned, therefore, cannot assent to any reasoning or intimation in the report tending to establish the proposition that the right of absolute forfeiture does not exist either in this grant or that to the Northern Pacific Railroad Company in case of a breach of any condition upon which such grant was made.

[House Report No. 1284, Forty-seventh Congress, first session.]

RAILROAD LAND GRANTS TO CERTAIN STATES.

JUNE 6, 1882.—Referred to the House Calendar and ordered to be printed.

Mr. T. B. REED, of Maine, from the Committee on the Judiciary, submitted the following report, to accompany bill H. R. 6390.

The Committee on the Judiciary, to whom were referred sundry bills relating to land grants to States in aid of railroad construction, desire to report in part:

That by act of August 11, 1856, to be found in the eleventh volume of United States Statutes at Large, page 30, lands were granted to the State of Mississippi to be disposed of by that State in aid of the construction of their railroad, one "from Jackson to the line between the State of Mississippi and the State of Alabama," one from Tuscaloosa to the Mobile Railroad within Mississippi, and "from Brandon to the Gulf of Mexico."

With the first we have nothing to do, as it was not referred to us, and we are informed that it was finished in due time. In aid of all these roads, every alternate section of land designated by even numbers for six sections in width on each side of said roads was granted, with a right that in case of prior disposal of any such section or part of section by the United States to select other sections within fifteen miles. The manner

in which these laws were to be made available is stated in the fourth section of the act, which is as follows:

"SEC. 4. That the lands hereby granted to the said State shall be disposed of by said State only in manner following, that is to say, that a quantity of land not exceeding one hundred and twenty sections for each of said roads, and included within a continuous length of twenty miles of each of said roads, may be sold; and when the governor of said State shall certify to the Secretary of the Interior that any continuous twenty miles of either of said roads is completed, then another like quantity of land hereby granted, not exceeding one hundred and twenty sections for such road, may be sold; and so from time to time until said roads are completed; and if said roads are not completed within ten years, no further sales shall be made, and the lands unsold shall revert to the United States."

No portion of either of these roads has been constructed, and no lands have been approved to the State of Mississippi for them.

By the sixth section of the act of August 11, 1856, above described, a like grant on like condition was made to the States through which said road should pass, "for a railroad from Mobile to New Orleans."

The road contemplated by this section has never been built or begun.

The road from Brandon to the Gulf of Mexico was to be called the Gulf and Ship Island; that from Mobile to New Orleans, "The Mobile and New Orleans"; while that from Tuscaloosa to the Mobile Railroad seems not to have got so far as a name.

The time limited in the grant for all these roads expired August 11, 1866, sixteen years ago.

The provision of law by which the time was limited to ten years is contained in the fourth section recited above, and is in these words:

"And if said roads are not completed within ten years no further sales shall be made, and the lands unsold shall revert to the United States."

It was at first supposed by some that this language of itself of its own force stopped the sales at the expiration of the ten years, and reinvested the United States with the title as fully as if the grant had never been made or proposed; but in October, 1874, the Supreme Court, in Schulenberg *vs.* Harriman (21 Wall., 44), decided that an act of Congress precisely like this, although conveying lands to another State, granted an estate upon condition subsequent, that the title to the lands covered by the grant passed to the State and could only be regained by the United States by some act of legislation equivalent to a re-entry.

Under that decision it becomes necessary for the Congress to pass some act which shall assert ownership in the lands in question if it desires to repossess them and re-annex them to the public domain.

As they stand now they cannot be sold by the United States, as the United States has only a right of re-entry, a right which cannot be sold or assigned, and can only be made available by the original grantor, for the United States can have no heirs, and, we trust, no successors.

If, then, we deem that the lands should be thrown open to actual settlers we must by law say so. No Department can do it. The power rests in the Congress alone. Inasmuch as during a period of twenty-six years no stroke of work has been done on either road, and inasmuch as sixteen years of that period have been subsequent to the close of the war, your committee feel that the purposes which Congress had in view in passing the act of 1856 will not be subserved by longer keeping the property in question separated from the public lands and inaccessible to actual purchasers and settlers.

One of the reasons most strongly urged for the passage of the bills making these grants was, that the United States as a precedent landholder could well afford to give one-half its lands on the line of a proposed railroad because it could thereby not only double the price of the remaining land but greatly expedite the sale of it.

Such has been the result where roads have been actually built, but the sole effect, if any, of the bill in question has been to prevent the sale of lands and the settlement of the country. Of course, a revocation of the grant does not bind Congress in the future, nor prevent it from making new grants if it should so determine. As the law now is, it would seem as if the only business-like way to treat this subject was to make void this grant and enact a new one or to give this definite extension. While the case of Schulenberg *vs.* Harriman decides that the lands will revert after the expiration of the ten years, whenever the Congress chooses to so determine, and it is intimated in the decision that the sales may go on until such determination takes place, yet, as Congress, even if that intimation be regarded as settled, can step in at any moment and terminate the grant, with the road half built, the road can have only a limited advantage from the grant as it now stands. Capital will naturally be much less willing to be invested on a grant terminated at the pleasure of Congress than on one which has a definite time to run, and which there is a hope of earning in its entirety. It should also be added that the claim is made that sales of land must actually cease at the end of ten years, whether Congress passes an act equivalent to re-entry or not;

or if made, the title conveyed is subject to the same right of forfeiture by the act of re-entry as if the sale had not been made. If this view should prove to be sound, and those who favor it insist that anything to the contrary in Schulenberg *vs.* Harriman is *obiter dictum*, then the grants in their present state are of such small value as to no longer justify their presence on the statute-books, even in the view of the steadiest advocate of grants of lands to railroads.

ELYTON AND BEAVER'S BLUFF.

The act of June 3, 1856, was an act similar to the one which has just been discussed, whereby lands were granted to the State of Alabama to aid in the construction, among others, of a road "from Elyton to the Tennessee River, at or near Beard's Bluff, Alabama." As to this road the Secretary of the Interior reports that no map of location has been filed and no portion of the road constructed. So far as known, no corporation or company was ever organized under this act.

The time limited in the act expired June 3, 1866. It will be seen that what has been written hitherto applies to this road also.

ALABAMA AND CHATTANOOGA OR COOSA AND CHATTOOGA.

The history and condition of this grant is substantially this:

By act of Congress June 3, 1856 (11 Stat. at L., p. 17), there was granted to the State of Alabama for the purpose of aiding in the construction of, among others, a railroad from Gadsden, to connect with the Georgia and Tennessee and Tennessee line of railroads through the "Chattooga, Wills, and Lookout Valleys," the roads to be fully completed within ten years. The lands were by the act made subject to the disposal of the legislation of the State, and the act contained the usual provision that unless the roads were completed within the ten years the unsold lands should revert to the United States.

By joint resolution of the legislature of the State of Alabama, approved January 30, 1858 (acts of 1857–'58, pages 130, 131), the State accepted the grants and made provision for the disposition of the same: by section 1 of the joint resolution conferred the first grant on the Northeast and Southwest Alabama Railroad, from Elyton to Meridian, Miss., and by section 4 conferred the grant in aid of the road to be built through the Chattooga, Wills, and Lookout Valleys to the corporation known as the Wills Valley Railroad Company.

Both these companies were subsequently consolidated by State authority and called the Alabama and Chattanooga Railroad Company. In September, 1858, the usual "map of definite location" was filed in the Interior Department, and the odd sections of land withdrawn from market.

The records are silent as to any steps being taken toward the construction of the road in the time limited by the act of Congress. Unofficially we are advised that work was begun, but the completion prevented by the late civil war; but on April 10, 1869 (16 Stat. at Large, page 45), an act was passed extending the time for construction to April 10, 1872.

Before that time had expired, as appears by a certificate of Governor Houston, dated March 11, 1878, and filed in the Interior Department on May 15, 1878, the said roads (as consolidated with the Alabama and Chattanooga Railroad) had been completed and equipped, and were operating between Meridian, Miss., and Chattanooga, Tenn.

This, in our judgment, settles all questions of fact. The State has acted on the assumption that the lands were earned and this company entitled to its share by passing the act of February 10, 1876 (Session Laws of 1875–'76, page 154, No. 43), to execute the power of disposal of the lands granted by act of Congress, entitled, &c., approved June 3, 1856, by providing as to details of certification and lists of lands in cases of conflicting and overlapping grounds, and that—

"Such lists should operate as a conveyance to the railroad companies respectively, and that such lists should fully and legally vest all such title to said lands in and to said railroad companies," &c.

So that we are of opinion that, under the law, the title to the lands embraced in the purview of act of 1856, so far as it relates to these roads, Meridian to Chattanooga, has passed out of the United States, and that there is no power to perfect any rights as to such lands.

MEMPHIS AND CHARLESTON.

The State of Alabama refused to accept the grant for this road, and the lands were restored to market February 19, 1858. Your committee deem it prudent, however, to repeal the granting act so far as it refers to this road, and have provided for it in this bill presented.

IRON MOUNTAIN RAILROAD—(IN ARKANSAS.)

This grant was made by act of July 4, 1866 (14 Stat., 83), and by its terms the road should have been completed within five years from July 1, 1866, or by July, 1871. The road was to have run from the southern boundary of Missouri, where it is intersected by the Iron Mountain Railroad, to a point at or near Helena, Ark. No portion of the road has ever been either located or constructed.

NEW ORLEANS TO THE STATE LINE.

By act of June 3, 1856 (11 Stat., page 18), a grant of alternate odd-numbered sections for six sections in width on each side of the road, with the right to make good, within fifteen miles out of as much lands in alternate sections as would be needed, such deficiences as might occur within the six-mile limits from previous sales and pre-emptions, was made to the State of Louisiana, in aid of a railroad from New Orleans to the State line in the direction of Jackson, Miss. No part of this proposed road has been constructed, and the lands were restored to the public domain, so far as the Department could do it, July 27, 1857. Previous to such restoration, on the 6th of February, 1857, the governor of Louisiana advised the Land Office, by telegram, that he did not think the grant would be accepted.

We have deemed it proper to recommend the repeal of so much of the act as proffered the grant described.

It will be seen from the foregoing that the committee have adopted the rule of advising the forfeiture of such grants as have not been in any way utilized. Where, after a long lapse of time, no attempt has been made to earn the grant, it has seemed as if it should be withdrawn. While this rule seemed to the committee the only one which could be adopted, they think it right to add that the State of Mississippi has passed resolutions asking the extension of the grant in aid of the Gulf and Ship Island Railroad, and that representations have been made to us that parties were ready to build the road. While no evidence has been presented to us which would justify us in excepting the Gulf and Ship Island Railroad out of the forfeiture, yet we understand that the question of extension or removal is now pending before the Committee on Public Lands, to which the evidence has been submitted.

If such evidence should justify a new grant, individual members of your committee, while agreeing to this report, reserve the right to act as the evidence may indicate.

[House Ex. Doc. No. 223, Forty-seventh Congress, first session.]

ALLEGED EXCESS IN CERTIFICATION OF LANDS TO CERTAIN RAILROAD COMPANIES.

Letter from the Secretary of the Interior, in response to a resolution of the House of Representatives relative to alleged excess in the certification of lands to certain railroad companies.

July 10, 1882.—Referred to the Committee on the Judiciary and ordered to be printed.

DEPARTMENT OF THE INTERIOR,
Washington, July 10, 1882.

SIR: In answer to House resolution of the 6th ultimo, calling for facts in relation to lands certified to certain railroad companies in excess (according to the testimony of Mr. J. W. Le Barnes before the Senate Committee) of the amount to which they were legally entitled, I have the honor to transmit herewith a copy of the report of the Commissioner of the General Land Office, of the 15th ultimo, on the subject. A copy of his letter to me of the 7th ultimo, on the same subject, is also transmitted herewith.

Very respectfully,

H. M. TELLER,
Secretary.

The Hon. SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., June 15, 1882.

SIR: I have the honor to acknowledge the receipt, by reference from you, of a resolution of the House of Representatives, passed on the 6th instant, as follows:

"Whereas it is alleged in the testimony of J. W. Le Barnes, taken before a committee of the United States Senate, that certain land-grant railroads have received cer-

tificates for lands in excess of the amount due them by the acts granting the lands; Therefore, be it—

"*Resolved*, That the Secretary of the Interior furnish the House all the facts in his Department tending to show the truth or falsity of said allegations, and his recommendations, if in his opinion the same are well founded, for the purpose of reinvesting the title to the said lands in the United States and opening the same to homestead and pre-emption settlement."

In reply, I have to advise you that all the information in relation to the grants referred to in the testimony of Mr. Le Barnes that can be given without a complete adjustment of said grants is contained in my letter addressed to you on the 7th instant, in answer to an inquiry on the same subject made by Hon. L. E. Payson, a member of the Judiciary Committee of the House of Representatives.

In the case of the Sioux City and Saint Paul Railroad Company a letter was, at the request of your predecessor, addressed to the governor of Iowa on the 7th of March last, asking him to indicate what action he would take with regard to surrendering the "patents issued to the State for the Sioux City and Saint Paul Company for lands which have not been earned by said Company"; but, as heretofore reported, no reply has been received from said governor.

The Sioux City and Saint Paul Railroad was authorized by the act of May 12, 1864 (13 Stat., 72). The last proviso of section 4 of said act reads as follows:

"That said lands shall not in any manner be disposed of or encumbered, except as the same are patented under the provisions of this act; and should the State fail to complete said road[s] within five years after the ten years aforesaid, then the said lands undisposed of as aforesaid shall revert to the United States."

As nearly 27 miles of said road remains uncompleted, and as the excess of lands patented were not "patented under the provisions of the act" of May 12, 1864, I am of the opinion that judicial proceedings should be instituted for the recovery of said excess of lands. Like proceedings were recommended in my letter of April 14, 1882, as to the excess of lands certified for the Mobile and Girard Railroad.

I return herewith the copy of resolution referred to.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Hon. H. M. Teller,
Secretary of the Interior.

As to methods in General Land Office of segregation of lands granted, and rules adopted therefor.

Department of the Interior, General Land Office,
Washington, D. C., June 7, 1882.

Sir: I am in receipt, by reference from you, of a letter from Hon. L. E. Payson, dated the 17th ultimo, in which he says:

"Mr. Le Barnes, assistant law clerk in the Land Office, has recently stated, in testifying before the Senate Committee on Public Lands, that certain land-grant railroads have had from the public domain lands largely in excess of the amount to which they were entitled. The Judiciary Committee of the House have the general subject of unearned land grants before it, and instead of moving a resolution of inquiry as to the matter formally, I write you this. I would be pleased to be advised as to the facts as claimed by the officers of the Land Office as to the evidence of Mr. Le Barnes. They are fully advised of what he has testified to I know. The information I desire for the use of my committee, and, of course, it should be verified by reference to the records."

I understand Mr. Payson's inquiry to refer to the following-named roads, viz:

Cedar Rapids and Missouri River (Iowa).
Sioux City and Saint Paul (Iowa).
Saint Paul and Sioux City (Minnesota).
First Division Saint Paul and Pacific (Minnesota).
Iowa Falls and Sioux City (Iowa).
Winona and Saint Peter (Minnesota).
Lake Superior and Mississippi (Minnesota).
West Wisconsin (Wisconsin).
Alabama and Chattanooga (Alabama).
Mobile and Girard (Alabama).
Coosa and Tennessee (Alabama).
Pensacola and Georgia (Florida).
North Louisiana and Texas (Louisiana).
Iowa Central Air Line.

In order to enable you to properly understand the figures hereinafter presented, I deem it necessary to explain, as clearly as possible in a written communication, the

method followed in determining the precise tracts of land which inure to any State for the benefit of a particular grant.

After a map of the definite location of the line of route of any land-grant road is filed in this office, diagrams are prepared generally upon a scale of 4 miles to 1 inch, each township being thus 1¼ inches square. The townships are divided into thirty-six sections, and each section into sixteen quarter quarter-sections of 40 acres, thus dividing each township into 576 subdivisions of 40 acres each.

The located line of route is accurately laid down upon such diagram. Where a grant is of the alternate odd-numbered sections for six sections in width on each side of the road, a line is drawn with mathematical accuracy *on each side* of the line of route in such manner that said exterior line shall be just six miles distant from any and every point on either side of the road. If a road followed a straight line it would be a simple matter to fix the limits of its grant.

Nearly all of the land-grant roads, however, follow irregular lines, that is, there are more or less bends or curves in the road; therefore a system was adopted by this Department and office of fixing the lateral limits of a road by making consecutive circles (representing a diameter of six miles) along the line of road, and drawing lines tangent to such circles in such manner that the line of lateral limits on each side might be so adjusted as to be equidistant from every portion of the road. Where the line of lateral limit (which is a temporary line made in pencil) so drawn embraces the greater portion of the smallest legal subdivision (40 acres) of a section, the entire subdivision is awarded to the road. Where the minor portion only is embraced within such lateral line, the entire subdivision is excluded. A fixed and permanent line is then drawn including and excluding the proper tracts accordingly. The limits within which indemnity may be taken are fixed in the same manner. I inclose a diagram, marked A, illustrating the method described. An examination of said diagram will show that a road by this system could not, even if all the land in odd sections within its limits were subject to its grant, receive the *exact* amount of six sections (3,840 acres) per mile, but that in every instance it would receive a trifle less, the loss ranging from one-tenth of one per cent. in ordinary cases to one per cent. in extreme cases, the loss on a line of road similar to that on the inclosed diagram being 1.09 per cent.

There are other causes which operate to prevent a road from getting the full number of sections per mile that may be named in a grant. Two roads, for the benefit of which a grant is made by the same act, may intersect each other. In such case each road receives a moiety of the land embraced in the conflicting limits. Where roads receiving a grant under different acts intersect, the earliest grant takes the land within such conflicting limits to the exclusion of the road for which the later grant was made. Military reservations are in all instances excepted from the operation of a grant. Indian reservations in Minnesota are excluded by the act of March 3, 1857, so long as the Indian title remains unextinguished. Under the additional grant of March 3, 1865, to Minnesota, such reservations are excluded entirely. Private grants are also excluded from railroad grants, but indemnity has been allowed in Florida in such cases. Where a grant is taken up for adjustment all these elements have to be carefully considered, and the status of every 40-acre tract within the limits of a grant determined. But few grants have yet been fully adjusted, owing to the fact that the majority of the force of the railroad division of this office has been engaged in the settlement of contests arising between settlers and railroad companies. To adjust the grants above referred to would require more than a year's labor of the entire force available for such purpose.

In making the statement asked for, I shall therefore adopt the plan which, in my opinion, most nearly approximates the result that would be obtained by an accurate adjustment of each grant.

It must also be understood that none of the grants in question have been adjusted; also, that there are mooted questions relative to the true intent of some of the grants, and that the final decision of such questions may materially reduce the amounts herein stated.

Where the grant is a grant of quantity "to the amount of" so many sections per mile, no deductions are made for any cause. Each statement, however, made with reference to a particular road, exhibits as nearly as practicable, and following the general plan herein adopted, such amounts as would inure to the road under the present rules of the Department and office. All the earlier grants made for the benefit of railroads have been held to be grants *in presenti;* that title to the sections granted passed by the act, and that when the definite location of a road was made the title of the State acquired precision, and at once attached to the land.

Congress relied in all cases upon the good faith of the State to see that the lands were disposed of in the manner provided in each act, and that the proceeds of the lands granted were applied for the purposes contemplated by such act. Accordingly, in nearly all the grants made previous to 1864, immediately upon the location of the roads and the determination of the limits of a grant, this office and the Department

certified, in whole, to the States, all the vacant lands within the granted limits of each road, and such land within the indemnity limits as was required to make the full complement of the grant for the number of miles of located road, generally without any deductions for reservations, conflicting limits, or other causes. It was therefore left to each State to fulfill the conditions imposed by a grant, and to so fulfill them as to avoid the penalty of forfeiture, and in making sales or disposals of the lands granted to save her vendees from being the recipients of invalid titles.

In all the grants hereinafter referred to, except that for the Sioux City and Saint Paul, and Saint Paul, Lake Superior and Mississippi Railroads, the States were permitted to sell one hundred and twenty sections of land, 76,800 acres, to be selected *anywhere on the line* within a continuous twenty miles in advance of the construction of any portion of a road named in the granting act. The validity of such a sale was affirmed by the United States Supreme Court in the case of Railroad Land Company *vs.* Courtright, October term, 1874 (21 Wallace, 310). It will therefore be observed that, generally, where roads lack twenty miles or more of completion, the *excess* of acres certified over the amount earned by construction may properly and *legally* be 76,800 acres, or 120 sections of land, and that this excess may be taken from lands anywhere along the located line within a continuous twenty miles.

METHOD OF ADJUSTMENT OF GRANTS TO ROADS EMBRACED IN THE INQUIRY.

The grant to the State of Iowa for the benefit of the Cedar Rapids and Missouri River Railroad is made by the act of May 15, 1856 (11 Stat., p. 9), and the act of June 2, 1864 (13 Stat., p. 95). This grant is peculiar in some respects, and therefore needs explanation.

The first act provides for a road "from Lyons City northwesterly to a point of intersection with the main line of the Iowa Central Air Line Railroad, near Maquoketa; thence on said main line, running as near as practicable to the forty-second parallel, across the said State to the Missouri River," and grants therefor every alternate section of land designated by odd numbers for six sections in width on each side of said road. The usual indemnity provision is made for lands within the granted limits that were sold, or to which the right of pre-emption had attached prior to the definite location of the road.

Lands reserved to the United States by any act of Congress, or in any other manner by competent authority, for the purpose of aiding in any object of internal improvement, or for any purpose whatsoever, are excluded from the operation of the act, except that right of way is granted through such reservations, subject to the approval of the President of the United States.

On July 14, 1856, the State accepted the grant and conferred it upon the Iowa Central Air Line Railroad Company. Said road was finally and definitely located from the Mississippi to the Missouri River on September 12, 1856, and on October 31, 1856, the map of definite location was filed in this office. Said road was 346¾ miles in length, which (miles), multiplied by 3,840 (the acres per mile granted), would give the total grant as 1,331,520 acres, subject to deductions for curves, reservations, and other causes above referred to.

(NOTE.—The entire loss by curves in the 346¾ miles would be about 1,950 acres, or less than two-tenths of one per cent., as shown on the diagram by which the grant is adjusted.)

The Iowa Central Air Line Railroad Company did a large amount of grading on the located line, principally between Lyons and Maquoketa, but they never constructed any portion of said line.

Up to March 17, 1860, there were 665,687.34 acres of land lying along various portions of the road certified to the State for the benefit of the Iowa Central Air Line Railroad Company. Of this amount the State conveyed to said company 63,106 acres, a part of the first one hundred and twenty sections authorized by the act of 1856 to be sold in advance of construction. This land was situate west of Cedar Rapids. The company sold this land and the sale was affirmed by the decision of the United States Supreme Court in the Courtright case hereinbefore referred to. The legislature of Iowa, by act of March 17, 1860, resumed control of the land embraced in the grant, and by act of March 26, 1860, granted the same to the Cedar Rapids and Missouri River Railroad Company upon certain conditions. Prior to this date the Chicago, Iowa and Nebraska Company had built a road commencing at Clinton, on the Mississippi River, only 2.41 miles from Lyons City, to Cedar Rapids.

When the State made the grant to the Cedar Rapids and Missouri River Railroad Company, this fact was recognized, and the State provided that the lands were to be

used for and devoted by the Cedar Rapids and Missouri River Railroad Company to the building of a road from Cedar Rapids or Marion to the Missouri River.

This is all the State did, conceding it had the power to divert the lands, so to speak, to the construction of a railroad upon a different route from that mentioned in the act.

(NOTE.—Such right is affirmed in effect by the United States Supreme Court in the case of Baker *vs.* Gee, December term, 1863, 1 Wall., 333.)

It has uniformly been considered by this office that by the act of June 2, 1864, hereinafter quoted in part, Congress assented to the disposition made by the State of the lands along the line of the original route; in other words, that the lands along the 346¾ miles of the original line were to be used for the construction of a modified line or road 72.74 miles shorter, thus making the grant equal to about 4,860 acres per mile for constructed road. Previous to June 2, 1864, and after March 26, 1860, the Cedar Rapids and Missouri River Railroad Company constructed 70 miles of road between Cedar Rapids and Marshalltown, and during that time 109,756.85 acres were approved to the State under the act of May 15, 1856.

(NOTE.—The United States Supreme Court, December term, 1866, in the case of Wolcott *vs.* Des Moines Navigation and Railroad Company, decided that all of said 109,756.85 acres inured to the Des Moines improvement grant by act of August 8, 1846.)

By the fourth section of the act of June 2, 1864, it was provided—

"That the Cedar Rapids and Missouri River Railroad Company, a corporation established under the laws of the State of Iowa, and to which the State granted a portion of the land mentioned in the title to this act, may modify or change the uncompleted portion of its line, as shown by the map thereof now on file in the General Land Office of the United States, so as to secure a better and more expeditious line to the Missouri River, and to a connection with the Iowa branch of the Union Pacific Railroad; and for the purpose of facilitating the more immediate construction of a line of railroads across the State of Iowa, to connect with the Iowa branch of the Union Pacific Railroad Company, aforesaid, the said Cedar Rapids and Missouri River Railroad Company is hereby authorized to connect its line by a branch with the line of the Mississippi and Missouri Railroad Company, and the said Cedar Rapids and Missouri River Railroad Company shall be entitled for such modified line to the same lands and to the same amount of lands per mile, and for such connecting branch to the same amount of land per mile, as originally granted to aid in the construction of its main line, subject to the conditions and forfeitures mentioned in the original grant, and, for the said purpose, right of way through the public lands of the United States is hereby granted to said company."

The said section of the act also required the company to file in this office a map of the modified main line and connecting line as soon as located. Said section also directs the Secretary of the Interior to reserve and cause to be certified and conveyed to the company from time to time as the work progressed, out of any public lands not sold, reserved, or otherwise disposed of, or to which a pre-emption right, or right of homestead settlement, has not attached, and on which a *bona fide* settlement and improvement has not been made under color of title derived from the United States, or the State of Iowa, *within* 15 *miles of the original main line*—

"An amount of land equal to that originally authorized to be granted to aid in the construction of the said road by the act to which this is an amendment. And if the amount of lands per mile granted, or intended to be granted, by the original act to aid in the construction of said railroad shall not be found within the limits of the 15 miles therein prescribed, then selections may be made along said modified line and connecting branch within 20 miles thereof."

It also provides for a branch line from the main line to Onawa City, with the same grant of lands to be selected from the unappropriated lands *anywhere* within 20 miles of the main line and branch; also for a branch from the town of Lyons, in Iowa, "to connect with the main line in or west of the town of Clinton in said State," and directs the Secretary of the Interior to reserve a quantity of land "sufficient, in the opinion of the governor of Iowa, to secure the construction" of such branch.

(NOTE.—One hundred and twenty sections of land were reserved for this purpose.)

As before stated, it has always been understood by this office that the Cedar Rapids and Missouri River Railroad Company was the successor of the Iowa Central Railroad Company, and as such entitled to all the lands, rights, and privileges of the former company, and the lands certified by this office to the State of Iowa for the latter company are regarded as inuring to the former company. The lands were certified to the State (prior to June 2, 1864), subject to her disposal; and while the Cedar Rapids and Missouri River Railroad Company did not build any road (except the Lyons branch, 2.41 miles) east of Cedar Rapids, it has received the benefit of all the lands certified to the State under the act of 1856, except 172,862.85 acres hereinbefore referred to, viz, 63,106 × 109,756.85.

The lands withdrawn on the line of the original route are still reserved for the benefit of the grant, and the lands within 6 miles of said line are, and have always been, held at double minimum price.

It will be noticed the act of June 2, 1864, makes the grant to a corporation and not to the State direct except upon failure of the corporation to construct the road as provided in section 8 of the act. Whether or not the acts of 1856 and 1864 have been properly construed by this office, is not a question necessary to be determined in this report.

The total length of the main line and branch from Cedar Rapids to the Missouri River is 271.6 miles, and of the Lyons branch 2.41 miles, making 274.1 miles of road built in compliance with the act of 1864.

A branch road, 6 miles in length, was built by the Cedar Rapids and Missouri River Railroad Company, from Missouri Valley Junction, to connect with the Sioux City and Pacific, running through Onawa; but no grant was claimed by the company therefor.

Giving the company six sections, or 3,840 acres per mile for the original line of 346¼ miles, we find the grant to be in round numbers 1,331,520 acres. The line of constructed road, however, runs through the limits of the Des Moines improvement grant made by act of July 12, 1862, but the lands within 5 miles on each side of said river were at the date of the grant for the Iowa Central Air Line (May 15, 1856) reserved for the benefit of the Des Moines improvement grant by act of August 8, 1846. Whether the latter grant (of August 8, 1846) extended above the Raccoon Fork, and whether the reservation was properly made, has been the subject of almost endless correspondence and litigation. It has not been determined whether the act of 1864 gives the Cedar Rapids Company indemnity for the lands lost by said reservation.

There are 49,520 acres in the conflicting limits of the Cedar Rapids road and the Des Moines improvement grant. If no indemnity is allowed for said 49,520 acres, the grant would be 1,331,520—49,520, or 1,282,000 acres.

The State of Iowa is charged on the records of this office with 1,032,363.28 acres certified under the acts of May 15, 1856, and June 2, 1864, for the benefit of the road in question.

This would show an apparent deficiency of 249,636.72 acres required to satisfy the grant, and, if indemnity is allowed for said 49,520 acres, an apparent deficiency of 299,156.72 acres.

Either of said deficiencies would be slightly reduced by an accurate adjustment of the grant by limits as shown on the diagram of lands embraced within the grant. There are no losses to this road by conflicting limits of grants to other roads.

If the former rule of the office is changed, and no grant is allowed east of Cedar Rapids, and no indemnity for lands in limits of Des Moines improvement grant, the State has received 38,939.28 acres more than she would be entitled to under such a construction of the granting act.

SIOUX CITY AND SAINT PAUL RAILROAD.

By act of Congress approved May 12, 1864 (13 Stat., 72), a grant was made to the State of Iowa for the construction of a railroad from Sioux City in said State to the south line of Minnesota of every alternate section of land, designated by odd numbers, for ten sections in width on each side of said road, and provision was made for indemnity for lands lost within the granted limits to be taken within ten additional miles. The lands were to be patented only as the road was constructed, at the rate of 100 sections of land for each section of road 10 miles in length, and if the road was not completed within 10 years from the date of the acceptance of the grant by the company, the lands granted and not patented should revert to the State for the purpose of securing the completion of the road. It was further provided that if the road was not completed by the State in 15 years from the date of said acceptance, the lands undisposed of should revert to the United States.

On April 3, 1866, the State accepted the grant and conferred it upon the Sioux City and Saint Paul Railroad Company, and said company accepted the grant September 20, 1866.

The line located by said company was 83 miles and 52 rods in length, and a diagram of withdrawal was prepared accordingly, and the lands withdrawn August 26, 1867. Only 56¼ miles of the road have been constructed. The area of the grant for such length of road, at 10 sections or 6,400 acres per mile, is—*without deductions* for any cause—360,000 acres. There have been patented to the State of Iowa, for the benefit of said road, the following amounts of land:

	Acres.
October 16, 1872	191,464.04
June 17, 1873	205,374.76
January 25, 1875	10,911.41
June 4, 1877	160.00
Total	407,910.21

The excess, therefore, of lands patented to the State for this road over the amount it was possible for the company to have earned under the most favorable circumstances, without deductions, by the construction of 56¼ miles of road is 47,910.21 acres. It is clear that this amount was erroneously patented to the State, as reported to you by my letter of January 12, 1882. It is understood, however, though unofficially, that some 85,000 acres of the amount of lands so patented have been withheld from the company by the State.

On the 7th of March last, at the request of your predecessor, I addressed a letter to the governor of Iowa asking him to indicate what action he would take with regard to surrendering the "patents issued to the State for the Sioux City and Saint Paul Company for lands which have not been earned by said company." No reply from the governor has yet been received.

The granted limits of the McGregor Western Railroad conflict with the granted limits of the Sioux City and Saint Paul Railroad, so that the actual area of the grant would be about 35,500 acres less than 360,000 acres, or 324,500 acres, thus making the probable excess patented to the State 83,410.21 acres, which is very nearly equal to the amount (85,000 acres) of lands withheld by the State from the company. It will be observed that the patents issued to the State in this case for all the land except 11,071.41 acres were issued prior to June 18, 1873, nearly nine years ago, and that the last patent was issued June 4, 1877, or five years ago. By the act of March 3, 1857, a grant was made to the then Territory of Minnesota for the construction of a railroad now known as the—

SAINT PAUL AND SIOUX CITY RAILROAD,

running from Saint Paul and Saint Anthony to the southern boundary of the Territory in the direction of the mouth of the Big Sioux River. The grant was of every alternate section of land, designated by odd numbers, for six sections in width on each side of the road. Indemnity is also provided, to be taken within 15 miles of the line of road, of "so much land, in alternate sections or parts of sections, as shall be equal to such lands as the United States have sold, or otherwise appropriated, or to which the rights of pre-emption have attached" prior to date of definite location.

By act of May 12, 1864, the grant for this road is increased—

"Four additional alternate sections of land per mile, to be selected upon the same conditions, restrictions, and limitations as are contained in the act [of March 3, 1857, and providing that the land to be so located by virtue of the act] may be selected within twenty miles of the line of said road, but in no case at a greater distance therefrom."

Said company located 199¼ miles of road upon which withdrawals were made under the provisions of the grant.

The area of the grant, without deductions, at the rate of ten sections, or 6,400 acres, per mile, for 199¼ miles of located road would be 1,275,200 acres. The amount patented or certified is 1,146,738.56 acres, leaving a deficiency of 128,461.44 acres.

From this amount there will have to be deducted, when ascertained, the proper proportion of a large amount of lands lying within the six-mile conflicting limits of this road and other roads provided for by the act of March 3, 1857; also lands included within the limits of the former Winnebago Indian Reservation.

THE FIRST DIVISION OF SAINT PAUL AND PACIFIC RAILROAD

was authorized by the act of March 3, 1857, above referred to, with the same grant of lands, six sections per mile, and indemnity for lands sold, &c., to be selected within 15 miles on either side of the line of road.

The grant was afterwards, by act of March 3, 1865, increased to ten sections per mile, with indemnity to be taken within twenty miles of the line of road. Said company have constructed 230.80 miles in accordance with the provisions of the grant, however; the line as located and upon which withdrawals were made is but 227¼ miles in length.

The area of the grant, without deductions, at the rate of ten sections, or 6,400 acres, per mile, for 227¼ miles, would be 1,454,400 acres. Less for 10 miles constructed prior to March 3, 1865, and only entitled to six sections per mile, 25,600 acres, leaving the area of the grant 1,428,800 acres; amount certified or patented to date, 1,251,046.14 acres; deficiency, 177,753.86 acres.

From this amount there will have to be deducted, when ascertained, the proper proportion of such amount of lands as lie within the conflicting limits of this road and other roads authorized by the act of March 3, 1857.

It is probable that an accurate adjustment of the grant will show a deficiency of lands required to satisfy the grant.

THE IOWA FALLS AND SIOUX CITY RAILROAD

was authorized by the act of May 15, 1856, which provided for a road from Dubuque, Iowa, to a point on the Missouri River near Sioux City, granting to the State of Iowa for that purpose every alternate section of land, designated by odd numbers, for six sections in width on each side of the line of road, with indemnity to be taken within 15 miles on each side of said line.

Lands reserved to the United States by any act of Congress, or in any other manner by competent authority, were excepted from the operation of the act.

The line of road as located is 327.53, but as constructed is 326.58 miles.

The area of the grant at six sections, or 3,840 acres, per mile, would be, without deductions, 1,254,067.20 acres; from this should be deducted the lands in limits of grant to the Des Moines improvement, amounting to 59,590.49 acres; area of grant, 1,194,476.71 acres; amount of lands certified or patented under the grant and properly charged to the road, 1,155,956.54 acres; deficiency, 38,520.17 acres.

This amount will not be decreased by the conflicting limits of any other road. The limits of the Sioux City and Saint Paul Railroad conflict with the limits of this road (Iowa Falls and Sioux City), but as the Sioux City and Saint Paul grant is a later grant (May 12, 1864), it does not affect the grant for the Iowa Falls and Sioux City Railroad.

THE WINONA AND SAINT PETER RAILROAD

was authorized, and a grant made to the then Territory of Minnesota for the same, by the act of March 3, 1857, and the grant was extended by the act of March 3, 1865, hereinbefore referred to. The two grants aggregated ten sections per mile, with indemnity to be taken within 20 miles from either side of the line of road. Reservations are excepted from the operation of the grant.

The company constructed 323.56 miles, but the line as located and upon which lands were withdrawn is 319¼ miles in length.

The area of the grant, without deductions, at ten sections, or 6,400 acres, per mile, for 319¼ miles, would be 2,043,200 acres. Less for 50 miles constructed prior to act of March 3, 1865, and only entitled to six sections per mile, 128,000 acres; area of grant, 1,915,200 acres; amount certified or patented, 1,668,787.90 acres; deficiency, 246,412.10 acres.

From this amount there will be deducted, upon an accurate adjustment of the grant, a large amount of land in the conflicting limits of other roads authorized by the act of March 3, 1857; also land within the Winnebago and Sioux Indian Reservations.

The statements as to area of grant for the last four roads above named, to wit, Saint Paul and Sioux City, First Division Saint Paul and Pacific, Iowa Falls and Sioux City, and Winona and Saint Peter, differ materially from estimates made by this office in 1865, and published in the annual report for that year and for several years thereafter, which estimates attempted to show the "quantities inuring under the grants," after necessary deductions for conflicting limits, &c., were made.

THE LAKE SUPERIOR AND MISSISSIPPI RAILROAD

was authorized by the act of May 5, 1864, which granted to the State of Minnesota, for the purpose of aiding in the construction of a railroad in said State from the city of Saint Paul to the head of Lake Superior—"every alternate section of land designated by odd numbers, *to the amount of* five alternate sections per mile on each side of the said railroad on the line thereof, within the State of Minnesota; but in case it shall appear that the United States have, when the line or route of said road is definitely fixed, sold, *appropriated*, *reserved*, or otherwise disposed of any sections or any part thereof, granted as aforesaid, or that the right of pre-emption or homestead settlement has attached to the same," indemnity was provided therefor, to be taken within 20 miles on either side of the line of road. By the act of July 13, 1866, it was provided—

"That in case it shall appear, when the line of the Lake Superior and Mississippi Railroad is definitely located, that the quantity of land intended to be granted by the said act in aid of the construction of the said road shall be deficient by reason of the line thereof running near the boundary line of the said State of Minnesota, the said company shall be entitled to take from other public lands of the United States within 30 miles of the west line of said road such an amount as shall make up such deficiency: *Provided*, That the same shall be taken in alternate odd sections, as provided for in said act [May 5, 1864]."

This grant appears to be a grant of absolute quantity without deductions for any cause, if the amount can be found within said 30 miles. The company constructed 154.42 miles, which would entitle them, at the rate of ten sections, or 6,400 acres, per mile, to 988,288 acres. Amount patented or certified, 860,564.09 acres; deficiency, 127,723.91 acres.

THE WEST WISCONSIN RAILROAD

was authorized by the act of June 3, 1856, and a grant made to the State of Wisconsin therefor of six sections per mile, with indemnity to be taken within 15 miles of the line of road.

This grant was subsequently, by act of May 5, 1864, increased to ten sections per mile, from Tomah to Saint Croix River, with indemnity to be taken within 20 miles on either side of the line of road. The company constructed 244 miles of road—100 miles from Madison to Tomah is entitled to only six sections per mile, or 384,000 acres; 144 miles from Tomah to Saint Croix is entitled to ten sections per mile, or 921,600 acres; or, without deduction, a total of 1,305,600 acres; amount patented or certified, 824,866 acres; deficiency, 462,734 acres.

This amount would be largely reduced by deducting the amount of lands in the conflicting limits of this and other roads.

It is not probable, however, that said deductions will exceed 462,734 acres.

THE ALABAMA AND CHATTANOOGA RAILROAD

was authorized by that portion of the act of June 3, 1856, making a grant to the State of Alabama for the construction of certain railroads, which provides for a road from Gadsden to connect with the Georgia and Tennessee and Tennessee line of railroads through Chattooga, Wills, and Lookout Valleys; and also for a road "from near Gadsden to some point on the Alabama and Mississippi State line, in the direction to the Mobile and Ohio Railroad."

Said roads were consolidated under the name of the Alabama and Chattanooga Railroad, and 246 miles of road have been constructed in accordance with the granting act.

The grant was "every alternate section of land designated by odd numbers for six sections in width on each side of said roads," and the usual provision was made in the act for indemnity to be taken within 15 miles on either side of the line of road.

The area of the grant, without deductions, would be, for 246 miles, 944,640 acres; amount patented or certified, 558,253.04 acres; total, 386,386.96 acres. One list, aggregating 43,717.38 acres, has been approved to the State for the joint benefit of this road and others with which it conflicts. If it is all awarded to the Alabama and Chattanooga Railroad, the deficiency in the grant will be 342,669.58 acres.

This amount will be somewhat reduced by the conflicting limits of other roads in Alabama, provided for in the act of June 3, 1856; however, it is not probable that the grant for this road can be fully satisfied, as the quantity of vacant land within the limits of the road is inconsiderable. I do not understand Mr. Le Barnes to claim that there has been any excess certified for the last three roads named.

THE MOBILE AND GIRARD RAILROAD

was authorized by the sixth section of the act of June 3, 1856, above referred to. The grant for said road was "every alternate section of land designated by odd numbers for six sections in width on each side" of the road. Indemnity is provided for "such lands as the United States have sold, or otherwise appropriated, or to which the rights of pre-emption have attached" prior to the date of definite location of the road, such indemnity to be taken within 15 miles on either side of the line of road. Said act provided "that a quantity of land, not exceeding 120 sections" (76,800 acres), "and included within 20 continuous miles of" said road, might be sold in advance of the construction of any portion of the road, and that the remainder of the lands should be sold only as the road progressed, at the rate of 120 sections for each 20 miles completed, and only then after the governor of the State should certify to the Secretary of the Interior that such a section was completed.

A map of definite location of the road from Girard to Blakely, on the Mobile Bay, a distance of 223.6 miles, was filed in this office June 1, 1858.

Following the rule hereinbefore referred to, which obtained at the date the grant was made, nearly all the vacant lands within the granted limits of the road, and such lands within the indemnity limits as were required to make as nearly as possible the full complement of the grant for the number of miles of located road, were approved or certified to the State. Between April 26, 1860, and January 3, 1861 (inclusive), there were 504,145.86 acres approved to the State for the benefit of the road. Of the land so certified, 208,767 acres were within the granted limits and 295,377 acres within the indemnity limits, as reported to you by my letter of April 14, 1882, relative to this road.

There is no evidence on file in this office or in the Department of the construction of any portion of this road, yet it is known unofficially that a railroad has been constructed and is in operation from Girard to Troy, a distance of 84 miles. It has been

held by this office that if this portion of the road was constructed in time, the company would be entitled to 322,560 acres of land. The total amount of land certified to the State for said road and lying between the terminal points (Girard and Troy) of the constructed road was, as reported to you in said letter of April 14, 1882, 21,723.31 acres. Of this amount 10,928.88 acres was in the granted limits and 10,796.84 in the indemnity limits of the road.

Under the rules of this office which were in force July 30, 1858, and for many years thereafter, where there were no vacant lands for indemnity near the lands lost in place, the indemnity land selections could be advanced to the terminus of the road. If, therefore, the 84 miles were constructed in time, the certification to the State of indemnity, 295,377 acres, and of granted lands, 10,928.88 acres, or a total of 306,305.88 acres, would be strictly within the rules of the office, as such amount would be less than the full grant for 84 miles of road.

If to this amount we add the 120 sections or 76,800 acres which the State could sell in advance of construction, we find that 383,105.88 acres would be the extent of the disposals that could properly be made under the granting act, even if 84 miles of road had been properly constructed in compliance with the terms of the act.

It does not appear, however, that any portion of the land certified to the State for the benefit of this road had been sold or used for the purpose of the road at the date of the expiration of time allowed for construction, neither does it appear that any portion of the land had been certified over to the railroad company at that period. In view of the fact that there were but 21,723.31 acres of public land lying opposite the 84 miles of road referred to, included in the lists certified to the State, and the further fact that no official report whatever of the construction of any portion of the road was on file, or had been filed in this office, I recommended to you in my letter of April 14, 1882, that judicial proceedings should be instituted for the recovery of 482,422.65 acres, the difference between 21,723.31 acres and the total amount certified.

COOSA AND TENNESSEE RAILROAD.

This road was authorized by the same act (June 3, 1856) as provided for the Mobile and Girard Railroad. The grant and conditions thereof were the same. A map of definite location showing 36½ miles was filed in this office January 18, 1859.

No portion of the road has ever been constructed. Under the provisions of the act 67,784.96 acres were approved to the State for the benefit of the road. Whether the State took advantage of the provision of the act allowing them to sell 120 sections of land (76,800 acres) for the benefit of the road before the construction of any portion thereof, is not known to this office.

THE PENSACOLA AND GEORGIA RAILROAD

was authorized by the act of May 17, 1856, making a grant to the State of Florida for the construction of railroads almost identical in its provisions with that of the grant of June 3, 1856, to Alabama. The grant provided for a road "from Saint John's River, at Jacksonville, to the waters of Escambia Bay, at or near Pensacola."

The Pensacola and Georgia Railroad Company was organized to construct that portion of the road running from Lake City to Pensacola, and the grant for that portion of the road conferred upon them by the State. Said company located 307 miles of road prior to May 30, 1858. No evidence of the construction of any portion of this road has been filed in this office, but the road is believed to be constructed and in operation from Lake City to Chattahoochee River, a distance of about 150 miles. If said 150 miles were constructed within the proper period, the amount the State could properly dispose of would be 652,800 acres, including the 76,800 acres that could be sold in advance of construction.

Prior to October 30, 1860, under the rules then existing, 1,275,579.52 acres were approved to the State for the benefit of the road "from Saint John's River, at Jacksonville, to the waters of Escambia Bay, at or near Pensacola." If said amount was sold for the benefit of, or transferred to, said road, the amount disposed of would exceed by 622,779.52 acres the amount that could be legally disposed of upon the construction of 150 miles of road.

This office has no information as to the disposition of the lands made by Florida. It is possible that some portion of the land was sold for the benefit of the company (Florida, Atlantic and Gulf Central) which constructed, or is believed to have, under the said grant, the road from Jacksonville to Lake City, 59 miles, the grant for which lacks 197,175.82 acres (counting the full quantity of 3,840 acres per mile) of being satisfied.

THE NORTH LOUISIANA AND TEXAS RAILROAD.

The grant to Louisiana for this road was made by the act of June 3, 1856, being similar in nearly all respects to the grants made to Alabama and Florida above referred to. Ninety-four miles have been constructed and officially reported by the company in accordance with the provisions of the granting act.

The amount of lands earned by the construction of 94 miles would be 360,960 acres; amount that could be legally disposed of in excess of lands earned, 76,800 acres; total, 437,760 acres. Amount patented or certified, 353,212.68 acres; difference, 84,547.32 acres. In fact, less lands were certified than were earned by the construction of 94 miles of road.

THE IOWA CENTRAL AIR LINE RAILROAD.

The grant for this road is fully explained in the beginning of this communication in connection with the Cedar Rapids and Missouri River Railroad grant, the latter company having received the benefit of, and been charged with, all the lands certified for the Iowa Central Air Line Company.

The foregoing statements must in the main be received as explanatory and approximate, as I cannot undertake now to pass upon many questions that have arisen, and that may hereafter arise, in an accurate adjustment of these several railroad grants.

It appears from the records of this office that at the commencement of the execution of the laws relating to land grants, no proper books of account were opened and no careful basis prepared upon which to proceed with the administration of the law. My more immediate predecessors, whether wisely or unwisely it is not for me to judge, preferred to carry on the current work of the office rather than enter upon such adjustment. I am informed, and believe, that the force allowed by Congress was inadequate for both. Nor is it adequate now for me to enter upon such work of adjustment without neglecting the current business of the division, which would be very injurious to parties interested.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Hon. H. M. TELLER,
Secretary of the Interior.

PROPOSED LEGISLATION TO FORFEIT RAILROAD LAND GRANTS IN CERTAIN CASES.

[Senate Report No. 906, Forty-seventh Congress, second session.]

IN THE SENATE OF THE UNITED STATES.—Reported and read twice.

JANUARY 2, 1883.—Ordered to be printed.

Mr. GARLAND, from the Committee on the Judiciary, submitted the following report, to accompany bill S. 2301:

The Committee on the Judiciary have for some time had under consideration various memorials asking for the forfeiture of certain railroad land grants, with several bills and resolutions on the same subject. The resolutions and bills differ as to the way and manner of securing forfeitures; some asking for a direct declaration by Congress, others seeking to invest the Secretary of the Interior with the power to make such declarations.

Upon full consideratien of all these propositions, in connection with the various grants to be reached in this way, the committee found great difficulty in devising any one plan that would be effectual. The grants themselves are different and do not by any means, in all cases, carry the same meaning as to the relative rights and duties of the companies and the Government.

The committee is unwilling to confide this vast power of declaring forfeitures to any one officer of the Government. In its essential elements it is a judicial proceeding; and while it is within the power of Congress in certain cases to make this declaration, it is deemed best for the security and protection of all concerned that some means of a judicial character should be devised to accomplish this end.

In Farnsworth *vs.* Minnesota and Pacific Railroad Company, 92 U. S. Reps. (2 Otto), 66, the Supreme Court say:

"A forfeiture by the State of an interest in lands and connected franchises, granted for the construction of a public work, may be declared for non-compliance with the conditions annexed to their grant, or to their possession, when the forfeiture is pro-

vided by statute, without judicial proceedings to ascertain and determine the failure of the grantee to perform the conditions."

This decision was preceded by the cases of Schulenberg *vs.* Harriman (21 Wall., 44), and United States *vs.* Repentigny (5 Wall., 211), to the same effect. These decisions, of course, are limited, and that carefully, to the language of the grants discussed, which provide clearly for the exercise of such power, and do not, as they could not, embrace cases in which the grants were upon different conditions. Without undertaking to decide whether in all grants of land by the United States to railroads Congress can declare this forfeiture, the committee considered it best to adopt some measure that would avoid this question, and place the parties in attitude towards each other that would insure to each fair dealing and justice as far as can be done.

They propose to direct the Attorney-General to institute proper judicial proceedings against any railroad companies that he may have reason to believe are in default as to the conditions of their grants, to bring about a forfeiture, and secure the rights of the Government to the lands, This proceeding, in the nature of an information, will bring the supposed defaulting company into court, to be heard in defense against a forfeiture; and the court can enter such a judgment or decree as in its opinion will secure to the Government not merely in declaring a forfeiture, if need be, but in declaring resumption of the lands granted. Appeal to be allowed as in other cases in the courts.

This proceeding, however, is not to interfere in any manner with any right of the executive under his authority to enforce and execute the laws to take possession and dispose of any such lands, without these proceedings where he could have done so if no act as contemplated by the committee had passed.

While the committee had no doubt at all that some steps should be taken to declare forfeitures in many of these cases, yet they were of opinion that in all cases where reasonable and proper diligence and exertions had been used by any of these companies, they should have the benefit of the same in any proceedings against them; and accordingly the committee were of opinion it would be just to allow the companies to show in defense that for one year previous to the passsage of the act any substantial progress in good faith in the building of the roads, limiting this period to the first day of December, 1882. The *substantial progress* is to be considered and passed upon by the Attorney-General first before instituting proceedings, and then, if pleaded in defense of the proceedings instituted, the court is to pass upon it. Of course it is a difficult matter to determine what is substantial progress, and no general rule touching it can be laid down. Therefore, the committee would leave it general in this way, to be determined upon in each particular case. Some provision of this kind is necessary, as certainly the grants were made with a view of securing the building and completion of the roads; and when efforts looking earnestly to that end are being made, the Government would not desire forfeitures of the grants. And this is in no sense a waiver by the Government of any condition or requirement imposed upon any corporation; and when this progress is not shown to exist, it is made the imperative duty of the Attorney-General to proceed against the companies.

It is believed by the committee such a law will enable the Government to get rid of all these grants of lands to railroads that are not being used for legitimate purposes, or are misused, or in which no efforts are being made to build the proposed roads; and at the same time to have carried out all these grants in which the companies in good faith are trying to finish their roads. In other words, while such a law would be protective of the rights of the Government it would not be oppressive to corporations that are working and dealing fairly with the liberality of the Government in trying to secure the objects of those grants.

And to this end they have agreed on the bill herewith proposed, and recommend its passage.

A BILL providing for the forfeiture of railroad grants in certain cases.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in all cases where grants of lands by Congress have been made to aid in internal improvements, and said lands have not been patented by the United States to the grantee, where the grantee was a corporation, or where the lands were granted to the State, and said lands have not been disposed of by the State, and said grants have become subject to forfeiture or resumption by the United States for any cause whatever, it shall be the duty of the Attorney-General to cause suit or suits to be brought in the name of the United States in the proper courts having jurisdiction, to obtain judgments declaring the forfeiture or right of resumption by the United States of such lands, as the case may be, which suit or suits shall be subject to trial or hearing like other suits, with right to writ of error or appeal by either party, as in other cases. This section shall not be construed so as to prevent the executive authority of the United States from taking possession and disposing of any such lands without judicial proceedings in any case in which it could lawfully do so if this act had not been passed.

SEC. 2. That the provisions of the first section of this act shall not apply to the case of any railroad (except as mentioned in section three of this act) in which, within one year preceding the passage of this act, any substantial progress in building the same has been accomplished in good faith, and shall be continued in the manner hereinafter mentioned, or in which, before the first day of December, eighteen hundred and eighty-two, there shall have been made any substantial progress in the building thereof, and which progress shall be continued in good faith, as hereinafter mentioned. The foregoing provisions of this section, limiting the application of section one of this act, shall cease, determine, and be of no effect in the case of every railroad affected thereby the building of which shall not be in good faith continued after said first day of December, eighteen hundred and eighty-two, to the number of miles in each year required by the act or acts granting such lands, or act or acts amendatory thereof, and in the manner so required, until such railroad shall be entirely completed.

SEC. 3. That nothing in this act shall be construed to be a waiver of any condition or requirement imposed upon any corporation or in respect of any such grant by the act or acts granting lands to or in aid of it or amendatory thereof.

SEC. 4. That in every case in which any corporation, or its lawful successor, being lawfully entitled so to do, shall not do the acts mentioned in section two of this act, it shall be the imperative duty of the Attorney-General of the United States to proceed against it as provided in section one of this act.

NOTE.—This bill was reported and read twice, and did not become a law.

[House Ex. Doc. No. 100, Forty-seventh Congress, second session.]

TELEGRAPH LINES ALONG LAND-GRANT RAILROADS.

Letter from the Secretary of the Interior, in response to a resolution of the House of Representatives in relation to telegraph lines along the lines of land-grant railroads.

FEBRUARY 27, 1883.—Referred to the Committee on the Post-Office and Post-Roads and ordered to be printed.

DEPARTMENT OF THE INTERIOR,
Washington, February 27, 1883.

SIR: In answer to House resolution of the 12th ultimo, calling for information concerning telegraph lines along the lines of railroads subsidized by bonds or lands, I have the honor to transmit herewith copy of report on the subject by Commissioner of Railroads under date of yesterday.

Very respectfully,

H. M. TELLER,
Secretary.

The Hon. SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEPARTMENT OF THE INTERIOR,
OFFICE OF COMMISSIONER OF RAILROADS,
Washington, February 26, 1883.

SIR: I have the honor to return the resolution of the House of Representatives, dated January 12, 1883, referred by you to this office, with the following answer:

In my report for 1882, page 202, a list is given of all the telegraph companies which have filed their acceptance of the provisions of the act of July 24, 1866, up to June 30, 1882, comprising fifty-five companies.

No returns are made to this office which would enable me to give specific answer to the very general inquiry it proposes. I have endeavored, however, to procure such information by special inquiry of the railroads as I was informed by the author of the resolution would be sufficient.

Replies have been received from the Union Pacific, Central Pacific, Southern Pacific, and Northern Pacific, the last of which was not received until this morning.

The president of the Union Pacific Railway Company answers:

"I have the honor to state, in answer to the first resolution, that this company has complied with the laws of Congress respecting the construction, operation, and maintenance of telegraph lines for the use of the Government and the public.

"In answer to the second resolution, I have the honor to state that this company has not undertaken to lease or assign its telegraph facilities or property, so far as relates to the transmission of commercial messages for the Government and the public."

The vice-president of the Central Pacific Railroad Company has sent certified copies

of existing contracts between this road and those controlled by it, and the Western Union Telegraph Company, and writes me that—

"The Central Pacific Railroad Company, throughout the entire extent of its main line and branches so aided by bonds or by lands, has complied with the laws of Congress respecting the construction, operation, and maintenance of their own telegraph lines for the use of the Government and the public, and that no contracts have been made by that company with any telegraph company by which it has undertaken to lease or assign any of its telegraph facilities or property."

The agent and attorney of the Southern Pacific Railroad Company writes me that it has fully complied with the laws of Congress respecting the construction, operation, and maintenance of its own telegraph lines for the use of the Government and the public, and that it has not leased or assigned any of its telegraph facilities or property.

I am this morning in receipt of a communication from the president of the Northern Pacific Railroad Company, stating that—

"This company has complied and is complying with the laws of Congress respecting the construction, operation, and maintenance of its telegraph lines for the use of the Government and the public; and that it has neither leased nor assigned, nor undertaken to lease or assign, its telegraph facilities nor property, so far as relates to the transmission of commercial messages for the Government or the public, or otherwise."

The company entered into contract with the Northwestern Telegraph Company and the Western Union Telegraph Company, under date of May 1, 1880, by which these telegraph companies were to construct the telegraph lines of the Northern Pacific Company thereafter to be constructed, in manner and of quality and description, in all respects as required by the act of Congress, the Northern Pacific Company to pay a stipulated price for said construction and to terminate the contract fifteen years from its date.

"This company, in the mean time, is in no way hindered or debarred from performing any or all telegraph service on its lines, by itself or by any capable agent or agents it may employ."

I know of no further information in this office bearing upon the matters inquired of in the resolution.

Very respectfully,

WM. H. ARMSTRONG,
Commissioner.

Hon. H. M. TELLER,
Secretary of the Interior.

LAND GRANTS TO RAILROADS.

(Inserted as containing much general information. The estimates and figures of the General Land Office, heretofore given in this chapter, are standard, and are used in adjusting land grants.)

[House Mis. Doc. No. 10, Forty-sixth Congress, third session.]

Letter from the Auditor of Railroad Accounts (to Hon. Robert M. McLane, of the House of Representatives), relative to land grants made by the United States to aid in the construction of the Pacific Railroads.

FEBRUARY 7, 1881.—Ordered to be printed.

DEPARTMENT OF THE INTERIOR,
OFFICE OF AUDITOR OF RAILROAD ACCOUNTS,
Washington, D. C., February 3, 1881.

SIR: I have the honor to transmit herewith a report prepared in this office, in compliance with your request of June 18, 1880, indorsed on a draft of a resolution which the Committee on Pacific Railroads authorized you to report to the House at its last session, but which, in the press of other business, was not reached before adjournment.

As the design of the resolution proposed was to ascertain, as accurately as possible, all facts connected with the land grants made by the United States to aid in the construction of the Pacific Railroads, special inquiry has been made in order to obtain the fullest information.

The report has been shaped so as to take up separately each one of the four great transcontinental routes or railroads located on the forty-seventh, fortieth, thirty-fifth, and thirty-second parallels of north latitude, giving details as to each main and branch line, with a general recapitulation showing the whole result.

Very respectfully,

THEO'S FRENCH,
Auditor.

Hon. ROBERT M. MCLANE,
Chairman Committee on Pacific Railroads,
House of Representatives.

REPORT ON THE QUANTITY AND VALUE OF PUBLIC LANDS GRANTED BY CONGRESS TO AID IN THE CONSTRUCTION OF THE PACIFIC RAILROADS.

DEPARTMENT OF THE INTERIOR,
OFFICE OF AUDITOR OF RAILROAD ACCOUNTS,
Washington, D. C., January 26, 1881.

The proposed resolution in regard to the matters embraced in this report is as follows:

"*Resolved, &c.*, That the Committee on the Pacific Railroads, by subcommittee, be authorized to sit during the recess for the purpose of ascertaining the quantity and value of the public lands heretofore granted by Congress to aid in the construction of the Pacific Railroads which have not vested in said roads by the terms of the several laws granting such lands, and the quantity and value of the said lands which have vested in said roads, how the same have been disposed of, at what price, and also how the proceeds of the same have been disposed of; also, the cost, in detail, of the construction of completed road and the estimated cost, in detail, of the construction of road necessary to be built in order to complete the said railroads in accordance with the requirements of law; also, to ascertain the cost, or estimated cost, of construction of any and all railroads built or proposed to be built parallel or adjacent to the said railroads, whether or not the same are located on the line or lands reserved by any of the said granting acts of Congress; with authority to employ a clerk during that time, to obtain the assistance of the Auditor of Railroad Accounts, and to send for persons and papers or examine the same at the principal offices of said railroads, and all expenses necessarily incurred in the execution of this resolution shall be paid out of the contingent fund of the House."

For the purpose of this report the Pacific railroads have been classified as follows, viz:

1. Northern, or route on forty-seventh parallel of latitude.
2. Union Central, or route on fortieth parallel of latitude.
3. New Mexico Southern, or route on thirty-fifth parallel of latitude.
4. Texas Southern, or route on thirty-second parallel of latitude.

The first or northern line is known as Northern Pacific, and extends from the Montreal River, in Wisconsin, to Puget's Sound, Washington Territory. Branch roads are intended to be built to Portland, Oreg., and to other points as may be deemed advisable. The main line and the branch to Portland only have land grants.

The second or Union Central line embraces the roads heretofore known as Union Pacific, Central Pacific, Kansas Pacific, Central Branch Union Pacific, and Sioux City and Pacific, all of which are subsidized with bonds as well as lands. It also embraces in its system the Denver Pacific, and the Burlington and Missouri River Railroad in Nebraska, which are subsidized with lands only.

The third or New Mexico Southern line extends from Missouri and Arkansas through the Indian Territory to California and the Pacific Ocean, and has a subsidy of lands only.

The fourth or Texas Southern line extends from Louisiana through Texas to connect with the Southern Pacific at Yuma, on the Colorado River, thus obtaining a through line to San Francisco, Cal. This line has a subsidy of lands only.

NORTHERN, OR ROUTE ON FORTY-SEVENTH PARALLEL.

The Northern Pacific Railroad Company.—This company was chartered by an act of Congress approved July 2, 1864, entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Lake Superior to Puget's Sound, on the Pacific Coast, by the northern route" (13 Stat., 365). (Report of Auditor of Railroad Accounts, 1880, p. 152.)

Section 1 designates the route as follows, viz: "Beginning at a point on Lake Superior, in the State of Minnesota or Wisconsin; thence westerly by the most eligible railroad route, as shall be determined by said company, within the territory of the United States, on a line north of the forty-fifth degree of latitude, to some point on Puget's Sound, with a branch, via the valley of the Columbia River to a point at or near Portland, in the State of Oregon, leaving the main trunk line at the most suitable place not more than three hundred miles from its western terminus."

Section 2 grants to the company the right of way through the public lands to the extent of "two hundred feet in width on each side of said railroad, including all necessary ground for station buildings, workshops, depots, machine-shops, switches, side tracks, turn-tables, and water stations."

Section 3 grants to the company "every alternate section of public land, not mineral, designated by odd numbers, to the amount of twenty alternate sections per mile on each side of said railroad line, as said company may adopt, through the Territories

of the United States, and ten alternate sections of land per mile on each side of said railroad whenever it passes through any State, and whenever on the line thereof the United States have full title, not reserved, sold, granted, or otherwise appropriated, and free from pre-emption, or other claims or rights, at the time the line of said railroad is definitely fixed, and a plat thereof filed in the office of the Commissioner of the General Land Office."

Section 6 enacts "that the President of the United States shall cause the lands to be surveyed for forty miles in width on both sides of the entire line of said road, after the general route shall be fixed, and as fast as may be required by the construction of said railroad; and the odd sections of land hereby granted shall not be liable to sale, or entry, or pre-emption before or after they are surveyed, except by said company, as provided in this act; but the provisions of the act of September, eighteen hundred and forty-one, granting pre-emption rights, and the acts amendatory thereof, and of the act entitled 'An act to secure homesteads to actual settlers on the public domain,' approved May twenty, eighteen hundred and sixty-two, shall be, and the same are hereby, extended to all other lands on the line of said road, when surveyed, excepting those hereby granted to said company. And the reserved alternate sections shall not be sold by the Government at a price less than two dollars and fifty cents per acre when offered for sale."

Sections 8 and 9 give the conditions attached to the grant as follows, viz: "That each and every grant, right, and privilege herein are so made and given to, and accepted by, said Northern Pacific Railroad Company upon and subject to the following conditions, namely: That the said company shall commence the work on said road within two years from the approval of this act by the President, and shall complete not less than fifty miles per year after the second year, and shall construct, equip, furnish, and complete the whole road by the fourth day of July, anno Domini eighteen hundred and seventy-six;" and "That the United States make the several conditioned grants herein, and that the said Northern Pacific Railroad Company accept the same, upon the further condition that if the said company make any breach of the conditions hereof, and allow the same to continue for upwards of one year, then in such case, at any time hereafter, the United States, by its Congress, may do any and all acts and things which may be needful and necessary to insure a speedy completion of the said road."

Section 10 enacts that "no mortgage or construction bonds shall ever be issued by said company on said road, or mortgage, or lien made in any way, except by the consent of the Congress of the United States."

Section 20 enacts "That the better to accomplish the object of this act, namely, to promote the public interest and welfare by the construction of said railroad and telegraph line, and keeping the same in working order, and to secure to the Government at all times (but particularly in time of war) the use and benefits of the same for postal, military, and other purposes, Congress may at any time, having due regard for the rights of said Northern Pacific Railroad Company, add to, alter, amend, or repeal this act."

The joint resolution approved May 7, 1866 (14 Stat., 355), extended the time for commencing and completing the railroad for the term of two years. (See Report of Auditor of Railroad Accounts for 1880, page 159.)

The joint resolution approved July 1, 1868 (15 Stat., 255), amended section 8 of the original act so as to read as follows: "That each and every grant, right, and privilege herein are so made and given to and accepted by said Northern Pacific Railroad Company upon and subject to the following conditions, namely: That the said company shall commence the work on said road within two years from and after the second day of July, eighteen hundred and sixty-eight, and shall complete not less than one hundred miles per year after the second year thereafter, and shall construct, equip, furnish, and complete the whole road by the fourth day of July, anno Domini eighteen hundred and seventy-seven." (Auditor's Report for 1880, page 159.)

By the joint resolution approved March 1, 1869 (15 Stat., 346), Congress gave its consent for the company "to issue its bonds and to secure the same by mortgage upon its railroad and its telegraph line, for the purpose of raising funds with which to construct said railroad and telegraph line between Lake Superior and Puget Sound, and also upon its branch to a point at or near Portland, Oregon." (Auditor's Report for 1880, page 160.)

The joint resolution of April 10, 1869 (16 Stat., 57), authorized the construction of a branch from a point near Portland to Puget Sound (the line from Kalama to Tacoma, constructed and in operation).

By resolution of May 31, 1870 (16 Stat., 378), Congress authorized the company "to issue its bonds to aid in the construction and equipment of its road, and to secure the same by mortgage on its property and rights of property of all kinds and descriptions, real, personal, and mixed, including its franchise as a corporation"; also, to construct its main line via the valley of the Columbia River, with a branch across the

Cascade Mountains to Puget Sound; and increased the indemnity limits to sixty miles on each side of the road.

Section 2 of this resolution provides "that Congress may at any time alter or amend this joint resolution, having due regard to the rights of said company, and any other parties." (Auditor's Report for 1880, page 161.)

Under the authority of this resolution the company, on July 1, 1870, issued its thirty-year bonds bearing interest at the rate of 7.3 per cent. per annum, and secured the same by a mortgage, in accordance with the resolution, of an amount of about $30,000,000. On the 16th of April, 1875, the company having previously defaulted upon its interest, in proceedings of foreclosure, the United States circuit court for the southern district of New York appointed a receiver. By a decree of that court the property and franchises were sold at auction, August 12, 1875, and were purchased by a committee of bondholders, the sale being confirmed by the court August 25, 1875. The company was reorganized September 30, 1875, upon a plan by which the holders of the bonds of the company were reimbursed for the principal and interest up to and including July 1, 1878, in preferred stock at par, which it was proposed to issue to the amount of $51,000,000. This preferred stock is entitled to 8 per cent. dividends before any dividends are paid on the common stock, and is receivable at par for lands belonging to the company east of the Missouri River. Common stock was issued to the holders of the stock of the old company, share for share, and $49,000,000 of the common stock have been issued, the plan of reorganization being given in the annual report of the company for 1876 (page 43).

In 1879 the company placed first mortgages upon the Missouri and Pend d'Oreille divisions of its road, and to June 30, 1880, had issued nearly $4,000,000 of the bonds secured thereby. On January 1, 1881, the company executed a general first mortgage on all its railroads, lands, property, and franchises to secure an issue of bonds to the amount of $25,000 per mile of the main and branch lines, payable in forty years, and bearing interest at the rate of 6 per cent. per annum. This last mortgage provides for taking up, retiring, and canceling the bonds issued on the Missouri and Pend d'Oreille divisions; it is also provided in the mortgage that all moneys derived from the sales of lands are applicable to the payment of the interest and principal of the bonds; a sinking fund is also created, beginning July 1, 1886, by which 1 per cent. per annum is required to be paid to the trustee in equal semi-annual installments.

From the reports of the General Land Office the rights of the Northern Pacific Railroad Company attached to their grant as follows, viz: By map of general route through Minnesota and part of Washington Territory, August 13, 1870; through Dakota, Montana, Idaho, and a part of Washington Territory, February 21, 1872; of a branch line in Washington Territory, August 15, 1873; from Thomson to Moorhead, Minn., November 21, 1871; from Moorhead, Minn., to Bismarck, Dak., May 26, 1873; from Kalama to Tenino, Wash., September 13, 1873; from Tenino to Tacoma, Wash.; May 14, 1874.

The construction of the Northern Pacific Railroad was begun July 1, 1870, and between that date and March 1, 1874, a period of three years and nine months, 530 miles of subsidized road had been completed and put in operation. To November, 1, 1880, 680 miles have been completed and put in operation, in addition to 220 miles of other road in operation, and about 100 miles of new road not quite finished; in all, 1,000 miles. The following table shows the acceptance of the several sections of subsidized railroad of this company:

No. of section.	From—	To—	Miles.	Opened for business.	Examined by commissioners.	Accepted by the President.
1	Thomson, Minn.....	Red River.....	228	Oct. 1, 1872	Dec. 10, 1872	Jan. 6, 1873
2	Kalama.....	Tenino, Wash	65	July 15, 1873	Aug. 16, 1873	Sept. 10, 1873
3	Fargo.....	Bismarck, Dak	196.4	Oct. 1, 1873	Nov. 24, 1873	Dec. 1, 1873
4	Tenino	Tacoma, Wash	40.1	Mar. 1, 1874	Mar. 5, 1874	May 12, 1874
5	Missouri River	One hundredth mile-post.	100	July 1, 1880	July 26, 1880	Aug. 16, 1880
6	One hundredth mile-post.	One hundred and fiftieth mile-post west.	50	Nov. 1, 1880	Nov. 20, 1880	Dec. 20, 1880
	Total	.....	679.5			

The length of road and extent of land-grant for the whole line included in the charter act and amendments may be stated approximately as follows, viz:

State or Territory.	Miles of road.	Acres per mile of road.	Total acres granted.
Wisconsin	110	12,800	1,408,000
Minnesota	265	12,800	3,392,000
Dakota	450	25,600	11,520,000
Montana	800	25,600	20,480,000
Idaho	75	25,600	1,920,000
Washington	750	25,600	19,200,000
Totals	2,450	*23,640	57,920,000

*Average.

The latest estimate of lands which the company may obtain is as follows, viz:

	Miles.	Acres.
Minnesota and Dakota divisions	426	5,500,000
Missouri division	217	4,600,000
Yellowstone division	340	7,400,000
Rocky Mountain division	198	4,000,000
Clark's Fork division	282	5,800,000
Pend d'Oreille division	209	3,600,000
Main line to Tacoma across Cascade Mountains	250	4,800,000
Branch from Pend d'Oreille division to Kalama	250	4,000,000
Pacific division	145	2,300,000
Totals	2,317	42,000,000
Estimated for Wisconsin division	112	500,000

To June 30, 1880, there had been patented to the company 746,509 acres. The company has earned by construction about 15,000,000 acres of land to November 1, 1880, and sold to June 30, 1880, 2,600,000 acres for $9,000,000. The price of the company's agricultural lands is $2.50 per acre; coal and timber lands being reserved from sale until the country is occupied. The lands not yet earned by the company are about 27,000,000 acres, situated chiefly in Montana, Idaho, and Washington Territories.

The value of the company's lands, vested and unvested, may be reasonably estimated at $2.50 per acre, so that the lands unsold are worth, say (39,900,000 acres at $2.50), $99,750,000. For a description of some of these lands reference is made to page 82 of the last Annual Report of the Auditor of Railroad Accounts.

In 1874 the company in its report to this Department gave the cost of the road and fixtures to June 30, 1874, as $21,353,416.11, and to that time had constructed 530 miles of railroad, being an average cost of $40,289 per mile. The expenditure by items is as follows:

Surveys	$1,108,278 52
Construction, including docks and wharves	14,446,356 54
Auxiliary and connecting rail and water lines	2,728,980 09
Equipment	2,434,346 25
General and incidental expenses during construction	635,454 71
Total	21,353,416 11

In addition to these 530 miles, the company has constructed a branch line in Washington Territory, from Tacoma to Wilkeson, 32 miles in length.

The road yet to be constructed and accepted may be stated as follows, with the estimated cost of the same, viz:

Wisconsin division—Montreal River to Thomson Junction—122 miles, at $20,000 per mile	$2,440,000
Missouri division—Missouri River to Yellowstone River—217 miles, at $12,000 per mile, including an iron bridge over the Missouri River, at Bismarck, the cost of which is estimated at nearly $100,000, or about	3,500,000
Yellowstone, Rocky Mountain, and Clark's Fork divisions—Yellowstone River to Lake Pend d'Oreille—820 miles, at $30,000 per mile	24,600,000

Pend d'Oreille division—Lake Pend d'Oreille to Columbia River—209 miles, at $21,500 per mile	$4,500,000
Columbia River division—junction of Columbia and Snake Rivers to Portland—238 miles, at $31,500 per mile	7,500,000
Cascade Mountain division—junction of Columbia and Snake Rivers to Puget Sound—219 miles, at $30,000 per mile	6,570,000
Pacific division—Portland to Kalama—40 miles, at $25,000 per mile	1,000,000
Total road to be constructed, 1,865 miles, at an estimated average cost of 26,868 per mile, amounting to	50,110,000

The entire road, when completed—2,700 miles—will have cost about $75,000,000, or at the rate of $28,000 per mile.

The conditions as to all government service on this road are found in section 11 of the charter act, among which one is that the road is "subject to such regulations as Congress may impose, restricting the charges for such government transportation."

THE UNION-CENTRAL LINE OR ROUTE.

This line, being composed of a main and branch lines having different owners, will be treated separately, and in the following order: (1) Union Pacific Railroad Company, (2) Kansas Pacific Railway Company, and (3) Denver Pacific Railway and Telegraph Company, composing the (4) Union Pacific Railway Company (consolidated); (5) Central Pacific Railroad Company, (6) Western Pacific Railroad Company, and (7) California and Oregon Railroad Company, composing the (8) Central Pacific Railroad Company; (9) Central Branch Union Pacific Railroad Company; (10) Sioux City and Pacific Railroad Company; (11) Burlington and Missouri River Railroad Company in Nebraska.

The Union Pacific Railroad Company.—This company, chartered by acts of Congress approved July 1, 1862 (12 Stat., 489), and July 2, 1864 (13 Stat., 356), received from the United States a grant of public lands, to aid in the construction of its railroad and telegraph line, amounting to 20 sections, or 12,800 acres, per mile of road.

The length of road subsidized is 1,038.68 miles, extending from the Missouri River, near Omaha, Nebr., to a point 5 miles west of the crossing of the Utah Central Railroad in Ogden, Utah. If none of the land had been previously disposed of by the United States, the total grant would have been 13,295,104 acres. The quantity which the company will obtain is estimated by the General Land Office to be about 12,000,000 acres; but the estimate of the land commissioner of the company places it at 11,200,000 acres.

The location of the lands may be generally stated as follows, namely: 4,800,000 acres in Nebraska, 4,600,000 acres in Wyoming, 700,000 acres in Colorado, and 1,100,000 acres in Utah; of which it may be said that 3,500,000 acres are agricultural lands, 4,000,000 acres are grazing lands, and 3,700,000 acres desert or waste.

About 2,000,000 acres of the agricultural lands remained unsold December 31, 1879, worth, at an average price of $3.50 per acre, $7,000,000, and about 4,000,000 acres of the grazing lands, worth, at $1.25 per acre, $5,000,000; in all, worth $12,000,000; without estimating anything for the 3,700,000 acres of desert lands. To June 30, 1880, 1,859,475 acres of land had been patented to the company. To December 31, 1879, the company had sold nearly 2,000,000 acres, as follows:

Year.	Acres.	Average price per acre.	Amount.
1869	128,825.28	$4.555	$586,808.29
1870	164,058.62	4.385	719,758 14
1871	206,605.97	3.855	795,557 53
1872	172,108.67	4.39	755,430 94
1873	177,093.50	5.55	983,030 33
1874	235,749.14	4.66	1,099,467 21
1875	111,965.55	3.66	409,916 10
1876	128,696.21	3.02	389,773 46
1877	69,015.87	4.98	343,768 02
1878	318,903.47	4.88	1,557,082 32
1879	243,337.31	4.141	1,007,855 63
Total, 11 years	1,956,349.59	4.42	8,648,447 97

From these sales forfeited and canceled contracts must be deducted, which leaves the net sales to the same date 1,568,438 acres, amounting to the sum of $6,916,811.58, being an average price of $4.41 per acre.

The lands are sold in small tracts, averaging about 100 acres to each purchaser, so that there have been 15,000 to 16,000 purchasers. Some sales are made for cash, but the large majority of the sales have been on time, deferred payments drawing interest at the rate of 6 per cent. per annum.

The gross proceeds of sales, interest, forfeitures, &c., to December 31, 1879, have been $8,173,846.83, of which amount $4,412,033.88 has been received in cash, and the remainder, $3,761,812.95, in notes or land contracts yet to be paid. These gross proceeds are applied to the redemption of land-grant mortgage bonds, of which $10,400,000 have been issued and $4,101,000 redeemed.

The expenses of the land department, taxes on land, &c., amounting to $1,889,977.68, to December 31, 1879, have been paid by the company out of its ordinary income.

The cost of the railroad and its equipment to December 31, 1879, amounted to $118,682,223.96, or at the rate of $114,262.54 per mile. The details are as follows, viz:

Payments to contractors:		
"Oakes Ames" contract		$57,140,102 94
"Davis" contract		23,129,671 01
"Hoxie" contract		11,966,799 63
Total contracts		92,236,573 58
Expended by the company for—		
Right of way		$165,675 66
Fencing and crossings		250,700 68
Roadbed and track		100,375 78
Coal sheds		13,912 33
Bridging, piling, and trestling		158,542 51
Snow-sheds and snow-fences		393,978 14
Passenger and freight buildings		1,059,904 27
Machine-shops, car-shops, machinery, engine-houses, and turn-tables		436,012 21
Water-tanks, wells, pumping-houses, &c		124,591 48
Hotels, tenements, &c		226,790 77
Rolling-mills, scrap-furnaces, rail-mills, &c		228,968 09
Equipment other than furnished by contractors		2,193,998 69
Express outfit		12,503 71
Government commissioners and Government directors during period of construction		188,630 13
Omaha bridge and approaches		2,255,089 30
Engineering, agencies, &c		1,891,510 57
Total cost of construction		101,937,757 90
Less sale of constructed road	$2,840,000 00	
Sale of constructed telegraph line	104,432 54	
Total amount sold		2,944,432 54
Net cost of property		98,993,325 36
Interest and discount expenses during construction:		
Interest, discount, and commissions	$2,750,284 63	
Losses on securities	12,215,868 39	
Interest paid on bonds outstanding	4,000,000 00	
Discount on Omaha bridge bonds	440,000 00	
Interest on Omaha bridge bonds	162,329 94	
Premium on Omaha bridge bonds	8,032 25	
Expenses paying drawn bonds, &c	4,446 02	
Total amount, interest, &c		19,580,961 23
Unexplained difference between cost as stated on ledger and items as above		107,937 37
Total cost of road and equipment		118,682,223 96

The cost of building and equipping a railroad like the Union Pacific main line from Council Bluffs to Ogden, with similar grades and on the same route, the whole of it laid with steel rails, at the present time may be stated approximately at $32,000,000; say 500 miles Council Bluffs to Cheyenne, at $20,000 per mile, and 540 miles Cheyenne to Ogden, at $40,000 per mile.

The Kansas Pacific Railway Company.—This company, originally known as "the Leavenworth, Pawnee and Western Railroad Company," and afterwards as "the Union Pacific Railroad Company, Eastern Division," was chartered by the State of

of Kansas February 1, 1855, and received from the United States, under the Pacific Railroad acts before referred to, a grant of public lands to aid in the construction of its railroad and telegraph line. The grant was twenty sections, or 12,800 acres per mile of road.

The length of road subsidized is 638.6 miles, extending from the eastern boundary line of the State of Kansas, in Kansas City, to Denver, Colo. The quantity of land granted would have amounted to 8,174,000 acres, if none of the lands had been otherwise or previously disposed of by the Government. The General Land Office has estimated that the company will receive about 6,000,000 acres, but the land commissioner of the company estimates about 200,000 acres more.

The location of this company's lands is as follows: 2,600,000 acres in Colorado, 3,600,000 acres in Kansas. Of these, probably one-third, say 2,000,000 acres, are "grazing" lands, and the remainder, say 4,000,000 acres, are "agricultural." The lands which were unsold December 31, 1879, lie chiefly in Western Kansas—about 2,000,000 acres between Manhattan, Riley County, and Grinnell, Gove County, worth on an average nearly $3 per acre, and the remainder, 2,800,000 acres, between Grinnell and Denver, worth probably $2 an acre; in all, worth about $11,000,000. To June 30, 1880, 828,830.44 acres had been patented to the company. To December 31, 1879, the company had sold 1,521,111.53 acres, as follows, viz:

Year.	Acres.	Average price per acre.	Amount.
1868	111,271.29	$2 96	$329,812 67
1869	382,885.20	2 91	1,114,578 57
1870	124,168.59	3 19	396,196 06
1871	123,935.82	3 50	434,235 52
1872	68,851.29	2 92	199,841 71
1873	25,423.43	3 67	93,175 10
1874	35,393.96	3 29	117,708 61
1875	61,366.58	3 57	218,808 60
1876	74,554.09	4 23	315,420 62
1877	135,994.45	3 31	449,234 44
1878	207,938.03	3 38	795,997 83
1879	169,328.80	4 09	592,930 53
Total	1,521,111.53	3 39	5,157,940 26

Forfeited and canceled contracts for 229,657.16 acres, amounting to $737,979.77, being deducted, leaves the net sales 1,291,454.37 acres, and the amount for which sold $4,419,960.49, or an average of $3.42 per acre.

The lands have been sold principally on time, at one-fifth cash and balance in four annual installments, with interest at the rate of 6 per cent. per annum.

The gross proceeds of sales, interest, forfeitures, &c., to December 31, 1879, have been $4,404,232.52, of which $3,016,022.60 has been received in cash, and the remainder—$1,388,209.92—is held as land notes or contracts. By the terms of the land-grant mortgages, the gross proceeds of sales of land are to be applied to the redemption of the bonds issued thereon. The expenses, commissions, taxes, &c., paid to December 31, 1879, have amounted to $694,997.90.

To December 31, 1879, the cost of this railroad and its equipment—670.5 miles—is reported by the company as $34,359,540.66, which is at the rate of $51,244.65 per mile.

A railroad like the Kansas Pacific, 670 miles, most of it through a rolling prairie country, could be built with steel rails at this time for $15,000 per mile, and fully equipped for $5,000 per mile; in all $20,000 per mile, or $13,500,000.

Denver Pacific Railway and Telegraph Company.—This company was incorporated November 19, 1867, under the general laws of the territory of Colorado relating to corporations, and was organized December 14, 1867, with a board of trustees. The first annual meeting of stockholders was held on December 14, 1868, when permanent officers were elected.

By the act of Congress approved March 3, 1869, the Union Pacific Railway Company, Eastern Division, was authorized to transfer to the Denver Pacific Railway and Telegraph Company all the rights and privileges, subject to all the obligations pertaining to that part of its line of railroad and telegraph between Denver City and Cheyenne. Under this law the company obtained its land-grant of twenty sections, or 12,800 acres per mile.

The length of road constructed is 105.89 miles, which entitles the company to 1,355,292 acres of land; but the General Land Office estimates the grant which the

company will eventually receive as 1,100,000 acres, while the estimate of the company is only 971,771 acres, 800,000 acres of which are covered by a first mortgage given to secure an issue of $2,500,000 bonds. The company's officers in 1870 estimated the value of the 800,000 acres included in the mortgage at $3,000,000.

All of the company's lands are in Colorado, and are among the most fertile and valuable portion of the agricultural lands of that State, and some of the lands have valuable coal deposits.

By the terms of the contract for building the railroad, all of the company's lands granted by Congress over and above the 800,000 acres covered by the mortgage referred to were to revert to the contractors. These lands being left out of the question, the company had remaining December 31, 1879, 639,269 acres unsold, the average value of which may be estimated at $2.50 per acre, amounting to $1,598,170. To June 30, 1880, only 49,811.59 acres had been patented to the company; December 31, 1879, the company had sold lands as follows:

Year.	Acres.	Average price per acre.	Amount.
1870	32,613.00	$4 17	$136,076 43
1871	41,543.55	3 94	163,858 71
1872	19,959.09	4 07	81,195 91
1873	17,951.95	4 61	82,676 96
1874	10,918.54	5 21	56,877 83
1875	3,676.52	6 12	22,488 02
1876	4,364.37	14 32	62,497 50
1877	26,101.56	5 25	136,963 89
1878	34,523.47	3 79	130,902 50
1879	7,554.58	5 81	43,893 84
Totals	199,206.63	4 60	917,431 59

Deducting canceled sales, the net quantity sold during this period was 160,731.89 acres for $713,881.13, or at an average price of $4.44 per acre.

The cost of the road, 105.89 miles, as reported to this office, is $6,495,350, but no details of the expenditures have been obtained. It was accepted by the President May 2, 1872. A parallel road like this could be built to-day for $15,000 per mile—say for $1,600,000.

The Union Pacific Railway Company.—This company is the successor, by consolidation, to the Union, Kansas, and Denver Pacific Companies.

Summarizing the statements heretofore given as to the three companies named, the following facts are shown, viz:

Estimated quantity of land granted, acres	22,824,396
Estimated quantity of land vested under the grant, acres	19,100,000
Quantity sold to December 31, 1879, acres	3,020,625
Gross amount realized from sales	$12,050,653 00
Railroad subsidized with lands, miles	1,783
Cost of road and equipment, 1,815 miles	$154,485,642 29
Cost per mile, road and equipment	$85,116 00
Estimated value of unsold lands, 16,000,000 acres, at $1.50 per acre	$24,000,000 00
Estimated present cost of similar road, 1,815 miles, at $30,000 per mile, on an average	$54,450,000 00

The Central Pacific Railroad Company.—This company is the successor, by consolidation, June 23, 1870, of the Central Pacific Railroad Company of California, organized June 28, 1861, and the Western Pacific Railroad Company, organized December 13, 1862, both deriving their charter powers from the State of California, although the State, by act of April 4, 1864, virtually dissolved the company as a State corporation. Subsequently, on August 22, 1870, the Central Pacific was consolidated with the California and Oregon, the San Francisco, Oakland and Alameda, and the San Joaquin Valley Railroad Companies.

So far as relates to the subjects of this report, the three roads, Central Pacific, Western Pacific, and California and Oregon, will be treated separately.

The Central Pacific Railroad extends from Sacramento to a point five miles west of the crossing of the Utah Central Railroad in Ogden, Utah, 738.45 miles, of which but 737.50 miles have been subsidized with bonds and lands.

The land grant is under the same acts of Congress as that of the Union Pacific, and amounts to twenty sections, or 12,800 acres, per mile, equal to 9,440,000 acres for the entire road, from which, however, deducting lands previously granted, sold, or re-

served by the United States, estimated by the General Land Office at 1,440,000 acres, leaves about 8,000,000 acres vested in the company.

Of these 8,000,000 acres, 708,862 had been patented to the company to June 30, 1880, and the company had sold, to December 31, 1879, 295,886.79 acres for $1,114,999.66, being an average price of $3.77 per acre. The lands have been sold in small tracts, some for cash, but most of them on time, 20 per cent. of the principal being paid at time of purchase. This company, unlike some others, sells no lands before it has received patents therefor. The proceeds of sales of lands are applied to the purchase of land-grant bonds.

The lands remaining unsold December 31, 1879, say 7,700,000 acres, lying most of them in the desert country between Salt Lake and the Sierra Nevada Mountains, are largely unavailable, and many years must elapse before anything can be realized from them. The real value of these lands is not over 50 cents per acre, or $3,850,000, although the company includes them in the general estimate of all their lands at $2.50 per acre, which is the minimum price placed upon adjoining lands belonging to the Government.

The cost of this portion of the Central Pacific Railroad has not been ascertained in detail. In a report published in 1870 the cost of the property on December 31, 1869, was itemized as follows:

Construction accounts	$84,129,002
Buildings	2,159,718
Engines	1,846,500
Cars	1,988,125
Total	90,123,345

Represented by capital stock	40,097,290
First-mortgage bonds	25,517,000
United States bonds	25,517,000
Other debt	7,871,777
Total liabilities	99,003,067

A road similar to that of the Central Pacific, from Ogden to Sacramento, 740 miles, could probably be built to-day for an average price of $30,000 per mile, or $22,200,000.

The Western Pacific Railroad Company.—This company was organized December 13, 1862, under the laws of the State of California, and was consolidated with the Central Pacific June 23, 1870.

Under the Pacific Railroad acts the company was authorized to construct a railroad from the American River east of Sacramento to San José, Cal., a distance of 123.16 miles, and received a subsidy in bonds and lands similar to that granted to the other Pacific Railroad Companies.

The quantity of lands included in the grant has been estimated by the General Land Office as 1,100,000 acres. To June 30, 1880, 424,727.58 acres had been patented to the company.

The Western Pacific Railroad Company had disposed of its lands prior to consolidation with the Central Pacific Railroad Company.

In a report published in 1870 the cost of this road was stated as $12,347,332; offset by an indebtedness of $2,808,290, and a share capital paid in, $7,900,000.

A portion of the road is of an expensive character, but it could probably be built to-day for $35,000 per mile, or $4,300,000 for the whole road.

California and Oregon Railroad Company.—This company was organized under the laws of California June 30, 1865, and was consolidated with the Central Pacific August 22, 1870.

By an act of Congress approved July 25, 1866 (14 Stat., 239), the company received a grant of twenty sections (12,800 acres) per mile for a railroad from the Central Pacific Railroad to the northern line of the State. The estimated distance is 291 miles, which would make the grant 3,724,800 acres.

A condition of the grant is that the whole road shall be completed on or before July 1, 1880 (15 Stat., 80).

The road completed extends from Roseville to Redding, Cal., 151.81 miles; road uncompleted, 139.19 miles. The lands which have not vested by reason of non-completion of road amount to 1,781,632 acres, leaving 1,943,168 acres vested in the company, or so much thereof as was not previously disposed of by the United States.

To June 30, 1880, there had been patented of these lands 1,338,039.27 acres. To December 31, 1879, the company had sold 366,622 acres for $2,970,365, or an average price of $8.65 per acre. The lands remaining unsold at that time were 1,576,546 acres, worth, at a reasonable estimate, say, $4.50 per acre—over $7,000,000.

The 152 miles of road were constructed between 1867 and 1872, the whole road being opened for business September 1, 1872. The cost in detail of this road has not been ascertained. In 1870, when some 80 miles of the road had been completed, a report was published in which the cost of the road was stated as $2,750,000, or about $35,000 per mile, The road could be built to-day for $25,000 per mile, or $3,800,000.

From the above statements in regard to these three roads, namely, the Central Pacific, the Western Pacific, and the California and Oregon, the following condensed statement is made:

Estimated quantity of land granted, acres	14,264,800
Estimated quantity of land vested under the grants, acres	10,367,895
Quantity disposed of by Western Pacific before consolidation, acres	424,727
Patented to Central Pacific Company to June 30, 1880, acres	2,047,021
Quantity sold to December 31, 1879, acres	662,669
Amount for which 662,669 acres were sold	$4,085,354 00
Average price per acre	$6 16
Miles of railroad subsidized with lands	1,012.55
Cost of roads, &c., owned (1,202 miles)	$136,536,295 59
Cost of equipment, machinery, furniture, &c	$9,812,040 66
Cost per mile—road and equipments, &c	$121,754 00
Estimated value of unsold vested lands (9,280,499 acres at $1 per acre)	$9,280,499 00
Estimated value of unvested lands (1,781,632 acres, at $2.50 per acre)	$4,454,080 00

Central Branch Union Pacific Railroad Company.—The legislature of the Territory of Kansas, by an act approved February 11, 1859, granted a charter to the Atchison and Pike's Peak Railroad Company.

On November 20, 1866, by vote of persons owning a majority of the stock, and in compliance with the laws of the State of Kansas, the name was changed to "Central Branch Union Pacific Railroad Company," to take effect on and after January 1, 1867.

By the thirteenth section of the act of Congress approved July 1, 1862, which chartered the Union Pacific Railroad Company, the Hannibal and Saint Joseph Railroad Company was authorized to build a railroad from Saint Joseph via Atchison to connect with the road through Kansas. By regular proceedings, beginning June 9, 1863, and ratified by votes of the stockholders, the Hannibal and Saint Joseph Railroad Company assigned to the Atchison and Pike's Peak Railroad Company all their right, title, and interest in the grant to them by the Pacific Railroad act of July 1, 1862, which assignment was formally accepted by the Atchison and Pike's Peak Railroad Company on May 26, 1865.

The land grant to this company is twenty sections, or 12,800 acres, per mile for 100 miles, extending from the Missouri River at Atchison, westwardly, through Kansas.

The majority of the public lands through which this road runs having been disposed of prior to the grant, the company will obtain only some 250,000 acres, 187,608 of which had been patented to them to June 30, 1880.

To June 30, 1880, about 170,000 acres had been sold by the company at an average price of say $5 per acre, amounting to $850,000, and 80,000 acres remained unsold, worth about the same price per acre—$5—amounting to $400,000.

The proceeds of the sales of land have been applied to the payment of interest on the first mortgage bonds and to the general purposes of the company, from time to time.

Construction was commenced on this road from Atchison to Waterville, 100 miles, in July, 1865, and the first section of 20 miles was accepted by the President of the United States on July 12, 1866, and the whole road was completed by January 20, 1868.

The cost of the road—construction and equipment—as reported to this office December 31, 1879, is $3,913,408.64, or at the rate of $39,134.04 per mile. A road similar to this could be built and equipped to-day for from $15,000 to $18,000 per mile, or say $1,650,000.

The Sioux City and Pacific Railroad Company.—This company was organized August 4, 1864, under the laws of the State of Iowa.

By section 13 of the act of Congress approved July 1, 1862, which chartered the Union Pacific Railroad Company, it was enacted that "whenever there shall be a line of railroad completed through Minnesota or Iowa to Sioux City, then the said Pacific Railroad Company is hereby authorized and required to construct a railroad and telegraph from said Sioux City, upon the most direct and practicable route, to a point on, and so as to connect with, the branch railroad and telegraph in this section hereinbefore mentioned."

Section 17, of the act of July 2, 1864, so amends section 13, above quoted, as to release the Union Pacific Railroad Company from the construction of said branch, and entitles the company so constructing it to receive in bonds an amount not larger

than the said Union Pacific Railroad Company would be entitled to receive if it had constructed the branch road, and to receive alternate sections of land for 10 miles in width on each side of the same along the whole length of said branch.

The President of the United States on December 24, 1864, designated "the Sioux City and Pacific Railroad Company" as the company approved by him to construct the branch line named in section 17 of the act of Congress approved July 2, 1864.

This company, after careful examination and surveys to ascertain "the most direct and practicable route," filed its map of definite location in Nebraska November 9, 1866, and in Iowa between November 20 and December 7, 1866, from which dates its rights attached to the lands granted.

The original idea of the Pacific Railroad act was, that a branch from Sioux City, Iowa, to some point on the Union Pacific Railroad, not further west than the one hundredth meridian, should be constructed. This being impracticable, owing to the character of the country—the streams and valleys all running from northwest to southeast, which would require immense fills and cuts, the act of July 2, 1864, modified the route so as to permit any company constructing the road to select the point of junction.

The quantity of lands patented under the provisions of the foregoing acts has been reported by the General Land Office as 41,318.23 acres.

All lands, lots, and land assets of this road were sold April 15, 1875, to the Missouri Valley Land Company for $200,000.

The construction of this road was begun in the fall of 1866; the first section of the railroad and telegraph was accepted March 27, 1868, and the last one was accepted March 2, 1869. The road was opened for traffic February 11, 1869. The length of subsidized road is 101.77 miles.

This road is subject to all the conditions and requirements applicable to it as a branch of the Pacific Railroad, the Supreme Court of the United States, in revising and affirming the judgment of the circuit court of the United States for the district of Iowa (99 Supreme Court Reports, 491), having decided that this road is a branch of the Pacific Railroad, and subject to the same conditions as regards the payment of "five per centum of its net earnings" towards the reimbursement of the United States on account of bonds and interest.

The company in its report to this Department for the year ending June 30, 1880, gives the cost of the road and fixtures to that date as $5,355,551.28, having constructed 107.42 miles of railroad; being an average cost of $49,865 per mile.

A road has been constructed west of the Missouri River from Sioux City to Omaha during the past year, but it is much longer and more expensive to operate. A road like the Sioux City and Pacific could probably be built to-day for $15,000 per mile—$1,621,300.

The Burlington and Missouri River Railroad Company, in Nebraska.—By section 18 of the act of Congress approved July 2, 1864, the Burlington and Missouri River Railroad Company, organized under the laws of the State of Iowa, was "authorized to extend its road through the Territory of Nebraska from the point where it strikes the Missouri River, south of the mouth of the Platte River, to some point not further west than the one hundredth meridian of west longitude, so as to connect, by the most practicable route, with the main trunk of the Union Pacific Railroad, or that part of it which runs from Omaha to the said one hundredth meridian of west longitude." The right of way is also granted by this section "to the extent of two hundred feet where it may pass over the public lands, including all necessary grounds for stations, buildings, workshops, depots, machine-shops, switches, side-tracks, turn-tables, and water-tanks."

Section 19, for the purpose of aiding in the construction of said road, grants to the said Burlington and Missouri River Railroad Company every alternate odd numbered section of public lands (except mineral lands) to the amount of ten alternate sections, or 6,400 acres per mile, on each side of the road. Section 20 provides that when 20 consecutive miles of road shall have been completed the "President of the United States shall appoint three commissioners to examine and report to him in relation thereto, and if it shall appear to him that 20 miles of said road have been completed as required by this act, then, upon certificate of said commissioners to that effect, patents shall issue conveying the right and title of said lands to said company on each side of said road, as far as the same is completed, to the amount aforesaid; and such examination, report, and conveyance by patent shall continue from time to time in like manner until said road shall have been completed." It also provides "that no Government bonds shall be issued to the said Burlington and Missouri River Railroad Company to aid in the construction of said extension of its road; and provided further, that said extension shall be completed within the period of ten years from the passage of this act."

The line constructed and owned by this company extends from Plattsmouth to Fort Kearney, Nebr., a distance of 190.5 miles. The first section of 80 miles was accepted by the President of the United States October 9, 1871, and the last section November 4, 1872. The road was opened for through traffic September 2, 1872.

The estimated quantity of lands granted by this act is 2,441,600 acres. The quantity patented to June 30, 1880, amounted to 2,374,090.77 acres. The following statement of the business of the land department of this company is taken from Poor's Manual for 1880:

General account, land department, December 31, 1879.

Lands sold (1,574,392 acres)	$8,556,782 42	Taxes, commissions, &c...	$2,090,904 19
Interest on contracts.....	2,495,788 50	Discounts and premiums..	456,131 09
Imputed payment.....	495,817 58	Principal on sales, due....	5,816,528 13
Special deposits	96,201 52	Interest and other assets..	1,315,258 10
Extra interest, rents, &c..	65,614 53	Paid amount, treasurer....	2,040,383 04
Total	11,710,204 55	Total	11,710,204 55

The cost of construction and equipment of this road is not given separately, the total cost being stated at $8,294,955, or an average of $43,306 per mile.

A road like the Burlington and Missouri River in Nebraska could probably be built to-day for $16,000 per mile—$3,048,000.

Summarizing the statements heretofore given, the following condensed facts are shown, embracing all the roads of the "Union Central line or route," as enumerated on page 11, of this report:

Estimated quantity of lands granted and vested.

	Acres granted.	Acres vested.
Union Pacific	22,824,396	19,100,000.00
Central Pacific	14,264,800	10,367,895.00
Central Branch Union Pacific	1,280,000	250,000.00
Sioux City and Pacific	651,328	41,318.23
Burlington and Missouri River	2,438,400	2,441,600.00
Total	41,458,924	32,200,813.23

Quantity patented to June 30, 1880.

	Acres.
Union Pacific	3,738,117.00
Central Pacific	2,047,021.00
Central Branch Union Pacific	187,608.00
Sioux City and Pacific	41,318.23
Burlington and Missouri River in Nebraska	2,374,090.77
Total	8,388,155.00

Quantity sold to December 31, 1879.

	Acres.
Union Pacific	3,020,625.00
Central Pacific	662,669.00
Central Branch Union Pacific	170,000.00
Sioux City and Pacific	41,318.23
Burlington and Missouri River in Nebraska	1,574,392.00
Total	5,469,004.23

Amount realized from sales to December 31, 1879.

Union Pacific	$12,050,653 00
Central Pacific	4,085,354 00
Central Branch Union Pacific	850,000 00
Sioux City and Pacific	200,000 00
Burlington and Missouri River in Nebraska	8,556,782 00
Total	25,742,789 00

Average price per acre of all sales to December 31, 1879.

Union Pacific	$3 99
Central Pacific	6 16
Central Branch Union Pacific	5 00
Sioux City and Pacific	4 84
Burlington and Missouri River in Nebraska	5 43
Total average	4 71

Miles of road subsidized with lands.

	Miles.
Union Pacific	1,783.00
Central Pacific	1,012.55
Central Branch Union Pacific	100.00
Sioux City and Pacific	101.77
Burlington and Missouri River in Nebraska	190.50
Total	3,187.82

Cost of roads, &c., owned as shown by books, &c.

	Miles.	
Union Pacific	1,815.00	$154,485,642 29
Central Pacific	1,202.00	146,348,336 25
Central Branch Union Pacific	100.00	3,913,403 64
Sioux City and Pacific	107.42	5,355,551 28
Burlington and Missouri River	190.50	8,249,955 00
Total miles and cost	3,414.92	318,352,888 46

Cost per mile, road, and equipment.

Union Pacific	$85,116 00
Central Pacific	121,754 00
Central Branch Union Pacific	39,134 00
Sioux City and Pacific	43,306 00
Burlington and Missouri River in Nebraska	46,232 00
Average cost per mile (3,414.92 miles, $318,352,888.46)	93,224 00

Estimated value of unsold vested lands.

Union Pacific, 14,800,000 acres, at $1.624	$24,000,000 00
Central Pacific, 9,280,499 acres, at $1 per acre	9,280,499 00
Central Branch Union Pacific, 80,000 acres, at $5 per acre	400,000 00
Sioux City and Pacific	None.
Burlington and Missouri River in Nebraska, 800,000 acres, at $7 per acre	5,600,000 00
Total	39,280,499 00

Estimated value of unvested lands.

Central Pacific, California, and Oregon lands, 1,781,632 acres, at $2.50 per acre	$4,454,080 00

THE NEW MEXICO SOUTHERN, OR ROUTE ON THIRTY-FIFTH PARALLEL.

The Atlantic and Pacific Railroad Company.—This company was chartered by an act of Congress approved July 27, 1866, entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the States of Missouri and Arkansas to the Pacific coast." (14 Stat., 292, Auditor's Report for 1880, page 163.) By this act the corporation was authorized and empowered to construct and enjoy "a continuous railroad and telegraph line" from Springfield, Mo., to the Pacific Ocean, across the Indian Territory, Texas, New Mexico, Arizona, and California as a main line, and from Van Buren, Ark., to the point where the main line strikes the Canadian River in the Indian Territory as a branch line, more particularly described in section 1 of the act.

The grants made to the company by the act consists of the right of way through the public lands to the extent of one hundred feet on each side of the railroad, the right to use materials from adjacent lands belonging to the United States, the right to take all grounds or lands, in addition to the one hundred feet on each side of the road, that may be necessary for station, shop, turn-table, switching, or other purposes, exemption of the right of way from taxation in the Territories, and for every mile of said railroad constructed in the Territories forty sections (25,600 acres) of the public lands, and for every mile in the States twenty sections (12,800 acres) of the same. (See sections 2 and 3 of the act.)

The conditions attached to these grants are given in section 8 of the act as follows, namely: Work on the road was to be commenced within two years from the date of approval of the act, July 27, 1866, that is, before July 27, 1868; after the second year not less than fifty miles of road per year was to be completed; and the main line was to be completed by July 4, 1878; and, if the company suffered any breach of these conditions to continue over one year, section 9 of the act provides that the United States may, at any time thereafter, "do any and all acts and things which may be needful and necessary to insure a speedy completion of the said road."

Maps of the general route having been filed, public lands embraced within the limits of the grant were withdrawn from sale and the right of the company attached thereto, as follows, viz:

On line from—	To—	Date.
Springfield, Mo	West line of Missouri	Dec. 17, 1866
West line of Missouri	Mouth of Kingfisher Creek, Ind. Ter.	Dec. 2, 1871
Mouth of Kingfisher Creek, Ind. Ter	East line of New Mexico	Feb. 7, 1872
East line of New Mexico	East line of California	Mar. 12, 1872
San Francisco, Cal	San Miguel, California	Mar. 12, 1872
San Miguel, Cal	Los Angeles County, west line California	Aug. 15, 1872
Los Angeles County, west line California	A point in township 7 north, range 7 east, San Bernardino Mission, San Bernardino County, California.	Mar. 12, 1872
A point in township 7 north, range 7 east, S. B. M., San Bernardino County, Cal.	Colorado River	Aug, 15, 1872

The construction of this railroad was commenced July 4, 1868; and the sections of road below named have been examined by commissioners and reported on by them to the President of the United States, who has from time to time authorized patents for lands so earned to be issued to the company:

No. of section.	From—	To—	Miles.	Opened for business.	Examined by commissioners.	Accepted by the President.
1, 2	Springfield, Mo	Pierce City, Mo.	25	June 14, 1870	Sept. 22, 1870	Oct. 11, 1870
3	Pierce City, Mo	Seventy-fifth mile-post.	25	Dec. 8, 1870	Jan. 19, 1871	Jan. 31, 1871
4, 5	Seventy-fifth mile-post.	1.54 miles west of crossing of Missouri, Kansas & Texas Railway in Indian Territory.	25	June 22, 1871 Oct. 6, 1871	Nov. 16, 1871	Dec. 6, 1871
6, 7	Junction of New Mexico and Southern Pacific Railroad near Isleta, N. Mex.	Fiftieth mile-post west therefrom.	50	Nov. 1, 1880	Nov. 1, 1880	Dec. 17, 1880

The Atlantic and Pacific Railroad Company having suffered a default in the payment of interest on their outstanding bonds, the mortgage given to secure the same was foreclosed by a decree of the circuit court of the United States for the eastern district of Missouri, and the entire property, including the land-grant, in Missouri, was sold, by virtue of said decree, on September 7, 1876, to William F. Buckley, and by him conveyed, November 2, 1876, to the Saint Louis and San Francisco Railway Company, which company became, and is now, the owner of the property and franchises in Missouri, which had belonged to the South Pacific and Atlantic and Pacific Railroad Companies, and also of about 655,000 acres of South Pacific lands and 306,000 acres of Atlantic and Pacific lands.

West of the western boundary of the State of Missouri, the road and appurtenances in the Indian Territory and in New Mexico are still owned by the Atlantic and Pacific Railroad Company. The road from Albuquerque, N. Mex., west, is known as the "Western Division."

For the purpose of obtaining means to build and equip the "Western Division," the company has resolved to issue and negotiate bonds, to an amount not exceeding $25,000 per mile, secured by a first mortgage on the franchises, railroad, lands, land-grants, and other property pertaining to said "Western Division." The act of Congress approved April 20, 1871 (17 Stat., 19), authorized the company to "mortgage its road, equipment, lands, franchises, privileges, and other rights and property, subject to such terms, conditions, and limitations as its directors may prescribe." (Auditor's Report for 1880, page 170.)

The company is now examining the route from Vinita, Indian Territory, westward to Albuquerque, N. Mex., with a view to the construction of this part of the road at an early day. The length of this division will be about 750 miles, for 400 miles of which the land-grant is contingent upon the extinguishment of Indian titles thereto or such other arrangement, to be approved by the President, as any Indian tribe or nation may determine upon.

The length of road and extent of land-grant for the whole line included in the charter act may be stated approximately as follows, viz:

State or Territory.	From—	To—	Miles.	Acres per mile.	Acres of land granted.
Missouri	Springfield	West line	90	12,800	1,152,000
Indian	East line	do	400	25,600	10,240,000
Do	do	Canadian River	300	25,600	7,680,000
Texas	do	West line	200	12,800	2,560,000
New Mexico	do	do	450	25,600	11,520,000
Arizona	do	do	400	25,600	10,240,000
California	do	San Francisco	655	12,800	8,384,000
Arkansas	West line	Van Buren	5	12,800	64,000
Total			2,500		51,840,000

The company's estimate of the above is 2,472.98 miles of road and 49,244,803 acres of land. The estimate of the General Land Office is 2,544.65 miles of road and 50,067,600 acres of land.

The United States having no public lands in the State of Texas, and the lands in the Indian Territory having been "otherwise appropriated" at the date of the grant, there must be deducted from the above total 20,480,000 acres, which leaves 31,360,000 acres actually granted, from which is likewise to be deducted the following, namely:

	Acres.
1. Lands in Missouri previously disposed of	645,184
2. Lands in New Mexico, "mineral" and otherwise, disposed of, estimated at one-half of the grant	5,760,000
3. Lands in Arizona, "mineral" and otherwise, disposed of, estimated at one-half of the grant	5,120,000
4. Lands in California of the same character, estimated at one-third of the grant	2,794,666
5. Lands in Arkansas otherwise disposed of	32,000
Total deductions, additional	14,351,850

After all of these deductions are made, the quantity of land remaining for the use of the railroad company would be but 17,008,150 acres, and of this quantity the Saint Louis and San Francisco Railway Company received in 1876 about 300,000 acres, and there had been disposed of by the Atlantic and Pacific Railroad Company, prior to 1876, about 200,000 acres, the proceeds of which were applied to the construction of the road in Missouri; so that, in round numbers, about 16,500,000 acres of land are only available for the Atlantic and Pacific Railroad Company, to aid in the construction of its railroad of more than 2,000 miles from Seneca, Mo., through the Indian Territory, Texas, New Mexico, Arizona, and California, to the Pacific Ocean or San Francisco.

These lands are worth, probably, on an average, not more than $2 per acre when brought into market by reason of the railroad being built, or $33,000,000; but that is merely a nominal value, sales being slow and difficult until settlers are assured of protection from Indians and outlaws in that section of the country. From a recent

report of the superintendent of the western division of the railroad, the following facts in regard to the country on the line of the road between Albuquerque and the Colorado River, a distance of 620 miles, have been gathered.

Between Albuquerque and the San Francisco Mountains the country is chiefly occupied by large herders and stock-raisers, some of the land being cultivated. Many of these herders are Indians. There is considerable timbered land within easy reach of the road, and some saw-mills are now being erected. In the immediate neighborhood of the mountains the country is described as capable of being made the first summer and winter resort in the country. Between the San Francisco Mountains and the Great Colorado River, some 300 miles, the country is known to be rich in minerals, as well as affording fine grazing and agricultural prospects.

As to the location of the line, it is described as being "marvelous in its alignment, its grades and general characteristics. To cross the continental divide, the Rocky Mountains of the United States, with only maximum grade of fifty feet per mile, and this only going west (the east bound approach being only thirty feet per mile), in a valley a mile wide, with no tunnels, are certainly advantages enjoyed by no other line." This is the language of Superintendent Smith, who is on the ground.

The superintendent's estimate of the annual business that may be done on this 620 miles is about 50,000 tons. If this tonnage is carried to Albuquerque it would make on an average about 12,000,000 tons carried one mile per annum, which, at an average rate of five cents per ton per mile, would give a gross earning from freight carried amounting to $600,000.

Of the 306,111 acres of land acquired by the Saint Louis and San Francisco Railway Company in 1876, to December 31, 1879, 15,000 acres had been sold at an average price of $3.25 per acre, amounting to $48,750. Prior to November 6, 1876, the Atlantic and Pacific Railroad Company had disposed of 200,000 acres of the Missouri lands at an average price of $2.87½ per acre, amounting to $575,000.

No detail of construction has yet been obtained such as to enable a statement to be made showing the cost of the subsidized line; on December 31, 1879, the company reported the cost of "franchises and property" as $28,841,974.50, being 292½ miles of railroad, &c., in Missouri, extending from Pacific to the western State line near Seneca, making an average cost of nearly $100,000 per mile. The road runs through a country where many heavy grades and sharp curves are required, and is of quite an expensive character to build. The property is now in good condition, better than the average of western roads.

Under the authority of the act of Congress approved April 20, 1871, the company on July 1, 1880, issued its thirty-year bonds to the amount of $25,000 per mile, bearing interest at the rate of six per cent. per annum, payable semi-annually in January and July, and secured the same by a mortgage on the franchises, right of way, railroad, telegraph, lands, land-grants, and other property pertaining to the western division of the road, extending from Albuquerque, N. Mex., to the Pacific Ocean.

The payment of the coupons is also guaranteed by the Saint Louis and San Francisco Railway Company, and the Atchison, Topeka and Santa Fé Railroad Company, not exceeding 25 per cent. of the gross amount of their earnings respectively during the six months preceding the due date of such coupons. The mortgage provides that the net proceeds of the land-grant shall be used solely for the payment of interest on the first and second mortgage bonds; for the principal and interest of any advances made by the Atchison, Topeka and Santa Fé and the Saint Louis and San Francisco Railroad Companies, and for the purchase and cancellation of the first mortgage bonds.

The Atchison, Topeka and Santa Fé Railroad Company and the Saint Louis and San Francisco Railway Company each own one-half of the capital stock of the Atlantic and Pacific Railroad Company.

Fifty miles of the western division of this road have just been reported ready for examination by commissioners, making one hundred miles in all completed west of Albuquerque to date.

The Southern Pacific Railroad Company.—The Southern Pacific Railroad Company was incorporated under the laws of the State of California December 2, 1865.

On October 12, 1870, articles of consolidation were entered into with the following-named roads: San Francisco and San José, chartered August 18, 1860; Santa Clara and Pajaro Valley, chartered January 8, 1868; and California Southern, chartered January 22, 1870. The Southern Pacific Branch Railroad Company, chartered December 23, 1872, was consolidated with this road August 19, 1873; and the Los Angeles and San Pedro Railroad Company, chartered February 18, 1868, on December 14, 1874. By virtue of the consolidation the new company succeeds to all the rights, privileges, and franchises of the companies named above.

Section 18 of the act of Congress approved July 27, 1866, which chartered the Atlantic and Pacific Railroad Company, authorized this company to connect with the road of that company at such point on the boundary line of the State of California as they shall deem most suitable for a railroad line to San Francisco and to aid in its construction; similar grants of land were made to the Southern Pacific Railroad

Company, subject to all the conditions and limitations prescribed for said Atlantic and Pacific Railroad.

The sections of the main line were accepted by the President of the United States as follows:

Number of section.	Miles.	Date.
1st section, San José to Gilroy	30.26	Jan. 19, 1871
2d section, Gilroy to Tres Pinos	20.00	Oct. 23, 1871
3d section, from Goshen south	20.00	Oct. 1, 1872
4th section, commencing at twentieth mile	20.00	Aug. 6, 1873
5th section, commencing at fortieth mile	20.00	Oct. 23, 1874
6th section, commencing at sixtieth mile	20.00	Aug. 23, 1875
7th section, commencing at eightieth mile, near Bealeville	20.00	June 16, 1876
8th section, from Goshen west, near Lamoore	20.00	Jan. 25, 1877
9th section, from Lamoore to Huron	20.00	Feb. 21, 1877
10th section, from near Bealeville to Mojave	41.66	Feb. 3, 1878
Total	231.92	

From Mojave to the eastern boundary of the State and from Tres Pinos to Huron, the former about 200 miles in length, and the latter varying according to route from 100 to 160 miles, remain unbuilt, and the lands granted remain unvested in the company. The total land grant under the act of 1866 was, say, for 588 miles at 12,800 acres per mile, 7,526,400 acres. Of this grant 2,768,576 have vested in the company by virtue of the construction of the 231.92 miles of road referred to, and 4,757,824 remain unearned by construction and unvested. No part of the line aided by a land-grant is now under construction, nor is it believed that the company has any intention to construct their road from Mojave eastward. For a statement of the sales of land, cost of construction, and other matters connected with the Southern Pacific, reference is made to that part of the report embracing the Texas Southern route immediately succeeding this.

THE TEXAS SOUTHERN, OR ROUTE ON THIRTY-SECOND PARALLEL OF LATITUDE.

The Texas and Pacific Railway Company.—This company was chartered by the act of Congress approved March 3, 1871, entitled "An act to incorporate the Texas Pacific Railroad Company, and to aid in the construction of its road, and for other purposes." (16 Stat., 573.) See Auditor's Report for 1880, page 170.

Section 1 designates the route, which may be stated as follows, viz, from a point at or near Marshall, Tex.; thence to a point at or near El Paso; thence through New Mexico and Arizona to a point on the Rio Colorado, at or near the southwestern boundary of California; thence to San Diego, pursuing in the location thereof, as near as may be, the thirty-second parallel of north latitude.

The company was vested with all the powers, privileges, and immunities necessary to carry into effect the purposes of the act.

Section 8 grants a right of way through the public lands to the extent of two hundred feet in width on each side of the railway, and grounds for stations, buildings, workshops, &c., not exceeding forty acres of land at any one point.

To aid in the construction of said road, section 9 grants every alternate odd-numbered section of public lands, not mineral, to the amount of forty sections, or 25,600 acres, per mile in the Territories, and twenty sections, or 12,800 acres, per mile in California.

Section 17 provides that the company shall commence construction simultaneously at San Diego, Cal., and at Marshall, Tex., and that at least 50 consecutive miles from each of said points shall be completed and in running order within two years after the passage of the act, and to so continue to construct each year thereafter a sufficient number of miles to secure the completion of the whole line within ten years; that is, by March 3, 1881. The act of May 2, 1872, extended the time to May 2, 1882.

Section 18 of the original act provides for the appointment of a commissioner by the President of the United States to examine the various sections of 20 miles of road as completed, and upon the acceptance by the President of the United States of said sections, patents shall be issued to said company for the lands so earned.

By the act of Congress approved May 2, 1872, the name, style, and title was changed to "the Texas and Pacific Railway Company," and section 17 of the act of March 3, 1871, amended so as to require that at least 100 consecutive miles of railroad should be completed and in running order within two years after the passage of the act, that is, by May 1, 1874 (300 miles of road were in operation before that time); it also pro-

vides that the company shall commence construction from San Diego eastward within one year, that is, by May 1, 1873, and construct not less than 10 miles before the expiration of the second year, and thereafter not less than 25 miles per annum in continuous line between San Diego and the Colorado River until the junction is formed with the line from the east. Little or none of the line from San Diego eastward has been constructed. From the Colorado River at Yuma, Ariz., a line of railroad has been constructed by another company—known as the Southern Pacific Railroad Company of Arizona—under the supposition that the general law of 1875 gave them a right of way over the public lands of the United States, although section 5 of that act excepted any lands specially reserved from sale.

In March, 1872, the Texas and Pacific Railway Company acquired, by purchase and consolidation, all of the franchises and property of the Southern Pacific Railroad Company, a corporation organized under the laws of Texas, and operating 66 miles of road between Shreveport and Longview, with a right to extend its line to El Paso. It subsequently acquired, in like manner, the charter privileges and property of the Southern Transcontinental Railway Company, organized under the laws of Texas, with right to construct a road from the northeast boundary of the State to El Paso, and the property and franchises of the Memphis, El Paso and Pacific Railroad Company, another Texas corporation.

On May 31, 1880, the number of miles of road operated was as follows, viz:

	Miles.
From Shreveport, La., to Fort Worth, Tex	219.69
From Texarkana to Sherman	155.12
From Marshall to Texarkana Junction	69.05
Total	443.86

The first section, extending from Marshall to Dallas, a distance of 147 miles, was accepted by the President of the United States April 7, 1874; the second section, extending from Marshall to boundary line between Louisiana and Texas (22.12 miles), from Marshall to Texarkana (74.23 miles), and from Shreveport to Brookston (56.18 miles) was accepted August 9, 1875; the last section, extending from Texarkana Junction to Brookston, and from Dallas to Fort Worth, a distance of 127 miles, was accepted March 8, 1877.

The company has already entered into a contract for the completion of the road from Fort Worth to El Paso, a distance of 600 miles; the work was commenced March 5, 1880, and the whole line is to be completed by January 1, 1883.

The quantity of land granted to the Texas and Pacific Railway Company is estimated at 18,000,000 acres, lying in New Mexico, Arizona, and California. No lands have been earned by construction of railroad in California or the Territories, and consequently none have yet vested in the company; but the right of way and the land-grant are subject, under the provisions of section 17 of the charter act and section 5 of the supplemental act of May 2, 1872, to such action as Congress may deem necessary to secure a speedy completion of the road.

The cost of construction and equipment on May 31, 1880, is reported at $27,418,107.94, which includes expenditures for surveys and location of entire line of 1,457 miles west of Fort Worth. The average cost per mile is $61,771.

The Southern Pacific Railroad Company.—The act of Congress approved March 3, 1871, which incorporated the Texas Pacific, provides, in section 23, that for the purpose of connecting the Texas Pacific Railroad with the city of San Francisco the Southern Pacific Railroad Company of California is authorized to construct a line of railroad from a point at or near Tehachapa Pass, by way of Los Angeles, to the Texas Pacific Railroad at or near the Colorado River, with the same rights, grants, and privileges, and subject to the same limitations, restrictions, and conditions, as were granted by the act of July 27, 1866, before referred to.

The grant of land under this act being 12,800 acres per mile of road from the Colorado River, at or near Fort Yuma, to Mojave (346.96 miles) amounts to 4,441,088 acres, supposing none of the land to have been otherwise disposed of. The road having been constructed was accepted by the President of the United States as follows, viz:

	Miles.
Section 1, May 1, 1874	50.00
Section 2, November 11, 1875	50.00
Section 3, January 21, 1876	50.00
Section 4, March 2, 1877	78.59
Section 5, January 23, 1878	118.37
Total	346.96

On December 31, 1879, the total length of road completed and in operation was as follows:

Northern division:	Miles.
From San Francisco to Tres Pinos	100.49
From Carnadero to Soledad	60.40
Total	160.89

Southern division:	Miles.
From Huron, via Goshen and Los Angeles, to west bank of Colorado River	528.56
From Los Angeles to Wilmington	22.06
Total	550.62

Total miles of railroad owned, 711.51, of which 578.88 have been subsidized with a land-grant from the United States.

The southern division is leased to and operated by the Central Pacific Railroad Company; lease terminable in five years from January 1, 1880, or when eastern connections are made.

The quantity of land covered by the grants to this company is estimated by the General Land Office at 9,520,000 acres.

The quantity patented to the company to June 30, 1880, was 1,048,090.65 acres, of which the sales to the same date have been 279,623.40 acres, at an average price of $3.64 per acre, amounting to $1,017,255.89. Sales are made for cash, or part cash, and the balance in five years' time, with interest at seven per cent. per annum, payable in advance. Of the above sales 120,000 acres have been sold for cash at about $2 per acre, and the remainder, 160,000 acres, on credit at nearly $5 per acre.

The proceeds of land sales are applied exclusively to the redemption of the company's bonds.

The quantity of land vested and unsold June 30, 1880, may be estimated at 5,407,553 acres, worth, at a fair average value, $1.25 per acre. The company's estimate of the value of the grants from the United States, as stated in their last annual report to their stockholders, is upwards of $40,000,000.

The company's estimates, on account of both grants, are as follows:

	Acres.
Main line, San José to Needles	7,523,072.00
Branch line, Mojave to Yuma	4,441,088.00
Estimated total number of acres granted	11,964,160.00
Less total number of acres sold to June 30, 1880	279,623.40
Estimated number of acres unsold to June 30, 1880	11,684,536.60
Estimated quantity earned by construction of road	7,413,760.00
Estimated quantity capable of being earned	4,550,400.00
Total	11,964,160.00

The land agent of the company says: "It is difficult to estimate the quantity of land that will eventually inure to the company from these land grants, as there are included within the limits large areas of Spanish grants and lands otherwise excepted. It is not at all probable that there will be sufficient available lands belonging to the United States within the indemnity limits to make good these deficiencies." He also says: "At the time this grant was made the value of the lands was rated as trifling, as the best land in Southern California had long been held and occupied by Spanish-speaking residents and their descendants, and was devoted almost wholly to grazing purposes, several acres in the average being required per head of stock. So broken, dry, and forbidding in aspect was the remainder still under the disposition of the Government that no one, at that day, imagined it could be of the slightest assistance toward the building of the road, and the greater part of it so remains to this day. It resembles, and is commonly known as 'desert land,' totally incapable of being made useful for the support of vegetation or animal life. However, where there is running water sufficiently near, portions of it may be used for pasturage. The Southern Pacific Railroad Company would be glad to co-operate with the Government in any plan whereby its alternate sections could be leased or sold in large unbroken tracts for grazing; and there are millions of acres which it would be willing to sell for such purposes outright at 20 cents an acre." On the other hand, the company, in its printed annual report to the stockholders, speaks in the highest terms of its lands. The following extracts are taken from the report of the land commissioner: "I can-

not forbear, in this connection alluding once more to the immense increase in agricultural productions, and to the surprising effect of irrigation upon land in Southern California."

"Lands previously of no value but as cattle ranges are now becoming the homesteads of thrifty, industrious families." "By the use of water the valuable lucern known as alfalfa has been introduced, and makes it possible to sustain a greater number of cattle." "This wonderful clover can be cut three or four times in a season, realizing to the acre ten or twelve tons of hay per annum." "But all that part of the State in which this company's lands are situated is especially adapted by climate, soil, and situation to the raising of semi-tropical fruits." "Even where water, through canals, cannot be procured, the lands sell, the purchaser being able, by boring a well and the assistance of a 'wind-mill,' to cultivate acres enough to support a family. Waste or 'desert lands' are thus made available or useful."

In regard to the "mussel slough" lands, about which there has been some trouble between the company and the settlers, the land agent says: "Had it not been for the discovery that portions of the land in the San Joaquin and Tulare valleys are susceptible to irrigation by diverting the streams from the mountains upon them by means of extensive canals and systems of irrigating ditches, the best lands of the company would have been unsalable to this day, and, like the other portions referred to, would have been regarded as desert lands. So soon as this was made obvious, a number of that improvident and speculating class to be found in all communities rushed in upon the lands within the limits of the grant, and, in defiance of the law and the officers of the courts, sought to set up claims as pre emptors or technical 'settlers.' Their very presence, their threats as well as their open resistance to the company, with the aid of demagogues who sought to profit by their trespass, made it difficult or impossible for the company to dispose of the lands in the vicinity. In this lawless way the wishes of the railroad company and the purposes of Congress in making the grant were defeated. But for this untoward interruption of the course of law, which has only very slowly been condemned by the executive and judicial officers, the company would have been enabled to transfer into the hands of solid and respectable persons many thousands of acres, and with the traffic derived from their cultivation, it would have been able to prosecute the work on the remaining gap in its lines of road.

To June 30, 1880, the cost of construction of the 711.51 miles of railroad owned by this company was $62,919,109.72, and of equipment, $1,848,533.81. Total cost, $64,767,643.23, or at an average rate of $91,082 per mile.

GENERAL RECAPITULATION TO JUNE 30, 1880.

	Items.	Northern Pacific.	Union Central route.	Atlantic and Pacific.	Southern Pacific.	Texas Pacific.	Total.
1	Acres land granted, if all received	57,920,000	41,458,924	51,840,000	11,967,488	18,000,000	181,186,412

* Unsubsidized.

† 380 miles.

From this recapitulation it will be seen that there remain "unvested," by reason of non-construction of the respective railroads for which grants were made, the following lands:

	Acres.
Northern Pacific	27,500,000
California and Oregon	1,781,632
Atlantic and Pacific	15,868,150
Southern Pacific	4,757,824
Texas and Pacific	12,000,000

Of these railroads the Northern Pacific, the Atlantic and Pacific, and the Texas and Pacific are vigorously pushing forward the work of construction; and it may be reasonably calculated that these railroads will be completed within the next three years. The California and Oregon uncompleted road extends from Redding to the northern line of the State of California, a distance of about 150 miles, and the country there is of such a mountainous character as to require heavy work and great expense; so much so that it is very doubtful if the road will be ever built.

The Southern Pacific uncompleted road extends from Tres Pinos to Huron, across the coast range—a difficult and costly line—and from Mojave to the eastern line of the State of California, at or near a point called "The Needles," over a desert country. Neither of these parts of the Southern Pacific are under construction, and, as in the California and Oregon case, it is very doubtful when they will be built, if ever.

As to the forfeiture of any of these grants, the opinion of the Attorney-General of the United States in the case of the Atlantic and Pacific Railroad Company is given on page 111 of my last annual report.

The Northern Pacific act is similar to that which granted lands to the Atlantic and Pacific in respect to the provisions for any action by Congress looking to a completion of the road.

The Texas and Pacific act contains no provision of the kind referred to, and has no section or clause providing for any repeal of the charter or grants.

The Southern Pacific obtained its grant under the Atlantic and Pacific charter, and is subject to the same conditions as that company.

The California and Oregon act, page 178 of Auditor's Report for 1880, in section 8, provides that "all the lands not conveyed by patent to said company or companies, as the case may be, at the date of any such failure, shall revert to the United States."

THEOS. FRENCH,
Auditor of Railroad Accounts.

INDEBTEDNESS OF THE PACIFIC RAILROADS TO THE UNITED STATES FOR BOND-SUBSIDIES TO JUNE 30, 1882.

[See page 1274.]

The following tables are taken from the Annual Report of the Commissioner of Railroads for 1882:

CONDITION OF THE BOND AND INTEREST ACCOUNTS OF THE PACIFIC RAILROADS.

The following statement of the condition of the accounts with the several Pacific Railroad companies, so far as regards moneys which have been actually covered in to their credit, is obtained from the public debt statement for June 30, 1882. No account is taken of moneys in the sinking funds held by the Treasurer of the United States, or of the compensation for services performed by them for the Government at that time remaining unsettled by the accounting officers, and under the heading "Interest paid by the United States" the semi-annual payment due July 1, 1882, is included:

Name of railway.	Principal outstanding.	Interest accrued and not yet paid.	Interest paid by the United States.	Interest repaid by companies.		Balance of interest paid by the United States.
				By transportation services.	By cash payments 5 per cent. of net earnings.	
Central Pacific	$25,885,120 00	$776,553 60	$21,899,448 07	$3,812,411 95	$648,271 96	$17,438,764 16
Kansas Pacific	6,303,000 00	189,090 00	5,751,153 09	2,725,458 33	.....	3,025,694 76
Union Pacific	27,236,512 00	817,095 36	23,323,659 69	8,453,537 60	....	14,870,122 09
Central Branch U. P.	1,600,000 00	48,000 00	1,453,808 26	124,639 85	6,926 91	1,322,241 50
Western Pacific	1,970,560 00	59,116 80	1,550,015 34	9,367 00	.....	1,540,648 34
Sioux City and Pacific	1,628,320 00	48,849 60	1,366,598 29	95,278 57	.....	1,271,319 72
Totals	64,623,512 00	1,938,705 36	55,344,682 74	15,220,693 30	655,198 87	39,468,790 57

Appendix 7 shows the total indebtedness of the several subsidized Pacific Railroads to the United States on June 30, 1882, to be as follows:

TOTAL DEBT.

Union Pacific:		
Principal	$33,539,512 00	
Accrued interest	30,080,998 14	
		$63,620,510 14
Central Pacific:		
Principal	27,855,680 00	
Accrued interest	24,285,133 81	
		52,140,813 81
Sioux City and Pacific:		
Principal	1,628,320 00	
Accrued interest	1,415,447 89	
		3,043,767 89
Central Branch Union Pacific:		
Principal	1,600,000 00	
Accrued interest	1,501,808 26	
		3,101,808 26
Total		121,906,900 10

TOTAL CREDIT.

Transportation services performed and money paid into the Treasury:	
Union Pacific	12,360,603 35
Central Pacific	6,004,665 17
Sioux City and Pacific	95,278 57
Central Branch Union Pacific	131,566 76
Total	18,592,113 85
Balance in favor of the United States, but not due until maturity of the principal, 1895–'99	103,314,786 25

NOTE.—The value of the lands granted the Pacific and other Land Grant Railroads is estimated to be $391,804,610.16. [See page 753 herein.]

CONDITION OF THE SINKING-FUND ACCOUNTS.

[See page 1275.]

The recommendation is renewed that section 4 of the act of May 7, 1878, be so amended as to embrace the subsidy portion of the Kansas Division of the Union Pacific Railway, the Central Branch Union Pacific Railroad, and the Sioux City and Pacific Railroad, within the operations of said act requiring the establishment of sinking funds and the payment of "twenty-five per centum of net earnings." The annual requirement as to the Kansas Division should be a sum not less than $300,000, and as to the two other roads, it is believed that $60,000 each would not be an unreasonable requirement.

Appendix 8 of this report shows in detail the condition of the sinking funds of the Union and Central Pacific Companies, respectively, held by the Treasurer of the United States under the act of Congress approved May 7, 1878, from which it will be seen that on June 30, 1882, these funds amounted to $2,716,221.68, the Central Pacific having to its credit $1,534,614,26, and the Union Pacific, $1,181,607.42.

Investments have been made by the Secretary of the Treasury as follows:

Character of bonds.	Union Pacific.	Central Pacific.	Total.
Funded loan of 1881, 5 per cent	$256,450 00	$194,900 00	$451,350 00
Funded loan of 1907, 4 per cent	32,650 00	199,100 00	231,750 00
Currency sixes, 6 per cent	361,000 00	444,000 00	805,000 00
Principal	650,100 00	838,000 00	1,488,100 00
Premium paid	124,065 43	168,727 73	292,793 16
Total cost	774,165 43	1,006,727 73	1,780,893 16

The last investment was made April 6, 1881, at which time a premium as high as 35 per centum was paid, but repeated protests have been made by the companies against the heavy cost of these investments.

On June 30, 1882, the amounts remaining in the Treasury *uninvested* were as follows:

Credit of the Central Pacific	$527,886 53
Credit of the Union Pacific	407,441 99
Total	935,328 52

on which the above companies are receiving no interest whatever.

These statements are made *quarterly*, in the public debt statement, and can also be found in the annual report of the commissioner of railroads.

GENERAL LAND-OFFICE, REGULATIONS FOR.

ADJUSTMENT OF RAILROAD LAND GRANTS.

IN EFFECT DECEMBER 1, 1883.

The following circular instructions to registers and receivers, show the method of adjustment of railroad grants, and embody regulations in force June 30, 1883, (modified by rulings since November 7, 1879) with forms for verification of lists of selections, and also plats of survey of such roads, and railroads claiming right of way over the public lands. (See volume of rulings and decisions from July, 1881, to June, 1883. General Land Office, June, 1883, pages 349 to 410.)

RAILROAD DIVISION. (F.)

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., November 7, 1879.

REGISTERS AND RECEIVERS, UNITED STATES LAND OFFICES:

GENTLEMEN: The following * * * circular instructions, relating to railroad grants, embrace the various regulations now in force under the rules and decisions of the Department respecting the subject, together with forms for selection, verification of lists, and proper certification and authentication of plats of survey of such railroads, and railroads claiming the right of way through public lands, and a table showing the respective granting acts, with reference by volume and page to the statutes containing the same.

These instructions are communicated for the guidance of district officers, surveyors-general, executives, and agents of States, officers of railroad corporations, and others having an interest in the matters recited; and they supersede those of June 24, 1875.

You will be governed by the regulations herein prescribed.

Very respectfully,

J. M. ARMSTRONG,
Acting Commissioner.

REGULATIONS CONCERNING RAILROADS.

Modified in some instances by rulings since November 7, 1879.—(See *Annual Reports General Land Office*, 1880–'81, *and Decisions of the Department of the Interior from July*, 1881, *to June*, 1883. *Pages* 349 *to* 410.)

I.

RULINGS RESPECTING HOMESTEAD AND PRE-EMPTION CLAIMS.

Under the provisions of the acts of Congress granting lands to aid in the construction of railroads, wherein there are excepted from such grants the lands to which a valid pre-emption or homestead right had attached at the time when the grant may have become effective, the Department has decided as follows:

1. A homestead entry, made by a person duly qualified, which is in all respects regular and legal, excepts the land covered thereby from the operation of a railroad grant attaching during the existence of such entry.

Under this ruling it is no longer necessary to hold investigations for the purpose of inquiring into the period of residence of the claimant, his acts respecting settlement upon and cultivation of the tract, etc.; but, if the entry appears upon its face to be valid, no hearing will be ordered.

In case allegations are presented by a railroad company tending to show fraud or irregularity in the initiation of the entry, proper opportunity will be afforded for the presentation of proof thereof.

The law (section 2289, United States Revised Statutes) requires that a person making a homestead entry must be over twenty-one years of age, or the head of a family, and a citizen of the United States, or have declared his intention to become such; and, at the time of making such entry, he must swear that it is made for the purpose of cultivation, and not directly or indirectly for the use and benefit of any other person.

The foregoing regulation has reference only to lands within the *granted* limits of railroads, the Supreme Court of the United States having recently decided, in the case of Michael Ryan *vs.* Central Pacific Railroad Company, that the right to *indemnity* lands does not attach until those lands are regularly selected. Where, however, entries or filings have been admitted upon lands within the indemnity limits of any railroad grant, they will be allowed to stand awaiting the final adjustment of such grant, when, if the tracts are not required in satisfaction thereof, the entries or filings may be consummated.

2. A pre-emption claim which may have existed to a tract of land at the time of the attachment of a railroad grant, if subsequently abandoned and not consummated, even though in all respects legal and *bona fide*, will not operate to defeat the grant, it being held that upon the failure of such claim the land covered thereby inures to the grant as of the date when such grant became effective.

Under this ruling, therefore, no hearings can be ordered for the purpose of ascertaining the facts respecting the settlement, occupation, improvement of the lands, etc., by such pre-emption claimant, for even if such facts were established, still, under the decision, the land inures to the grant.

II.

APPLICATION BY RAILROADS TO SELECT LANDS PREVIOUSLY COVERED BY ENTRIES.

Where application is made by the agent of a railroad company to select lands on which homestead entries existed at the time the railroad grant took effect, but which it is alleged were fraudulent or irregular in their inception, you will order hearings to determine the status of the entries, giving at least thirty days' notice in writing of the time and place of such hearing to all persons interested.

At such hearing your inquiries should be directed to the personal qualifications of the homestead party, and all facts touching the regularity of the entry. Inquiry respecting the residence of, and cultivation by, the party need not be made.

At the close of the hearing you will transmit to this office the testimony, prefaced by copies of the notices served, with your joint opinion thereon.

Where application is made by a railroad company to select lands on which pre-emption filings having heretofore been made and canceled, or where the same have expired by limitation of law, no other claim or entry appearing of record, you will admit the selections, in accordance with the rules governing in the premises herein communicated. No proofs by the companies concerning such claims will hereafter be required.

III.

APPLICATIONS BY SETTLERS TO ENTER LANDS COVERED BY RAILROAD WITHDRAWALS.

Whenever an application to file or enter is presented, alleging upon sufficient *prima facie* cause that the land is excepted out of the railroad grant, you will give notice thereof to the proper representative of the railroad company within whose grant the land applied for is situated, and allow thirty days within which the company may present objections to the allowance of such filing or entry. Should the company fail to respond, or show any reason why, in your judgment, the application should not be allowed, you will admit it, but should the company present any allegations of the character contemplated in the preceding section, you will order an investigation, and be governed by the instructions therein given.

Whenever an application is presented which you deem it your duty to reject, you will indorse upon such application the date of its presentation and your reasons for rejection; and upon appeal being taken therefrom in the manner and within the period prescribed by the Rules of Practice of the Department, you will forward the rejected application as a basis for your report to this office, together with the appeal and other papers which may be filed with you for that purpose. Your report should set forth in full the status of the land as shown by your records, including all filings, entries, remarks, and notes found thereon, or such reference to the same as will present the entire case to the attention of this office.

IV.

SELECTIONS BY RAILROAD COMPANIES.

By the seventh paragraph of section 2238 of the Revised Statutes it is provided that in the location of lands by States and corporations under grants from Congress for railroads and other purposes (except for agricultural colleges), the register and receiver shall each be entitled to a fee of one dollar for each final location of one hundred and sixty acres, to be paid by the State or corporation making such location.

1st. Under this law the registers and receivers are *each* entitled to receive a fee of one dollar for each final location of one hundred and sixty acres, or any quantity approximate thereto when the deficit is less than forty acres.

2d. When the several quantities shall have been definitely ascertained by you to inure to the grant, as hereinafter prescribed, the fees will then be due thereon.

3d. The State, through its grantee, or the grantee, as the case may be, is required to file with the register and receiver of the proper land office descriptive lists of the tracts of land claimed as inuring under the grant within sections of ——— miles each along the line of route, on both sides thereof, to be dated and verified by the signature of the selecting agent.

For agent's certificate, to be attached to each list, see Form A.

The party appearing as the agent of the grantee must file with the register and receiver written and satisfactory evidence, under seal, showing his authority to act in the premises.

In the preparation of the descriptive lists the register and receiver will afford the agent all reasonable facilities, taking care, however, not to interrupt the current public business.

The lists must be carefully and critically examined by the register and receiver, and their accuracy tested by the plats and records of their office.

When so examined and tested, and found correct in all respects, they will become final locations, and you will, on the payment of the requisite fees to the receiver, so certify at the foot of each list, according to Form B.

After such lists have been examined, and you have attached your certificate thereto, the same will be consecutively numbered, commencing with No. 1, for each railroad or separate grant. Upon the payment of the fees and certification of the lists by you, the register will post the selections in the Tract Book after the following manner:

"Selected ———, 18—, by A. B., agent for the ——— Rail——— Co., act ——, list No. ——;" and on the plats he will mark the tracts so selected "——— R. R."

After the selections are properly posted and marked on the plats, the lists will be transmitted to this office, accompanied by the evidence of the agent's appointment.

It is required that clear lists of approvals shall in every case be made out by you, or required of the selecting agents, after your examination of the tracts which you are prepared to certify, showing clearly and without erasure the description of the lands and the area of each tract; also the aggregate area, properly footed in the columns, and set forth in the certificate.

For rejected selections you will then require a new application and list, with tender of fees, upon which you will note opposite each tract the objections appearing upon your records, and indorse thereon in full your reasons for refusing to certify the same.

Should the agent appeal, you will allow him to file the points of exception to your ruling in writing, properly drawn and dated, which, when completed, you will forward to this office. No erasures should appear in such lists. The rejection will sufficiently appear from your notes and indorsements, and, if finally admitted, the lists will then be in complete and perfect order for filing. To secure uniformity, and to make the lists convenient for binding, properly ruled blanks will be furnished upon application.

Lists containing erasures received at this office will not be filed, but will be returned to you for perfection.

4th. The fees will be due in all cases where the service may have been rendered *subsequent* to the passage of said act of 1864.

5th. The receiver will account for the fees thus paid in his monthly and quarterly accounts, specially setting forth in the same the particular case or cases on which such fees had accrued, giving the name of road, number, and date of the list of selections for which they had been paid.

6th. By joint resolution No. 10, of January 30, 1865, "mineral lands" are not embraced in the grants made at the first session of the Thirty-eighth Congress, unless otherwise specially provided in the act or acts making the grants. (Revised Statutes, section 2346.)

Form of title page to be prefixed to the lists of selections will be found herewith, marked C.

V.

INDEMNITY SELECTIONS FOR RAILROADS.

In the adjustment of grants for railroads the principle has, until recently, prevailed, that indemnity was allowed for all lands sold, reserved, or disposed of within the granted limits, whether such sale, reservation, or disposal occurred before or after the granting act, and the certifications and patents have been executed in conformity thereto.

In accordance with the recent decision of the Supreme Court in the case of the Leavenworth, Lawrence and Galveston Railroad Company *vs.* United States (2 Otto, 733), it is held by the Department that indemnity can only be allowed for lands sold, reserved, or disposed of in the granted limits by the General Government after the granting act and prior to the time when the railroad right attached, unless the grant be one of quantity specifically set forth in the act. In the adjustment of all grants it consequently becomes necessary to know for what lands lost *in place* the indemnity selections are made, and with the view to that end you will require the companies to designate the specific tracts for which the lands selected are claimed.

VI.

COSTS OF SURVEYING AND CONVEYING LANDS.

By a proviso to the act of Congress approved July 31, 1876 (19 Stat., p. 121), making appropriations for sundry civil expenses of the Government, etc., it is declared:

"That before any lands granted to any railroad company by the United States shall be conveyed to such company, or any persons entitled thereto under any of the acts incorporating or relating to said company, unless such company is exempted by law from the payment of such cost, there slall first be paid into the Treasury of the United States the cost of surveying, selecting, and conveying the same by the said company or persons in interest."

It has been decided by the Department that in the adjustmnt of all railroad grants falling within the terms of that act the requirements thereof must be complied with. No certifications or patents can issue, therefore, to any railroad company affected by the statute until the costs of surveying, selecting, and conveying the lands have been paid.

The cost of surveying includes the expense of field and office work, and must be paid in the manner indicated in subdivision VII of this circular.

The cost of selecting is fixed by section 2238 of the Revised Statutes, before referred to, and payment thereof will be governed by the regulation prescribed in subdivision IV of these instructions.

The cost of conveying will be governed by the rates fixed by law for the preparation of certified copies, namely, fifteen cents for each one hundred words or fraction thereof. As a patent is required to be recorded, the payment must be made at double those rates, or at the rate of *thirty* cents for each one hundred words, in order that the necessary expense of conveying the land may be covered.

The provisions of the said act are construed as not applying to grants made to States to aid in the construction of railroads not named in the granting act; but where the grant is to a State in trust for the benefit of a company named—where the State is simply an intermediary and not a beneficiary—the payment required must be made.

VII.

PACIFIC RAILROADS UNDER ACTS OF CONGRESS APPROVED JULY 1, 1862, AND JULY 2, 1864.

By section twenty-one of the latter act, these companies are required to pay the cost of surveying and conveying the lands, in addition to the register's and receiver's fees exacted by section 2238 of the Revised Statutes, before mentioned. This cost of surveying and conveying is, by the decision of the United States Supreme Court at the December term, 1872, applicable to all the lands granted by acts of July 1, 1862, and July 2, 1864. Therefore, the "cost" will be assessed and collected on all the lands within twenty miles from the line of the road, where the grant is under both acts.

To ascertain the cost of "surveying," which includes both *surveying in the field* and *office work*, the company will apply to the surveyor-general of the State or Territory in which the lands are situated. Upon ascertaining the sums due for surveying and office work for the "section or sections of road" for which selections have been or are to be made, a deposit of those sums must be made, to the credit of the Treasurer of the United States, with an authorized depositary. The duplicate of deposit must be filed with the surveyor-general; whereupon he will transmit to the register and

receiver of the proper land office his certificate of such payment having been made, specifying how much was for surveying and how much for office work, as per Form D.

The surveyor-general's certificate and the evidence of the agent's appointment must accompany the lists of selection when transmitted by you to this office.

Let me here again direct your attention to the necessity of great care in the examination and testing of these lists, so that all conflicts may be avoided and improper selections be excluded, and that the verified schedules may be absolutely accurate, thus avoiding embarrassment and delay to all concerned.

In the fourth section of the act of July 2, 1864, it is provided that the word "mineral," when it occurs in that act, shall not be held to include coal and iron. Therefore, iron and coal lands are subject to selection by the Pacific railroads; but all other minerals are expressly excluded from the grant, and must necessarily be so from all selections you may certify to this office.

VIII.

RELINQUISHMENTS BY RAILROADS IN FAVOR OF SETTLERS.

By an act of Congress approved June 22, 1874 (18 Stat., p. 194), it is provided—

"That in the adjustment of all railroad land grants, whether made directly to any railroad company or to any State for railroad purposes, if any of the lands granted be found in the possession of an actual settler whose entry or filing has been allowed under the pre-emption or homestead laws of the United States subsequent to the time at which, by the decision of the Land Office, the right of said road was declared to have attached to such lands, the grantees, upon a proper relinquishment of the lands so entered or filed for, shall be entitled to select an equal quantity of other lands in lieu thereof from any of the public lands not mineral, and within the limits of the grant, not otherwise appropriated at the date of selection, to which they shall receive title the same as though originally granted. And any such entries or filings thus relieved from conflict may be perfected into complete title as if such lands had not been granted: *Provided*, That nothing herein contained shall in any manner be so construed as to enlarge or extend any grant to any such railroad, or to extend to lands reserved in any land grant made for railroad purposes: *And provided further*, That this act shall not be construed so as in any manner to confirm or legalize any decision or ruling of the Interior Department under which lands have been certified to any railroad company when such lands have been entered by the pre-emption or homestead settler after the location of the line of the road and prior to the notice to the local land office of the withdrawal of such lands from market."

By reference to the foregoing it will be perceived that an inducement is offered to such railroad companies as may be found entitled to lands held by actual settlers under the pre-emption or homestead laws to relinquish in favor of the settlers, and receive other lands in lieu of those surrendered.

Upon the filing of such relinquishment this office is authorized to recognize the filing or entry of the settler in the same manner as if the land had not been granted to the railroad company.

To facilitate the adjustment of conflicting claims and give effect to the provisions of the act, the following rules are established:

1. When the superior right of the company is ascertained, and it is found that the claim of the settler is such that it would be admitted were the railroad claim extinguished, this office will, in all practicable cases, direct the attention of the officers of the company to the fact, and request an explicit answer whether or not the land will be relinquished.

At the same time it will be well for the party interested to seek for himself the relief indicated by direct application to the railroad authorities, and thereby aid in securing a speedy and satisfactory adjustment.

2. Relinquishment may be made by a simple waiver of claim where the patent or its equivalent has not been issued in behalf of the company; but where title has passed, formal reconveyance will be required, as in other cases of the surrender of patents.

3. When making relinquishment, the company will be permitted to name the tract selected as indemnity; and in order that conflict with pending applications may be avoided, such relinquishment and selection should be filed with the register and receiver, and be noted upon their records, before transmission to this office.

But in case the company desires to relinquish at once in favor of the settler, and trust to future selections for indemnity, such relinquishment may be sent direct to this office, and upon its receipt will be noted on the books, and the claim of the settler will be immediately released from suspension.

4. The selections must be of lands, not mineral, within the limits of the grant and withdrawal, free from other claims, and not reserved or otherwise appropriated at date of selection.

5. Where fees have been paid upon the original selections they will be applied to the indemnity. Where tracts not yet formally selected are relinquished, fees will be charged upon the indemnity selections.

6. The selections will be reported by the register and receiver in the same manner as original selections, with a reference to the act by its date and title; and opposite each tract annotation will be made of the tract surrendered, and the name of the settler in whose favor it is relinquished, with the number of his entry or filing. (See Forms E and F.)

Properly ruled blanks will be furnished for convenience in making the selections.

As the act is not mandatory upon the companies, but simply provides a mode of adjustment depending upon their voluntary action, and as the relief proposed is vital to many settlers, who through error resulting from various causes have made homes upon the lands granted, it is hoped that by a liberal and mutual spirit of compromise and concession on the part of settlers and railroad officials its beneficent provisions may be made available, and substantial advantages to all may be secured at small cost and trouble to the parties concerned; and although the adjustments will involve this office in a large amount of labor, it will be cheerfully undertaken for the purpose of accomplishing a result so desirable.

IX.

CONFIRMATION OF PRE-EMPTION AND HOMESTEAD CLAIMS IN RAILROAD LIMITS.

On the 21st of April, 1876, Congress, by an act entitled "An act to confirm pre-emption and homestead entries of public lands within the limits of railroad grants in cases where such entries have been made under the regulations of the Land Department," declared:

"That all pre-emption and homestead entries, or entries in compliance with any law of the United States, of the public lands, made in good faith by actual settlers, upon tracts of land of not more than one hundred and sixty acres each, within the limits of any land grant, prior to the time when notice of the withdrawal of the lands embraced in such grant was received at the local land office of the district in which such lands are situated, or after their restoration to market by order of the General Land Office, and where the pre-emption and homestead laws have been complied with, and proper proofs thereof have been made by the parties holding such tracts or parcels, they shall be confirmed, and patent for the same shall issue to the parties entitled thereto.

"SEC. 2. That when at the time of such withdrawal as aforesaid valid pre-emption or homestead claims existed upon any lands within the limits of any such grants which afterward were abandoned, and, under the decisions and ruling of the Land Department, were re-entered by pre-emption or homestead claimants who have complied with the laws governing pre-emption or homestead entries, and shall make the proper proofs required under such laws, such entries shall be deemed valid, and patents shall issue therefor to the person entitled thereto.

"SEC. 3. That all such pre-emption and homestead entries which may have been made by permission of the Land Department, or in pursuance of the rules and instructions thereof, within the limits of any land grant at a time subsequent to expiration of such grant, shall be deemed valid, and a compliance with the laws and the making of the proof required shall entitle the holder of such claim to a patent therefor." (19 Stat., p. 35.)

It is required that every application under this act shall be in such form as to distinctly set forth the facts in the case, and the specific grounds upon which the party applying claims to be included in the terms of the law; and after the application shall have been filed the applicant shall be allowed to make proof of compliance with the pre-emption or homestead laws as provided in this act.

Applications under this act must, in all cases, be made to the local land officers of the district within which the land claimed is situated, and the proof required must be taken before them, or before any person authorized by law to take the same.

No person shall be deemed to have lost any right who failed to make the proof required by the pre-emption or homestead laws by reason of any decision or ruling of this office prior to approval of this act, and all such persons may now make the proof required.

The proof must in all cases be filed with you, and you will transmit each case separately to this office, with such information as is in your possession relative thereto.

X.

RIGHT-OF-WAY RAILROADS.

The following is a copy of an act of Congress approved March 3, 1875, granting to railroads the right of way through the public lands of the United States:

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the right of way through the public lands of the United States is hereby granted to any railroad company duly organized under the laws of

any State or Territory, except the District of Columbia, or by the Congress of the United States, which shall have filed with the Secretary of the Interior a copy of its articles of incorporation, and due proofs of its organization under the same, to the extent of one hundred feet on each side of the central line of said road; also the right to take from the public lands adjacent to the line of said road material, earth, stone, and timber necessary for the construction of said railroad; also grounds adjacent to such right of way for station buildings, depots, machine shops, side-tracks, turn-outs, and water-stations, not to exceed in amount twenty acres for each station, to the extent of one station for each ten miles of its road.

"SEC. 2. That any railroad company whose right of way, or whose track or road bed upon such right of way, passes through any canyon, pass, or defile, shall not prevent any other railroad company from the use and occupancy of the said canyon, pass, or defile, for the purposes of its road, in common with the road first located, or the crossing of other railroads at grade. And the location of such right of way through any canyon, pass, or defile shall not cause the disuse of any wagon or other public highway now located therein, nor prevent the location through the same of any such wagon road or highway where such road or highway may be necessary for the public accommodation; and where any change in the location of such wagon road is necessary to permit the passage of such railroad through any canyon, pass, or defile, said railroad company shall, before entering upon the ground occupied by such wagon road, cause the same to be reconstructed at its own expense in the most favorable location, and in as perfect a manner as the original road: *Provided*, That such expenses shall be equitably divided between any number of railroad companies occupying and using the same canyon, pass, or defile.

"SEC. 3. That the legislature of the proper Territory may provide for the manner in which private lands and possessory claims on the public lands of the United States may be condemned; and where such provisions shall not have been made, such condemnation may be made in accordance with section three of the act entitled "An act [to amend an act entitled An act] to aid in the construction of a railroad and telegraph line from the Missouri River to the Pacific Ocean, and to secure to the Government the use of the same for postal, military, and other purposes, approved July first, eighteen hundred and sixty-two," approved July second, eighteen hundred and sixty-four.

"SEC. 4. That any railroad company desiring to secure the benefits of this act shall, within twelve months after the location of any section of twenty miles of its road, if the same be upon surveyed lands, and if upon unsurveyed lands, within twelve months after the survey thereof by the United States, file with the register of the land office for the district where such land is located a profile of its road; and upon approval thereof by the Secretary of the Interior the same shall be noted upon the plats in said office; and thereafter all such lands over which such right of way shall pass shall be disposed of subject to such right of way: *Provided*, That if any section of said road shall not be completed within five years after the location of said section, the rights herein granted shall be forfeited as to any such uncompleted section of said road.

"SEC. 5. That this act shall not apply to any lands within the limits of any military, park, or Indian reservation, or other lands specially reserved from sale, unless such right of way shall be provided for by treaty stipulation or by act of Congress heretofore passed.

"SEC. 6. That Congress hereby reserves the right at any time to alter, amend, or repeal this act, or any part thereof.

"Approved March 3, 1875." (18 Stat., p. 482.)

The regulations under the law are as follows:

I. Any railroad company desiring to obtain the benefits of the law is required to file—

First. A copy of its articles of incorporation, duly certified to by the proper officer of the company, under its corporate seal.

Second. A copy of the State or Territorial law under which the company was organized (when organized under State or Territoral law), with a certificate of the governor or secretary of the State or Territory that the same is the existing law.

Third. When said law directs that the articles of association, or other papers connected with the organization, be filed with any State or Territorial officer, the certificate of such officer that the same have been filed according to law, with the date of the filing thereof.

No forms are prescribed for the above portion of the "due proofs" required, as each case must be governed, to some extent, by the laws of the State or Territory. Under the following regulations proper forms will be found herein.

Fourth. The official statement, under seal, of the proper officer, that the organization has been completed; that the company is fully authorized to proceed with the construction of the road according to the existing law of the State or Territory; and that the copy of the articles filed with the Secretary of the Interior is true and correct. (See Form I.)

Fifth. A true list, duly verified by the sworn statement of the president, under the seal of the company, showing the names and designation of its respective officers at the date of the presentation of the proofs at the Department. (See Form II.)

These may be transmitted directly to the Secretary of the Interior, or through this office, or they may be filed with the register of the land district in which the principal terminus of the road is to be located, who will forward them to this office.

II. Upon the location of any section of the line of route of its road, not exceeding twenty miles in length, the company must file with the register of the land district in which such section of the road, or the greater portion thereof, is located, a map for the approval of the Secretary of the Interior, showing the termini of such portion of the road, its length, and its route over the public lands according to the public surveys.

The map must be filed within twelve months after the location of such portion of the road, if located upon surveyed lands, and if upon unsurveyed lands, within twelve months of the survey thereof. It must bear—

"First. Affidavit of the chief engineer of the company (or person employed to make the survey, if the company has no chief engineer), setting forth that the survey of the line of route of the company's road from ——— to ———, a distance of ——— miles (giving termini and distance), was made by him (or under his direction) as chief engineer of the company, (or as surveyor employed for the purpose, if such be the case), under authority of the company on or between certain dates (giving the same); and that such survey is accurately represented on the map. If the affidavit is made by the chief engineer of the company, it must be signed by him officially. (See Form III.)

"Second. Official certificate of the president of the company, attested by its secretary under its corporate seal, regarding the person signing the affidavit, either as to his being the chief engineer of the company or as to his employment by the company for the purpose of making such survey; that the survey was made under authority of the company; that the line of route so surveyed and represented by the map was adopted by the company, by resolution of its board of directors of a certain date (giving the date), as the definite location of the line of route of the company's road from ——— to ———, a distance of ——— miles (giving termini and distance), and that the map has been prepared to be filed for the approval of the Secretary of the Interior, in order that the company may obtain the benefits of the act of Congress approved March 3, 1875, entitled 'An act granting to railroads the right of way through the public lands of the United States.'" (See Form IV.)

III. It will be observed that the requirements of the law regarding the filing of the proper papers and maps are conditions precedent to the obtainment of the right to construct a railroad over the public lands, or to take therefrom material, earth, stone, and timber for its construction, or to occupy them for station or other purposes. It is therefore imperative that proper steps, as pointed out in this circular, should be taken by a company, and the approval of the Secretary of the Interior obtained, prior to the construction of any part of its road or its occupancy of the public lands in any manner.

IV. Should the company desire to construct its road over lands prior to their survey, it may file, in manner as heretofore indicated, a map of its surveyed route, without waiting until the lands are surveyed, and, upon approval thereof, may proceed with construction, but, immediately on the survey of the lands over which the road passes, the company must also file a map showing the line of route of its road over such lands, in order that the proper notes and records for the protection of its rights may be made.

V. Upon construction of any section of the line of its road the company must file with the register of the proper land district, for transmission to this office, a map of such constructed portion of road, bearing—

First. Affidavit of the chief engineer or person under whose supervision the portion of the road was constructed that its construction was commenced on ——— and finished on ——— (giving dates); that the line of constructed road is accurately represented upon the map, and that it conforms to the line of located route which received the approval of the Secretary of the Interior on ——— (giving date). (See Form V.)

Second. Certificate of the president of the company, attested by the secretary under the corporate seal, that the portion of the road indicated by the map was actually constructed at the time as sworn to by the chief engineer of the company (or person making the affidavit), and on the exact route shown on the map; that in its construction the road does not deviate from the line of route approved by the Secretary of the Interior, and that the company has in all respects complied with the requirements of the act of March 3, 1875, granting right of way through the public lands. (See Form VI.)

Any variation within the limits of one hundred feet from the central line of the road as located will not be considered a deviation from such line, but where, upon construction, it is found necessary to transgress the limits within which the company

has right of way, the company must at once file proper map of amended route for approval.

VI. If the company desires to avail itself of the provisions of the law which grants the use of "ground adjacent to the right of way for station-buildings, depots, machine shops, side-tracks, turn-outs, and water-stations, not to exceed in amount twenty acres for each station, to the extent of one station for each ten miles of its road," it must file for approval, in each separate instance, a plat showing, in connection with the public surveys, the surveyed limits and area of the grounds desired. Such plat must bear—

First. Affidavit of the chief engineer or surveyor by whom or under whose supervision the survey was made, to the effect that the plat accurately represents the surveyed limits and area of the grounds required by the company for station or other purposes, under the law (stating the purposes), in ——— (giving section, township, range, and State or Territory); that the company has occupied no other grounds for station or other similar purposes upon public lands within ten miles of the grounds designated on the plat, and that, in his belief, the grounds so represented are actually and to their entire extent required by the company for the necessary uses contemplated by law. (See Form VII.)

Second. Certificate of the president of the company, attested by the secretary under the corporate seal, that the survey of the tract represented on the plat was made under authority and by direction of the company by or under supervision of its chief engineer (or person making the survey), whose affidavit is attached; that such survey accurately represents the grounds actually and to their entire extent required by the company for station (or other) purposes in ——— (giving section, township, range, State or Territory), allowed by the provisions of the act of Congress approved March 3, 1875, granting to railroads the right of way through the public lands; that the company has no station or other grounds upon public lands within a distance of ten miles from the grounds represented on the plat; and that the company, by resolution of its board of directors of a certain date (giving the date), directed the proper officers to present the plat for the approval of the Secretary of the Interior in order that the company may obtain the use of the grounds under the law above referred to. (See Form VIII.)

VII. Registers at the various land offices are directed to require that such papers and maps herein referred to as may be filed with them for transmission to this office shall conform to these regulations. Where differences of opinion may arise between themselves and the persons filing papers respecting the proper construction of these requirements the papers may be transmitted with letter stating the differing opinions.

They are also instructed, in any case where information is received by them of the construction of railroads within their districts, on the rights of which they have no official knowledge, to promptly advise this office of the facts in order that proper information or directions in the matter may be given them.

VIII. Action upon maps filed will be facilitated by presenting them in duplicate. The attention of companies seeking the benefits of this act should be specially directed to this suggestion, as serious delays and embarrassments are often incurred, through the inability of this office, owing to its limited clerical force, to prepare the necessary copies for transmission to the district offices.

Very respectfully,

J. M. ARMSTRONG,
Acting Commissioner.

DEPARTMENT OF INTERIOR,
November 7, 1879.

Approved.

C. SCHURZ,
Secretary.

ADDITIONAL INSTRUCTIONS.

For additional instructions relative to indemnity lands within the grants to railroads, see circular of May 22, 1883, and Secretary of Interior's letter of July 11, 1883, on pages 891 and 892 herein.

FORMS FOR VERIFICATION OF LISTS OF SELECTIONS.

(A.)

——— OF ———,
County of ———, *ss:*

I, ——— ———, being duly sworn, depose and say that I am the land agent of the ———, formerly the ——— ; that the foregoing list of lands, which I hereby select, is a correct list of a portion of the public lands claimed by the said ——— company as inuring to ———, to aid in the construction of the ——— from ———, for which a grant of lands was made by the acts of Congress approved ——— ; that the said lands are vacant, unappropriated, and are not interdicted mineral nor reserved lands, and are of the character contemplated by the grant, being within the limits of —— miles on each side of the line of route for a continuous distance of —— miles, being for ——— section of said road, starting from ——— and ending ———.

——— ———. [LS.]

Sworn and subscribed before me this —— day of ———, 18--.

——— ———.

NOTE.—This affidavit may be made before either the Register or Receiver of the United States Land Office.

(B.)

UNITED STATES LAND OFFICE,
———, ———,
———, 18—.

We hereby certify that we have carefully and critically examined the foregoing list of lands claimed by the ———, under the grant to the ———, by act of Congress approved ———, and selected ——— by ——— ———, the duly authorized agent; and we have tested the accuracy of said list by the plats and records of this office, and that we find the same to be correct. And we further certify that the filing of said list is allowed and approved, and that the whole of said lands are surveyd public lands of the United States, and within the limit of ——— miles on each side; and that the same are not, nor is any part thereof, returned and denominated as mineral land or lands, nor claimed as swamp lands, nor is there any homestead, pre-emption, State, or other valid claim to any portion of said lands on file or record in this office.

We further certify that the foregoing list shows an assessment of the fees payable to us allowed by the act of Congress approved July 1, 1864, and contemplated by the circular of instructions dated November 7, 1879, addressed by the Commissioner of the General Land Office to Registers and Receivers of the United States Land Offices; and that the said company have paid to the undersigned, the Receiver, the full sum of ———, in full payment and discharge of said fees.

——— ———, *Register.*
——— ———, *Receiver.*

(C.)

UNITED STATES LAND OFFICE,
———, ———,
———, 18—.

The ———, under and by virtue of the acts of Congress entitled "——— ———," and under and in pursuance of the rules and regulations prescribed by the Commissioner of the General Land Office, hereby makes and files the following list of selections of public lands claimed by the said company as inuring to it, and to which it is entitled under and by virtue of the grants and provisions of the said acts of Congress, and the location of the line of route of the ——— of said company; being for the ——— section (——miles) of the same, commencing at ——— and ending ——— ; the selections being particularly described as follows, to wit: —— ——.

(D.)

UNITED STATES SURVEYOR GENERAL'S OFFICE,
———, ———,
———, 18—.

I, ——— ———, Surveyor General for the United States in and for the ———, hereby report and certify that the ——— has this day filed with me, at ———, a duplicate certificate of deposit, No. —, dated ——— of the ———, to the credit of the Treasurer of

the United States, showing that the sum of $——— has been deposited as cost of survey and $——— for office work, and that the said sums are the correct amount of the cost of survey and office work for the lands mentioned and described in the list of lands hereto annexed, to the extent of said list.

Survey, $———.

Office work, $———.

In testimony whereof I have hereunto set my hand and official seal.

——— ———, *Surveyor General.*

RELINQUISHMENTS BY RAILROADS IN FAVOR OF SETTLERS.

(E.)

UNITED STATES LAND OFFICE,

———, ———,

———, 18—.

I, ——— ———, agent of the ——— Rail——— Company, hereby apply to select the following described lands, in lieu of lands inuring to said company, under act of ———, and surrendered by said company in favor of actual settlers thereon, as provided by act of June 22, 1874, entitled "An act for the relief of settlers on railroad lands."

(F.)

UNITED STATES LAND OFFICE,

———, ———,

———, 18—.

We hereby certify that we have carefully and critically examined the foregoing list of lands claimed by the ——— Rail——— Company, in lieu of lands heretofore granted for said company, and selected by ——— ———, the duly authorized agent, and that we find the same to be correct; and we further certify that the filing of said list is allowed and approved, and that the whole of said lands are surveyed public lands of the United States, and within the limits of —— miles.

We further certify that the foregoing list shows an assessment of the fees payable to us under the act of July 1, 1864, and that the said company have paid to the undersigned, the Receiver, the full sum of ———, in full payment of said fees.

——— ———, *Register.*

——— ———, *Receiver.*

FORMS FOR CERTIFICATION OF MAPS OF SURVEYS, PERMANENT LOCATIONS, AND CONSTRUCTION OF RAILROADS.

Nos. 1, 2, 3, and 4 to be used when grant was direct to the railroad company. Nos. 1, 3, 4, 5, 6, and 7 to be used when grant was made to the State or Territory.

(No. 1.)

——— OF ———,

County of———, ss:

——— ———, of ———, in said county and ———, being duly sworn, deposeth and says, that he is the chief engineer of the ———, and has been such chief engineer since the ———; that during the period above named ——— and ——— were employed, and by this deponent as chief engineer for said railroad company, as deputy or division engineers; that the said engineers, as shown by their field-notes, verified under oath, did actually survey and mark upon the ground the line or route of the ——— from ——— to ———, in the sections and at the times respectively designated by dates, which are included between the flag-staffs upon and along the line of route of said railroad as delineated on this map, showing the line of the public survey in connection with the surveyed line of the route; and that the acts of said deputy or division engineers in the premises were duly approved and accepted on behalf of said company by this deponent as said chief engineer of the ———.

——— ———, *Chief Engineer.*

Sworn and subscribed this ——— day of ———, before me.

[SEAL.] ——— ———, *Notary Public.*

NOTE.—The map of location *must*, as shown in the above form, in all cases show the lines of the public survey in connection with the line of route.

(No. 2.)

OFFICE OF THE ———,
——— ———,
———, 18—.

It is hereby certified that, in pursuance of the act of Congress approved July 1, 1862, entitled "An Act to aid in the construction of a railroad and telegraph line from the Missouri River to the Pacific Ocean, and to secure to the Government the use of the same for postal, military, and other purposes," wherein a grant of land is made by the ——— section to the ———, who are thereby authorized to construct a railroad and telegraph line from ———, and the act of July 2, 1864, amendatory thereof, which ——— ——— to construct said railroad, this map shows the location of the line or route of the ——— from ——— to ———, being a part of the line or route of said railroad as definitely fixed, in compliance with said acts of Congress and in pursuance of the resolution of the board of directors of said company, passed on the ——— ; and that the dates of the field-work thereof are truly indicated along the line, from station to station, upon this map.

In testimony whereof the ——— has caused the same to be signed by its president and engineer, and has attached hereunto its corporate seal, at ———, on the day and year first above written.

[SEAL.] ——— ———, *President.*
——— ———, *Chief Engineer.*

Attest: ——— ———,
Secretary.

(No. 3.)

———F ———,
County of ———, *ss:*

——— ———, of ———, in said county and ———, being duly sworn, deposeth and says, that he is the chief engineer of the said railroad from ——— to ———, being for ——— section of ——— miles, as shown by the line of route in connection with the lines of the public surveys on this map; that it has been completed and equipped as required by law, and that this line of route shows the correct location of the said railroad.

[SEAL.] ——— ———, *Chief Engineer.*

Sworn and subscribed this ——— day of ———, before me.

[SEAL.] ——— ———, *Notary Public.*

(No. 4.)

It is hereby certified that ——— ——— is the chief engineer of the ———, and that the location of the road as represented on this map is correct and approved by the company; and also that the said portion of the said road has been completed and equipped in all respects as required by law.

——— ———, *President.*

Attest: ——— ———,
Secretary.

[SEAL.]

(No. 5.)

OFFICE OF THE ———,
——— ———.

It is hereby certified that, in pursuance of the act of the legislative assembly of the ———, approved ———, entitled "———" this map shows, in connection with the public surveys, the actually surveyed line of route of the ——— from ——— to ———, as definitely fixed, in compliance with the act of Congress approved ———, and in pursuance of the resolution of the board of directors of said railroad company, passed on the ——— day of ———; and that the dates of the field-work thereof are truly indicated along the line, from station to station, upon this map.

In testimony whereof the ——— has hereunto attached its corporate seal and caused the same to be signed by the president and engineer, at ———, in the day and year first above written.

[SEAL.] ——— ———, *President.*
——— ———, *Chief Engineer.*

Attest: ——— ———,
Secretary.

(No. 6.)

I, ——— ———, governor of the ———, do hereby certify that this plat or map of the ——— has been duly filed in my office by the railroad company, and shows, in connection with the public surveys, the location of the line of route as actually surveyed of the ——— "from ——— to ———," as definitely fixed, in compliance with

the act of Congress approved ———, entitled "An act ———;" and with the act of the legislative assembly of the ———, approved ———, entitled "———," granting certain lands to the railroad herein named.

In testimony whereof I have hereunto set my hand and caused to be affixed the great seal of the ———.

Done at ———, this ——— day of ———.

[SEAL.] ——— ———, *Governor.*

Attest: ——— ———,
Secretary of ———.

(No. 7.)

EXECUTIVE OFFICE, ——— ———,
——— ———.

I, ——— ———, governor of the ———, do hereby certify that this plat or map of the ——— has been duly filed in my office by the said ——— company, and shows that portion of the said railroad commencing at ——— and ending at ———, which has been completed and equipped as required by the act of Congress approved ———, and the act of the legislative assembly of the ———, approved ———, entitled "———," granting lands to the said railroad company.

In testimony whereof I have hereunto set my hand and caused to be affixed the great seal of the ———.

Done at ——— this ——— day of ———.

[SEAL.] ——— ———, *Governor.*

Attest: ——— ———,
Secretary of ———.

FORMS FOR "DUE PROOFS" AND VERIFICATION OF MAPS OF RIGHT OF WAY RAILROADS.

(I.)

I, ——— ———, secretary [or president] of the ——— railroad company, do hereby certify that the organization of said company has been completed; that the company is fully authorized to proceed with the construction of the road according to the existing laws of the State [or Territory]; and that the copy of the articles of association [or incorporation] of the company filed in the Department of the Interior is a true and correct copy of the same.

In witness whereof I have hereunto set my name and the corporate seal of the company.

[SEAL.] ——— ———,
——— *of the* ——— *Railroad Company.*

(II.)

——— ———, being duly sworn, says that he is the president of the ——— railroad company, and that the following is a true list of the officers of the said company, with the full name and official designation of each, to wit: [Here insert the full name and official designation of each officer.]

[SEAL OF COMPANY.] ——— ———,
President of the Company.

Sworn and subscribed to before me this —— day of ———, 18—.

[SEAL.] ——— ———,
Notary Public.

(III.)

——— ———, being duly sworn, says he is the chief engineer of [or is the person employed to survey the line of route of the road of] the ——— railroad company; that the survey of the line of route of said road from ——— to ———, a distance of ——— miles, was made by him [or under his direction] as chief engineer of the company [or as surveyor employed by the company] and under its authority, commencing on the —— day of ———, 18—, and ending on the —— day of ———, 18—; and that such survey is accurately represented on the accompanying map.

——— ———,
——— ———.

Sworn and subscribed to before me this —— day of ———, 18—.

[SEAL.] ——— ———,
Notary Public.

(IV.)

I, ——— ———, do hereby certify that I am the president of the ——— railroad company; that ——— ———, who subscribed the foregoing affidavit, is the chief engineer of [or was employed to make the survey by] the said company; that the survey of the line of route of the company's road, as accurately represented on the accompanying map, was made under authority of the company; that the said line of route so surveyed and as represented on the said map was adopted by the company by resolution of its board of directors on the —— day of ———, 18—, as the definite location of the road from ——— to ———, a distance of ——— miles; and that the map has been prepared to be filed for the approval of the Secretary of the Interior, in order that the company may obtain the benefits of the act of Congress approved March 3, 1875, entitled "An Act granting to railroads the right of way through the public lands of the United States."

———— ————,
President of the ——— Railroad Company.

Attest: ——— ———,
Secretary.

[SEAL OF COMPANY.]

(V.)

——— ———, being duly sworn, says that he is the chief engineer of [or was employed to construct the road of] the ——— railroad company; that said road has been constructed, under his supervision, from ——— to ———, a distance of ——— miles; that its construction was commenced on the —— day of ———, 18—, and finished on the —— day of ———, 18—; that the line of constructed road as aforesaid is accurately represented on the accompanying map, and that it conforms to the line of located route which received the approval of the Secretary of the Interior on the —— day of ———, 18—.

———— ————,
————————.

Sworn and subscribed to before me this —— day of ———, 18—.
[SEAL.]

———— ————,
Notary Public.

(VI.)

I, ——— ———, do hereby certify that I am the president of the ——— railroad company; that the portion of the road from ——— to ———, a distance of ——— miles, was actually constructed as set forth in the foregoing affidavit of ——— ———, chief engineer, [or, the person employed by the company in the premises,] and on the exact route as represented on the accompanying map; that in its construction the road does not deviate from the line of route approved by the Secretary of the Interior on the —— day of ——, 18—; and that the company has in all things complied with the requirements of the act of Congress approved March 3, 1875, granting to railroads the right of way through the public lands of the United States.

———— ————,
President of the ——— Railroad Company.

Attest: ——— ———,
Secretary.

[SEAL OF COMPANY.]

(VII.)

——— ———, being duly sworn, says he is the chief engineer of [or the person employed by] the ——— railroad company, under whose supervision the survey was made of the grounds selected by the company for [station, buildings, depots, &c., as the case may be], under the act of Congress approved March 3, 1875, granting to railroads the right of way through the public lands of the United States; said grounds being situated in the ——— quarter of section ——— of township ———, —— of range ———, ——, in the State [or Territory] of ———; that the accompanying plat accurately represents the surveyed limits and area of the grounds so selected, and that the area of the ground so selected and surveyed is ——— acres and no more; that the company has occupied no other grounds for similar purposes upon public lands within ten miles of the ground designated on the said plat; and that, in his belief, the grounds so selected and surveyed, and represented, are actually and to their entire extent required by the company for the necessary uses contemplated by said act of Congress approved March 3, 1875.

———— ————,
———— ————.

Sworn and subscribed to before me this —— day of ——, 18—.

For decisions of the Departments, see Reports of Commisioner of the General Land Office, 1862 to 1881, and decisions of Department of the Interior and General Land Office from June, 1881, to June, 1883, title, "Railroads," pages 265 and following.

MAPS OF LAND GRANTS IN AID OF WAGON AND RAILROADS.

The first of the maps facing page 949 herein, exhibiting the grants of land made by the United States in aid of the construction of wagon and railroads was prepared by Willis Drummond, jr., while in the service of the General Land Office in 1878. It was corrected to June 30, 1883, by J. Dempster Smith, esq., chief of the Railroad Division of the General Land Office. Confirmatory text will be found on pages 260 to 268, Chapter XX, and on pages 753, *et seq.*, addenda to Chapter XX.

The second, giving data as to land and bond granted railroads, is from the annual report of Hon. Theos. French, Auditor of Railroad Accounts, for 1878.

SCRIP.

TO JUNE 30, 1882.

[See Chapter XXI, pages 289, 290, 1276.]

From June 30, 1880, to June 30, 1882, the additional and other issues of scrip by the General Land Office have been as follows:

	Acres.
Scrip issued by surveyor-general of Louisiana, under act of June 2, 1858	13,222,660
(In all under this act to June 30, 1882, 219,858,324 acres.)	
Scrip issued to Charles Gayarré, Louisiana:	
On Las Ormigas grant	340,028
On La Narva grant	15,372,044

	Acres.
Scrip issued by Commissioner of the General Land Office, pursuant to decrees of the United States Supreme Court, under act of June 22, 1860, and supplemental legislation	17,755,271
(In all under these acts to June 30, 1882, 624,268,041 acres.)	
Scrip issued in satisfaction of the claim of T. B. Valentine, under act of April 5, 1872	11,800,000
(In all under this act, 13,316,000 acres.)	
Scrip issued in satisfaction of act of June 1, 1878, for Robert Cole (20 Stat., p. 536)	2,320,000
Warrants issued under act of April 11, 1860, Porter field warrants (12 Stat., p. 836)	6,133,000
From June 30, 1880, to June 30, 1882, a total of	66,943,003
To June 30, 1880, the grand total of acres issued under all acts was	2,893,034.44
From June 30, 1880, to June 30, 1882, there were issued	66,943.03
In all, to June 30, 1882, under all acts, a grand total of	2,959,977.47

SCRIP, HOW ENTRIES ARE MADE WITH, FORMS USED, AND AUTHORITIES AS TO AND FOR CASH ENTRIES.

Scrip can be used as cash in paying for pre-emptions and commuted homesteads.

In pre-emptions or commuted homestead entries the forms on page 688 are used, with the addition of Forms A, B, and C in this chapter. When used in cash entries on lands subject to private entry (which are the only lands directly subject to scrip location or entry) Forms A, B, and C in this chapter alone are used. For details as to this character of location see the text of the following circular. See also Annual Reports of General Land Office, 1879, 1880, and Decisions of the Department of the Interior and General Land Office in cases relating to lands and land claims, from July, 1881, to June, 1883, pages 308–310, 635:

LOCATION AND ASSIGNMENT OF SCRIP ISSUED UNDER DECREES OF THE UNITED STATES SUPREME COURT, PURSUANT TO THE ACTS OF JUNE 22, 1860, MARCH 2, 1867, AND JUNE 10, 1872; AND ALSO SCRIP ISSUED UNDER THE ACT OF JUNE 2, 1858.

In effect December 1, 1883.

Department of the Interior,
General Land Office,
Washington, D. C., February 13, 1879.

Gentlemen: The act of Congress approved June 22, 1860, entitled "An act for the final adjustment of private land claims in the States of Florida, Louisiana, and Missouri, and for other purposes" (Statutes, vol. 12, page 85), provides, in its sixth section, "That whenever it shall appear that lands claimed, and the title to which may be confirmed under the provisions of this act, have been sold in whole or in part by the United States prior to such confirmation, or where the surveyor-general of the district shall ascertain that the same cannot be surveyed and located, the party in whose favor the title is confirmed shall have the right to enter, upon any of the public lands of the United States, a quantity of land equal in extent to that sold by the Government: *Provided*, That said entry be made only on lands subject to private entry at one dollar and twenty-five cents per acre, and as far as may be possible in legal divisions and subdivisions, according to the surveys made by the United States."

The provisions of said act were extended and supplemented by the acts of March 2, 1867, and June 10, 1872, and they have been further supplemented by the act of January 28, 1879, entitled "An act defining the manner in which certain land scrip may be assigned and located, or applied by actual settlers, and providing for the issue of patents in the name of the locator or his legal representatives," a copy of which is hereto attached.

In pursuance of the provisions of these acts, scrip has been issued by this office, the several certificates of which, representing various quantities of land, according to the circumstances of the respective cases, may be located in legal subdivisions on any public land in your district subject to sale at private entry at $1.25 per acre, any small excess in such subdivisions over the area called for in the scrip to be paid for in

money; or they may, under the second section of the act of January 28, 1879, be received from actual settlers in payment of pre-emption claims or in commutation of homestead claims, even where the same embrace lands subject to entry at the double minimum price of $2.50 per acre, in the same manner and to the same extent as is now authorized by law in the case of military bounty land warrants. But the law authorizes no fees to be collected by the district land officers on account of locations made with this scrip.

When such scrip is presented in payment of a *pre-emption claim* composed of lands subject to entry at $2.50 *per acre*, the pre-emptor, in addition to the scrip surrendered, will be required to pay in cash the difference between the value of said scrip at $1.25 per acre and that of the tract embraced in his claim; or to surrender *additional scrip;* thus 160 acres of double minimum land may be paid for by the surrender of one piece of scrip for 160 acres, and the payment of $200, or by the surrender of *two* pieces of scrip for 160 acres each or one piece for 320 acres. If the value of the scrip should exceed that of the lands entered therewith, the pre-emptor will receive no repayment thereof from the United States; but if the land, at its rated price, should exceed the scrip in value, such excess must be paid by the locator with cash. It will be required also, in the location of a tract subject to entry at a greater minimum than $1.25 per acre, that each piece of scrip shall be located upon a *specific subdivision thereof*, and that the excess in area of the land, if any, shall be paid for in cash. The same rules will govern in commutations of homestead claims.

You will in every case require the party desiring to locate to surrender the scrip and make application according to attached Form A; when, if no objection should appear, you will allow the location to be made, properly fill up the heading of the application by inserting the number of the certificate of location, the register and receiver's number, the date of the decree, and the claim for which the certificate of location was issued, for which blanks are left in the form.

You will then issue a certificate of entry in duplicate according to Form B, annexed, one of which you will deliver to the party to be held by him as his evidence of title until the patent shall be issued.

The locations allowed, you will enter the same on your records, and at the expiration of the month will send up an abstract of all locations allowed during the same (Form C, annexed). You will forward therewith the applications received and certificates of entry issued during the month, and also the scrip surrendered. Patents will be issued thereupon in regular course, as provided for in the third section of the act of January 28, 1879.

By the first section of that act, it is declared that this scrip is "assignable by deed or instrument of writing according to the form and pursuant to regulations prescribed by the Commissioner of the General Land Office, so as to vest the assignee with all the rights of the original owners of the scrip." With regard to such form and regulations, the following is prescribed:

Entries with this scrip must be made by the confirmee or confirmees named in the scrip, or his or their duly authorized attorney, in the name of such confirmee or confirmees, or by the assignee or assignees of such confirmee or confirmees, or his or their duly authorized attorney, in the name of such assignee or assignees.

Each assignment must be attested by one or more subscribing witnesses; the mark of a witness will not be respected. Parties in interest as assignees are not recognized as legal attesting witnesses to an assignment, neither can an officer take an acknowledgment of an assignment to himself.

The execution of assignments is required to be acknowledged by the assignor, in the presence of a register or receiver of a land office, a judge or clerk of a court of record when authorized to take acknowledgments, a notary public, justice of the peace, a commissioner of deeds resident in the State from which he derives his appointment, or a commissioner of a circuit court of the United States, who shall certify to the facts of the acknowledgment and to the identity of the assignor, and the official seal of said court, notary public, or commissioner, shall be affixed to the certificate. When the acknowledgment is taken before a justice of the peace or other officer without an official seal (except a register or receiver of a land office), it must be accompanied by an additional certificate, under seal of the proper authority, establishing the official character of the person before whom the acknowledgment was made, and the genuineness of his signature.

Powers of attorney must be acknowledged in like manner.

Assignments executed by unmarried females must be accompanied by evidence that they have attained the age of twenty-one years, and when married women assign, their husbands must unite with them in making the transfer.

When assignments are executed by a commissioner or other designated person, alleged to be acting under a decree of court, there must be procured and filed in this office a duly certified copy of such decree, in which all the proceedings had in the case should be recited, and from which it must appear that due notice of the pending suit had been given, by publication or otherwise, to all the parties interested.

When the assignment of this scrip is executed in a foreign country, and the acknowledgment thereof taken by an officer authorized by the laws thereof to perform such duties, the attestation of the American consul in such country should be obtained as to the official character and genuineness of the signature of the person before whom the acknowledgment of the said assignment was made, or if the official character, &c., of such foreign magistrate is attested by a consular agent of such foreign government residing in this country, his official character must be certified by the diplomatic representative of such government in the United States.

When such assignments are executed in a foreign language, duly authenticated translations thereof must be furnished. Secretaries of legation and consular officers of the United States are authorized to take acknowledgments, but they must certify the same under their official seals.

When the persons named as confirmees are described in the scrip as being minors, their assignments thereof must be accompanied by satisfactory evidence that they had attained their majority at the date of the transfer.

When an assignment has been executed and witnessed, but not acknowledged, it may be proved in open court, but a certified transcript of the proceedings in the case must be filed in this office. When, however, such assignment has not been properly attested, it must be made anew.

For general forms of assignment and of powers of attorney and acknowledgment, see Forms D, E, F, G, H, I, K, L, M, N, O, P. In cases where the assignments, powers, or acknowledgments are written or printed and signed on the back of the certificate, the words "the within certificate" may be used instead of the full description of such certificate provided for in these forms.

It will not be practicable in all cases to attach the assignment or power of attorney to each certificate of location, and it will not be required by this office.

When a single assignment or power of attorney covers a number of certificates, such assignment or power may be filed in this office, and will be referred to to perfect the assignment of any of the certificates named therein, whenever they or either of them shall have been located and returned to this office for patenting. Such assignment or power thus filed will also be referred to by this office for the purpose of attaching to any certificate of location named therein a certificate (Form Q) relative to the validity of the certificate of location and the assignments thereof.

Upon the application of any assignee of this scrip, accompanied by the scrip and papers in his possession relative to the assignment thereof, this office will examine said scrip and assignments, and such assignments thereof as are found on the files of this office; and if the scrip be found free from objections, and the assignments sufficient in form, a certificate of approval of such scrip and the assignments thereof (Form Q) will be attached by this office to the scrip thus submitted.

Each piece of scrip thus transmitted to this office must be accompanied by the sum of one dollar, the legal fee for a certificate of verification.

The fourth section of the act of January 28, 1879, declares that its provisions respecting the assignment and patenting of scrip and its application to pre-emption and homestead claims shall apply to the indemnity certificates of location provided for in the act of the second of June, 1858, entitled "An act to provide for the location of certain confirmed private land claims in the State of Missouri," and for other purposes. The general principles hereinbefore laid down in regard to scrip issued under the act of June 22, 1860, are applicable to the class of certificates issued under the act of June 2, 1858, and you will be governed thereby in dealing with any of the latter presented for location. The same forms may be used with such verbal alterations in them as may be necessary to adopt them to the case in hand. You will take care, however, in making returns for these two classes of locations, to keep them separate and distinct.

Very respectfully,

J. A. WILLIAMSON,
Commissioner.

REGISTER and RECEIVER,
——,
——.

[PUBLIC—No. 20.]

AN ACT defining the manner in which certain land-scrip may be assigned and located, or applied by actual settlers, and providing for the issue of patents in the name of the locator or his legal representatives.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That whenever, in cases prosecuted under the acts of Congress of June twenty-second, eighteen hundred and sixty, March second, eighteen hundred and sixty-seven, and the first section of the act of June tenth, eighteen hundred and seventy-two, providing for the adjustment of private land-claims in the States of

Florida, Louisiana, and Missouri, the validity of the claim has been, or shall be hereafter, recognized by the Supreme Court of the United States, and the court has decreed that the plaintiff or plaintiffs is or are entitled to enter a certain number of acres upon the public lands of the United States, subject to private entry at one dollar and twenty-five cents per acre, or to receive certificate of location for as much of the land the title to which has been established as has been disposed of by the United States, certificate of location shall be issued by the Commissioner of the General Land Office, attested by the seal of said office, to be located as provided for in the sixth section of the aforesaid act of Congress of June twenty-second, eighteen hundred and sixty, or applied according to the provisions of the second section of this act; and said certificate of location or scrip shall be subdivided according to the request of the confirmee or confirmees, and, as nearly as practicable, in conformity with the legal divisions and subdivisions of the public lands of the United States, and shall be, and are hereby declared to be, assignable by deed or instrument of writing, according to the form and pursuant to regulations prescribed by the Commissioner of the General Land Office, so as to vest the assignee with all the rights of the original owners of the scrip, including the right to locate the scrip in his own name.

SEC. 2. That such scrip shall be received from actual settlers only in payment of pre-emption claims or in commutation of homestead claims, in the same manner and to the same extent as is now authorized by law in the case of military bounty-land warrants.

SEC. 3. That the register of the proper land-office, upon any such certificate being located, shall issue, in the name of the party making the location, a certificate of entry, upon which, if it shall appear to the satisfaction of the Commissioner of the General Land Office that such certificate has been fairly obtained, according to the true intent and meaning of this act, a patent shall issue, as in other cases, in the name of the locator or his legal representative.

SEC. 4. That the provisions of this act respecting the assignment and patenting of scrip and its application to pre-emption and homestead claims shall apply to the indemnity-certificates of location provided for by the act of the second of June, eighteen hundred and fifty-eight, entitled "An act to provide for the location of certain confirmed private land-claims in the State of Missouri, and for other purposes."

Approved, January 28, 1879.

"FORM Q."

Form "Q" herein is the approving certificate of the Commissioner of the General Land Office, and completes the entry for patent. Page 958.

(FORM D.)

For the assignment of scrip by confirmee or assignee.

For value received, I, ——— ———, to whom certificate of location No. ——, issued by the General Land Office of the United States on the —— day of ———, A. D. 18—, pursuant to the act of Congress approved June 22, 1860, and supplemental legislation, and by virtue of a decree of confirmation by the Supreme Court of the United States rendered ———, in favor of ——— ———, was issued (or was assigned by ——— ———, as the case may be), do hereby sell and assign to A B, of ——— County, State of ———, and to his heirs and assigns forever, all my right, title, and interest in and to the said certificate of location, and authorize the said A B, his heirs and assigns, to locate the same, and receive from the United States such evidence of title for such location as is now or may hereafter be authorized by law.

A B. [SEAL.]

Attest:
C D.
E F.

(FORM E.)

Of acknowledgment where the vendor is known to the officer taking the same.

STATE OF ———,
——— *County, ss:*

On this —— day of ———, 187–, before me personally came A B, to me well known, and acknowledged the foregoing assignment to be his act and deed; and I certify that the said A B is the identical person to whom the above-described certificate of location issued (or was assigned by ———), and who executed the foregoing assignment thereof.

(*Officer's signature.*)

(FORM F.)

Of acknowledgment where the vendor is not known to the officer and his identity has to be proven.

STATE OF ———,
——— *County, ss:*

On this —— day of ———, 187–, before me personally came A B and E F, of the county of ———, in the State of ———, and the said E F, being well known to me as a credible and disinterested person, was duly sworn by me, and on his oath declared and said that he well knows the said A B, and that he is the same person to whom the above-described certificate of location issued (or was assigned by ——— ———), and who executed the foregoing assignment, and his testimony being satisfactory evidence to me of that fact, the said A B thereupon acknowledged the said assignment to be his act and deed.

(*Officer's signature.*)

(FORM G.)

For the assignment of a certificate by an administrator.

For value received, I, A B, administrator of the estate of ——— ———, deceased, who died intestate, to whom certificate of location No. —— issued by the General Land Office of the United States on the —— day of———, A D. 18—, pursuant to the act of Congress approved June 22, 1860, and supplemental legislation, and by virtue of a decree of confirmation by the Supreme Court of the United States rendered in favor of ——— ———, was issued (or assigned, as the case may be), do hereby sell and assign for the use of ——— ——— unto ——— ———, of ——— County, State of ———, and to his heirs and assigns forever, the said certificate and authorize the said ——— ———, his heirs and assigns, to locate the same and receive from the United States such evidence of title for such location as is now or may hereafter be authorized by law.

A B, [SEAL.]
Administrator.

Attest:
E F.
G H.

NOTE.—A certified copy of the letters of administration must accompany this assignment or be filed in this office as a separate document, or a certificate filed from the clerk of the proper court that said letters had been duly issued and were in force at the date of the assignment.

If the date of death is not stated in the letters of administration, or other evidence as above mentioned, the same must appear in the clerk's certificate appended thereto.

(FORM H.)

For the acknowledgment.

STATE OF ———,
——— *County, ss:*

On this —— day of ———, 187–, before me personally came ——— ———, to me well known, and acknowledged the foregoing assignment to be ——— act and deed, and in my presence subscribed ——— name thereto; and I certify that the said ——— ——— is administrator of the estate of ——— ———, deceased, to whom the above-described certificate, No. ——, was issued (or was assigned by ——— ———), and who executed the foregoing assignment thereof.

Witness my hand and official seal the day and year above written.

(*Officer's signature.*)

(FORM I.)

For assignment of certificate by executor.

For value received, I, A B, executor of C D, who died testate, and to whom—(same as Form G).

NOTE.—A certified copy of the will, and also of the letters testamentary or other proper evidence, under the seal of said court, showing that said executor was duly

appointed and authorized to act as such at the date of said assignment, must accompany this assignment, or be filed in the General Land Office as a separate document.

If the date of death is not stated in the letters testamentary or other evidence, as above mentioned, it must appear in the certificate of the clerk appended thereto, as taken from the records of said court. The certificate of the acknowledgment may be the same as in Form H, except that the word "executor" must be used instead of "administrator."

(FORM K.)

For the assignment and acknowledgment of scrip by heirs at law of deceased confirmee or assignee.

For value received, we, A B and C D, the only heirs at law of G H, to whom—(same as Form D).

(FORM L.)

For the acknowledgment.

STATE OF ———,
——— *County, ss:*

On this —— day of ———, 187–, before me personally came A B and C D, to me well known, and acknowledged the foregoing assignment to be their act and deed; and I certify that the said A B and C D are the identical persons named in the attached certificate as the only heirs at law of said deceased, and who executed the foregoing assignment thereof.

Witness my hand and official seal the day and year above written.

(*Officer's signature.*)

NOTE.—For the evidence of the death and heirship above mentioned it will be necessary to procure and attach, or file in the General Land Office as a separate document, a certificate, under seal, from a court having probate jurisdiction, showing that it has been proven to the satisfaction of said court, in open court, that said confirmee (or assignee), G H, is dead, the date of his death, whether he died testate or intestate, whether or not he left a widow, and who are his heirs and only heirs at law, with their respective ages. If any of such heirs are *feme coverts* their husbands must join in the assignment.

This rule will apply to all assignments made by married women.

(FORM M.)

For the assignment of a certificate by a guardian.

For value received, I, A B, guardian of the person and estate of C D, a minor, confirmee (or a minor heir at law of ——— ———, as the case may be), to whom certificate of location No. —— issued by the General Land Office of the United States on the —— day of ———, A. D. 18—, pursuant to the act of Congress approved June 22, 1860, and supplemental legislation, and by virtue of a decree of confirmation by the Supreme Court of the United States in favor of ——— ———, was issued, do hereby sell and assign, for the benefit of said minor, unto E F, of the county of ———, and State of ———, and to his heirs and assigns, the said certificate, and authorize the said E F, his heirs and assigns, to locate the same, and receive from the United States such evidence of title for such location as may be authorized by law.

——— ———, [SEAL.]
Guardian.

Attest:
G H.
I J.

(FORM N.)

Form of acknowledgment for guardian.

STATE OF ———,
——— *County, ss:*

On this —— day of ———, 187–, before me personally came ——— ———, to me well known, and acknowledged the foregoing assignment to be his act and deed, and

in my presence subscribed his name thereto; and I certify that the said ——— ——— is guardian of the person and estate of said minor, and who executed the foregoing assignment thereof.

Witness my hand and seal the day and year above written.

(*Officer's signature.*)

NOTE.—A certified copy of the letters of guardianship, or other legal evidence, under the seal of the proper probate court, showing that the guardian was duly appointed and authorized to act as such at the date of said assignment, must accompany the certificate thus assigned; or where this evidence applies to a number of certificates it may be filed in the General Land Office separately, in which case such evidence will be used to perfect the assignment of the various certificates as they are from time to time located and returned to this office.

(FORM O.)

Power of attorney to sell or locate scrip.

Know all men by these presents that I, ——— ———, of the county of ———, State of ———, do hereby constitute and appoint ——— ———, of the county of ———, State of ———, my true and lawful attorney, for me and in my name to assign, sell, and convey (or locate) certificate of location No. ——, issued to ——— ——— by the General Land Office of the United States on the —— day of ———, A. D. 18—, pursuant to the provisions of the act of Congress approved June 22, 1860, and supplemental legislation, and by virtue of a decree of confirmation rendered by the Supreme Court of the United States ———, 18—, in favor of the said ——— ———.

Witness my hand and seal this —— day of ———, A. D. 18—.

——— ———. [SEAL.]

Signed in the presence of—
C D.
E F.

The form of acknowledgment for a power of attorney must not be the same as for a sale of this scrip.

NOTE.—It must appear by satisfactory evidence that title to the certificate named was vested in the party executing the power of attorney on the day when such power was executed. Conditions should be inserted in the above power, 1st, revoking all powers of attorney previously given for the sale of the certificate named; 2d, renouncing all right to appoint any other person attorney for the sale of said certificate.

This renunciation must be for a valuable consideration, which, in all cases, should be expressed in the power.

(FORM P.)

Of the certificate of the clerk of the court, judge, or other person who is authorized to certify, under seal, to the official character of the officer who takes acknowledgments of assignments.

STATE OF ———, }
——— COUNTY, } *ss*:

I, A B, clerk of the court ———, in the county and State aforesaid, hereby certify that John Jones, whose genuine signature is affixed to the above acknowledgment, was, at the time of signing the same, a justice of the peace (notary public, or other officer), duly authorized by law to take such acknowledgment, and that full faith and credit are due to all his official acts as such.

Given under my hand and the seal of said court this —— day of ———, 18—.

A B, *Clerk.* [SEAL.]

NOTE.—Where any acknowledgment is taken before a clerk of a court, judge, notary public, or other officer duly authorized by law, with their respective official seals affixed, the above certificate will not be required; nor is such certificate required when the acknowledgment is taken before a register or receiver of a United States land office.

(FORM Q.)

Certificate approving certificate of location and assignment thereof.

ACTS OF JUNE 22, 1860, MARCH 2, 1867, JUNE 10, 1872, AND JANUARY 28, 1879.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington City, D. C., ———, 18—.

The certificate of location No. ——, for ——— acres, hereto attached, is found free from objection on the records of this office, and, as the assignments of said certificate from ——— ——— to ——— ——— and from ——— ——— to ——— ——— are found in form, the same are hereby approved accordingly.

——— ———,
Commissioner.

To ——— ———.
Fees: ———, paid.

RULES AND REGULATIONS FOR ISSUING REVOLUTIONARY BOUNTY-LAND SCRIP.

[See Chapter XIV, pages 232 to 237, and 711 to 721.]

[Under the act entitled "*An act making further provisions for the satisfaction of Virginia land warrants,*" approved August 31, 1852 (U. S. Stat. at L., vol. 10, page 143), in connection with the supplemental act, approved June 22, 1860, "*to declare the meaning*" of the said law of August 31, 1852 (U. S. Stat. at L., vol. 12, page 84)].

IN EFFECT JUNE 30, 1883.

Located in the same manner as bounty land warrants, page 721, and used as cash in cash, pre-emption and commuted homestead entries. Issued in lieu of bounty land warrants, and located under regulations adopted by law and the General Land Office.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE, *July* 20, 1875.

1. The acts of Congress above mentioned, copies of which are hereto annexed, authorize the Secretary of the Interior to issue land-scrip in favor of the present proprietors of all unsatisfied outstanding military land warrants, or parts of warrants, fairly and justly issued or allowed prior to the 1st day of March, 1852, by the proper authorities of the Commonwealth of Virginia, and consequently embrace the 10 per centum deducted from the warrants filed under the act of March 3, 1835; the warrants or parts of warrants located in Ohio, which conflict with previous valid locations; and also those located in Kentucky, on which the State refused to issue patents, and which locations therein have been lost by interference with prior valid claims.

It is provided by the said act of June 22, 1860, that if any claim has been legally "*allowed*" by Virginia, prior to March 1, 1852, the warrants founded thereon, though issued *after* said date, may be satisfied by the grant of scrip in lieu thereof, if the case is found to conform with "the principles already recognized by the Department of the Interior in the execution of the provisions of the said act" of August 31, 1852.

2. The Secretary of the Interior having charged this office with the execution of the laws in question, it is required that all warrants or parts of warrants embraced thereby, with the evidence in virtue of which the same were allowed and issued, shall be filed therein.

The evidence of service in each case, upon which the allowance of the claim was made, is to be found in the office of the secretary of state, at Richmond, Va., and the proof upon which any designated warrant was issued is filed with the register of the State land office at the same place. Certified copies from both these offices, of the evidence filed therein, must accompany the warrant when presented for satisfaction.

If a "revision of the proofs" should fail to satisfactorily establish the fact that any warrant surrendered was fairly and justly issued, in pursuance of the laws of Virginia, then "additional testimony," as provided by said act of August 31, 1852, will be received.

All assignments of warrants made since the passage of this law (August 31, 1852) must be in the presence of two witnesses, acknowledged before a justice of the peace, who must certify to the identity of the assignor, and whose official character must be certified to, under seal, by the clerk of the court.

The cases will be taken up and examined in the order in which they have been or may be filed in this office, and where the evidence is satisfactory, scrip will be issued; where it is deficient, in whole or in part, the parties will be advised, and the case suspended till the deficiency is supplied; or, if it is ascertained that the warrant was not fairly and justly issued, the claim will be rejected.

3. All warrants issued for services in the State or Continental line, or State navy, prior to June 1, 1792, when the State of Kentucky was admitted into the Union, should be accompanied by a certificate, under seal from the register of the Kentucky land office, stating that such warrants have not been patented in that State.

Continental line warrants issued since that period, and prior to January 1, 1852, should be accompanied by a certificate from the surveyor of the Virginia military district in Ohio, stating that no location or survey has been made of such warrants; or if a location and survey, or either, has been made, when, the amount, in whose favor, &c.

4. In all places where a warrant has been lost, mislaid, or destroyed, the present proprietor must file a duplicate copy thereof, with a certificate from the register that the original has not been surrendered in exchange for any other warrant or warrants. After the warrant has been filed, with proofs showing the loss of the original, the present proprietor must give six weeks' public notice in a newspaper published near the domicile of the party in interest, and another in the city of Washington, describing the warrants, service rendered, amount, date, and number, stating the loss of the original, and the intention of applying to this office for scrip for the same.

A bond of indemnity to the United States must be filed, duly executed and acknowledged by the party in interest, and properly certified, with sufficient sureties, to be approved by some court of competent jurisdiction, or other proper officer, in the penalty of double the value of the lost or destroyed warrant, estimating the same at $1.25 per acre, and conditioned to indemnify and save harmless the United States from any and all costs, charges, and expenses in case that, at any time after the issue of scrip, any claim to the original warrant should be legally substantiated of a character adverse to the title of the present claimant.

Upon a compliance with these requirements, the duplicate warrant will remain *three months* on file in this office after the expiration of such notice, and if the title is not contested at that time, the same will be commuted into scrip for the amount found due thereon.

5. Where warrants, having been partly satisfied by patent from the State of Kentucky, remain on file in the office of the register of the land office of that State, and therefore cannot be produced, certified copies of them from the register of the land office at Richmond must be filed, and be accompanied by a certificate from the register at Frankfort, Ky., describing the warrant, survey, &c.

6. The scrip will be issued in pieces or certificates of eighty acres, or one hundred dollars each, except for fractions, to which claimants may be entitled after deducting the eighty-acre certificates. "When there are more persons than one interested in the same warrant," scrip will issue to each person "for his or her proportion of the warrant," if desired.

7. When scrip is claimed, located, or sold by the "guardian of an infant," or "the husband of a feme covert," the evidence of their being such guardian or husband, fully authenticated, must be produced.

8. This scrip is "assignable by indorsement, attested by two witnesses," in the following manner, upon the back of the certificate:

For value received (I, or we, as the case may be), the present proprietor— of the within certificate of scrip, do hereby sell and assign the same to ——— ———, of ———————, and his heirs and assigns forever.

Witness my hand and seal this the ——— day of ———, 18—.

E. F. [SEAL.]

Attest:
A B.
C D.

9. This scrip is "receivable in payment of any lands owned by the United States subject to sale at private entry," and can be applied at the rate of $1.25 per acre, in the same manner as money, in all cases where the tract applied for contains the area specified in the scrip, or more; where it contains less, the excess of the scrip cannot be refunded in money, but may be denoted in the relinquishment as applicable to any other tract. It can also be used in commutation of homestead entries, and can be applied in payment of offered or unoffered lands which may be embraced by pre-emption entries.

10 When located, this scrip must be relinquished by the legal owner thereof after the following form, viz:

I (or we) do hereby relinquish to the United States the within certificate, in payment (or in part payment, as the case may be) of the ——— half of the ——— quarter of section No. ——. in township No. —— of range No. ——, located in the name of ———, at the land office ———, this —— day of ———, 18—.

Signed A B. [SEAL.]

Witnesses:
C D.
E F.

11. No acknowledgment of the transfer of said scrip is required, the same being declared by law "assignable by indorsement, attested by two witnesses." The relinquishment may be executed in the same manner.

No fees are required to be paid upon the location thereof, the same being regarded as money; and the local land officers receive from the United States Treasury their commissions upon the surrender thereof, as in the case of entries made with actual cash.

12. Any person prosecuting this class of claims, either as attorney or on his own account, will be required, in accordance with the provisions of sections 3478 and 3479, United States Revised Statutes, to subscribe to and file the oath of allegiance, and to support the Constitution of the United States, as follows, viz:

"I do solemnly swear (or affirm, as the case may be) that I will support, protect, and defend the Constitution and Government of the United States against all enemies, whether domestic or foreign, and that I will bear true faith and allegiance and loyalty to the same, any ordinance, resolution, or law of any State convention or legislature to the contrary notwithstanding; and further, that I do this with a full determination, pledge, and purpose, without any mental reservation or evasion whatsoever; and further, that I will well and faithfully perform all the duties which may be required of me by law: So HELP ME GOD."

The oath herein referred to may be taken before any officer of the United States, or of the several States, authorized by law to administer oaths for general purposes. If taken before an officer not having an official seal, it must also be accompanied by a certificate, under seal from the proper officer, as to the official character and signature of the officer before whom the same was taken.

"VIRGINIA MILITARY DISTRICT—KENTUCKY."

The following rules have been adopted by this office for the guidance of those who make application for the satisfaction of entries and surveys founded on Virginia military warrants located in Kentucky prior to June 1, 1792, and which have been lost, either in whole or in part, by interference with previous valid locations, founded either upon Virginia military warrants or State treasury warrants, conformably with the provisions of the act of Congress approved "August 31, 1852," providing for the further satisfaction of Virginia military warrants.

1st. It will be necessary to file either the original warrants or duplicates of the same, together with a certificate from the register of the land office at Frankfort, Ky., bearing his official seal, setting forth specifically the cause of interference, and the amount thus lost, giving the number of the survey, amount for which it calls, in whose name made, and the date of the same, together with the same data in relation to the survey with which it conflicts; and also, whether there is any evidence filed in his office showing that the locators of the surveys or the patentees for which application is made for the amount of interference have conveyed the same or any portion of it.

2d. Copies of the surveys thus lost, and those with which they interfere, with the metes and bounds accurately set forth, must be forwarded, authenticated by a certificate from the register under his hand and seal.

3d. When patents have issued before such interferences were discovered, it will be necessary to file certified copies of the originals, together with certificates from the proper officers of the county where the land is situated, setting forth that there is no evidence on file showing that the patentees, their heirs-at-law or devisees, have conveyed the same.

4th. The patentees, their heirs-at-law or devisees, must file a deed of relinquishment of the land patented to them or their ancestors, to the United States and to the State of Virginia, which deed must be recorded in the county court where the land is located.

5th. In all cases where there is doubt as to the correctness of the amount of such interferences, and copies of the original surveys cannot be procured, it will be necessary to have a resurvey made, and the amount of such interferences decreed by judgment of the proper court of the county where the land is located.

When applicants have complied with the foregoing rules and filed the required evidence as to service and proprietorship, the claims will be taken up for examination in their regular order, and disposed of at the earliest moment practicable.

"VIRGINIA MILITARY DISTRICT—OHIO."

1. Where application is made for the issue of bounty-land scrip founded upon Virginia military warrants entered in said district, and which locations are claimed to be in conflict with former valid entries and surveys, the claim therefor must be accompanied, in addition to the evidence of service, heirship, and present proprietorship, with the official certificate of the surveyor of the Virginia military district, whose office is at Chillicothe, Ohio, setting forth the number and amount in acres of the

warrant, when and for whose service issued, when entered or surveyed, and with what entry and survey it is found to interfere, and the date when the latter were made.

This certificate must show the precise amount of the warrant lost by the interference in question, and should give the name of the county in Ohio in which the land located is situate.

2. A certificate from the auditor of the county in which the said locations have been made must be produced, showing that the lands claimed to have been lost by interference have not been sold for taxes.

3. The certificate of the recorder of deeds for said county must also be obtained to the effect that the lands included in the entry and survey in question have not been sold or conveyed, or charged with any incumbrance by or through the party making the said location, or his grantees.

4. If a patent has been issued for lands in said district, and the whole or any part thereof been declared by the judgment of a court of competent jurisdiction to be invalid by reason of conflict with a previous valid title, upon filing in this office a certified copy of the record of such decision, and the return of the patent with a relinquishment indorsed thereon, duly recorded, from the patentee to the United States, and accompanied by the certificate of the auditor and recorder as above mentioned, the Virginia military land warrant embraced in said patent will be commuted into scrip in the name of the present proprietor thereof for the amount so established to have been previously satisfied.

Applications under these rules must also be accompanied by the evidence of service, &c., as hereinbefore prescribed.

Rules and Regulations for Issuing Certified Copies in Lieu of Lost or Destroyed Revolutionary Bounty-Land Scrip.

1. The claimant must make and file an affidavit, duly certified, setting forth all the particulars as to the loss or destruction of the original scrip.

This affidavit, if found satisfactory, will be regarded as a *temporary caveat*, and will *suspend* for the time being, and until the other requirements of this office can be answered, the issue of any patent found upon the location of any such original scrip.

2. Publication must be made immediately upon the filing of said affidavit for six successive weeks—once in each week—in a newspaper of general circulation, published at or nearest the domicile of the party in interest, and also in a newspaper of the city of Washington, D. C., stating the loss or destruction of the original scrip, fully describing it, and giving notice that at a specified time application will be made to this office for the issue of a certified copy thereof.

3. Proof of the publication of such notice for the required time, made by the proprietor of such papers, or other competent party, must be filed in this office with copies of said notice.

4. A bond of indemity to the United States must be filed, duly executed, and acknowledged by the party in interest, and properly certified, with sufficient sureties, to be approved by some court of competent jurisdiction, or other proper officer, in the penalty of double the value of the lost or destroyed scrip, estimating the same at $1.25 per acre, and conditioned to indemnify and save harmless the United States from any and all costs, charges, and expenses in case that, at any time after the issue of such certified copy, any claim to the original scrip should be legally substantiated of a character adverse to the title of the present claimant.

FORM OF NOTICE.

Whereas on the —— day of ———, 18—, United States revolutionary land-bounty scrip No. ——, for ——— acres, was issued by the Department of the Interior, under the act of Congress of August 31, 1852 (*or, if under any former act, mentioning it*), in part satisfaction of Virginia (*or United States*) military land warrant No. ——, granted for the services of (*name of officer, soldier, or seaman*), who was a (*description of service*) in the Virginia Continental (*or State*) line (*or State navy*), (*or in the United States Continental line*); and whereas said scrip has been lost or destroyed, notice is hereby given that on the —— day of ———, 18—, application will be made to the Commissioner of the General Land Office, at the city of Washington, D. C., in pursuance of the rules and regulations of his office, for the issue of a certified copy in lieu of said lost or destroyed scrip, the undersigned being the present lawful owner (*by assignment or otherwise*) thereof.

Circulars of December 20, 1852, June 30, 1854, and March 1, 1862.

S. S. BURDETT,
Commissioner.

AN ACT making further provisions for the satisfaction of Virginia land warrants.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all unsatisfied outstanding military land warrants, or parts of warrants, issued or allowed prior to the first day of March, eighteen hundred and fifty-two, by the proper authorities of the Commonwealth of Virginia, for military services performed by the officers and soldiers, seamen or marines, of the Virginia State and Continental lines, in the army or navy of the Revolution, may be surrendered to the Secretary of the Interior, who, upon being satisfied, by a revision of the proofs, or by additional testimony, that any warrant thus surrendered was fairly and justly issued, in pursuance of the laws of said Commonwealth, for military services so rendered, shall issue land scrip in favor of the present proprietors of any warrant thus surrendered, for the whole or any portion thereof yet unsatisfied, at the rate of one dollar and twenty-five cents for each acre mentioned in the warrant thus surrendered, and which remains unsatisfied; which scrip shall be receivable in payment for any lands owned by the United States subject to sale at private entry; and said scrip shall moreover be assignable by indorsement, attested by two witnesses. In issuing such scrip the Secretary is authorized, when there are more persons than one interested in the same warrant, to issue to each person scrip for his or her portion of the warrant; and where infants or feme coverts may be entitled to any scrip, the guardian of the infant, and the husband of the feme covert, may receive and sell or locate the same: *Provided*, That no less than a legal subdivision shall be entered and paid for by the scrip issued in virtue of this act.

SEC. 2. *And be it further enacted*, That this act shall be taken as a full and final adjustment of all bounty-land claims to the officers and soldiers, seamen and marines, of the State of Virginia, for services in the war of the Revolution: *Provided*, That the State of Virginia shall, by a proper act of the legislature thereof, relinquish all claim to the lands in the Virginia military land district in the State of Ohio.

SEC. 3. *And be it further enacted*, That in settling the claims of the State of Ohio, under the acts of March second, eighteen hundred and twenty-seven, and May twenty-fourth, eighteen hundred and twenty-eight, granting lands to said State for canal purposes, the same principles shall be acted upon as have been applied under the provisions of the act of May the ninth, eighteen hundred and forty-eight, entitled "An act in addition to an act therein mentioned," for the settlement of the claims of the State of Indiana accruing under the said act of March the second, eighteen hundred and twenty-seven.

Approved August 31, 1852.

AN ACT to declare the meaning of the act entitled "An act making further provision for the satisfaction of Virginia land warrants," passed August thirty-one, eighteen hundred and fifty-two.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior, in executing the provisions of the act passed August thirty-one, eighteen hundred and fifty-two, entitled "An act making further provisions for the satisfaction of Virginia land warrants," be required so to construe the same as to authorize the satisfaction in scrip of all warrants or parts of warrants issued on allowances made by the executive of Virginia prior to the first day of March, 1852, coming within the principles already recognized by the Department of the Interior in the execution of the provisions of the said act, and whether issued before or since the first day of March, eighteen hundred and fifty-two: *Provided, however*, That no warrant or part of a warrant shall be satisfied in scrip, founded or issued on any allowance made by the executive of Virginia since the first day of March, eighteen hundred and fifty-two.

Approved June 22, 1860.

GRADUATION ACT OF 1854.

TO JUNE 30, 1882.

[See Chapter XXII, page 291 and 1277.]

No change in the chapter as printed on page 291.

COAL LANDS.

TO JUNE 30, 1882.

[See Chapter XXIII, page 292 to 294 and 1277.]

The total number of entries under this act from March 3, 1866, to June 30, 1882, was 180, containing 24,560 acres, realizing $336,528.65.

REGULATIONS UNDER THE COAL LAND LAW AND FORMS FOR ENTRY.

IN EFFECT DECEMBER 1, 1883.

[See also "Decisions of Department of Interior to June 1883," page 552.]

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., July 31, 1882.

GENTLEMEN: The following sections of the Revised Statutes provide for the sale of coal lands of the United States:

TITLE XXXII, CHAPTER SIX.

MINERAL LANDS AND MINING RESOURCES.

SEC. 2347. Every person above the age of twenty-one years, who is a citizen of the United States, or who has declared his intention to become such, or any association of persons severally qualified as above, shall, upon application to the register of the proper land office, have the right to enter, by legal subdivisions, any quantity of vacant coal lands of the United States not otherwise appropriated or reserved by competent authority, not exceeding one hundred and sixty acres to such individual person, or three hundred and twenty acres to such association, upon payment to the receiver of not less than ten dollars per acre for such lands, where the same shall be situated more than fifteen miles from any completed railroad, and not less than twenty dollars per acre for such lands as shall be within fifteen miles of such road.

Entry of coal lands. 3 March, 1873, c. 279, s. 1, v. 17, p. 607.

SEC. 2348. Any person or association of persons severally qualified, as above provided, who have opened and improved, or shall hereafter open and improve, any coal mine or mines upon the public lands, and shall be in actual possession of the same, shall be entitled to a preference-right of entry, under the preceding section, of the mines so opened and improved: *Provided*, That when any association of not less than four persons, severally qualified as above provided, shall have expended not less than five thousand dollars in working and improving any such mine or mines, such association may enter not exceeding six hundred and forty acres, including such mining improvements.

Pre-emption of coal lands. *Ibid.*, s. 2.

SEC. 2349. All claims under the preceding section must be presented to the register of the proper land-district within sixty days after the date of actual possession and the commencement of improvements on the land, by the filing of a declaratory statement therefor; but when the township plat is not on file at the date of such improvement, filing must be made within sixty days from the receipt of such plat at the district office; and where the improvements shall have been made prior to the expiration of three months from the third day of March, eighteen hundred and seventy-three, sixty days from the expiration of such three months shall be allowed for the filing of a declaratory statement, and no sale under the provisions of this section shall be allowed until the expiration of six months from the third day of March, eighteen hundred and seventy-three.

Pre-emption claims of coal land to be presented within sixty days, &c., *Ibid.*, s. 3.

SEC. 2350. The three preceding sections shall be held to authorize only one entry by the same person or association of persons; and no association of persons, any member of which shall have taken the benefit of such sections, either as an individual or as a member of any other association, shall enter or hold any other lands under the provisions thereof; and no member of any association which shall have taken the benefit of such sections shall enter or hold any other lands under their provisions; and all persons claiming under section twenty-three hundred and forty-eight shall be required to prove their respective rights, and pay for the lands filed upon within one year from the time prescribed for filing their respective claims; and upon failure to file the proper notice, or to pay for the land within the required period, the same shall be subject to entry by any other qualified applicant.

Only one entry allowed. *Ibid.*, s. 4.

SEC. 2351. In case of conflicting claims upon coal lands where the improvements shall be commenced after the third day of March, eighteen hundred and seventy-three, priority of possession and improvement, followed by proper filing and continued good faith, shall determine the preference-right to purchase. And also where improvements have already been made prior to the third day of March, eighteen hundred and seventy-three, division of the land claimed may be made by legal subdivisions, to include, as near as may be, the valuable improvements of the respective parties. The Commissioner of the General Land Office is authorized to issue all needful rules and regulations for carrying into effect the provisions of this and the four preceding sections.

Conflicting claim. *Ibid.*, s. 5.

SEC. 2352. Nothing in the five preceding sections shall be construed to destroy or impair any rights which may have attached prior to the third day of March, eighteen hundred and seventy-three, or to authorize the sale of lands valuable for mines of gold, silver, or copper.

Rights reserved. *Ibid.*, s. 6.

RULES AND REGULATIONS.

Under the authority conferred by said section 2351 the following rules and regulations are issued for carrying into effect the provisions of said law:

1. Sale of coal lands is provided for—

By ordinary *private entry* under section 2347.

By granting a *preference-right* of purchase, based on priority of possession and improvement, under 2348.

2. The land entered under either section must be *by legal subdivisions*, as made by the regular United States survey. Entry is confined to surveyed lands; to such as are vacant, not otherwise appropriated, reserved by competent authority, or containing valuable minerals other than coal.

3. Individuals and associations may purchase. If an individual, he must be twenty-one years of age, and a citizen of the United States, or have declared his intention to become such citizen.

4. If an association of persons, each person must be qualified as above.

5. A person is not disqualified by the ownership of any quantity of other land, nor by having removed from his own land in the same State or Territory.

6. Any individual may enter by legal subdivisions as aforesaid any area not exceeding one hundred and sixty acres.

7. Any association may enter not to exceed three hundred and twenty acres.

8. Any association of not less than four persons, duly qualified, who shall have expended not less than $5,000 in working and improving any coal mine or mines, may enter under section 2348 not exceeding six hundred and forty acres, including such mining improvements.

9. One person can have the benefit of one entry or filing *only*. He is disqualified by having made such entry or filing alone, or as a member of an association. No entry can be allowed an association which has in it a single person thus disqualified, as the law prohibits the entry or holding of more than one claim either by an individual or an association.

10. Lands that are sufficiently valuable for gold, silver, or copper to prevent their entry as agricultural lands cannot be entered as coal-lands; and you will not allow any entry to be made under the above named provisions of law of lands valuable for their deposits of said minerals.

11. The present rules relative to "hearings to establish the character of lands," contained in General Land Office regulations of October 31, 1881, issued under the mining laws, will, as far as applicable, govern your action in determining the character of lands sought to be entered as coal land.

12. The price per acre is $10 where the land is situated *more* than fifteen miles from any completed railroad, and $20 per acre where the land is *within* fifteen miles of such road. The price of the land, however, must be determined by its distance from a completed railroad at the date of payment and entry irrespective of the preference-right of entry.

13. When application is made to purchase coal-land at the rate of $10 per acre you will in all cases require satisfactory proof that the land applied for is, at date of entry, situated more that fifteen miles from any completed railroad. This proof may consist of the affidavit of the applicant, or that of his duly authorized agent, corroborated by the affidavit of some disinterested credible party showing personal knowledge of the facts.

14. Where the land lies *partly within* fifteen miles of such road and in *part outside* such limit, the *maximum* price must be paid for all legal subdivisions the greater part of which lie within fifteen miles of such road.

15. The term "completed railroad" is held to mean one which is actually constructed on the face of the earth; and lands within fifteen miles of any point of a railroad so constructed will be held and disposed of at $20 per acre.

16. Any duly qualified person or association must be preferred as purchasers of those public lands on which they have opened and improved, or shall open and improve, any coal mine or mines, and which they shall have in actual possession.

17. Possession by agent is recognized as the possession of the principal. The clearest proof on the point of agency must, however, be required in every case, and a clearly-defined possession must be established.

18. The *opening and improving* of a coal mine, in order to confer a preference-right of purchase, must not be considered as a mere matter of form; the labor expended and improvements made must be such as to clearly indicate the good faith of the claimant.

19. These lands are intended to be sold, where there are adverse claimants therefor, to the party who, by substantial improvements, actual possession, and a reasonable industry, shows an intention to continue his development of the mines in preference to those who would purchase for speculative purposes only. With this view, you will require such proof of compliance with the law, when lands are applied for under section 2348 by adverse claimants, as the circumstances of each case may justify.

20. In conflicts, where improvements have been or shall hereafter be commenced, priority of possession and improvement shall govern the award when the law has been fully complied with by each party. A mere possession, however, without satisfactory improvements, will not secure the tract to the first occupant when a subsequent claimant shows his full compliance with the law.

21. After an entry has been allowed to one party, you will make no investigation concerning it at the instance of any person except on instructions from this office. You will, however, receive all affidavits concerning such case and forward the same to this office, accompanied by a statement of the facts as shown by your records.

22. Prior to entry it is competent for you to order an investigation, on sufficient grounds set forth under oath of a party in interest and substantiated by the affidavits of disinterested and credible witnesses.

MANNER OF OBTAINING TITLE.

Application for coal lands—private entry.

23. When title is sought by *private entry* the party will himself make oath to the following application, which must be presented to the register:

I, ——— ———, hereby apply, under the provisions of the Revised Statutes of the United States relating to the sale of coal lands of the United States, to purchase the ——— quarter of section ———, in township ——— of range ———, in the district of lands subject to sale at the land office at ———, and containing ——— acres; and I solemnly swear that no portion of said tract is in the possession of any other party; that I am twenty-one years of age, a citizen of the United States (or have declared my intention to become a citizen of the United States), and have never held nor purchased lands under said act, either as an individual or as a member of an association; and I do further swear that I am well acquainted with the character of said described land, and with each and every legal subdivision thereof, having frequently passed over the same; that my knowledge of said land is such as to enable me to testify understandingly with regard thereto; that said land contains large deposits of coal and is chiefly valuable therefor; that there is not to my knowledge within the limits thereof any vein or lode of quartz or other rock in place bearing gold, silver, or copper, and that there is not within the limits of said land, to my knowledge, any valuable deposits of gold, silver, or copper. So help me God.

——— ———.

24. Thereupon the register, if the tract is vacant, will so certify to the receiver, stating the price, and the applicant or his duly authorized agent must then pay the amount of purchase money.

25. The receiver will then issue to the purchaser a duplicate receipt, and at the close of the month the register and receiver will make returns of the sale to the General Land Office, from whence, when the proceedings are found regular, a patent or complete title will be issued; and on surrender of the duplicate receipt such patent will be delivered, at the option of the patentee, either by the Commissioner at Washington or by the register at the district land office.

26. This disposition at private entry will be subject to any valid prior adverse right which may have attached to the same land, and which is protected by section 2348.

PRE-EMPTION OF COAL LANDS.

27. *Second.* When the application to purchase is based on a priority of possession, &c., as provided for in section 2348, the claimant must, when the township plat is on file in your office, file his declaratory statement for the tract claimed sixty days from and after the first day of his actual posession and improvement. Sixty days, exclusive of the first day of possession, &c., must be allowed.

Declaratory statement.

28. The declaratory statement must be substantially as follows, to wit:

I——— ———, do solemnly swear that I am ——— years of age, and a citizen of the United States (or have declared my intention to become a citizen of the United

States), that I never have, either as an individual or as a member of an association, held or purchased any coal lands under the provisions of the Revised Statutes of the United States relating to the sale of coal lands of the United States, and I do hereby declare my intention to purchase, under the provisions aforesaid, the ——— quarter of section ———, in township ——— of range ———, of lands subject to sale at the district land office at ———, and that I came into possession of said tract on the ——— day of ———, A. D. 18—, and have ever since remained in actual possession continuously; that I have located and opened a valuable mine of coal thereon; and have expended in labor and improvements on said mine the sum of ——— dollars, the labor and improvements being as follows: (here describe the nature and character of the improvements) and I do furthermore solemnly swear that I am well acquainted with the character of said described land, and with each and every legal subdivision thereof, having frequently passed over the same; that my knowledge of said land is such as to enable me to testify understandingly with regard thereto; that there is not, to my knowledge, within the limits thereof any vein or lode of quartz or other rock in place bearing gold, silver, or copper, and that there is not within the limits of said land, to my knowledge, any valuable deposit of gold, silver, or copper. So help me God.

——— ———.

29. When the township plat is not on file at date of claimant's first possession the declaratory statement must be filed within sixty days from the filing of such plat in your office.

30. One year from and after the expiration of the period allowed for filing the declaratory statement is given within which to make proof and payment; but you will allow no party to make final proof and payment except on notice to all others who appear on your records as claimants to the same tract.

31. A party who otherwise complies with the law may enter *after* the expiration of said year, *provided* no valid adverse right shall have intervened. He postpones his entry beyond said year at his own risk, and the Government cannot thereafter protect him against another who complies with the law, and the value of his improvements can have no weight in his favor.

Affidavit of claimant at time of purchase.

32. Each claimant at the time of actual purchase must make affidavit as follows:

I ——— ———, claiming under the provisions of the Revised Statutes of the United States, relating to the sale of coal lands of the United States, the right of purchase to the ——— quarter of section ———, in township ——— of range ———, subject to sale at ———, do solemnly swear that I have never had the right of purchase under the aforesaid provisions of law either as an individual or as a member of an association, and that I have never held any other lands under its provisions. I further swear that I have expended in developing coal mines on said tract in labor and improvements the sum of ——— dollars, the nature of such improvements being as follows: ——— ——— ———; that I am now in the actual possession of said mines, and make the entry for my own use and benefit, and not directly or indirectly for the use and benefit of any other party; and I do furthermore swear that I am well acquainted with the character of said described land, and with each and every legal subdivision thereof, having frequently passed over the same; that my knowledge of said land is such as to enable me to testify understandingly with regard thereto; that the same is chiefly valuable for coal; that there is not, to my knowledge, within the limits thereof any vein or lode of quartz or other rock in place bearing gold, silver, or copper, and that there is not within the limits of said land, to my knowledge, any valuable deposit of gold, silver, or copper. So help me God.

——— ———.

33. The application, declaratory statement, and the affidavit required at the time of actual purchase—the forms of which are given above under paragraphs 23, 28, and 32—may be sworn to before any officer authorized by law to administer oaths, but the authority of such officer must be properly shown.

34. Any party duly qualified under the law, *after* swearing to his application or declaratory statement, may, by a sufficient power of attorney, duly executed under the laws of the State or Territory in which such party may then be residing, empower an agent to file with the register of the proper land office the application, declaratory statement, or affidavit required at the time of actual purchase, and also authorize him to make payment for and entry of the land in the name of such qualified party; and when such power of attorney shall have been filed in your office you will permit such agent to act thereunder as above indicated.

35. Where a claimant shows by affidavit that he is not personally acquainted with the character of the land, his duly authorized agent who possesses such knowledge

may make the required affidavit as to its character; but whether this affidavit is made by principal or agent, it must be corroborated by the affidavits of two disinterested and credible witnesses having knowledge of its character.

36. Nothing in these regulations shall be so construed as to prevent a party from proving his citizenship or age, or establishing the status of the lands sought to be entered, in accordance with ordinary rules of evidence; and any proof regularly introduced for that purpose that would be competent in a court or before a commissioner charged with the ascertainment of facts may be considered.

Assignments recognized.

37. Assignments of the right to purchase will be recognized when properly executed. Proof and payment must be made, however, within the prescribed period, which dates from the first day of the possession of the assignor who initiated the claim.

38. The "Rules of Practice in cases before the United States district land offices, the General Land Office, and the Department of the Interior," approved December 20, 1880, will, as far as applicable, govern all cases and proceedings arising under the sections of the Revised Statutes above quoted providing for the sale of coal lands of the United States.

39. You will report at the close of each month as "sales of coal lands" all filings and entries in separate abstracts, commencing with number *one*, and thereafter proceeding consecutively in the order of their reception. Where a series of numbers has already been commenced by sale of coal lands you will continue the same without change.

N. C. McFARLAND,
Commissioner.

To Registers and Receivers.

Department of Interior, *July* 31, 1882.

Approved.

Secretary.

ESTIMATE OF COAL LANDS AND LOCATION.

[See pages 292, 293, herein.]

New discoveries are being constantly made. The probabilities are that much of the valley and plains land of the desert and arid region cover coal beds.

DONATION ACTS.

[See Chapter XXIV, pages 295 to 297 and 1278.]

To June 30, 1882.

Under the several donation acts the nation has disposed of public lands as follows:

	Acres.
Under Florida act of August 4, 1842, to June 30, 1882, 1,317 entries, containing	210,720.00
Under Oregon act of September 27, 1850, to June 30, 1882, 7,317 entries, containing	2,563,752.02
Under Washington act of March 2, 1853, to June 30, 1882, 985 entries, containing	290,215.35
Under New Mexico act of July 22, 1854, to June 30, 1882, 332 entries, containing	52,609.36
A grand total to June 30, 1882, of	3,117,401.73

NEW MEXICO DONATION ACT.

[See, also, "Decisions of Department of the Interior and General Land Office to June, 1883," page 287.]

The only donation act in operation is the act relating to New Mexico. The following corrected table (see page 297) exhibits the results of this act to June 30, 1882.

New Mexico donations, under the act of July 22, 1854 (10 Stats., 308), reported to the General Land Office up to June 30, 1882.

	Number of certificates.	Area.
		Acres.
For the fiscal year 1874	29	4,519.19
For the fiscal year 1875	1	160.00
For the fiscal year 1876	1	320.00
For the fiscal year 1877	6	960.00
For the fiscal year 1878	22	2,160.00
For the fiscal year 1880	69	10,981.32
For the fiscal year 1881	120	20,115.98
For the fiscal year 1882	84	13,392.87
Total	332	52,609.36

TOWN-SITE AND COUNTY-SEAT ACTS.

[See Chapter XXV, pages 298 to 305, inclusive, and 1278.]

TO JUNE 30, 1882.

Under all of these several acts there has been disposed of to June 30, 1882, 162,794.41 acres.

TOTAL ENTRIES TO JUNE 30, 1882, OF TOWN SITES.

To June 30, 1880, under the town-site acts, there were located, on public lands, 420 towns, containing 144,131.23 acres; from June 30, 1880, to June 30, 1882, there were located 45 towns, with an acreage of 12,626.50 acres; in all to June 30, 1882, 465 towns, with a total acreage of 156,757.73 acres.

COUNTY SEATS.

[See page 305, and also section 2286, R. S.]

TOTAL ENTRIES TO JUNE 30, 1882, UNDER COUNTY-SEAT ACT.

To June 30, 1880, eight counties under the county-seat act located 886.68 acres; from June 30, 1880, to June 30, 1882, one county took the benefit of the act, locating 160 acres; in all to June 30, 1882, nine entries, containing 1,046.68 acres.

TOWN LOTS.

[See page 305, and also section 2382, R. S.]

TOTAL ENTRIES UNDER TOWN-LOT ACT TO JUNE 30, 1882.

Six towns took the benefit of the town-lot act, entering 649 blocks, containing 3,840 acres, to June 30, 1880. From that date to June 30, 1882, one town received the benefit of the act, entering 102 blocks, containing 510 acres; in all, to June 30, 1882, seven entries, containing 751 blocks, embracing total area of 4,350 acres.

MILITARY RESERVATIONS.

SALE OF MILITARY RESERVATION AT DALLES, OREGON.

By act of March 3, 1877, 128 city lots were sold, at the Dalles, Oregon, containing 640 acres.

TOWN SITES.

FROM JUNE 30, 1880, TO JUNE 30, 1882.

Forty-five entries were approved under the town-site acts, as follows, containing 12,626.50 acres:

List of town-site entries approved from July 1, 1880, to June 30, 1882, inclusive.

TOWN SITES AND TOWN LOTS. DECISIONS AND RULINGS.

For decisions as to, see annual reports Commissioner of the General Land Office, and "Decisions of the Department of the Interior and General Land Office, from June, 1881, to June, 1883," pages 501 to 506, and 567, 568.

METHOD OF ENTRY AND FORM OF PATENT.

The following letters of the Secretary of the Interior and Commissioner of the General Land Office are inserted on account of historical interest and information.

[Ex. Doc. No. 187, Forty-sixth Congress, Second Session.]

Letter from the Secretary of the Interior, transmitting, in response to Senate resolution of the 30th ultimo calling for information concerning entries of town sites on mineral lands, the report of the Commissioner of the General Land Office on the subject.

MAY 25, 1880.—Referred to the Committee on Public Lands and ordered to be printed.

DEPARTMENT OF THE INTERIOR,
Washington, May 24, 1880.

SIR: In answer to Senate resolution of the 30th ultimo calling on me for information concerning entries of town sites on mineral lands, I have the honor to transmit herewith the report of the Commissioner of the General Land Office on the subject, under date of the 7th instant, and to state that I concur in the views therein set forth.

Very respectfully,

C. SCHURZ,
Secretary.

The Hon. the PRESIDENT OF THE SENATE.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., May 7, 1880.

SIR: I have the honor to acknowledge receipt, by Department reference of 3d instant, of Senate resolution dated 30th ultimo, as follows:

"*Resolved*, That the Secretary of the Interior be directed to inform the Senate if changes of rulings and construction of statutes concerning entries of town sites upon mineral lands have recently been made in his Department; whether such change of ruling and construction have affected the substantial rights of parties who have settled upon the public lands, and, if so, what legislation, if any, is in his judgment necessary to protect the equitable rights of such parties; and the Secretary is requested to suspend action upon cases affected by said rulings until action by Congress."

I will first give, briefly, the outlines of the practice of this office under the laws relating to the subject presented by said resolution.

"The act for the disposal of coal lands and of town property in the public domain," approved July 1, 1864 (13 Stats., 343), was prior to the acts providing for the sale of mineral lands, other than coal, and did not mention such other minerals.

In "An act supplemental to the act approved first July, eighteen hundred and sixty-four, for the disposal of coal lands and of town property in the public domain," approved March 3, 1865 (13 Stats., 529), the existence of minerals in such lands was recognized, as follows:

"*Provided further*, That where mineral veins are possessed, which possession is recognized by local authority, and to the extent so possessed and recognized, the title to town lots to be acquired shall be subject to such recognized possession and the necessary use thereof; *Provided, however*, That nothing contained herein shall be so construed as to recognize any color of title in possessors for mining purposes as against the Government of the United States."

This act was also prior to the first act providing for the sale of mineral lands, other than coal.

In the official circular instructions, under the last-named act, the provisions relating to mineral veins are referred to as follows:

"In the second section of the supplemental act it is provided that parties having a *possessory* right to *mineral* veins, which possession is *recognized by local* authority, are to be protected therein, and titles to be acquired to town lots under this act are made subject to "such recognized possession and the necessary use thereof," yet with an *express saving of the paramount title* of the United States."

No further instructions seem to have been given upon said point.

The first act of Congress providing for the sale of mineral lands, other than coal, was approved July 26, 1866 (14 Stats., 251), and entitled "An act granting the right of way to ditch and canal owners over the public lands, and for other purposes."

This act made no specific reference to town sites, but allowed the party in possession of a mining claim, held in accordance with local customs or rules of miners, and in regard to whose possession there was no controversy or opposing claim, to purchase the same from the United States and receive patent therefor.

The act approved March 2, 1867, entitled "An act for the relief of the inhabitants of cities and towns upon the public lands" (14 Stats., 541), provides for the entry of lands "settled upon and occupied as a town site and therefore not subject to entry under the agricultural pre-emption laws," by the corporate authority, in case the town should be incorporated, and otherwise by the judge of the county court, in trust for the several use and benefit of the occupants thereof, and contained the following proviso:

"*And provided further*, That no title shall be acquired, under the provisions of this act, to any mine of gold, silver, cinnabar, or copper."

On June 8, 1868, an act amendatory of the last-named act of March 2, 1867, was approved (15 Stats., 67), and contained the following provision:

"That no title under said act of March two, eighteen hundred and sixty-seven, shall be acquired to any valid mining claim or possession held under the existing laws of Congress."

In the official circular-instructions issued under said acts, and dated September 21, 1868, the provision relating to mines was only referred to, as follows:

"All military and other reservations of the United States, private grants, and valid mining claims, are excluded from the operation of these town-site laws."

April 21, 1869, the then Commissioner of this office, in a letter to the local land officers at Sacramento, Cal., concerning the application to enter Nevada City, Cal., as a town site, held that the mines of gold formerly in the land having been completely exhausted, the town-site entry could be made.

Section 2318, U. S. Revised Statutes, provides that—

"In all cases lands valuable for minerals shall be reserved from sale, except as otherwise expressly directed by law."

ENTRIES OF TOWN SITES ON MINERAL LANDS.

The town-site entry of Clarksville, Cal., was approved for patent August 23, 1872, and was the FIRST ENTRY patented with a reservation inserted in the patent saving mineral rights, it having evidently been theretofore the practice to require proof of the non-mineral character of the land applied for as a town site, and to allow town-site entry *only upon proof that the land was non-mineral.*

In the annual report of this office for 1872, on page 21, the then Commissioner said:

"There has been no legislation by Congress since my last report relative to the location of town sites upon the public lands. It is now held by this office that patents may issue to the proper authorities for lands claimed as mineral, stating that 'no title shall be hereby acquired to any mine of gold, siver, cinnabar, or copper, or to any valid mining claim or possession held under existing laws of Congress.' This obviates the necessity of suspending the issue of patent until the non-mineral character of the land has been shown, and allows parties claiming lots on a town site to obtain title thereto at an early day after the entry has been made, while any part of the land upon which minerals exist is specially reserved and excepted from the operation of the patent."

The practice indicated as above was followed thereafter until October 6, 1875, in the matter of the Silver City town site, Nevada. The Commissioner, in addition to the usual clause of reservation, decided to except from the operations of the patent certain mineral surveys by name.

The owners of mines under the town site of Central City, Colo., for which application for patent had been made, desired that any patent which should issue for the town site should contain the following clause:

"*Provided*, That no title shall be acquired under this patent to any mine of gold, silver, cinnabar, or copper, nor to any surface ground over any such mine, or within fifty feet on each side of the same, throughout the length of the vein, which said surface ground shall be reserved, and shall be sold with the mines for the special use and working thereof at not less than ——— dollars per acre."

PATENTS FOR TOWN SITE ON LAND CONTAINING VEINS.

On the 23d of December, 1875, my predecessor rendered decision in said case, stating that patent for the town site would issue with a proviso in the following form:

"*Provided*, That no title shall be hereby acquired to any mine of gold, silver, cinnabar, or copper, or to any valid mining claim or possession held under existing laws: *And provided further*, That the grant hereby made is held and declared to be subject to all the conditions, limitations, and restrictions contained in section two thousand three hundred and eighty-six of the Revised Statutes of the United States so far as the same are applicable thereto."

The exception in mining patent for land within a town site was also in the same decision recited, as follows:

"Excepting and excluding, however, from these presents all town property rights upon the surface, and there are hereby expressly excepted and excluded from the same

all houses, buildings, and structures, lots, blocks, streets, alleys, or other municipal improvements on the surface of the above-described premises, not belonging to the grantees herein, and all rights necessary or proper to the occupation, possession, and enjoyment of the same."

Said decision was affirmed by Hon. Secretary Chandler, June 7, 1876.

It should here be remarked that said decision relates to a town site upon land containing *veins*, and was, therefore, directly founded upon section 2386, Revised Statutes, which relates exclusively to *veins*.

TOWN SITE ON PLACER GROUND.

On the 23d of November, 1876, the local land officers at Helena, Mont., were instructed by me to allow the entry of the town site of Butte, and that the patent would contain the reservation specified in said decision in case of Central City town site before mentioned. The town of Butte was located upon *placer* ground, and I held that after the issue of patent to the town site with said reservation, the title to all valid mining claims or possessions still remained in the United States, and that title thereto could only be acquired under the provisions of law relating to the disposal of mineral lands by parties who showed compliance with the terms of the mining acts.

In the case of Kemp *vs.* Starr, an application having been made by Starr for patent to his placer-mining claim, in Leadville, Colo., it was alleged that the land was non-mineral, whereupon a hearing was held to determine the fact.

It was proven that the claim was valuable for minerals; that it was regarded as placer-mining ground as early as 1860; that the mining claims represented by Starr had their inception long prior to the occupation of any portion of the land as a town site; that at a very recent date there had been a sudden influx of population, whose residence or occupancy would doubtless depend upon the mining prosperity of the locality; that in order to prevent forcible occupation, the proprietors of the mining claim had laid out lots on a part thereof, and permitted building on certain considerations, and agreements for the conveyance of such lots, upon receiving patent, being executed, and that the town authorities made no opposition to Starr's application for patent.

I held that the application of Starr for a patent should be allowed; and that no exception of any town rights should be inserted in the patent, for the reason that his claim was a surface claim, and was anterior to town site occupation, no adverse or conflicting right having been acquired by the town or by individual settlers who went there with record notice of ownership of said placer claim.

My decision in this case was affirmed by you under date of March 4, 1879.

In your decision you said:

"After careful consideration of the same, I concur with you that the land embraced in the application is land which should, under the provisions of section 2318, Revised Statutes, be held as 'valuable for minerals,' and should be reserved from sale except as provided by law regulating the sale of mineral lands. In my opinion, the evidence submitted as to the relative value of the land for town-site or mining purposes was improperly allowed. If the land is mineral, it was subject to location only under the provisions of the mining law, without reference to the relative value of a portion of the tract for town-site purposes."

The decision of the Department of June 7, 1876, in case of the town site of Central City related to a town site overlying *veins*, which condition is referred to in Revised Statutes, section 2386, and was the first decision of a case involving the question then presented.

That decision has been uniformly followed to this day.

The decision aforesaid by the Department in the Starr claim was its first decision upon a case where a town site was located upon *placer mines*, which, as a rule, are surface claims, and are valueless, when unaccompanied by surface proprietorship.

This decision has likewise been followed uniformly since it was rendered.

It will therefore be seen that the decisions of the Department have not been changed; they have simply been rendered when cases involving the separate specific questions aforesaid have been regularly presented for adjudication.

It is hardly within my power to report specifically "whether the substantial rights of parties who have settled upon the public lands" have been affected by said rulings. It has been the law for many years that no title should be acquired through a town-site patent to any valid mining claim or possession. (See section 2392, Revised Statutes.)

The decision aforesaid in case of the Central City town site relates to a town overlying *veins*, the use and development of which is compatible with surface occupation by a town, and seemed distinctly justified by section 2386, Revised Statutes.

In the town site of Deadwood, Dak., lately the subject of a decision by me, it was found that town site occupation *followed* the location of placer-mining claims, and did not precede such locations; that the placer-miners were actually prohibited in some

instances from working their claims at all, because they were prevented by force and by color of municipal authority from having the necessary drainage and facilities essential to such work. Yet it appeared in that case that the occupation for dwelling and business purposes followed close upon the occupation for mining purposes, and was substantially contemporaneous with it. The mines were surface claims, however, and their development was plainly incompatible with municipal occupation. The former probate judge who made the entry, entered and paid for every foot of ground within the survey for the town site, including a number of mineral surveys, of which entries had then already been made, and were in this office awaiting patents; and by publication in the newspapers said probate judge gave the claimants to city lots notice to pay for the same within thirty days, and that the land not so taken would then be sold and disposed of at public sale.

While this case has not yet been taken before you on appeal from this office, I have mentioned it as illustrating the difficulties involved in cases where town sites are made upon land located, purchased, and valuable for placer mines.

In view of the fact that it has for many years been the law that no title to a valid mining claim or possession could be acquired through a town-site entry, and that, when a surface placer-claim of value existed, the town site claimant necessarily had personal knowledge of the incompatibility of the existence of both claims upon the same ground, I am, in the absence of accurate knowledge of the equitable claims, if any, existing in individual cases heretofore embraced in general adjudications, unable to advisedly conclude what, if any, equitable relief is due, or what legislation could be directed to relieve such occupants of town sites which would not at the same time destroy essential rights long since allowed by law to mineral claimants.

In such cases, where the land has been awarded to mineral claimants, it is extremely probable that surface occupants have already purchased from the mineral owners such privileges as were necessary or desirable, and that any present disturbance of title heretofore adjusted by this Department would result only in positive injury to the actual occupants of such lands. That parties interested in speculations might profit by such unsettling of title should not constitute a reason for new legislation.

LEGISLATION RECOMMENDED.

Concerning defects in the present law, I am of the opinion, in view of all the difficulties which seem to surround this question, and the uncertainty of title which is represented to result from the apparently unavoidable construction of the existing laws, that such legislation should be had as would most distinctly define the respective rights of mineral and town-site claimants, and leave the least possible ground for controversy or possible misdirection. Legislation upon the subject which would clearly advise all parties of their rights and mislead none and leave nothing to chance, would be of such paramount importance that other considerations could well be postponed.

To this end I would respectfully suggest that if new legislation be had, it should provide for the following conditions:

1st. Where mineral location of lodes or placer antedates town occupation, patent should issue, without reservation, to the mineral claimants.

2d. Where the land is occupied as a town prior to mineral location, and the character of the town occupancy is clearly permanent and in good faith, the same rule of priority should control; and patent, without reservation, should issue to the town authorities, without regard to the characters of the land.

3d. Where the ground is known to be mineral in character, and the location of mining claims and building and occupancy of dwellings, stores, &c., proceed contemporaneously, very difficult questions of fact arise in every case. Minerals are discovered in any certain locality; locations are made; temporary dwellings are erected; miners from different localities rush in, under the excitement of the new discoveries; stores, saloons, boarding-houses, &c., &c., are built to satisfy the demand of trade during what may be the transient occupation of the mining camp. No man during that period builds or occupies for permanent purpose; he is there for the profits of the hour. If the mineral developments after due effort are found to be poor, the place is soon abandoned for other more promising localities; if the mines are found rich and extensive, the general occupation will soon take the character of permanency, of which there was no earlier intent. Now, when the surface occupants decide upon permanent and organized occupation, it is in their power to *immediately* apply for patent; and if any delay in preparation is necessary, they can at least give published notice of their claim, with its boundaries, and file the same in the district land office; and this would be a full notice from its date to all subsequent locators of mining claims, and the right of the town to unlocated ground should attach and patent issue without exception in favor of such subsequent locators, while prior locations made during the period when everything except the mining location was considered as transient, and calculated only for temporary purposes, should not be embraced in a

town-site entry, but be subject to entry and patent without any reservation, by the individual owners thereof.

I think that any objection to this plan based upon the proposition that valuable mineral ground may sometimes be patented to a town should be subordinated to the larger interests, public and private, to be secured only by certainty of proceeding and peace of title.

The said Senate resolution is herewith returned.

Very respectfully, your obedient servant,

J. A. WILLIAMSON,
Commissioner.

Hon. SECRETARY OF THE INTERIOR.

TOWN SITES.

[Official circular.]

IN EFFECT DECEMBER 1, 1883.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., October 1, 1880.

* * * * * * *

The eighth chapter of the Revised Statutes of the United States, comprising sections 2380 to 2394, and act of Congress of March 3, 1877, provide for the disposal of town sites on the public domain.

TITLE, HOW ACQUIRED.

There are two methods by which title to such town property may be acquired, subject to the election of parties desiring to do so; one provided for in sections 2382, 2383, 2384, and 2385, and the other in sections 2387, 2388, and 2389 of the Revised Statutes of the United States. The first method limits the extent of the area of the city or town to 640 acres, to be laid off into lots, and which, after filing in the General Land Office the transcript, statement, and testimony required by section 2382, are to be offered at public sale to the highest bidder, at a minimum of ten dollars for each lot. Lots not thus disposed of are made thereafter liable to private entry at said minimum, or at such reasonable price as the Secretary of the Interior may order from time to time, as the municipal property may increase or decrease, after at least three months' notice.

A privilege, however, is granted to any *actual settler* upon any *one* lot of pre-empting that, and any additional lot on which he may have "substantial improvements," at said minimum, at any time before the day fixed for the public sale.

ENTRY, HOW MADE BY INDIVIDUALS.

There are, however, certain preliminary conditions to be complied with in order to the enjoyment of the privileges granted in this section. Parties who have already founded, or may hereafter found, a city or town are required—

1st. To file with the recorder of the county in which the town or city is situate a plat thereof, not exceeding 640 acres, describing its exterior boundaries according to the lines of the public surveys, where such surveys have been executed.

2d. Also the plot or map of such city or town must exhibit the name of the city or town, the streets, squares, blocks, lots, and alleys; the size of the same, with measurements and area of each municipal subdivision, the lots in which shall each not exceed 4,200 square feet, with a statement of the extent and general character of improvements.

3d. Further, the said map and statement to be verified by oath by the party acting for and in the behalf of the founders of the city or town.

4th. Within one month after filing the map or plat with the recorder of the county a verified copy of said map and statement is to be sent to the General Land Office, accompanied by the testimony of two witnesses that such city or town has been established in good faith.

5th. Where the city or town is within the limits of an organized land district, a similar copy of the map and statement must be filed with the register and receiver.

Section 2383 provides for cities or towns founded on *unsurveyed* land, and directs that it may be lawful to adjust the exterior limits of the premises with the lines of the public surveys, where it can be done without impairing the rights of others. It also provides for the issue of patents for lots disposed of under these provisions as in ordinary cases.

Section 2384 authorizes the Secretary of the Interior, in case the parties interested shall fail or refuse, within twelve months of the founding of a city or town on the public domain, to file in the General Land Office a copy of the map, with the statement and testimony called for by section 2382, to cause a survey and plat to be made

of the said city or town, and thereafter the lots to be sold, as provided, at an increase of fifty per cent. on the minimum price of ten dollars per lot.

ENTRY, HOW MADE BY INHABITANTS OF CITIES OR TOWNS.

Sections 2387, 2388, and 2389 grant to the inhabitants of cities and towns on the public lands the privilege of entering the lands occupied as town sites at the minimum price of one dollar and twenty-five cents per acre, through the corporate authorities of such towns and cities, or the judges of the county courts, acting as trustees for the occupants thereof.

This privilege is granted where such mode of obtaining title to town property is preferred to that provided in sections 2382, 2383, 2384, and 2385, which are not repealed by the former sections. The inhabitants of these towns or cities are limited, however, to one or the other of the modes provided in these statutes, and cannot commence proceedings under both systems.

The provisions of sections 2382, 2383, 2384, and 2385 were originally embodied in the acts of Congress of July 1, 1864, and March 3, 1865; those of sections 2387, 2388, and 2389 in the act of March 2, 1867. Section 2394 is a re-enactment of the act of June 8, 1868. It has reference to cases where the inhabitants of cities or towns proceeded to act under the provisions of the acts of July 1, 1864, and March 3, 1865, prior to June 22, 1874, the date of the Revised Statutes, and in which they have partly proved up and paid for the lots claimed by them according to said acts. It provides for extending the privilege of sections 2387, 2388, and 2389, if the town authorities in any such case should elect to proceed under them, to such of the inhabitants as may not have paid for their lots, without interfering with the issuing of patents to those who had made or might make entries or elect to proceed under the acts of July 1, 1864, and March 3, 1865, or sections 2382, 2383, 2384, and 2385 of the Revised Statutes. Accordingly, should any case be presented where proceedings had been commenced, as aforesaid, by the inhabitants of any town or city before the date indicated, and a part of them, not having entered and paid for their lots, desire to take advantage of the other system referred to, they would be entitled under section 2394, on application to the register and receiver of the proper district office, through the town authorities, pursuant to the provisions of sections 2387, 2388, and 2389, to enter or file upon such portion of the town site as has not already been entered and paid for, and is not in possession of parties electing to complete their titles under the original proceedings; after which, that part of the town site so entered or filed upon will be disposed of under the last-mentioned sections, and the remaining portion, if any, under sections 2382, 2383, 2384, and 2385. Section 2394 has no reference to any case in which proceedings for acquiring title to the town site were commenced subsequent to June 22, 1874, the inhabitants in all such cases being restricted to the method of acquiring title according to which they may have commenced to act.

PRICE OF LANDS AND SURVEYS.

Section 2394 further provides that, in addition to the minimum price of the lands included in any town site entered under its provisions and those of sections 2387, 2388, and 2389, there shall be paid by the parties availing themselves thereof all costs of surveying and platting any such town site, and expenses incident thereto, incurred by the United States, before any patent therefor shall issue. Hence, when it is desired to enter a town site found upon the *unsurveyed* public lands, a written application should be presented to the surveyor-general of the proper district for a survey of the same under section 2401 of the Revised Statutes, and the amount estimated by him as sufficient to cover the said cost and expenses deposited with any assistant United States treasurer or designated depositary in favor of the United States Treasurer, to be passed to the credit of the fund created by "individual depositors for the survey of the public lands," the depositor taking a duplicate certificate of deposit, one to be filed with the surveyor-general to be sent to the General Land Office, and the other retained by the depositor. On receiving such certificate, showing that the requisite sum has been deposited in a proper manner to pay for the work, the surveyor-general will transmit to the register and receiver of the district land office his certificate of such payment having been made, and will contract with a competent United States deputy surveyor and have the survey made and returned in the same manner as other public surveys, after which the lands embraced within the site may be entered, or filed upon, as in the case of town sites upon surveyed lands.

When town sites are located upon land already surveyed, the entry must be made in conformity to the legal subdivisions of the public lands, and here no costs in regard to past surveys will be exacted. When sites are upon *unsurveyed* land, it will be necessary, after the extension thereto of the public survey, to close those lines upon the exterior limits of the town site.

AREA TO BE EMBRACED.

Section 2389, it will be observed, stipulates that there shall be conceded, where the number of inhabitants is one hundred and less than two hundred, not exceeding three hundred and twenty acres; where the population is more than two hundred and less than one thousand, not exceeding six hundred and forty acres; and where the inhabitants number one thousand and over, not exceeding twelve hundred and eighty acres; and for each additional one thousand inhabitants, not exceeding five thousand in all, a further grant of three hundred and twenty acres.

WHAT LANDS ARE EXEMPT FROM SUCH ENTRIES.

All military and other reservations of the United States, private grants, and valid mining claims are excluded from the operation of these town-site laws. In patents issued thereunder it is expressly declared as follows, viz: "No title shall be hereby acquired to any mine of gold, silver, cinnabar, or copper, or any valid mining claim or possession held under existing laws of Congress." (Section 2392, Revised Statutes.)

MISCELLANEOUS.

In any Territory in which a land office may not have been established the declaratory statements provided for in the foregoing statutes may be filed with the surveyor-general of the proper district.

In the act of Congress of March 3, 1877, section one restricts the amount of land that can be reserved from pre-emption and homestead entry, by reason of the existence or incorporation of a town upon the public domain, to 2,560 acres, unless the excess shall "be actually settled upon, inhabited, improved, and used for business and municipal purposes."

Section 2 confirms pre-emption and homestead entries already made within the corporate limits of a town, the entries being regular in all respects, *provided* it shall be satisfactorily shown that the lands so entered are "not settled upon or used for any municipal purpose, nor devoted to any public use of such town."

Section 3 provides that, when it shall appear that the corporate limits of a town embrace lands in excess of the maximum quantity allowed, the proper authorities may select those portions that are actually occupied, used, and improved for municipal purposes, which lands shall be reserved from pre-emption and homestead entry, and the residue will be restored, or become subject to such settlement and entry. This selection must be made within sixty days from notice, and in default thereof a hearing will be ordered and testimony taken as to the condition of the land, and such portion set apart as shall appear to be within the meaning of the act.

The fourth section, with the proviso to the second edition, provides for additional entries by towns, where entries have already been made, in cases in which an increase in the number of inhabitants would entitle them to an entry of a larger area under section 2389 of the Revised Statutes of the United States, such entries, however, to be within the maximum amount, or 2,560 acres.

* * * * * * *

MINES ON THE PUBLIC DOMAIN.

[See Chapter XXVI, pages 306 to 331, inclusive, and 1279 to 1282.]

TO JUNE 30, 1882, AND JUNE 30, 1883, AS NOTED.

Under the acts of 1866, 1870, and 1872 there have been patented as quartz, vein or lode, or other valuable deposit mining claims in the several precious metal bearing States and Territories of the public domain, from 1867 to June 30, 1882, 5,609 lodes, containing 53,020.57 acres, and realizing $272,726. Under the placer acts of 1866, 1870, and 1872, there have been patented in the same localities to June 30, 1882, 1,688 placer claims, containing 141,950.03 acres, realizing $369,691; in all, vein and placer from 1866 to June 30, 1882, patents for 7,297 claims, containing 194,970.60 acres, realizing to the nation $642,417. (See Tables, pages 982 to 985.)

MINING LOCATIONS, HOW MANY MADE.

It is estimated that since the discovery of gold in California, January 19, 1848, to June 30, 1883, there have been more than 300,000 mining locations made in the several mining States and Territories, yet to June 30, 1882, but 7,249 of these claims had been patented.

To accompany "Public Domain" Base Map from Mitchells Series of Geographies published by E. H. Butler & Co. Philadelphia By Thomas Donaldson

Map, showing the approximate location of gold, silver, and cinnabar lands of the public domain west of the 100° meridian, June 30, 1883. Estimated to contain 64,000,000 of acres (exclusive of Alaska, in which there is known to be gold). See page 825 and 978 to 980 for text. Much of this area is, however, covered with timber, and the surface is also embraced in the estimate of "timber lands." The cinnabar lands in California are almost all taken. The production of quicksilver in California in 1882 was 7,000 flasks less than in 1881. It is estimated that $30,000,000 of capital is invested in quicksilver mining on the Pacific coast, employing 5,000 men.

SCHEME OF COLORS.

- Boundaries of the Public Domain.
- Gold.

- Cinnabar.

GOLD AND SILVER MINERS IN 1882.

The number of persons classed as miners in the precious metal regions on the public domain in 1882 was as follows (in round numbers 99,000):

Arizona	4,678
California	37,147
Colorado	28,970
Dakota	3,570
Idaho	4,708
Montana	4,813
Nevada	6,647
New Mexico	1,496
Oregon	3,696
Wyoming	328
Utah	2,592
	98,645

AVERAGE WAGES OF MINERS.

The production of gold and silver for the year 1882 makes an average of about $1,000 for each miner employed in precious-metal mining.

CORPORATION DIVIDENDS PAID IN 1882.

Fifty-four corporations in the several States and Territories paid dividends as follows:

States and Territories.	Mines.	Amount.
Arizona	5	$1,887,500
Colorado	16	2,326,650
California	10	1,312,047
Dakota	3	1,110,000
Montana	3	221,516
Nevada	7	663,262
Utah	4	2,129,000
Idaho	3	38,000
Georgia	1	48,000
New Mexico	2	204,000
Total	54	9,939,975

CORPORATION ASSESSMENTS IN 1882–'83.

One hundred and seventy-five gold and silver mining companies made three hundred and forty-three assessments. Seventy-six of these received $7,087,000. If the remaining ninety-nine received a proportionate amount, the assessments would be more than $10,000,000, or largely in excess of dividends by corporations.

REFERENCES.

For a most valuable and interesting report on the precious-metal regions of the public domain, as well as of other portions of the United States, see Annual Reports of the Hon. H. C. Burchard, Director of the Mint, upon the "Statistics of the production of the precious metals in the United States for the years 1880, 1881, and 1882," the statistical work being under the supervision of Dr. Frederick Eckfeldt, aided by a corps of efficient agents living in the regions mentioned. See also Compendium United States Census, 1880, pages 1229 to 1236.

ESTIMATE OF AREA, UNSOLD, OF PRECIOUS-METAL REGIONS.

[See page 325.]

To June 30, 1883.

The estimated area of the precious-metal bearing region of the public domain [the property of the nation] is about 64,000,000 acres. This is exclusive of Alaska.

See map of approximate location of the precious-metal lands, facing this page. It will be noted that most of these lands lie under surface, covered with timber.

PRODUCTION OF GOLD AND SILVER IN THE UNITED STATES, AND FROM THE PUBLIC DOMAIN.

[See page 320.]

FROM 1848 TO JUNE 30, 1882.

Since the discovery of gold in paying quantities in California, in 1848, there has been produced in the United States the sum of $2,137,463,792 in gold and silver, of which $1,587,241,532 was in gold, and $550,222,260 in silver. All but about $1,500,000 of this sum (which would represent the gold and silver extracted in the States other than public-land States) has been extracted from the lands of the public domain.

The following estimate of the yearly production of gold and silver from 1848 to 1882 is from the reports of Hon. H. C. Burchard, Director of the Mint:

Estimate of the production of the precious metals in the United States from 1848 *to* 1882, *by fiscal years.*

Date.	Gold.	Silver.	Total gold and silver.
1848	$10,000,000	.....	$10,000,000
1849	40,000,000	$50,000	40,050,000
1850	50,000,000	50,000	50,050,000

CHANGES AND EXISTING LAWS.

TO JUNE 30, 1883.

No change of moment in the mining laws relating to the public lands has been made since June 30, 1880, except that two acts of general interest have been passed.

The act of March 3, 1881 (given in full on page 994), and the act of March 3, 1883, relating to mineral lands in Alabama.

AN ACT to exclude the public lands in Alabama from the operation of the laws relating to mineral lands.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That within the State of Alabama all public lands, whether mineral or otherwise, shall be subject to disposal only as agricultural lands: *Provided, however,* That all lands which have heretofore been reported to the General Land

Office as containing coal and iron shall first be offered at public sale: *And provided further*, That any *bona fide* entry under the provisions of the homestead law of lands within said State heretofore made may be patented without reference to an act approved May tenth eighteen hundred and seventy-two, entitled "An act to promote the developement of the mining resources of the United States," in cases where the persons making application for such patents have in all other respects complied with the homestead law relating thereto.

The following circular was issued by the Commissioner of the General Land Office in relation to said law:

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., April 9, 1883.

TO DISTRICT LAND OFFICERS,
Montgomery and Huntsville, Ala.:

GENTLEMEN: The act of March 3, 1883 (copy herewith), enacts that all public lands within the State of Alabama, whether mineral or otherwise, shall be subject to disposal *only as agricultural land;* provided, that all lands which have heretofore been reported as containing coal and iron shall first be offered at public sale, and, further, that any *bona fide* entry under the provisions of the homestead law of lands within said State *heretofore made*, may be patented without reference to the act of May 10, 1872, in cases where the persons making application for such patents have in all other respects complied with the homestead law relating thereto.

In order to carry out the provisions of said act it will be necessary to prepare a list of all public lands heretofore reported as mineral that have not been entered and have them offered by President's proclamation. In the mean time you will be careful not to allow an entry to be made for any lands lists of which were transmitted to your office October 23, 1879, nor of other tracts that have been since investigated and reported as valuable for minerals, a list of which I inclose herewith.

All existing *bona fide* entries, under the homestead laws, may be perfected regardless of the mineral character of the land, in accordance with rules and regulations governing the same.

Any contest pending before you, where the *only* allegation is the mineral character of the land, must be dismissed.

The law requires the offering to embrace all lands heretofore reported as containing coal or iron, which remain undisposed of by entry or sale.

Entries, whether by cash or location, already allowed and reported to this office will be examined and disposed of upon their merits without reference to the question of mineral.

Very respectfully,

N. C. McFARLAND,
Commissioner.

DEPARTMENT OF THE INTERIOR,
April 9, 1883.

Approved.

H. M. TELLER,
Secretary.

Statement of the number of placer mining claims patented in the several precious metal-bearing States and Territories of the public domain from 1867 to June 30, 1882, together with the acreage and amount paid therefor, under the several mining acts of July 26, 1866, July 9, 1870, and May 10, 1872.

REGULATIONS UNDER EXISTING MINING LAWS.

UNITED STATES MINING LAWS, AND REGULATIONS THEREUNDER.

IN EFFECT DECEMBER 1, 1883.

INDEX TO REGULATIONS.

[Pages 985 to 1009.]

"For rulings and decisions since June, 1880, *see Report of the Commissioner of the General Land Office,* 1880," *and "Decisions of Department of the Interior and General Land Office from July* 1, 1881, *to June,* 1883," *pages* 541 *to* 592.

"For legal decisions and Departmental decisions and rulings, also under this chapter, see United States land laws, general and permanent," pages 142 *to* 157, *compiled by Public Land Commission,* 1880. *Forty-sixth Congress, third session, Ex. Doc.* 47, *Part* 1.

WHAT ARE MINERALS?

Whatever is recognized as mineral by the standard authorities, where the same occurs in quantity and quality to render the land in question more valuable on its account than for agricultural purpose, is mineral within the meaning of the mining laws.

S. J. KIRKWOOD,
Secretary of the Interior.

October 8, 1881.
(Appeal of W. H. Hooper and others, from Salt Lake office, January 25, 1881.)

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
October 29, 1881.

GENTLEMEN: Your attention is invited to the Revised Statutes of the United States and the amendments thereto in regard to

MINING LAWS AND MINING RESOURCES.

TITLE XXXII, CHAPTER 6.

Mineral lands reserved.
4 July, 1866, c. 166, s. 5, v. 14, p. 86.

SECTION 2318. In all cases lands valuable for minerals shall be reserved from sale, except as otherwise expressly directed by law.

Mineral lands open to purchase by citizens.
10 May, 1872, c. 152, s. 1, v. 17, p. 91.
U. S. *vs.* Gear, 3 How., 120.

SEC. 2319. All valuable mineral deposits in lands belonging to the United States, both surveyed and unsurveyed, are hereby declared to be free and open to exploration and purchase, and the lands in which they are found to occupation and purchase, by citizens of the United States and those who have declared their intention to become such, under regulations prescribed by law, and according to the local customs or rules of miners in the several mining-districts, so far as the same are applicable and not inconsistent with the laws of the United States.

Length of mining claims upon veins or lodes.

10 May, 1872, c. 152, s. 2, v. 17, p. 91.

SEC. 2320. Mining-claims upon veins or lodes of quartz or other rock in place bearing gold, silver, cinnabar, lead, tin, copper, or other valuable deposits, heretofore located, shall be governed as to length along the vein or lode by the customs, regulations, and laws in force at the date of their location. A mining-claim located after the tenth day of May, eighteen hundred and seventy-two, whether located by one or more persons, may equal, but shall not exceed, one thousand five hundred feet in length along the vein or lode; but no location of a mining-claim shall be made until the discovery of the vein or lode within the limits of the claim located. No claim shall extend more than three hundred feet on each side of the middle of the vein at the surface, nor shall any claim be limited by any mining regulation to less than twenty-five feet on each side of the middle of the vein at the surface, except where adverse rights existing on the tenth day of May, eighteen hundred and seventy-two, render such limitation necessary. The end-lines of each claim shall be parallel to each other.

Proof of citizenship.

10 May, 1872, c. 152, s. 7, v. 17, p. 94.

SEC. 2321. Proof of citizenship, under this chapter, may consist, in the case of an individual, of his own affidavit thereof; in the case of an association of persons unincorporated, of the affidavit of their authorized agent, made on his own knowledge, or upon information and belief; and in the case of a corporation organized under the laws of the United States, or of any State or Territory thereof, by the filing of a certified copy of their charter or certificate of incorporation.

Locators' rights of possession and enjoyment.

10 May, 1872, c. 152, s. 3, v. 17, p. 91.

SEC. 2322. The locators of all mining locations heretofore made or which shall hereafter be made, on any mineral vein, lode, or ledge, situated on the public domain, their heirs and assigns, where no adverse claim exists on the tenth day of May, eighteen hundred and seventy-two, so long as they comply with the laws of the United States, and with State, Territorial, and local regulations not in conflict with the laws of the United States governing their possessory title, shall have the exclusive right of possession and enjoyment of all the surface included within the lines of their locations, and of all veins, lodes, and ledges throughout their entire depth, the top or apex of which lies inside of such surface-lines extended downward vertically, although such veins, lodes, or ledges may so far depart from a perpendicular in their course downward as to extend outside the vertical side-lines of such surface locations. But their right of possession to such outside parts of such veins or ledges shall be confined to such portions thereof as lie between vertical planes drawn downward as above described, through the end-lines of their locations, so continued in their own direction that such planes will intersect such exterior parts of such veins or ledges. And nothing in this section shall authorize the locator or possessor of a vein or lode which extends in its downward course beyond the vertical lines of his claim to enter upon the surface of a claim owned or possessed by another.

Owners of tunnels, rights of.

10 May, 1872, c. 152, s. 4, v. 17, p. 92.

SEC. 2323. Where a tunnel is run for the development of a vein or lode, or for the discovery of mines, the owners of such tunnel shall have the right of possession of all veins or lodes within three thousand feet from the face of such tunnel on the line thereof, not previously known to exist, discovered in such tunnel, to the same extent as if discovered from the surface; and locations on the line of such tunnel of veins or lodes not appearing on the surface, made by other parties after the commencement of the tunnel, and while the same is being prosecuted with reasonable diligence, shall be invalid; but failure to prosecute the work on the tunnel for six months shall be considered as an abandonment of the right to all undiscovered veins on the line of such tunnel.

Regulations made by miners.

10 May, 1872, c. 152, s. 5, v. 17, p. 92.

SEC. 2324. The miners of each mining-district may make regulations not in conflict with the laws of the United States, or with the laws of the State or Territory in which the district is situated, governing the location, manner of recording, amount of work necessary to hold possession of a mining-claim, subject to the following requirements: The location must be distinctly marked on the ground so that its boundaries can be readily traced. All records of mining-claims hereafter made shall contain the name or names of the locators, the date of the location, and such a description of the claim or claims located by reference to some natural object or permanent monument as will identify the claim. On each claim located after the tenth day of May, eighteen hundred and seventy-two, and until a patent has been issued therefor, not less than one hundred dollars' worth of labor shall be performed or improvements

made during each year. On all claims located prior to the tenth day of May, eighteen hundred and seventy-two, ten dollars' worth of labor shall be performed or improvements made by the tenth day of June, eighteen hundred and seventy-four, and each year thereafter, for each one hundred feet in length along the vein until a patent has been issued therefor; but where such claims are held in common, such expenditure may be made upon any one claim; and upon a failure to comply with these conditions, the claim or mine upon which such failure occurred shall be open to relocation in the same manner as if no location of the same had ever been made, provided that the original locators, their heirs, assigns, or legal representatives, have not resumed work upon the claim after failure and before such location. Upon the failure of any one of several co-owners to contribute his proportion of the expenditures required hereby, the co-owners who have performed the labor or made the improvements may, at the expiration of the year, give such delinquent co-owner personal notice in writing, or notice by publication in the newspaper published nearest the claim, for at least once a week for ninety days, and if at the expiration of ninety days after such notice in writing or by publication such delinquent should fail or refuse to contribute his proportion of the expenditure required by this section, his interest in the claim shall become the property of his co-owners who have made the required expenditures. (*Amended June* 6, 1874, *February* 11, 1875, *and January* 22, 1880, *see pages* 993 *and* 994).

Patents for mineral lands, how obtained.

10 May, 1872, c. 152, s.6, v.17, p.92.

SEC. 2325. A patent for any land claimed and located for valuable deposits may be obtained in the following manner: Any person, association, or corporation authorized to locate a claim under this chapter, having claimed and located a piece of land for such purposes, who has, or have, complied with the terms of this chapter, may file in the proper land-office and application for a patent, under oath, showing such compliance, together with a plat and field-notes of the claim or claims in common, made by or under the direction of the United States surveyor-general, showing accurately the boundaries of the claim or claims, which shall be distinctly marked by monuments on the ground, and shall post a copy of such plat, together with a notice of such application for a patent, in a conspicuous place on the land embraced in such plat previous to the filing of the application for a patent, and shall file an affidavit of at least two persons that such notice has been duly posted, and shall file a copy of the notice in such land-office, and shall thereupon be entitled to a patent for the land, in the manner following: The register of the land-office, upon the filing of such application, plat, field-notes, notices, and affidavits, shall publish a notice that such application has been made, for the period of sixty days, in a newspaper to be by him designated as published nearest to such claim; and he shall also post such notice in his office for the same period. The claimant at the time of filing this application, or at any time thereafter, within the sixty days of publication, shall file with the register a certificate of the United States surveyor-general that five hundred dollars' worth of labor has been expended or improvements made upon the claim by himself or grantors; that the plat is correct, with such further description by such reference to natural objects or permanent monuments as shall identify the claim, and furnish an accurate description, to be incorporated in the patent. At the expiration of the sixty days of publication the claimant shall file his affidavit, showing that the plat and notice have been posted in a conspicuous place on the claim during such period of publication. If no adverse claim shall have been filed with the register and the receiver of the proper land-office at the expiration of the sixty days of publication, it shall be assumed that the applicant is entitled to a patent, upon the payment to the proper officer of five dollars per acre, and that no adverse claim exists; and thereafter no objection from third parties to the issuance of a patent shall be heard, except it be shown that the applicant has failed to comply with the terms of this chapter (*Amended January* 22, 1880, *see page* 994).

Adverse claim, proceedings on.

10 May, 1872, c. 152, s.7, v.17, p.93.

SEC. 2326. Where an adverse claim is filed during the period of publication, it shall be upon oath of the person or persons making the same, and shall show the nature, boundaries, and extent of such adverse claim, and all proceedings, except the publication of notice and making and filing of the affidavit thereof, shall be stayed until the controversy shall have been settled or decided by a court of competent jurisdiction, or the adverse claim waived. It shall be the duty of the adverse claimant, within thirty days after filing his claim, to commence

proceedings in a court of competent jurisdiction, to determine the question of the right of possession, and prosecute the same with reasonable diligence to final judgment; and a failure so to do shall be a waiver of his adverse claim. After such judgment shall have been rendered, the party entitled to the possession of the claim, or any portion thereof, may, without giving further notice, file a certified copy of the judgment-roll with the register of the land office, together with the certificate of the surveyor-general that the requisite amount of labor has been expended or improvements made thereon, and the description required in other cases, and shall pay to the receiver five dollars per acre for his claim, together with the proper fees, whereupon the whole proceedings and the judgment-roll shall be certified by the register to the Commissioner of the General Land Office, and a patent shall issue thereon for the claim, or such portion thereof as the applicant shall appear, from the decision of the court, to rightly possess. If it appears from the decision of the court that several parties are entitled to separate and different portions of the claim, each party may pay for his portion of the claim with the proper fees, and file the certificate and description by the surveyor-general, whereupon the register shall certify the proceedings and judgment-roll to the Commissioner of the General Land Office, as in the preceding case, and patents shall issue to the several parties according to their respective rights. Nothing herein contained shall be construed to prevent the alienation of a title conveyed by a patent for a mining claim to any person whatever. (*Amended March* 3, 1881, *see page* 994; *and April* 26, 1882, *see page* 1007.)

Description of vein-claims on surveyed and unsurveyed lands.

10 May, 1872, c. 152, s. 8, v. 17, p. 94.

SEC. 2327. The description of vein or lode claims, upon surveyed lands, shall designate the location of the claim with reference to the lines of the public surveys, but need not conform therewith; but where a patent shall be issued for claims upon unsurveyed lands, the surveyor-general, in extending the surveys, shall adjust the same to the boundaries of such patented claim, according to the plat or description thereof, but so as in no case to interfere with or change the location of any such patented claim.

Pending applications; existing rights.

10 May, 1872, c. 152, s. 9, v. 17, p. 94.

SEC. 2328. Applications for patents for mining-claims under former laws now pending may be prosecuted to a final decision in the General Land Office; but in such cases, where adverse rights are not affected thereby, patents may issue in pursuance of the provisions of this chapter; and all patents for mining-claims upon veins or lodes heretofore issued shall convey all the rights and privileges conferred by this chapter where no adverse rights existed on the tenth day of May, eighteen hundred and seventy-two.

Conformity of placer-claims to surveys, limit of.

9 July, 1870, c. 235, s. 12, v. 16, p. 217.

SEC. 2329. Claims usually called "placers," including all forms of deposit, excepting veins of quartz or other rock in place, shall be subject to entry and patent, under like circumstances and conditions, and upon similar proceedings, as are provided for vein or lode claims; but where the lands have been previously surveyed by the United States, the entry in its exterior limits shall conform to the legal subdivisions of the public lands.

Subdivisions of ten-acre tracts; maximum of placer locations.

9 July, 1870, c. 235, s. 12, v. 16, p. 217.

SEC. 2330. Legal subdivisions of forty acres may be subdivided into ten-acre tracts; and two or more persons, or associations of persons, having contiguous claims of any size, although such claims may be less than ten acres each, may make joint entry thereof; but no location of a placer-claim, made after the ninth day of July, eighteen hundred and seventy, shall exceed one hundred and sixty acres for any one person or association of persons, which location shall conform to the United States surveys; and nothing in this section contained shall defeat or impair any bona fide pre-emption or homestead claim upon agricultural lands, or authorize the sale of the improvements of any bona fide settler to any purchaser.

Conformity of placer-claims to surveys; limitation of claims.

10 May, 1872, c. 152, s. 10, v. 17, p. 94.

SEC. 2331. Where placer-claims are upon surveyed lands, and conform to legal subdivisions, no further survey or plat shall be required, and all placer-mining claims located after the tenth day of May, eighteen hundred and seventy-two, shall conform as near as practicable with the United States system of public-land surveys, and the rectangular subdivisions of such surveys, and no such location shall include more than twenty acres for each individual claimant; but where placer-claims cannot be conformed to legal subdivisions, survey and plat shall be made as on unsurveyed land; and where by the segregation of mineral lands in any legal subdivision a quantity of agricultural land less than forty acres remains, such fractional portion of agricultural land may be

entered, by any party qualified by law, for homestead or pre-emption purposes.

What evidence of possession, &c., to establish a right to a patent.

9 July, 1870, c. 235, s. 13, v. 16, p. 217.

SEC. 2332. Where such person or association, they and their grantors, have held and worked their claims for a period equal to the time prescribed by the statute of limitations for mining-claims of the State or Territory where the same may be situated, evidence of such possession and working of the claims for such period shall be sufficient to establish a right to a patent thereto under this chapter, in the absence of any adverse claim; but nothing in this chapter shall be deemed to impair any lien which may have attached in any way whatever to any mining-claim or property thereto attached prior to the issuance of a patent.

Proceedings for patent for placer-claim, &c.

10 May, 1872, c. 152, s. 11, v. 17, p. 94.

SEC. 2333. Where the same person, association, or corporation is in possession of a placer-claim, and also a vein or lode included within the boundaries thereof, application shall be made for a patent for the placer-claim, with the statement that it includes such vein or lode, and in such case a patent shall issue for the placer-claim, subject to the provisions of this chapter, including such vein or lode, upon the payment of five dollars per acre for such vein or lode claim, and twenty-five feet of surface on each side thereof. The remainder of the placer-claim, or any placer-claim not embracing any vein or lode claim, shall be paid for at the rate of two dollars and fifty cents per acre, together with all costs of proceedings; and where a vein or lode, such as is described in section twenty-three hundred and twenty, is known to exist within the boundaries of a placer-claim, an application for a patent for such placer-claim which does not include an application for the vein or lode claim shall be construed as a conclusive declaration that the claimant of the placer-claim has no right of possession of the vein or lode claim; but where the existence of a vein or lode in a placer-claim is not known, a patent for the placer-claim shall convey all valuable mineral and other deposits within the boundaries thereof.

Surveyor-general to appoint surveyors of mining-claims, &c.

10 May, 1872, c. 152, s. 12, v. 17, p. 95.

SEC. 2334. The surveyor-general of the United States may appoint in each land-district containing mineral lands as many competent surveyors as shall apply for appointment to survey mining-claims. The expenses of the survey of vein or lode claims, and the survey and subdivision of placer-claims into smaller quantities than one hundred and sixty acres, together with the cost of publication of notices, shall be paid by the applicants, and they shall be at liberty to obtain the same at the most reasonable rates, and they shall also be at liberty to employ any United States deputy surveyor to make the survey. The Commissioner of the General Land Office shall also have power to establish the maximum charges for surveys and publication of notices under this chapter; and, in case of excessive charges for publication, he may designate any newspaper published in a land-district where mines are situated for the publication of mining-notices in such district, and fix the rates to be charged by such paper; and, to the end that the Commissioner may be fully informed on the subject, each applicant shall file with the register a sworn statement of all charges and fees paid by such applicant for publication and surveys, together with all fees and money paid the register and the receiver of the land-office, which statement shall be transmitted, with the other papers in the case, to the Commissioner of the General Land Office.

Verification of affidavits, &c.

10 May, 1872, c. 152, s. 13, v. 17, p. 95.

SEC. 2335. All affidavits required to be made under this chapter may be verified before any officer authorized to administer oaths within the land-district where the claims may be situated, and all testimony and proofs may be taken before any such officer, and, when duly certified by the officer taking the same, shall have the same force and effect as if taken before the register and receiver of the land-office. In cases of contest as to the mineral or agricultural character of the land, the testimony and proofs may be taken as herein provided on personal notice of at least ten days to the opposing party; or if such party cannot be found, then by publication of at least once a week for thirty days in a newspaper, to be designated by the register of the land-office as published nearest to the location of such land; and the register shall require proof that such notice has been given.

Where veins intersect, &c.

10 May, 1872, c. 152, s. 14, v. 17, p. 96.

SEC. 2336. Where two or more veins intersect or cross each other, priority of title shall govern; and such prior location shall be entitled to all ore or mineral contained within the space of intersection; but the subsequent location shall have the right of way through the space of intersection for the purposes of the convenient working of the mine.

And where two or more veins unite, the oldest or prior location shall take the vein below the point of union, including all the space of intersection.

Patents for non-mineral lands, &c.

10 May, 1872, c. 152, s. 15, v. 17, p. 96.

SEC. 2337. Where non-mineral land not contiguous to the vein or lode is used or occupied by the proprietor of such vein or lode for mining or milling purposes, such non-adjacent surface-ground may be embraced and included in an application for a patent for such vein or lode, and the same may be patented therewith, subject to the same preliminary requirements as to survey and notice as are applicable to veins or lodes; but no location hereafter made of such non-adjacent land shall exceed five acres, and payment for the same must be made at the same rate as fixed by this chapter for the superficies of the lode. The owner of a quartz-mill or reduction-works, not owning a mine in connection therewith, may also receive a patent for his mill-site, as provided in this section.

What conditions of sale may be made by local legislature.

26 July, 1866, c. 262, s. 5, v. 14, p. 252.

SEC. 2338. As a condition of sale, in the absence of necessary legislation by Congress, the local legislature of any State or Territory may provide rules for working mines, involving easements, drainage, and other necessary means to their complete development; and those conditions shall be fully expressed in the patent.

Vested rights to use of water for mining, &c.; right of way for canals.

26 July, 1866, c. 262, s. 9, v. 14, p. 253.

SEC. 2339. Whenever, by priority of possession, rights to the use of water for mining, agricultural, manufacturing, or other purposes, have been vested and accrued, and the same are recognized and acknowledged by the local customs, laws, and the decisions of courts, the possessors and owners of such vested rights shall be maintained and protected in the same; and the right of way for the construction of ditches and canals for the purposes herein specified is acknowledged and confirmed; but whenever any person, in the construction of any ditch or canal, injures or damages the possession of any settler on the public domain, the party committing such injury or damage shall be liable to the party injured for such injury or damage.

Patents, pre-emptions, and homesteads subject to vested and accrued water-rights.

9 July, 1870, c. 235, s. 17, v. 16, p. 218.

SEC. 2340. All patents granted, or pre-emption or homesteads allowed, shall be subject to any vested and accrued water-rights, or rights to ditches and reservoirs used in connection with such water-rights, as may have been acquired under or recognized by the preceding section.

Mineral lands in which no valuable mines are discovered, open to homesteads.

26 July, 1866, c. 262, s. 10, v. 14, p. 253.

SEC. 2341. Wherever, upon the lands heretofore designated as mineral lands, which have been excluded from survey and sale, there have been homesteads made by citizens of the United States, or persons who have declared their intention to become citizens, which homesteads have been made, improved, and used for agricultural purposes, and upon which there have been no valuable mines of gold, silver, cinnabar, or copper discovered, and which are properly agricultural lands, the settlers or owners of such homesteads shall have a right of pre-emption thereto, and shall be entitled to purchase the same at the price of one dollar and twenty-five cents per acre, and in quantity not to exceed one hundred and sixty acres; or they may avail themselves of the provisions of chapter five of this Title, relating to "HOMESTEADS."

Mineral lands, how set apart as agricultural lands.

26 July, 1866, c. 262, s. 11, v. 14, p. 253.

SEC. 2342. Upon the survey of the lands described in the preceding section, the Secretary of the Interior may designate and set apart such portions of the same as are clearly agricultural lands, which lands shall thereafter be subject to pre-emption and sale as other public lands, and be subject to all the laws and regulations applicable to the same.

Additional land-districts and officers, power of the President to provide.

26 July, 1866, c. 262, s. 7, v. 14, p. 252.

SEC. 2343. The President is authorized to establish additional land-districts, and to appoint the necessary officers under existing laws, wherever he may deem the same necessary for the public convenience in executing the provisions of this chapter.

Provisions of this chapter not to affect certain rights.

10 May, 1872, c. 152, s. 16, v. 17, p. 96.

SEC. 2344. Nothing contained in this chapter shall be construed to impair, in any way, rights or interests in mining property acquired under existing laws; nor to affect the provisions of the act entitled "An act granting to A. Sutro the right of way and other privileges to aid in the construction of a draining and exploring tunnel to the Com-

9 July, 1870, c. 235, s. 17, v. 16, p. 218.

stock lode, in the State of Nevada," approved July twenty-five, eighteen hundred and sixty-six.

Mineral lands in certain States excepted.

18 Feb., 1873, c. 159, v. 17, p. 465.

SEC. 2345. The provisions of the preceding sections of this chapter shall not apply to the mineral lands situated in the States of Michigan, Wisconsin, and Minnesota, which are declared free and open to exploration and purchase according to legal subdivisions, in like manner as before the tenth day of May, eighteen hundred and seventy-two. And any bona fide entries of such lands within the States named since the tenth of May, eighteen hundred and seventy-two, may be patented without reference to any of the foregoing provisions of this chapter. Such lands shall be offered for public sale in the same manner, at the same minimum price, and under the same rights of pre-emption as other public lands.

Grants of lands to States or corporations not to include mineral lands.

30 Jan., 1865, Res. No. 10, v. 13, p. 567.

SEC. 2346. No act passed at the first session of the thirty-eighth Congress, granting lands to States or corporations to aid in the construction of roads, or for other purposes, or to extend the time of grants made prior to the thirtieth day of January, eighteen hundred and sixty-five, shall be so construed as to embrace mineral lands, which in all cases are reserved exclusively to the United States, unless otherwise specially provided in the act or acts making the grant.

REPEAL PROVISIONS.

TITLE LXXIV.

What Revised Statutes embrace.

SEC. 5595. The foregoing seventy-three titles embrace the statutes of the United States general and permanent in their nature, in force on the 1st day of December, one thousand eight hundred and seventy-three, as revised and consolidated by commissioners appointed under an act of Congress, and the same shall be designated and cited as The Revised Statutes of the United States.

Repeal of acts embraced in revision.

SEC. 5596. All acts of Congress passed prior to said first day of December, one thousand eight hundred and seventy-three, any portion of which is embraced in any section of said revision, are hereby repealed, and the section applicable thereto shall be in force in lieu thereof; all parts of such acts not contained in such revision having been repealed or superseded by subsequent acts, or not being general and permanent in their nature: *Provided*, That the incorporation into such revision of any general and permanent provision, taken from an act making appropriations, or from an act containing other provisions of a private, local, or temporary character, shall not repeal, or in any way affect any appropriation, or any provision of a private, local, or temporary character, contained in any of said acts, but the same shall remain in force; and all acts of Congress passed prior to said last-named day no part of which are embraced in said revision, shall not be affected or changed by its enactments.

Accrued rights reserved.

SEC. 5597. The repeal of the several acts embraced in said revision, shall not affect any act done, or any right accruing or accrued, or any suit or proceeding had or commenced in any civil cause before the said repeal, but all rights and liabilities under said acts shall continue, and may be enforced in the same manner, as if said repeal had not been made; nor shall said repeal in any manner affect the right to any office or change the term or tenure thereof.

Prosecutions and punishments.

SEC. 5598. All offenses committed, and all penalties or forfeitures incurred under any statute embraced in said revision prior to said repeal, may be prosecuted and punished in the same manner and with the same effect, as if said repeal had not been made.

Acts of limitation.

SEC. 5599. All acts of limitation, whether applicable to civil causes and proceedings, or to the prosecution of offenses, or for the recovery of penalties or forfeitures, embraced in said revision and covered by said appeal, shall not be affected thereby, but all suits, proceedings or prosecutions, whether civil or criminal, for causes arising, or acts done or committed prior to said repeal, may be commenced and prosecuted within the same time as if said repeal had not been made.

Arrangement and classification of sections.

SEC. 5600. The arrangement and classification of the several sections of the revision have been made for the purpose of a more convenient and orderly arrangement of the same, and therefore no inference or presumption of a legislative construction is to be drawn by reason of the Title under which any particular section is placed.

Acts passed since Dec. 1, 1873, not affected.

SEC. 5601. The enactment of the said revision is not to affect or repeal any act of Congress passed since the 1st day of December, one thousand eight hundred and seventy-three, and all acts passed since that date are to have full effect as if passed after the enactment of this revision, and so far as such acts vary from, or conflict with any provision contained in said revision, they are to have effect as subsequent statutes, and as repealing any portion of the revision inconsistent therewith.

Approved, June 22, 1874.

The following is an act of Congress approved June 6, 1874:

AN ACT to amend the act entitled "An act to premote the development of the mining resources of the United States," passed May tenth, eighteen hundred and seventy-two.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the provisions of the fifth section of the act entitled "An act to promote the development of the mining resources of the United States," passed May tenth, eighteen hundred and seventy-two, which requires expenditures of labor and improvements on claims located prior to the passage of said act, are hereby so amended that the time for the first annual expenditure on claims located prior to the passage of said act shall be extended to the first day of January, eighteen hundred and seventy-five.

The following is an act of Congress approved February 11, 1875:

AN ACT to amend section two thousand three hundred and twenty-four of the Revised Statutes, relating to the development of the mining resources of the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section two thousand three hundred and twenty-four of the Revised Statutes be, and the same is hereby amended so that where a person or company has or may run a tunnel for the purposes of developing a lode or lodes, owned by said person or company, the money so expended in said tunnel shall be taken and considered as expended on said lode or lodes, whether located prior to or since the passage of said act, and such person or company shall not be required to perform work on the surface of said lode or lodes in order to hold the same as required by said act.

The following is an act of Congress approved May 5, 1876:

AN ACT to exclude the States of Missouri and Kansas from the provisions of the act of Congress entitled "An act to promote the development of the mining resources of the United States," approved May tenth, eighteen hundred and seventy-two.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That within the States of Missouri and Kansas deposits of coal, iron, lead, or other mineral be, and they are hereby, excluded from the operation of the act entitled "An act to promote the development of the mining resources of the United States," approved May tenth, eighteen hundred and seventy-two, and all lands in said States shall be subject to disposal as agricultural lands.

The following is an act of Congress approved June 3, 1878:

AN ACT authorizing the citizens of Colorado, Nevada, and the Territories to fell and remove timber on the public domain for mining and domestic purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all citizens of the United States and other persons, bona fide residents of the State of Colorado or Nevada, or either of the Territories of New Mexico, Arizona, Utah, Wyoming, Dakota, Idaho, or Montana, and all other mineral districts of the United States, shall be and are hereby, authorized and permitted to fell and remove, for building, agricultural, mining, or other domestic purposes, any timber or other trees growing or being on the public lands, said lands being mineral, and not subject to entry under existing laws of the United States, except for mineral entry, in either of said States, Territories, or districts of which such citizens or persons may be at the time bona fide residents, subject to such rules and regulations as the Secretary of the Interior may prescribe for the protection of the timber and

of the undergrowth growing upon such lands, and for other purposes: *Provided*, The provisions of this act shall not extend to railroad corporations.

SEC. 2. That it shall be the duty of the register and the receiver of any local land office in whose district any mineral land may be situated to ascertain from time to time whether any timber is being cut or used upon any such lands, except for the purposes authorized by this act, within their respective land districts; and, if so, they shall immediately notify the Commissioner of the General Land Office of that fact; and all necessary expenses incurred in making such proper examinations shall be paid and allowed such register and receiver in making up their next quarterly accounts.

SEC. 3. Any person or persons who shall violate the provisions of this act, or any rules and regulations in pursuance thereof made by the Secretary of the Interior, shall be deemed guilty of a misdemeanor, and, upon conviction, shall be fined in any sum not exceeding five hundred dollars, and to which may be added imprisonment for any term not exceeding six months.

The following is an act of Congress approved Jannary 22, 1880:

AN ACT to amend sections twenty-three hundred and twenty-four and twenty-three hundred and twenty-five of the Revised Statutes of the United States concerning mineral lands.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section twenty-three hundred and twenty-five of the Revised Statutes of the United States be amended by adding thereto the following words: "*Provided*, That where the claimant for a patent is not a resident of or within the land-district wherein the vein, lode, ledge, or deposit sought to be patented is located, the application for patent and the affidavits required to be made in this section by the claimant for such patent may be made by his, her, or its authorized agent, where said agent is conversant with the facts sought to be established by said affidavits: *And provided*, That this section shall apply to all applications now pending for patents to mineral lands."

SEC. 2. That section twenty-three hundred and twenty-four of the Revised Statutes of the United States be amended by adding the following words: "*Provided*, That the period within which the work required to be done annually on all unpatented mineral claims shall commence on the first day of January succeeding the date of location of such claim, and this section shall apply to all claims located since the tenth day of May, anno Domini eighteen hundred and seventy-two."

The following is an act of Congress approved March 3, 1881:

AN ACT to amend section twenty-three hundred and twenty-six of the Revised Statutes relative to suits at law affecting the title to mining-claims.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That if, in any action brought pursuant to section twenty-three hundred and twenty-six of the Revised Statutes, title to the ground in controversy shall not be established by either party, the jury shall so find, and judgment shall be entered according to the verdict. In such case costs shall not be allowed to either party, and the claimant shall not proceed in the land-office or be entitled to a patent for the ground in controversy until he shall have perfected his title.

MINERAL LANDS OPEN TO EXPLORATION, OCCUPATION, AND PURCHASE.

1. It will be perceived that by the foregoing provisions of law the mineral lands in the public domain, surveyed or unsurveyed, are open to exploration, occupation, and purchase, by all citizens of the United States and all those who have declared their intention to become such.

STATUS OF LODE-CLAIMS LOCATED PRIOR TO MAY 10, 1872.

2. By an examination of the several sections of the Revised Statutes it will be seen that the *status* of lode-claims located *previous* to the 10th May, 1872, is not changed with regard to their *extent along the lode or width of surface.*

3. Mining rights acquired under such previous locations are, however, enlarged by said Revised Statutes in the following respect, viz: The locators of all such pre-

viously taken veins or lodes, their heirs and assigns, so long as they comply with the laws of Congress and with State, Territorial, or local regulations not in conflict therewith, governing mining-claims, are invested with the exclusive possessory right of all the surface included within the lines of their locations, and of all veins, lodes, or ledges throughout their entire depth, the top or apex of which lies inside of such surface-lines extended downward vertically, although such veins, lodes, or ledges may so far depart from a perpendicular in their course downward as to extend outside the vertical side-lines of such locations at the surface, it being expressly provided, however, that the right of possession to such outside parts of said veins or ledges shall be confined to such portions thereof as lie between vertical planes drawn downward, as aforesaid, through the end-lines of their locations so continued in their own direction that such planes will intersect such exterior parts of such veins, lodes, or ledges; no right being granted, however, to the claimant of such outside portion of a vein or ledge to enter upon the surface location of another claimant.

4. It is to be distinctly understood, however, that the law limits the possessory right to veins, lodes, or ledges, *other* than the one named in the original location, to such as were not *adversely claimed on May* 10, 1872, and that where such other vein or ledge was so adversely claimed at that date, the right of the party so adversely claiming is in no way impaired by the provisions of the Revised Statutes. (*Amended, see paragraph* 6, *page* 1010.)

5. In order to hold the possessory title to a mining-claim located prior to May 10, 1872, and for which a patent has not been issued, the law requires that *ten dollars* shall be expended annually in labor or improvements on each claim of *one hundred feet* on the course of the vein or lode until a patent shall have been issued therefor; but where a number of such claims are held in common upon the same vein or lode the aggregate expenditure that would be necessary to hold all the claims, at the rate of ten dollars per hundred feet, may be made upon any one claim; a failure to comply with this requirement in any one year subjecting the claim upon which such failure occurred to relocation by other parties, the same as if no previous location thereof had ever been made, unless the claimants under the original location shall have resumed work thereon after such failure and before such relocation. The first annual expenditure upon claims of this class should have been performed subsequent to May 10, 1872, and prior to January 1, 1875. From and after January 1, 1875, the required amount must be expended *annually* until patent issues. By decision of the honorable Secretary of the Interior, dated March 4, 1879, such annual expenditures are not required subsequent to entry, the date of issuing the patent certificate being the date contemplated by statute. (*Amended, see paragraph* 6, *page* 1010.)

6. Upon the failure of any one of several co-owners of a vein, lode, or ledge, which has not been entered, to contribute his proportion of the expenditures necessary to hold the claim or claims so held in ownership in common, the co-owners who have performed the labor, or made the improvements, as required by said Revised Statutes, may, at the expiration of the year, give such delinquent co-owner personal notice in writing, or notice by publication in the newspaper published nearest the claim, for at least once a week for ninety days; and if upon the expiration of ninety days after such notice in writing, or upon the expiration of one hundred and eighty days after the first newspaper publication of notice, the delinquent co-owner shall have failed to contribute his proportion to meet such expenditures or improvements, his interest in the claim by law passes to his co-owners, who have made the expenditures or improvements as aforesaid. Where a claimant alleges ownership of a forfeited interest under the foregoing provision, the sworn statement of the publisher as to the facts of publication, giving dates and a printed copy of the notice published, should be furnished, and the claimant must swear that the delinquent co-owner failed to contribute his proper proportion within the period fixed by the statute.

PATENTS FOR VEINS OR LODES HERETOFORE ISSUED.

7. Rights under patents for veins or lodes heretofore granted under previous legislation of Congress are enlarged by the Revised Statutes so as to invest the patentee, his heirs or assigns, with title to all veins, lodes, or ledges, throughout their entire depth, the top or apex of which lies within the end and side boundary lines of his claim on the surface, as patented, extended downward vertically, although such veins, lodes, or ledges may so far depart from a perpendicular in their course downward as to extend outside the vertical side-lines of the claim at the surface. The right of possession to such outside parts of such veins or ledges to be confined to such portions thereof as lie between vertical planes drawn downward through the end-lines of the claims at the surface, so continued in their own direction that such planes will intersect such exterior parts of such veins or ledges, it being expressly provided, however, that all veins, lodes, or ledges, the top or apex of which lies inside such surface locations, *other* than the one named in the patent, which were *adversely claimed on the* 10*th May*, 1872, are excluded from such conveyance by patent.

8. Applications for patents for mining-claims pending at the date of the act of May 10, 1872, may be prosecuted to final decision in the General Land Office, and where no adverse rights are affected thereby, patents will be issued in pursuance of the provisions of the Revised Statutes.

MANNER OF LOCATING CLAIMS ON VEINS OR LODES AFTER MAY 10, 1872.

9. From and after the 10th May, 1872, any person who is a citizen of the United States or who has declared his intention to become a citizen, may locate, record, and hold a mining-claim of *fifteen hundred linear feet* along the course of any mineral vein or lode subject to location; or an association of persons, severally qualified as above, may make joint location of such claim of *fifteen hundred feet*, but in no event can a location of a vein or lode made subsequent to May 10, 1872, exceed fifteen hundred feet along the course thereof, whatever may be the number of persons composing the association.

10. With regard to the extent of surface-ground adjoining a vein or lode, and claimed for the convenient working thereof, the Revised Statutes provide that the lateral extent of locations of veins or lodes made after May 10, 1872, shall in no case *exceed three hundred feet on each side of the middle of the vein at the surface*, and that no such surface-rights shall be limited by any mining regulations to less than twenty-five feet on each side of the middle of the vein at the surface, except where adverse rights existing on the 10th May, 1872, may render such limitation necessary; the end-lines of such claims to be in all cases parallel to each other. Said lateral measurements cannot extend beyond three hundred feet on *either* side of the middle of the vein at the surface, or such distance as is allowed by local laws. For example: 400 feet cannot be taken on one side and 200 feet on the other. If, however, 300 feet on each side are allowed, and by reason of prior claims but 100 feet can be taken on one side, the locator will not be restricted to less than 300 feet on the other side; and when the locator does not determine by exploration *where* the middle of the vein at the surface is, his discovery shaft must be assumed to mark such point.

11. By the foregoing it will be perceived that no lode-claim located after the 10th May, 1872, can exceed a parallelogram fifteen hundred feet in length by six hundred feet in width, but whether surface-ground of that width can be taken depends upon the local regulations or State or Territorial laws in force in the several mining-districts; and that no such local regulations or State or Territorial laws shall limit a vein or lode claim to less than fifteen hundred feet along the course thereof, whether the location is made by one or more persons, nor can surface rights be limited to less than fifty feet in width, unless adverse claims existing on the 10th day of May, 1872, render such lateral limitation necessary.

12. It is provided by the Revised Statutes that the miners of each district may make rules and regulations not in conflict with the laws of the United States, or of the State or Territory in which such districts are respectively situated, governing the location, manner of recording, and amount of work necessary to hold possession of a claim. They likewise require that the location shall be so distinctly marked on the ground that its boundaries may be readily traced. This is a very important matter, and locators cannot exercise too much care in defining their locations at the outset, inasmuch as the law requires that all records of mining locations made subsequent to May 10, 1872, shall contain the name or names of the locators, the date of the location, and such a *description of the claim or claims* located, by reference to some natural object or permanent monument, as will identify the claim.

13. The statutes provide that no lode-claim shall be recorded until after the discovery of a vein or lode within the limits of the claim located, the object of which provision is evidently to prevent the appropriation of presumed mineral ground for speculative purposes to the exclusion of *bona fide* prospectors, before sufficient work has been done to determine whether a vein or lode really exists.

14. The claimant should, therefore, prior to locating his claim, unless the vein can be traced upon the surface, sink a shaft, or run a tunnel or drift, to a sufficient depth therein to discover and develop a mineral-bearing vein, lode, or crevice; should determine, if possible, the general course of such vein in either direction from the point of discovery, by which direction he will be governed in marking the boundaries of his claim on the surface. His location notice should give the course and distance as nearly as practicable from the discovery-shaft on the claim, to some permanent, well-known points or objects, such, for instance, as stone monuments, blazed trees, the confluence of streams, point of intersection of well-known gulches, ravines, or roads, prominent buttes, hills, &c., which may be in the immediate vicinity, and which will serve to perpetuate and fix the *locus* of the claim and render it susceptible of identification from the description thereof given in the record of locations in the district, and should be duly recorded.

15. In addition to the foregoing data, the claimant should state the names of adjoining claims, or, if none adjoin, the relative positions of the nearest claims; should

drive a post or erect a monument of stones at each corner of his surface-ground, and at the point of discovery or discovery-shaft should fix a post, stake, or board, upon which should be designated the name of the lode, the name or names of the locators, the number of feet claimed, and in which direction from the point of discovery; it being essential that the location notice filed for record, in addition to the foregoing description, should state whether the entire claim of fifteen hundred feet is taken on one side of the point of discovery, or whether it is partly upon one and partly upon the other side thereof, and in the latter case, how many feet are claimed upon each side of such discovery-point.

16. Within a reasonable time, say twenty days after the location shall have been marked on the ground, or such time as is allowed by the local laws, notice thereof, accurately describing the claim in manner aforesaid, should be filed for record with the proper recorder of the district, who will thereupon issue the usual certificate of location.

17. In order to hold the possessory right to a location made since May 10, 1872, not less than one hundred dollars' worth of labor must be performed, or improvements made thereon annually until entry shall have been made. Under the provisions of the act of Congress approved January 22, 1880, the first annual expenditure becomes due and must be performed during the calendar year succeeding that in which the location was made. Expenditure made or labor performed prior to the first day of January succeeding the date of location will not be considered as a part of, or applied upon, the first annual expenditure required by law. Failure to make the expenditure or perform the labor required will subject the claim to relocation by any other party having the necessary qualifications, unless the original locator, his heirs, assigns, or legal representatives have resumed work thereon after such failure and before such relocation.

18. The expenditures required upon mining-claims may be made from the surface or in running a tunnel for the development of such claims, the act of February 11, 1875, providing that where a person or company has, or may, run a tunnel for the purpose of developing a lode or lodes owned by said person or company, the money so expended in said tunnel shall be taken and considered as expended on said lode or lodes, and such person or company shall not be required to perform work on the surface of said lode or lodes in order to hold the same.

19. The importance of attending to these details in the matter of location, labor, and expenditure will be more readily perceived when it is understood that a failure to give the subject proper attention may invalidate the claim.

TUNNEL RIGHTS.

20. Section 2323 provides that where a tunnel is run for the development of a vein or lode, or for the discovery of mines, the owners of such tunnel shall have the right of possession of all veins or lodes within three thousand feet from the face of such tunnel on the line thereof, not previously known to exist, discovered in such tunnel, to the same extent as if discovered from the surface; and locations on the line of such tunnel of veins or lodes not appearing on the surface, made by other parties after the commencement of the tunnel, and while the same is being prosecuted with reasonable diligence, shall be invalid; but failure to prosecute the work on the tunnel for six months shall be considered as an abandonment of the right to all undiscovered veins or lodes on the line of said tunnel.

21. The effect of this is simply to give the proprietors of a mining-tunnel run in good faith the possessory right to fifteen hundred feet of any blind lodes cut, discovered, or intersected by such tunnel, which were not previously known to exist, within three thousand feet from the face or point of commencement of such tunnel, and to prohibit other parties, after the commencement of the tunnel, from prospecting for and making locations of lodes on the *line thereof* and within said distance of three thousand feet, unless such lodes appear upon the surface or were previously known to exist.

22. The term "face," as used in said section, is construed and held to mean the first working-face formed in the tunnel, and to signify the point at which the tunnel actually enters cover; it being from this point that the three thousand feet are to be counted, upon which prospecting is prohibited as aforesaid.

23. To avail themselves of the benefits of this provision of law, the proprietors of a mining-tunnel will be required, at the time they enter cover as aforesaid, to give proper notice of their tunnel location by erecting a substantial post, board, or monument at the face or point of commencement thereof, upon which should be posted a good and sufficient notice, giving the names of the parties or company claiming the tunnel-right; the actual or proposed course or direction of the tunnel; the height and width thereof, and the course and distance from such face or point of commencement to some permanent well-known objects in the vicinity by which to fix and determine the *locus* in manner heretofore set forth applicable to locations of veins or

lodes, and at the time of posting such notice they shall, in order that miners or prospectors may be enabled to determine whether or not they are within the lines of the tunnel, establish the boundary lines thereof, by stakes or monuments placed along such lines at proper intervals, to the terminus of the three thousand feet from the face or point of commencement of the tunnel, and the lines so marked will define and govern as to the specific boundaries within which prospecting for lodes not previously known to exist is prohibited while work on the tunnel is being prosecuted with reasonable diligence.

24. At the time of posting notice and marking out the lines of the tunnel as aforesaid, a full and correct copy of such notice of location defining the tunnel-claim must be filed for record with the mining recorder of the district, to which notice must be attached the sworn statement or declaration of the owners, claimants, or projectors of such tunnel, setting forth the facts in the case; stating the amount expended by themselves and their predecessors in interest in prosecuting work thereon; the extent of the work performed, and that it is *bona fide* their intention to prosecute work on the tunnel so located and described with reasonable diligence for the development of a vein or lode, or for the discovery of mines, or both, as the case may be. This notice of location must be duly recorded, and, with the said sworn statement attached, kept on the recorder's files for future reference.

25. By a compliance with the foregoing much needless difficulty will be avoided, and the way for the adjustment of legal rights acquired in virtue of said section 2323 will be made much more easy and certain.

26. This office will take particular care that no improper advantage is taken of this provision of law by parties making or professing to make tunnel locations, ostensibly for the purposes named in the statute, but really for the purpose of monopolizing the lands lying in front of their tunnels to the detriment of the mining interests and to the exclusion of *bona fide* prospectors or miners, but will hold such tunnel claimants to a strict compliance with the terms of the statutes; and a *reasonable diligence* on their part in prosecuting the work is one of the essential conditions of their implied contract. Negligence or want of due diligence will be construed as working a forfeiture of their right to all undiscovered veins on the line of such tunnel.

MANNER OF PROCEEDING TO OBTAIN GOVERNMENT TITLE TO VEIN OR LODE CLAIMS.

27. By section 2325 authority is given for granting titles for mines by patent from the Government to any person, association, or corporation having the necessary qualifications as to citizenship and holding the right of possession to a claim in compliance with law.—*Amended, see page* 1010, *paragraphs* 1, 2, 3.

28. The claimant is required in the first place to have a correct survey of his claim made under authority of the surveyor-general of the State or Territory in which the claim lies; such survey to show with accuracy the exterior surface boundaries of the claim, which boundaries are required to be distinctly marked by monuments on the ground. Four plats and one copy of the original field-notes, in each case, will be prepared by the surveyor-general; one plat and the original field-notes to be retained in the office of the surveyor-general, one copy of the plat to be given the claimant for posting upon the claim, one plat and a copy of the field-notes to be given the claimant for filing with the proper register, to be finally transmitted by that officer, with other papers in the case, to this office, and one plat to be sent by the surveyor-general to the register of the proper land-district to be retained on his files for future reference.

29. The claimant is then required to post a copy of the plat of such survey in a conspicuous place upon the claim, together with notice of his intention to apply for a patent therefor, which notice will give the date of posting, the name of the claimant, the name of the claim, mine, or lode; the mining-district and county; whether the location is of record, and, if so, where the record may be found; the number of feet claimed along the vein and the presumed direction thereof; the number of feet claimed on the lode in each direction from the point of discovery, or other well-defined place on the claim; the name or names of adjoining claimants on the same or other lodes; or, if none adjoin, the names of the nearest claims, &c.

30. After posting the said plat and notice upon the premises, the claimant will file with the proper register and receiver a copy of such plat, and the field-notes of survey of the claim, accompanied by the affidavit of at least two credible witnesses, that such plat and notice are posted conspicuously upon the claim, giving the date and place of such posting; a copy of the *notice* so posted to be attached to, and form a part of, said affidavit.

31. Attached to the field-notes so filed must be the sworn statement of the claimant that he has the possessory right to the premises therein described, in virtue of a compliance by himself (and by his grantors, if he claims by purchase) with the mining rules, regulations, and customs of the mining district, State, or Territory in which the claim lies, and with the mining laws of Congress; such sworn statement to nar-

rate briefly, but as clearly as possible, the facts constituting such compliance, the origin of his possession, and the basis of his claim to a patent.

32. This affidavit should be supported by appropriate evidence from the mining recorder's office as to his possessory right, as follows, viz: Where he claims to be a locator, a full, true, and correct copy of such location should be furnished, as the same appears upon the mining records; such copy to be attested by the seal of the recorder, or if he has no seal, then he should make oath to the same being correct, as shown by his records; where the applicant claims as a locator in company with others who have since conveyed their interests in the lode to him, a copy of the original record of location should be filed, together with an abstract of title from the proper recorder, under seal or oath as aforesaid, tracing the co-locator's possessory rights in the claim to such applicant for patent; where the applicant claims only as a purchaser for valuable consideration, a copy of the location record must be filed, under seal or upon oath as aforesaid, with an abstract of title certified as above by the proper recorder, tracing the right of possession by a continuous chain of conveyances from the original locators to the applicant, also certifying that no conveyances affecting the title to the claim in question appear of record in his office other than those set forth in the accompanying abstract.

33. In the event of the mining records in any case having been destroyed by fire or otherwise lost, affidavit of the fact should be made, and secondary evidence of possessory title will be received, which may consist of the affidavit of the claimant, supported by those of any other parties cognizant of the facts relative to his location, occupancy, possession, improvements, &c.; and in such case of lost records, any deeds, certificates of location or purchase, or other evidence which may be in the claimant's possession, and tend to establish his claim, should be filed.

34. Upon the receipt of these papers the register will, at the expense of the claimant (who must furnish the agreement of the publisher to hold applicant for patent alone responsible for charges of publication), publish a notice of such application for the period of sixty days, in a newspaper published nearest to the claim; and will post a copy of such notice in his office for the same period. In all cases sixty days must intervene between the first and the last insertion of the notice in such newspaper. When the notice is published in a *weekly* newspaper ten consecutive insertions are necessary; when in a *daily* newspaper the notice must appear in each issue for the required period.

35. The notices so published and posted must be as full and complete as possible, and embrace all the *data* given in the notice posted upon the claim.

36. Too much care cannot be exercised in the preparation of these notices, inasmuch as upon their accuracy and completeness will depend, in a great measure, the regularity and validity of the whole proceeding.

37. The claimant, either at the time of filing these papers with the register, or at any time during the sixty days' publication, is required to file a certificate of the surveyor-general that not less than five hundred dollars' worth of labor has been expended or improvements made upon the claim by the applicant or his grantors; that the plat filed by the claimant is correct; that the field-notes of the survey, as filed, furnish such an accurate description of the claim as will, if incorporated into a patent, serve to fully identify the premises, and that such reference is made therein to natural objects or permanent monuments as will perpetuate and fix the *locus* thereof.

38. It will be the more convenient way to have this certificate indorsed by the surveyor-general, both upon the plat and field-notes of survey filed by the claimant as aforesaid.

39. After the sixty days' period of newspaper publication has expired the claimant will file his affidavit, showing that the plat and notice aforesaid remained conspicuously posted upon the claim sought to be patented during said sixty days' publication, giving the dates.

40. Upon the filing of this affidavit the register will, if no adverse claim was filed in his office during the period of publication, permit the claimant to pay for the land according to the area given in the plat and field-notes of survey aforesaid, at the rate of five dollars for each acre and five dollars for each fractional part of an acre, the receiver issuing the usual duplicate receipt therefor. The claimant will also make a sworn statement of all charges and fees paid by him for publication and surveys, together with all fees and money paid the register and receiver of the land-office; after which the whole matter will be forwarded to the Commissioner of the General Land Office and a patent issued thereon if found regular.

41. In sending up the papers in the case the register must not omit certifying to the fact that the notice was posted in his office for the full period of sixty days, such certificate to state distinctly when such posting was done and how long continued.

42. The consecutive series of numbers of mineral entries must be continued, whether the same are of lode or placer claims.

43. The surveyor-general must continue to designate all surveyed mineral claims

as heretofore by a progressive series of numbers, beginning with lot No. 37 in each township; the claim to be so designated at date of filing the plat, field-notes, &c., in addition to the local designation of the claim; it being required in all cases that the plat and field-notes of the survey of a claim must, in addition to the reference to permanent objects in the neighborhood, describe the *locus* of the claim with reference to the lines of public surveys by a line connecting a corner of the claim with the nearest public corner of the United States surveys, unless such claim be on unsurveyed lands at a remote distance from such public corner, in which latter case the reference by course and distance to permanent objects in the neighborhood will be a sufficient designation by which to fix the *locus* until the public surveys shall have been closed upon its boundaries.

ADVERSE CLAIMS.

44. Section 2326 provides for adverse claims, fixes the time within which they shall be filed to have legal effect, and prescribes the manner of their adjustment.

45. Said section requires that the adverse claim shall be filed during the period of publication of notice; that it must be on the oath of the adverse claimant; and that it must show the "*nature*," the "*boundaries*," and the "*extent*" of the adverse claim.

46. In order that this section of law may be properly carried into effect, the following is communicated for the information of all concerned:

47. An adverse mining-claim must be filed with the register of the same land office with whom the application for patent was filed, or in his absence with the receiver, and within the sixty days' period of newspaper publication of notice.

48. The adverse notice must be duly sworn to by the person or persons making the same before an officer authorized to administer oaths within the land-district, or before the register or receiver; it will fully set forth the nature and extent of the interference or conflict; whether the adverse party claims as a purchaser for valuable consideration or a locator; if the former, a certified copy of the original location, the original conveyance, a duly certified copy thereof, or an abstract of title from the office of the proper recorder should be furnished, or if the transaction was a mere verbal one he will narrate the circumstances attending the purchase, the date thereof, and the amount paid, which facts should be supported by the affidavit of one or more witnesses, if any were present at the time, and if he claims as a locator he must file a duly certified copy of the location from the office of the proper recorder. (*Amended, see circular of May* 9, 1882, *page* 1007.)

49. In order that the "*boundaries*" and "*extent*" of the claim may be shown, it will be incumbent upon the adverse claimant to file a plat showing his entire claim, its relative situation or position with the one against which he claims, and the extent of the conflict. This plat must be made from an actual survey by a United States deputy surveyor, who will officially certify thereon to its correctness; and in addition there must be attached to such plat of survey a certificate or sworn statement by the surveyor as to the approximate value of the labor performed or improvements made upon the claim by the adverse party or his predecessors in interest, and the plat must indicate the position of any shafts, tunnels, or other improvements, if any such exist, upon the claim of the party opposing the application, and by which party said improvements were made.

50. Upon the foregoing being filed within the sixty days as aforesaid, the register, or in his absence the receiver, will give notice in writing to *both parties* to the contest, that such adverse claim has been filed, informing them that the party who filed the adverse claim will be required within thirty days from the date of such filing to commence proceedings in a court of competent jurisdiction to determine the question of right of possession, and to prosecute the same with reasonable diligence to final judgment, and that should such adverse claimant fail to do so, his adverse claim will be considered waived, and the application for patent be allowed to proceed upon its merits.

51. When an adverse claim is filed as aforesaid, the register or receiver will indorse upon the same the precise date of filing, and preserve a record of the date of notifications issued thereon; and thereafter all proceedings on the application for patent will be suspended, with the exception of the completion of the publication and posting of notices and plat, and the filing of the necessary proof thereof, until the controversy shall have been adjudicated in court, or the adverse claim waived or withdrawn.

52. The proceedings after rendition of judgment by the court in such case are so clearly defined by the act itself as to render it unnecessary to enlarge thereon in this place.

(*Paragraphs* 53 *to* 60 *amended, see circular of September* 22, 1882, *page* 1007.)

53. The proceedings to obtain patents for claims usually called placers, including all forms of deposit, are similar to the proceedings prescribed for obtaining patents for vein or lode claims; but where said placer-claim shall be upon surveyed lands, and

conform to legal subdivisions, no further survey or plat will be required, and all placer-mining claims located after May 10, 1872, shall conform as nearly as practicable with the United States system of public-land surveys and the rectangular subdivisions of such surveys, and no such location shall include more than twenty acres for each individual claimant; but where placer-claims cannot be conformed to legal subdivisions, survey and plat shall be made as on unsurveyed lands. But where such claims are located previous to the public surveys, and do not conform to legal subdivisions, survey, plat, and entry thereof may be made according to the boundaries thereof, provided the location is in all respects legal.

54. The proceedings for obtaining patents for veins or lodes having already been fully given, it will not be necessary to repeat them here; it being thought that careful attention thereto by applicants and the local officers will enable them to act understandingly in the matter and make such slight modifications in the notice, or otherwise, as may be necessary in view of the different nature of the two classes of claims, placer-claims being fixed, however, at two dollars and fifty cents per acre, or fractional part of an acre.

55. By section 2330, authority is given for the subdivision of forty-acre legal subdivisions into *ten-acre* lots, which is intended for the greater convenience of miners in segregating their claims both from one another and from intervening agricultural lands.

56. It is held, therefore, that under a proper construction of the law these ten-acre lots in mining-districts should be considered and dealt with, to all intents and purposes, as legal subdivisions, and that an applicant having a legal claim which conforms to one or more of these ten-acre lots, either adjoining or cornering, may make entry thereof, after the usual proceedings, without further survey or plat.

57. In cases of this kind, however, the notice given of the application must be very specific and accurate in description, and as the forty-acre tracts may be subdivided into ten-acre lots, either in the form of squares of ten by ten chains, or of parallelograms five by twenty chains, so long as the lines are parallel and at right angles with the lines of the public surveys, it will be necessary that the notice and application state specifically what ten-acre lots are sought to be patented, in addition to the other *data* required in the notice.

58. Where the ten-acre subdivision is in the form of a square it may be described, for instance, as the "S. E. ¼ of the S. W. ¼ of N. W. ¼," or, if in the form of a parallelogram as aforesaid, it may be described as the "W. ½ of the W. ½ of the S. W. ¼ of the N. W. ¼ (or the N. ½ of the S. ½ of the N. E. ¼ of the S. E. ¼) of section ———, township ———, range ———," as the case may be; but, in addition to this description of the land, the notice must give all the other *data* that is required in a mineral application, by which parties may be put on inquiry as to the premises sought to be patented. The proof submitted with applications for claims of this kind must show clearly the character and the extent of the improvements upon the premises.

Inasmuch as the surveyor-general has no duty to perform in connection with the entry of a placer claim of legal subdivisions, the proof of improvements must show their value to be not less than *five hundred dollars* and that they were made by the applicant for patent or his grantor.

54. Applicants for patent to a placer-claim, who are also in possession of a known vein or lode included therein, must state in their application that the placer includes such vein or lode. The published and posted notices must also include such statement; and the vein or lode must be surveyed and marked upon the plat; the field-notes and plat giving the area of the lode claim or claims and the area of the placer separately. If veins or lodes lying within a placer location are owned by other parties, the fact should be distinctly stated in the application for patent, and in all the notices. It should be remembered that an application which omits to include an application for a known vein or lode therein, must be construed as a conclusive declaration that the applicant has no right of possession to the vein or lode. Where there is no known lode or vein, the fact must appear by affidavit of claimant and one or more witnesses.

60. When an adverse claim is filed to a placer application, the proceedings are the same as in the case of vein or lode claims, already described.—*Paragraphs* 53 *to* 60 *amended, see circular of September* 22, 1882, *pages* 1007, 1008.

QUANTITY OF PLACER GROUND SUBJECT TO LOCATION.

61. By section 2330 it is declared that no location of a placer-claim, made after July 9, 1870, shall exceed one hundred and sixty acres for any one person or association of persons, which location shall conform to the United States surveys.

62. Section 2331 provides that all placer mining-claims located after May 10, 1872, shall conform as nearly as practicable with the United States system of public surveys and the subdivisions of such surveys, and no such locations shall include more than twenty acres for each individual claimant.

63. The foregoing provisions of law are construed to mean that after the 9th day of July, 1870, no location of a placer-claim can be made to exceed one hundred and sixty acres, whatever may be the number of locators associated together, or whatever the local regulations of the district may allow; and that from and after May 10, 1872, no location made by an individual can exceed twenty acres, and no location made by an association of individuals can exceed one hundred and sixty acres, which location of one hundred and sixty acres cannot be made by a less number than eight *bona fide* locators; and no local laws or mining regulations can restrict a placer location to less than twenty acres, although the locator is not compelled to take so much,

64. The regulations hereinbefore given as to the manner of marking locations on the ground, and placing the same on record, must be observed in the case of placer locations, so far as the same are applicable; the law requiring, however, that where placer-claims are upon *surveyed* public lands the locations must hereafter be made to conform to legal subdivisions thereof as near as practicable.

65. With regard to the proofs necessary to establish the possessory right to a placer-claim, section 2332 provides that "where such person or association, they and their grantors, have held and worked their claims for a period equal to the time prescribed by the statute of limitations for mining-claims of the State or Territory where the same may be situated, evidence of such possession and working of the claims for such period shall be sufficient to establish a right to a patent thereto under this chapter, in the absence of any adverse claim."

66. This provision of law will greatly lessen the burden of proof, more especially in the case of old claims located many years since, the records of which, in many cases, have been destroyed by fire, or lost in other ways during the lapse of time, but concerning the possessory right to which all controversy or litigation has long been settled.

67. When an applicant desires to make his proof of possessory right in accordance with this provision of law, you will not require him to produce evidence of location, copies of conveyances, or abstract of title, as in other cases, but will require him to furnish a duly certified copy of the statute of limitations of mining-claims for the State or Territory, together with his sworn statement giving a clear and succinct narration of the facts as to the origin of his title, and likewise as to the continuation of his possession of the mining-ground covered by his application; the area thereof, the nature and extent of the mining that has been done thereon; whether there has been any opposition to his possession, or litigation with regard to his claim, and, if so, when the same ceased; whether such cessation was caused by compromise or by judicial decree, and any additional facts within the claimant's knowledge having a direct bearing upon his possession and *bona fides* which he may desire to submit in support of his claim.—*Amended, see paragraph* 8, *page* 1010.

68. There should likewise be filed a certificate, under seal of the court having jurisdiction of mining cases within the judicial district embracing the claim, that no suit or action of any character whatever involving the right of possession to any portion of the claim applied for is pending, and that there has been no litigation before said court affecting the title to said claim or any part thereof for a period equal to the time fixed by the statute of limitations for mining-claims in the State or Territory as aforesaid, other than that which has been finally decided in favor of the claimant.—*Amended as above.*

69. The claimant should support his narrative of facts relative to his possession, occupancy, and improvements by corrobative testimony of any disinterested person or persons of credibility who may be cognizant of the facts in the case and are capable of testifying understandingly in the premises.—*Amended as above.*

70. It will be to the advantage of claimants to make their proofs as full and complete as practicable.

MILL-SITES.

71. Section 2337 provides that, "where non-mineral land not contiguous to the vein or lode is used or occupied by the proprietor of such vein or lode for mining or milling purposes, such non-adjacent surface-ground may be embraced and included in an application for a patent for such vein or lode, and the same may be patented therewith, subject to the same preliminary requirements as to survey and notice as are applicable to veins or lodes; but no location hereafter made of such non-adjacent land shall exceed five acres, and payment for the same must be made at the same rate as fixed by this chapter for the superficies of the lode. The owner of a quartz-mill or reduction-works, not owning a mine in connection therewith, may also receive a patent for his mill-site, as provided in this section."

72. To avail themselves of this provision of law, parties holding the possessory right to a vein or lode, and to a piece of non-mineral land not contiguous thereto, for mining or milling purposes, not exceeding the quantity allowed for such purpose by section 2337 United States Revised Statutes, or prior laws, under which the land was appropriated, the proprietors of such vein or lode may file in the proper land-office their application for a patent, under oath, in manner already set forth herein, which application, together with the plat and field-notes, may include, embrace, and describe, in

addition to the vein or lode, such non-contiguous mill-site, and after due proceedings as to notice, &c., a patent will be issued conveying the same as one claim.

73. In making the survey in a case of this kind, the lode-claim should be described in the plat and field-notes as "Lot No. 37, A," and the mill-site as "Lot No. 37, B," or whatever may be its appropriate numerical designation; the course and distance from a corner of the mill-site to a corner of the lode-claim to be invariably given in such plat and field-notes, and a copy of the plat and notice of application for patent must be conspicuously posted upon the mill-site as well as upon the vein or lode for the statutory period of sixty days. In making the entry no separate receipt or certificate need be issued for the mill-site, but the whole area of both lode and mill-site will be embraced in one entry, the price being five dollars for each acre and fractional part of an acre embraced by such lode or mill-site claim.

74. In case the owner of a quartz-mill or reduction-works is not the owner or claimant of a vein or lode, the law permits him to make application therefor in the same manner prescribed herein for mining-claims, and after due notice and proceedings, in the absence of a valid adverse filing, to enter and receive a patent for his mill-site at said price per acre.

75. In every case there must be satisfactory proof that the land claimed as a mill-site is not mineral in character, which proof may, where the matter is unquestioned, consist of the sworn statement of the claimant, supported by that of one or more disinterested persons capable from an acquaintance with the land to testify understandingly.

76. The law expressly limits mill-site locations made from and after its passage to *five acres*.

77. The registers and receivers will preserve an unbroken consecutive series of numbers for all mineral entries.

PROOF OF CITIZENSHIP OF MINING-CLAIMANTS.

78. The proof necessary to establish the citizenship of applicants for mining patents must be made in the following manner: In case of an incorporated company, a certified copy of their charter or certificate of incorporation must be filed. In case of an association of persons unincorporated, the affidavit of their duly authorized agent, made upon his own knowledge, or upon information and belief, setting forth the residence of each person forming such association, must be submitted. This affidavit must be accompanied by a power of attorney from the parties forming such association, authorizing the person who makes the affidavit of citizenship to act for them in the matter of their application for patent.

79. In case of an individual or an association of individuals who do not appear by their duly authorized agent, you will require the affidavit of each applicant, showing whether he is a native or naturalized citizen, when and where born, and his residence.

80. In case an applicant has declared his intention to become a citizen, or has been naturalized, his affidavit must show the date, place, and the court before which he declared his intention, or from which his certificate of citizenship issued, and present residence.

81. The affidavit of claimant as to his citizenship may be taken before the register or receiver, or any other officer authorized to administer oaths within the land-district. If citizenship is established by the testimony of disinterested persons, such testimony may be taken at any place before any person authorized to administer oaths, and whose official character is duly verified.

APPOINTMENT OF DEPUTY SURVEYORS OF MINING-CLAIMS—CHARGES FOR SURVEYS AND PUBLICATIONS—FEES OF REGISTERS AND RECEIVERS, &C.

82. Section 2334 provides for the appointment of surveyors of mineral claims, authorizes the Commissioner of the General Land Office to establish the rates to be charged for surveys and for newspaper publications, prescribes the fees allowed to the local officers for receiving and acting upon applications for mining-patents and for adverse claims thereto, &c.

Under this authority of law the following rates have been established as the maximum charges for newspaper publications in mining cases:

a Where a daily paper is designated the charge shall not exceed seven dollars for each ten lines of space occupied, and where a weekly newspaper is designated as the medium of publication five dollars for the same space will be allowed. Such charge shall be accepted as full payment for publication in each issue of the newspaper for the entire period required by law.

It is expected that these notices shall not be so abbreviated as to curtail the description essential to a perfect notice, and the said rates established upon the understanding that they are to be in the usual body-type used for advertisements.

b For the publication of citations in contests or hearings involving the character of lands, the charges shall not exceed eight dollars for five publications in weekly newspapers, or ten dollars for publications in daily newspapers for thirty days.

83. The surveyors-general of the several districts will, in pursuance of said law, appoint in each land-district as many *competent* deputies for the survey of mining-claims as may seek such appointment; it being distinctly understood that all expenses of these notices and surveys are to be borne by the mining-claimants and not by the United States; the system of making *deposits* for mineral surveys, as required by previous instructions, being hereby revoked as regards *field-work;* the claimant having the option of employing *any* deputy surveyor within said district to do his work in the field.

84. With regard to the *platting* of the claim and other *office-work* in the surveyor-general's office, that officer will make an estimate of the cost thereof, which amount the claimant will deposit with any assistant United States treasurer, or designated depository, in favor of the United States Treasurer, to be passed to the credit of the fund created by "individual depositors for surveys of the public lands," and file with the surveyor-general duplicate certificates of such deposits in the usual manner.

85. The surveyors-general will endeavor to appoint mineral deputy surveyors, so that one or more may be located in each mining-district for the greater convenience of miners.

86. The usual oaths will be required of these deputies and their assistants as to the correctness of each survey executed by them.

The duty of the deputy mineral surveyor ceases when he has executed the survey and returned the field-notes and preliminary plat thereof with his report to the surveyor-general. He will not be allowed to prepare for the mining-claimant the papers in support of an application for patent, or otherwise perform the duties of an attorney before the land-office in connection with a mining claim.

The surveyors-general and local land officers are expected to report any infringement of this regulation to this office.

87. The law requires that each applicant shall file with the register and receiver a sworn statement of all charges and fees paid by him for publication of notice and for survey; together with all fees and money paid the register and receiver, which sworn statement is required to be transmitted to this office, for the information of the Commissioner.

88. Should it appear that excessive or exorbitant charges have been made by any surveyor or any publisher, prompt action will be taken with the view of correcting the abuse.

89. The fees payable to the register and receiver for filing and acting upon applications for mineral-land patents are five dollars to each officer, to be paid by the applicant for patent at the time of filing, and the like sum of five dollars is payable to each officer by an adverse claimant at the time of filing his adverse claim.

90. All fees or charges under this law may be paid in United States currency.

91. The register and receiver will, at the close of each month, forward to this office an abstract of mining-applications filed, and a register of receipts, accompanied with an abstract of mineral lands sold, and an abstract of adverse claims filed.

92. The fees and purchase-money received by registers and receivers must be placed to the credit of the United States in the receiver's monthly and quarterly account, charging up in the disbursing account the sums to which the register and receiver may be respectively entitled as fees and commissions, with limitations in regard to the legal maximum.

HEARINGS TO ESTABLISH THE CHARACTER OF LANDS.

93. In every case where it becomes necessary under the law and existing instructions of this office that a hearing be held and testimony taken for the purpose of ascertaining the mineral or agricultural character of land, the local officers are directed to cause the evidence to be taken before a duly qualified officer whose office is located nearest the land in dispute, the distance to be computed by ordinary routes of travel.

Whenever the local office comes within this rule, the hearing will be held before the register and receiver.

It is intended to cause these hearings to be held, as far as practicable, in such manner as to afford the least inconvenience to persons interested. Should it appear, therefore, by written stipulation of all the parties that this purpose will best be subserved by the designation of any particular officer authorized to administer oaths within the land-district in which the land in controversy is situated, the instructions herein may be departed from in accordance with such stipulation. Such deviation may also be allowed where the officer who would, otherwise, be designated is an interested party, or where, for other good reason, his selection would be improper.

When the evidence is taken before an officer other than the register and receiver,

the record should be sealed up, the title of the case indorsed on the envelope, and the whole returned by mail or express to the register and receiver.

On the 27th April, 1880, in accordance with the directions of the Secretary of the Interior, this office revoked the withdrawals theretofore made, upon general information, that vast tracts of public land were mineral in character, and instructed the local officers, in the absence of a specific allegation of the mineral character of land, to allow applications for agricultural entry thereof, upon due proof.

Hereafter the only tracts of public land that will be withheld from entry as agricultural land on account of its mineral character, will be such as are returned by the surveyor-general as mineral; and even the presumption which is supported by such return may be overcome by testimony taken at a regular hearing.

94. Hearings to determine the character of land, as practically distinguished, are of two kinds:

1st. Where lands which are sought to be entered and patented as agricultural are alleged by affidavit to be mineral, or when sought as mineral their non-mineral character is alleged.

The proceedings relative to this class are in the nature of a contest between two or more known parties, and the testimony may be taken on personal notice of at least ten days, duly served on all parties, or, if they cannot be found, then by publication for thirty days in a newspaper of general circulation, to be designated by the register of the land-office as published nearest to the land in controversy. If publication is made in a weekly newspaper, the notice must be inserted in five consecutive weekly issues thereof.

2d. When lands are returned as mineral by the surveyor-general.

When such lands are sought to be entered as agricultural, notice must be given by publication for thirty days as aforesaid.

95. All notices must describe the land, give the name and address of the claimant, the character of his claim, and the time, place, and purpose of the hearing.

Proof of service of notice, when personal, must consist of either acknowledgment of service indorsed on the citation (which is always desirable), or the affidavit of the party serving the same, giving date, place, and manner of service, indorsed as aforesaid.

Proof of publication must be the affidavit of the publisher of the newspaper, stating the period of publication, giving dates, stating whether in a daily or weekly issue, and a copy of the notice so published must be attached to, and form a part of, the affidavit.

Proof of posting on the claim must be made by the affidavits of two or more persons who state when and where the notice was posted; that it remained so posted during the prescribed period, giving dates, and a copy of the notice so posted must be attached to, and made a part of, the affidavits.

Proof of notice is indispensable to the regularity of proceedings and must accompany the record in every case.

The expense of notice must in every case be paid by the parties thereto.

96. At the hearing there must be filed the affidavit of the publisher of the paper that the said notice was published for the required time, stating when and for how long such publication was made, a printed copy thereof to be attached and made a part of the affidavit.

97. At the hearing the claimants and witnesses will be thoroughly examined with regard to the character of the land; whether the same has been thoroughly prospected; whether or not there exists within the tract or tracts claimed any lode or vein of quartz or other rock in place, bearing gold, silver, cinnabar, lead, tin, or copper, or other valuable deposit which has ever been claimed, located, recorded, or worked; whether such work is entirely abandoned, or whether occasionally resumed; if such lode does exist, by whom claimed, under what designation, and in which subdivision of the land it lies; whether any placer mine or mines exist on the land; if so, what is the character thereof—whether of the shallow-surface description, or of the deep cement, blue lead, or gravel deposits; to what extent mining is carried on when water can be obtained, and what the facilities are for obtaining water for mining purposes; upon what particular ten-acre subdivisions mining has been done, and at what time the land was abandoned for mining purposes, if abandoned at all.

98. The testimony should also show the agricultural capacities of the land, what kind of crops are raised thereon, and the value thereof; the number of acres actually cultivated for crops of cereals or vegetables, and within which particular ten-acre subdivision such crops are raised; also which of these subdivisions embrace his improvements, giving in detail the extent and value of his improvements, such as house, barn, vineyard, orchard, fencing, &c.

99. It is thought that *bona fide* settlers upon lands really agricultural will be able to show, by a clear, logical, and succinct chain of evidence, that their claims are founded upon law and justice; while parties who have made little or no permanent agricultural improvements, and who only seek title for speculative purposes, on ac-

count of the mineral deposits known to themselves to be contained in the land, will be defeated in their intentions.

100. The testimony should be as full and complete as possible; and, in addition to the leading points indicated above, everything of importance bearing upon the question of the character of the land should be elicited at the hearing.

101. Where the testimony is taken before an officer who does not use a seal, other than the register and receiver, the official character of such officer must be attested by a clerk of a court of record, and the testimony transmitted to the register and receiver, who will thereupon examine and forward the same to this office, with their joint opinion as to the character of the land as shown by the testimony.

102. When the case comes before this office, such an award of the land will be made as the law and the facts may justify; and in cases where a survey is necessary to set apart the mineral from the agricultural land in any forty-acre tract, the necessary instructions will be issued to enable the agricultural claimant, *at his own expense*, to have the work done, at his option, either by United States deputy, county, or other local surveyor; the survey in such case may be executed in such manner as will segregate the portion of land actually containing the mine, and used as surface-ground for the convenient working thereof, from the remainder of the tract, which remainder will be patented to the agriculturist to whom the same may have been awarded, subject, however, to the condition that the land may be entered upon by the proprietor of any vein or lode for which a patent has been issued by the United States for the purpose of extracting and removing the ore from the same, where found to penetrate or intersect the land so patented as agricultural, as stipulated by the mining-act.

103. Such survey when executed must be properly sworn to by the surveyor, either before a notary public, officer of a court of record, or before the register or receiver, the deponent's character and credibility to be properly certified to by the officer administering the oath.

104. Upon the filing of the plat and field-notes of such survey, duly sworn to as aforesaid, you will transmit the same to the surveyor-general for his verification and approval; who, if he finds the work correctly performed, will properly mark out the same upon the original township-plat in his office, and furnish authenticated copies of such plat and description both to the proper local land-office and to this office, to be affixed to the duplicate and triplicate township-plats respectively.

105. In cases where a portion of a forty-acre tract is awarded to an agricultural claimant and he causes the segregation thereof from the mineral portion, as aforesaid, such agricultural portion will not be given a numerical designation as in the case of surveyed mineral claims, but will simply be described as the "Fractional ——— quarter of the ——— quarter of section ———, in township ———, of range ———, meridian, containing ——— acres, the same being exclusive of the land adjudged to be mineral in said forty-acre tract."

106. The surveyor must correctly compute the area of such agricultural portion, which computation will be verified by the surveyor-general.

107. After the authenticated plat and field-notes of the survey have been received from the surveyor-general, this office will issue the necessary order for the entry of the land, and in issuing the receiver's receipt and register's patent certificate you will invariably be governed by the description of the land given in the order from this office.

108. The fees for taking testimony and reducing the same to writing in these cases will have to be defrayed by the parties in interest. Where such testimony is taken before any other officer than the register and receiver, the register and receiver will be entitled to no fees.

109. If, upon a review of the testimony at this office, a ten-acre tract should be found to be properly mineral in character, that fact will be no bar to the execution of the settler's legal right to the remaining *non-mineral* portion of his claim, if contiguous.

110. No fear need be entertained that miners will be permitted to make entries of tracts ostensibly as mining-claims, which are not mineral, simply for the purpose of obtaining possession and defrauding settlers out of their valuable agricultural improvements; it being almost an impossibility for such a fraud to be consummated under the laws and regulations applicable to obtaining patents for mining-claims.

111. The fact that a certain tract of land is decided upon testimony to be mineral in character is by no means equivalent to an award of the land to a miner. A miner is compelled by law to give sixty days' publication of notice, and posting of diagrams and notices, as a preliminary step; and then, before he can enter the land, he must show that the land yields mineral; that he is entitled to the possessory right thereto in virtue of compliance with local customs or rules of miners, or by virtue of the statute of limitations; that he or his grantors have expended, in actual labor and improvements, an amount of not less than five hundred dollars thereon, and that the claim is one in regard to which there is no controversy or opposing claim. After all these proofs are met, he is entitled to have a survey made at his own cost, where a survey is required, after which he can enter and pay for the land embraced by his claim.

112. Blank forms for proofs in mineral cases are not furnished by the General Land Office.

Respectfully,

N. C. McFARLAND,
Commissioner.

Approved.

S. J. KIRKWOOD,
Secretary.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., May 9, 1882.

TO REGISTERS AND RECEIVERS,
U. S. District Land Offices:

GENTLEMEN: Your attention is directed to the provisions of the following act of Congress approved April 26, 1882:

AN ACT to amend section twenty-three hundred and twenty-six of the Revised Statutes, in regard to mineral lands, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the adverse claim required by section twenty-three hundred and twenty-six of the Revised Statutes may be verified by the oath of any duly authorized agent or attorney-in-fact of the adverse claimant cognizant of the facts stated; and the adverse claimant, if residing or at the time being beyond the limits of the district wherein the claim is situated, may make oath to the adverse claim before the clerk of any court of record of the United States or the State or Territory where the adverse claimant may then be, or before any notary public of such State or Territory.

SEC. 2. That applicants for mineral patents, if residing beyond the limits of the district wherein the claim is situated, may make any oath or affidavit required for proof of citizenship before the clerk of any court of record, or before any notary public of any State or Territory.

1. It will be observed that the act is not retroactive, and hence cannot affect proceedings had prior to its approval; where citizenship, however, has not been proven, it may be established as provided by section two of this act.

2. Where an agent or attorney-in-fact verifies the adverse claim, he must distinctly swear that he is such agent or attorney, and accompany his affidavit by proof thereof.

3. The agent or attorney-in-fact must make the affidavit in verification of the adverse claim within the land district where the claim is situated.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Secretary.

PATENTS TO PLACER CLAIMS.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., September 22, 1882.

TO REGISTERS AND RECEIVERS, AND SURVEYORS-GENERAL:

GENTLEMEN: The following regulations are promulgated as amendatory of circular of October 31, 1881, entitled "United States mining laws and regulators thereunder," and have special reference to applications for patents to placer claims. They are to be considered in connection with paragraphs 53 to 60 of regulations contained in said circular:

1. The first care in recognizing an application for patent upon a placer claim must be exercised in determining the exact classification of the lands. To this end the clearest evidence of which the case is capable should be presented. If the claim be all placer ground that fact must be stated in the application and corroborated by accompanying proofs. If of mixed placers and lodes it should be so set out, with a description of all known lodes situated within the boundaries of the claim. A specific declaration, such as is required by section 2333, Revised Statutes, must be fur-

nished as to each lode intended to be claimed. All other known lodes are, by the silence of the applicant, excluded by law from all claim by him, of whatsoever nature, possessory or otherwise.

2. Section 2395, Revised Statutes (subdivision 7), requires the surveyor to "note in his field-books the true situation of all mines, salt licks, salt springs, and mill seats which come to his knowledge"; also "all water-courses over which the lines he runs may pass." It further requires him to "note the quality of the lands." These descriptive notes are required by subdivision 8 to be incorporated in the plat by the surveyor-general.

3. If these duties have been performed, the surveys will furnish a reasonable guide to the district officers and to claimants in prosecuting their applications. But experience has shown that great neglect has resulted from inattention to the law in this respect, and the regular plats are of very little value in the matter. It will, therefore, be required in the future that deputy surveyors shall, at the expense of the parties, make full examination of all placer claims, and duly note the facts as specified in the law, stating the quality and composition of the soil, the kind and amount of timber and other vegetation, the locus and size of streams, and such other matters as may appear upon the surface of the claims. This examination should include the character and extent of all surface and underground workings, whether placer or lode, for mining purposes.

4. In addition to these data, which the law requires to be shown in all cases, the deputy should report with reference to the proximity of centers of trade or residence; also of well-known systems of lode deposit or of individual lodes. He should also report as to the use or adaptability of the claim for placer mining; whether water has been brought upon it in sufficient quantity to mine the same, or whether it can be procured for that purpose; and finally, what works or expenditures have been made by the claimant or his grantors for the development of the claim, and their situation and location with respect to the same as applied for.

5. This examination should be reported by the deputy under oath to the surveyor-general, and duly corroborated; and a copy of the same should be furnished with the application for patent to the claim, constituting a part thereof, and included in the oath of the applicant.

6. In case of a proposed claim for lands not yet surveyed, the foregoing regulations will govern the application for survey.

7. In controversies hereafter to be determined respecting the mineral value of lands, their value for all purposes, whether agricultural or municipal, or as seats for towns, will be considered, without reference to the decisions heretofore made in particular cases. No decision finally executed, however, will be reconsidered under this modification.

8. No application by an association of persons for patent to a placer claim will be allowed to embrace more than one hundred and sixty acres, nor will any application be entertained that embraces more than one location. *Amended:* [see circular following.]

9. Applications awaiting entry, whether published or not, must be made to conform to these regulations, both with respect to amount of ground and examination as to the character of the land. Entries already made will be suspended for examination by the Commissioner, and such additional proofs as may be deemed necessary in each case will be demanded.

Very respectfully,

N. C. McFARLAND,
Commissioner.

DEPARTMENT OF THE INTERIOR,
September 23, 1882.

Approved.

H. M. TELLER,
Secretary.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
WASHINGTON, D. C., *December* 9, 1882.

TO REGISTERS AND RECEIVERS AND SURVEYORS-GENERAL:

GENTLEMEN: By direction, contained in letter dated the 7th inst., from the honorable Secretary of the Interior, paragraph No. 8 of the preceding circular of September 22, 1882, relating to placer-mining claims, has been amended so as to read as follows:

"8. No application by an association of persons for patent to a placer claim will be allowed to embrace more than one hundred and sixty acres; and not less than five hundred dollars' worth of work must be shown to have been expended upon or for the

benefit of each separate location embraced in such application. If an individual becomes the purchaser and possessor of several separate claims of twenty acres each or less, he may be permitted to include in his application for patent any number of such claims contiguous to each other, not exceeding in the aggregate one hundred and sixty acres; but upon or for the benefit of each original claim or location so embraced, he or his grantors must have expended the sum of five hundred dollars in improvements."

You are instructed to observe this modification of my said circular of September 22, 1882.

Very respectfully,

N. C. McFARLAND,
Commissioner.

VALUABLE DEPOSITS—INSTRUCTIONS.

REGULATIONS GOVERNING THE ENTRY OF LANDS CONTAINING BORAX AND ALKALINE EARTHS, SULPHUR, ALUM, AND ASPHALT.

Secretary Teller to Commissioner McFarland, January 30, 1883.

My attention is called to the fact that these deposits, although valuable, are not of sufficient value to permit their being entered under the mining laws, if the recent circular approved by me September 22, 1882, and its amendment of December 9, 1882, is applicable to entries of lands containing borax and other similar valuable deposits. It was early determined by the Department that the act of May 10, 1872, which describes certain lands containing valuable mineral deposits, was applicable to lands containing deposits of borax, corbonate and nitrate of soda, sulphur, alum, and asphalt; and I believe that from the passage of the law until the present time the definition of the term "valuable mineral deposits" has been such as to include the minerals and alkaline substances named. I understand that entries of borate lands have been allowed under the provisions of the act of 1872, and the regulations made in accordance therewith.

It is the desire of the persons interested that the regulations which were in existence, having special reference to the application for patent for placer claims—namely, the circular of October 31, 1881—should be continued in force so far as they relate to deposits of borax, &c., as mentioned above.

Believing that practical effect should be given to the mining laws of the United States, I am of the opinion that to apply the new regulations to such entries would result in excluding such lands from sale, and depriving the people of the benefit of the use of these natural deposits. I therefore direct you to permit the entry of public lands containing valuable deposits of borax, the carbonate and nitrate of soda, sulphur, alum, and asphalt in the States of California and Nevada and the Territories of Arizona, Utah, and Wyoming—in which section of country I am informed the deposits are present—under the regulations of October 31, 1881.

In addition, however, an applicant for patent for public lands containing deposits of borax, &c., as above, must affirmatively show that the lands entered are not valuable for any other purpose than the one for which application is made.

It will therefore follow that the circulars of September 22 and December 9, 1882, are not applicable to entries of the lands thus described and excepted.

SURVEYS OF MINING CLAIMS.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., November 16, 1882.

TO UNITED STATES SURVEYORS-GENERAL:

GENTLEMEN: The regulations of this office require that the plats and field-notes of surveys of mining claims shall disclose all conflicts between such surveys and prior surveys, giving the areas of conflicts.

The rule has not been properly observed in all cases. Your attention is invited to the following particulars, which should be observed in the survey of every mining claim:

1. The exterior boundaries of the claim should be represented on the plat of survey and in the field-notes.

2. The intersection of the lines of survey with the lines of conflicting prior surveys should be noted in the field-notes and represented upon the plat.

3. Conflicts with unsurveyed claims, where the applicant for survey does not claim the area in conflict, should be shown by actual survey.

4. The total area of the claim embraced by the exterior boundaries should be stated, and also the area in conflict with each intersecting survey, substantially as follows:

	Acres.
Total area of claim	10.50
Area in conflict with survey No. 302	1.56
Area in conflict with survey No. 948	2.33
Area in conflict with Mountain Maid lode mining claim, unsurveyed	1.48

In a number of instances that have come to the attention of this office the total area in conflict has been given, but not the area in conflict with *each* intersecting claim. The portion of the plat not in conflict has been colored, and the remainder left uncolored. The language of the field-notes has been such as to convey the idea that the conflicting areas were excluded from the claim, whereas such was not the intention. It does not follow that because mining surveys are required to exhibit all conflicts with prior surveys, the areas of conflict are to be excluded. The field-notes and plat are made a part of the application for patent, and care should be taken that the description does not inadvertently exclude portions intended to be retained. It is better that the application for patent should state the portions to be excluded in express terms. A survey executed as in the example given will enable the applicant for patent to exclude such conflicts as may seem desirable. For instance, the conflict with survey No. 302 and with the Mountain Maid lode claim might be excluded, and that with survey No. 948 included.

Your attention is also invited to another matter. The practice of coloring portions of surveys, leaving other portions uncolored, is open to the same objections that have been stated concerning the field-notes. In the future no coloring will be used.

Very respectfully,

N. C. McFARLAND,
Commissioner.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., June 8, 1883.

TO REGISTERS AND RECEIVERS AND SURVEYORS-GENERAL:

GENTLEMEN: The following additional regulations are promulgated as amendatory of circular of October 31, 1881, entitled "United States mining laws and regulations thereunder," which, except as herein modified, will remain in full force:

1. No application will be received, or entry allowed, which embraces more than one lode location.

2. A party who is not an applicant for patent under section 2325, Revised Statutes, or the assignee of such applicant, is not entitled to make entry under said section, and in no case will the name of such party be inserted in the certificate of entry. This regulation has no reference to proceedings under section 2326. *See page* 998.

3. Any party applying to make entry as *trustee* must disclose fully the nature of the trust and the name of the *cestui que trust;* and such trustee, as well as the beneficiaries, must furnish satisfactory proof of citzenship; and the names of beneficiaries, as well as that of the trustee, must be inserted in the final certificate of entry.

4. Where an adverse claim has been filed and suit thereon commenced within the statutory period, and final judgment determining the right of possession rendered in favor of the applicant, it will not be sufficient for him to file with the register a certificate of the clerk of the court, setting forth the facts as to such judgment, but he must, before he is allowed to make entry, file a certified copy of the judgment, together with the other evidence required by section 2326, Revised Statutes.

5. Where such suit has been dismissed, a certificate of the clerk of the court to that effect, or a certified copy of the order of dismissal, will be sufficient.

6. In no case will a relinquishment of the ground in controversy, or other proof, filed with the register or receiver, be accepted in lieu of the evidence required in paragraphs 4 and 5.

7. Where an adverse claim has been filed, but no suit commenced against the applicant for patent within the statutory period, a certificate to that effect by the clerk of the State court having jurisdiction in the case, and also by the clerk of the circuit court of the United States for the district in which the claim is situated, will be required.

8. Possessory title to a lode claim held and worked for a period equal to the time prescribed by the statute of limitations for mining claims of the State or Territory where the same may be situated, may, in the absence of any adverse claim, be established in the same manner as now allowed in placer claims, and indicated generally in paragraphs 67, 68, and 69 of the circular hereby amended. *See page* 995.

9. No entry will be allowed until the register has satisfied himself, by a careful

examination, that proper proofs have been filed upon all the points indicated in official regulations in force, and that they show a sufficient *bona fide* compliance with the laws and such regulations. A strict observance of this regulation will be required.

L. HARRISON,
Acting Commissioner.

JULY 6, 1883.

Approved.

H. M. TELLER,
Secretary.

SURVEY OF A MINING CLAIM UNDER UNITED STATES LAW—METHOD AND COST.

The following letter gives the details of method and cost of surveying mining claims under the mining laws of the United States.

[Department of the Interior, United States Surveyor-General's Office for the district of California, 610 Commercial Street, San Francisco.]

DECEMBER 20, 1881.

J. A. WILLIAMSON,
Commissioner General Land Office, Washington, D. C.:

SIR: In compliance with your request that I furnish you with a statement of the work required from this office by the survey and platting of an ordinary mining claim, I have the honor to submit the following:

A necessary incident to the survey of a mine is the appointment of a deputy mineral surveyor, although it is not required that a deputy be appointed for each survey. There is so much to be done as to this preliminary that the steps taken are included in this statement as being properly a part of the work.

The applicant for appointment is examined as to his qualifications, either by this office or by a deputy. If found competent he is required to execute a bond in duplicate in the sum of $10,000. An examination as to the qualifications of the sureties upon the bond is made. After approval the bond is forwarded by letter for the approval of your office. Upon the receipt of the notice of such approval a commission is made out, sealed, and transmitted to the deputy.

A record of the bond and issuance of the commission is kept in a book, which shows also the date of appointment and address of the deputy.

Applications for survey are seldom in proper form, and the correspondence necessitated by the return of erroneous applications is by no means inconsiderable.

Upon the receipt of a correct application an estimate of the amount to be paid for office work and stationery is sent to the applicant. The amount of the estimate, usually $40, is in most cases sent to this office in order that it may be properly deposited in the Treasury. Although not required by law to receive the money and deposit it for the applicants, this office does so on account of the great convenience afforded claimants living at points remote from the Treasury. In such cases the Treasurer's receipts, in triplicate, are taken by this office and sent, one to the Treasury Department, one to your office, and the third to the depositor.

Upon the filing of the certificate of deposit, instructions to survey the mine are issued to a United States deputy mineral surveyor.

Upon the receipt of the deputy's returns they are registered and examined as to the form and general completeness, and if satisfactory are sent to the draughting-rooms for technical examination and platting. Errors in tabling and survey are often found, frequently of a serious nature, and, as by your letter, N, of December 11, 1878, errors in the sworn returns of a United States deputy mineral surveyor must be corrected by himself, a return of the work to the deputy with an explanatory letter is necessary.

When found to be correct and in accordance with the record of location and requirements of the law and instructions, the survey is platted.

Four plats are required in ordinary cases: one for the United States land office, one for the claimant, being the plat forwarded to your office with the returns from the United States land office, and one posting plat.

In cases where there are more than one location included in one survey, as many posting plats as there are locations must be made.

With the plat sent to the United States land office there must be a letter of transmittal, and the register's receipt must be recorded and filed.

With the plats furnished the claimant there are sent certified copies of the application for survey, and the approved field-notes and returns of the deputy. A receipt for the plats and copies furnished is made out and sent with them, and when returned is registered and filed.

For convenience of reference the original plat and field-notes are numbered and in-

dexed, a double index being kept, that is, an index in the name of the mine and also in the name of the claimant.

Two of these are required: one in the draughting division and the other in the general office, as it would be extremely inconvenient in case but one index were kept to send up stairs to the draughting-rooms for the number of a case when but an examination of the papers is desired, or to send from that division to the general office for the number of a map when an examination of the map alone is all that is necessary.

Although this system of indexing may appear at first productive of unnecessary work, it is not so in practice, for inquiries relative to mines are constantly being made by persons who can give only the claimant's name.

The papers retained in this office are neatly folded and filed in heavy wrappers, upon which are shown the names of the mine and claimant; the district, county, and township and range in which the mine is situated; when the survey was made, and by whom, with the date of the deputy's instructions; by whom the field-notes were copied; when the plats and copies of the field-notes were sent to the claimant, and when the register's map was sent to the United States land office.

By this system of filing, the main points relative to location, survey, &c., can be seen without reference to the papers.

An account is opened with the depositor upon the receipt of the Treasurer's certificate in this office. Strict account is taken of the time engaged in platting the survey and making the necessary copies of the original plat and returns of survey. For this purpose each employé engaged upon "special-deposit work" is required to hand the accountant, at the end of each day's work, a tag showing what particular case or cases he has been employed upon during the day.

A full statement showing the condition of the deposits acted upon during the quarter must be made to accompany the quarterly returns of this office.

In cases where the original deposit is found insufficient, the claimant is called upon for an additional deposit, with which the same formulas are observed as with the original deposit.

The township plats must be amended from time to time as surveys of mines interfere with the areas of the public land sections. Duplicate diagrams showing the amendments must be made—one for the local land office and one for your office.

Much of the work attending the course of a survey through this office is of such a nature that no account can be taken of it as affecting any particular claim; as, for instance, making out instructions and estimates, writing letters to deputies and to claimants, preliminary examinations of the deputy's returns, designating surveys by their proper lot numbers and recording such lottings, &c., work which in the abstract is but slight, but which in the concrete requires much time and labor.

As a partial illustration of my statements, I transmit copies of the forms of the books in use in this office under the special-deposit system, so far as they relate to surveys of mining claims, and also transmit copies of the field-notes and plats of survey of the Bald Mountain Placer Mine, Sierra County, California, a case which I have selected as a fair example of the amount of office work which may be required in the preparation of plats and papers in the manner required by current usage and regulations.

By the records of this office it appears that the actual cost of the office work upon said survey was as follows:

For original plat, 26½ days, at $5.86½	$155 42
For one copy for the Department; for one copy for the local land office; for three copies for posting, one on each location	58 65
For ten days, at $5.86½ per diem	
For clerical work, 3½ days, at $5.86½	20 53
Total	234 60

A short description of the mine and of the office work performed will explain the apparently great amount of time, 26½ days, of 6½ hours each, consumed upon the original plat. This mine comprises three locations, namely, the Bald Mountain, the Parkman, and the Oregon Creek. The survey of the boundaries of the Bald Mountain location has 12 courses, that of the Parkman location 21 courses, and that of the Oregon Creek location 90 courses (prior to the amendment of the latter location it comprised 114 courses), and, as will be seen upon examination of the accompanying plats, the lines of the entire claim cross the boundaries of seven sections of the public surveys.

The survey was made in November, 1878, by Mr. Samuel Bethell, a United States deputy mineral surveyor, who, from long experience in the customs and regulations of this office (having been almost constantly at work on mining surveys for the past ten or twelve years), is believed to be as thoroughly conversant with all the requirements of the service as any deputy surveyor in the district.

The notes were received in January, 1879, examined from beginning to end, were found to require some amendments and explanations, and were returned to the deputy.

The notes were received a second time in February, 1879, were again examined, found to contain other errors, and were again returned for amendments and explanations.

They were received a third time in February, 1879, were found to be in accordance with all requirements, and were platted.

Each of the examinations above referred to required, 1st, tabling the surveys according to Davie's method to determine their accuracy and the area; 2d, a comparison of all the approved surveys of the surrounding or adjacent claims, with the one under examination as to possible conflicts; and, 3d, the tabling of all the connections with the lines of the public surveys, to ascertain the fractional areas remaining to the public lands, and to see that the deputy had made no error in this part of his work. As this mining claim crosses the lines of several sections, much careful work was required in this part of the examination.

About five months after the approval of the survey, the claimants requested that the Oregon Creek location should be amended by cutting off 4,000 feet from the southern end; consequently, the new notes had to be examined and the plats amended at an expenditure of 5½ days' time, and a cost of—

For draughtsman's work	$32 26
For clerical work	6 00
Total for amended survey	38 26

This, added to the cost of original survey ($234.60), makes a grand total of $272.88. * * *

In conclusion, I have to state that the cost of office work is likely to increase in the future, for the reason that the richest mineral deposits are confined to comparatively narrow strips of country, and locations having been made at various dates by persons who were ignorant of previous legal locations upon the precise tracts which they wished to take up, the locations must overlap, and the extent of all such overlaps upon approved surveys must be investigated and delineated by this office for the information of the Department.

Very respectfully, your obedient servant,

THEO. WAGNER,
United States Surveyor-General for California.

MINERAL-LAND ENTRIES.

IN EFFECT DECEMBER 1, 1883.

FORMS REQUIRED AND PROCEDURE IN DISTRICT LAND OFFICE TO COMPLETE A TITLE.

The above regulations give the data requisite in entering mining lands, giving both the law and the departmental regulations. The following papers are requisite in making application for a patent; adverse claims may intervene, but in all cases patented the following is the procedure:

[When the entry is by a corporation, a copy of the act must be filed; when by an attorney, a copy of the power of attorney.]

The applicant files, when publication is made—

1. An application.
2. Notice of location (certified copy).
3. Abstract of title.
4. Affidavit of citizenship of applicants.
5. Field-notes of survey.
6. Plat of survey.
7. Affidavit of identity of claim.
8. Affidavit of amount of improvements.
9. Copy of by-laws of mining district.
10. Proof of posting notice of ownership and plat on the mine.
11. Notice for publication.

When entry is made (after publication), the applicant must file the following papers:

1. Proof that the notice and plat remained posted for the 60 days requisite during the full time of publication.

2. The register certificate of posting notice and plat in his office the requisite time.
3. Fee statement.
4. Proof of publication by publisher (in newspaper) of notice of ownership.

The applicant now files the following application to purchase:

N. . (4—011.)

APPLICATION TO PURCHASE.

To the Register and Receiver, United States Land Office at ———:

Mineral Entry, No. —, Lot No. —.

———, ——— —, 188 .

The undersigned applicant , under the laws of Congress, for a patent for what is known as the ——— mining claim, embracing ——— linear feet of the ——— vein or lode, with ——— acres of surface ground, the same being designated by the surveyor-general as lot No. —, in the ——— of section —, in township —, of range —, of the ——— meridian, in the ——— mining district, ——— county, ——— of ———, do hereby apply to purchase said mineral claim or lot of land, and agree with the register to pay ——— dollars, being the legal price thereof.

——— ———.

I, ——— ———, register of the land office at ———, do hereby certify that the aforesaid mineral claim or lot No. — is subject to entry by the above-named applicants; the area being ——— acres, and the legal price thereof ——— dollars.

——— ———,
Register.

6. The receiver now issues, after payment, the following certificate in duplicate, one for the files, the other for the applicant:

[N.] [4—145.]

RECEIVER'S RECEIPT.

(Duplicate to be given the purchaser.)

UNITED STATES LAND OFFICE AT ———,
Mineral Entry, No. —, Lot No. —.

——— —, 18 .

Received from ——— ——— the sum of ——— dollars, the same being in full for the surface area embraced by survey No. —, in the ——— of section —, in township No. —, of range No. — meridian, said mineral claim or lot of land being situate in ——— mining district, county of ———, and ——— of ———, and known as the ——— mining claim, embracing ——— acres, as shown by said survey.

$ ———.

——— ———,
Receiver.

7. The register now issues the following certificate of entry in duplicate, one for the files and one for the applicant. On this certificate the patent issues:

(N.) [4—201.]

REGISTER'S FINAL CERTIFICATE OF ENTRY.

UNITED STATES LAND OFFICE AT ———,
Mineral Entry No. —, Lot No. —.

——— —, 188 .

It is hereby certified that, in pursuance of the mining act of Congress, approved July 25, 1866, and the acts amendatory thereof, approved July 9, 1870, and May 10, 1872, ——— ———, whose post-office address is ———, on this day purchased that mineral claim or lot of land designated as survey No. —, in the ——— of section —, in township No. —, of range — meridian, situate, lying and being in the ——— mining district, in the county of ——— and ——— of ———, known as the ——— mining claim, embracing ——— linear feet, with ——— acres of surface ground, as shown by

said survey, for which the said ——— ——— have this day made payment to the receiver in full, amounting to the sum of ——— dollars.

Now, therefore, be it known that, upon the presentation of this certificate to the Commissioner of the General Land Office, together with the plat, survey, and description of said claim, a patent shall issue thereupon to the said ——— ——— if all be found regular.

———— ————,
Register.

NOTE.—The entire case is now transmitted to the General Land Office at Washington for patent.

HOMESTEADS.

TABLES TO JUNE 30, 1882.

[See Chapter XXVII, pages 332 to 356, and 1282.]

The homestead acts continue to be the favorite laws for actual settlers, their beneficent provisions being easily understood and acted upon.

From May 20, 1862, to June 30, 1882, there were made 552,112 original homestead entries, containing 67,043,189.79 acres. During the same period 194,488 final entries were made, or homestead entries consummated, and title passed by the Nation to individual citizens, containing 23,412,795.92 acres, as follows:

Number and area of entries under the homestead acts, by States and Territories, from May 20, 1862, to June 30, 1882.

[See pages 354, 355, and 1284.]

States and Territories.	In the years 1881 and 1882, to June 30.								Aggregate of entries by States and Territories and acres, from May 20, 1862, to June 30, 1882.			
	Fiscal year 1881.				Fiscal year 1882.				Recapitulation.

Department of the Interior, General Land Office, *Washington, D. C.*

CIRCULAR INSTRUCTIONS RELATIVE TO ENTRIES UNDER THE HOMESTEAD LAWS.

IN EFFECT DECEMBER 1, 1883.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., March 20, 1883.

TO REGISTERS AND RECEIVERS:

GENTLEMEN: You are instructed to deliver to applicants for land under the homestead acts, a copy of this circular, and to especially call the attention of the applicant to the requirements of the law under which the application is made.

RESIDENCE OF APPLICANT.

1. The applicant *must* in *every case* state in his application his place of *actual residence*, and the *post-office address* to which notices of contest or other proceedings relative to his entry shall be sent.

SECOND FILINGS AND ENTRIES.

2. A party making a legal filing or entry under any one of the foregoing acts exhausts his right under that act and cannot thereafter make another filing or entry under said act.

ALTERATIONS IN APPLICATIONS.

3. Applications to amend filings or entries should be filed with the register and receiver and be by them transmitted for the consideration of this office. Registers and receivers will not change an entry or filing so as to describe another tract or change a date after the same has been recorded.

RELINQUISHMENTS.

4. Entries and filings made for the purpose of holding the land for speculation and the sale of relinquishments are illegal and fraudulent, and every effort in the power of the Government will be exerted to prevent such frauds and to detect and punish the perpetrators.

5. The first section of the act of May 14, 1880, provides that when a pre-emption, homestead, or timber-culture claimant shall file a written relinquishment of his claim in the land office, the land covered by such claim shall be held as open to settlement and entry without further action on the part of the Commissioner of the General Land Office.

6. This act refers to *bona fide* relinquishments of *bona fide* entries. An entry fraudulent in its inception is not an entry capable of being relinquished. It is an entry to be canceled upon a proper showing of the facts and circumstances of the case, whereupon the land will become subject to proper entry by the first legal applicant.

7. Purchasers of relinquishments of fraudulent filings or entries should understand that they purchase at their own risk so far as the United States is concerned, and must seek their own remedies under local laws against those who, by imposing such relinquishments upon them, have obtained their money without valuable consideration.

SETTLERS ON UNSURVEYED LANDS.

8. Homestead and pre-emption settlers on unsurveyed lands are allowed three months after the filing of the township plat of survey within which to put their claims on record. Accordingly no party will be permitted to make *final proof* in any case until after the expiration of said three months.

THE HOMESTEAD LAWS.

9. Homestead entries can be made for not more than one quarter section, or 160 acres of land.

FEES PAYABLE WHEN APPLICATION IS MADE.

10. The land office fees and commissions, *payable when application is made*, are as follows:

In Alabama, Arkansas, Dakota, Florida, Iowa, Kansas, Louisiana, Michigan, Minnesota, Missouri, and Nebraska—

Land at $2.50 *per acre.*		*Land at* $1.25 *per acre.*	
For 160 acres	$18 00	For 160 acres	$14 00
For 80 acres	9 00	For 80 acres	7 00
For 40 acres	7 00	For 40 acres	6 00

In Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming—

Land at $2.50 *per acre.*		*Land at* $1.25 *per acre.*	
For 160 acres	$22 00	For 160 acres	$16 00
For 80 acres	11 00	For 80 acres	8 00
For 40 acres	8 00	For 40 acres	6 50

11. When a person desires to enter a tract of land upon which he has *not established a residence and made improvements*, he must appear personally at the district land office and present his application, and must make the required affidavits before the register and receiver.

12. He must then establish his actual residence (in a house) upon the land within six months from date of entry, and must reside upon the land continuously for the period prescribed by law.

13. In the case of a single person, the actual residence must be established within the same time, and must be continuously and actually maintained for the same period.

14. The homestead affidavit can be made before the clerk of the county court only in cases where the family of the applicant, or some member thereof, is *actually residing* on the land which he desires to enter, and on which he has made *bona fide* improvement and settlement, and when he is prevented by reason of distance, bodily infirmity, or other good cause from personal attendance at the district land office.

15. In such cases the applicant must state in a supplemental affidavit the facts of such settlement, improvement, and residence: what acts of settlement have been performed and when made; the nature, extent, and value of the improvements; what member or members of his family are residing on the land, and the length of time such residence has been maintained, and the cause specifically why the applicant cannot appear at the local office.

16. A false oath taken before a clerk of a court is perjury, the same as if taken before the register or receiver.

17. The period of actual inhabitancy, improvement, and cultivation required under the homestead laws is five years.

18. In case of the death of a homestead party before making final proof, the widow succeeds to the homestead right.

19. In case of the death of both father and mother, the right and fee inure to the minor children, if any.

20. A homestead right cannot be devised away from the widow or minor children.

SOLDIERS' HOMESTEADS.

[See circulars of December 15, 1882, and February 13, 1883, pages 1020 and 1021 amendatory of this.]

21. A Union soldier or sailor of the late war is entitled to a deduction from the five years of the length of time (not exceeding four years) of his military service. But the soldier (or his widow, as the case may be), must actually reside on the land at least one year before final proof can be made.

22. In case of the death of the soldier, and the death or remarriage of the widow, the minor children of the soldier, by a duly-appointed guardian, are entitled to the privileges of the father.

23. Neither the guardian nor the minor children are required to reside upon the land, but the same must be cultivated and improved for the period of time during which the father would have been required to reside upon the tract.

24. The soldier may file a declaratory statement for a tract of land which he intends to enter under the homestead laws. The fee is $2, except in the Pacific States and Territories, where the fee is $3.

25. This statement may be filed either personally or by an agent, and the soldier is thereafter allowed six months within which to make his entry and commence his settlement and improvement.

26. The entry can be made only by the soldier in person at the local land office, and he must commence his settlement on the land within six months after his filing, and must continue to reside on the land and cultivate it for such period as, added to his military service, will make five years. But he must actually reside upon the land at least one year, whatever may have been the period of his military service.

27. *Entries* cannot be made for a soldier by an agent or attorney.

28. After a declaratory statement has once been filed, whether by an agent or otherwise, the soldier cannot file again. His rights are exhausted by the first filing, and if he does not, within six months, make his personal entry at the land office and commence his settlement as required by law, he obtains no right to the land.

29. A soldier's homestead declaratory statement for a tract of land does not prevent anybody else from making an entry of the same land, subject to such right as the soldier may acquire by virtue of actual residence on the land and full compliance with

law. If the soldier does not establish his residence on the tract as required, the next comer may take the land.

30. Soldiers are not entitled to land, nor to bounty-land warrants, for their military service in the late war, nor can title to land be obtained for them by agents or attorneys. All representations to the contrary are false, and soldiers and sailors are warned against imposition by parties who offer to locate land for them, or to sell their rights.

FINAL PROOF.

31. A settler desiring to make final proof must file with the register of the proper land office a written notice, in the prescribed form, of his intention to do so, which notice will be published by the register in a newspaper, to be by him designated as nearest the land, once a week for six weeks, at the applicant's expense.

32. Applicants should commence to make their proofs in sufficient time, so that the same may be completed and filed in the local office within the statutory period of seven years from date of entry.

33. The final affidavits and proof should be made before the register or receiver, but may be made before the judge, or, in his absence, before the clerk, of a court of record in the county and State, district, or Territory in which the land is situated. If in an unorganized county, the proof may be made in a similar manner in any adjacent county in the same State or Territory.

34. When proof is made before the county officers mentioned, the same must be transmitted by the judge or clerk of the court to the register and receiver, together with the same fees and commissions that the land officers would have been entitled to receive if the proof had been made before them and the testimony reduced to writing by them.

FEES PAYABLE AT TIME OF MAKING FINAL PROOF.

35. The land office commissions, *payable at time of making final proof*, are as follows:

In Alabama, Arkansas, Dakota, Florida, Iowa, Kansas, Louisiana, Michigan, Minnesota, Mississippi, Missouri, and Nebraska—

Land at $2.50 per acre.		*Land at $1.25 per acre.*	
For 160 acres	$8 00	For 160 acres	$4 00
For 80 acres	4 00	For 80 acres	2 00
For 40 acres	2 00	For 40 acres	1 00

In Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming—

Land at $2.50 per acre.		*Land at $1.25 per acre.*	
For 160 acres	$12 00	For 160 acres	$6 00
For 80 acres	6 00	For 80 acres	3 00
For 40 acres	3 00	For 40 acres	1 50

36. The fees for reducing testimony to writing in making final proof are, in the former States, 15 cents, and in the latter States and Territories, 22½ cents, for each 100 words. No other land-office fees than those stated in this circular are payable or allowable in homestead cases.

COMMUTED HOMESTEADS.

37. Homestead entries can be commuted to cash only after actual inhabitancy of the land by the homestead party, and his improvement and cultivation of it for a period of not less than six months.

38. A person who commutes a homestead entry cannot move from the tract and settle upon other public land in the same State or Territory as a pre-emptor.

39. Proof of settlement and cultivation for the prescribed period is to be made in the same manner as in pre-emption cases.

40. A person commuting a homestead entry when he has not actually resided upon the land and improved and cultivated it as required by law, *forfeits all right to the land and to the purchase money paid*, and in addition thereto renders himself liable to criminal prosecution.

* * * * * * *

CAUTION TO APPLICANTS.

Persons making filings or entries under the homestead * * * acts are cautioned that the laws authorize entries to be made only for the use and benefit of the party making the same, and that entries or filings are not allowed by law to be made for the

benefit of others nor for speculation, but all entries must be made in good faith and the requirements or law must be honestly and faithfully complied with.

Very respectfully,

N. C. McFARLAND,
Commissioner.

SOLDIERS' HOMESTEAD DECLARATORY STATEMENTS.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., December 15, 1882.

REGISTERS AND RECEIVERS, UNITED STATES LAND OFFICES:

GENTLEMEN: In view of extensive frauds in the matter of declaratory statements of homestead applicants under sections 2304 and 2309 of the Revised Statutes, the privilege conferred by the filing of such claims having been made the occasion of barter and sale, without attempt on the part of the soldier to comply with the statute by making formal entry at the district office, and commencement of settlement upon the lands within the prescribed period of six months, the following regulations are prescribed for the admission of such filings:

1. Proof of qualification as an honorably discharged soldier must be furnished in accordance with existing regulations in case of entry by soldiers who make direct homestead application without availing themselves of the preliminary filing. Oath of the soldier, setting forth his residence and post-office address, must accompany the filing, to the effect that the claim is made for his exclusive use and benefit, for the purpose of actual settlement and cultivation, and not either directly or indirectly for the use or benefit of any other person; and it must also be shown by such oath that he has not theretofore either made a homestead entry or filed a declaratory statement under the homestead law.

2. Where the declaratory statement is offered for filing by an agent under section 2309, the oath must further declare the name and authority of such agent, giving the date of the power of attorney or other instrument creating the agency, and also aver that the name was inserted therein before execution. It will be observed that with the filing of the declaratory statement the power of the agent, under the law, is at an end. He has thereafter no right or control with respect to the matter nor over the land selected, and has no authority to relinquish the claim or do any other act in the premises. The further declaration of the statute is expressed, that "such claimant in person shall within the time prescribed make his actual entry, commence settlements and improvements on the same, and thereafter fulfill all the requirements of law." Nevertheless, the oath of the soldier and the power of attorney should show that such is the understanding of the matter, and he should swear in terms that such agent has no right or interest direct or indirect in the filing of such declaratory statement.

3. In addition to the proper power of attorney in such cases, the agent must file his own oath to the effect that he has no interest either present or prospective, direct or indirect, in the claim; that the same is filed for the sole benefit of the soldier, and that no arrangement has been made whereby said agent has been empowered at any future time to sell or relinquish such claim either as agent or by filing an original relinquishment of the claimant.

4. As above implied by the requirement of the oath, a soldier will be held to have exhausted his homestead right by the filing of his declaratory statement; it being manifest that the right to file is a privilege granted to soldiers in addition to the ordinary privilege only in the matter of giving them power to hold their claims for six months after selection; but it is not a license to abandon such selection with the right thereafter to make a regular homestead entry independently of such filing. This is clear from the statutory language. Section 2304 provides that "the settler shall be allowed six months, after locating his homestead and filing his declaratory statement, within which to make his entry and commence his settlement and improvement"; and section 2309 requires him "in person" to "make his actual entry, commence settlements and improvements on the same, and thereafter fulfill all the requirements of law." These must be done "on the same" land selected and "located" by the filing.

5. The foregoing ruling will not be so construed as to require the rejection of an application to enter the tract filed upon, after the lapse of six months, where climatic reasons are shown which will justify an allowance of one year under the act of March

3, 1880 (21 Stat., 511); nor in cases where the failure results from sickness, misfortune, or any insurmountable cause, which shall be properly alleged and satisfactorily shown, and where no adverse right has intervened. Where such cause has prevented entry and an adverse right has been admitted, it will be held proper within the discretion of this office to allow an entry upon another tract: *Provided*, That it shall be shown to the full satisfaction of the Commissioner that the default was practically beyond the power of the claimant to avoid. This was formerly the rule, as prescribed by circular of May 17, 1873; but later practice and instruction have extended it far beyond its original scope, and allowed entry to be made upon simple default without showing of course for non-compliance with law.

6. Following the accepted practice in pre-emption cases, the filing of a declaratory statement will not be held to bar the admission of other filings and entries; but any person making entry or claim during the period allowed by law for entry of the soldier will do so subject to his right, and his application when offered within such time will be allowed as a matter of right and operate to exclude the intervening claim.

7. Where you have cause to believe that any "filing" offered for record is not presented in good faith, you will note such cause upon the same, and if it be sufficient to warrant rejection, such as a want of proper authentication or any palpable defect, you will reject the same, and allow an appeal from your ruling according to the regular practice. Where such cause is not sufficient to warrant an authoritative ruling, you will admit the filing subject to investigation, and immediately proceed to make proper inquiry into the matter, reporting your action at once to this office.

Forms of affidavit are hereto appended, and blanks will be furnished as soon as they can be prepared.

You will please give the date of the receipt of this circular.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Approved.

H. M. TELLER,
Secretary.

[See forms following].

REVISED REGULATIONS RELATIVE TO SOLDIERS' AND SAILORS' ADDITIONAL HOMESTEAD ENTRIES.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., February 13, 1883.

TO REGISTERS AND RECEIVERS, UNITED STATES LAND OFFICES:

GENTLEMEN: Section 2306 of the Revised Statutes of the United States provides that any person entitled to make a homestead entry under section 2304 (providing for the benefit of soldiers and sailors of the late war), who had, prior to June 22, 1874, made a homestead entry of less than 160 acres, may enter an additional quantity of land sufficient to make, with the previous entry, 160 acres.

The right granted by this section, and extended by section 2305 to the widow, if unmarried, or otherwise to the minor orphan children by proper guardian, is a *personal* one and is not transferable, nor subject to assignment or lien, nor can it be exercised by another. It can lawfully be exercised only by the soldier or sailor, or by the widow or guardian, as the case may be, in his or her own proper person.

The practice which has hitherto prevailed of certifying the additional right as information from the records of this office and permitting the entry to be made by an agent or attorney is hereby discontinued.

The following regulations will hereafter be strictly observed:

1. The party desiring to make an additional entry, and being entitled thereto, must present himself at the land office of the district in which the land he wishes to enter is situated, and make his application in the same manner as in case of an original entry. (Form No. 4—008.)

2. In addition to the usual homestead affidavit, the claimant must make a special affidavit showing—

First. His identity as the soldier he represents himself to be, reciting his military service, and stating his present residence and post-office address.

Second. The facts, in detail, respecting his right to make the additional entry, and that he has fully complied with the provisions of the homestead laws in the matter of residence upon and cultivation and improvement of his original entry, and whether or not he has proved up his claim and received a patent for the land.

Third. That he has not in any manner previously exercised his additional right either by entry or application, or by sale, transfer, or power of attorney, but that the same remains in him unimpaired.

3. The foregoing affidavits must be sworn to *and subscribed* in the presence of the register or receiver. This rule must be strictly adhered to in order to avoid false personation; and applications and affidavits presented to the register and receiver with signatures attached *will not be received.* Department circulars of May 17, 1877, and September 1, 1879, are modified accordingly.

4. These rules will not be deemed to apply to cases where the additional right has heretofore been certified by this office, nor to cases now pending, or which may be filed in this office prior to March 16, 1883.

Very respectfully,

N. C. McFARLAND,
Commissioner.

DEPARTMENT OF THE INTERIOR,
February 14, 1883.

Approved.

H. M. TELLER,
Secretary.

[Revised Statutes of the United States.]

SEC. 2246. The register or receiver is authorized, and it shall be their duty to administer any oath required by law or the instructions of the General Land Office, in connection with the entry or purchase of any tract of the public lands; but he shall not charge or receive, directly or indirectly, any compensation for administering such oath.

SEC. 5392. Every person who, having taken an oath before a competent tribunal, officer, or person, in any case in which a law of the United States authorizes an oath to be administered, that he will testify, declare, depose or certify truly, or that any written testimony, declaration, deposition, or certificate by him subscribed is true, willfully and contrary to such oath states or subscribes any material matter which he does not believe to be true, is guilty of perjury, and shall be punished by a fine of not more than two thousand dollars, and by imprisonment at hard labor not more than five years; and shall, moreover, thereafter be incapable of giving testimony in any court of the United States until such time as the judgment against him is reversed.

SEC. 5393. Every persons who procures another to commit any perjury is guilty of subornation of perjury, and punishable as in the preceding section prescribed.

SEC. 5440. If two or more persons conspire either to commit any offense against the United States, or to defraud the United States in any manner or for any purpose, and one or more of such parties do any act to effect the object of the conspiracy, all the parties to such conspiracy shall be liable to a penalty of not less than one thousand dollars and not more than ten thousand dollars, and to imprisonment not more than two years.

SEC. 5479. If any person shall falsely make, alter, forge, or counterfeit, or cause or procure to be falsely made, altered, forged, or counterfeited, or willingly aid or assist in the false making, altering, forging, or counterfeiting, any bond, bid, proposal, guarantee, security, official bond, *public record, affidavit, or other writing* for the purpose of defrauding the United States, or shall utter or publish as true, or cause to be uttered or published as true, any such false, forged, altered, or counterfeited bond, bid, proposal, guarantee, security, official bond, public record, affidavit, or other writing for the purpose of defrauding the United States, knowing the same to be false, forged, altered, or counterfeited, *or shall transmit to, or present at, or cause or procure to be transmitted to, or presented at, the office of any officer of the United States,* any such false, forged, altered, or counterfeited bond, bid, proposal, guarantee, security, official bond, public record, *affidavit, or other writing,* knowing the same to be false, forged, altered, or counterfeited for the purpose of defrauding the United States, shall be punished by a fine of not more than one thousand dollars, or by imprisonment at hard labor for not more than ten years, or by both such punishments.

HOMESTEADS.

DECEMBER 1, 1883.

The several homestead laws recognize six classes of homestead entries.

A homesteader must be the head of a family, male or female, a widow or a single person, male or female, over the age of twenty-one years, who are citizens of the United States, or who have declared their intention to become citizens (such cannot, however, make a *final* entry of a homestead until fully naturalized); also, to Indians who have abandoned their tribal relations, and have adopted the habits and pursuits of civilized life.

THE SEVERAL CLASSES OF HOMESTEAD ENTRIES.

1. Under the original act of May 20, 1862, and amendments.
2. Adjoining farm homesteads, Sec. 229, R. S. U. S.
3. Additional homestead act of March 3, 1879.
4. Soldier's homestead act of June 8, 1872.
5. Additional homestead, under act of June 8, 1872.
6. Indian homestead act of March 3, 1875.

ENTRIES—HOW MADE.

Homestead entries are received, in the manner herein set out, at any United States district land office. Homestead settlements can be made upon any of the public lands not otherwise specially reserved, and which has been declared subject to entry and location by law of Congress. No public lands, however, are open to settlement or sale until after Congress directs their survey, creates land offices therein, and orders how, when, and by what system they shall be disposed of.

HOW PAID FOR.

Cash is received in payment of fees. In the case of a commuted homestead, the commutor can use cash, military bounty-land warrants, agricultural college or private scrip, under the act of January 28, 1879.

DECISIONS AS TO HOMESTEADS.

For decisions and rulings as to homestead and entries, see annual reports of the Commissioner of the General Land Office from 1862 to 1881; also, volume of "General and Permanent Land Laws." Public Land Commission, 1880, title, "Homesteads," Chapter VIII, sections 212, 255, pages 80-94, —; also, see "Decisions of the Department of the Interior and General Land Office in cases relating to lands and land claims from July 1881, to June 1883," title, "Homesteads."

HOMESTEAD ENTRIES.

GENERAL METHOD OF PROCEDURE IN DISTRICT LAND OFFICES AND DETAILS AS TO LAWS.

IN EFFECT DECEMBER 1, 1883.

THE HOMESTEAD PRIVILEGE.

The laws extending the homestead privilege, embraced in sections 2289 to 2312 of the Revised Statutes, give to every citizen, and to those who have declared their intention to become citizens, the right to a homestead on *surveyed* lands. This right was limited by section 2289 of the Revised Statutes, as the maximum quantity, to 160 acres of the class of ordinary public lands held by law at $1.25 per acre, when disposed of to cash purchasers, or 80 acres of the class of lands embraced in the alternate sections, along the lines of railroads or other works of internal improvement, reserved to the United States in acts of Congress making grants of land in aid of the construction of such works, and the price thereof increased to $2.50 per acre. By act of Congress of March 3, 1879, it was enacted that from and after its passage "the *even* sections within the limits of any grant of public lands to any railroad company, or to any military road company, or to any State in aid of any railroad or military road, shall be open to settlers under the homestead laws to the extent of one hundred and

sixty acres to each settler," thus doing away in this class of entries with the distinction between ordinary minimum and double minimum lands, or lands held at $1.25 per acre and lands held at $2.50 per acre, which had existed under section 2289 of the Revised Statutes of the United States, so far as the double minimum lands may be found in *even* sections within the limits of land grants for railroads or military roads. These provisions did-not extend so as to embrace any double minimum lands in *odd*-numbered sections, or in the limits of grants for any other description of public works. By act of July 1, 1879, the same provisions were extended to the *odd* sections in the States of Missouri and Arkansas, where the *odd* sections were reserved to the United States, the price of the lands therein enhanced, and the *even* sections granted for the purposes of improvement. Both acts were inoperative in any case where the *even* sections were granted, the *odd* being reserved, and not within the States of Missouri and Arkansas, as in Alabama and Mississippi; but the double minimum lands in the two last-mentioned States having been brought into market at the enhanced price prior to the 1st January, 1861, are now reduced to $1.25 per acre under the third section of the act of June 15, 1880.

PROCEDURE IN DISTRICT LAND OFFICES.

[See forms, pages 1033 to 1036.]

To obtain a homestead the party must, in connection with his application (Form 4–007), make an affidavit (Form 4–063), before the register or receiver, that he is over the age of twenty-one or the head of a family; that he is a citizen of the United States, or has declared his intention to become such; and that the entry is made for his exclusive use and benefit, and for actual settlement and cultivation; and must pay the legal fee and that part of the commissions which is payable when the entry is made, as given in tables on page —.

WHEN PERSONAL APPEARANCE AT THE DISTRICT LAND OFFICE MAY BE DISPENSED WITH.

Where the applicant has made actual settlement on the land he desires to enter, but is prevented by reason of bodily infirmity, distance, or other good cause, from personal attendance at the district land office, the affidavit may be made before the clerk of the court for the county within which the land is situated, under section 2294 of the Revised Statutes.

On compliance by the party with the foregoing requirements, the receiver will issue his receipt for the fee and that part of the commissions paid (Form 4–137), a duplicate of which he will deliver to the party. The matter will then be entered on the records of the district office and reported to the General Land Office.

SETTLEMENT AND RESIDENCE.

[See Forms, pages 1036 to 1040.]

An inceptive right is vested in the settler by such proceedings, and upon faithful observance of the law in regard to settlement and cultivation for the continuous term of five years, and at the expiration of that time, or within two years thereafter, upon proper proof to the satisfaction of the land officers (Forms 4–070, 4–369, and 4–370), and payment to the receiver of that part of the commissions remaining to be paid, as given in tables on page 1019, the receiver issuing his receipt therefor, the register will issue his certificate (Forms 4–140 and 4–196), and make proper returns to this office as the basis of a patent or complete title for the homestead. In regard to the requirement of continuous residence and cultivation in such cases, reference is made to the exceptions provided for in the act of Congress of July 1, 1879, as given above, with respect to grasshopper ravages, and within certain sections of Kansas and Nebraska provided for by act of June 4, 1880, also given above, in cases of loss or failure of crops from unavoidable causes, these acts being applicable to homestead claims in like manner as to pre-emptions. And an inceptive right to a homestead may now be acquired, and the period of continuous residence and cultivation begin to run, prior to the date of formal entry at the district land office, by the party making actual settlement on the tract desired, provided the entry at the district office is made within the prescribed period thereafter as in pre-emptions. The third section of the act of May 14, 1880, places homestead settlers on public lands on the same footing with pre-emption settlers under existing laws. This section protects the claim of an actual settler upon unsurveyed land not yet open to entry at the district office, provided he shall make homestead entry of the land within three months from the filing of the township plat of survey in the district land office, the same as the pre-emptor is now protected by filing his declaratory statement within the same period; and if the homestead settler shall fully comply with the law as to continuous residence and cultivation, his settle-

ment defeats all claims intervening between its date and the date of filing his homestead application. In making final proof, his five years of residence and cultivation will commence from date of actual settlement.

NOTE.—The law is specific in requiring final proof to be made within *two* years after the expiration of the five years from day of entry.

FINAL PROOF—HOW MADE.

[See Forms, pages 1037, 1038.]

Under the act of Congress of March 3, 1879, any settler desiring to make final proof must first file with the register of the proper land office a written notice of his intention to do so. Such notice must describe the land claimed, and the claimant must give the names and residences of the witnesses by whom the necessary facts as to settlement, residence, cultivation, &c., are to be established. (See Form 4-348.)

The filing of such notice must be accompanied by a deposit of sufficient money to pay the cost of publishing the notice to be given by the register.

Upon the filing of the notice by the applicant, the register shall publish a notice of such application once each week for a period of thirty days, in a newspaper which he shall designate, by an order written on said application, as published nearest the land described in the application, and he shall also post said notice in some conspicuous place in his office for the same period. A compliance with the law will require the notice to be published weekly five times, because four weekly publications would not cover a period of thirty days.

The notice to be given by the register must state that application to make final proof has been filed; the name of the applicant; the kind of entry, whether homestead or pre-emption; a description of the land, and the names and residences of the witnesses as stated in the application. (See Form 4-347.)

To save expense, the register may embrace two or more cases in one publication, when it can be done consistently with the legal requirements of publication, in a newspaper published nearest the land, as per attached Form 4-347½.

When proof is filed that notice has been given in the manner and for the time required by said act of Congress, the applicant will be entitled to make final proof, as provided by law.

The proof that requisite notice has been given will be the certificate of the register that the notice of the application (a copy of which should be annexed to the certificate) was posted by him in a conspicuous place in his office for a period of thirty days (Form 4-227), and the affidavit of the publisher or foreman of the newspaper that the notice (a copy of which notice must be annexed to the affidavit) was published in said newspaper once each week for five successive weeks.

The proof of the publication and posting of the notice must be filed and preserved by the register, to be forwarded to this office with the final papers when issued.

HOW PROOF MAY BE MADE OTHER THAN AT DISTRICT LAND OFFICE.

[See Forms, pages 1038 to 1040.]

In making final proof the homestead party may appear in person at the district land office with his witnesses, and there make the affidavit and proof required in support of his claim, or he may proceed under the act of March 3, 1877. This prescribes that the party desiring to avail himself thereof must appear with his witnesses before the judge of a court of record of the county and State, or district and Territory, in which the land is situated, and there make the final proof required by law, according to the forms prescribed, Nos. 4-070 and 4-369, which proof, duly authenticated by the court seal, is required to be transmitted by the judge or the clerk of the court to the register and receiver, together with the fee and charges allowed by law. See 3d, 10th, and 12th subdivisions of section 2238 of the Revised Statutes of the United States.

The judge being absent in any case, the proof may be made before the clerk of the proper court. The fact of the absence of the judge must be certified in the papers by the clerk acting in his place.

If the land in any case is situated in an unorganized county, the statute provides that the party may proceed to make the proof, in the manner indicated, in any adjacent county in the State or Territory. The fact that the county in which the land lies is unorganized, and that the county in which the proof is made is adjacent thereto, must be certified by the officer.

In any case where the final proof shall be transmitted to the register and receiver, as contemplated in this act, and the full amount of money due shall be paid, they will carefully examine the proof, and, if no objection appears, proceed to issue the receipt and certificate in the case, and make proper returns to this office as the basis of a patent or complete title for the homestead, pursuant to existing laws. If any objection appears they will promptly notify the party and advise him of his rights in the matter.

ENTRIES OF DECEASED OR INSANE PERSONS—HOW COMPLETED.

Where a homestead settler dies before the consummation of his claim, the widow, or in case of her death the heirs, may continue settlement or cultivation, and obtain title upon requisite proof at the proper time. If the widow proves up, title passes to her; if she dies before proving up and the heirs make the proof, the title will vest in them.

Where both parents die, leaving infant children, the homestead may be sold for cash for the benefit of such children, and the purchaser will receive title from the United States, or the patent will issue to the infants on proof of settlement or cultivation for the prescribed period.

Under the act of Congress of June 8, 1880, parties whose homestead entries were regularly made according to law, and who afterwards became insane, may be represented for making final proof and perfecting their entries by any person whose authority to act for them during their disability shall be duly certified under seal of the proper probate court. This act will not be construed to cure failure to comply with the law where the failure occurred prior to the insanity of the claimant. Final proof will not be received until the expiration of the five years, but proof of residence and cultivation will be required to cover only the period prior to such insanity. If a claimant becomes insane *after* expiration of the period of residence, &c., the act will be construed to permit his guardian to act for him within the time in which he might have made final entry himself. The proof must show the regularity of the entry, and therefore that the claimant was either a citizen or had filed his declaration to become one according to the naturalization laws at date of entry, but further proof will not be required as to citizenship.

SALE OF HOMESTEAD NOT RECOGNIZED.

The sale of a homestead claim by the settler to another party before completion of title is not recognized by this office, and vests no title or equities in the purchaser. In making final proof, the settler is by law required to swear that no part of the land has been alienated, except as provided in section 2288 of the Revised Statutes, for church, cemetery, or school purposes, or the right of way of railroads. So far, however, as regards homestead entries made prior to the 15th June, 1880, for lands properly subject to such entry, the second section of the act of Congress of that date provides that the persons to whom the rights of those having so entered for homesteads may have been attempted to be transferred by *bona fide* instruments in writing may entitle themselves to said lands by paying the Government price therefor less the fee and commissions paid on the entries. Instructions relative to such cases will be found in place below.

ABANDONMENT OF HOMESTEAD.

As the law allows but one homestead privilege, a settler relinquishing or abandoning his claim cannot thereafter make a second entry; although where an entry is canceled as invalid for some reason other than abandonment, and not the willful act of the party, he is not thereby debarred from entering again, if in other respects entitled, and may have the fee and commissions paid on the canceled entry refunded on proper application under the act of June 16, 1880; or, if he so elect, he may, by special instructions from this office, be allowed credit for such fee and commissions on a new homestead entry.

RELINQUISHMENT OF HOMESTEADS.

DUTIES OF REGISTERS AND RECEIVERS ON RELINQUISHMENTS BEING FILED.

By the first section of the act of May 14, 1880, it is enacted "that when a preemption, homestead, or timber-culture claimant shall file a written relinquishment of his claim in the local land office, the land covered by such claim shall be held as open to settlement and entry, without further action on the part of the Commissioner of the General Land Office." The district land officers are instructed not to accept or act upon any relinquishment, unless made before them, which has not been duly subscribed by the claimant on the back of his duplicate receipt, and acknowledged, witnessed, and executed in the manner requisite under the laws of the State or Territory in which the land is situated for the valid transfer of real estate. In case of the loss of the duplicate receipt an affidavit of such loss must accompany the written relinquishment.

Immediately upon a relinquishment, duly executed as above, being received at their office, the register will note on the relinquishment, over his signature, the day and hour of its receipt, will write the words "Canceled by relinquishment" (giving date)

opposite the record of the entry in the tract book, the register of entries, and the register of receipts, and draw a line over the number of the entry on the township plat.

On Monday of each week they are directed to transmit to this office all the relinquishments which have been accepted by them during the preceding week. When the relinquishment shall have been received and noted as above, they will hold the land embraced in the relinqished entry as subject to settlement or entry by the first legal claimant; the intent of said section, as understood by me, being only to prevent the delay formerly resulting from awaiting action on such relinquishments by this office.

ABANDONMENT OF HOMESTEAD—CONTESTS.

Where application is made to contest the validity of a homestead entry on the ground of abandonment, the party must file his affidavit with the district land officers, setting forth the allegations on which his application is founded describing the tract and giving the name of the settler. Upon this the officers will set apart a day for hearing, giving all the parties in interest due notice of the time and place of trial.

In cases of inability to make personal service of the notice, and when it becomes necessary to serve it by application, the act of Congress of June 3, 1878, directs that the same shall "be printed in some newspaper in the county where the land in contest lies; and if no newspaper be printed in such county, then in the newspaper printed in the county nearest to such land." After the trial, the land officers will transmit the testimony, with their joint report, for the action of this office, according to Rules of Practice approved December 20, 1880, given on pages 559 to 567.

The contestant must defray the expenses incident to such a contest. Under the second section of the act of Congress of May 14, 1880, before referred to, if he succeeds in the contest, and procures the cancellation of the entry, he will be notified thereof, and for a period of thirty days from such notice will be allowed a preference right to institute a claim to the land over any other person who may desire to do so.

PREFERENCE MUST BE GIVEN TO A BONA FIDE SETTLER.

According to the principles laid down in the decisions rendered by the United States Supreme Court in the case of Atherton *vs.* Fowler, 6 Otto, 513, and the case of Hosmer *vs.* Wallace, 7 Otto, 575, the preference right of a *bona fide* actual settler will be recognized as against any other party seeking title to the tract covered by his settlement, under the pre-emption, homestead, or timber-culture laws.

PRE-EMPTION FILING MAY BE CHANGED INTO A HOMESTEAD ENTRY.

[See Forms, page 1041.]

When an individual has made settlement on a tract and filed his pre-emption declaration therefor, he may change his filing into a homestead, if he continues in good faith to comply with the pre-emption laws until the change is effected; and by an act of Congress of May 27, 1878, the time during which the party has resided upon and claimed the land as a pre-emptor will be credited upon the period of residence and cultivation required under the homestead law. In so doing he is required in his first homestead affidavit to set forth the fact of a previous pre-emption filing, the time of actual residence thereunder, and the intention to claim the benefit of such time as provided for in the act. In making final proof on his homestead entry he is required, in addition to the usual affidavit and proof, to make the prescribed "pre-emption homestead affidavit." (Form 4–071.)

HOMESTEAD MAY BE COMMUTED AT END OF SIX MONTHS WITH CASH, SCRIP, OR LAND WARRANTS.

[See Forms, page 1036.]

If the homestead settler does not wish to remain five years on his tract, the law permits him to pay for it with cash or warrants or agricultural college scrip, upon making proof of settlement and cultivation for a period of not less than six months from the date of entry to the time of payment; or payment may now be made with private claim scrip under the act of January 28, 1879.

This proof of actual settlement and cultivation must be the affidavit of the party (Form 4-069) made before the district officers, in addition to the testimony usual in making final homestead proof (Form 4-369), or the party may, under the act of June 9, 1880, make the required affidavit before the clerk of any court of record of the county and State or district and Territory in which the land is situated; or if in any unorganized county, he may make such affidavit in a similar manner in any adjacent county in the State or Territory.

ENTRY OF HOMESTEADS BY HOMESTEADERS OR BY TRANSFEREES UNDER ACT OF JUNE 15, 1880.

With respect to the class of homestead entries made prior to the 15th June, 1880, the act of Congress that day approved provides another method of acquiring title to the land by purchase. Under section 2, duly qualified persons who, prior to June 15, 1880, entered, under any of the homestead laws, lands properly subject to such entry, are permitted to obtain title by paying the Government price, less the fee and commissions paid thereon.

In allowing entries of this class, the district officers will require proof that the party was twenty-one years of age, or the head of a family, was a citizen or had declared his intention to become a citizen of the United States, and was in other respects entitled to make the entry.

When homestead entries, made prior to June 15, 1880, have been attempted to be transferred by *bona fide* instrument in writing, the persons to whom such transfers were made are likewise authorized to obtain title by like payments and with like deductions of fees and commissions.

In permitting entries by transferees, they will first ascertain whether the original homestead entry was a valid entry under the homestead laws. They will then require the instrument in writing by which it was sought to transfer such homestead right to be filed, together with the best evidence attainable of the *bona fide* character of the transfer, including the affidavit of the party who seeks to purchase. They will also require satisfactory proof that the attempted transfer was made prior to June 15, 1880. In cases of doubt as to the propriety of allowing the application to purchase, they should refer all the papers to this office, with a full statement of facts and their opinion.

No entry will be allowed under the second section when the original homestead entry was not a valid entry; nor when an entry under the homestead laws shall have been made on the same land subsequent to the original entry; nor if the land was embraced in a prior valid entry at the date of such original homestead entry; nor where adverse legal rights of any character exist at the date of the application to purchase.

Applications to purchase under said second section will be made on Form 4–001, as in case of ordinary cash entry, and must be accompanied by the receiver's duplicate homestead receipt, or, if that has been lost or destroyed, by an affidavit setting forth such fact, and giving the register's and receiver's number and date of the original homestead entry. It must also be stated in the application that the same is made under the second section of the act of June 15, 1880. Where the duplicate receipt has been lost or destroyed, and the application to purchase is made by the original homestead party, the applicant must make oath that he has not transferred nor attempted to transfer his homestead rights under said entry, nor assigned his right to receive the repayment of the fees, commissions, and excess payments paid thereon. The register will certify to the receiver the amount to be allowed as credit for fees and commissions already paid, the applicant first making oath that said fees and commissions have not been repaid, and that no application for such repayment has been made.

Entries under said second section will receive current register's and receiver's numbers in the regular cash series, and will be returned in the same manner as in other cases of cash entry, referring, however, in each instance, on the cash abstracts, certificates, and receipts, to the date of the act authorizing the entry, the register's and receiver's number of the original homestead application, and the amount allowed as credit for fees and commissions, as follows: "Act June 15, 1880. Original homestead entry No. —. Credit for fees and commissions, $———."

Final homestead proof not being required in these cases, no advertisement or notice of intention to make final proof is necessary, and no final homestead fees are to be paid or collected.

Warrants and scrip, made receivable by law for lands subject to sale at private entry, or in commutation of homestead or pre-emption rights, and certificates of deposit on account of surveys, will be deemed receivable for lands purchased under the act of June 15, 1880.

The existing rule must, however, be observed, that where the value of warrants or scrip exceeds that of the land entered therewith, no repayment is authorized, but the warrant or scrip applied must be fully surrendered. In such case there would be no claim for repayment on account of the fee and commissions paid on the original homestead entry.

ADJOINING FARM HOMESTEADS—HOW ENTERED.

[See Forms, page 1041.]

There is a class of homesteads designated as "adjoining farm homesteads." In these cases the law allows an applicant *owning* and *residing* on an *original* farm to

enter other land lying contiguous thereto, which shall not, with such farm, exceed in the aggregate 160 acres. Thus, for example, a party owning or occupying 80 *acres* may enter 80 additional, without regard to price, whether held at $1.25 or $2.50 per acre; or, if owning 40 acres, he may enter 120 acres additional of land held at $1.25 per acre, or of land held at $2.50 per acre, where 160 acres is now the maximum quantity of double minimum land subject to homestead entry, but cannot exceed the maximum of 80 acres where the land proposed to be entered is held at $2.50 per acre, and where 80 acres is still the legal maximum in reference to that class of lands, under section 2289 of the Revised Statutes as modified by the acts of Congress of March 3, 1879, July 1, 1879, and June 15, 1880, before mentioned.

In applying for an entry of this class, the party must make affidavit (Form 4–066) describing the tract which he owns and upon which he resides as his original farm. In making final proof it is not required that he should prove actual residence on the separate tract entered; but if he does not, it must appear from the proof adduced (Forms 4–369 and 4–067, the two former to be modified to suit the circumstances of the case) that he has continued for the period required by law to reside upon and cultivate the original farm tract, making use of the entered tract as a part of the homestead.

ADDITIONAL HOMESTEAD ENTRY.

(See Forms, page 1042.)

The act of March 3, 1879, in addition to its provisions already referred to, provides, *first*, that "any person who has under existing laws taken a homestead on any even section within the limits of any railroad or military road land grant, and who by existing laws shall have been restricted to 80 acres, may enter under the homestead laws an additional 80 acres adjoining the land embraced in his original entry, if such additional land be subject to entry," without payment of fees and commissions, and that "the residence and cultivation of such person upon and of the land embraced in his original entry shall be considered residence and cultivation for the same length of time upon and of the land embraced in his additional entry, and shall be deducted from the five years' residence required by law," with the proviso, however, that in no case shall patent issue "until the person has actually, and in conformity with the homestead laws, occupied, resided upon, and cultivated the land" embraced in his additional entry "at least one year." The act of July 1, 1879, is similar in effect.

Upon any party proposing to enter an additional tract under these provisions, the register and receiver will require him to submit proof which shall set forth the particulars of his existing entry and of his compliance with the legal requirements regarding the same, according to the form provided for use in making final proof, 4–369, as also to swear that he did not serve in the Army or Navy of the United States during the late civil war for ninety days or more, as the class of persons who thus served were not restricted to eighty acres under previously existing laws, and, therefore, are not entitled to the benefits of the acts referred to, and to make homestead application and affidavit according to attached Forms 4–018 and 4–086. The required proof is found necessary to ascertain the *status* of the original entry at the date of application for the benefit of the said acts, and also the credit for residence and cultivation to which the party who made the same may be entitled, according to their provisions, in perfecting his title under the additional or new entry to be allowed, without waiting the arrival of the time when final proof on the latter is to be made. With reference, however, to cases in which final proof on the original entries has been made and the certificates issued, the requirement of proof as herein directed may be omitted, and in lieu thereof a reference made in reporting the case to the certificate issued, giving its number and date, so that it may be identified on the records of this office.

These requirements having been complied with, the register and receiver will then, if they find his original entry to be *intact* on their records, whether patented or not, and if no objection appears in any respect, allow the entry applied for, note the same on their records, giving it the proper number in the regular homestead series, and report it with their monthly homestead returns, indicating its character as an additional entry under said act on the margin of their monthly abstracts, with a reference to the original entry by its number, and the description of the land. The money columns in the abstracts will of course be left blank, since there will be no fees and commissions paid.

In this class of entries the party, if still resident on the original entry tract, will not be required to remove therefrom to the additional entry tract in order to make a new residence on the latter, as the two forming one body of land, residence on either will be regarded as satisfying the legal requirement; but in making final proof on the additional entry the party must show such residence, with occupancy and cultivation of the tract taken as additional under said act, for five years from the date of entry thereof, less the time to be deducted on account of residence and cultivation on the original entry, which shall not exceed four years in any case.

Second. The acts further provide that should the person so elect he may, instead of making an additional entry, "surrender his existing entry to the United States for cancellation, and thereupon be entitled to enter lands under the homestead laws the same as if the surrendered entry had not been made," with the same provisions, as regards fees and commissions not being required, and requiring settlement and cultivation, occupation, and residence, as have been already stated with regard to additional entries. In case of any party electing to surrender his entry under this act, the register and receiver will receive his relinquishment, which shall specify for what purpose made, and be accompanied by the duplicate receipt issued for the relinquished entry, or by a statement under oath showing a good reason for its absence, report the case in a special letter to this office, and await instructions before proceeding further in the matter. Relinquishments may be made in the same manner hereinbefore provided for.

SOLDIER'S HOMESTEAD.

[See Forms, page 1043. See amendatory circular, pages 1020 and 1021.]

Provisions for the benefit of soldiers and sailors of the late war, their widows and minor orphan children.—Sections 2304, 2305, 2306, 2307, 2308, and 2309 of the Revised Statutes, for the benefit of soldiers and sailors, their widows and minor orphan children, provide—

1st. In section 2304, that every soldier and officer in the Army, and every seaman, marine, and officer of the Navy, who served for not less than ninety days in the Army or Navy of the United States, "during the recent rebellion," and who was honorably discharged, and has remained loyal to the Government, may enter, under the provisions of the homestead law, 160 acres of the public land, to be taken, if desired, from the class of double minimum lands.

2d. In section 2305, that the time of his service, or the whole term of his enlistment if the party was discharged on account of wounds or disability incurred in the line of duty, shall be deducted from the period of five years, during which, as per section 2291, the claimant must, to perfect title, reside upon and cultivate the entered tract, but with the proviso that the party shall, in every case, reside upon, improve, and cultivate his homestead for a period of at least one year after he shall have commenced his improvements.

3d. That any person entitled to the benefits of section 2304, who had, prior to the 22d of June, 1874, made a homestead entry of less than 160 acres, may enter an additional quantity of land sufficient to make, with the previous entry, 160 acres.

4th. That the widow, if unmarried, or in case of her death or marriage, then the minor orphan children, of a person who would be entitled to the benefits of section 2304, may enter land under its provisions, with the additional privilege accorded, that if the person died during his term of enlistment, the widow or minor children shall have the benefit of the whole term of enlistment.

APPLICATIONS—HOW MADE.

5th. That any person entitled to the benefit of section 2304 may file his claim for a tract of land through an agent, and shall have six months thereafter within which to make his entry and commence his settlement and improvement upon the land; *but first entry cannot be made by an agent or attorney.*

The following is the course of proceedings for parties to avail themselves of the benefits of these sections of the Revised Statutes in making homestead entries (see *Amendatory Circular of December* 15, 1882, *and February* 13, 1883):

1st. On the party producing the proper proof of his right to do so, immediate entry of the tract desired may be made; but if the party so elect, he may file a declaration (Form A or B) to the effect that he claims a specified tract of land as his homestead, and that he takes it for actual settlement and cultivation. The register and receiver will number the declarations so filed in a separate series, according to the order of filing, enter them on their records, and with their monthly returns forward an abstract, to embrace all declarations of this class filed with them during the month. Thereafter, at any time within six months from the date of filing, the party may come forward, make his entry of the land (Forms of application and affidavits, 4-015 and 4-065), and commence his settlement and improvement. Should the party present his declaration through an agent as authorized by section 2309, said agent must produce a duly executed power of attorney from the principal desiring to make the entry, who will be bound by the selection his agent may make the same as though made by himself. Where the party has failed to make entry within six months from the date of filing, he is not thereby debarred from making entry of the tract filed for, unless some adverse right has intervened; and if so he may enter some tract that is still vacant.

2d. The claims of widows and minor orphan children may be initiated by declaration, as above. Minor orphan children can act only by their duly appointed guardians,

who must file certified copies of the powers of guardianship, which must be transmitted to this office by the registers and receivers with their abstracts of declarations. The law does not require, as a condition to enjoying its benefits, that the party should first file a declaratory statement, and, as before stated, immediate entry may be made. (See *Amendatory Circular February* 13, 1833.)

SOLDIER'S ADDITIONAL HOMESTEAD ENTRY.

[See Forms, page 1045.]

3d. Where a party entitled desires to make an additional entry of a quantity which, with his original entry, shall not exceed one hundred and sixty acres, it is required that a full recital of military service be presented to the district land office in which the land is he wishes to enter, with due proof of the identity of the party making the claim, and with proper reference to his original homestead entry, giving the name of the district office, date and number of entry, and description of the land. In addition, a detailed statement, under oath, must be filed by the party in interest, setting forth the facts respecting his right to make the entry, and containing his declaration that he has not in any manner exercised his right, either by previous entry or application, or by sale, transfer, or power of attorney, but that the same remains in him unimpaired. He must also declare, under oath, all of these, in the presence of the register or receiver, that he has made full compliance with the homestead law in the matter of residence upon, cultivation and improvement of, his original homestead entry, and should further recite whether or not he has proved up his claim and received a patent of the land.

When these papers are filed and examined, they will, if found satisfactory, be returned with a certificate attached recognizing the right of the party to make additional entry under the law; and when presented with proper application at any district land office, either by the party entitled or his agent or attorney, they will be accepted by the register and receiver, and forwarded with the entry papers to this office in the usual manner.

The fee for examination and certificate, under the seal of the office, will be $1, which must in all cases accompany the papers presented for approval.

Where the party's first entry has been consummated, the register and receiver will require him to make application in the form prescribed (No. 4–008), and to pay the same fee and commissions as in cases of original entry; the receiver will issue his receipt for the money paid, and these papers will receive the current date and the proper numbers in their homestead series. Then, to complete the transaction—it being an object, for the convenience of business, that the additional entry papers and the final papers therefor in such cases shall be kept separate and distinct—the party will make payment of the usual final commissions on the entered tract, for which the receiver will issue his receipt; the register will thereupon issue his final certificate for the additional tract (Form 4–197), the receipt and certificate to bear their proper numbers in the final homestead series; likewise a reference to the original entry and to the final certificate thereon by their number, and also by their district where the party's first entry shall have been made in a different district.
