In case the party has not made proof on his original homestead entry when he applies for additional land, he will be allowed to make the additional entry on proper application, as above stated, and paying the usual fee and commissions, for which the receiver will issue his receipt, the papers to receive their proper numbers in the homestead series, with a reference thereon to the original entry. Thereafter, when the party shall make final proof on the original entry, he will be required to pay the final commissions on both entries, when a final receipt will be issued for the money, and thereupon a final certificate issued to call both for the tract in the original entry and the additional tract. On these papers the register and receiver will make a reference to the original and the additional entry, and on them one patent will issue for both; yet where it happens that the original entry and the additional entry are made in different land districts, this rule must be departed from so far as regards the issuing of one final certificate and receipt for both.

The following proof will be required of parties applying for the benefits of sections 2304, 2305, and 2307, in addition to the prescribed affidavit of the applicant:

1st. Certified copy of certificate of discharge, showing when the party enlisted and when he was discharged; or the affidavit of two respectable, disinterested witnesses corroborative of the allegations contained in the prescribed affidavit (Form 4–065) on these points, or, if neither can be procured, the party's affidavit to that effect.

2d. In case of widows, the prescribed evidence of military service of the husband, as above, with affidavit of widowhood, giving date of the husband's death.

3d. In case of minor orphan children, in addition to the prescribed evidence of military service of the father, proof of death or marriage of the mother. Evidence of death may be the testimony of two witnesses, or certificate of a physician duly at-

tested. Evidence of marriage may be certified copy of marriage certificate, or of the record of same, or testimony of two witnesses to the marriage ceremony.

The register and receiver will be allowed to charge one dollar each for receiving and filing the initiatory declaration of the parties in cases where such declarations are filed. This fee the receiver will account for in the usual manner, indicating the same in his account as fees for "homestead declarations," which will be charged against the maximum of $3,000 now allowed by law. In the States and Territories for which 50 per centum additional is allowed by the 12th subdivision of section 2238 of the Revised Statutes, the additional allowance will apply to the fee herein named, viz: California, Oregon, Washington, Nevada, Colorado, Idaho, New Mexico, Arizona, Utah, Wyoming and Montana.

INDIAN HOMESTEADS, HOW MADE.

[See Forms, pages 1046.]

Provisions for the benefit of Indians.—The fifteenth and sixteenth sections of the act of March 3, 1875 (copy attached, No. 9), extends the benefits of the homestead act of May 20, 1862, and the acts amendatory thereof (now embodied in sections 2290, 2291, 2292, and 2295 to 2302, inclusive, of the Revised Statutes) to any Indian, born in the United States, who is the head of a family, or who has arrived at the age of twenty-one years, and who has abandoned, or may hereafter abandon, his tribal relations, with the exception that the provisions of the eighth section of said act of 1862 (section 2301 of the Revised Statutes) shall not be held to apply to entries made thereunder, and with the proviso that the title to lands acquired by any Indian by virtue thereof shall not be subject to alienation or incumbrance, either by voluntary conveyance, or the judgment, decree, or order of any court, and shall be and remain inalienable for a period of five years from the date of the patent issued therefor.

An Indian desiring to enter public land under this act must make application to the register and receiver of the proper district land office; also an affidavit setting forth the fact of his Indian character; that he was born in the United States; that he is the head of a family or has arrived at the age of twenty-one years; that he has abandoned his tribal relations and adopted the habits and pursuits of civilized life (Form 4–079), and this must be corroborated by the affidavits of two or more disinterested witnesses (Form 4–077).

If no objection appears, the register and receiver will then permit him to enter the tract desired according to existing regulations, so far as applicable, under the homestead law, the register writing across the face of the application (Form 4–007) the words "Indian homestead—act of March 3, 1875;" they will note the entry on their records and make returns thereof to this office, with which they will send the affidavits submitted. It will be observed that the provisions of the eighth section of the act of May 20, 1862 (section 2301 of the Revised Statutes), which admits of the commuting of homestead to cash entries, do not apply to this class of homesteads.

All lands obtained under the homestead laws are exempt from liability for debts contracted prior to the issuing of patent therefor.

FORMS USED IN HOMESTEAD ENTRIES.

JUNE 30, 1883.

IN UNITED STATES DISTRICT LAND OFFICE.

Blanks are furnished free.

Applicant must file, on application—

Application and register's certificate.

Affidavit of applicant.

Non-mineral affidavit.

Receiver's receipt, issued in duplicate.

Excess receipt for excess of area, if any there be.

FINAL ENTRY, OR PROVING UP.

Notice of intention to make final proof.

Notice for publication to make final proof, "register's." (Two or more entries may be embraced in this notice.)

Certificate as to posting notice.

Proof of publication of notice; affidavit of publisher or foreman of newspaper in which published.

Final affidavit required of claimant.

Proof, testimony of claimant.
Proof, testimony of two witnesses taken separately.
Receiver's final receipt (in duplicate).
Register's certificate for patent (in duplicate).

SOLDIERS' AND SAILORS' HOMESTEADS.

Forms as above are used, except that soldier's declaratory statement, A, in person, or, B, by his agent, are used instead of the application in the first instance, and the affidavit differs. (See forms following.)

INDIAN HOMESTEADS.

Forms as in homestead entries, with the addition of affidavit [No. 4–079] by applicant, and corroborative affidavit of two persons [No. 4–077].

SPECIAL HOMESTEAD LAWS.

Commuted homesteads, or payment at end of six months, as in pre-emption; adjoining-farm homesteads; pre-emption homesteads, or where pre-emption filings are changed to homestead entries; additional homesteads, and soldiers' additional homesteads require special forms, which are given in the chapter following.

HOMESTEADS AND PRE-EMPTIONS IN DISTRICTS SUBJECT TO GRASSHOPPER INCURSIONS.

By the act of July 1, 1879, special provision was made for absence by settlers of such land during the period of such incursions. (See regulations following.)

HOMESTEAD, FORMS USED IN ENTRY OF.

IN EFFECT JUNE 30, 1883.

Homestead claims to the extent of 160 acres can be entered, by a duly qualified person, upon any of the public lands of the United States in any and all the public-land States and Territories where the lands are not mineral or purely timber lands, and where they are subject to entry by reason of enactment by Congress. Homestead titles can be initiated upon unsurveyed as well as surveyed lands.

Settlement prior to entry is not a condition.

FORMS USED ON (ORIGINAL) APPLICATION.

FORM NO. [4–007.]

Homestead application.

If filed for surveyed lands and when applicant has not established a residence and made improvements, applicant must appear personally at the district land office and make affidavits; actual residence must be made within six months, and be continuous until final proof is made. If settlement is on unsurveyed lands, claimants must put their claims on record within three months after filing of the township plats in the district land office; must be paid for within seven years from date of filing application. (See note at bottom of receiver's receipt [4–138].)

HOMESTEAD.

LAND OFFICE AT ———,
APPLICATION NO. ——. (*Date*) ———, 18—.

I, —— ——, of ———, do hereby apply to enter, under section 2289 of the Revised Statutes of the United States, the ——— of section ———, in township ———, of range ——, containing —— acres.

—— ——.

LAND OFFICE AT ———,
(*Date*) ———, 18—.

I, —— ——, register of the land-office, do hereby certify that the above application is for surveyed lands of the class which the applicant is legally entitled to enter

under section 2289 of the Revised Statutes of the United States, and that there is no prior valid adverse right to the same.

———— ————, *Register.*

AFFIDAVIT OF CLAIMANT.

(*Made before register or receiver or clerk of court.*)

[See note.]

[4–063.]

HOMESTEAD.

Affidavit.

LAND OFFICE AT ————

———— —, 188—.

I, —— ————, of ———— having filed my application, No. —, for an entry under section No. 2289 Revised Statutes of the United States, do solemnly swear that ————; that said application, No. —, is made for the purpose of actual settlement and cultivation; that said entry is made for my own exclusive benefit, and not directly or indirectly for the benefit or use of any other person or persons whomsoever; and that I have not heretofore had the benefit of the homestead laws.

———— ————.

Sworn to and subscribed this —— day of ————, before

———— ————,
of the Land Office.

NOTE.—If this affidavit be acknowledged before the clerk of the court, as provided for by sec. 2294 U. S. Revised Statutes, the homestead party must expressly state herein that he or some member of his family is residing upon the land applied for, and that *bona fide* improvement and settlement have been made. He must also state why he is unable to appear at the land office.

☞ See note, which clerks of the courts and registers and receivers will read and explain thoroughly to persons making application for lands where the affidavit is made before either of them. (See directions to land officers on duplicate receipt.)

Timber land, embraced in a homestead or other entry not consummated, may be cleared in order to cultivate the land and improve the premises, *but for no other purpose.*

If, after clearing the land for cultivation, there remains more timber than is required for improvement, there is no objection to the settler disposing of the same. But the question whether the land is being cleared of its timber *for legitimate purposes* is a question *of fact* which is liable to be raised at any time. If the timber is cut and removed *for any other purpose* it will subject the entry to cancellation, and the person who cut it will be *liable to civil suit* for recovery of the value of said timber, *and also to criminal prosecution* under section 2461 of the Revised Statutes.

HOMESTEAD.

NON-MINERAL AFFIDAVIT.

(*Made by applicant.*)

COUNTY OF ————,
———— *of* ————, *ss:*

———— ————, being duly sworn according to law, deposes and says that he is the identical ———— who is an applicant for Government title to the ————; that he is well acquainted with the character of said described land, and with each and every legal subdivision thereof, having frequently passed over the same; that his knowledge of said land is such as to enable him to testify understandingly with regard thereto; that there is not, to his knowledge, within the limits thereof, any vein or lode of quartz or other rock in place, bearing gold, silver, cinnabar, lead, tin, or copper, or any deposit of coal; that there is not within the limits of said land, to his knowledge, any placer, cement, gravel, or other valuable mineral deposit; that no portion of said land is claimed for mining purposes under the local customs or rules of miners or otherwise; that no portion of said land is worked for mineral during any part of the year by any person or persons; that said land is essentially non-mineral land, and that his application therefor is not made for the purpose of fraudulently obtaining title to mineral land, but with the object of securing said land for agricultural purposes.

———— ————.

Subscribed and sworn to before me this —— day of ———, A. D. 187–, and I hereby certify that the foregoing affidavit was read to the said ——— ——— previous to his name being subscribed thereto; and that deponent is a respectable person to whose affidavit full faith and credit should be given.

RECEIVER'S RECEIPT IN DUPLICATE.

(4–137.)

Receiver's receipt, No. —. Application, No. —.

HOMESTEAD.

(Given to the applicant.)

RECEIVER'S OFFICE, ———,
——— —, 188—.

Received of ——— ——— the sum of ——— dollars —— cents; being the amount of fee and compensation of register and receiver for the entry of ———, of section — in township — of range —, under section No. 2290 Revised Statutes of the United States.

——— ———, *Receiver.*

$———.

NOTE.—It is required of the homestead settler that he shall reside upon and cultivate the land embraced in his homestead entry for a period of five years from the time of filing the affidavit, being also the date of entry. An abandonment of the land for more than six months works a forfeiture of the claim. Further, within two years from the expiration of the said five years he must file proof of his actual settlement and cultivation, failing to do which, his entry will be canceled. If the settler does not wish to remain five years on his tract, he can, at any time after six months, pay for it with cash or land warrants, upon making proof of settlement and cultivation from date of filing affidavit to the time of payment.

☞See note in red ink, which registers and receivers will read and explain thoroughly to persons making application for lands where the affidavit is made before either of them.

Timber land embraced in a homestead, or other entry not consummated, may be cleared in order to cultivate the land and improve the premises, *but for no other purpose.*

If, after clearing the land for cultivation, there remains more timber than is required for improvement, there is no objection to the settler disposing of the same. But the question whether the land is being cleared of its timber *for legitimate purposes* is a question *of fact* which is liable to be raised at any time. If the timber is cut and removed *for any other purpose* it will subject the entry to cancellation, and the person who cut it will be *liable to civil suit* for recovery of the value of said timber, *and also to criminal prosecution* under section 2461 of the Revised Statutes.

RECEIVER'S RECEIPT.

(Duplicate for the files.)

Receiver's duplicate receipt No. —. Application No. —.

HOMESTEAD.

RECEIVER'S OFFICE, ———,
——— —, 18—.

Received of ——— ——— the sum of ——— dollars —— cents; being the amount of fee and compensation of register and receiver for the entry of ——— of section — in township — of range —, under section 2290 Revised Statutes of the United States.

——— ———, *Receiver.*

$———.

NOTE.—It is required of the homestead settler that he shall reside upon and cultivate the land embraced in his homestead entry for a period of five years from the time

of filing the affidavit, being also the date of entry. An abandonment of the land for more than six months works a forfeiture of the claim. Further, within two years from the expiration of the said five years he must file proof of his actual settlement and cultivation, failing to do which, his entry will be canceled. If the settler does not wish to remain five years on his tract, he can, at any time after six months, pay for it with cash or land warrants, upon making proof of settlement and cultivation from date of filing affidavit to the time of payment.

HOMESTEAD.

EXCESS RECEIPT.

[Act of May 20, 1862. Revised Statutes of the United States, section 2357.]

Where there is more than the quantity allowed by law in legal subdivisions. Occurs in fractional sections or lots on north and west of townships.

Excess receiver's receipt, No. —.

RECEIVER'S OFFICE, ———,
——— —, 187—.

Received of ——— ——— the sum of ——— dollars —— cents, being in full for ——— acres and —— hundredths of ———, section No. —, in township No. — of range No. —, being excess in said tract over the area entered under the homestead act, per application and receipt No. —.

——— ———, *Receiver.*

$———.

PROCEEDINGS TO PERFECT TITLE BY MAKING FINAL PROOF—AFTER EXPIRATION OF LEGAL TIME.

Commutation or cash payment for homestead.

Should the settler desire at the expiration of six months he may pay for his homestead with cash, warrants, or scrip upon making proof of settlement and cultivation from date of filing application and affidavit to the time of payment. He or she will file the following affidavit:

[No. 4-069.]

To be used in cases of commuted homestead entries. For taking the testimony of claimant and his witnesses in making commutation proof, use the prescribed forms for "Homestead Proof." But all the steps necessary to complete pre-emption entry, as given on page 688, and following, must be complied with. The entry after this stage becomes virtually a pre-emption entry, still the proof is the same as in final homestead entry.

COMMUTED HOMESTEAD AFFIDAVIT.

[Section 2301 of the Revised Statutes of the United States.]

I, ——— ———, claiming the right to commute, under section 2301 of the Revised Statutes of the United States, my homestead entry No. ——, made upon the —— section ——, township ——, range ——, do solemnly swear that I made settlement upon said land on the —— day of ——, 18—, and that since such date, to wit, on the —— day of ——, 18—, I have built a house on said land, and have continued to reside therein up to the present time; that I have broken and cultivated —— acres of said land, and that no part of said land has been alienated, except as provided in section 2288 of the Revised Statutes, but that I am the sole *bona fide* owner as an actual settler.

I further swear that I have not heretofore perfected or abandoned an entry made under the homestead laws of the United States.

——— ———.

LAND OFFICE, ———.

Subscribed and sworn to before me this —— day of ——.

——— ———, *Register.*

COMPLETING A HOMESTEAD ENTRY UNDER FIVE YEARS' RESIDENCE.

At the expiration of the five years' settlement, cultivation, and improvement, the claimant at the district land office signs the following notice, which will be published by order of the register in a newspaper, to be by him designated as nearest the land, once a week for six weeks, at applicant's expense, a deposit being first made.

[No. 4-348.]

NOTICE OF INTENTION TO MAKE FINAL PROOF.

LAND OFFICE AT ———,
(*Date*) 188–.

I, ——— ———, of ——, who made homestead application No. —— (or pre-emption declaratory statement No. ——), for the ——— ———, do hereby give notice of my intention to make final proof to establish my claim to the land above described, and that I expect to prove my residence and cultivation before ——— ———, at ———, on ——— —, 188–, by two of the following witnesses:

——— ———, of ———.
——— ———, of ———.
——— ———, of ———.
——— ———, of ———.

———— ————,
(*Signature of claimant.*)

LAND OFFICE AT ———,
(*Date*) ———, 188–.

Notice of the above application will be published in the ———, printed at ———, which I hereby designate as the newspaper published nearest the land described in said application.

———— ————, *Register.*

NOTICE TO CLAIMANT.—Give time and place of proving up, and name and title of the officer before whom proof is to be made; also, give names and post-office addresses of four neighbors, *two* of whom must appear as your witnesses.

The officer then issues the following:

[No. 4-347.]

NOTICE FOR PUBLICATION.

LAND OFFICE AT ———,
———, 188–.

Notice is hereby given that ——— ——— has filed notice of intention to make final proof before ——— ———, at ———, on ——— —, 188–, on homestead application No. —— (or pre-emption declaratory statement No. ——), for the ——— ———.

He names as witnesses ——— ———, and ——— ———, of ———.

———— ————, *Register.*

NOTE.—This notice must also be posted in a conspicuous place in the land office for a period of thirty days prior to date of final proof.

To save expense, when it can be done consistently, the register may embrace two or more cases in one notice for publication, as follows:

[No. 4-347½.]

CONSOLIDATED NOTICE FOR PUBLICATION.

LAND OFFICE AT ———,
———, 188–.

Notice is hereby given that the following named settlers have filed notice of intention to make final proof on their respective claims before ——— ———, at ———, on ——— —, 188–, viz:

——— ———, on homestead application No. ——, for the ——— ———.
Witnesses: ——— ———, of ———, and ——— ———, of ———.
——— ———, on pre-emption declaratory statement No. ——, for the ——— ———.
Witnesses: ——— ———, of ———, and ——— ———, of ———.

———— ————, *Register.*

[No. 29.]

CERTIFICATE AS TO THE POSTING OF NOTICE.

LAND OFFICE AT ———,
(*Date*) ———, 18–.

I, —— ——, register, do hereby certify that a notice, a printed copy of which is hereto attached, was by me posted in a conspicuous place in my office for a period of thirty days, I having first posted said notice on the —— day of ——, 18—.

—— ——, *Register.*

PROOF OF PUBLICATION OF NOTICE.

Affidavit of publication of the notice (with copies attached), made by the publisher or the foreman of the paper in which inserted, must be here filed and form part of the record.

FINAL ENTRY AFTER PUBLICATION.

The applicant after this appears at the district land office for final entry or proceeds under the act of March 3, 1877, under which he may make affidavit and proof with two witnesses before a judge or the clerk of a court of record. (See general procedure herein, pages 1023 to 1032.)

(4—070.)

HOMESTEAD PROOF.

Final affidavit required of homestead claimants. The homesteader now surrenders the duplicate receiver's receipt received at the time of filing his application.

[Section 2291 of the Revised Statutes of the United States.]

I, —— ——, having made a homestead entry of the —— section No. —, in township No. —, of range No. —, subject to entry at ———, under section No. 2289 of the Revised Statutes of the United States, do now apply to perfect my claim thereto by virtue of section No. 2291 of the Revised Statutes of the United States; and for that purpose do solemnly —— that I am a citizen of the United States; that I have made actual settlement upon and have cultivated said land, having resided thereon since the —— day of ———, 18—, to the present time; that no part of said land has been alienated, except as hrovided in section 2288 of the Revised Statutes, but that I am the sole *bona fide* owner as an actual settler; that I will bear true allegiance to the Government of the United States; and further, that I have not heretofore perfected or abandoned an entry made under the homestead laws of the United States.

—— ——.

I, —— ——, of the land office at ———, do hereby certify that the above affidavit was subscribed and sworn to before me this —— day of ———, 188–.

—— ——.

HOMESTEAD PROOF.

Testimony of claimant.

[No. 4–369.]

[This form will be used both in final homestead proof and commutation proof.]

The testimony of claimant and of the two witnesses are now taken on a blank form of four pages, No. 4–369.

—— ——, being called as a witness in —— own behalf in support of —— homestead entry for ———, testifies as follows:

Ques. 1. What is your name, written in full, and correctly spelled; your age, and post-office address?

Ans. ———.

Ques. 2. Are you a native of the United States, or have you been naturalized? (See note.)

Ans. ———.

Ques. 3. When was your house built on the land, and when did you establish actual residence thereon? (Describe said house and other improvements which you have placed on the land, giving total value thereof.)

Ans. ———.

Ques. 4. Of whom does your family consist, and have you and your family resided continuously on the land since first establishing residence thereon? (If unmarried, state the fact.)

Ans. ———.

Ques. 5. For what period or periods have you been absent from the homestead since making settlement, and for what purpose; and, if temporarily absent, did your family reside upon and cultivate the land during such absence?

Ans. ———.

Ques. 6. How much of the land have you cultivated, and for how many seasons have you raised crops thereon?

Ans. ———.

Ques. 7. Are there any indications of coal, salines, or minerals of any kind on the land? (If so, describe what they are, and state whether the land is more valuable for agricultural than for mineral purposes.)

Ans. ———.

Ques. 8. Have you ever made any other homestead entry? (If so, describe the same.)

Ans. ———.

Ques. 9. Have you sold, conveyed, or mortgaged any portion of the land; and, if so, to whom, and for what purpose?

Ans. ———.

——— ———.

I hereby certify that the forgoing testimony was read to the claimant before being subscribed, and was sworn to before me this —— day of ———, 18—.

——— ———,

———.

———

HOMESTEAD PROOF.

[The testimony of two witnesses, in this form, taken separately, required in each case.]

Testimony of witness.

——— ———, being called as a witness in support of the homestead entry of ——— ——— for ——, testifies as follows:

Ques. 1. What is your occupation and where is your residence?

Ans. ———.

Ques. 2. Have you been well acquainted with ——— ———, the claimant in this case, ever since he made his homestead entry No. ——?

Ans. ———.

Ques. 3. Was claimant qualified to make said entry? (State whether the settler was a citizen of the United States, over the age of twenty-one years, or the head of a family, and whether he ever made a former homestead entry.)

Ans. ———.

Ques. 4. When did claimant settle upon the homestead, and at what date did he establish actual residence thereon? (Describe the dwelling and other improvements, giving total value thereof.)

Ans. ———.

Ques. 5. Have claimant and family resided continuously on the homestead since first establishing residence thereon? (If settler is unmarried, state the fact.)

Ans. ———.

Ques. 6. For what period or periods has the settler been absent from the land since making settlement, and for what purpose; and if temporarily absent, did claimant's family reside upon and cultivate the land during such absence?

Ans. ———.

Ques. 7. How much of the homestead has the settler cultivated, and for how many seasons did he raise crops thereon?

Ans. ———.

Ques. 8. Are there any indications of coal, salines, or minerals of any kind on the homestead? (If so, describe what they are, and state whether the land is more valuable for agricultural than for mineral purposes.)

Ans. ———.

Ques. 9. Has the claimant mortgaged, sold, or contracted to sell any portion of said homestead?

Ans. ———.

Ques. 10. Are you interested in this claim, and do you think the settler has acted in entire good faith in perfecting this entry?
Ans. ———.

——— ———.

I hereby certify that the witness is a person of respectability; that the foregoing testimony was read to him before being subscribed, and was sworn to before me this —— day of ———, 18—.

——— ———,
———.

NOTE.—If naturalized, the claimant must file a certified copy of his certificate of naturalization. In a commuted homestead a foreign-born claimant must file a certified copy of his declaration of intention. In making proof the party must surrender his original duplicate receipt or file affidavit of its loss.

NOTE.—The officer before whom the testimony is taken should call the attention of the witness to the following section of the Revised Statutes, and state to him that it is the purpose of the Government, if it be ascertained that he testifies falsely, to prosecute him to the full extent of the law.

TITLE LXX.—CRIMES.—CH. 4.

SEC. 5392. Every person who, having taken an oath before a competent tribunal, officer, or person, in any case in which a law of the United States authorizes an oath to be administered, that he will testify, declare, depose, or certify truly, or that any written testimony, declaration, deposition, or certificate by him subscribed is true, willfully and contrary to such oath states or subscribes any material matter which he does not believe to be true, is guilty of perjury, and shall be punished by a fine of not more than two thousand dollars, and by imprisonment, at hard labor, not more than five years, and shall, moreover, thereafter, be incapable of giving testimony in any court of the United States until such time as the judgment against him is reversed. [See sec. 1750.]

RECEIVER'S FINAL RECEIPT.

The receiver now issues a final receipt, in duplicate, one for claimant, one for the files.

[No. 4–140.]

Receiver's final receipt No. —. Application No. —.

HOMESTEAD.

RECEIVER'S OFFICE ———,
(*Date*) ———, 18—.

Received from ——— ———, of —— county, ——, the sum of —— dollars and —— cents, being the balance of payment required by law for the entry of the —— of section ——, in township ——, of range ——, containing —— acres, under section 2291 of the Revised Statutes of the United States.

——— ———, *Receiver.*

$——.

REGISTER'S FINAL CERTIFICATE.

The register now issues his final certificate, in duplicate, one for the files, one for the claimant. On this certificate patent issues.

[No. 4–196.]

Final certificate No. —. Application No. —.

HOMESTEAD.

LAND OFFICE AT ———,
(*Date*) ———, 18—.

It is hereby certified, pursuant to section 2291, Revised Statutes of the United States, that ——— ———, of —— county, ——, has made payment in full for —— of section No. ——, in township No. ——, of range No. ——, containing —— acres.

Now, therefore, be it known, that on presentation of this certificate to the Commissioner of the General Land Office, the said ——— ——— shall be entitled to a patent for the tract of land above described.

——— ———, *Register.*

The completed case, with all papers, is now transmitted to the General Land Office at Washington for approval and patent.

PRE-EMPTION FILING CHANGED TO HOMESTEAD ENTRY.

[Under acts of March 3, 1877, and May 27, 1878.]

The claimant in his first homestead affidavit must show the fact of a prior pre-emption filing. He proceeds in other respects as in homestead entries. Time of his actual residence on the land under the pre-emption is credited on his homestead time.

[No. 4–071.]

[To be used in making final proof in cases where pre-emption filings have been changed to homestead entries.]

PRE-EMPTION HOMESTEAD AFFIDAVIT.

I, ——— ———, having changed my pre-emption declaratory statement No. ——, filed the —— day ——, 18—, alleging settlement the —— day of ——, 18—, for the —— section No. ——, in township No. ——, of range No. ——, to homestead entry original No. ——, district of lands subject to entry at ——, under the acts of Congress approved March 3, 1877, and May 27, 1878, do solemnly swear that I have never had the benefit of any right of pre-emption under section 2259 of the Revised Statutes of the United States; that I have not heretofore filed a pre-emption declaratory statement for another tract of land; that I was not the owner of three hundred and twenty acres of land in any State or Territory of the United States at any time during the above-mentioned period of settlement under the pre-emption statutes; that I did not remove from my own land within the State of —— to make the settlement above referred to; nor have I settled upon and improved said land to sell the same on speculation, but in good faith to appropriate it to my exclusive use or benefit; and that I did not, during the period of pre-emption settlement above-mentioned, directly or indirectly, make any agreement or contract, in any way or manner, with any person or persons whatsoever, by which the title which I might acquire from the Government of the United States would inure, in whole or in part, to the benefit of any person except myself.

——— ———.

I, ——— ———, of the land office ——, do hereby certify that the above affidavit was subscribed and sworn to before me this —— day ——, 18—.

——— ———.

———

ADJOINING HOMESTEADS.

Where an applicant owns a farm containing less than 160 *acres, he may enter public lands sufficient to make his holding equal to* 160 *acres, taking it, of course, in legal subdivisions. No proof of residence on the tract to be purchased is requisite, otherwise the entry proceeds as in a homestead entry.*

[No. 4–066.]

ADJOINING FARM HOMESTEAD.

[See page —.]

Affidavit.

LAND OFFCE AT ———,
(*Date*) ———, 18—.

I, ——— ———, of ——, having filed my application No.——, for an entry under the provisions of the act of Congress approved May 20, 1862, entitled "An act to secure homesteads to actual settlers on the public domain," do solemnly swear that ——— ——— [*here state whether the applicant is the head of a family, or over twenty-one years of age; whether a citizen of the United States, or has filed his declaration of intention of becoming such; or, if under twenty-one years of age, that he has served not less than fourteen days in the Army or Navy of the United States during actual war*]; that said entry is made for my own exclusive benefit, and not directly or indirectly for the benefit or use of any other person or persons whomsoever; neither have I heretofore perfected or abandoned an entry made under this act; that the land embraced in said application No. —— is intended for an adjoining farm homestead; that I now own and reside upon an original farm containing —— acres, *and no more;* that the same comprises the —— of section ——, township ——, range ——, and is contiguous to the tract this day applied for.

——— ———.

Sworn to and subscribed this —— day of ——, before

——— ———,

[No. 4–067.]

FINAL AFFIDAVIT REQUIRED OF ADJOINING FARM HOMESTEAD CLAIMANTS.

[Section 2291, Revised Statutes.]

I, ——— ———, having made a homestead entry of the —— section No. ——, in township No. ——, of range No. ——, subject to entry at ——, for the use of an adjoining farm owned and occupied by me on the —— of section No. ——, in township No. ——, of range No. ——, under section 2289 of the Revised Statutes, do now apply to perfect my claim thereto by virtue of section 2291 of the same, and for that purpose do solemnly —— that I am a citizen of the United States; that I have continued to own and occupy the land constituting my original farm, having resided thereon since the —— day of ——, 18—, to the present time, and have made use of the said entered tract as a part of my homestead, and have improved the same in the following manner, viz: ——. That no part of said land has been alienated, but that I am the sole *bona fide* owner as an actual settler; that I will bear true allegiance to the Government of the United States; and, further, that I have not heretofore perfected or abandoned an entry under the homestead laws.

——— ———.

I, ——— ———, of the land office at ——, do hereby certify that the above affidavit was taken and subscribed before me this —— day of ——, 18—.

——— ———.

ADDITIONAL HOMESTEADS.

The act of March 3, 1879, provides for an additional allowance of 80 acres adjoining original 80-acre location of a homestead within the limits of any railroad or military road land grant. For procedure, see page 1029, herein.

[No. 4–018.]

ADDITIONAL HOMESTEAD.

[Act of March 3, 1879.]

Application No. —.

LAND OFFICE AT ———,
(*Date*) ———, 18—.

I, ——— ———, of ———, do hereby apply to enter, under the act of March 3, 1879, the —— of section ——, in township ——, of range ——, containing —— acres, as additional to my entry No. ——, for the —— of ——, section ——, in township ——, of range ——.

LAND OFFICE AT ———,
(*Date*) ———, 18—.

I, ——— ———, register of the land office, do hereby certify that the above application is for surveyed lands of the class which the applicant is legally entitled to enter under the act of March 3, 1879, and that there is no prior valid adverse right to the same.

——— ———, *Register.*

[No. 4–086.]

ADDITIONAL HOMESTEAD.

[Act of March 3, 1879.]

Affidavit.

LAND OFFICE AT ———,
(*Date*) ———, 18—.

I, ——— ———, of ——, having filed my *application* No. ——, for an entry under the act of March 3, 1879, do solemnly swear that [*here state whether the applicant is the head of a family, or over twenty-one years of age; whether a citizen of the United States, or has filed his declaration of intention of becoming such; or, if under twenty-one years of age,*

that he has served not less than fourteen days in the Army or Navy of the United States during actual war]; that said application No. —— is made for my exclusive benefit; and that said entry is made for the purpose of actual settlement and cultivation, and not, directly or indirectly, for the use or benefit of any other person or persons whomsoever, and that I have not heretofore had the benefit of said act.

SOLDIERS' AND SAILORS' HOMESTEADS.

[Under act of June 8, 1872.]

For procedure in full, see pages 1030, 1031, herein.

APPLICATION.

Where the applicant appears in person he files the following soldier's declaratory statement; when filed it is in effect a preference right to a tract of public land, 160 acres, for six months; at the end of six months the party comes forward and makes entry in due form, as hereinafter shown.

FORM A.

[Circular of December 15, 1882.]

SOLDIER'S DECLARATORY STATEMENT.

I, ——— ———, of ——— county and State or Territory of ———, do solemnly swear that I served for a period of ——— in the Army of the United States during the war of the rebellion, and was honorably discharged therefrom, as shown by a statement of such service herewith, and that I have remained loyal to the Government; that I have never made homestead entry or filed a declaratory statement under sections 2290 and 2304 of the Revised Statutes; that I have located as a homestead under said statute the [describe land], and hereby give notice of my intention to claim and enter said tract; that this location is made for my exclusive use and benefit, for the purpose of my actual settlement and cultivation, and not either directly or indirectly for the use or benefit of any other person. My present post-office address is [give P. O.]

Sworn and subscribed before me this ——— day of ———, 188–.

[SEAL.]

NOTE.—This form may be used where the soldier files his own declaratory statement.

FORM B.

When he files his application by an attorney the following is used:

SOLDIER'S DECLARATORY STATEMENT.

I, ——— ———, of ——— County and State or Territory of ———, do solemnly swear that I served for a period of ——— in the Army of the United States during the war of the rebellion, and was honorably discharged therefrom, as shown by a statement of such service herewith, and that I have remained loyal to the Government; that I have never made homestead entry or filed a declaratory statement under sections 2290, 2304, or 2309 of the Revised Statutes; that I have appointed, by power of attorney, duly executed on the ——— day of ——— (or I do hereby appoint) ———, of ———, County and State of ———, my true and lawful agent, under section 2309 aforesaid, to select for me and in my name, and file my declaratory statement for a homestead right under the aforesaid sections; and I hereby give notice of my intention to claim and enter said tract under said statute; that the location herein authorized is made for my exclusive use and benefit, for the purpose of my actual settlement and cultivation, and not either directly or indirectly for the use or benefit of any other person; that my said attorney has no interest, present or prospective, in the premises,

and that I have made no arrangement or agreement with him or any other person for any sale or attempted sale or relinquishment of my claim in any manner or for any consideration whatever, and that I have not signed this declaration in blank.

Sworn and subscribed before me this ——— day of ———, 188–, and I certify that the foregoing declaration was fully filled out before being subscribed or attested.

[SEAL.]

By virtue of the foregoing, and of a certain power of attorney therein named, duly executed on the ——— day of ———, and filed herewith, I hereby select the ——— as the homestead claim of ———, the aforesaid, and do solemnly swear that the same is filed in good faith for the purposes therein specified, and that I have no interest or authority in the matter, present or prospective, beyond the filing of the same as the true and lawful agent of the said ———, as provided by section 2309 of the Revised Statutes of the United States.

——— ———,
Agent.

Sworn and subscribed before me this ——— day of ———, 188–.

[SEAL.]

NOTE.—This form may be used where the declaratory statement is filed by an agent under section 2309, Revised Statutes.

NON-MINERAL AFFIDAVIT.

The claimant now files a non-mineral affidavit. (See page 1034 for form.)

APPLICATION.

The claimant here files his application.

Must be filed at end of six months under declaratory statement entry or is used in direct entry by claimant (see pages ——), as in other homestead entries.

[Soldiers' and sailors' homesteads under act June 8, 1872.]

HOMESTEAD APPLICATION.

Application No. —.

LAND OFFICE AT ———,
———, —, 187–.

I, ——— ———, of ———, do hereby apply to enter, under the provisions of section 2304, Revised Statutes United States, the ——— of section —, in township —, of range —, containing ——— acres, and for which I filed my declaration on the —— day of ———, 187–, through ——— ———, my duly-appointed agent.

——— ———.

LAND OFFICE AT ———,
———, —, 187–.

I, ——— ———, register of the land office, do hereby certify that ——— ——— filed the above application at this office on the —— day of ———, 187–, and that he has taken the oath and paid the fees and commissions prescribed by law.

——— ———,
Register.

AFFIDAVIT OF CLAIMANT.

Claimant files the following:

[No. 4-065.]

[Soldiers' and sailors' homesteads under act June 8, 1872.]

Affidavit.

No. —.] LAND OFFICE AT ———,
———, —, 187–.

I, ——— ———, of ———, do solemnly swear that I am a ——— of the age of twenty-one years and a citizen of the United States; that I served for ninety days in Company —, ——— Regiment United States Volunteers; that I was mustered into the

United States military service the —— day of ———, 18—, and was honorably discharged therefrom on the —— day of ———, 18—; that I have since borne true allegiance to the Government; and that I have made my application No. — to enter a tract of land under the provisions of section 2304 of the Revised Statutes of the United States, giving homesteads to honorably discharged soldiers and sailors, their widows and orphan children; that I have made said application in good faith; and that I take said homestead for the purpose of actual settlement and cultivation, and for my own exclusive use and benefit, and for the use and benefit of no other person or persons whomsoever; and that I have not heretofore acquired a title to a tract of land under this or the original homestead law, approved May 20, 1862, or the amendments thereto, or voluntarily relinquished, or abandoned, an entry heretofore made under said acts: So help me God.

——— ———.

Sworn and subscribed to before me, ——— ———, register of the land office at ———, this —— day of ———, 187-.

——— ———,
Register.

RECEIVER'S RECEIPT AND EXCESS RECEIPT.

The receiver then issues the regular homestead receipt on page 1035, and excess receipt, if any there be, noting the character of the entry on their face.

FINAL ENTRY OF SOLDIERS' AND SAILORS' HOMESTEAD.

The procedure is the same as in homesteads, except as to time of settlement. The time of service of the party in the Army or Navy is deducted from the five years required, but the law requires an actual residence and cultivation of at least one year after improvements are commenced.

SOLDIERS' AND SAILORS' ADDITIONAL HOMESTEAD ENTRIES.

For procedure, see page 1030.

Where a soldier or sailor, or other person entitled, who prior to June 22, 1874, made a homestead entry containing less than 160 acres, under section 2306, Revised Statutes, such person may enter public land sufficient to make, with the prior entry, 160 acres.

The application *must be presented* at the *district land office by applicant in person.*

[No. 4-008.]

SOLDIERS' ADDITIONAL HOMESTEAD ENTRY.

[Under section 2306 of the Revised Statutes of the United States.]

APPLICATION.

No. ——.

Must be sworn and subscribed to before the register or receiver, or in their presence.

LAND OFFICE AT ———,
(*Date*) ———, 18—.

I, ——— ———, of ——— county, State of ——, being entitled to the benefits of section 2306 of the Revised Statutes of the United States, granting additional lands to soldiers and sailors who served in the war of the rebellion, do hereby apply to enter the —— of section ——, of township ——, of range ——, containing —— acres, as additional to my original homestead on the —— of section ——, of township ——, of range ——, containing —— acres, which I entered ——, 18—, per homestead No. ——.

——— ———.

LAND OFFICE AT ———,
(*Date*) ———, 18—.

I, ——— ———, register of the land office at ——, do hereby certify that ——— ——— filed the above application before me for the tract of land therein described, and that he has paid the fee and commissions prescribed by law.

——— ———, *Register.*

RECEIVER'S RECEIPT.

[See forms (4–137 and No. 4–138) page 1035.]

The receiver here issues, in duplicate, his receipts for fees and commissions paid, the same as in original homestead entry, marking the character of the entry on the face of the papers.

SPECIAL AFFIDAVIT REQUIRED OF CLAIMANT.

See page 1021 for necessary showing to be made in a special affidavit in each case, to be made in the presence of the register or receiver.

RECEIVER'S FINAL RECEIPT.

The receiver here issues in duplicate a final receipt. See form [No. 4–140], page 1040, herein.

REGISTER'S CERTIFICATE.

Issued in duplicate.

[No. 4–197.]

SOLDIERS' ADDITIONAL HOMESTEAD ENTRY.

[Under section 2306 of the Revised Statutes of the United States.]

Final certificate No. —. Application No. —.

LAND OFFICE AT ——-,
(*Date*) ——, 18—.

It is hereby certified that, pursuant to the provisions of section 2306 of the Revised Statutes of the United States, —— —— has paid the fee and commissions, and made entry of the —— of section——, of township ——, of range ——, containing —— acres, which, added to the quantity embraced in his original homestead No. ——, on which he made his final proof, as per certificate No. ——, does not exceed 160 acres.

Now, therefore, be it known that, on presentation of this certificate to the Commissioner of the General Land Office, the said —— —— shall be entitled to a patent for the tract of land above described.

—— ——, *Register.*

INDIAN HOMESTEADS.

[See page 1032.]

Cannot be commuted by cash payments for land as in other homesteads.

The procedure in this class of entries is the same, from inception until issue of certificate of patent, as in Homestead Entries, page —, with the addition of the two following forms, which are filed at the time of making application:

[No. 4–079.]

INDIAN HOMESTEAD.

[Under act of March 3, 1875.]

Affidavit.

I, —— ——, of ——, having filed my application No. —— for an entry under the provisions of the act of Congress of March 3, 1875, do solemnly swear that I am an Indian, formerly of the —— tribe; that I was born in the United States; that I

have abandoned my relations with that tribe and adopted the habits and pursuits of civilized life [*here state whether the applicant is twenty-one years of age, or the head of a family*]; that I desire said land for the purpose of actual settlement and cultivation, and not, directly or indirectly, for the use or benefit of any other person or persons whomsoever; and that I have not heretofore had the benefit of said act.

——— ———.

Sworn and subscribed before me this —— day of ——, 18—.

———— ————,
Register [*or Receiver*].

[No. 4–077.]

INDIAN HOMESTEAD.

[Under act March 3, 1875.]

Corroborative affidavit.

———— ———— and ———— ———— do solemnly swear that we are well acquainted with ———— ————, and know that he is an Indian, formerly of the —— tribe; that he was born in the United States; that he has abandoned his relations with that tribe, and adopted the habits and pursuits of civilized life [*here state that he is twenty-one years of age, or, if not, that he is the head of a family*].

——— ———.
——— ———.

Sworn to and subscribed before me this —— day of ——, 18—.

——— ———.

In all cases the papers, when entry is completed, are transmitted to the General Land Office at Washington, D. C., for approval and patent.

TIMBER AND STONE ACT.

[See Chapter XXVIII, pages 357 to 359, and 1285.]

The law for sale of timber applies only to public lands in California, Oregon, Nevada, and Washington Territory.

TO JUNE 30, 1882.

From June 3, 1878, the date of the act, to June 30, 1882, 159,008,041 acres of timber and stone land have been sold.

PREVENTION OF DEPREDATIONS ON THE PUBLIC TIMBER.

The reports of the Commissioner of the General Land Office for the years 1881 and 1882 contain much important information as to the operation of this law and as to "depredations on the timber on the public domain." In his report for 1881 he says:

At the beginning of the past fiscal year [July 1, 1880] there were engaged in the work of suppressing depredations upon the public timber lands fifteen special timber agents, distributed in the various public-land States and Territories. At the close of said year there were in the employ of this office seventeen agents, of whom three were assigned to duty in Alabama, Florida, Louisiana, and Mississippi, one in Arkansas, one in California, one in Dakota, two in Michigan, two in Minnesota, one in Missouri, three in New Mexico and Arizona, one in Oregon and Washington Territory, one in Wisconsin, one in Wyoming, Utah, and Colorado. In Idaho, Montana, and Nevada the local land officers give some attention to the suppressing of timber depredations within their respective land districts.

Here follows a detailed statement of the operations of the agents in the several land districts for the year 1881. The results of the year's work are shown by the following:

RECAPITULATION FOR 1881.

	Number.	Valuation on ground.
Trespass cases reported during fiscal year involving material, timber, unlawfully cut and removed from the public lands, as follows:	322	
Logs	21,536	$8,614 00
Sticks of square timber	2,485	24,850 00
Telegraph poles	14,080	3,520 00
Posts	17,770	1,777 00
Trees	6,719	2,687 00
Cords of wood	128,394	64,197 00
Railroad ties	142,058	4,261 00
Hop-poles	40,000	400 00
Cords of bark	100	500 00
Lumber manufactured—board measure—feet	79,936,637	79,935 00
Land on which trees were boxed for turpentine, acres, damages	22,845	17,186 00
Logs reported seized and held by United States	10,500	4,200 00
Telegraph poles reported seized and held by United States	1,900	475 00
Sticks of timber, square, reported seized and held by United States	1,287	12,870 00
Total value of timber cut, removed, or damaged		225,472 00
Propositions received for settlement in trespass cases during fiscal year.	87	
Involving stumpage amounting to		27,946 00
Involving purchase of 27,848.32 acres land, amounting, at $1.25 per acre, to.		34,810 00
Total valuation included in propositions		62,756 00

Amount paid into the United States Treasury on account of timber depredations during the past fiscal year, through the United States courts, on judgments and compromises	$31,584 69
Amount paid in to the receivers of public money on account of settlement of trespass cases, authorized by the Secretary of the Interior, where no suit was pending, including stumpage, amount received on land entered under act of June 15, 1880, and costs	10,095 28
Total paid in	41,679 97
Amount appropriated by Congress under act of June 16, 1880, "to meet expenses of protecting timber on public lands"	40,000 00
Balance in favor of the Government over appropriation	1,679 97

The Commissioner says:

The foregoing table, while showing amount paid in on account of fines and penalties for timber depredations for the fiscal year to be in excess of the appropriation made for the protection of the timber lands, does not present the actual excess. As above stated, there have been eighty-seven propositions for compromise accepted to the amount of $62,756, and authority given to settle. But the receivers of public money, owing to the late date at which they received this authority, have settled and reported only a few of the cases, amounting, as shown, to $10,095.28, leaving as a balance still due on compromise trespass cases for the year the sum of $52,661, which sum is properly a credit, and should be added to balance shown in table above, making the actual amount in favor of Government over amount appropriated, $54,340.97.

TIMBER DEPREDATIONS FOR 1882.

The General Land Office furnishes the following result of operations of its timber agents for the year ending June 30, 1882:

Recapitulation for 1882.

Number of cases investigated and reported during fiscal year ending June 30, 1882		817
Number of criminal suits instituted	137	
Number of civil suits instituted	152	
Number of propositions of settlement received and acted upon	110	
Number of cases now awaiting further investigation and final action	418	
Total		817

Statement showing value involved in civil suits instituted, amount accepted on propositions of settlement, and amount involved in cases now under investigation, which presents in brief the amount and value of work performed by the special timber agents of this office during the fiscal year.

Estimated value on ground (stumpage) of timber, lumber, &c., involved in civil suits	$160,583 86
Value of timber, lumber, &c., involved in accepted propositions of settlement	51,668 84
Estimated value on ground (stumpage) of timber, lumber, &c., involved in cases reported and now under further investigation	298,816 78
Total	511,069 48

Statement showing amount involved and accepted on account of propositions of settlement of trespass cases, in which no suits have been instituted; also, presenting amount of money paid in through receivers of public moneys, and amount still due on accepted propositions of settlement.

Total amount involved in accepted propositions of settlement	$51,668 84
Total amount paid in to receivers of public moneys	14,511 67
Balance due	37,157 17

Statement showing amount involved in civil suits instituted, and amounts collected on same through the courts.

Total amount involved in civil suits instituted	$160,583 86
Total amount collected and paid into court on account of suits in trespass cases	24,071 60
Balance to be collected	136,512 26

Statement showing amount and kind of timber, lumber, and other material involved in the 817 *cases investigated and reported to this office during the fiscal year; also, showing the stumpage and market values of the same.*

Number of feet of timber	222,734,583
Number of railroad ties	2,434,525
Number of trees	9,685
Number of logs	176,799
Number of poles	12,475
Number of sticks of square timber	1,926
Number of cords of bark	650
Number of posts	11,050
Number of hop poles	20,000
Number of shingles	575,000
Number of cords of wood	79,139
Number of sugar pine shakes	1,100,000
Number of pickets	65,000
Number of acres of land trespassed upon (amount of timber not given)	60,960
The estimated market value of material described in above statement	$2,044,277 92
Estimated stumpage value of same	511,069 48

Statement showing total amount paid through the courts in civil cases on account of judgments rendered in trespass cases, amount received on account of propositions of settlement submitted and accepted, and amount paid in to receivers of public moneys on account of lands entered under the act of June 15, 1880; *also, showing amount still due on account of propositions of settlement accepted during the fiscal year.*

Amount paid through the courts in civil cases	$24,071 60
Amount paid in to receivers of public moneys on account of settlements made, no suits pending	14,511 67
Amount paid in to receivers of public moneys on account of lands entered under act of June 15, 1880	1,625 00
Amount still due on account of propositions of settlement submitted and accepted during the year	37,157 17
Total	77,365 44

Statement showing amount of appropriation made for the fiscal year ending June 30, 1882, for the suppression of timber depredations.

Amount appropriated for fiscal year 1882	$40,000 00
Balance in favor of Government	37,365 44

The Commissioner says:

The foregoing tables present as nearly as possible the results attained by this office in its efforts to suppress depredations upon the public timber lands, showing amount and value of the material destroyed, and the amount collected on account of such trespasses.

I am, however, unable to give amount collected through the courts on account of fines and penalties in criminal cases, as the same are not returned to the Department of Justice under the head of "timber depredations," but are included in the general report of moneys collected as "fines and penalties."

TIMBER DEPREDATIONS—REMEDY FOR.

Mr. Commissioner McFarland states the necessity for protection of the public timber so forcibly, and makes such practical recommendations for the future in his reports for 1881 and 1882, that they are here given in detail.

RESULT OF THE AGENTS' WORK.

To properly extend the protection necessary in guarding the valuable timber lands of the United States from future devastation and wanton destruction would require more than double the number of agents now in the field. That the present force has been very effective, a careful investigation of the work performed by them during the past year will, I believe, be most convincing.

The results attained are satisfactory, both in a financial sense and in the salutary effect which the detection and punishment of well-known offenders has had upon the communities in which they reside, by warning others that the public property must be respected, and that its removal for private gain is a crime, and will be treated as such.

It has had the further effect of convincing persons engaged in legitimate and honest business enterprise that they would be protected against vicious and unlawful competition from those whose material heretofore has been unlawfully obtained.

CHANGE OF SENTIMENT AS TO DEPREDATIONS.

The special agents report that, in many localities which have heretofore been hostile to them in the performance of their duties, there at present seems to be a general feeling in favor of the suppression of further depredations; that it is now much easier to obtain information regarding trespassers and their unlawful acts than formerly, when the community seemed leagued together for mutual protection against the officers of the Government. They also report that the change is not brought about so much by fear of the law as by the fact that the genuine and bona-fide settlers and residents recognize the vast injury done their respective sections in the denuding the country of its valuable timber, and that the benefit derived from many of the present lumbering operations is but temporary and trifling in comparison with the future advantages that must accrue to them by a judicious system of protection to the timber lands, which, in many sections of the country, constitute the only natural wealth.

I may be permitted in this connection to express the opinion that much credit is due to the special agents, as a body, for the manner in which they have performed their duties, and that, while fully caring for the interests of the Government, they have avoided everything that could be construed as having the semblance of persecution.

EXTENT AND LOCATION OF DEPREDATIONS.

It will be seen by the foregoing report presented of depredations in each public-land State and Territory that, while a general system of depredating upon the public lands has been carried on throughout the country, the most extensive trespassing has been committed in the States of Florida, Alabama, Mississippi, Louisiana, Michigan, Wisconsin, and Colorado, and the Territories of New Mexico, Dakota, and Washington.

The Gulf States, with their vast forests of live-oak and pine, their convenient and accessible harbors for shipment, the numerous streams, lakes, and lagoons that offer so cheap and convenient a means of transportation to a market or mill, have for years

been infested with a class of non-residents who have plundered the public lands in these States to an extent generally unknown. For years there have been shipped to various parts of the world immense quantities of the finest and most valuable ship timber. So extensive and bold have these depredations become that the naval reserve lands, though guarded by resident agents, were invaded and timber cut and carried away.

In addition to the mill-owner, timber contractor, and speculator, there is another class of depredators whose operations are even more extensive and destructive; they are the turpentine distillers. To obtain the crude material to supply their works, it is no uncommon thing for one of these operators to have the trees boxed on from one thousand to ten thousand acres. When it is known that the trees will only endure boxing for about five consecutive years before dying, it will be seen that a trespass of this character is most destructive.

The yet large areas of public lands in Michigan and Wisconsin have also been the field of perhaps the most extensive trespassing in the country. While many of the large lumber companies have manufactured a portion of their products from timber growing on purchased lands, it is a well-established fact that millions of feet of lumber, thousands of railroad ties, telegraph poles, cords of wood and bark have been taken from the public lands. In many places the land has been stripped of both trees and undergrowth. These States have furnished much of the building material that has supplied for years the great demand from the growing Western States. New Mexico and Colorado have but recently become the field of the timber depredators.

DEPREDATIONS BY RAILROADS.

Attention is also called to the fact that large quantities of timber, especially in New Mexico, are being cut from the public lands of the United States, and from unconfirmed private grants, for delivery under contract to railroads now being constructed in the Republic of Mexico; notably the Mexican Central. This company openly advertises in the press of New Mexico for railroad ties and telegraph poles to be delivered to its agents at El Paso, Mexico. It is also a well-known fact that much of this material is delivered on the line of the Atchison, Topeka and Santa Fé Railroad, to be transported by it to the said point of delivery, all of which is contrary to law.

INDIVIDUAL DEPREDATORS.

There is still another class of depredators who, under shadow of title, strip the timber from a certain section of country or tract of land by making what they claim to be a desert-land entry. They make the first payment as required by law; sink a well or two, in the mean time cutting and removing what timber or wood there is, and then they abandon the entry. Another great source of loss and destruction of timber, especially in Colorado, is the extensive fires that break out in the mountain ranges, sweeping away vast quantities of growing timber. While, perhaps, these cannot be entirely prevented, they might be measurably reduced, if, when the fire was wantonly set, the offender could be punished. The timber act of June 3, 1878, applying to Colorado, &c., makes no provision for this offense, and in the absence of any legal penalty therefor the offender, if detected, cannot be reached.

FLUME MEN AND MILL-OWNERS.

Washington and Dakota Territories are also the field of extensive depredations. Those committed in the first-named Territory have been mostly committed by mill-owners and flume companies. In and around Puget Sound, which is famous for its magnificent timber, large saw-mills have been erected for the manufacture of lumber, most of which is shipped out of the country for a market. The owners and managers of most of these mills reside in San Francisco, and have been engaged in the lumber business for many years. The greater proportion of all the lumber cut for these mills has come from the public lands, and many of these depredations amount to millions of feet.

The flumes are generally for the driving of logs and lumber, which in most instances have been taken from the public lands. Mills are also being erected at many points where the owners can depend upon the public timber for their supply of logs.

NECESSITY FOR NEW TIMBER LAWS.

In his report for 1882, the hononorable Commissioner continues:

While much has been accomplished in the direction of suppressing the unlawful cutting and removing of timber from the public lands, I am of the opinion that better results can be obtained in the future; particularly so if some general and comprehensive law could be passed clearly defining who may take timber from the public lands,

the purposes for which it may be cut and removed, and prescribing the punishment for unlawfully cutting, removing, or in any way wantonly destroying or injuring any timber growing or being upon any of the public lands, or in any way causing or inciting such trespass. Such law should also establish the terms and conditions upon which any compromise or settlement should be authorized. A law of this nature would be more generally understood and comprehended than the several different enactments relating to this subject now in force, and could be more easily and evenly administered.*

THE RESULT OF THE TIMBER AND STONE ACT TO JUNE 30, 1882.

[See page 1288.]

Sales of timber and stone lands under act of June 3, 1878, *from the date of act to June* 30, 1882.

*Page 687. †Army or Navy.

To accompany "Public Domain" *By Thomas Donaldson*

Map, showing (approximately) the timber lands of the public domain now in charge of the General Land Office, and over which its special timber agents have jurisdiction. The color in depth indicating in a measure the density of the timber growth. No estimate of quantity can be given or the exact locality be indicated in many of the States or Territories of the remaining public timber lands, as, for instance, in Florida, Alahama, Mississippi, Louisiana, Arkansas, Missouri, Minnesota, Wisconsin or Michigan; an enormous area, however, in these divisions, is yet the property of the Nation.

Tennessee, Ohio, Indiana, Illinois and Iowa, are left blank, as almost all of the public lands have been disposed of therein, and no timber of moment being on any of the remaining lands.

Indian Territory is indicated, but its area is not public lands in the sense of sale or disposition. The special timber agents work here, however, and prevent trespass or depredation.

The area estimated as remaining June 30th, 1883, was about seventy-three millions of acres, a large area of this will, by comparison with the "Precious Metal" map, page 979, be found to be on the surface, and above most of the gold, silver, and cinnabar lands of the public domain. This estimate of timber area is exclusive of Alaska, whose timber area, of large extent, is still the property of the Nation, no public land laws having been as yet extended over it.

Base Map from Mitchell's Series of Geographies, published by E. H. Butler & Co. Philadelphia.

AREA OF TIMBER LANDS REMAINING.

For extent and area of timber lands on the public domain, and over which the special timber agents have jurisdiction, subject to the General Land Office and the Department of the Interior, see map facing this page. Area estimated remaining June 30, 1883, 75,000,000 acres, and December 1, 1883, 73,000,000.

INSTRUCTIONS TO SPECIAL AGENTS OF THE GENERAL LAND OFFICE APPOINTED TO PREVENT TIMBER DEPREDATIONS UPON GOVERNMENT LANDS AND TO PROTECT THE PUBLIC TIMBER FROM WASTE AND DESTRUCTION.

IN EFFECT DECEMBER 1, 1883.

INDEX.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., June 1, 1883.

The following instructions to special timber agents and the rules and regulations contained herein are hereby prescribed by this office, and all special timber agents of this office will hereafter be governed by and comply with the same.

All previous instructions and rules and regulations prescribed by this office in conflict herewith are rescinded.

N. C. McFARLAND,
Commissioner.

DEPARTMENT OF THE INTERIOR,
June 1, 1883.

Approved.

H. M. TELLER,
Secretary.

INSTRUCTIONS TO SPECIAL TIMBER AGENTS.

DESIGNATION OF SPECIAL AGENTS.

1. Special agents of the General Land Office, Interior Department, appointed to prevent depredations upon the public timber and to protect the same from waste and destruction will hereafter be designated as "special timber agents."

QUALIFICATIONS OF SPECIAL TIMBER AGENTS.

2. A special timber agent must, in order to render intelligent and effective service, have a thorough understanding as to the object sought to be accomplished in protecting the timber growing upon Government land; the classes of lands upon which the timber needs protecting, or upon which timber depredations are liable to be committed; what persons are authorized or permitted to fell or remove timber therefrom, to what extent and for what purpose; what constitutes a timber trespass upon Government land; what penalties are attached to such trespass, and what are the duties of a special timber agent in the premises.

To this end the following directions and instructions are issued. For ready reference they have been arranged under several headings, and the paragraphs under each heading numbered.

Special timber agents are expected to study these instructions closely and carefully until they have thoroughly familiarized themselves with the nature of the duties devolving upon them.

OBJECT OF PROTECTING TIMBER UPON GOVERNMENT LAND.

3. The object of the Government in endeavoring to prevent the waste and destruction of public timber is, primarily, to preserve it for the wants of future generations—having, of course, due regard for the requirements of the present. The result of the destruction of forests in permitting a more rapid melting of the snows in spring than would occur in the same region if well sheltered, and in decreasing the capacity of the soil to retain moisture after rains—in both cases increasing the liability to sudden and devastating floods, not only in the denuded sections, but sometimes hundreds of miles distant—also the well-established climatic influence of such destruction in diminishing the annual rainfall, to the serious detriment of regions already subject to frequent droughts, are other reasons which render the preservation of the public timber a matter of vital importance not only to the agricultural but to many other extensive interests.

CLASSES OF GOVERNMENT LAND.

4. Government land embraces all land the title of which is in the Government; and for the present purpose may be divided into four classes:

1st. Vacant unoccupied public land;

2d. Land covered by homestead, pre-emption, or other entry, upon which the claimant has not so fulfilled his obligations under the law as to entitle him to patent;

3d. Mineral lands;

4th. Military, naval, Indian, and other Government reservations.

VACANT PUBLIC LAND.

5. All unoccupied lands of the United States to which no valid claim has attached, and which are subject to homestead, pre-emption, or other entry, or which can be sold or otherwise disposed of by the United States, are vacant public lands.

6. From such lands, if not mineral in character (see "Mineral lands" below), no person or persons can lawfully fell or remove any timber, except right of way railroad companies for certain purposes, and under certain conditions.

(See "Right of railroad companies to take timber from public land," page 1059.)

LANDS COVERED BY HOMESTEAD OR PRE-EMPTION ENTRY.

7. Lands covered by homestead or pre-emption claims are lands upon which citizens of the United States have made entry, and have filed certain papers in the proper district land office, obligating themselves to conform to the requirements of the law as to occupancy, cultivation, and improvement.

8. The claimant to any such land, provided he is living upon, cultivating, and improving the same in accordance with law and the rules and regulations prescribed by this Department, is permitted to cut and remove, or cause to be cut and removed, from the portion thereof to be cleared for cultivation, so much timber as is actually necessary for that purpose, or for buildings, fences, and other improvements on the land entered.

9. In clearing for cultivation, should there be a surplus of timber over what is needed for the purposes above specified, he may sell or dispose of such surplus; but it is not allowable for him to denude the land of its timber for the purpose of sale or speculation until he has made final proof and acquired title. (See Decisions 3, 4, and 5, appendix, page 1075.)

10. Where the facts justify the conclusion that the person has made his entry in good faith, and is cultivating and improving the land with the purpose of making it his home, the agent need not consider it his duty to report every deviation from the preceding rule. But where the person does not make the land his actual residence, and cultivate and improve the same, or where the value of the timber cut and removed is greatly in excess of the improvements, or where other facts afford a strong presumption that the entry was not made in good faith, but solely for the purpose of denuding the land of its timber, the case should be at once reported to this office.

11. No person other than the one making the entry has a right to cut timber from such land for any purpose whatever.

MINERAL LANDS.

12. Mineral lands are those which are more valuable for the mineral therein than for agricultural purposes or for the timber thereon.

13. The right to take timber from mineral lands for building, agricultural, mining, or other domestic purposes is specially provided for under act of Congress approved June 3, 1878, as follows:

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That all citizens of the United States and other persons, *bona fide* residents of the State of Colorado or Nevada, or either of the Territories of New Mexico, Arizona, Utah, Wyoming, Dakota, Idaho, or Montana, and all other mineral districts of the United States, shall be, and are hereby, authorized and permitted to fell and remove, for building, agricultural, mining, or other domestic purposes, any timber or other trees growing or being on the public lands, said lands being mineral, and not subject to entry under existing laws of the United States, except for mineral entry, in either of said States, Territories, or districts of which such citizens or persons may be at the time *bona fide* residents, subject to such rules and regulations as the Secretary of the Interior may prescribe for the protection of the timber and of the undergrowth growing upon such lands, and for other purposes: *Provided*, The provisions of this act shall not extend to railroad corporations.

"SEC. 2. That it shall be the duty of the register and the receiver of any local land office in whose district any mineral land may be situated to ascertain from time to time whether any timber is being cut or used upon any such lands, except for the purposes authorized by this act, within their respective land districts; and, if so, they shall immediately notify the Commissioner of the General Land Office of that fact; and all necessary expenses incurred in making such proper examinations shall be paid and allowed such register and receiver in making up their next quarterly accounts.

"SEC. 3. Any person or persons who shall violate the provisions of this act, or any rules or regulations in pursuance thereof made by the Secretary of the Interior, shall be deemed guilty of a misdemeanor, and, upon conviction, shall be fined in any sum not exceeding five hundred dollars, and to which may be added imprisonment for any term not exceeding six months."

14. Rules and regulations under the preceding act have been prescribed by this Department under dates of August 16, 1878 (see page 1071), July 1, 1880, and July 1, 1882; but those of the two earlier dates are no longer in full force, the one having been revoked and the other modified by that of the last-named date, which is as follows:

"The rules and regulations heretofore prescribed by this Department under act of Congress approved June 3, 1878, entitled 'An act authorizing the citizens of Colorado, Nevada, and the Territories to fell and remove timber from the public domain for mining and domestic purposes,' are hereby modified as follows:

"All citizens and *bona fide* residents of the States and Territories mentioned therein are authorized to fell and remove, or employ others to fell and remove, or to purchase from others who fell and remove, any timber growing or being upon the public mineral lands in said States or Territories: *Provided*,

"1. That the same is not for export from the State or Territory where cut.

"2. That no timber less than eight inches in diameter is cut or removed.

"3. That it is not wantonly wasted or destroyed.*

* * * * * * *

"As the rules and regulations in relation to the cutting and removing of timber from the public mineral lands are modified as hereinbefore stated, all agents and officers of this Department are hereby instructed that in reporting cases of alleged trespass they will be governed in their report upon the mineral or non-mineral character of the land by the following general rule:

"Where the lands are situated in districts of country that are mountainous, interspersed with gulches and narrow valleys, and minerals are known to exist at different points therein, such lands, in the absence of proof to the contrary, will be held to be mineral in character; but where there are extensive valleys, plains, or mountain ranges, and no known minerals exist, the land may be considered and treated as non-mineral.

"Said agents and officers are further instructed that hereafter, in forwarding reports in cases of timber trespass, a simple statement to the effect that the lands in question are mineral or non-mineral in character will not be regarded by this office as sufficient proof; evidence establishing that fact must in all cases accompany and form a part of said report.

"In investigating cases of timber trespass in *mineral* districts said agents and officers will be careful hereafter to report only those cases in which there has been a violation of the rules and regulations above specified.

"All rules and regulations heretofore prescribed by this Department in cases of timber trespass upon public lands *non*-mineral in character remain in force.

"All rules and regulations or instructions heretofore prescribed under said act of June 3, 1878, by this Department inconsistent with the provisions contained in this circular are hereby rescinded."

---

* The portion of the circular here omitted related to the right of railroad companies to take timber, and has been amended by office circular of March 3, 1883 (approved March 5, 1883). See "Right of railroad companies to take timber," page 1059.

15. The following portion of the circular issued by this office under date of September 19, 1882 (approved September 21, 1882), applies also to the cutting and removal of timber from public mineral lands authorized by said act of June 3, 1878:

"One of the most dangerous elements to contend with in case of forest fires, and one of the principal auxiliaries to the spread of the same, is the dry tops of trees which parties leave upon the ground after having cut and removed the timber for saw logs and other purposes. When the tree tops can be profitably cut into wood, the person cutting such trees on public land—when such cutting is authorized by law—must cut the tops into wood, or at least cut up and pile the brush in such manner as to prevent the spread of fires.

"A failure on the part of woodsmen to utilize all of the tree that can profitably be used, and to take reasonable precaution to prevent the spread of fires, will be regarded by this office as wanton waste, and subject them to prosecution for wanton waste and destruction of public timber."

16. Non-residents of a mineral district are not authorized, under any circumstances, to fell or remove timber from public mineral lands in said district, except for use in such purposes.

17. Railroad companies are prohibited from the privileges granted in said act; that is, they cannot take timber from public mineral lands for buildings, fuel, &c.; but are not prohibited from taking timber from such lands for construction purposes, as authorized under act of March 3, 1875.

18. Special attention is called to the fact that the authority granted in said act of June 3, 1878, applies exclusively to lands which are strictly mineral in character and subject to mineral entry only. The evidence must be positive that such lands are more valuable for the mineral thereon than for any other purpose, and that they are not suitable for agricultural purposes or cultivation, or valuable solely for the timber thereon.

19. Every report of an alleged depredation upon public land in a mineral district must be accompanied by affidavits from two entirely disinterested and responsible persons as to the mineral or non-mineral character of the land. (See Forms No. 11 and 12, page 1081.)

20. The object of the Department in providing that such timber shall not be exported is, to protect the settlers in sparsely timbered districts from being deprived of the timber necessary for their domestic uses. It is not, however, the intent of the Department to strictly enforce a technical prohibition in cases where the interests of the settlers in the districts from which timber is cut and removed are not injuriously affected thereby.

21. The removing of timber or lumber from one State or Territory across the line into an adjoining State or Territory, but not out of the same general district or section of country, is not such exportation as it is intended to prohibit.

22. In investigating cases of alleged export, special timber agents must examine carefully into all the facts, and report in full, especially as to the manner in which the settlers and residents of the district from which the timber is cut and removed are affected thereby.

23. The object of the Department in prohibiting the cutting or removing of trees less than eight inches in diameter is the preservation of the young timber and undergrowth, so as to provide a supply for the future, when such trees shall have matured. But it is not the intention to prohibit the cutting or removal of any full-grown tree belonging to a species which, *when mature*, does not exceed eight inches in diameter, or of any mature tree; nor of trees of any description, even if less than eight inches of diameter, if it can be shown that there were no other trees in that vicinity. Therefore in investigating cases of alleged trespass where the trees cut or removed are of less than the prescribed size, the agent must ascertain and report the species of tree so cut or removed, the average size which trees of that species attain in that section of country, and whether the trees cut and removed were growing trees, or trees of mature growth, whether the trees in that vicinity generally are less than eight inches in diameter, and all other facts necessary to be known to enable this office to determine whether the cutting was that of *mature* trees of less than the required size, or of the largest trees obtainable in that locality even if less than eight inches in diameter, or whether it was a case of wanton and wasteful destruction of the public timber.

24. Locators of mining claims, so long as they comply with the law governing their possessions, are invested by Congress with the exclusive right of possession and enjoyment of all the surface included within the lines of their locations. If a locator neglects to protect himself and his possessions, the law does not assume that the United States is injured by the cutting and use of the timber on such claim. It is the duty of the possessor to care for his own if trespass be attempted by a stranger; he alone is concerned for its protection, and may undoubtedly maintain suit to that end. (Secretary's decision, September 30, 1882.)

MILITARY, NAVAL, INDIAN, AND OTHER GOVERNMENT RESERVATIONS.

25. The timber upon military, naval, Indian, and other Government reservations is the property of the United States, and no person has the right to fell or remove the same unless employed by the Government for that purpose. Therefore, any timber trespass discovered upon such reservations must be reported to this office (in the same manner as trespass upon vacant public land) for reference to the proper Department.

RIGHT OF RAILROAD COMPANIES TO TAKE TIMBER FROM VACANT PUBLIC LANDS.

26. All *land-grant* railroads are authorized, in the granting act, to take timber from the public land adjacent thereto, for construction purposes. This authority, however, is confined strictly to timber for construction purposes *only*, in every grant except that to the Denver and Rio Grande Railroad, which authorizes said road to take timber for repairs also.

27. All *right-of-way* railroads are authorized to take timber from the public lands adjacent to the line thereof, for construction purposes *only*, under act of March 3, 1875 (Supplement to the Revised Statutes, chapter 152), as follows:

AN ACT granting to railroads the right of way through the public lands of the United States.

Be it enacted, &c. * * *

SECTION 1. That the right of way through the public lands of the United States is hereby granted to any railroad company duly organized under the laws of any State or Territory, except the District of Columbia, or by the Congress of the United States, which shall have filed with the Secretary of the Interior a copy of its articles of incorporation; and due proofs of its organization under the same, to the extent of one hundred feet on each side of the central line of said road; also the right to take, from the public lands adjacent to the line of said road, material, earth, stone, and timber necessary for the construction of said railroad.

* * * * * * * .

SEC. 4. That any railroad company desiring to secure the benefits of this act shall, within twelve months after the location of any section of twenty miles of its road, if the same be upon surveyed lands, and if upon unsurveyed lands, within twelve months after the survey thereof by the United States, file with the register of the land office for the district where such land is located a profile of its road; and upon approval thereof by the Secretary of the Interior, the same shall be noted upon the plats in said office; and thereafter all such lands over which such right of way shall pass shall be disposed of subject to such right of way: *Provided*, That if any section of said road shall not be completed within five years after the location of said section, the rights herein granted shall be forfeited as to any such uncompleted section of said road.

SEC. 5. That this act shall not apply to any lands within the limits of any military park, or Indian reservation, or other lands especially reserved from sale, unless such right of way shall be provided for by treaty stipulation or by act of Congress heretofore passed.

SEC. 6. That Congress hereby reserves the right at any time to alter, amend, or repeal this act, or any part thereof.

CIRCULARS OF DEPARTMENT WHICH ARE NOW IN EFFECT.

28. Circulars of instructions relative to the construction to be placed upon the preceding act have been issued by this office under dates of July 15, 1881 (approved July 19, 1881), June 30, 1882 (approved July 1, 1882), July 22, 1882, and March 3, 1883 (approved March 5, 1883). None of said circulars are now in force except the last, which is as follows:

"The first section of the act of Congress, approved March 3, 1875 (18 Stat., p. 482), granting to railroads the right of way through the public lands of the United States, provides that any railroad company organized as therein described shall have 'the right to take from the public lands adjacent to the line of said road, material, earth, stone, and timber necessary for the construction of said roailroad.'

"In determining the rights of railroad companies under the foregoing provision you will be governed by the following instructions:

"1. Said provision refers exclusively to contemplated or unconstructed roads. Companies have no right to take timber or other material under this act for *repairs*, fuel, or for the further improvement of roads *already constructed*.

"2. The right granted to any railroad company under this act to take timber or other material from the public lands 'adjacent to the line of said road' for construction purposes is construed to mean that, in procuring timber or other material for the purposes indicated in the act, the same must be obtained from the public lands in the neighborhood of the line of road being constructed, and within the terminal points of such

road, if possible. If, however, it should be found that the material required in the construction of such road cannot be procured from the public lands in the neighborhood of, and within the terminal limits of, such road, then it is permitted that such company may obtain the material required outside the terminal limits of the road under construction; such material, however, to be taken from such points as are most accessible and nearest to the terminal limits thereof.

"3. All duly organized railroad companies under this act, upon the filing and acceptance of properly authenticated copy of their articles of incorporation and organization, and map of definite line of location, are entitled (as provided in paragaaph numbered 2 of this circular) to take timber from any of the public lands not otherwise reserved or previously occupied according to law, whether the same be mineral or non-mineral in character.

"4. In the procurement of timber or other material for construction purposes, such company must, before causing the cutting or removal thereof, appoint in writing one or more persons as their duly authorized agent or agents for that purpose. Copies of all such appointments must be filed in this office for its information, in order that such company may be held responsible for any violation of the rules and regulations as herein prescribed in relation to the cutting or removal of timber or other material from the public lands by such agent or those employed by or under him.

"5. All such duly appointed agents have authority to employ others to procure from such public lands and deliver to them, for the use of such company, all material required for the purposes specified in the act. It is immaterial whether such persons are employed by the day or by the piece; but no authority can be given by such railroad company to the general public to cut timber from the public lands.

"No railroad company organized according to the provisions of this act is entitled to procure, or cause to be procured, either by itself or through any of its agents, any timber or other material from the public lands for sale or other disposal either to other companies or to the general public.

"7. The right to take timber from the public lands by such railroad company, or its agents, is confined to such timber or other material as is actually necessary in original construction of same, and ceases when such road is open to the public for general use.

"8. In the procurement of such timber from the public lands, none less than eight inches in diameter is permitted to be cut or removed; no waste or destruction of timber is allowable, and the tops and laps of all trees must be cut and piled in order that the spread of forest fires may be checked thereby.

"All rules and regulations or instructions heretofore prescribed under said act of March 3, 1875, by this Department, inconsistent with the provisions contained in this circular, are hereby rescinded."

29. There is no law authorizing individuals to cut timber from the public lands and *sell* the same to railroads at a certain price per tie, or per thousand feet, or under contract, even though it may be used for construction purposes. The right is conferred only upon the railroads themselves; therefore the person cutting such timber must be in the actual employ of the road or its agent.

30. The terms "lands adjacent to the line of the road" are indefinite, and cannot be confined to any prescribed limits. On this point the special timber agent must use his best judgment. As a rule such lands are deemed to be the nearest, most accessible, and available public lands within the terminal points of the road from which the road can procure suitable material; but Congress never intended to grant to any railroad superior rights to those of the settler; therefore, where a railroad passes through a sparsely timbered section of country, and the taking of timber from such lands would prevent or discourage settlement along the line of said road, or be a hardship to those who may have already settled in that locality, by depriving them of the necessary material for buildings, fences, fuel, &c., the railroad should be encouraged to take timber from other convenient, heavily timbered, and thinly settled sections of country adjacent to the line of said road.

31. By the granting acts, and by the act of March 3, 1875, the right to take timber is limited to *construction* purposes exclusively (except in case of the Denver and Rio Grande Railroad); therefore when a road is once completed the privilege ceases, and after that any cutting of timber by the railroad is a trespass.

32. The portion of office circular of September 19, 1882 (approved September 21, 1882), directing that the tops and brush of trees be cut up and piled in order to prevent the spread of fires (see page 1075), applies also to the cutting and removal of timber from the public lands for the construction of railroads.

WHAT CONSTITUTES A TIMBER TRESPASS.

33. Any person who fells or removes timber, or who hires others to fell or remove timber, or who incites or induces others to fell or remove timber from Government land, for his personal benefit or advantage, or for the purpose of speculation and gain,

(except he has the right or permission so to do as specified under heads of "Lands covered by homestead or pre-emption entry," "Right of railroad companies," and "Mineral lands"), is a timber trespasser upon Government land.

34. Any person who is authorized by law, or permitted, to fell and remove timber from Government land, who fails to utilize all of the trees cut that can possibly be used, or to remove the brush and take every reasonable precaution to prevent the spread of forest fires; or who in any other particular wastes and destroys the public timber, is guilty of timber trespass upon Government land.

35. Any person who commits timber trespass upon Government land is liable to both criminal prosecution and civil suit; criminal prosecution for the act of trespass, and civil suit for the value of the material taken and the damages sustained, together with costs of court, and also the cost of survey and scalement when the same shall be necessary to accurately determine the extent of trespass and the amount of damages. (See circular of March 1, 1883, page 1077.)

36. The person or persons who contract for, purchase, or receive said timber are also liable to civil suit for the value thereof and the damages sustained, together with costs as above. (See circular of March 1, 1883, page 1077.)

37. Timber unlawfully cut from Government land is the property of the United States, and is subject to seizure as such, wherever or in whatever condition it may be found, and from any party having possession of it, or who in any way lays claim to it.

38. Cut timber is not a part of the realty and does not go with the land; it is personal property and the value of the same can be sued for after the land has been parted with by the Government.

39. The value of such timber in a civil suit is the value of the timber, or lumber, at the place where and in the condition when found. (See decision No. 5, Appendix, page 1075; also circular of March 1, 1883, page 1077.)

40. Criminal actions are barred by the statute of limitation after the lapse of three years; but there is no limitation as to time when the Government may bring civil action for the value of the property and damages.

DUTIES OF A SPECIAL TIMBER AGENT.

41. Special timber agents are assigned to duty in certain States or districts, wherein they will have a general supervision and charge over all timber upon Government land.

42. It is their duty to keep themselves thoroughly informed as to the condition of the timber upon the Government land in their respective districts, and to protect and preserve said timber from waste and destruction from any and all sources. (See office circular of September 19, 1882, approved September 21, 1882, relative to forest fires, &c., page 1075.)

43. In enforcing a compliance with the several laws relative to the protection and preservation of the public timber, and the rules and regulations prescribed thereunder by this Department, much must necessarily be left to the discretion and judgment of special timber agents; as the evidence of violations of said laws, or of the rules and regulations, is in nearly every instance a question of fact which can only be ascertained by personal examination and investigation.

44. Special timber agents should remember that it is not the purpose of the law, nor of the regulations of this Department, to prohibit the use of so much of the public timber as may be actually needed by *bona fide* settlers for agricultural and domestic purposes, but to prevent its being made an article of speculation for the pecuniary gain of a few individuals to the detriment of the many, or from being wantonly wasted or destroyed. When an agent understands this, and convinces the people in the district to which he is assigned that such is the case, he will find no difficulty in securing their active support and co-operation.

45. Whenever you have information that any timber has been unlawfully felled or removed from Government land, you should visit the ground and investigate said alleged trespass in person, in order to be able to report the case from personal knowledge and observation.

46. You should ascertain the character of the land from which the timber has been felled or removed, whether it is vacant, unoccupied publicland, or covered by homestead, preemption, or other entry; whether it is within the limits of the grant to any railroad, or of any Government reservation; and whether it is mineral or non-mineral.

47. The purpose of the Government is to prevent the unlawful taking of timber from all Government lands until the title to such lands has actually passed from the United States.

48. Many claims and entries are made upon Government land which from one cause or another are never consummated, and the land finally reverts to the Government. It is therefore fully as important to preserve the timber upon such land from unlawful spoliation as it is on vacant public lands upon which there never has been any claim.

49. Having ascertained the character of the land, and that it is such as should be protected from timber trespass, you should next ascertain who committed the trespass.

50. It is not the object of the Government to persecute poor wood-choppers, or cutters who are employed or induced to fell or remove the timber for others who are to reap the profits therefrom; but to punish the principals therein, or the parties to be directly benefited in the case, they being the more guilty parties.

51. Care should be taken to ascertain whether the alleged trespasser has any right or authority to take such timber, as specified under heads of "Homestead or pre-emption entry," "Right of railroad companies, &c.," and "Mineral lands."

52. Having ascertained the above facts and become satisfied that the person is *unlawfully* felling or removing timber from the Government land, you should next find good and reliable witnesses to establish all the facts necessary to a successful prosecution of the person committing the trespass.

53. Having all the facts in your possession you should, *at once*, fill out a form of report (in duplicate) and transmit the same to this office, being particular to state the facts in full under each head, and in accordance with instructions given under the head of "Manner of making reports of timber trespass."

54. It is imperative that all names shall be given in full, written plainly, and *spelled correctly*. An important suit might be lost through neglect of the agent in this particular.

MANNER OF MAKING REPORT OF TRESPASS.

55. It is impossible to prescribe a form of report which will call for only the information needed in each particular case; therefore the form prescribed calls for *all* the information that it is thought can be needed in *any* case.

56. It is the duty of the special timber agent to follow the form of report closely in every case, and to give *all* the information called for under each head, where practicable; and where not practicable, to state the reason therefor.

(1.) State name of trespasser *in full*, with post office address and residence; where the trespass is committed by a firm, state firm name and post office address; also name in full, post office address, and residence of each member of the firm. Where by an organized company or corporation, state name of company and location of home office; also name in full, post office address, and residence of each officer, and of the manager or local superintendent.

(2.) Describe the land trespassed upon.

If surveyed, state subdivision of section, section, township, and range.

If unsurveyed, define the locality by streams and other natural objects, distance, and direction from nearest surveyed lands, cities, towns, &c.

(3.) Describe the character of the land, whether vacant public land or covered by homestead, pre-emption, or other entry; whether mineral or non-mineral land; whether within railroad limits or Government reservation.

If the land is vacant public land, no further description as to character is necessary.

If the land is covered by homestead, pre-emption, or other entry, state the kind of entry, and, under the diagram on second page of report, give the following information in the order named: 1. Name of person making entry. 2. Date of entry. 3. Whether the party permanently resides on the place. 4. Whether he has any family. 5. Nature of improvements (if any) and whether permanent or temporary. 6. Estimated value of improvements. 7. If any of the ground is cleared or cultivated, state how much and to what extent. 8. Any other information which will tend to show whether the person made entry in good faith or for the purpose of cutting the timber therefrom and abandoning same.

If the land trespassed upon is within a mineral district, the report must be accompanied by affidavits as to the mineral or non-mineral character of the land (see Forms 11 and 12, page 1081). Affidavits from two responsible persons are required in each case; and if the trespass was on mineral lands the following information must be stated under the diagram on second page of report, viz: Whether the trespass consisted in cutting trees less than 8 inches in diameter, in wanton waste and destruction of the public timber, or whether any of the timber or lumber was exported or cut for export from the State or Territory where the cutting was done. (See "Mineral lands" pages 1056.)

If the timber was cut or removed from *indisputably* mineral lands, and none of the provisions relative to the cutting thereon have been violated (see "Mineral lands," pages 1059), no report whatever in the case is necessary.

If the land trespassed upon is within railroad limits, state, under diagram on second page of report, the name of the railroad; and the distance of the land from the line of the road.

(4.) Give the date or dates upon which the timber was cut, and the date or dates upon which it was removed.

(5.) State whether the trespass consisted in only cutting the timber, or in cutting and removing the same; or in removing the same after it had been cut by other (unknown) parties.

(6.) State kind of timber; whether pine, oak, or other wood. (See circular relative to mesquite, approved October 12, 1882, p. 1076.)

(7.) State number of each kind of trees cut or removed.

(8.) State number of feet, board measure, or number of railroad ties, cords of wood, poles, posts, or other material into which the timber may have been manufactured.

(9.) Describe log mark or marks, and state the name of the person who uses such mark to represent his property, giving post-office address and residence.

(10.) State where the timber is; whether on the ground where cut, or hauled to any stream or shipping point, giving the name of same; whether in boom, or at mill, or removed and disposed of; and if removed or disposed of, state the use made of the same.

(11.) State value of the timber or lumber in each of the conditions specified in form of report, as nearly as practicable.

(12.) Give the name, post-office address, and residence of the claimant of said timber or lumber, or the person having possession of the same.

(13.) If the cutting was done under contract, state contract price, and where the timber was to be delivered; whether any money has been paid or advanced on same; and give names in full, post-office address, and residence of contracting parties.

(14.) If the timber has been sold, give name, post-office address, and residence of party to whom sold; state price given or agreed upon; amount paid; where and in what condition the timber is to be delivered; number of logs or amount of timber delivered, if any; whether the purchaser had knowledge that the timber was unlawfully cut, or to be cut, from public lands, or took reasonable precaution to ascertain that fact and was an innocent purchaser through misrepresentation on the part of others of generally good reputation.

(15.) Give names in full of at least two reputable witnesses, giving post-office address and residence of each, or where he may be found. State in brief what each witness will be able to testify to in court, being particular to state the date or dates upon which he saw the cutting or removing. (The cutters and haulers or other employés of the trespasser should be used as witnesses whenever available.)

(16.) Give a brief statement of what facts you can testify to from your own knowledge and observation, being particular to state date or dates when you visited the ground and made personal examination.

(17.) State whether the trespass was willful, and whether there are any extenuating or mitigating circumstances; and, if so, the nature and evidence thereof.

(18.) State whether any legal proceedings have been instituted against the parties for the trespass in question.

(19.) State whether the parties are financially responsible; and, if so, to what amount.

(20.) State what action in the premises, in your judgment, will be for the best interest of the Government.

(21.) State any other facts which you may deem necessary for a clear comprehension of the case in all its details.

(22.) Fill up the diagram on second page of form of report; showing streams, roads, location of cutting, and buildings upon the land trespassed upon.

PROPOSITIONS OF SETTLEMENT.

57. After you have ascertained all the facts in the case and prepared your report for transmission to this office, should the party to the trespass (either the actual trespasser or the purchaser of the timber, or both) express a desire to avoid litigation and to compromise by paying the Government a certain price in settlement for said trespass or timber, if the evidence indicates that the trespass was not willful, but accidental or unintentional, or if there are other extenuating circumstances, you may inform the trespasser that, if he will make a sworn statement and proposition of settlement, in accordance with the terms of the circular of March 1, 1883, and in the form prescribed by this office (see Form 10, page 1081), you will transmit the same with your report to this office for consideration and action.

58. The party who cut the timber, or caused it to be cut, may make proposition of compromise (if the circumstances in the case warrant it, as set forth above in paragraph 57) for the purpose of relieving himself from criminal prosecution, but the acceptance of such proposition will not relieve the purchaser of the timber from civil proceedings unless the amount offered not only covers the damage to the land but also the value of the timber.

59. The purchaser of the timber may make a proposition of settlement (if the circumstances in the case will warrant it, as above set forth in paragraph 57) for the purpose of avoiding civil proceedings, but the acceptance of such proposition will not

relieve the party who cut the timber, or caused it to be cut, from criminal prosecution.

60. Where there is positive proof that the person who cut the timber, or caused it to be cut, is a willful and malicious or persistent trespasser upon the public timber, a proposition for the purpose of avoiding criminal prosecution should not be entertained.

61. Where the purchaser of the timber had a knowledge at the time of purchase that the timber was unlawfully cut from public land, proposition of settlement should not be entertained for the purpose of relieving the parties from civil proceedings, unless the amount offered in said proposition is for the full value of the material in the condition where and position where found, or, if sold, for the amount for which it was sold; and for at least as much as there is a reasonable prospect of being able to recover through legal proceedings, with costs.

62. The acceptance of propositions at a lower rate than the owners of private lands in the same vicinity would charge for similar timber, or for the privilege of cutting the same, would be an actual inducement to parties to commit timber depredations upon the public lands; therefore, such propositions should never be entertained, except when there is indisputable and positive proof that the person who cut the timber, or who purchased the same, was absolutely innocent of any guilty intent or knowledge that the same was cut from Government land; in which case propositions may be made to pay "stumpage" for the damage sustained—that is, the value of the timber when standing.

63. No fixed and uniform rate of stumpage can be prescribed by the Department. The actual value of the standing timber at the place where and the time when it was cut, together with the other facts and circumstances ascertained by the agent, must govern in each case as to such rate.

64. In all cases where an offer of compromise or settlement is made, if there has been any expense to the Government for surveying, or sealing, or watching and caring for the property, the amount must be included in and made part of the proposition.

65. Sworn statements and propositions of settlement must be made out in accordance with the form prescribed by this office (see Form 10, page 1081). The person who subscribes and swears to the statement and proposition in stating the extenuating circumstances must state his case in his own way and not from dictation by the special timber agent.

66. Special timber agents are not authorized or permitted under any circumstances to decide upon any proposed compromise, or to accept any offer of settlement, or to receive any money or other valuable consideration as a deposit pending its consideration by this office, or to receive the money after a proposition has been accepted by this office.

67. All payments in settlement of propositions for timber trespass must be made to the receiver of public moneys for the land district in which the trespass was committed.

68. Where cases are in suit, propositions must be made through the proper United States district attorney to the Department of Justice.

VOLUNTARY RELEASE OF TIMBER OR LUMBER.

69. Should an innocent trespasser, purchaser, or party having possession of any timber or lumber cut from Government land, voluntarily offer to deliver the same to the Government, you may receive a sworn statement and release from said party, in accordance with the form prescribed by this office (see Form No. 9, page 1080), take possession of the property, and transmit said release, together with a full report in the case to this office according to form of trespass report (see Form 8, page 1080), upon receipt of which you will be instructed as to what disposition to make of the property.

70. If you are satisfied that the party offering to release the timber or lumber became possessed of the same with a full knowledge that it was unlawfully cut from Government land, and that his offer to release the same is made solely to avoid the legal punishment and penalties for his unlawful acts, or if the timber is in such a position that no disposition can be made of it by the Government except to dispose of it to the guilty party upon his own terms, you will refuse to accept a release for said timber, but will at once report the case in full, in order that legal proceedings may be instituted. Any other course would be an encouragement to continued depredations.

SEIZURE OF TIMBER OR LUMBER.

71. No seizure of timber or lumber can be made except by due process of law. The appointment of a special timber agent does not confer upon him any power or authority to seize timber or lumber by virtue of his office. However, should you at any time find any timber that has been cut upon Government land, and abandoned by the party who cut the same, you will take possession of said timber, and at once notify this office, when you will be instructed as to what disposition to make of it.

CASES OF EMERGENCY.

72. In case of emergency, where the offender is about to leave the country, or the property is being removed or concealed and the evidence of the trespass destroyed, so that immediate action is absolutely necessary to protect the interests of the Government, the special timber agent may apply to the United States attorney for the district in which the trespass was committed to institute the proper legal proceedings.

73. In such cases, however, the responsibility will rest with the special timber agent to produce clear and indisputable evidence to establish the trespass, and show the necessity for his action.

74. In all other cases the trespass must first be reported in full to this office for instructions.

PREVENTION OF TRESPASS.

75. It is as much a part of your duty to prevent parties from committing timber trespass upon Government land as to detect and secure the punishment of such trespass after it has been committed. Therefore, should you receive information that any person or persons premeditate such trespass, you must acquaint them with the law upon the subject, and warn them against such unlawful acts.

RECORD OF CASES INVESTIGATED.

76. You must keep a record of *every* case investigated by you and reported to this office (a blank record book for which purpose will be furnished you), showing every action taken in each case until it is finally disposed of and settled; and, within thirty days after the 1st day of January and July, in each year, you must transmit to this office a transcript from said record book showing the exact status of each and every case recorded therein.

This is a most important part of your duty and must be strictly adhered to, in order that every case may be promptly disposed of, and that none may go by default on account of neglect on the part of this office or its agents; and also that you may be able to report at once to this office the exact status of any case when called upon.

WEEKLY REPORTS.

77. You are required to furnish this office, each week, with a report giving a brief statement of your official acts each day of the week. (See Form 2, Appendix, page 1079.)

78. Such weekly reports are necessary to the prompt adjustment of your accounts, and no allowance will be made in any instance for time not so reported upon.

79. In making out such reports state each day, in the proper column the day of the month, the day of the week, and the name of the place at which you are stopping or which you visit.

80. Under the head of nature of business, state the time of departure from and arrival at each place visited, the object of the visit, and a brief statement as to the *nature* of the business transacted.

81. After every statement of a journey made in which a transportation order is used put the initials T. O., give the number of the order used, and the initials of the route over which you traveled.

82. Such terms as "attending to official business"; "engaged in office work"; "writing official communications," &c., are not sufficiently specific, and will not be accepted by this office. You must state the nature of the official business or office work or the names of parties written to, and when investigating cases of trespass give the names of the alleged trespassers or parties interviewed or description of land examined.

83. You must make a special and full report in each case investigated, at an early day thereafter.

84. Information which is to be a matter of record in any pending trespass case must not be furnished in weekly reports, but must be made the subject of a separate report.

85. A failure to comply with any of the above instructions will necessitate the return of your weekly reports for correction and subject your monthly account to suspension.

EXPENSES OF SPECIAL TIMBER AGENTS.

86. In addition to your salary you will be allowed the actual and necessary expenses incurred by you while attending to your official duties.

87. Office circular of June 20, 1882 (copy herewith), will furnish you with full information as to what constitutes your actual and necessary expenses, and how to make out and transmit your monthly accounts for settlement.

88. Letters transmitting monthly accounts must relate solely to said accounts.

89. You are specially instructed not to incur any indebtedness in surveying land and scaling timber, or for any other purpose, beyond your salary and personal expenses, without special instructions from this office in each case.

TRANSPORTATION ORDERS.

90. You will be furnished, for your official use, with a supply of railroad transportation orders, with stubs attached.

91. In traveling, *in every case* use a transportation order where the railroad company will accept the same and furnish transportation in accordance therewith, using the orders in their numerical order.

92. In cases where the officials of any railroad company refuse to accept said orders or furnish transportation thereupon you will purchase a ticket, taking a stamped receipt therefor from the ticket agent, and transmit said receipt to this office with your monthly account; and in your letter of transmittal state the reasons assigned by the officers of the railroad company for refusing to accept of the transportation order. (Subsidized roads named in circular of June 20, 1882, are compelled by law to accept such transportation orders, and no charge by a special timber agent for fare on any of said roads will be allowed by this office.)

93. With each monthly account forward the stubs of all transportation orders used during the time covered by said account.

94. Never allow your supply of transportation orders to become exhausted; a failure to apply for a renewal of the same in time will not be excused, except in cases of an unavoidable contingency where reasons can be assigned satisfactory to this office.

95. In applying for a new supply of transportation orders, in every instance state the number of orders you have on hand at the date of making such application.

96. Paragraph 27 of office circular of June 20, 1882 (copy herewith), relative to use of transportation orders is hereby rescinded.

SPECIAL INSTRUCTIONS.

97. It is a waste of time for special timber agents to write long letters to this office stating that a number of persons are committing depredations upon Government timber, neglecting to furnish particulars. No intelligent action can be taken in any case, by this office, unless all the information called for in the form of report is furnished.

98. Your services will not be valued by the length or number of your communications, but by their utility.

99. Every case of trespass must be made the subject of a report separate and distinct in itself.

100. Important facts in any case which has been previously reported must be made the subject of a separate communication.

101. All reports of trespass, sworn statements, and propositions of settlement, all releases and affidavits, and all papers requiring official action by this office (except monthly accounts and weekly reports), must be transmitted in duplicate. You should also keep a copy of each paper for your own information.

102. Should you at any time need legal advice relative to the laws concerning timber depredations, you will consult with the United States attorney for the State or Territory assigned you.

103. Should you require diagrams of township plats to enable you to locate a trespass, you will apply to the register and receiver of the land district in which the land is situated, who will furnish them to you without charge.

104. These diagrams should show the tracts which are vacant public lands, and those upon which there are homestead, pre-emption, or other entries.

105. When you are assigned to duty, some certain city or town in the district over which you are put in charge, centrally located, will be designated as your headquarters, for the purpose of having some specified place as your post-office address, where communications from this office may be mailed you.

106. When you expect to be absent from the vicinity of your headquarters for any length of time, you will leave directions with the postmaster where to forward your mail.

107. It is not expected that you will permanently reside at the place designated as your headquarters, or that you will remain there continuously; you cannot in that way become an efficient or valuable special timber agent.

108. To familiarize yourself with the timber business of your district, and at the same time to ascertain what action can be taken to prevent the waste and destruction of public timber and to preserve it for legitimate uses, it is necessary for you to visit the timber lands of your district and acquire such knowledge by personal observation.

109. A special timber agent who feels an interest in the good of the public service

and the special duties devolved upon him will, during the greater portion of the time, be in the field.

110. You will be furnished by this office, for your official use, with a supply of stationery and the following blank forms, viz: oath of office; weekly reports; vouchers for board and lodging, special transportation, and miscellaneous expenditures; railroad transportation orders; physician's certificate; report of timber trespass; release of timber or lumber; propositions for settlement; affidavits as to mineral character of land and affidavits as to non-mineral character of land. (See Forms 1 to 12, Appendix, pages 1078 to 1082.)

APPENDIX.

LAWS RELATIVE TO THE PRESERVATION OF GOVERNMENT TIMBER.

LIVE-OAK AND RED CEDAR TIMBER.

[Revised Statutes of the United States.]

SEC. 2460. The President is authorized to employ so much of the land and naval forces of the United States as may be necessary effectually to prevent the felling, cutting down, or other destruction of the timber of the United States, in Florida, and to prevent the transportation or carrying away any such timber as may be already felled or cut down; and to take such other and further measures as may be deemed advisable for the preservation of the timber of the United States in Florida.

SEC. 2461. If any person shall cut, or cause or procure to be cut, or aid, assist, or be employed in cutting, or shall wantonly destroy, or cause or procure to be wantonly destroyed, or aid, assist, or be employed in wantonly destroying any live-oak or red cedar trees or other timber standing, growing, or being on any lands of the United States which in pursuance of any law passed, or hereafter to be passed, have been reserved or purchased for the use of the United States, for supplying or furnishing therefrom timber for the Navy of the United States; or if any person shall remove, or cause, or procure to be removed, or aid, or assist, or be employed in removing from any such lands which have been reserved or purchased, any live-oak or red cedar trees, or other timber, unless duly authorized so to do, by order, in writing, of a competent officer, and for the use of the Navy of the United States, or if any person shall cut, or cause or procure to be cut, or aid, or assist, or be employed in cutting any live-oak or red cedar trees, or other timber on, or shall remove, or cause or procure to be removed, or aid or assist, or be employed in removing any live oak or red cedar trees or other timber, from any other lands of the United States, acquired, or hereafter to be acquired, with intent to export, dispose of, use, or employ the same in any manner whatsoever, other than for the use of the Navy of the United States, every such person shall pay a fine not less than triple the value of the trees or timber so cut, destroyed, or removed, and shall be imprisoned not exceeding twelve months. (See 4751.)

SEC. 2462. If the master, owner, or consignee of any vessel shall knowingly take on board any timber cut on lands which have been reserved or purchased as in the preceding section prescribed, without proper authority, and for the use of the Navy of the United States; or shall take on board any live-oak or red cedar timber cut on any other lands of the United States, with intent to transport the same to any port or place within the United States; or to export the same to any foreign country, the vessel on board of which the same shall be taken, transported or seized, shall, with her tackle, apparel, and furniture, be wholly forfeited to the United States, and the captain or master of such vessel wherein the same was exported to any foreign country against the provisions of this section shall forfeit and pay to the United States a sum not exceeding one thousand dollars. (See 4751.)

SEC. 2463. It shall be the duty of all collectors of the customs within the States of Alabama, Mississippi, Louisiana, and Florida, before allowing a clearance to any vessel laden in whole or in part with live-oak timber, to ascertain satisfactorily that such timber was cut from private lands, or, if from public ones, by consent of the Navy Department. And it is also made the duty of all officers of the customs, and of the land officers within those States to cause prosecutions to be seasonably instituted against all persons known to be guilty of depredations on, or injuries to, the live-oak growing on public lands. (See 4205, 4751.)

SEC. 4205. Collectors of the collection districts within the States of Florida, Alabama, Mississippi, and Louisiana, before allowing a clearance to any vessel laden in whole or in part with live-oak timber, shall ascertain satisfactorily that such timber was cut from private lands, or, if from public lands, by consent of the Department of the Navy. (See 2463.)

SEC. 4751. All penalties and forfeitures incurred under the provisions of sections twenty-four hundred and sixty-three, Title "The Public Lands," shall be sued for,

recovered, distributed, and accounted for, under the directions of the Secretary of the Navy, and shall be paid over, one-half to the informers, if any, or captors, where seized, and the other half to the Secretary of the Navy for the use of the Navy pension fund; and the Secretary is authorized to mitigate, in whole or in part, on such terms and conditions as he deems proper, by an order in writing, any fine, penalty, or forfeiture so incurred.

DEPREDATIONS ON TIMBER LANDS.

SEC. 5388. Every person who unlawfully cuts or aids or is employed in unlawfully cutting, or wantonly destroys, or procures to be wantonly destroyed, any timber standing upon lands of the United States which in pursuance of law may be reserved or purchased for military or other purposes, shall pay a fine of not more than five hundred dollars and be imprisoned not more than twelve months. (See 2460–2463.)

PROTECTION OF ORNAMENTAL AND OTHER TREES ON GOVERNMENT RESERVATIONS.

[Chapter 151, Supplement to the Revised Statutes.]

Be it enacted, &c. * * *

SECTION 1. That if any person or persons shall knowingly and unlawfully cut, or shall knowingly aid, assist or be employed in unlawfully cutting, or shall wantonly destroy or injure, or procure to be wantonly destroyed or injured, any timber-tree or any shade or ornamental tree, or any other kind of tree, standing, growing, or being upon any lands of the United States, which, in pursuance of law, have been reserved, or which have been purchased by the United States for any public use, every such person or persons so offending, on conviction thereof before any circuit or district court of the United States, shall, for every such offense, pay a fine not exceeding five hundred dollars, or shall be imprisoned not exceeding twelve months.

SEC. 2. That if any person or persons shall knowingly and unlawfully break, open, or destroy any gate, fence, hedge, or wall inclosing any lands of the United States, which have, in pursuance of any law, been reserved or purchased by the United States for any public use, every such person so offending, on conviction, shall, for every such offense, pay a fine not exceeding two hundred dollars, or be imprisoned not exceeding six months.

SEC. 3. That if any person or persons shall knowingly and unlawfully break, open, or destroy any gate, fence, hedge, or wall inclosing any lands of the United States, reserved or purchased as aforesaid, and shall drive any cattle, horses, or hogs upon the lands aforesaid for the purpose of destroying the grass or trees on the said grounds, or where they may destroy the said grass or trees, or if any such person or persons shall knowingly permit his or their cattle, horses or hogs to enter through any of said inclosures upon the lands of the United States aforesaid where the said cattle, horses or hogs may or can destroy the grass or trees or other property of the United States on the said land, every such person or persons so offending, on conviction, shall pay a fine not exceeding five hundred dollars, or be imprisoned not exceeding twelve months: *Provided*, That nothing in this act shall be construed to apply to unsurveyed public lands, and to public lands subject to pre-emption and homestead laws; or to public lands subject to an act to promote the development of the mining resources of the United States, approved May tenth, eighteen hundred and seventy-two. (March 3, 1875.)

TIMBER LANDS IN THE STATES OF CALIFORNIA, OREGON, NEVADA, AND IN WASHINGTON TERRITORY.

[Chapter 151; approved June 3, 1878 (20 Stat., 89).]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That surveyed public lands of the United States within the States of California, Oregon, and Nevada, and in Washington Territory, not included within military, Indian, or other reservations of the United States, valuable chiefly for timber, but unfit for cultivation, and which have not been offered at public sale according to law, may be sold to citizens of the United States, or persons who have declared their intention to become such, in quantities not exceeding one hundred and sixty acres to any one person or association of persons, at the minimum price of two dollars and fifty cents per acre; and lands valuable chiefly for stone may be sold on the same terms as timber lands: *Provided*, That nothing herein contained shall defeat or impair any *bona fide* claim under any law of the United States, or authorize the sale of any mining claim, or the improvements of any *bona fide* settler, or lands containing gold, silver, cinnabar, copper, or coal, or lands selected by the said States under any law of the United States donating lands for internal improvements, education, or other purposes: *And provided further*, That none of the rights conferred by

the act approved July twenty-sixth, eighteen hundred and sixty-six, entitled "An act granting the right of way to ditch and canal owners over the public lands, and for other purposes," shall be abrogated by this act; and all patents granted shall be subject to any vested and accrued water rights, or rights to ditches and reservoirs used in connection with such water rights, as may have been acquired under and by the provisions of said act; and such rights shall be expressly reserved in any patent issued under this act.

SEC. 2. That any person desiring to avail himself of the provisions of this act shall file with the register of the proper district a written statement in duplicate, one of which is to be transmitted to the General Land Office, designating by legal subdivisions the particular tract of land he desires to purchase, setting forth that the same is unfit for cultivation, and valuable chiefly for its timber or stone; that it is uninhabited; contains no mining or other improvements, except for ditch or canal purposes, where any such do exist, save such as were made by or belong to the applicant, nor, as deponent verily believes, any valuable deposit of gold, silver, cinnabar, copper, or coal; that deponent has made no other application under this act; that he does not apply to purchase the same on speculation, but in good faith to appropriate it to his own exclusive use and benefit; and that he has not, directly or indirectly, made any agreement or contract, in any way or manner, with any person or persons whomsoever, by which the title which he might acquire from the Government of the United States should inure, in whole or in part, to the benefit of any person except himself; which statement must be verified by the oath of the applicant before the register or the receiver of the land office within the district where the land is situated; and if any person taking such oath shall swear falsely in the premises, he shall be subject to all the pains and penalties of perjury, and shall forfeit the money which he may have paid for said lands, and all right and title to the same; and any grant or conveyance which he may have made, except in the hands of *bona fide* purchasers, shall be null and void.

SEC. 3. That upon the filing of said statement, as provided in the second section of this act, the register of the land office shall post a notice of such application, embracing a description of the land by legal subdivisions, in his office, for a period of sixty days, and shall furnish the applicant a copy of the same for publication, at the expense of such applicant, in a newspaper published nearest the location of the premises, for a like period of time; and after the expiration of said sixty days, if no adverse claim shall have been filed, the person desiring to purchase shall furnish to the register of the land office satisfactory evidence, first, that said notice of the application prepared by the register as aforesaid was duly published in a newspaper as herein required; secondly, that the land is of the character contemplated in this act, unoccupied and without improvements, other than those excepted, either mining or agricultural, and that it apparently contains no valuable deposits of gold, silver, cinnabar, copper or coal; and upon payment to the proper officer of the purchase-money of said land, together with the fees of the register and the receiver, as provided for in case of mining claims in the twelfth section of the act approved May tenth, eighteen hundred and seventy-two, the applicant may be permitted to enter said tract, and, on the transmission to the General Land Office of the papers and testimony in the case, a patent shall issue thereon: *Provided*, That any person having a valid claim to any portion of the land may object, in writing, to the issuance of a patent to lands so held by him, stating the nature of his claim thereto; and evidence shall be taken, and the merits of said objection shall be determined by the officers of the land office, subject to appeal, as in other land cases. Effect shall be given to the foregoing provisions of this act by regulations to be prescribed by the Commissioner of the General Land Office.

SEC. 4. That after the passage of this act it shall be unlawful to cut, or cause or procure to be cut, or wantonly destroy, any timber growing on any lands of the United States, in said States and Territory, or remove, or cause to be removed, any timber from said public lands, with intent to export or dispose of the same; and no owner, master, or consignee of any vessel, or owner, director, or agent of any railroad, shall knowingly transport the same, or any lumber manufactured therefrom; and any person violating the provisions of this section shall be guilty of a misdemeanor, and, on conviction, shall be fined for every such offense a sum not less than one hundred nor more than one thousand dollars: *Provided*, That nothing herein contained shall prevent any miner or agriculturist from clearing his land in the ordinary working of his mining claim, or preparing his farm for tillage, or from taking the timber necessary to support his improvements, or the taking of timber for the use of the United States; and the penalties herein provided shall not take effect until ninety days after the passage of this act.

SEC. 5. That any person prosecuted in said States and Territory for violating section two thousand four hundred and sixty-one of the Revised Statutes of the United States who is not prosecuted for cutting timber for export from the United States, may be relieved from further prosecution and liability therefor upon payment, into the court

wherein said action is pending, of the sum of two dollars and fifty cents per acre for all lands on which he shall have cut or caused to be cut timber, or removed or caused to be removed the same: *Provided*, That nothing contained in this section shall be construed as granting to the person hereby relieved the title to said lands for said payment; but he shall have the right to purchase the same upon the same terms and conditions as other persons, as provided hereinbefore in this act: *And further provided*, That all moneys collected under this act shall be covered into the Treasury of the United States. And section four thousand seven hundred and fifty-one of the Revised Statutes is hereby repealed, so far as it relates to the States and Territory herein named.

SEC. 6. That all acts and parts of acts inconsistent with the provisions of this act are hereby repealed.

The following circular of instructions relative to the preceding act has been issued by this office:

TIMBER ACT OF JUNE 3, 1878, APPLYING TO "CALIFORNIA, OREGON, NEVADA, AND WASHINGTON TERRITORY." ALSO, TIMBER ACT OF SAME DATE APPLYING TO "COLORADO, NEVADA, AND THE TERRITORIES."

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., August 15, 1878.

TO REGISTERS AND RECEIVERS OF UNITED STATES LAND OFFICES:

GENTLEMEN: The following is a review of the provisions of the act entitled "An act for the sale of timber lands in the States of California, Oregon, Nevada, and in Washington Territory," approved June 3, 1878, and of the act approved same date, entitled "An act authorizing the citizens of Colorado, Nevada, and the Territories to fell and remove timber on the public domain for mining and domestic purposes," so far as they relate to the privilege of cutting and removing timber from the public lands of the United States, the punishment therefor, or to the protection of "timber and of the undergrowth" growing upon the public lands. Copies of these acts are annexed.

The fourth section of the first mentioned act provides that "it shall be unlawful to cut, or cause or procure to be cut, or wantonly destroy, any timber growing on any lands of the United States, in said States and Territory, or remove, or cause to be removed, any timber from said public lands, with intent to export or dispose of the same; and no owner, master or consignee of any vessel, or owner, director, or agent of any railroad, shall knowingly transport the same, or any lumber manufactured therefrom. Any person violating the provisions of this section shall be guilty of a misdemeanor, and, on conviction, shall be fined for every such offence a sum not less than one hundred nor more than one thousand dollars." Provision is also embraced in said section that "the penalties herein provided shall not take effect until ninety days after the passage of this act." This section also contains a proviso, as follows: "And nothing herein contained shall prevent any miner or agriculturist from clearing his land in the ordinary working of his mining claim, or preparing his farm for tillage, or from taking the timber necessary to support his improvements, or the taking of timber for the use of the United States." The penalty provided for in this section takes effect after the 1st day of September, 1878, and applies to cutting for any purpose other than that mentioned in this proviso, such as the wanton destruction of timber, or its removal for export or disposal.

In the States and Territory mentioned the effort of the Executive will in the future be directed to the proper punishment of parties who may cut for purposes not authorized by the statute under consideration, and to the prevention, so far as practicable, of further trespass against the general law.

The fifth section of the act provides "that any person prosecuted in said States and Territory for violating section 2461 of the Revised Statutes of the United States, who is not prosecuted for cutting timber for export from the United States, may be relieved from further prosecution and liability therefor upon payment, into the court wherein said action is pending, of the sum of two dollars and fifty cents ($2.50) per acre for all lands on which he shall have cut or caused to be cut timber, or removed or caused to be removed the same: *Provided*, That nothing contained in this section shall be construed as granting to the person hereby relieved the title to said lands for said payment; but he shall have the right to purchase the same upon the same terms and conditions as other persons, as provided hereinbefore in this act." This provision is applicable alike to cases pending at the time of the passage of the act, and to such cases as have been since or may hereafter be commenced.

Section 5 also contains provision that all moneys collected under this act shall be covered into the Treasury of the United States, and section 4751 of the Revised Statutes of the United States, which authorizes the penalties and forfeitures incurred under sections 2461 and 2462 of the Revised Statutes to be sued for recovered and

accounted for, under the direction of the Secretary of the Navy, is repealed, so far as it relates to these States and Territory.

By the provisions of the last-mentioned act "all citizens of the United States and other persons *bona fide* residents of the States of Colorado, Nevada, or either of the Territories of New Mexico, Arizona, Utah, Wyoming, Dakota, Idaho, and Montana, and all other mineral districts of the United States, are authorized and permitted to fell and remove for building, agricultural, mining, or other domestic purposes, any timber or other trees growing or being upon the public lands, said lands being mineral and not subject to entry under the existing laws of the United States, except for mineral entry in either of said States, Territories, or districts of which such citizens may be at the time *bona fide* residents, subject to such rules and regulations as the Secretary of the Interior may prescribe for protection of the timber, and of the undergrowth growing upon such lands, and for other purposes." (*See page* 1057 *for this act.*)

The first section contains a provision that this act shall not extend to railroad corporations. A copy of the rules and regulations prescribed by the Secretary of the Interior, for the protection of the timber and of the undergrowth growing upon the mineral lands of the United States, in compliance with this provision, is printed herewith. The second section of this act makes it the duty of the register and receiver of any local land office in whose district any mineral land may be situated to ascertain from time to time whether any timber is being cut or used upon any of the mineral lands, except for the purposes authorized by this act, within their respective land districts; and if so, they are required to notify the Commissioner of the General Land Office of that fact.

These reports will be made by the registers and receivers separately from those relating to any other subject, and will give the details of any violation of the provisions of this act.

The registers and receivers are allowed all necessary expenses incurred in making such proper examinations in regard to violations of the provisions of this act, which will be paid and allowed them in making up their next quarterly accounts.

The third section provides that "any person or persons who shall violate the provisions of this act, or any rules and regulations in pursuance thereof made by the Secretary of the Interior, shall be deemed guilty of a misdemeanor, and upon conviction shall be fined in any sum not exceeding five hundred dollars, and to which may be added imprisonment for any term not exceeding six months."

When violations of the provisions of this act are brought to the attention of this Office, either by report from the registers and receivers, or by other persons who, as good citizens, may feel an interest in the protection of the public timber, if the facts are deemed sufficient to warrant prosecutions, they will be brought to the attention of the Department of Justice, that instructions may be given to the proper district attorney to institute legal proceedings.

RULES AND REGULATIONS PRESCRIBED BY THE SECRETARY OF THE INTERIOR FOR THE PROTECTION OF TIMBER, ETC.

Rules and regulations prescribed by the Secretary of the Interior for the protection of the timber and of the undergrowth growing upon mineral lands of the United States, not subject to entry under existing laws of the United States, except for mineral entry in the States of Colorado and Nevada, or in the Territories of New Mexico, Arizona, Utah, Wyoming, Dakota, Idaho, or Montana, and in all other mineral districts of the United States, in compliance with the provisions of an act approved June 3, 1878, entitled "An act authorizing the citizens of Colorado, Nevada, and the Territories to fell and remove timber on the public domain for mining and domestic purposes."

With the view to and the intention of preserving the young timber and undergrowth upon the mineral lands of the United States, and to the end that the mountain sides may not be left denuded and barren of the timber and undergrowth necessary to prevent the precipitation of the rainfall and melting snows in floods upon the fertile arable lands in the valleys below, thus destroying the agricultural and pasturage interests of the mineral and mountainous portions of the country, I do hereby make and cause to be promulgated, by virtue of the power vested in me by the act entitled "An act authorizing the citizens of Colorado, Nevada, and the Territories (excepting Washington Territory) to fell and remove timber on the public domain for mining and domestic purposes," the following rules and regulations:

1. Section 2461, Revised Statutes, is still in force in all of the States and Territories named in the bill, and its provisions may be enforced, as heretofore, against persons trespassing upon any other than lands which are in fact mineral, or have been withdrawn as such; and in all cases where trespasses are committed upon the timber upon public lands which are not mineral, the trespassers will be prosecuted under said section.

2. It shall be unlawful for any person to cut or remove, or cause to be cut or removed,

from any of the mineral lands of the United States any timber or undergrowth of any kind whatsoever less than 8 inches in diameter, and any person so offending shall be liable to be fined, in compliance with the provisions of the third section of said act, in any sum not exceeding five hundred dollars, and to which may be added imprisonment for any term not exceeding six months.

* * * * * * * *

Very respectfully,

J. A. WILLIAMSON,
Commissioner.

DEPARTMENT OF THE INTERIOR, *August* 16, 1878.

The foregoing is hereby approved.

C. SCHURZ,
Secretary.

Rules 3 and 4 have been revoked.

In so far as the above circular relates to the act of June 3, 1878, entitled "An act authorizing the citizens of Colorado, Nevada, and the Territories to fell and remove timber on the public domain for mining and domestic purposes," the provisions contained therein have been modified and rescinded by circular of June 30, 1882, approved July 1, 1882. (See "Mineral lands," paragraph 14, page 1057.)

SETTLEMENT OF TRESPASS BY PURCHASE OF THE LAND TRESPASSED UPON.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That when any lands of the United States shall have been entered and the Government price paid therefor in full no criminal suit or proceeding by or in the name of the United States shall thereafter be had or further maintained for any trespasses upon or for or on account of any material taken from said lands, and no civil suit or proceeding shall be had or further maintained for or on account of any trespasses upon or material taken from the said lands of the United States in the ordinary clearing of land, in working a mining claim, or for agricultural or domestic purposes, or for maintaining improvements upon the land of any *bona fide* settler, or for or on account of any timber or material taken or used by any person without fault or knowledge of the trespass or for or on account of any timber taken or used without fraud or collusion by any person who in good faith paid the officers or agents of the United States for the same or for or on account of any alleged conspiracy in relation thereto: *Provided,* That the provisions of this section shall apply only to trespasses and acts done or committed and conspiracies entered into prior to March first, eighteen hundred and seventy-nine: *And provided further,* That defendants in such suits or proceedings shall exhibit to the proper courts or officer the evidence of such entry and payment and shall pay all costs accrued up to the time of such entry.

SEC. 2. That persons who have heretofore under any of the homestead laws entered lands properly subject to such entry, or persons to whom the right of those having so entered for homesteads may have been attempted to be transferred by *bona fide* instrument in writing, may entitle themselves to said lands by paying the Government price therefor, and in no case less than one dollar and twenty-five cents per acre, and the amount heretofore paid the Government upon said lands shall be taken as part payment of said price: *Provided,* This shall in no wise interfere with the rights or claims of others who may have subsequently entered such lands under the homestead laws.

SEC. 3. That the price of lands now subject to entry which were raised to two dollars and fifty cents per acre, and put in market prior to January, eighteen hundred and sixty-one, by reason of the grant of alternate sections for railroad purposes, is hereby reduced to one dollar and twenty-five cents per acre.

SEC. 4. This act shall not apply to any of the mineral lands of the United States; and no person who shall be prosecuted for or proceeded against on account of any trespass committed or material taken from any of the public lands after March first, eighteen hundred and seventy-nine, shall be entitled to the benefit thereof.

Approved June 15, 1880.

The following circular of instructions has been issued under the above act:

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., October 9, 1880.

REGISTERS AND RECEIVERS UNITED STATES LAND OFFICES:

GENTLEMEN: In carrying out the provisions of the act of Congress of June 15, 1880, entitled "An act relating to the public lands of the United States," you will be governed by the following instructions supplemental to, and in lieu of, the circular of this office of July 17, 1880, which is hereby rescinded.

1. The first section of said act provides that when any lands of the United States

shall have been entered, and the Government price paid therefor, no suits or proceedings on account of trespasses committed thereon prior to March 1, 1879, shall be had or maintained.

2. This section extends to such trespassers the privilege of paying for the land upon which the trespass was committed at the legal price per acre at date of entry.

3. The privilege of purchase under said section is not confined to lands subject to ordinary private entry, but extends to any lands, not mineral, subject to disposal under existing general laws.

4. No entry can be allowed under this section if the valid subsisting claim of another person shall have attached prior to the application to purchase.

5. Where lands are plainly subject to ordinary private entry, no special application to purchase, other than the usual application in cases of private entry, is required in order to enable the purchaser to avail himself of the benefits of the act.

6. When lands are not plainly subject to ordinary private entry, and application to purchase the same shall be made with a view to securing the immunity contemplated by said section, you will require the application to be presented under oath of the applicant, giving a full and detailed statement of all the facts upon which he bases his claim to purchase. Such sworn statement should be corroborated by the affidavits of credible witnesses, and you will thereupon forward all the papers in a special letter to this office, allowing no entry until so directed.

7. Under the second section, duly qualified persons who, prior to June 15, 1880, entered, under any of the homestead laws, lands properly subject to such entry are permitted to obtain title by paying the Government price, less the fee and commissions paid at date of original entry.

8. In allowing entries of this class, you will require proof that the party was twenty-one years of age, was a citizen, or had declared his intention to become a citizen of the United States, and was in other respects entitled to make the entry.

9. When homestead entries, made prior to June 15, 1880, have been attempted to be transferred by *bona fide* instrument in writing, the persons to whom such transfers were made are authorized to obtain title by like payments, and with like deduction of fees and commissions, as in the case of original homestead parties.

10. In permitting purchases by transferees of homestead rights, you will first ascertain whether the original homestead entry was a valid entry under the homestead laws. You will then require the instrument in writing by which it was sought to transfer such homestead right, to be filed, together with the best evidence attainable of the *bona fide* character of the transfer, including the affidavit of the party who seeks to purchase. You will also require satisfactory proof that the attempted transfer was made prior to June 15, 1880.

11. You will exercise all possible care in allowing purchases of the above character, as it is not improbable that fraudulent entries will be attempted, and the proper execution of the law will largely depend upon your vigilance and discretion. In cases wherein you entertain a doubt of the propriety of allowing the application to purchase, you should refer all the papers to this office, with a full statement of facts and your opinion.

12. No entry will be allowed under the second section when the original homestead entry was not a valid entry; nor when an entry under the homestead laws shall have been made on the same land subsequent to the original entry; nor if the land was embraced in a prior valid entry at the date of such original homestead entry; nor where adverse legal rights of any character exist at the date of the application to purchase.

13. Applications to purchase under the second section will be made on Form No. 18, as in case of ordinary cash entry, and must be accompanied by the receiver's duplicate homestead receipt; or, if that has been lost or destroyed, by an affidavit setting forth such fact, and giving the register's and receiver's number, and the date of the original homestead entry. It must also be stated in the application that the same is made under the second section of the act of June 15, 1880.

14. Where the duplicate receipt has been lost or destroyed, and the application to purchase is made by the original homestead party, the applicant must make oath that he has not transferred nor attempted to transfer his homestead rights under said entry, nor assigned his right to receive the repayment of the fees, commissions, and excess payments paid thereon.

15. In each case of an entry under the second section the register will certify to the receiver the amount to be allowed as credit for fees, commissions, and excesses already paid; the applicant first making oath that said fees, commissions, and excess payments have not been repaid, and that no application for such repayment has been made.

16. Entries under the second section will receive current register's and receiver's numbers in the regular cash series, and will be returned in the same manner as in other cases of cash entry, referring, however, in each instance, on your cash abstracts, certificates, and receipts, to the date of the act authorizing the entry, the register's and receiver's number of the original homestead application, and the amount allowed as

credit for fees and commissions, as follows: "Act June 15, 1880. Original homestead entry No. ——. Credit for fees and commissions, $——."

17. The *areas* of said homestead entries, having been heretofore reported, will be deducted from the footings of your cash abstracts, and the aggregate of such entries will be stated in red ink in your recapitulations.

18. The amount received under said second section will be accounted for by the receiver, as in case of other cash sales, except that in his quarterly detailed account he will note the date of the act opposite each entry of this class, and will state the areas in red ink, and will not include the same in his footings. In his recapitulation and in his condensed quarterly accounts-current, he will make a separate entry, as follows: "Sales under the second section, act of June 15, 1880, $——."

19. Final homestead proof not being required in these cases, no advertisement or notice of intention to make final proof is necessary, and no final homestead fees are to be paid or collected.

20. Warrants and scrip made receivable by law for lands subject to sale at private entry, or in commutation of homestead or pre-emption rights, and certificates of deposit on account of surveys, will be deemed receivable for lands purchased under the second section of act of June 15, 1880.

21. The existing rule must, however, be observed, that where the value of warrants or scrip exceeds that of the land entered therewith no repayment is authorized, but the warrant or scrip applied must be fully surrendered. In such case there would be no claim for repayment on account of the fees and commissions paid on the original homestead entry.

22. The third section reduces to one dollar and twenty-five cents per acre the price of any lands which were subject to ordinary private entry at two dollars and fifty cents per acre at the date of the approval of the act, having been doubled in price by reason of the grant of alternate sections for railroad purposes, and which were put in market at that price prior to the 1st of January, 1861. Lands which have not been put in market for sale at ordinary private entry at two dollars and fifty cents per acre, or which were so put in market subsequent to the 1st of January, 1861, are not changed in price by this section. You will carefully observe the rule, as to price, thus introduced. By reference to your official records it will be in your power to ascertain the facts with regard to any lands from which to decide as to the applicability of the rule to such lands. In case of doubt you may correct your records to exhibit the facts by correspondence with this office.

23. You will further observe that, under section 4, none of the provisions of this act apply to mineral lands, and that no person is entitled to the benefit of *any provision of the entire* act who falls within the inhibition named in this section.

Very respectfully,

C. W. HOLCOMB,
Acting Commissioner.

DEPARTMENT OF THE INTERIOR,
October 15, 1880.

Approved.

C. SCHURZ,
Secretary.

COMPROMISE.

[Section 3469, Revised Statutes.]

Upon a report by a district attorney, or any special attorney having charge of any claim in favor of the United States, showing in detail the condition of such claim, and the terms upon which the same may be compromised, and recommending that it be compromised upon the terms so offered, and upon the recommendation of the Solicitor of the Treasury, the Secretary of the Treasury is authorized to compromise such claim accordingly. But the provisions of this section shall not apply to any claim arising under the postal laws.

EXTRACTS FROM OPINIONS AND DECISIONS.

The following opinions and decisions are published for your information:

1st. Attorney-General Wirt, in an opinion of the 27th May, 1821, holds as follows: "Independent of positive legislative provisions, I apprehend that, in relation to all property, real or personal, which the United States are authorized by the Constitution to hold, they have all the civil remedies, whether for the prevention or redress of injuries, which individuals possess. (See 3 Wheaton, 181.) So the United States, being authorized to accept and to hold these lands for the common good, must have all the legal means of protecting the property thus confided to them that individuals enjoy in like cases. * * * They are, therefore, in my opinion, entitled to the injunction

of waste by way of prevention, and to the action of trespass by way of punishment, in like manner as individuals, similarly situated, are entitled to them."

2d. Attorney-General Taney, [as] Chief-Justice of the United States, in an opinion of 22d August, 1833, cites this opinion of Mr. Wirt, and concurs in it.

3d. Attorney-General Mason, in a communication of 16th July, 1845, refers to the opinion of Attorney-General Nelson, of the 11th August, 1843, and, in concurring in it, states that "when the right of pre-emption exists, the settler who has complied with the provisions of the act of 4th September, 1841, has a right of occupancy for twelve months, within which he may perfect his title by paying the minimum price of the land. Like the settlers under the armed occupation act, his right is inchoate only; and he has only those rights of property which are necessary to the perfecting of his title. He may clear the land, build on it, and inclose it with a view to cultivation. For these purposes he may use or destroy any trees which may be necessary, but within these restrictions, and necessary fire-wood, he is confined."

The penal act of 2d March, 1831, provides "for the punishment of offenses committed in cutting, destroying, or removing live-oaks and other timber or trees preserved for naval purposes."

This act of 2d March, 1831, you will find fully considered in the case of the United States *vs.* Ephraim Briggs (9 Howard, p. 351), in which the Supreme Court decided that the said act authorized the prosecution and punishment of all trespassers on public lands by cutting timber, whether such timber was fit for naval purposes or not.

4th. Judge Nelson in the case of the United States *vs.* McEntee, in the United States district court, Minnesota, October term, 1877, held as follows, McEntee being a settler under the homestead law:

"The lands can be cleared and timber sold if cut down for the purpose of cultivation; but if the sale and traffic is the only reason for severing the timber, and it is not done with a view of improving the land, the intentions of the lawgiver are subverted."

5th. In the case of the United States *vs.* James A. Smith at the April term, 1882, of the United States district court for the eastern district of Arkansas, where it was charged that said Smith unlawfully cut and removed certain timber from lands belonging to the United States in the State of Arkansas and converted the same into cordwood and railroad ties, and where evidence was produced to show that he purchased said timber from parties who claimed to own the land upon which it stood, Judge Caldwell held as follows:

"Persons cutting and removing timber from lands are bound to know that they who assumed to sell them the timber had the right to do so, and if they did not, the purchaser is liable to the lawful owner of the timber for its value, and if the trees are worked up into cordwood or railroad ties, such cordwood and ties are the property of the owner of the land as much as the trees were, and the owner of the land is entitled to recover the value of the timber in its new form, in other words, the value of the cordwood and railroad ties."

CIRCULARS OF A GENERAL CHARACTER,

RELATIVE TO PROTECTING TIMBER ON PUBLIC LAND FROM FOREST FIRES AND FROM WANTON WASTE AND DESTRUCTION.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., September 19, 1882.

Mr. ——— ———,
Special Timber Agent:

SIR: The fact having been brought to the notice of this Department that extensive forest fires from time to time, in different sections of the country, are destroying vast amounts of timber upon the public lands, and no means have heretofore been provided by the Government for the purpose of checking or preventing the same and preserving the public timber from such destruction, you are hereby informed that it will hereafter be a part of the duty of the special timber agents of the General Land Office to protect and preserve the public timber from this kind of waste and destruction, as well from destruction by the woodsman, or from any other source.

You are, therefore, hereby instructed to keep yourself fully informed as to the condition of the timber upon the public land in your district, and to use your best endeavors to protect it from waste and destruction from any and all sources; and to this end—where there are State or Territorial laws for the preservation of timber—you are authorized and directed to coöperate with the State or Territorial authorities and to aid and assist them in enforcing said laws.

Should you at any time receive information of any forest fire being in progress in your district, you will at once proceed to the locality of the same and use all possible means to check its progress and to extinguish it.

Should it be necessary to employ assistance in such a case, and the emergency be such that it would be impossible to inform this office of that fact and to receive special instructions, you are hereby authorized to expend a reasonable sum for such purpose, but you will at once inform this office, by telegraph, of the number of persons so employed and the total probable expense.

One of the most dangerous elements to contend with in case of forest fires, and one of the principal auxiliaries to the spread of the same, is the dry tops of trees which parties leave upon the ground after having cut and removed the timber for saw logs and other purposes. When the tree tops can be profitably cut into wood, the person cutting such trees on public land—when such cutting is authorized by law—must cut the tops into wood, or at least cut up and pile the brush in such manner as to prevent the spread of fires.

A failure on the part of woodsmen to utilize all of the tree that can profitably be used, and to take reasonable precaution to prevent the spread of fires, will be regarded by this office as wanton waste, and subject them to prosecution for wanton waste and destruction of public timber.

Very respectfully,

N. C. McFARLAND,
Commissioner.

DEPARTMENT OF THE INTERIOR, *September* 21, 1882.

Approved.

H. M. TELLER,
Secretary.

FOREST FIRES.

The following public notice relative to forest fires is furnished to special timber agents, printed on cloth, for posting in conspicuous places in their districts:

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., March 8, 1883.

The attention of the public is called to the fact that large quantities of the public timber are annually destroyed by forest fires which, in many cases, originate through the carelessness of hunting, prospecting, and other camping parties, while in some instances they occur through design.

I take this method of warning all persons that hereafter the cause and origin all fires will be closely investigated, and where the fire is ascertained to have originated through either carelessness or design the parties implicated will be prosecuted to the full extent of the law.

Special timber agents are hereby directed to proceed against all offenders under the local laws of the State or Territory relating to the unlawful setting out of fires in which the same may occur.

The public generally are requested to aid the officers of the Government in its efforts to check the evil referred to and in the punishment of all offenders.

N. C. McFARLAND,
Commissioner.

CLASSIFICATION OF MESQUITE AS TIMBER.

[Circular.]

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., October 12, 1882.

TO REGISTERS AND RECEIVERS OF UNITED STATES LAND OFFICES, AND TO SPECIAL TIMBER AGENTS OF THE GENERAL LAND OFFICE.

GENTLEMEN: The rules and regulations heretofore prescribed in relation to the cutting and removing of mesquite growing and being upon any of the public lands of the United States—mineral in character—are hereby modified as follows:

The cutting and removing of mesquite is restricted and confined to actual settlers and *bona fide* residents of the State or Territory who are citizens of the United States.

The cutting and removing of mesquite from the public lands of the United States—said lands being mineral—is permitted for all building, agricultural, mining, and domestic purposes needed in the development and improvement of the homes or mining interests of such actual settlers, residents, or miners.

It is further permitted that mesquite may be cut and removed from the public mineral lands for the purpose of selling the same to any actual settler or resident of the State or Territory, but only for the uses and purposes hereinbefore described.

The cutting and removing of mesquite from any of the public mineral lands of the United States for export from the State or Territory, or by, or for sale to, any railroad company as an article of fuel or repair is strictly prohibited; the person or persons so

offending being liable to civil and criminal prosecution as provided by section 3 of the act approved June 3, 1878, entitled "An act authorizing the citizens of Colorado, Nevada, and the Territories to fell and remove timber on the public domain for mining and domestic purposes."

The cutting and removing of mesquite from any of the public lands of the United States—non-mineral in character—is strictly prohibited for any purpose, except the same is to be used in building, fencing, or otherwise improving and cultivating the land or claim from which the same is cut or removed.

Any person cutting or removing mesquite from non-mineral public lands of the United States except for the purposes and uses above stated, is liable to punishment therefor under section 2461 Revised Statutes, both civilly and criminally.

Very respectfully,

N. C. McFARLAND,
Commissioner.

DEPARTMENT OF THE INTERIOR,
October 12, 1882.

The foregoing is hereby approved.

H. M. TELLER,
Secretary.

MEASURE OF DAMAGES TO WHICH THE GOVERNMENT IS ENTITLED FOR TIMBER TRESPASS.

The following circular relative to the manner of ascertaining the damages to which the Government is entitled under the several cases set forth, is based upon the decision of the United States Supreme Court, at its October term, 1882, in the case of Woodenware Company *vs.* The United States (106 U. S., 432):

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., March 1, 1883.

SPECIAL TIMBER AGENTS, GENERAL LAND OFFICE, ———:

GENTLEMEN: Respecting the measure of damages to which the Government is entitled in settlement for timber trespass upon the public domain, the United States Supreme Court has recently decided that—

1. Where the trespasser is a knowing and willful one, the full value of the property at the time and place of demand, with no deduction for labor and expense of the defendant, is the proper rule of damages.

2. Where the trespasser is an unintentional or mistaken one or an innocent purchaser from such a trespasser, the value of the timber at the time when first taken by the trespasser, or if it has been converted into other material, its then value, less what the labor and expense of the trespasser and his vender have added to its value, is the proper rule of damages.

3. Where a person or corporation is a purchaser without notice of wrong from a willful trespasser, the value at the time of purchase should be the measure of damages.

You will, therefore, in cases where settlement is contemplated, state the facts and circumstances attending the cutting and the purchase of the timber, in such clear and definite manner that the Supreme Court decision, above referred to, can be readily applied.

In cases where settlement with an innocent purchaser of timber cut unintentionally, through inadvertence or mistake, is contemplated, you are instructed to report as nearly as possible the damage to the Government as measured by the value of the timber before cutting.

Very respectfully,

N. C. McFARLAND,
Commissioner.

DEPARTMENT OF THE INTERIOR,
Approved. *March* 1, 1883.

H. M. TELLER,
Secretary.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., April 5, 1883.

TO REGISTERS AND RECEIVERS UNITED STATES LAND OFFICES, AND SPECIAL AGENTS:

GENTLEMEN: You are instructed to circulate the following notice in your district:

NOTICE RELATIVE TO UNLAWFUL INCLOSURES OF PUBLIC LANDS.

In view of the numerous complaints of the unlawful inclosures of public lands for stock range purposes, and consequent impediment to settlements, all persons are hereby notified as follows:

The public lands are open to settlement and occupation only under the public land laws of the United States, and any unauthorized appropriation of the same is trespass.

Such trespass is equally offensive to law and morals as if upon private property.

The fencing of large bodies of public land beyond that allowed by law is illegal, and against the right of others who desire to settle or graze their cattle on the inclosed tracts.

Until settlement is made, there is no objection to grazing cattle or cutting hay on Government land, provided the lands are left open to all alike.

Graziers will not be allowed, on any pretext whatever, to fence the public lands and thus practically withdraw them from the operation of the settlement laws.

This Department will interpose no objections to the destruction of these fences by persons who desire to make *bona fide* settlement on the inclosed tracts, but are prevented by the fences, or by threats or violence, from doing so.

The Government will take proper proceedings against persons unlawfully inclosing tracts of public land whenever, after this notice, it shall appear that by such inclosures they prevent settlements on such lands by others who are entitled to make settlement under the public land laws of the United States.

Very respectfully,

N. C. McFARLAND,
Commissioner.

DEPARTMENT OF THE INTERIOR,
April 5, 1883.

Approved.

H. M. TELLER,
Secretary.

FORMS PRESCRIBED BY THIS OFFICE FOR THE OFFICIAL USE OF SPECIAL TIMBER AGENTS.

1.

OATH OF OFFICE.

I, ——— ———, do solemnly ——— that I have never voluntarily borne arms against the United States since I have been a citizen thereof; that I have voluntarily given no aid, countenance, counsel, or encouragement to persons engaged in armed hostility thereto; that I have neither sought nor accepted, nor attempted to exercise the functions of, any office whatever, under any authority, or pretended authority, in hostility to the United States; that I have not yielded a voluntary support to any pretended government, authority, power, or constitution within the United States, hostile or inimical thereto. And I do further ——— that, to the best of my knowledge and ability, I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter, so help me GOD.

———.

Sworn to and subscribed before me this ——— day of ———, A. D. 188–.

2.

WEEKLY REPORT.

Report of ——— ———, *special agent G. L. O., for week commencing the* —— *day of* ———, 188–, *and ending the* —— *day of* ———, 188–.

Date.	Day of week.	Name of place visited.	Nature of business. NOTE.—When the nature of business requires a more extended explanation than the space allotted to each day permits, state same in an accompanying letter.

VOUCHER FOR MISCELLANEOUS (AUTHORIZED) EXPENDITURES.

(4—160.)

No. —.] Authorized ——— —, 188–.

Received, ——— —, 188–, from ——— ———, special agent General Land Office, ——— dollars for ——— from ——— to ———, 188–, inclusive, ——— days, at $—— per day.

$———. Name: ——— ———.

Post Office: ——— ———.

6.

RAILROAD TRANSPORTATION ORDER.

It is not deemed necessary to give the form of transportation order here, as such an order, to be valid, must first be signed by the honorable Commissioner of the General Land Office, and the occasion can never arise where it will be necessary or proper for a special agent to draft such an order, should his supply be exhausted.

7.

PHYSICIAN'S CERTIFICATE, IN CASE OF SICKNESS FOR A PERIOD EXCEEDING TWO CONSECUTIVE DAYS.

(Give post-office address and date:) ———, ———, ——— —, 188–.

I hereby certify that I am a regularly practicing physician, and as such rendered continuous service to ——— ——— from ——— to ———, 188–, inclusive; and that it is my professional opinion that he was, in consequence of sickness, unable to attend to ordinary business from ——— to ———, 188–, inclusive.

——— ———, M. D.

I do certify on oath to the above facts.

——— ———,
Special Agent.

Sworn to and subscribed before me this ——— day of ———, 188–.

——— ———,
Notary Public.

8.

REPORT OF TIMBER TRESPASS.

It is not deemed necessary to print the form of report here, as all the requirements are embodied under the head of "Manner of making report of timber trespass," pages — to —.

9.

RELEASE OF TIMBER OR LUMBER.

I, ——— ———, a member of the firm of ——— ———, do hereby certify that —— engaged in the business of ———; that —— place of business is at ———, county —— of ———; that during the months of ——— and ———, 18—, ———purchased or became possessed of ———, which is now lying at ———; that at the time ——— said ——— had no knowledge or information that the same was cut from Government land, but had taken reasonable precautions to satisfy —— to the contrary, having ——— now informed, and have satisfied —— that said ——— was unlawfully cut from ——— during the years 18— and 18—, and being desirous of restoring said property to its rightful owner, and of avoiding any legal proceedings in the premises, —— do hereby voluntarily relinquish and release to the United States all ——— right, title, and interest in and to said ——— ; and in consideration of said release and the circumstances above set forth ——— ask that ——— be relieved from all further liability in the premises.

——— ———,
for ——— ———.

Subscribed and sworn to before me this —— day of ———, 188–.

[SEAL.] ——— ———.

10.

PROPOSITION OF SETTLEMEET.

——— ———,
———— —, 188–.

Honorable COMMISSIONER OF THE GENERAL LAND OFFICE,
Washington, D. C., ——— —, ——:

SIR: I, ——— ———, a member of the firm of ——— ———, engaged in the business of ———, at ———, county of ———, in the ——— of ———, do hereby represent and certify that, during the months of ——— and ———, 188–, ——— certain timber consisting of ——— ———, said timber now lying ———; and that said timber was cut from the following described Government lands, and was ——— by ——— under the following circumstances: ———

—— further certify that the value of said timber in the position and condition it was in when ——— first informed or became aware that the same was cut from Government land was $—— per ——; that at the time it was cut, the value of the same standing in the tree was $—— per ——; that the value when felled and cut up into logs was $—— per ———, and the market value of the same at the boom or mill yard was $—— per ———, now informed by ——— ———, a special timber agent of your office, that ——— liable to ——— and ——— prosecution for the value of said timber and the damages sustained by the Government, the same having beenunlawfully cut from Government land.

As an acknowledgment of the rights of the Government in the premises, and for the purpose of avoiding litigation, ——— hereby offer to pay unto the United States in settlement for said ——— the sum of ———, being at the rate of $—— per ——— for said timber, said payment to be made to the receiver of public moneys at ———, or in such other manner as you may direct, within —— days from the date of notification of acceptance of this proposition, and in consideration of such payment, and the circumstances hereinbefore set forth, I respectfully ask that I be relieved from ——— or from any further liability in the premises.

——— ———,
for ——— ———.

Subscribed and sworn to before me, ——— ———, at ———, this —— day of ———, 188–.
[SEAL.]

——— ———.

DECISIONS AND OPINIONS.

For decisions and opinions under the stone and timber and timber acts of June 3, 1878, and generally as to timber on the public lands, see United States Land Laws, general and permanent, to December 1, 1880. "Public Land Commission, chapter 9, pages 95–106;" also annual Report Commissioner General Land Office, 1880–'81, and also see "Decisions of the Department of the Interior and General Land Office on cases relating to lands and land claims, from July, 1881, to June, 1883," pages 600–640, and especially circular of General Land Office of June 30, 1882, and modifying circular of March 3, 1883, approved March 5, as to construction of act of June 3, 1878, and as to the act of March 3, 1875 (18 Stat., p. 482), granting the right to right of way railroads of taking from the public lands material, earth, stone, and timber necessary for the construction of said railroads.

TIMBER LANDS ON THE PUBLIC DOMAIN.

To December 1, 1883.

The public domain States and Territories containing timber lands the property of the Nation, are Florida, Alabama, Mississippi, Louisiana, Arkansas, Michigan, Wisconsin, Missouri, Minnesota, California, Oregon, and Nevada, and the Territories of Dakota, Montana, Washington, Idaho, Arizona, New Mexico, Utah, and Wyoming. The estimated area remaining December 1, 1883, was about 73,000,000 of acres, exclusive of Alaska. Much of this area is, however, over mineral lands, and eight-tenths of it lying west of the Mississippi River.

See map of (approximate) area and location of public timber lands facing this page.

RECOMMENDATION OF THE PUBLIC LAND COMMISSION.

The Public Land Commission, in its preliminary report of February 25, 1880, in suggesting legislation for the timber lands of the United States, said:

SALE OF TIMBER.

By the proposed classification of public lands "all lands, excepting mineral, which are chiefly valuable for timber of commercial value for sawed or hewed timber, shall be classified as timber lands."

By this classification all timber-bearing lands which are mineral or agricultural, and all lands bearing timber which does not possess value for sawed or hewed timber, are excluded from the classification as timber lands.

Timber lands, as thus defined, comprise a comparatively small area. In Arkansas, Louisiana, Mississippi, Alabama, and Florida, but little, if any, lands will fall under the classification.

There may be small areas in Michigan, Wisconsin, and Minnesota, which should come under the classification, but the existence of such tracts is a matter of doubt, and consequently the classification will probably only include lands in the Territories and Pacific States.

In presenting a proposed law for the sale of timber and the retention of the soil, it becomes necessary to give, as briefly as may be consistent with the importance of the subject, the reasons for the departure from the custom of selling the soil.

The most valuable timber in the Territories, and in the States on the Pacific coast, grows upon lands possessing very little, if any, value for agricultural purposes.

Large areas of the land in the Territories and Pacific States are either known or supposed to be more valuable for minerals than for any other purpose. Where the mineral character of the land is known, it is, of course, sold as mineral, with no regard to the value of timber.

The rate of consumption and the destruction of timber by fires in the United States have been so great during the past twenty-five years as to cause alarm, not only on

the part of thoughtful men at home, but in all countries not producing timber supplies equal to their wants.

The area of timber land, according to the classification, is small, and its retention by the Government neither withdraws nor withholds agricultural lands from settlement.

The commission is of the opinion that the provision for the sale of the timber upon alternate sections only, and reserving all which is less than eight inches in diameter, as well as the fee in the soil, will result in the maintenance and reproduction of the forest. The experiment is at least well worth trying.

Referring to the necessity for the legislation recommended, or some other, it is proper to say that much difficulty is encountered in trying to suppress depredations upon the timber on the public lands. The difficulties arise from a variety of causes, chief among which has been and still is the impossibility of purchasing, in a straightforward, honest way from the Government either timber or timber-bearing lands.

Until a very recent date, no public lands in the States of Arkansas, Louisiana, Mississippi, Alabama, or Florida could be procured in any other manner than by a compliance with the homestead law. This condition of the law was the primary cause of thousands of fraudulent homestead entries. It was no uncommon thing for one person or one firm engaged in the timber or turpentine trade to procure to be made large numbers of homestead entries with apparently no intention of complying with the law. So far as relates to the States mentioned this condition no longer exists, as the lands have all been brought into market under the act of June 22, 1876, and rendered subject to sale at $1.25 per acre at private entry, and consequently depredations on the timber in those States have, to a very great extent, ceased.

Until the passage of the act of June 3, 1878, entitled "An act for the sale of timber lands in the States of California, Oregon, Nevada, and in Washington Territory," there was no manner by which timber or timber lands in either of the States or the Territory mentioned could be obtained excepting by settlement under the homestead and pre-emption laws, and by the location of certain kinds of script and additional homestead rights, which cost several dollars per acre.

Settlements upon timber-bearing lands in the States and Territory mentioned in the act, under the homestead and pre-emption laws, are usually a mere pretense for getting the timber. Compliance with those laws in good faith where settlements are made on lands bearing timber of commercial value is wellnigh impossible, as the lands in most cases possess no agricultural value, and hence a compliance with the law requiring cultivation is impracticable.

The commission visited the red-wood producing portion of the State of California, and saw little huts or kennels built of "shakes" that were totally unfit for human habitation, and always had been, which were the sole improvements made under the homestead and pre-emption laws, and by means of which large areas of redwood forests, possessing great value, had been taken under pretenses of settlement and cultivation which were the purest fictions, never having any real existence in fact, but of which "due proof" had been made under the laws.

In some sections of timber-bearing country where there should be, according to the "proofs" made, large settlements of industrious agriculturists engaged in tilling the soil, a primeval stillness reigns supreme, and solitude heightened and intensified by the grandeur of high mountain peaks, where farms should be according to proofs made, the mythical agriculturist having departed after making his "final proof" by perjury, which is an unfavorable commentary upon the operation of purely beneficent laws.

The law of June 3, 1878, is onerous, and ameliorates the condition existing before its passage but very little, if any; something further is necessary.

Another act was approved on the 3d of June, 1878, entitled "An act authorizing the citizens of Colorado and the Territories to fell and remove timber on the public domain for mining and domestic purposes," by the provisions of which settlers and other persons may take timber for mining and agricultural purposes from mineral lands.

The provisions of this law, when understood, mean but very little. *Timber may be taken from mineral lands.* Perhaps not one acre in five thousand in the State and Territories named is mineral, and perhaps not one acre in five thousand of what may be mineral is known to be such. The benefit of this law to the settlers is better understood when these facts are known.

The whole subject-matter of existing laws in relation to the sale or disposal of timber-bearing lands may be briefly stated, as follows:

Timber lands in the States of Arkansas, Louisiana, Mississippi, Alabama, and Florida may be bought for cash by any persons in any quantities, or may be taken under the homestead and pre-emption laws. (*In effect June* 30, 1883.)

In such parts of the States of Michigan, Wisconsin, Minnesota, and Missouri as contain public lands, which are at the same time agricultural and timber lands, the title may be obtained only under the homestead and pre-emption laws.

There is no way provided by law for disposing of lands which are chiefly valuable

for timber of commercial value in those States, as it must be conceded by all that the homestead and pre-emption laws apply only to lands valuable for agriculture.

In the States of California, Oregon, and Nevada, and in Washington Territory, timber lands can be bought by certain persons, under certain onerous conditions, in quantities not exceeding one hundred and sixty acres.

In the States of Nevada (both the laws approved June 3, 1878, are applicable to this State) and Colorado, and in all the Territories except Washington, any person may cut and remove all the timber he may need for mining and domestic purposes from *mineral land*. This law, strictly observed, would not confer any benefit upon one in one thousand of the inhabitants. There is no other law by or under which timber or timber lands can be procured in the States and Territories last above named.

The population of two States and seven Territories should not longer be compelled by the laws of the country to be trespassers and criminals on account of taking the timber necessary to enable them to exist, as is the condition to-day, and as it has been, according to law, ever since settlements were commenced, or since the policy of selling lands for cash has been abandoned by the Government.

If the bill proposed by the commission should become a law, timber upon agricultural lands may be taken with the land, under the homestead law; timber or pasturage land may be taken under the law for sale or pasturage land, and also under pasturage homesteads; and timber may be taken from any land not classified as timber or agricultural land by all citizens and others requiring its use. Under the chapter of the act referring specifically to the sale of timber, the timber upon alternate sections of the timber lands may be bought without the soil. These provisions, together with the law as it now stands in reference to the States of Arkansas, Louisiana, Mississippi, Alabama, and Florida, will place all the public timber land of the United States under laws for disposal to persons requiring it, excepting the timber upon alternate sections of the lands embraced under the classification of timber lands, and thus make it possible for all persons, in every part of the country, to get timber or timber land, and at the same time making some provision for the retention of the timber on a part of the land and the reproduction of it upon another small portion.

For a thorough discussion of the question, and much valuable information relating thereto, see the testimony attached to and with the Preliminary Report of the Public Land Commission, 668 pages, Ex. Doc. 46, Forty-sixth Congress, second session.

STONE AND TIMBER LANDS.

* * * * * * *

Act of June 3, 1878.

INDIVIDUAL ENTRY.

In effect December 1, 1883.

[From Regulations of General Land Office, October 1, 1880.]

The first, second, and third sections of the act of Congress of June 3, 1878, provide for the sale of surveyed lands in California, Oregon, Nevada, and in Washington Territory not yet proclaimed and offered at public sale, valuable chiefly for timber and stone, unfit for cultivation, and consequently for disposal under the pre-emption and homestead laws. When a party applies to purchase a tract thereunder, the register and receiver will require him to make affidavit that he is a citizen of the United States by birth or naturalization, or that he has declared his intention to become a citizen under the naturalization laws. If native born, parol evidence of that fact will be received. If not native born, record evidence of the prescribed qualification must be furnished. In connection therewith, he will be required to make the sworn statement in duplicate, according to the attached form, No. 4-537, as provided for in the second section of the act. One of the duplicate statements filed in each is by the act required to be transmitted to this office, and the registers and receivers will accordingly send up with their monthly returns the duplicate statements to be transmitted for the month.

The evidence in regard to the publication of notice required to be furnished, in the third section of the act, must consist of the affidavit of the publisher or other person having charge of the newspaper in which the notice is published, with a copy of the notice attached thereto, setting forth the nature of his connection with the paper, and that the notice was duly published for the prescribed period. The evidence required in the same section with regard to the non-mineral character of the land, and its unoccupied and unimproved condition, must consist of the testimony of at least two disinterested witnesses, to the effect that they know the facts to which they testify from personal inspection of the land and of each of its smallest legal subdivisions, as per form attached, No. 4-371. This testimony may be taken before the register or

receiver, or any officer using an official seal and authorized to administer oaths in the land district in which the land lies. Upon such proof being produced, if no adverse claim shall have been filed, the entry applied for may be allowed in pursuance of the provisions of the act. The receiver will issue his receipt for the purchase money, and the register his certificate of purchase, numbering the entry in the regular cash series. (Forms of application, receipt, and certificate are attached, Nos. 4–001, 4–131, and 4–189.) The register and receiver will enter the sale on their books, and make the usual returns therefor to this office, noting on the monthly abstracts, opposite the entry, and on the entry papers, a reference to the act of Congress under which allowed. They will forward all the papers in the case with their returns to this office, except the retained duplicate statement filed under the second section of the act, to which the register will give the same number with the other papers for the entry, and retain it on the appropriate file with the formal application in his office.

The register and receiver will be entitled to a fee of five dollars each for allowing an entry under said act, and jointly at the rate of twenty-two cents and a half per hundred words for testimony reduced by them to writing for claimants, which will be accounted for as other fees.

If, at the expiration of the sixty days' notice provided for in the third section of the act, an adverse claim should be found to exist calling for an investigation, the register and receiver will allow the parties a hearing according to the rules of practice.

ENTRY BY AN ASSOCIATION OF PERSONS.

In case of an association of persons making application for such an entry, each of the persons must prove the requisite qualifications, and their names must appear in and be subscribed to the sworn statement, as in case of an individual person. They must also unite in the regular application for entry, which will be made in their joint names as in other cases of joint cash entry. The forms prescribed for cases of applications by individual persons may be adapted for use in applications of this class.

FORMS USED IN AND METHOD OF ENTRY OF LANDS UNDER STONE AND TIMBER ACT OF JUNE 3, 1878.

IN EFFECT DECEMBER 1, 1883.

Sworn statement of applicant.
Notice of application. Evidence of posting and publishing.
Testimony of two witnesses, taken separately.
Cash application by applicant.
Receiver's cash (final) receipt. In duplicate.
Register's cash (final) certificate. In duplicate.

AREA AND QUALITY THAT CAN BE ENTERED.

Act only applies to California, Oregon, Nevada, and Washington Territory.

Lands must be valuable chiefly for timber or stone. Citizens, or those who have declared their intention to become such, can buy 160 acres, or less, at $2.50 per acre.

FORMS USED IN DISTRICT LAND OFFICE.

[Furnished free.]

ENTRY—HOW MADE.

Application to purchase.

[Made at District Land Office, and in duplicate.]

[No. 4–537.]

TIMBER AND STONE LANDS—ACT OF JUNE 3, 1878.

Sworn statement.

LAND OFFICE AT ———,
(*Date*) ———, 18—.

I, ——— ———, of —— county, ——, desiring to avail myself of the provisions of the act of Congress of June 3, 1878, entitled "An act for the sale of timber lands in the States of California, Oregon, Nevada, and in Washington Territory," for the purchase of the —— of section ——, township ——, of range ——, do solemnly —— that I* ——;

*In case the party has been naturalized, or has declared his intention to become a citizen, a certified copy of his certificate of naturalization or declaration of intention, as the case may be, must be furnished.

that the said land is unfit for cultivation, and valuable chiefly for its ——; that it is uninhabited; that it contains no mining or other improvements ——; nor, as I verily believe, any valuable deposit of gold, silver, cinnabar, copper, or coal; that I have made no other application under said act; that I do not apply to purchase the land above described on speculation, but in good faith to appropriate it to my own exclusive use and benefit; and that I have not, directly or indirectly, made any agreement or contract, in any way or manner, with any person or persons whomsoever, by which the title which I may acquire from the Government of the United States may inure in whole or in part to the benefit of any person except myself.

——— ———.

Sworn to and subscribed before me this —— day of ——, 18—.

——— ———,
———.

NOTICE OF APPLICATION.

Posting and publishing.

Register posts a notice of the land applied for, giving description, in his office for sixty days. Applicant receives a copy for publication in a newspaper nearest the location of the lands. Must be published for sixty days, and then proof of publication be filed, viz: Affidavit of publisher or foreman of paper in which published, with copy of notice as published attached. Claimant then produces two witnesses, whose testimony is taken as to the character of the land, as follows:

[No. 4-371.]

(The testimony of two witnesses, in this form, taken separately, required in each case.)

(*May be taken before register and receiver, or before officer with a seal in land district in which the land is situated.*)

TIMBER AND STONE LANDS—ACT OF JUNE 3, 1878.

Testimony of witness.

———— ————, being called as a witness in support of the application of ———— ———— to purchase the —— of section ——, township ——, of range ——, testifies as follows:

Ques. 1. What is your post-office address, and where do you reside?

Ans. ———.

Ques. 2. What is your occupation?

Ans. ———.

Ques. 3. Are you acquainted with the land above described by personal inspection of each of its smallest legal subdivisions?

Ans. ———.

Ques. 4. When and in what manner was such inspection made?

Ans. ———.

Ques. 5. Is it occupied; or are there any improvements on it not made for ditch or canal purposes, or which were not made by, or do not belong to, the said applicant?

Ans. ———.

Ques. 6. Is it fit for cultivation?

Ans. ———.

Ques. 7. What causes render it unfit for cultivation?

Ans. ———.

Ques. 8. Are there any salines, or indications of deposits of gold, silver, cinnabar, copper, or coal on this land? If so, state what they are, and whether the springs or mineral deposits are valuable.

Ans. ———.

Ques. 9. Is the land more valuable for mineral or any other purposes than for the timber or stone thereon, or is it chiefly valuable for timber or stone?

Ans. ———.

Ques. 10. From what facts do you conclude that the land is chiefly valuable for timber or stone?

Ans. ———.

Ques. 11. Do you know whether the applicant has directly or indirectly made any agreement or contract, in any way or manner, with any person whomsoever, by which the title which he may acquire from the Government of the United States may inure, in whole or in part, to the benefit of any person except himself?

Ans. ———.

Ques. 12. Are you in any way interested in this application, or in the lands above described, or the timber or stone, salines, mines, or improvements of any description whatever thereon?

Ans. ——.

——— ———.

I hereby certify that witness is a person of respectability; that each question and answer of the foregoing testimony was read to —— before —— signed —— name thereto, and that the same was subscribed and sworn to before me this —— day of ——, 18—.

——— ———,

———.

NOTE.—The officer before whom the testimony is taken should call the attention of the witness to the following section of the Revised Statutes, and state to him that it is the purpose of the Government, if it be ascertained that he testifies falsely, to prosecute him to the full extent of the law.

"TITLE LXX.—CRIMES.—CH. 4.

"SEC. 5392. Every person who, having taken an oath before a competent tribunal, officer, or person, in any case in which a law of the United States authorizes an oath to be administered, that he will testify, declare, depose, or certify truly, or that any written testimony, declaration, deposition, or certificate by him subscribed is true, willfully and contrary to such oath states and subscribes any material matter which he does not believe to be true, is guilty of perjury, and shall be punished by a fine of not more than two thousand dollars, and by imprisonment, at hard labor, not more than five years, and shall, moreover, thereafter be incapable of giving testimony in any court of the United States until such time as the judgment against him is reversed." [See sec. 1750.]

CASH ENTRY NOW ALLOWED.

No adverse claim having been filed, cash entry is now allowed. Reference to the act of Congress under which made will be made on office books and abstracts, and also across the face of the papers.

[No. 4–001.]

CASH APPLICATION.

No. ——. LAND OFFICE AT ——,
(*Date*) ———, 18—.

I, ——— ———, of —— county, ——, do hereby apply to purchase the —— of section ——, in township ——, of range ——, containing —— acres, according to the returns of the surveyor-general, for which I have agreed with the register to give at the rate of —— per acre.

——— ———.

I, ——— ———, register of the land office at ——, do hereby certify that the lot above described contains —— acres, as mentioned above, and that the price agreed upon is —— per acre.

——— ———, *Register.*

[No. 4–131.]

RECEIVER'S CASH RECEIPT.

(*Issued in duplicate, one for applicant and one for the files.*)

No. ——. RECEIVER'S OFFICE AT ——,
(*Date*) ———, 18—.

Received from ——— ———, of —— county, ——, the sum of —— dollars and —— cents; being in full for the —— quarter of section No. ——, in township No. ——, of range No. ——, containing —— acres and —— hundredths, at $—— per acre.

——— ———, *Receiver.*

$——.

[No. 4–189.]

REGISTER'S FINAL OR CASH CERTIFICATE.

(*Issued in duplicate, one for purchaser and one for the files.*)

No. ——. LAND OFFICE AT ——,
(*Date*) ———, 18—.

It is hereby certified that, in pursuance of law, ——— ———, of —— county, State of ——, on this day purchased of the register of this office the lot or —— of section

No. ——, in township No. ——, of range No. ——, containing —— acres, at the rate of —— dollars and —— cents per acre, amounting to —— dollars and —— cents, for which the said ——— ——— ha— made payment in full as required by law.

Now, therefore, be it known that on presentation of this certificate to the Commissioner of the General Land Office, the said ——— ——— shall be entitled to receive a patent for the lot above described.

——— ———, *Register.*

The papers are now [at end of month] transmitted to the General Land Office for approval and patent.

TIMBER CULTURE.

[See Chapter XXIV, pages 360–362, 1289.]

TO JUNE 30, 1882.

Under the several timber-culture acts from March 3, 1873, to June 30, 1882, there have been 90,757 original entries made, containing 13,657,146.47 acres; 165 final entries, containing 23,371.12 acres, have been made.

Mr. Commissioner McFarland, in his annual report for 1882, speaking of the timber-culture acts, says:

The utility of the timber-culture law as an inducement to the cultivation of trees that would not otherwise be planted has sometimes been questioned, since settlers under the homestead law in treeless regions find it one of the necessities of the situation to set out and cultivate trees, and their interest to do this is a usual guaranty that it will be done. At the same time, I am not inclined to recommend the repeal of a law of so beneficent an intention as the timber-culture act. But I deem it incumbent upon me to refer to the abuses to which it is subject.

This act does not operate in the five Southern public-land States, except a few entries in Arkansas.

AUTHORITIES AND REFERENCES.

See page 683 for Mr. Commissioner McFarland's recommendations as to this law, of date February 11, 1883, also showing abuses of it; also see page 681; see also "Timber-Culture" Decisions of the Department of the Interior and General Land Office from July, 1881, to June, 1883;" see also title "Timber or Timber-Culture," page 95; "General and Permanent Land Laws, 1880," and Annual Reports of Commissioner of the General Land Office for the years 1873, '74, '75, '76, '77, '78, '79, '80, and '81.

AREA ENTERED UNDER TIMBER-CULTURE LAW.

From 1873 to June 30, 1882, 90,757 individual entries were made under this law, containing 13,657,146.47 acres, an area about equal to the total surface of the States of New Hampshire, Massachusetts, Rhode Island, and Delaware. During this time but 165 entries have been consummated, containing 23.571.12 acres.

This act has been denounced by officers charged with its execution, and by special examiners, as one generally used for the benefit of fraudulent enterers and grabbers. Its practical utility is questionable, and thus far it has been used mostly by speculators intent on acquiring large tracts of public lands. This law, in practice, is not for the real benefit of the actual settler or the nation.

Statement showing the number of timber-culture entries, with areas, made in each State and Territory under the timber-culture act of March 3, 1873, and June 14, 1878, to June 30, 1882, inclusive.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE, *Washington, D. C.*

TIMBER CULTURE ENTRIES—HOW MADE, AND FORMS.

Forms used in Timber-Culture Entries.

[Furnished free at district land offices.]

In effect December 1, 1883.

IN FIRST INSTANCE, OR ORIGINAL ENTRY.

Application of person, with register's certificate.
Affidavit of applicant.
Non-mineral affidavit of applicant.
Receiver's receipt in duplicate.

FINAL ENTRY.

Final affidavit by claimant.
Proof testimony of claimant.
Proof testimony of witnesses, two taken separately.
Receiver's final receipt, in duplicate, one for claimant, one for files.
Register's final certificate, in duplicate, one for claimant, one for the files.

ENTRY CAN BE MADE BY WHOM?

By any person, a citizen, or who has declared his or her intention to become such above the age of twenty-one years. The head of a family or a single person, male or female, or a widow, or a woman the head of a family by reason of desertion by her husband.

CIRCULAR INSTRUCTIONS RELATIVE TO ENTRIES UNDER THE TIMBER CULTURE LAW.

In effect December 1, 1883.

Department of the Interior, General Land Office,
Washington, D. C., March 20, 1883.

To Registers and Receivers:

Gentlemen: You are instructed to deliver to applicants for land under the timber-culture act a copy of this circular, and to especially call the attention of the applicant to the requirements of the law under which the application is made.

RESIDENCE OF APPLICANT.

1. The applicant *must* in *every case* state in his application his place of *actual residence,* and the *post-office address* to which notices of contest or other proceedings relative to his entry shall be sent.

SECOND FILINGS AND ENTRIES.

2. A party making a legal filing or entry under any one of the foregoing acts exhausts his right under that act and cannot thereafter make another filing or entry under said act.

ALTERATIONS IN APPLICATIONS.

3. Applications to amend filings or entries should be filed with the register and receiver and be by them transmitted for the consideration of this office. Registers and receivers will not change an entry or filing so as to describe another tract or change a date after the same has been recorded.

RELINQUISHMENTS.

4. Entries and filings made for the purpose of holding the land for speculation and the sale of relinquishments are illegal and fraudulent, and every effort in the power of the Government will be exerted to prevent such frauds and to detect and punish the perpetrators.

5. The first section of the act of May 14, 1880, provides that when a pre-emption, homestead, or timber-culture claimant shall file a written relinquishment of his claim in the land office, the land covered by such claim shall be held as open to settlement

and entry without further action on the part of the Commissioner of the General Land Office.

6. This act refers to *bona fide* relinquishments of *bona fide* entries. An entry fraudulent in its inception is not an entry capable of being relinquished. It is an entry to be canceled upon a proper showing of the facts and circumstances of the case, whereupon the land will become subject to proper entry by the first legal applicant.

7. Purchasers of relinquishments of fraudulent filings or entries should understand that they purchase at their own risk so far as the United States is concerned, and must seek their own remedies under local laws against those who, by imposing such relinquishments upon them, have obtained their money without valuable consideration.

THE TIMBER-CULTURE ACT.

60. A timber culture applicant is required to make oath that his entry is made for the cultivation of timber and for his own exclusive use and benefit; that he makes the application in good faith and not for the purpose of speculation, nor directly or indirectly for the use or benefit of any other person or persons whomsoever; and that he intends to hold and cultivate the land and to wholly comply with the provisions of the act.

61. Claimants under the timber culture act will be held to a strict compliance with the terms and conditions of the law.

62. Not more than one-quarter [or 160 acres] of any section can be entered under this act.

63. Where 160 acres are taken, at least five acres must be plowed within one year from date of entry. The following, or second year, said five acres must be actually cultivated to crop or otherwise, and another five acres must be plowed. The third year the first five acres must be planted to trees, tree seeds, or cuttings, and the second five acres actually cultivated to crop or otherwise. The fourth year the second five acres must be planted to trees, tree seeds, or cuttings, making, at the end of the fourth year, ten acres thus planted to trees.

64. Perfect good faith must at all times be shown by claimants. Trees must not only be planted, but they must be protected and cultivated in such manner as to promote their growth.

65. Final proof may be made at the expiration of eight years from date of entry. It must be shown that for the said eight years the trees have been planted, protected, and cultivated as aforesaid; that not less than 2,700 trees were planted on each of the ten acres, and that at the time of making proof there are growing at least six hundred and seventy-five (675) living thrifty trees to each acre.

66. Where less than one quarter-section of land is entered, the same proportionate amount of plowing, planting, and cultivation of trees must be done as required in entries of 160 acres.

67. If the trees, seeds, or cuttings are destroyed in any one year they must be replanted. A party will not be released from a continued attempt to promote the actual growth of timber or forest trees. A failure in this respect will subject the entry to cancellation.

68. Only an applicant for the land under the timber-culture or homestead laws can institute a contest under the third section of the act of 1878.

69. Contestants have a preference right of thirty days after cancellation in which to make entry of the land.

70. The Government will at any period, upon proper application to contest, or upon its own information, investigate alleged fraudulent or illegal timber-culture entries, or alleged failure to comply with the law after entry, and such entries will be canceled upon sufficient proof either of illegality or failure to comply with the law.

71. The land-office fee for an [original] entry of more than 80 acres is $14; for 80 acres or less, $9.

CAUTION TO APPLICANTS.

Persons making filings or entries under the homestead, pre-emption, or timber-culture acts are cautioned that the laws authorize entries to be made only for the use and benefit of the party making the same, and that entries or filings are not allowed by law to be made for the benefit of others nor for speculation, but all entries must be made in good faith, and the requirements of law must be honestly and faithfully complied with.

Very respectfully,

N. C. McFARLAND,
Commissioner.

DEPARTMENT OF THE INTERIOR,
March 20, 1883.

Approved.

H. M. TELLER,
Secretary.

Sections 2246, 5392, 5393, 5440, and 5479, Revised Statutes, provides for oaths and penalties, and are published in full in the circular.

WHAT LANDS CAN BE ENTERED.

The act of March 3, 1873, provided that an entry could be made on any quarter section of the public lands.

The act of June 14, 1878, existing law, provides that lands can be entered for the cultivation of timber which are prairie lands or other lands devoid of timber, as the several chapter herein show. There are special laws for the disposal of *desert lands*, *saline lands*, *town sites on the public domain*, and lands which are unfit for cultivation and valuable chiefly for timber or stone.

DUTIES OF REGISTER AND RECEIVER IN TIMBER-CULTURE ENTRIES.

[From General Land Office circular of October 1, 1880.]

IN EFFECT DECEMBER 1, 1883.

The following regulations are prescribed pursuant to the fifth section of the act of June 14, 1878, viz:

1. The register and receiver will not restrict entries under this act to one quarter section only in each section, as was formerly done under the acts to which this is amendatory, but may allow entries to be made of subdivisions of different quarters of the same section, provided that each entry hall form a compact body not exceeding 160 acres, and that not more than that quantity hall be entered in any one section. Before allowing any entry applied for, they will, by a careful examination of the plat and tract books with reference to any previous entry or entries within the limits of the same section, satisfy themselves that the desired entry is admissible under this rule.

2. When they shall have satisfied themselves that the land applied for is properly subject to such entry, they will require the party to make the prescribed affidavit and to pay the fee and that part of the commissions payable at the date of entry, and the receiver will issue his receipt therefor, in duplicate, giving the party a duplicate receipt. They will number the entry in its order in a separate series of numbers, unless they have already a series under the acts to which this act is amendatory, in which case they will number the entry as one of that series; they will note the entry on their records and report it in their monthly returns, sending up all the papers therein, with an abstract of the entries allowed during the month under this act. If the affidavit is made before a justice of the peace, which the act admits of, his official character and the genuineness of his signature must be certified under seal.

3. When a contest is instituted, as contemplated in the third section of the act of June 14, 1878, the contestant will be allowed to make application to enter the land. The register will thereupon indorse on the application the date of its presentation, and will make the application and the contestant's affidavit setting forth the grounds of contest the basis for further proceeding, these papers to accompany the report submitting the case to the General Land Office. Should the contest result in the cancellation of the contested entry the contestant may then perfect his own, but no preference right will be allowed under this section unless application is made by him at date of instituting contest. But reference is here made to the subsequent act of Congress, approved May 14, 1880, the provisions of which allowing preference rights apply to timber-culture entries as well as to homesteads and pre-emptions.

4. The fees and commissions in this class of entries the receiver will account for in the usual manner, indicating the same as fees and commissions on timber-culture entries, which will be charged against the maximum of $3,000 now allowed by law.

5. In all cases under this act it will be required that trees shall be cultivated which shall be of the classes included in the term "*timber*," the cultivation of shrubbery and fruit trees not being sufficient. (See classes of trees before mentioned.)

TIMBER-CULTURE CONTESTS.

IN EFFECT DECEMBER 1, 1883.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., February 13, 1883.

TO REGISTERS AND RECEIVERS, UNITED STATES LAND OFFICES:

GENTLEMEN: By circular letter of this office dated December 20, 1882, your attention was called to the provisions of section 3 of the timber-culture act of June 14, 1878, and it was therein announced that on the 14th of November, 1882, the honorable Secretary of the Interior held, in Frank Bundy's appeal—Oberlin, Kans.—that said statute restricts contests against a prior timber-culture entry to one who seeks to enter the land covered thereby under the homestead or timber-culture laws, and that in the absence of such application to make entry there is no right of contest, nor does a preference right attach under section 2 of the act of May 14, 1880. You were therefore directed to dismiss all contest suits then pending in your respective offices against timber-culture entries coming within the purview of said decision, and informed that the filing of the application aforesaid is a condition precedent to the right of contest under said section 3 of said act of June 14, 1878, and that the party so applying must be qualified to make an entry.

On the 2d instant the honorable Secretary of the Interior, in the case of Albert L. Bartlett *vs.* Edwin Dudley—Visalia, Cal.—among other things, held as follows:

"Further consideration confirms me in the opinion that the decision in the case of Bundy was a correct interpretation of the third section of the act of 1878, as respects a contestant, and that it is not inharmonious with the second section of the act of 1880. In order, however, that a contestant whose contest has been or hereafter may be dismissed, for failure to file an application to enter the contested tract at the date of initiating his contest, may yet have opportunity for entering it, under a valid proceeding, I know of no objection to his initiation of a new contest with an application to enter the tract; or that, in such case, in order to the saving of expense and delay, the parties may stipulate, in writing, that the testimony formerly taken may be used in the new contest, with such other testimony as they may see fit to submit. The new contest will, of course, be subject to any intervening right initiated prior thereto and, in view of the time which has elapsed since the initiation of the former contest, should receive your early consideration."

You will post a copy of this circular in some conspicuous place in your respective offices, and, in cases arising, be governed in accordance with the above provisions.

Very respectfully,

N. C. MCFARLAND,
Commissioner.

Approved.

H. M. TELLER,
Secretary.

TIMBER CULTURE.

FORMS IN CASES OF CONTEST.

Many defects and considerable irregularity having heretofore prevailed in the matter of notices served and affidavits filed in contests against timber-culture entries, the following forms have been adopted and are the only ones now in use in contests against this class of entries:

[4-346.]

[*Notice.—Timber culture.*]

U. S. LAND OFFICE,
——— —, 188–.

Complaint having been entered at this office by ——— ——— against ——— ——— for failure to comply with law as to timber-culture entry No. ———, dated ———, 18—, upon the ———, section ———, township ———, range ———, in ——— county, ———, with a view to the cancellation of said entry; contestant alleging that ——— ———, the said parties are hereby summoned to appear at this office on the ——— day of ———, 188–, at —— o'clock —— m., to respond and furnish testimony concerning said alleged failure.

NOTE.—The fact and date of service upon the timber-culture claimant should be indorsed on this notice, and publication must be resorted to where personal service cannot be had, and that fact is established by an affidavit that, after using due diligence, it has been found impossible to make personal service upon the claimant.

[4-090.]

Affidavits to be filed before contest of timber-culture entry.

U. S. LAND OFFICE,
——— —, 188–.

Personally appeared before me, ——— ——— of the land office, ——— ——— of ——— county, State of ———, who upon his oath says: That he is well acquainted with the tract of land embraced in the timber-culture entry of ——— ——— No. ———, made ———, 18—, ——— and knows the present condition of the same; also that the said ——— ———,* and this the contestant is ready to prove at such time and place as may be named by the register and receiver for a hearing in said case; and he therefore asks to be allowed to prove said allegations, and that said timber-culture entry, No. ——, may be declared canceled and forfeited to the United States—he, the said contestant, paying the expenses of such hearing.

——— ———.

Sworn to and subscribed the day and year above written before

——— ———.

Also appeared at the same time and place ——— ———, and ——— ———, who, being duly sworn, depose and say: That they are acquainted with the tract described in the within affidavit of ——— ———, and know from personal observation that the statements therein made are true.

——— ———.

Sworn to and subscribed before me this ——— day of ———, 188–.

——— ———.

INSTRUCTIONS FOR MAKING FINAL PROOF ON TIMBER-CULTURE ENTRIES.

[Under acts of Congress to encourage the growth of timber on Western prairies.]

ISSUED FEBRUARY 1, 1882. IN EFFECT DECEMBER 1, 1883.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., February 1, 1882.

REGISTERS AND RECEIVERS OF UNITED STATES LAND OFFICES:

GENTLEMEN: Your attention is called to the following regarding timber-culture entries under the several acts of Congress and the manner in which final proof may be made:

The act of March 3, 1873 (17 Stat., 605), entitled "An act to encourage the growth of timber on the Western prairies," provided that any person might make an entry under that act on any quarter-section of the public lands.

Entries under that act were not restricted to heads of families, persons twenty-one years of age, citizens, or those who had declared their intention of becoming citizens of the United States.

Persons making entries under said act were required to plant, protect, and keep in a healthy growing condition for ten (10) years forty acres of timber on the quarter-section entered. The trees were to be not more than twelve (12) feet apart each way. Only one-quarter of any section could be entered. Entries were to be made for the cultivation of timber. Final proof could be made at the expiration of ten (10) years from the date of entry or at any time within three (3) years thereafter.

In making final entry under this act the party, or, if he be dead, his heirs or legal representatives, must "prove by two credible witnesses that he, she, or they have planted, and for not less than ten years have cultivated and protected," the quantity and character of timber above mentioned.

The act of March 13, 1874 (18 Stat., 21), was an act amendatory of, and, from said March 13, 1874, a substitute for, the act of March 3, 1873. All timber-culture entries made between March 13, 1874, and June 14, 1878, were made under the act of 1874. This act provided that citizens of the United States, or persons who had declared their intention of becoming citizens, and who were heads of families or had arrived at the age of twenty-one years, could make such entries.

Entries were to be made for the cultivation of timber.

---

*Here state that the claimant did not perform certain acts required by law to be done during the year or years in which the failure is alleged to have occurred, specifying said requirements in full. Thus, if the tract be 160 acres, and failure during the first year after entry be alleged, the affidavit should state that the claimant failed to break, or cause to be broken, five acres of the tract claimed, and in a similar manner should specify any failure alleged to have occurred in subsequent years.

Forty acres of timber on a quarter-section, and the like proportion of timber on less than a quarter-section, were required to be planted, protected, and kept in healthy growing condition for eight (8) years. The trees were to be not more than twelve (12) feet apart each way.

Only one quarter-section, or its equivalent, could be entered by any one person under this act.

The party making an entry of one quarter-section was required to break ten (10) acres of the land the first year, ten (10) acres the second year, and twenty (20) acres the third year after the date of the entry; and to plant ten (10) acres of timber the second year, ten (10) acres the third year, and twenty (20) acres the fourth year after the date of the entry, and in the same proportion when the entry was for a less area than one quarter-section. Final proof could be made at the expiration of eight (8) years from the date of entry, or at any time within five (5) years thereafter.

In making final entry under this act the party, or, if he be dead, his heirs or legal representatives, must "prove by two credible witnesses that he, she, or they have planted, and for not less than eight years have cultivated and protected," the quantity and character of timber mentioned in this act.

In case of the death of a person who had complied with the provisions of the act for three (3) years the heirs or legal representatives had the option to continue the compliance for the remainder of the eight years and to receive patent accordingly, or to receive patent for forty (40) acres outright by relinquishing all claim to the remainder.

Entries made under the act of March 3, 1873, can be completed, and final proof made under the act of March 13, 1874, upon compliance with the provisions of the latter act.

By the act of May 20, 1876 (19 Stat., 54), amendatory of the act of 1874, it was provided that whenever a party holding a claim or making final proof under said act should prove, by two credible witnesses, that the trees planted and growing on said claim were destroyed by grasshoppers during any one or more years, the time allowed in which to plant the trees and make final proof should be extended the same number of years as the trees planted were so destroyed.

It was also provided that the planting of seeds, nuts, and cuttings should be considered a compliance with the timber-culture act, when such seeds, nuts, and cuttings should be properly and well planted, and the ground properly prepared and cultivated.

It is not necessary under this act that the planting shall be done in one body, "provided the several bodies, not exceeding four in number, planted by measurement, aggregate the amount required and in the time required by the original and amended act."

It was provided that in case the seeds, nuts, or cuttings should not germinate and grow, or should be destroyed by the depredations of grasshoppers, or from other inevitable accident, the ground should be replanted, or the vacancies filled within one year from the first planting. Parties claiming the benefit of this provision were to prove, by two good and credible witnesses, that the ground was properly prepared and planted, and that the destruction of the seeds, nuts, or cuttings was caused by inevitable accident.

The act of June 14, 1878 (20 Stat., 113), is an act amendatory of, and, as to all entries made since June 14, 1878, is a substitute for, the act of March 13, 1874.

The persons authorized to make entries under the act of 1878 are heads of families or single persons who have attained the age of twenty-one years, and who are citizens of the United States or have declared their intention to become citizens, and who have made no previous entry under the timber-culture laws.

Entries are restricted to not more than one quarter-section, and one entry only can be made by any one person.

Only tracts embraced in sections which are prairie lands, or other lands devoid of timber, are subject to entry under this act.

The entry must be made for the cultivation of timber, and for the exclusive use and benefit of the person making the entry. It must be made in good faith, and not for speculation, nor for the benefit of another.

Five (5) acres on a quarter-section are required to be broken or plowed the first year, and five (5) acres the second year. The second year the first five acres must be cultivated to crop or otherwise. The third year the second five acres must be cultivated to crop or otherwise, and the first five acres must be planted in timber, seed, or cuttings. The fourth year the second five acres must be planted in timber, seeds, or cuttings. Ten (10) acres are thus to be plowed, planted, and cultivated on a quarter-section, and the same proportion when less than a quarter-section is entered. The whole ten (10) acres, or the due proportion thereof, must be prepared and planted within four years from the date of the entry, five (5) acres being prepared the first and second years and planted the third year, and five (5) acres being prepared the second and third years and planted the fourth year.

If the trees, seeds, or cuttings are destroyed by grasshoppers or by extreme and unusual droughts, the time of planting may be extended one year for every year of such

destruction, upon the filing in the local office of an affidavit by the entryman, corroborated by two witnesses, setting forth the destruction and asking the extension of time provided for by the act.

Final proof can be made at the expiration of eight (8) years from the date of entry, or at any time within five years thereafter.

The requirements in making final proof under this act are as follows:

1st. It must be shown that not less than twenty-seven hundred (2,700) trees of the proper character were planted on each acre of the ten acres required to be planted.

2d. It must be shown that the quantity and character of trees as aforesaid have been cultivated and protected for not less than eight years preceding the time of making proof.

3d. It must be shown that at the time of making proof there are growing at least six hundred and seventy-five (675) living and thrifty trees to each acre of the ten acres planted.

All entries made since June 14, 1878, are made under this act. Parties who made entries under either of the former acts are permitted to complete the same and to make final proof under the act of 1878, upon full compliance therewith.

Section 7 of the act defines the meaning of the term "full compliance" as used in that section. It is, that the parties shall show that they have had under cultivation, as required by the act, an amount of timber sufficient to make the number of acres required therein; that at the time of making final entry the required number of living and thrifty trees are growing on the land.

It is not requisite, in making proof under the act of 1878, that the manner of planting as prescribed by that act should be shown to have been followed by persons who made entries under the acts of 1873 and 1874.

The planting in such cases may have been done in the manner prescribed by the acts of 1873 or 1874, or in the manner prescribed by the act of 1878.

The character of the trees should be such as are recognized in the neighborhood as of value for timber, or for commercial purposes, or for firewood and domestic use. The enumeration of species on page 27 of the General Circular of October 1, 1880, is only intended as a general guide, and is not to be construed to exclude any trees falling within the foregoing characterization.

In computing the period of cultivation the time runs from the date of entry, if the necessary acts of cultivation were performed within the proper time. The preparation of the land and the planting of trees are acts of cultivation, and the time authorized to be so employed, and actually so employed, is to be computed as a part of the eight years of cultivation required by the statute.

If there have not been eight (8) years of cultivation, or if there are not the requisite number of living and thrifty trees growing on the land at the expiration of eight years from the date of entry, then final proof cannot be made until these requisites shall have been complied with.

The proof required in final entry will be the affidavit and testimony of the party, corroborated by the testimony of two witnesses, setting forth, specifically and in detail, all the facts of the case, showing when cultivation was commenced, the acts performed, amount of land plowed, cultivated, and planted, what was done in each year, the total number of trees planted, the total number growing, and their size and condition at date of proof, and any other facts or circumstances material to the case.

In making final proof the timber-culture claimant must appear in person with his witnesses at the district land office of the district in which the land is situated, and there make the necessary proofs; or the affidavit of the party may be made, and his testimony, and the testimony of his witnesses, given before a judge or clerk of a court of record in such land district.

The officer administering the oath or taking the testimony must certify to the identity and credibility of the party appearing before him.

In every case, when final proof is offered or submitted, the register and receiver will carefully examine the evidence, and, if found sufficient as showing that the claimant has fully complied with the law (and on payment of the final commissions allowed by law), they will proceed to issue the final certificate and receipt in the same manner as in final homestead cases.

The payments required by law on a timber-culture entry are as follows:

ORIGINAL ENTRIES.

For more than 80 acres, a fee of $10, to be paid at date of entry, and $4 commissions; total, $14.

For 80 acres or less, fee $5, commissions $4; total $9.

FINAL ENTRIES.

The total payment required in each case of final entry is $4, payable when final proof is made.

No additional or other fee, charge, gratuity, or reward is permitted to be paid or received for any services rendered at district land-offices in connection with such entries.

Annexed will be found forms A, B, C, D, and E.

N. C. McFARLAND,
Commissioner.

Approved February 2, 1882.

S. J. KIRKWOOD,
Secretary.

A.

FINAL AFFIDAVIT.—TIMBER-CULTURE ENTRY.

(*Before register or receiver, or before a judge or clerk of a court of record within the land district.*)

[Acts of March 3, 1873, March 13, 1874, and June 14, 1878.]

I, —— ———, having on the —— day of ———, 18—, made a timber-culture entry No. —, of the —— of section ——, in township — of range —, subject to entry at ———, ———, under the timber-culture laws of the United States, do hereby apply to perfect my claim thereto by virtue of the seventh section of the act of June 14, 1878, entitled "An act to amend an act entitled 'An act to encourage the growth of timber on the western prairies,'" and for that purpose do solemnly ——— that my aforesaid entry was made in good faith, and not for the purpose of speculation, or directly or indirectly for the use or benefit of any other person or persons whomsoever; that I have not heretofore made any other entry under the timber-culture laws of the United States; and I do further——— that the section of land specified in my aforesaid entry is composed exclusively of prairie lands or other lands devoid of timber; that said entry was made for the cultivation of timber, and that I have planted on said land, cultivated and protected, and kept in a healthy, growing condition for and during the period of eight (8) years last past, ——— acres of (*here describe the kinds of timber*) timber; that not less than ——— trees were planted on each acre, and that there are now at least (*here state the number of trees*) living and thrifty trees to and upon each acre, aggregating in total the number of ——— trees.

(Signature of claimant.)

B.

TIMBER-CULTURE PROOF.—TESTIMONY OF CLAIMANT.

(*Before register or receiver, or before a judge or clerk of a court of record within the land district.*)

[Acts of March 3, 1873, March 13, 1874, and June 14, 1878.]

———— ————, being called as a witness in —— own behalf in support of —— timber-culture entry No. —— for —— section —, township —, of range —, in the district of lands subject to entry at —— ——, testifies as follows:

Question 1. What is your name written in full and correctly spelled, your age, and post-office address?

Answer. ———.

Question 2. Describe your timber-culture entry, giving the date thereof and the number of acres embraced therein.

Answer. ———.

Question 3. What number of acres of said land was broken by you during the first year, what number broken during the second year, and what number broken during the third year, respectively, after the date of your entry? Give the day, month, and year, as nearly as practicable in each instance, when the several breakings were done; describe the method of breaking, and in what way your measurements were made.

Answer. ———.

Question 4. Describe the way in which the ground was prepared, and state how many acres of said tract were planted to trees during the *second* year of your entry, giving the day, month, and year, as nearly as practicable, when the planting was done, the kind or kinds of trees planted; and state how you know the area or number of acres so prepared and planted during said *second* year.

Answer. ———.

Question 5. Describe the way in which the ground was prepared, and state how many acres of said tract were planted to trees during the *third* year of your entry, giving the day, month, and year, as nearly as practicable, when the planting was done, the kind or kinds of trees planted; and state how you know the area or number of acres so planted during said *third* year.

Answer. ———.

Question 6. Describe the way in which the ground was prepared, and state how many acres of said tract were planted to trees during the *fourth* year of your entry, giving the day, month, and year, as nearly as practicable, when the planting was done, the kind or kinds of trees planted; and state how you know the area or number of acres so planted during said fourth year.

Answer. ———.

Question 7. If you have received an extension of time for planting on account of the destruction of your trees, seeds, or cuttings, by grasshoppers or by extreme and unusual drought, state the year or years in which extension was had and give all the particulars. How did you proceed to obtain such extension?

Answer. ———.

Question 8. How many acres of timber have you planted, cultivated, protected, and kept in a healthy growing condition for the period of eight (8) years last preceding on the tracts embraced in your entry?

Answer. ———.

Question 9. Describe the condition of the trees now growing on said tract, giving their average diameter and height as near as you can, the kind or kinds of trees, the number of trees per acre now growing thereon; and state how you know the facts to which you testify.

Answer. ———.

Question 10. Have you ever heretofore made any other timber-culture entry? If so, describe such entry or entries, and state all the particulars.

Answer. ———.

Question 11. Is the section specified in your entry composed of prairie land, or was it devoid of timber at the date of your entry?

Answer. ———.

Question 12. State anything further within your personal knowledge which you have to offer regarding your aforesaid entry.

Answer. ———.

(Signature of claimant.)

——— ———.

I hereby certify that each question and answer in the foregoing testimony was read to the claimant before —— signed —— name thereto, and that the same was subscribed and sworn to before me this —— day of ———, 18—.

———— ————,

———— ————.

NOTE.—The officer before whom the testimony is taken should call the attention of the witness to the following act of Congress, which is made by statute specifically applicable to all oaths, affirmations, and affidavits required or authorized under the timber culture acts:

[Act of March 3, 1857 (11 Statutes, p. 250.)]

"SEC. 5. *And be it further enacted*, That in all cases where any oath, affirmation, or affidavit shall be made or taken before any register or receiver, or either or both of them, of any local land-office in the United States orany Territory thereof, or where any oath, affirmation, or affidavit shall be made or taken before any person authorized by the laws of any State or Territory of the United States to administer oaths or affirmations, or take affidavits, and such oaths, affirmations, or affidavits are made, used, or filed in any of said local land-offices, or in the General Land Office, as well in cases arising under any or either of the orders, regulations, or instructions concerning any of the public lands of the United States, issued by the Commissioner of the General Land Office or other proper officer of the Government of the United States, as under the laws of the United States, in anywise relating to or affecting any right, claim, or title, or any contest therefor, to any of the public lands of the United States, and any person or persons shall, taking such oath, affirmation, or affidavit, knowingly, willfully, or corruptly swear or affirm falsely, the same shall be deemed and taken to be perjury, and the person or persons guilty thereof shall, upon conviction, be liable to the punishment prescribed for that offense by the laws of the United States."

(See also section 5392 United States Revised Statutes.)

C.

(The testimony of two witnesses in this form, taken separately, required in each case.)

TIMBER-CULTURE PROOF.—TESTIMONY OF WITNESS.

(*Before register or receiver, or before a Judge or clerk of a court of record within the land district.*)

[Acts of March 3, 1873, March 13, 1874, and June 14, 1878.]

———— ————, being called as a witness in support of the timber-culture entry of ———— No. — for the —— of section —, township —, range —, in the district of lands subject to entry at ———— ————, testified as follows:

Question 1. What is your name, age, occupation, and residence?

Answer. ————.

Question 2. Are you well acquainted with ———— ————, the claimant; and, if so, since what time have you known him?

Answer. ————.

Question 3. If you have personal knowledge regarding claimant's timber-culture entry, give the date when said entry was made, describe the tract or tracts, and state the number of acres embraced therein.

Answer. ————.

Question 4. How far do you reside from the land described, and have you had continuous personal knowledge of said land and the improvements thereon during the last eight (8) years?

Answer. ————.

Question 5. Was the section embracing the entry of the claimant composed of prairie lands or other lands devoid of timber? Describe the land embraced in said section, whether undulating or otherwise, and if any natural timber was growing on the tract named at the date of entry; state the kind or kinds of trees so growing, and their number, situation, and size.

Answer. ————.

Question 6. How many acres of the land embraced in claimant's entry were broken by him during the first year, how many during the second year, how many during the third year, respectively, after the date of entry? Give the day, month, and year in each instance, as near as practicable, when the several breakings were done, describe the method of breaking, and in what way your measurements were made, or how you know the area, or number of acres broken.

Answer. ————.

Question 7. Describe the way in which the ground was prepared, and state how many acres of said tract were planted to trees during the *second* year of said entry, giving the day, month, and year, as near as practicable, when the planting was done, the kind or kinds of trees planted, and state how you know the area or number of acres so prepared and planted during said second year.

Answer. ————.

Question 8. Describe the way in which the ground was prepared, and state how many acres of said tract were planted to trees during the *third* year of said entry, giving the day, month, and year, as near as practicable, when the planting was done, the kind or kinds of trees planted, and state how you know the area or number of acres so prepared and planted during said third year.

Answer. ————.

Question 9. Describe the way in which the ground was prepared, and state how many acres of said tract were planted to trees during the *fourth* year of said entry, giving the day, month, and year, as near as practicable, when the planting was done, the kind or kinds of trees planted, and state how you know the area or number of acres so prepared and planted during said fourth year.

Answer. ————.

Question 10. Has the claimant ever had the trees, seeds, or cuttings on the tract embraced in his timber-culture entry destroyed by grasshoppers or by extreme and unusual drought? If so, state the year or years in which the destruction took place, and give all the facts within your personal knowledge.

Answer. ————.

Question 11. How many acres of timber on the tract described has the claimant planted, cultivated, protected, and kept in a healthy growing condition for the period of eight (8) years last preceding, and from what source is your knowledge upon this point obtained?

Answer. ————.

Question 12. Describe the condition of the trees now growing on said tract, give their average diameter and height as near as you can, the kind or kinds of trees,

the number of trees to the acre, and state how you know the facts to which you testify.

Answer. ———.

Question 13. Has the claimant, to your knowledge, ever made any other timber-culture entry?

Answer. ———.

Question 14. Have you any interest, direct or indirect, in this claim?

Answer. ———.

Question 15. State any further facts which you may know of your own personal knowledge regarding the aforesaid timber-culture entry.

Answer. ———.

(Signature of witness.) ——— ———.

I hereby certify that the above-named ——— ——— personally appeared before me, and that he is a credible witness; that the foregoing testimony was read to him before being subscribed, and was sworn to by him before me this —— day of ———, 18—.

——— ———,

———.

NOTE.—The officer before whom the testimony is taken should call the attention of the witness to the following act of Congress, which is made by statute specifically applicable to all oaths, affirmations, and affidavits required or authorized under the timber-culture acts:

[Act of March 3, 1857 (11 Statutes, p. 502)].

SEC. 5. *And be it further enacted*, That in all cases where any oath, affirmation, or affidavit shall be made or taken before any register or receiver, or either, or both of them, of any local land-office in the United States, or any Territory thereof, or where any oath, affirmation, or affidavit shall be made or taken before any person authorized by the laws of any State or Territory of the United States to administer oaths or affirmations, or take affidavits, and such oaths, affirmations, or affidavits are made, used, or filed in any of said local land-offices, or in the General Land Office, as well in cases arising under any or either of the orders, regulations, or instructions, concerning any of the public lands of the United States, issued by the Commissioner of the General Land Office, or other proper officer of the Government of the United States, as under the laws of the United States, in anywise relating to or affecting any right, claim, or title, or any contest therefor, to any of the public lands of the United States, and any person or persons shall, taking such oath, affirmation, or affidavit, knowingly, willfully, or corruptly swear, or affirm falsely, the same shall be deemed and taken to be perjury, and the person or persons guilty thereof shall, upon conviction, be liable to the punishment prescribed for that offense by the laws of the United States.

(See also section 5392 United States Revised Statutes.)

FINAL CERTIFICATE, No. —. APPLICATION, No. —.

TIMBER CULTURE.

(*In duplicate; one for applicant, one for the files.*)

[Acts of March 3, 1873, March 13, 1874, and June 14, 1878.]

LAND OFFICE AT ———,
(*Date*) —— *day of* ——, 18—.

It is hereby certified that, in the pursuance of the provisions contained in the acts of Congress of March 3, 1873, and March 13, 1874, and the act amendatory thereof of June 14, 1878, entitled "An act to amend the act entitled 'An act to encourage the growth of timber on the western prairies,'" ——— ———, of ——, has made payment in full for ——— of section number —, in township —, of range number —, containing ——— acres.

Now, therefore, be it known, that on presentation of this certificate to the Commissioner of the General Land Office the said ——— ——— shall be entitled to a patent for the tract of land above described.

———— ————,
Register.

The case is now made up and the papers transmitted, at the end of the month, to the Commissioner of the General Land Office for approval and patent.

DESERT LANDS.

[See Chapter XXX, pages 363-364, 1291.]

TO JUNE 30, 1882.

From March 3, 1877, to June 30, 1882, there have been 3,849 entries under this act, containing 1,170,676.53 acres, realizing to the Nation $291,849.71.

Sales of desert lands under the act of March 3, 1877.

LANDS TO WHICH THE DESERT-LAND ACT APPLIES.

DECEMBER 1, 1883.

(See map fronting this page.)

Agriculture depends upon irrigation in Nevada, New Mexico, Arizona, Colorado, Wyoming, Idaho, Southern California, Montana, Eastern Oregon, a portion of the western part of Dakota, and Eastern Washington Territory; also in other portions of the public domain. The desert-land act, however, applies to the localities above named, and the lands therein are so called by law, and are so disposed of unless the contrary be shown. This vast arid region, estimated to contain more than seven hundred millions of acres, contains a water-supply sufficient to irrigate thirty millions of acres. What artesian wells may do is a question for the future.

A great portion of the timber lands of the Nation lie within this region, generally on the mountains (see timber map). Within this area lie the grazing or pasturage lands of the public domain (covering copper, coal, iron, and the precious metals), estimated at more than three hundred and fifty millions of acres. June 30, 1883, the United States owned (estimated), within subdivisions above enumerated, more than five hundred millions of acres of land within the area shown by the map and known as the arid region. Along streams, near springs, or by the side of water holes, or in valleys, can be found thousands of farms and homes using the existing water supply. These have been taken under the homestead, pre-emption, or other settlement laws; but it may be safely said that such lands with water supply immediately adjacent have long since been entered.

DESERT LANDS.

OFFICIAL CONSTRUCTION AND REGULATIONS.

IN EFFECT DECEMBER 1, 1883.

DEFINITION OF DESERT LANDS.

[From official circular General Land Office, October, 1880.]

By desert lands is meant a class of lands which will not, without irrigation, produce any agricultural crop. Land along streams and around bodies of water which produces grass suitable for hay without artificial irrigation is not desert land within the meaning of the law, and such lands are not subject to desert entry.

IN WHICH SUBDIVISION CLAIMS MAY BE ENTERED.

Title to desert lands in any of the following States and Territories may be acquired under the act of Congress of March 3, 1877, viz, the *States of California, Oregon,* and *Nevada,* and the *Territories of Washington, Idaho, Montana, Utah, Wyoming, Arizona, New Mexico,* and *Dakota.*

METHOD OF ACQUIRING TITLE.

Any party desiring to avail himself thereof must file with the register and receiver of the proper district land-office a declaration in form prescribed (No. 4–274), which must be under oath, and may be executed before either the register or receiver or the clerk of any court of record having a seal. It must be set forth that the applicant is a citizen of the United States, or that he has declared his intention to become such, in which case a duly certified copy of his declaration of intention to become a citizen must be presented and filed. It must also be set up that the applicant has made no

To accompany "Public Domain" Base Map from Mitchells Series of Geographies published by E. H. Butler & Co. Philadelphia. *By Thomas Donaldson.*

Map (approximate), showing the lands of the arid region where the Desert Land Act applies. Estimated to contain about seven hundred millions of acres, but embracing much timber, mineral and pasturage lands, already referred to in several preceding chapters. This map also shows the location of the grazing or pasturage lands of the public domain, covering great areas of mineral, and estimated as being equal in area to three hundred and fifty millions of acres. These, however, are included in the estimate of area of Desert Lands, State and Territorial boundaries only are correctly given.

other declaration for desert lands under the provisions of this act, and that he intends to reclaim the tract of land applied for, not exceeding one section, by conducting water thereon within three years from the date of his declaration. The declaration must also contain a description of the land applied for, by legal subdivisions if surveyed, or if unsurveyed as nearly as possible without a survey by giving, with as much clearness and precision as possible, the locality of the tract with reference to known and conspicuous landmarks or the established lines of survey, so as to admit of its being thereafter readily identified when the lines of survey come to be extended.

ENTRIES ON SURVEYED LANDS—SHAPE OF CLAIM.

The law requires desert entries to be compact in form. The requirement of compactness will be held to be complied with on surveyed lands when a section, or part thereof, is described by legal subdivisions compact with each other, as nearly in the form of a technical section as the situation of the land and its relation to other lands will admit of, although parts of two or more sections be taken to make up the quantity or equivalent of one section. But entries which show upon their face an absolute departure from all reasonable requirements of compactness, and being merely contiguous by the joining of ends to each other, will not be admitted, whether on surveyed or on unsurveyed lands.

ENTRIES ON UNSURVEYED LANDS.

On unsurveyed lands the degree of compactness required will be such as, upon the adjustment of the lines after survey, will bring the land within the limits and general form of a technical section, or part thereof, as nearly as may be.

AREA AND FORM OF ENTRY.

In no case will the side lines be permitted to exceed one mile and a quarter, when the full quantity of six hundred and forty acres is entered. When the entry embraces a less quantity than a whole section or its equivalent, the limit to the side lines will be proportionately decreased.

Entries, whether by legal subdivisions on surveyed lands, or of an irregular form on unsurveyed lands, running along the margins or including both sides of streams, and not being compact in any true sense, will not be permitted.

PROCEDURE IN ENTRY—BLANKS AND FORMS.

As preliminary to the filing of the declaration, it must be satisfactorily shown that the land therein described is *desert land* as defined in the second section of the act. To this end, the testimony of at least two disinterested and credible witnesses is required, whose testimony will be reduced to writing in the usual manner; or the evidence may be furnished in the form of affidavits executed before the clerk of any court of record having a seal, the credibility of the witnesses to be certified by said clerk. The witnesses must clearly state their acquaintance with the premises, and the facts as to the condition and situation of the land upon which they base their judgment. A form of affidavit, to be sworn to and subscribed by each witness, is attached (No. 4–074). Where the land is situated on the borders of streams or lakes evidence will also be required that the land in its natural state is not productive of hay. After proof has been made to the satisfaction of the district officers, the receiver will receive from the applicant the sum of twenty-five cents per acre for the land applied for; the register will receive and file his declaration, and they will jointly issue, in duplicate, a certificate in the form attached (No. 4–199). One of these duplicates will be delivered to the applicant; the other will be retained by the register and receiver with the declaration and proof. They will bear a number according to the order in which the certificate was issued. The register will keep a record of the certificates issued, showing the number, date, amount paid, name of applicant, and description of the land applied for in each case, and, in addition, he will note the same upon his plats and records as in cases of ordinary entry. At the end of each month he will, with his regular returns, forward to this office an abstract of the declarations filed and certificates issued under this act during the month, accompanying same with the declarations and proofs filed and the retained copy of certificate in each case. The receiver will also account for the money received under this act in the usual form. At any time within three years after the date of filing the declaration and the issue of certificate, the proper party may make satisfactory proof of having conducted water upon the land applied for. This proof must consist of the testimony of at least two disinterested and credible witnesses, who must appear in person before the register and receiver. They must declare that they have personal knowledge of the condition of the land applied for, and of the facts to which they testify; and their testi-

mony must be reduced to writing in the usual manner. (See Forms 4-372 and 4-373.) The party must also present and surrender the duplicate certificate issued when the declaration was filed. When this is done, and the final proof made to the satisfaction of the district officers, the receiver will receive the additional payment of one dollar per acre, receipt therefor in duplicate, as per Form 4-143, and give the party a duplicate receipt. The register will also issue a final certificate of purchase (Form 4-200). They will give to these final certificates and receipts a special series of numbers, and will make separate abstracts of same at the end of each month, sending up therewith the final certificates, receipts, and proofs.

CLAIMS ON UNSURVEYED LANDS—DUTIES OF OFFICERS IN SUCH CASE.

In cases where declarations shall be filed under this act for unsurveyed lands, the register and receiver will immediately forward copies of the declarations to the surveyor-general in order that the proper surveys may be made. The claimants will be required to take their claims by legal subdivisions when the lines of public surveys shall have been extended over the same.

WHO MAY ENTER DESERT LANDS.

Any person who is a citizen of the United States, or any person of requisite age, who may be entitled to become a citizen, and who has filed a declaration of intention to become one, may enter 640 acres of desert land or public land, which will not, without irrigation, produce some agricultural crops—in the States and Territories above set out. Surveyed or unsurveyed lands may be entered.

PROCEDURE AND FORMS IN DISTRICT LAND OFFICE.

DECEMBER 1, 1883.

[Blanks furnished free.]

LIST OF FORMS.

(At time of (original) application.)

Declaration by applicant.
Affidavit or testimony of two witnesses.
Non-mineral affidavit by applicant.
Register and receiver's certificate, in duplicate.

(Final entry.)

Any time within three years after date of filing.
Declaration and issue of certificate must be done in person before register and receiver.
Deposition of applicant.
Deposition of two witnesses.
Receiver's final receipt in duplicate.
Register's final certificate, in duplicate.

FORMS NECESSARY AT APPLICATION.

[No. 4-274.]

DESERT LAND—ACT OF MARCH 3, 1877.

(*Executed before register or receiver or clerk of court having a seal.*)

Declaration of applicant.

No. ——. LAND OFFICE AT ———,
(*Date*) ———, 18—.

I, ——— ———, of —— county, —— of ——, being duly sworn, depose and declare, that I am a citizen of the United States, of the age of ——, and a resident of said county and ——, and by occupation a ——; that I intend to reclaim a tract of desert land, not exceeding one section, by conducting water upon the same, within three years from date, under the provisions of the act of Congress approved March 3, 1877, entitled "An act to provide for the sale of desert lands in certain States and Terri-

tories." The desert land which I intend to reclaim does not exceed one section, and is situated in —— county, in the —— land district, and is described as follows, to wit: the —— of section No. ——, township No. ——, range No. ——, containing —— acres. I further depose, that I have made no other declaration for desert lands under the provisions of said act; that the land above described will not, without irrigation, produce an agricultural crop; that there is no timber growing upon said land; that there is not, to my knowledge, within the limits thereof, any vein or lode of quartz, or other rock in place, bearing gold, silver, cinnabar, lead, tin, or copper, or any deposit of coal; that there is not within the limits of said land, to my knowledge, any placer, cement, gravel, or other valuable mineral deposit or salines; that no portion of said land is claimed for mining purposes, under the local customs or rules of miners or otherwise; that no portion of said land is worked for mineral during any part of the year by any person or persons; that said land is essentially non-mineral land; that I became acquainted with said land by ——; and that my declaration therefor is not made for the purpose of fraudulently obtaining title to mineral land, timber land, or agricultural land, but for the purpose of faithfully reclaiming, within three years from the date hereof, by conducting water thereon, a tract of land which is desert land within the meaning of the act.

——— ———.

LAND OFFICE AT ———,
(*Date*) ———, 18—.

I hereby certify that the foregoing declaration was this day sworn to and subscribed before me.

——— ———, *Register.*
——— ———, *Receiver.*

[No. 4-074.]

DESERT LAND—ACT OF MARCH 3, 1877.

AFFIDAVIT.

(*Two witnesses, separately in each case, sworn to before register or receiver or clerk of a court with a seal.*)

No. ——. LAND OFFICE AT ———,
(*Date*) ———, 18—.

I, ——— ———, of —— county, ——, being duly sworn, declare, upon oath, that I am a resident of said county and ——; that I am of the age of ——, and by occupation a ——; that I am well acquainted with the character of each and every legal subdivision of the following-described land: the —— section No. ——, township No. ——, range No. ——, containing —— acres; that I became acquainted with said land by ——; that I have been acquainted with it for —— years last past; that I have frequently passed over it; that my knowledge of said land is such as to enable me to testify understandingly concerning it; that the same is desert land within the meaning of the second section of the act of Congress approved March 3, 1877, entitled "An act to provide for the sale of desert lands in certain States and Territories"; that said land will not, without artificial irrigation, produce any agricultural crop; that no agricultural crop has ever been raised or cultivated on said land for the reason that it does not contain sufficient moisture for successful cultivation; that the same is essentially dry and arid land, wholly unfit for cultivation without artificial irrigation; that said land cannot be successfully cultivated without reclamation by conducting water thereon; that said land has hitherto been unappropriated, unoccupied, and unsettled, because it has been impossible to cultivate it successfully on account of its dry and arid condition; that it is a fact well known, patent, and notorious that the same will not, in its natural condition, produce any crop; that the land is the ——; that there is no timber growing thereon, but that it is devoid of timber; that there is not, to my knowledge, within the limits thereof, any vein or lode of quartz, or other rock in place, bearing gold, silver, cinnabar, lead, tin, or copper, or any deposit of coal; that there is not, within the limits of said land, to my knowledge, any placer, cement, gravel, or other valuable mineral deposit or salines; that no portion of said land is claimed for mining purposes under the local customs or rules of miners or otherwise; that no portion of said land is worked for mineral during any part of the year by any person or persons; that said land is essentially non-mineral land; that I am not interested in any way or manner, directly or indirectly, present or prospective, in any application or declaration made or to be made for said land or in the land itself, or in the title which may by any person or in any manner be acquired thereto.

——— ———.

NON-MINERAL AFFIDAVIT.

(*Sworn to before register or receiver, or clerk of a court having a seal.*)

See page 694 herein, for form of non-mineral affidavit.

[No. 4–199.]

DESERT LAND CERTIFICATE.

(*Issued in duplicate; one for applicant, one for the files.*)

No. ——. UNITED STATES LAND OFFICE,
———, 18—.

It is hereby certified that under the provisions of the act of Congress approved March 3, 1877, entitled "An act to provide for the sale of desert lands in certain States and Territories," ——— ——— has this day filed in this office his declaration of intention to reclaim the following-described tract of land, viz: ———; that he has proven to our satisfaction that the said tract of land is desert land as defined in the second section of said act, and that he has paid to the receiver the sum of —— dollars, being at the rate of twenty-five cents per acre for the land above described.

It is, therefore, further certified, that if within three years from the date hereof the said ——— ———, his heirs or legal representatives, shall satisfactorily prove that the said land has been reclaimed by carrying water thereon, and shall pay to the receiver the additional sum of one dollar per acre for the land above described, he or they shall be entitled to receive a patent therefor under the provisions of the said act.

——— ———, *Register.*

$——. ——— ———, *Receiver.*

NOTE.—The word "heirs" is substituted in this form for the word "assignee," the Secretary of the Interior having declined to recognize the assignment of desert land claims.

FORMS USED IN FINAL ENTRY.

[No. 4–372.]

FINAL PROOF UNDER THE DESERT LAND ACT OF MARCH 3, 1877.

(*May be made at any time within three years after date of filing declaration and receipt of certificate.*)

DEPOSITION OF APPLICANT.

(*Must be taken before register or receiver in person; applicant must also surrender the duplicate certificate issued him or her when declaration was filed.*)

Ques. 1. State your name, age, occupation, and residence.
Ans. ———.
Ques. 2. Are you a citizen of the United States, or, if not, have you declared your intention to become such? (If not native-born, proof-record must be furnished.)
Ans. ———.
Ques. 3. If you have heretofore made a desert land entry, give the number and date thereof, and describe the land embraced therein.
Ans. ———.
Ques. 4. Have you conducted water upon the land embraced in said entry, and irrigated the same, and reclaimed it from its former desert character to such an extent that it will now produce an agricultural crop?
Ans. ———.
Ques. 5. What crops have you raised upon said land in each and every year since your first entry thereon under your declaration No. ——?
Ans. ———.
Ques. 6. How many acres have been sown or planted in each year, in what crops, and upon what portion or subdivision of the land, and what amount of such crops has been actually produced?
Ans. ———.
Ques. 7. What crops, if any, had been grown upon the land, or upon any portion thereof, and, if any, upon what portion, previous to your entry thereon?
Ans. ———.
Ques. 8. Would the land, or any portion of it, by cultivation without irrigation, have produced any agricultural crop whatever, and, if so, what crop?
Ans. ———.

Ques. 9. Was there any natural water supply upon such land sufficient to fertilize or irrigate the whole or any portion thereof, and, if so, what portion? State fully.

Ans. ———.

Ques. 10. Has the amount of water conveyed upon the land in any one season been sufficient to so irrigate the entire tract as to render the same productive, and, if so, what crop or crops would such irrigation produce?

Ans. ———.

Ques. 11. Has the whole tract been irrigated and cultivated by you in any one season?

Ans. ———.

Ques. 12. Has each smallest legal subdivision or portion of less than forty acres been irrigated or cultivated either during one season or different seasons since the date of your entry?

Ans. ———.

Ques. 13. How much water per acre has been conducted upon the land, or upon any portion under cultivation, in any one season; for how long a time was it so conducted upon the land, and at what times or seasons? State fully.

Ans. ———.

Ques. 14. In what manner was such water conveyed upon the land, whether by pipes or ditches, and how was it distributed over and through the soil? State particularly and in detail, and describe the ditches as to their width, depth, direction through or around the land, and give the length of each.

Ans. ———.

Ques. 15. Have you at this time the right and proprietorship of water sufficient and available to continue the irrigation of this tract and make perpetual reclamation of the land, and is it your purpose so to continue its use upon this land, and for the purposes of such reclamation?

Ans. ———.

Ques. 16. How was such right or proprietorship obtained, and by what tenure do you now hold the same? (Duly verified abstract of title must be furnished.)

Ans. ———.

Ques. 17. Have you the sole and entire interest in said entry, and in the tract covered thereby, and the water appropriated to irrigate the same?

Ans. ———.

Ques. 18. Has any other person, individual, or company of individuals any interest whatever in said entry, tract, or water appropriation? If so, give the name, residence, and occupation of each such person, and the nature, amount, and extent of such interest.

Ans. ———.

Ques. 19. Have you made or become the assignee of any other entry, or have you any interest, direct or indirect, in any other entry under the desert land act?

Ans. ———.

(*Signature*) ——— ———.

I HEREBY CERTIFY that each question and answer in the foregoing deposition was read to the applicant before —— signed —— name thereto, and that the same was subscribed and sworn to before me this —— day of ——, 18—.

———— ————, *Register.*

———— ————, *Receiver.*

NOTE.—The officer before whom the deposition is taken should call the attention of the witness to the following section of the Revised Statutes, and state to him that it is the purpose of the Government, if it be ascertained that he testifies falsely, to prosecute him to the full extent of the law:

"TITLE LXX.—CRIMES.—CH. 4.

"SEC. 5392. Every person who, having taken an oath before a competent tribunal, officer, or person, in any case in which a law of the United States authorizes an oath to be administered, that he will testify, declare, depose, or certify truly, or that any written testimony, declaration, deposition, or certificate by him subscribed is true, willfully and contrary to such oath states or subscribes any material matter which he does not believe to be true, is guilty of perjury, and shall be punished by a fine of not more than two thousand dollars, and by imprisonment, at hard labor, not more than five, years, and shall, moreover, thereafter, be incapable of giving testimony in any court of the United States until such time as the judgment against him is reversed." [See sec. 1750.]

[No. 4-73.]

[The deposition of two witnesses, in this form, taken separately, required in each case.]

(*Must be taken in person before the register and receiver.*)

FINAL PROOF UNDER THE DESERT LAND ACT OF MARCH 3, 1877.

DEPOSITION OF WITNESS.

Ques. 1. State your name, age, residence, and occupation.
Ans. ———.
Ques. 2. Are you acquainted with ——— ———, who made desert land entry No. ——, on the —— day of ——, A. D. 18—, upon the ——?
Ans. ———.
Ques. 3. How long have you known the party who made this entry?
Ans. ———.
Ques. 4. Have you personal knowledge of this land?
Ans. ———.
Ques. 5. Has water been conducted upon the land embraced in said entry so as to irrigate and reclaim the same from its former desert condition to such extent that the same will produce an agricultural crop?
Ans. ———.
Ques. 6. What crops have been raised upon said land in each and every year since its first entry by ——— ———, under declaration No. ——, and by whom?
Ans. ———.
Ques. 7. How many acres have been sown or planted in each year, in what crops, and upon what portion or subdivision of the land, and what amount of crops have been produced thereon, and by whom?
Ans. ———.
Ques. 8. What crops, if any, had been grown upon the land, or upon any portion thereof, previous to the entry of ——— ——— thereon?
Ans. ———.
Ques. 9. Would the land, or any portion of it, by cultivation without irrigation, have produced any agricultural crop whatever, and, if so, what crop?
Ans. ———.
Ques. 10. Was there any natural water supply upon such land sufficient to fertilize or irrigate the whole, or any portion thereof, and, if so, what portion? State fully.
Ans. ———.
Ques. 11. Has the amount of water conveyed upon said land by ——— ——— in any one season been sufficient to so irrigate the entire tract as to render the same productive, and, if so, what crop or crops would such irrigation produce?
Ans. ———.
Ques. 12. Has the whole tract been irrigated and cultivated by ——— ——— in any one season?
Ans. ———.
Ques. 13. Has each smallest legal subdivision or portion of less than forty acres been irrigated or cultivated either during one season or different seasons since the date of entry?
Ans. ———.
Ques. 14. How much water per acre has been conducted upon the land, or upon any portion under cultivation in any one season; for how long a time was it so conducted upon the land, and at what times or seasons? State fully.
Ans. ———.
Ques. 15. In what manner was such water conveyed upon the land, whether by pipes or ditches, and how was it distributed over and through the soil? State particularly and in detail, and describe the ditches as to their width, depth, direction through or around the tract, and give the length of each.
Ans. ———.
Ques. 16. Has ——— ——— at this time the right and proprietorship of water sufficient and available to continue the irrigation of this tract and make perpetual reclamation of the land?
Ans. ———.
Ques. 17. How did you become acquainted with the facts relative to the irrigation of said land?
Ans. ———.
Ques. 18. Have you any interest, direct or indirect, in this entry, in the land covered thereby, or in the water supply used in its irrigation?
Ans. ———.

(*Signature*) ——— ———.

I HEREBY CERTIFY that witness is a person of respectability; that each question and answer in the foregoing testimony was read to —— before —— signed —— name thereto, and that the same was subscribed and sworn to before me this —— day of ——, 18—.

———— ————, *Register.*
———— ————, *Receiver.*

NOTE.—The officer before whom the deposition is taken should call the attention o the witness to the following section of the Revised Statutes, and state to him that it is the purpose of the Government, if it be ascertained that he testifies falsely, to prosecute him to the full extent of the law.

"TITLE LXX.—CRIMES.—CH. 4.

"SEC. 5392. Every person who, having taken an oath before a competent tribunal, officer, or person, in any case in which a law of the United States authorizes an oath to be administered, that, he will testify, declare, depose, or certify truly, or that any written testimony, declaration, deposition, or certificate by him subscribed is true, willfully and contrary to such oath states or subscribes any material matter which he does not believe to be true, is guilty of perjury, and shall be punished by a fine of not more than two thousand dollars, and by imprisonment at hard labor, not more than five years, and shall, moreover, thereafter, be incapable of giving testimony in any court of the United States until such time as the judgment against him is reversed." DESERT LAND—ACT OF MARCH 3, 1877.

(*Issued in duplicate—one for claimant, one for the files.*)

Receiver's Final Receipt, No. —. Declaration No. ——.

LAND OFFICE AT ——,
(*Date*) ——, 18—.

Received from ———— ————, of —— county, ——, the sum of —— dollars and —— cents, being final payment of one dollar per acre for the —— containing —— acres, at one dollar and twenty-five cents per acre, the sum of twenty-five cents per acre having been heretofore paid, as per original receipt No. ——.

———— ————, *Receiver.*

$——.

[No. 4–200.]

DESERT LAND—ACT OF MARCH 3, 1877.

(*Issued in duplicate; one for claimant, one for the files.*)

Register's Final Certificate No —. Declaration No. ——.

LAND OFFICE AT ————,
(*Date*) ————, 18—.

IT IS HEREBY CERTIFIED that, in pursuance of the act of Congress approved March 3, 1877, entitled "An act to provide for the sale of desert lands in certain States and Territories," ———— ————, of —— county, State or Territory of ——, has purchased of the register of this office, and made payment in full for the land described as follows, to wit: ——, containing —— acres, at the rate of one dollar and twenty-five cents per acre, amounting to —— dollars.

Now, therefore, be it known, that on presentation of this certificate to the Commissioner of the General Land Office the said ———— ———— shall be entitled to receive a patent for the tract of land above described.

———— ————, *Register.*

[NOTE.—See original declaration and receipt, No. —.]

The case is now made up and the papers transmitted, at the end of the month, to the Commissioner of the General Land Office for approval and patent.

PRIVATE LAND CLAIMS.

[See Chapter XXXI, pages 365 to 410, 1292.]

TO JUNE 30, 1883.

No additional legislation by Congress of a general character on the subject of private land claims has been had since June 30, 1880, and scores of such cases are now on file in the General Land Office, or in the registers of Congress to which they have been reported, waiting for an act of confirmation.

The condition and volume of these claims pending in the General Land Office June 30, 1882, can be readily seen by the following exhaustive statement made by the principal clerk on private land claims in charge of that division, Luther Harrison, esq., before a committee of the United States Senate, December 28, 1881, and January 3, 1882. This statement shows the necessity for Congressional action looking toward the final settlement of these claims.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., November 30, 1881.

PRIVATE LAND CLAIMS DIVISION.

This division of the General Land Office has charge of all claims which had their origin in some form of concession from a foreign Government before the acquisition by the United States of the territory in which they are located and are embraced within the purchases of Louisiana and Florida, the former by the treaty of April 30, 1803, with France, and the latter by the treaty of February 22, 1819, with Spain, and the cession made by Mexico by the treaty of Guadalupe Hidalgo and the subsequent Gadsden purchase.

The rights of claimants to property acquired from the former governments when they exercised sovereignty over the region of country in which their respective claims are situated are recognized and protected by the treaties of acquisition referred to. After the confirmation of this class of claims under the various laws passed by Congress for ascertaining their validity, their proper location by a United States survey and patenting come within the supervision of this division. It also has charge of the examination, location, and patenting of donation claims in the State of Oregon and the Territories of Washington, New Mexico, and Arizona, and of Indian lands, both reservations and allotments, and the issuing of scrip in satisfaction of confirmed claims where the title to such claims has been adjudicated by the Supreme Court of the United States, under the act of Congress of June 22, 1860, and certificates of location or scrip decreed by said court; also, of the examination and authentication of other scrip issued for like purpose under act June 2, 1858, and the examination and patenting of New Madrid locations, act February 17, 1815, and of other matters in the service similar to the foregoing.

STATE OF LOUISIANA.

It is estimated that in the State of Louisiana alone the number of confirmed private land claims is		10,000
Of this number there have been patented	978	
Satisfied with certificates of location, act June 2, 1858	289	
		1,267
Total undisposed of		8,733

There remaining at least 8,733 claims unadjudicated and subject to patent.

Relative to the inquiry made by Senator Blair upon his former visit as to the necessity of issuing patents for this class of claims would say in reply that the acts of Congress confirming private land claims in Louisiana generally provide for the issue of patent, and consequently this office has no jurisdiction to consider that question, but must execute the requirements of the law in that respect by issuing such patents when applied for.

Upon the general proposition as to the necessity of a patent, my understanding is, that a patent is essential to establish the boundaries of a confirmed claim and invest the patentee or lawful claimant with the legal title to the land described in such boundaries, being conclusive evidence of both.

"In the Federal courts, where the distinction between legal and equitable proceedings is strictly maintained, and remedies afforded by law and equity are separately pursued, the action of ejectment can only be sustained upon the possession by the plaintiff of the legal title. * * * The patent is the instrument which, under the laws of Congress, passes the title of the United States. It is the Government conveyance. * * * But in the action of ejectment in the Federal courts the legal title must prevail, and the patent, when regular on its face, is conclusive evidence of that title." Gibson *vs.* Choteau, 13 Wallace, 102.

Independent of the foregoing considerations its convenience, too, is undoubtedly appreciated in the daily business transactions of life. Suppose, for the sake of illustration, that the owner of a confirmed grant of land desired to borrow money upon his property or transfer it. In either transaction the title would be brought directly in question, and, in the absence of a patent, the confirmation would have to be resorted to to establish title. That evidence is not in the possession of the claimant, and could

only be exhibited by him by copies furnished from this office. The confirmation clearly established, a question might very properly arise as to the correctness of the boundaries of the claim as confirmed, which in many cases are vague and difficult of location, and being liable to be changed by the Government before the issue of a patent might defeat the object. In this view of the matter a patent is of much importance, as the objections stated would thus be obviated.

Patents also are absolutely necessary where two private land claims are confirmed for the same, or portions of the same tract of land, to give the claimants a standing in court in a suit, if necessary, to determine which is the superior title, and cases of this kind frequently occur in the administration of this office.

I will now endeavor to give a brief outline of the system adopted of disposing of this class of claims, the same rule applying to all other classes of claims within the jurisdiction of this division, and the labor involved in their examination and adjustment.

These claims are disposed of as called up by the parties in interest or their duly authorized attorney, *e. g.:* An application being made for a patent in a specific case, an examination is first made of the files, of which there are alphabetical indexes, containing the names of the confirmees in the cases on file, and if the necessary papers are found constituting the basis of patent, they are examined to ascertain whether the confirmation is properly stated, the question of confirmation being previously inquired into and settled by our own records, that the claim is correctly surveyed, and corresponds in every particular with the survey as represented upon our township plat, and generally that the papers are in all respects regular, and conform to the law. If the examination results satisfactorily, the patent is issued and the case closed; but if the papers should not be found upon the files, the party is so advised, and is also informed that they must be transmitted before action is taken. Frequently the local land officers are instructed in that particular direct from this office.

DONATIONS IN OREGON AND WASHINGTON TERRITORY, FORMERLY OREGON TERRITORY.

By act September 27, 1850, a grant of public lands was made to every white settler above the age of eighteen years, a citizen of the United States or who had declared his intention of becoming such on or before December 1, 1851, if a resident of said Territory on or before December 1, 1850; 320 acres to a single man and 640 acres to a married man, one-half to himself and the other half to the wife, to be held in her own right upon the condition of four years' continuous residence and cultivation. A similar grant was also made by the same act to those who went there between December 1, 1850, and December 1, 1853, and possessed the same qualifications prescribed for the other class, and upon the same conditions, except that the settler must have been 21 years of age; and that a single man was only entitled to 160 acres and a married man to 320 acres, one-half of which went to the wife in her own right.

The time when a claim could be initiated was further extended by subsequent legislation to December 1, 1855.

The files here show that there still remain to be patented, of the above claims..	343
To which add (supposed to have been abandoned).....	2,000
Total	2,343

Relative to the claims supposed to have been abandoned, [I] would say that notifications were filed as required by law, but the proof of residence and cultivation is wanting, and from the fact that they have continued in this condition for a long period of years, there can be no question but these claims have been abandoned, and consequently will never be perfected. They cannot be disposed of, however, without legislation of Congress, fixing a time under a penalty of forfeiture when claimants should come forward and furnish such proof

The necessity for this legislation arises from a defect in the original donation act in not fixing a time when the proofs required by it of residence and cultivation, &c., should be made.

NEW MEXICO DONATIONS UNDER SECOND SECTION, ACT JULY 22, 1854. (SIMILAR TO OREGON.)

Total reported to date.....	234
Patented to present time	26
Total undisposed of	208

The act of July 22, 1854 (second section), makes a grant of 160 acres of land to all persons above the age of twenty-one years, citizens of the United States or natural-

ized citizens who were residents of the Territory of New Mexico on or before January 1, 1853, and a like grant of 160 acres of land to persons possessing the same qualifications who went to said Territory between January 1, 1853, and January 1, 1858—in the latter class upon the condition of four years' residence and cultivation. Requirements in these cases, which must be established by satisfactory proof, are—

1. Age January 1, 1853; if in the second class when claim is alleged.
2. Whether native born or naturalized.
3. Continuous residence and cultivation for four years, if in the second class.
4. That land is agricultural and non-mineral.
5. That donee has never received the benefits of any grant from Spain or Mexico which has been recognized by the United States.

By the act of Congress approved February 5, 1875 (18 Stat., p. 305), certain lands in Santa Cruz valley, Pima County, Arizona Territory, were relinquished and granted "to the person or persons who have been in actual *bona fide* occupancy or possession of said land by themselves or their ancestors or grantors for twenty years next preceding the date of the passage of the act." The register and receiver are authorized by said act "to hear and determine, subject to the approval of the Commissioner of the General Land Office, the rights of the parties claiming under" said act and for that purpose authority is given to summon witnesses, administer oaths, and take testimony relative to such occupancy or possession. The act further provides upon the final determination of any such claim for a survey and patent.

Total number of said claims reported to date	89

These claims have been suspended awaiting perfection of proofs as required by law.

CLAIMS IN CALIFORNIA PRESENTED TO BOARD OF LAND COMMISSIONERS (ACT MARCH 3, 1851, AND SUPPLEMENTAL LEGISLATION).

Number of claims	813
Mission claims under No. 609 (24)	23
Total	836
Claims rejected by Board and courts, or both	212
Claims finally confirmed (estimated)	624
Claims surveyed and reported	596
Confirmed claims not yet reported	28
Confirmed claims docketed but not disposed of	25
Total in California to be disposed of	53

In the settlement of these claims we dispose, on an average, of seventeen a year. Many complications arise in the consideration of this class of claims, the boundaries of which as a general thing are contested, the act of July 1, 1864, affording facilities to all interested parties for that purpose. These claims usually embrace large tracts of valuable land, and in settling contests we are called upon to decide questions of law, in construing the confirmatory decrees, which in many cases are very ambiguous, and questions of fact in determining the correct location of the boundaries of a claim as fixed by the decree.

GRANTS ORIGINALLY IN NEW MEXICO, NOW IN NEW MEXICO AND COLORADO.

Reported by surveyors-general, under eighth section, act July 22, 1854, and confirmed by subsequent acts of Congress. Undisposed of	40

The same remarks will apply to this class of claims as were made with reference to California claims. These claims as confirmed are, however, for much larger tracts than those in California, and the description of boundaries contained in the grants from which their location must be determined is very vague and indefinite in the majority of cases.

Of this class of claims there have been reported by the surveyor-general of New Mexico, under said eighth section, act July 22, 1854, and are now pending in Congress for action, 70.

Grants in Arizona reported to Congress by surveyor-general of that Territory, under act of 1854, as extended to Arizona, 11.

Total pending in Congress, 81.

CERTIFICATES OF LOCATION.

This division is also charged with the examination of all applications for certificates of location, under the act of June 2, 1858. Said act was designed for the benefit of

owners of confirmed private land claims, applying only to those claims confirmed by it and prior acts of Congress, where the land embraced by such claims had been disposed of by the United States as public lands, and cannot therefore be satisfied by a location in place, and the examination necessary is—

1. Right of party to make the application.
2. As to confirmation.
3. Original locus of grant.
4. That land so confirmed has been disposed of by United States.

This scrip, like that issued by this division by virtue of decrees of the Supreme Court of the United States, under act of 1860, according to the provisions of the act of Congress approved January 28, 1879, is made receivable from actual settlers in commutation of homestead and payment for pre-emption claims, and is also assignable, and the examination of assignments as to their regularity is conducted here prior to transmission to recorder for patenting.

In Supreme Court scrip, locations made prior to act January 28, 1879, above referred to, no patents are authorized to be issued, but a certificate approving duplicate certificate of entry was prescribed by Secretary's decision of August 4, 1875, to be issued by this office as evidence of title.

There are awaiting approvals of duplicates in this division, 1,176.

Scrip applications under act June 2, 1858, to be examined, 96.

Scrip assignments to be examined, act of June 2, 1858, and Supreme Court scrip, 163.

Scrip suspended on account of imperfections in assignments, 169.

PATENTS FOR INDIAN ALLOTMENTS AND RESERVATIONS.

This division is also charged with the issuing of patents for all Indian allotments and reservations, under the various treaties. Its duties, however, in this particular are purely ministerial, as all questions of conflict are determined by the Office of Indian Affairs, the only labor required by this office being posting the different allotments upon the tract books and the preparation of patents.

NEW MADRID LOCATIONS.

In 1812 a large part of the land in the county of New Madrid was injured by earthquakes, and on February 17, 1815, Congress passed an act for the relief of parties who had thus suffered. By this act persons whose lands had been materially injured were authorized to locate a like quantity of land on any of the public lands in the Territory of Missouri, the sale of which was authorized by law; and it was made the duty of the recorder of land titles in the Territory, when it appeared to him from the oath or affirmation of competent witness or witnesses that any person was entitled to a tract of land under the provisions of the act, to furnish him a certificate to that effect. On this certificate, upon the application of the claimant, a location was to be made by the principal deputy surveyor of the Territory, who was required to cause the location to be surveyed and a plat of the same to be returned to the recorder with a notice designating the tract located and the name of the claimant.

The act further provided for a report to be forwarded by the recorder to the Commissioner of the General Land Office of the claims allowed and locations made, and for the delivery to each claimant of a certificate of his claim and location, which should entitle him, on its being transmitted to the Commissioner, "to a patent to be issued in like manner as is provided by law for other public lands of the United States." The act also declared that in all cases when the location was made under its provisions, the title of the claimant to the original land, founded generally upon some French or Spanish grant, or other evidence of title emanating from either of those governments, should revert to and vest in the United States.

Number of said claims reported	516
Number disposed of	382
Claims undisposed of	134

STATES OF FLORIDA, MISSOURI, ARKANSAS, ALABAMA, MISSISSIPPI, ILLINOIS, MICHIGAN, AND INDIANA.

In addition to the foregoing there are a large number of private land claims and donations in the States of Florida, Missouri, Arkansas, Alabama, Mississippi, Illinois, Michigan, and Indiana still unadjusted and unpatented.

In Florida there are 866 claims confirmed by, or pursuant to acts of Congress, or by the United States Supreme Court, of which United States surveys, with descriptive notes, are on file here. The land involved amounts to nearly 1,300,000 acres, and a very few only of said claims have been called up for patenting.

There are other claims in Florida which have been confirmed, but not located or surveyed; and there are many conflicts between those surveyed, which will at some time have to be adjusted in this office.

In the old Vincennes (Ind.) and Sault Ste. Marie (Mich.) land districts there are about 100 military and other donations unadjusted and unpatented.

Since the passage of the act of June 6, 1874, this office has not been obliged to issue patents in confirmed Missouri claims, but many important cases come before it for adjudication from that State. This act, however, does not apply to New Madrid claims, which are not private land claims within its meaning, and are, therefore, still subject to patent.

It is impossible to tell, without much research, how many unadjudicated claims remain in the States of Alabama, Mississippi, and Arkansas, but there is quite a large number, and they are the subjects of considerable correspondence every year.

Respectfully submitted.

L. HARRISON,
P. C. P. Land Claims.

Approved.

N. C. McFARLAND,
Commissioner.

For Hons. J. T. MORGAN and H. W. BLAIR,
Of Committee on Public Lands, United States Senate.

RECOMMENDATION OF THE PUBLIC LAND COMMISSION FOR LEGISLATION AS TO PRIVATE LAND CLAIMS.

The Public Land Commission appointed under acts of March 3, 1879, and June 16, 1880, in their preliminary report of February 24, 1880, after careful review of the subject, and having before it the testimony of a score of witnesses as to the necessity for legislation, made the following suggestions (see H. Ex. Doc. No. 46, Forty-sixth Congress, second session, together with testimony taken, 690 pages):

PRIVATE LAND CLAIMS.

So far as concerns all private land claims situate in any cessions from foreign Governments outside of the boundaries covered by the treaty of Guadalupe Hidalgo and the subsequent Gadsden purchase, the commission has but one recommendation to submit. Numerous acts of Congress have, from 1806 to 1872, inclusive, granted indemnity scrip for confirmed private land claims, wholly or partly lost by non-location, or conflict with other claims, entries, or rights, or reduced by deficient surveys. Most of these acts were temporary or local, or both; but an act of Congress, approved June 2, 1858 (Stat. at Large, vol. II, pp. 294–5), made general provision for all claims confirmed by Congress before that date and then remaining unsatisfied. The ascertainment and satisfaction of the claims therein provided for was placed within the jurisdiction of the executive officers of the United States; but as the questions involved are purely legal, the commission recommend a transfer of the jurisdiction to the Federal courts. The General Land Office would then be restricted to issuing such scrip, only upon judicial confirmation. This will not impair such rights as may have vested under past laws, but it will provide a safer and more satisfactory mode of ascertainment. This recommendation is formulated in sections 221 to 223, inclusive, in the accompanying bill.

The commission has no recommendations to make concerning private land claims in that part of the cessions from Mexico which fall within the State of California. The laws governing the confirmation and the segregation of these claims have been so far executed that very few claims are unsettled. So far as we are advised, none of these claims are pending in the courts upon the confirmation of title, and but thirty-seven have not been finally adjudicated upon the question of survey. Even as to that limited number, most of them have been surveyed by the Government, and the questions incidental thereto are rapidly approaching a final settlement. Whatever views we might have desired to submit if the question was *res integra*, there is no subject-matter to which new legislation by Congress would be applicable.

Sections 206 to 219, inclusive, of accompanying bill embody our recommendations as to the private land claims within the cessions from Mexico by treaty of Guadalupe Hidalgo and the Gadsden purchase, but exclusive of the State of California. These sections are literal transcripts of a bill introduced in the Senate during the present Congress by Hon. George F. Edmunds.

In California, Congress, by the acts of March 3, 1851, June 14, 1860, July 1. 1864, and July 23, 1866, provided machinery for the ascertainment and settlement of these claims, which has resulted in their final confirmation or rejection and in their subsequent segregation from the adjacent public lands. Questions of title were settled by the Federal courts, and authority to segregate claims judicially confirmed was vested in the proper executive officers of the United States.

But in the remainder of the territory derived from Mexico a different mode from settling private land claims was prescribed. The basis of such settlement is the eighth section of the act of July 22, 1854, which made it the duty of the surveyor-general to "ascertain the origin, nature, character, and extent of all claims to lands under the laws, usages, and customs of Spain and Mexico," and to report his conclusions to Congress for its direct action upon the question of confirmation or rejection. The law was singularly defective in machinery for its administration, and it imposed no limitation of time in the presentation of claims, and no penalty for failure to present. Its operation has been a failure amounting to a denial of justice both to claimants and to the United States. After the lapse of nearly thirty years, more than one thousand claims have been filed with the surveyor-general, of which less than one hundred and fifty have been reported to Congress, and of the number reported Congress has finally acted upon only seventy-one. Under the law, only copies of the original title papers were submitted to Congress, and it is not presumed that its committees are so constituted as to make safe judicial findings upon the validity of titles emanating from foreign Governments, nor to measure the era of claims whose boundaries rest exclusively upon meager recital of natural objects in terms of very general description. As a consequence the committees of Congress have naturally been reluctant to act with insufficient data upon questions which involved the functions of the judge rather than of the legislator, and as these claims have heretofore pertained to a semi-foreign population in a comparatively unsettled portion of our Territories, business of more importance to the general welfare of the nation has been permitted to exclude these local matters from regular consideration. In the limited number of cases finally confirmed, Congress has been compelled to confirm by terms of general description, which have usually proved to include much greater areas of land than Congress would knowingly have confirmed. The established rule of area under the Mexican colonization law was a maximum of eleven leagues to a claimant, being a little less than 50,000 acres; but as illustrations of the natural result of confirmation without proper judicial investigation, one confirmation by Congress to two claimants has proved to embrace 1,000,000 acres and another about 1,800,000 acres.

The time has arrived when the States and Territories containing these treaty claims are no longer on the frontier, and they have ceased to be populated exclusively by a foreign population. Lines of transcontinental railroads are piercing them in every direction; the restless activity of American civilization is spreading towns and farms over the plains, and has exposed the hidden treasures of the mountains; emigration is flowing in with magical rapidity, and industry and thrift are exploring every avenue for development and investment. But at the foundation of all permanent growth lies the security and certainty of land titles, and no discussion is required to prove that this is unattainable in communities covered with claims to title of foreign derivation and of unascertained boundaries. Even the Government is ignorant of the line of demarkation between its public lands and these treaty claims, and uncertainty and insecurity taint the titles of its purchasers. The sections proposed in our law are intended to cure these evils and to provide a practical and speedy mode of settling these claims to title. The eminent source from which the commission has copied its recommendation inspires us with great confidence in the sufficiency of the remedy proposed. It is in substance a judicial determination of the validity of the claims, with bar for non-presentation within a prescribed period, and a compulsory segregation after confirmation.

The experience of California has, however, demonstrated that in the lapse of years during which the United States have slept upon the fulfillment of these treaty obligations many of these claims have passed into the hands of innocent purchasers for valuable consideration. Cases will doubtless occur when the title of their grantees will be rejected or the lands so purchased will be excluded from the final survey of the grant. It was deemed simple justice to give such grantees a preference right to purchase from the United States at $1.25 per acre, to the extent of their actual possession, according to the lines of their original purchase, and section 220 is recommended to that end. It is simply a literal enactment as general legislation of section 7 of the act of Congress of July 23, 1866, and applicable only to California. It has operated with extreme beneficence in the State, and its principle should be equally applied to any other locality wherein the same conditions exist.

THE EDMUNDS BILL FOR SETTLING PRIVATE LAND CLAIMS.

The Public Land Commission, as above noted, recommended the adoption of the bill presented in the Senate December 14, 1881, by Hon. George F. Edmunds, of Vermont, for ascertaining and settling private land claims in certain States and Territories. The bill was as follows:

S. 504.

[Forty-seventh Congress. first session.]

IN THE SENATE OF THE UNITED STATES.

DECEMBER 14, 1881.—Mr. EDMUNDS asked and, by unanimous consent, obtained leave to bring in the following bill; which was read twice and referred to the Committee on Private Land Claims.

FEBRUARY 17, 1882.—Reported by Mr. BAYARD with amendments, viz: Omit the parts printed within brackets and insert the parts printed in *italics*.

A BILL to provide for ascertaining and settling private land-claims in certain States and Territories.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall and may be lawful for any person or persons, or corporations, or their legal representatives, claiming lands within the limits of the territory derived by the United States from the Republic of Mexico, and now embraced within the Territories of New Mexico, Wyoming, Arizona, or Utah, or within the States of Nevada or Colorado, by virtue of such lawful incomplete Spanish or Mexican grant, concession, warrant, or survey as the United States are bound to recognize and confirm by virtue of the treaties of cession of said country by Mexico to the United States, which, at the date of the passage of this act, have not been confirmed by act of Congress, or otherwise finally decided upon by lawful authority, and which have not become complete and perfect, in every such case to present a petition, in writing, to the judge of the district court of the United States in a State or Territory for the judicial district in which such lands may be situate, setting forth fully the nature of their claims to the lands, and particularly stating the date and form of the grant, concession, warrant, or order of survey under which they claim, by whom made, the name or names of any person or persons in possession of or claiming the same, or any part thereof, otherwise than by the lease or permission of the petitioner; and also the quantity of land claimed and the boundaries thereof, where situate, with a map showing the same, as near as may be; and whether the said claim has heretofore been confirmed, considered, or acted upon by Congress, or the authorities of the United States, or been heretofore submitted to any authorities constituted by law for the adjustment of land titles within the limits of the said territory so acquired, and by them reported on unfavorably or recommended for confirmation, or authorized to be surveyed or not; and praying in such petition that the validity of such title or claim may be inquired into and decided. And the said courts respectively are hereby authorized and required to take and exercise jurisdiction of all cases or claims presented by petition in conformity with the provisions of this act, and to hear and determine the same, as hereinafter provided, on the petition and proofs in case no answer or answers be filed after due notice, or on the petition and the answer or answers of any person or persons interested in preventing any claim from being established, and the answer of the district attorney where he may have filed an answer, and such testimony and proofs as may be taken; and a copy of such petition, with a citation to any adverse possessor or claimant, shall, immediately after the filing of the same, be served on such possessor or claimant in the ordinary legal manner of serving such process in the proper State or Territory, and in like manner on the district attorney of the United States; and it shall be the duty of the United States attorney for the proper district, as also any adverse possessor or claimant, after service of petition and citation, as hereinbefore provided, within thirty days, unless further time shall, for good cause shown, be granted by the judge or court to whom said petition is presented, to enter an appearance, and plead, answer, or demur to said petition; and in default of such plea, answer, or demurrer being made within said thirty days, or within the further time which may have been granted as aforesaid, the court shall proceed to hear the cause on the petition and proofs, and render a final decree according to the provisions of this act; and in no case shall a decree be entered otherwise than upon full legal proof and hearing; and in every case the court shall require the petition to be sustained by satisfactory proofs, whether an answer or plea shall have been filed or not.

SEC. 2. That all proceedings subsequent to the filing of said petition shall be conducted as near as may be according to the rules of the courts of equity in the proper Territory or courts of the United States in the States, except that the answer of the attorney of the United States shall not be required to be verified by his oath, and no continuance shall be granted unless for good cause shown; and the said court shall have full power and authority to hear and determine all questions arising in said case relative to the title of the claimants, the extent, locality, and boundaries of said claim, or other matters connected therewith fit and proper to be heard and determined, and by a final decree to settle and determine the question of the validity of the title and the boundaries of the grant or claim presented for adjudication, according to the law of nations, the stipulations of the treaty concluded between the United States and the Republic

of Mexico at the city of Guadalupe Hidalgo on the second day of February, in the year of our Lord eighteen hundred and forty-eight, or the treaty concluded between the same powers at the city of Mexico on the thirtieth day of December, in the year of our Lord eighteen hundred and fifty-three, and the laws and ordinances of the Government from which it is alleged to have been derived, and all other questions properly arising between the claimants or other parties in the case and the United States, which decree shall in all cases refer to the treaty, law, or ordinance under which such claim is confirmed or rejected; and in all cases the party against whom the judgment or decree of said district court may be finally rendered shall within six months be entitled to an appeal to the supreme court of the proper Territory, and from the supreme court of a Territory, and if the case be in a United States court in a State, from that court to the Supreme Court of the United States, which shall be taken and allowed within one year, and in the manner now prescribed by law for taking appeals from said courts; which Supreme Court shall retry the cause, as well the issues or questions of fact as of law, and may hear testimony in addition to that given in the court below, and may amend the record of the proceedings below as truth and justice may require; in which Supreme Court of the United States every question shall be open, and its decision shall be final and conclusive; and should no appeal be taken, the judgment or the decree of the said district court shall in like manner be final and conclusive, as shall be also the decision of the supreme court of the Territory unless appealed from; *and all the courts aforesaid shall advance the hearing of cases under this act as far as the same may be done consistently with the public interest.*

SEC. 3. That the testimony which has been heretofore lawfully and regularly received by the surveyor-general of the proper Territory or State, or by the Commissioner of the General Land Office, upon all claims presented to them respectively, shall be admitted in evidence in all trials under this act when the person testifying is dead, so far as the subject-matter thereof is competent evidence; and the court shall give it such weight as, in its judgment, under all the circumstances, it ought to have.

SEC. 4. That it shall be the duty of the Commissioner of the General Land Office of the United States, the surveyors-general of such Territories and States, or the keeper of any public records who may have possession of the records and testimony pertaining to any land-grants or claims for land within said States and Territories in relation to which any petition shall be brought under this act, on the application of any person interested, or by the attorney of the United States for either of said Territories or districts, to furnish copies of such records and testimony, certified under his official signature, with the seal of office thereto annexed, if there be a seal of office; which copies, if the originals are not within the jurisdiction of the court, shall have the same effect as testimony that the originals would have if produced. The legal fees shall be paid for such copies by the parties applying for the same, except the attorney of the United States.

SEC. 5. That the provisions of this act shall extend only to such claims as may be presented and filed within three years from the date of its passage; and all petitions under this act may be presented in vacation or term time, but the final hearing on the same shall be had and the final decree rendered only at the regular terms of the district courts; and the judges of said district courts and the supreme courts in the said Territories are hereby authorized, in vacation, in all cases arising under this act, to grant all orders for taking testimony, or otherwise to hear and dispose of all motions, and do all other things necessary to be done to bring the same on to a final hearing.

SEC. 6. That upon the final decision in accordance with this act of any claim prosecuted under it, in favor of the claimant or claimants, it shall be the duty of the clerk of the court in which such final decree is had to transmit a duly certified copy of the decree to the surveyor-general of the proper State or Territory, who shall thereupon cause the lands specified in said decree to be surveyed at the expense of the United States. Triplicate plats and certificates of the survey so made shall be returned into his office, one of which shall remain in his office, and one, duly authenticated, shall be delivered, on demand, to the party interested therein, and one shall be sent to the Commissioner of the General Land Office; on receipt and approval of which survey and plat by said Commissioner and the Secretary of the Interior, the President of the United States shall issue a patent to said claimant, subject to the provisions of this act; but one-half the necessary expense for making such survey and plat shall be paid by the claimant, and shall be a lien on said land, which may be enforced by sale of so much thereof as shall be necessary for that purpose, after a default of payment thereof for six months next after the approval of such survey and plat; and no patent shall issue until such payment.

SEC. 7. That the clerk of the court in which such petition may be filed shall, and he is hereby directed, when any petition or claim is filed under the provisions of this act, before any proceedings thereon, subject to the direction of a judge, to require reasonable security for all costs and charges which may accrue thereon in prosecuting

the same to a final decree; and the district attorney, clerk, marshal, and witnesses shall severally be allowed such fees for their services and attendance as may be allowed by law for the like services and attendance in the United States courts for the proper State or Territory.

SEC. 8. That it shall be the duty of the attorney of the United States for the proper Territory, in every case when the decision or decree of the district court is against the United States, to appeal the cause to the supreme court of the Territory; and if the decision of the latter court be against the United States, a copy of the record and decree, with a statement of the legal questions involved, shall be forthwith transmitted by the district attorney to the Attorney-General; and in like manner he shall transmit a copy of the record and decree in any case decided against the United States in the district court in a State; and unless the Attorney-General shall otherwise direct, the district attorney shall appeal the cause to the Supreme Court of the United States.

SEC. 9. That if in any case it shall so happen that the lands decreed to any claimant under the provisions of this act shall have been sold or granted [for a valuable consideration] by the United States, it shall be lawful for such claimants, or their legal representatives, at any time within one year after the rendition of the final decree in their favor, to execute and file, in the office of the Commissioner of the General Land Office, a release to the United States of all right, title, or claim to the land so sold or granted by the United States; and thereupon there shall be issued by the said Commissioner (under such regulations as may be prescribed by the Secretary of the Interior), to such claimant, or his legal representatives, scrip for an equal amount of acres so released, in quantities not exceeding six hundred and forty acres each, which scrip shall be assignable in such form as may be prescribed by said Secretary, and shall be receivable, acre for acre, in payment for any public lands in either of said Territoires or States respectively that may be subject to private entry at the minimum price.

SEC. 10. That the provisions of this act shall extend to any city lot, town lot, village lot, farm lot, or pasture lot held under a grant from any corporation or town [to which lands have been lawfully granted], *any grant which may be entitled to confirmation under this Government*, for the establishment of a city, town, or village, by the Spanish or Mexican Government, or the lawful authorities thereof; but the claim for said city, town, or village shall be presented by the corporate authorities of the said city, town, or village, or, where the land upon which said city, town, or village is situated was originally granted to an individual, the claim shall be presented by or in the name of said individual or his legal representatives.

SEC. 11. That all claims which are by the provisions of this act authorized to be prosecuted shall, after three years from the taking effect of this act, if no petition in respect to the same shall have been filed as hereinbefore provided, be deemed and taken, in all courts and elsewhere, to be abandoned, and shall be forever barred.

SEC. 12. That all the foregoing proceedings and rights shall be conducted and decided subject to the following provisions, as well as to the other provisions of this act, namely:

First. No claim shall be allowed that shall not appear to be upon a title lawfully and regularly derived from the Government of Spain or Mexico, and one that at the date of the acquisition of the territory by the United States the claimant would have had a lawful right to make perfect had the territory not been acquired by the United States, and that the United States are bound upon the principles of public law, or by the provisions of the treaty of cession, to respect and permit to become complete and perfect.

Second. No claim shall be allowed that shall interfere with or overthrow any just and unextinguished Indian title or right to any land or place.

Third. No allowance or confirmation of any claim shall confer any right or title to any gold, silver, or quicksilver mines or minerals of the same, unless the grant claimed effected the donation or sale of such mines or minerals to the grantee, or unless such grantee has become otherwise entitled thereto in law or in equity; but all such mines and minerals shall remain the property of the United States, with the right of working the same, which fact shall be stated in any patents issued under this act. But nothing in this act shall authorize the working of any mines therein by any person except the confirmee, or his assigns, until Congress shall provide by law therefor.

Fourth. No claim shall be allowed for any land the right to which has hitherto been lawfully acted upon and decided by Congress, or under its authority.

Fifth. No proceeding, decree, or act under this act shall conclude or affect the private rights of persons as between each other, all which rights shall be reserved and saved to the same effect as if this act had not been passed; but the proceedings, decrees, and acts herein provided for shall be conclusive of all rights as between the United States and all persons claiming any interest or right in such lands.

Sixth. No confirmation of or decree concerning any claim under this act shall in any manner operate or have effect against the United States otherwise than as a re-

lease by the United States of its right and title to the land confirmed; nor shall it operate to make the United States in any manner liable in respect of any such grants, claims, or lands, or their disposition, otherwise than as herein provided.

Seventh. No confirmation shall in any case be made or patent issued for a greater quantity than eleven square leagues of land, to or in the right of any one original grantee or claimant, or in the right of any one original grant to two or more persons jointly, nor for a greater quantity than was authorized by the respective laws of Spain or Mexico applicable to the claim.

SEC. 13. That section eight of the act of Congress approved July twenty-second, anno Domini eighteen hundred and fifty-four, entitled "An act to establish the offices of surveyors-general of New Mexico, Kansas, and Nebraska, to grant donations to actual settlers therein, and for other purposes," and all acts amendatory or in extension thereof, or supplementary thereto, and all provisions of law inconsistent with this act, be, and the same are hereby, repealed.

The bill did not become a law.

LEGISLATION RECOMMENDED BY SURVEYORS-GENERAL.

The surveyor-general of Arizona, Hon. John Wasson, in his report to the Commissioner of the General Land Office for 1881, says of—

SPANISH AND MEXICAN PRIVATE LAND CLAIMS.

But for the failure or neglect of parties to present their claims acquired under Spanish and Mexican laws for examination, every claim of any great importance would ere this have been reported as required by act of July 15, 1870; and, as it is, there are only four positively known to this office, and they lie partly in Sonora and partly in Arizona, which have not been presented, and all but one (El Sopori), for which petitions have been filed, have been reported and preliminary surveys executed. There are some, perhaps many, claims to very small tracts, granted by alcaldes and captains of presidios, which have not been presented for the action of this office.

My last annual report referred to seven claims, aggregating 49¼ square leagues, having been presented and reported upon, 32¼ leagues being recommended for confirmation and 17 for rejection. Five leagues were adversely reported because of forged title papers, and 12 because in excess of the amount granted.

As a rule, claimants petition for and set up claim to all land within the boundaries referred to in their title papers. Excepting the case of the "Calabazas" every title paper presented shows that the original grantees petitioned the authorities for an exact quantity by square leagues and specific parts of square leagues, and that such quantity was always appraised in accordance with prices fixed by law, set forth as exactly measured, sold, and granted. The former Governments were very careful to require full payment for all land granted, however small the fraction of a league might appear in the proceedings of measurement, appraisement, sale, and grant. Quantity being mentioned with exactness throughout all the proceedings, from the petition to grant, I caused all the preliminary surveys (save that of the "Calabazas") to be made for such exact quantity, and thus have justly recommended to Congress a saving of many square miles of land, without attempting to deprive any claimant of even a square inch to which he or his grantors ever had a lawful right.

A very thorough examination of Spanish and Mexican land laws has convinced me that neither Spain nor Mexico ever granted absolute title to mines and minerals, and that the right or any right to them could be acquired only in pursuance of the provisions of the mining ordinances; and that under grants and sales of land for grazing and agriculture no rights whatever to mines or minerals in the land so granted were acquired by the grantee, but all right and title thereto remained in the Government notwithstanding the grants; therefore I have recommended in all my reports upon claims in which minerals are even supposed to exist that the act of confirmation specially exempt the mines and minerals and reserve them to the Government.

In the famous case of the United States *v.* Andres Castellero (2 Black), the Supreme Court emphatically declares that a Spanish or Mexican title to land does not convey the minerals contained in the land granted, nor any interest in them, and that rights to mines and minerals could be acquired only under the mining ordinances. It is hoped that Congress will not make a donation of mines and minerals at wholesale to owners of immense grants of land made by foreign Governments, and at the same time continue the practice of selling the mineral lands (which were never claimed as private property) at a high price and under expensive conditions. I believe it is now the uniform practice of our Government to insert in patents for lands acquired under all other than the mining laws a clause exempting the mines and minerals therefrom, and with more reason should Congress exempt them from Spanish and Mexican grants by its acts of confirmation.

Since my last annual report the following titled cases have been reported:

January 21, 1881, "La Aribac;" petition by Charles D. Poston, with an interven-

ing petition by Santiago Ainsa; confirmation of all within boundaries asked; 2 square leagues recommended to the legal representatives of the original grantees.

February 5, 1881, "San Juan de las Boquillas y Nogales;" petition by Janet G. Howard and George Hearst, and asked confirmation of all within designated boundaries; recommendation for confirmation of exactly 4 square leagues to present petitioners.

February 25, 1881, "Los Nogales de Elias," which lies partly in Mexico; petitioners Camon Brothers and the heirs of Elias; recommendation for confirmation of that proportion of 7½ square leagues which falls within Arizona, by measurements or surveys based upon the initial point described in the original title papers, which gives about two square leagues, one-half to Camon Brothers, and one-half to the legal representatives of the original grantees.

March 1, 1881, two sowing lots and a house lot, granted by captains of presidios; present petitioners Sabino Otero *et al.*, to whom confirmation was recommended to the exact areas called for in the title papers, amounting to between 400 and 500 acres.

A petition has been before this office for more than a year asking for a report upon a claim to 31¼ square leagues, and the case would have been reported months ago but for the pressing demands for delay upon part of petitioner. I have no doubt but the claim is based upon forged title papers, and shall so report.

During the past year I found it necessary to send an agent to Hermosillo to specially examine certain records relating to land claims in Arizona, and finding references in title papers before me to land records in the Mexican city of Chihuahua, I deemed it a wise precaution to have the archives in said city examined by a trusted and competent employé of this office. It is sometimes as necessary to know that records do not exist as that they do. This office labors under unexampled difficulties in the examination of titles to lands issued by Spain and Mexico, inasmuch as all the original records and title papers (save the mere *testimonios*) are about four hundred miles distant, in a foreign country. However frequently and carefully these foreign archives may be searched by a competent person, it is impossible to note and report all points that arise in each case. Some cases that are presented for examination and report compel special examinations in Mexico of the papers and records pertaining to such cases. This fact requires time and expense. A pending case requires another examination of the archives in Hermosillo, in a particular that no searcher, however competent and cautious, could have anticipated in a general search.

In his report for 1882 Mr. Wasson again calls attention to this subject:

"SPANISH AND MEXICAN PRIVATE LAND CLAIMS, 1882.

"Titles to but three of these claims have been reported upon during the past fiscal year, viz:

"'El Sopori,' the Sopori Land and Mining Company, petitioners, for 31¼ square leagues. After a very thorough examination, the title was pronounced forged and invalid, and a recommendation made that it be rejected.

"'Buena Vista,' Frederick Maish and Thomas Driscoll, petitioners, for 4 square leagues, the greater portion lying in Sonora, Mex. The title was found to be genuine, and confirmation recommended.

"'Rancho de Martinez,' Nicolas Martinez *et al.*, petitioners, and quantity very small, it being a grant made by the justice of the peace of Tucson. Independent of the title paper, petitioners had acquired a right to confirmation by long, useful, and undisputed occupation, and a recommendation was accordingly made.

"Several claims to more or less land are still to be examined and reported. All would have been passed upon had claimants presented their claims. No law compels them to ask for an adjudication of titles, and the non-action of Congress on claims long since reported in accordance with existing law tends to discourage them, and creates a fear that, after doing all they can do under the law, their cases will be relegated to the courts, proceedings which in many cases would amount to confiscation. It is not stating the case too strongly to say that the non-action of Congress is an inexcusable outrage upon settlers generally, as well as upon owners of sound titles, the confirmation of which is guaranteed by international treaty. The homes of about twenty thousand people in Arizona are in jeopardy because of private land claims, some of which are not yet presented for investigation, and owners of sound grants are absolutely deprived of the possession of their property by squatters, who are encouraged to believe they have rights by the non-action of Congress. Thus great damage is done to thousands of honest men and their families and the improvement of the lands prevented. Congress ought, upon every consideration of expediency and justice, to immediately confirm or reject all claims reported in accordance with law; and if the present system is not right, or not the best, to promptly enact a new law and cause it to be vigorously enforced upon part of claimants and those charged with its execution. The treaty with Mexico requires that this be done. Sound public policy de-

mands it, and good faith with claimants and settlers generally calls aloud and justly upon Congress to perform this obvious duty.

"During the past year a number of petitions have been filed praying investigation of the rights of communities of Indians to lands. The petitions do not even allege that the claims are based upon title papers, but evidently rely upon the 'laws, usages, and customs of Spain and Mexico.' These cases ought to be speedily examined and reported. (It is no fault of this office that they have not been.) The longer deferred, the greater the hardships which are certain to ensue, however determined. If it be decided that the Indians have valid rights by reason of long occupation and the usages and customs referred to, many people will lose their homes and mining rights be greatly interferred with, if not in effect destroyed, though no title to mines passed with grants under the Spanish and Mexican system of disposing of lands; and upon the other hand, if it be found that the Indians have no rights to or in the lands claimed, they will become wanderers over the country and public nuisances, and of necessity suffer much without being responsible therefor.

"Provision ought to be made for a thorough search of all land records in the Mexican States of Chihuahua, Jalisco, Sinaloa, and Sonora. Original title papers or records, or both, to lands in Arizona, and quite likely in New Mexico, are liable to be found in the archives of either of said States. The original titles and all loose papers connected therewith to lands anywhere in the United States ought to be surrendered to our Government, and full copies made of all records pertaining to titles to such lands which are so interwoven with the records in any of these States that they cannot be detached. An expert in Spanish title documents should superintend the work, and wherein only copies can be obtained careful notes should be taken regarding any peculiarity of each and of all points indicating soundness or unsoundness of titles. 'Manifest destiny' seems to point to a further expansion of our country southward, and hence it would be wise policy for our Government to be vigilant in this matter of foreign land titles across our southern border. Enough was long since developed in California to demand such vigilance, and Arizona has already supplemented the history of California in this respect."

RECOMMENDATIONS OF SURVEYOR-GENERAL OF NEW MEXICO.

Hon. Henry M. Atkinson, surveyor-general of New Mexico, which contains the largest number of these unadjusted claims, in his report to the Commissioner of the General Land Office for 1881, says:

PRIVATE LAND CLAIMS.

There have been three private land claims filed during the year, to wit:

No. 184, Town of Atrisco. José Hurtado de Mendoza *et al.*, grantees.

No. 185, San Jose Spring. Paulin Montoya *et al.*, grantees.

No. 186, La Nasa. Manual Lucero, grantee.

A considerable amount of testimony has been taken in several cases, and final action has been taken in the following cases:

Reported No. 123. Ignacio S. Vergara. Approved.

Reported No. 124. Juan Montes Vigil, grantee. Approved.

Reported No. 125. Don Fernandez de Taos, town of, grantee. Approved.

The transcripts of the two former have been transmitted, and that of the latter will be forwarded in due time.

The land-grant question is becoming more serious in this Territory as time lapses, and again, in the language of my last report, I beg to renew my recommendation made in previous reports, that Congress fix a limitation on the time for filing and prosecuting private land claims and provide that they should be barred thereafter, and I again earnestly urge the importance of providing some safer and speedier method of adjudicating claims of this character, as the present method is unsatisfactory and unsafe, both for the Government and claimants. Judging from the light of experience I am of the opinion that a reference of these cases for adjudication to the district courts of the respective districts in which the lands may be situated would not be advisable, and, while there are some arguments in favor of such a reference, I believe the results would not be as satisfactory as under the present system.

Some of the objections to that method are that the court of adjudication should have direct and ready access to all the archives, it being frequently necessary, on account of the antiquity of the title papers, to introduce for purposes of comparison other original documents bearing the signatures of the same Spanish or Mexican officials whose signatures, or purported signatures, appear on the muniments of title in the case at bar, and the genuineness or ungenuineness of these title papers is frequently necessarily determined by such comparison when there are no living witnesses familiar with the signatures of such officials to prove or disprove the genuineness of the same.

The evidence of the abandonment or fraudulent character of a grant may exist among the archives in documents having no direct connection with the case at bar in one district, and the same document may embrace evidence of a similar character or reverse in another case pending in another district, and the document may be required in evidence in both district courts at the same time, or its existence may be known to one and unknown to the other, or may be unknown to either, unless direct and easy access to the entire archives can be had by the court. If these documents were sent back and forth from one district to another or to and from the regular custodian of the same, they would be liable to be lost, and if distributed among the several judicial districts the evidence of legality or illegality of the documents in some particular case might be on file in another district than the one in which it might be required in evidence in such particular case.

The investigations of this office the past five years have demonstrated that some of these alleged grants are forgeries, and a comparison of the signature of the governor on the alleged title papers with the signature of such officer, proven and accepted as genuine upon other documents in the archives, and the judgment of experts thereon is not unfrequently required to establish the character of the documents under consideration. Unless the court before which these claims are adjudicated can have access to all of these archives, it is much more liable to be imposed upon by fraudulent title papers.

It is not a difficult matter for witnesses to be obtained to swear to whatever may be deemed necessary to establish the claim, if parties were so disposed, and the closest scrutiny and most careful investigation is absolutely essential in these cases. There are two methods that could safely be adopted in the adjudication of these cases, to wit, by a commission appointed for that express purpose similar to that of California, with like powers and right of appeal from their action; the other would be to continue the authority in the surveyor-general, before whom all the testimony could be taken, and require the supreme court of the Territory (or United States court of the district in case of a State) to review each case before it is transmitted to Congress for its action, with the right of appeal therefrom to the circuit and supreme courts of the United States, or what would be better, have but one court of appellate jurisdiction. The surveyor-general could continue to make these investigations as before, taking the testimony in writing as under the present system, and his action in every case would be subject to review by the supreme court of the Territory or the United States district court of the States; which courts, having all the evidence before them, or accessible, could with facility dispose of the same without the duty imposed interfering materially with the other business of the court, and if they required further testimony in any case, they could remand it back to the surveyor-general for that purpose.

If the authority is continued in the surveyor-general to investigate these cases, he should be specifically empowered by law to issue compulsory process, punish for contempt, &c., and the United States district attorney should be required to appear on behalf of the Government from the inception of the investigation.

If Congress will fix the limitation, and provide some such mode of adjudication of these claims as is herein suggested, they will be rapidly disposed of, and the titles in this Territory, now in such an unsettled condition, will be speedily adjusted.

The acquisition to the population of New Mexico the ensuing year from immigration is estimated at not less than 50,000, and will probably exceed that, and it is all important that these titles be adjusted without further delay, and the lands embraced therein segregated from the public domain, so that the settlers upon the public lands may locate with some degree of confidence and certainty in eventually securing title to the lands settled upon by them.

Many of these grant title papers are doubtless still in the personal possession of the grantees or their descendants, and the particular location of the tracts covered by them, as well as the lands embraced by those claims on file but unadjudicated, is necessarily unknown. Individuals may locate on what is supposed to be public land, and after they have erected valuable buildings and improved the tract it may finally be ascertained to be embraced within the limits of a grant, and the labor and outlay of years are taken from the settler.

Where the Government has such large interests involved, and the property and improvements of settlers on the public lands are so much in jeopardy, it does seem as though Congress should give this matter prompt attention, and, in providing for the adjudication of claims of this character, the right of appeal to the several courts involves a great expense both to the Government and claimants; and while there should be a court to review the proceedings of the commission, or court having primary jurisdiction, in order to meet the demands of justice and as a safeguard against errors, yet to provide that all such cases may be appealed successively from court to court until the highest tribunal is reached would encumber the dockets and records of the various courts and render the proceedings tedious. I would suggest that an appeal be allowed from the court of original jurisdiction to some particular but higher tri-

bunal in order to simplify the proceedings and avoid the expense and delays incident to a final determination of a case where it must follow the course of ordinary civil cases.

Under existing laws there is no legal requirement that owners of grants shall file and prosecute their claims, and unless Congress prescribes some time within which they shall be filed and proven up, the present uncertain status of the soil as to ownership must remain undetermined. These grants are usually pastural or agricultural, and the unqualified confirmation operates as a quitclaim on the part of the Government to the mineral, which was never intended to be granted by either the Spanish or the Mexican Government, and the local Spanish or Mexican authorities had no power to grant the right to the mineral, as that was reserved as the property of the state, only subject to alienation by the supreme authority, and in a prescribed manner. Where the confirmation is unqualified the Government not only makes good the original title but confers upon the claimant the additional right to the mineral. It is well known that the precious metals abound throughout this Territory, and nearly all of these grants doubtless contain more or less mineral, although its existence may, at this time, in particular cases be unknown, yet the almost absolute certainty that it exists generally in the Territory should induce Congress to except the right to the mineral in the confirmation of these claims. I assume it to be the policy of the Government to encourage the development of the mineral resources of the country, and to reap some benefit from the same in the increased consideration charged for lands of this character, as well as the indirect benefit derived by reason of the addition of the net products of the mines to the substantial wealth of the country. If the right to the mineral is vested in the grant claimants, the adventurous prospector through whom these discoveries are usually made has no incentive to prospect thereon, and the existence of rich mineral deposits may remain undiscovered and unknown.

The appointment of a commission to adjust these claims would involve some additional expense over the present method, but I believe on the whole it would be far more satisfactory, and certainly the magnitude of the interest involved, both to claimants and the Government, would amply justify Congress in adopting this method for the settlement of private land claims in New Mexico, where such a considerable number yet remain to be adjudicated; and I hope that Congress will take early action in the premises.

In his report for 1882, continuing the subject, he again urges the attention of Congress to the subject, reciting the language of his report for 1881 and six years previous.

LAND GRANTS, HOW MADE BY SPAIN AND MEXICO IN THE ULTRAMARINE POSSESSIONS OF THE SPANISH CROWN—HOW MADE IN SPANISH AND MEXICAN POSSESSIONS NOW IN THE UNITED STATES.

[Work of Special Agent R. C. Hopkins.]

September 1, 1879, Mr. Rufus C. Hopkins was appointed by Hon. John Wasson, surveyor-general of New Mexico, to take charge of the bureau of private land claims in his office.

Mr. Hopkins proceeded to Sonora and other Mexican States in search of records and data. In Sonora he found record of twenty-one claims or grants within what is now Arizona. His report as to the method of making and character of grants made by authority of Spain and Mexico, now in California, Arizona, New Mexico, and Colorado, are given in full, as prepared by Mr. Wasson:

GRANTS OF LAND BY SPAIN AND MEXICO IN THE ULTRAMARINE POSSESSIONS OF THE SPANISH CROWN.

The ancient laws of Spain declare that the ownership and full dominion of conquered kingdoms belong to the monarch. (Law II, Title I, Partida II.)

Wherefore, the West Indies having been conquered by the arms of the Catholic king and queen, Fernando and Isabel, in the sixteenth century, in consideration of the fact that no person can live without the means of subsistence, and no city exist without the rents necessary for its support, their majesties thought proper to cede to the towns (poblaciones) of America and to the councils of the same certain portions of lands from which to derive their support, using the same for pasturage and cultivation, or in the manner that may be directed by the municipal ordinances; these lands were denominated *consejiles*, or *de propios*.

Another portion of the (conquered) lands was distributed by concession of the king to those who assisted in conquering the country as rewards for their services; and

lands were also sold to individuals (particulares) for the purpose of obtaining means to supply the necessities of the crown. These lands, donated or sold, were denominated *de dominio particular* (of private property), as in fact they are, because the full ownership thereof was transferred to the donees or purchasers, and hence they are truly private property.

The usufruct of the remaining lands was ceded by the kings to all their vassals, that they might make use of their pastures, woods, waters, and other natural productions, for the support of their flocks and herds; which lands are called "common lands," because they are for the common use. They are also called *valdios* (vacant lands), because nothing is paid for the use of the pasturage, or fire-wood that may be cut thereon. They are also *realengos* (royal lands), because the dominion and property thereof are reserved to the king by his right of conquest, although he ceded the usufruct of the same to his vassals. (Law III, Title VIII, Book VIII, del Ordenamiento; Law X, Title XV, Book II, Recopilacion; Law II, Title I, Book III, del Ordenamiento; Law I, Title V, Book VII, Recopilacion.)

For the disposition and settlement of the *realengo* lands of Spanish America, royal decrees were from time to time issued, and laws and ordinances passed, changed, or modified to suit the circumstances of the times, having for their end a proper disposition of the *realengo* lands and the encouragement of the occupation of the country by the actual settler. The royal decree of the 24th of November, 1735, required petitioners for *realengo* lands to apply to the royal person of the king for a confirmation of their titles. This decree, however, was found to be prejudicial to the settlement of the *realengo* lands, the expenses attending such applications being so great as to prevent many persons from applying for these lands; wherefore to remedy this difficulty were issued the royal instructions of the 15th of October, 1754.

Article 1st of these instructions provides that from the date thereof the power to appoint sub-delegate judges to sell and compromise for vacant lands of the royal domain shall belong exclusively to the viceroys and presidents of the royal audencias of the kingdom, who are required to notify the sub-delegate judges of their appointments and furnish them with a copy of the instructions, the viceroys and presidents being required to give immediate notice to the secretary of state and universal dispatch of the Indies of the ministers whom they might appoint as sub-delegate judges of their respective districts.

Article 3d provides that all persons who shall have possessed royal lands, whether settled and cultivated or not, from the year 1700 till the date of the publication of this order, may prove before the sub-delegate the titles and patents in virtue of which they hold their lands.

Article 4th provides that persons in possession of royal lands by virtue of sales or compositions made by sub-delegates before the year 1700, although the same may not be confirmed by the royal person of the king, shall not be disturbed in the possession thereof.

Article 5th provides that the possessors of lands sold or compromised for, from the year 1700 till the present time, shall not be disturbed in the possession thereof, provided their titles have been confirmed by the royal person of the king or by the viceroys and presidents of the audencias during the time that they exercised this faculty; but such possessors of lands as have not obtained such confirmations shall apply to the audencias of the district to have their titles confirmed. Under this decree or instructions the preliminary proceedings of survey, valuation, publication, and sale of the *realengo* land petitioned for having been taken by the minister sub-delegado of the district in which the land was situated, the expediente showing such proceedings was transmitted to the real audencia for approval; and if the proceedings were found to be regular, they were approved and the title was issued and registered in a book kept for that purpose.

The provinces of Sinaloa and Sonora belonged to the real audencia of Guadalajara, and hence the sales made of *realengo* lands in these provinces under the decree of 1754 were registered in the office of the real audencia in the city of Guadalajara.

The law of 1754 remained in force until the 4th of December, 1786, when to cure some defects and remedy some inconveniences found in the practical workings of said law the royal ordinances of intendentes were issued. Under these royal ordinances the Kingdom of New Spain was divided into twelve intendencias, exclusive of the Californias, one of which was to be the general intendencia of the army and province and to be established in the capital of Mexico, and one, the intendencia of Sonora and Sinaloa, the capital of which was established at the city of Arizpe.

The viceroy was to exercise the superior authority and the various powers conferred on him by royal commission and by the laws of the Indies as governor and captain-general, but the superintendency of the royal treasury, in all its branches and revenues, was committed to the care, direction, and management of the general intendency of the army and treasury, established in the capital of Mexico. A superior junta was established in the capital, having jurisdiction over all matters relating to the royal treasury and the army, and also over the public property and revenues.

Article 81 of these ordinances provides that the intendentes shall be the exclusive judges of all causes and questions that may arise in the district of their provinces in relation to the sale, composition, and grant of *realengo* lands.

Under these ordinances the proceedings preliminary to a grant of *realengo* lands were taken in the same manner as under the law of the 15th of October, 1754, but these proceedings, instead of being referred to the real audencia for approval, were submitted to the intendente, who referred the same for examination to the promotor fiscal, who made a report thereon; whereupon they were referred by the intendente to the "provincial junta de hacienda," and when approved were transmitted through the office of the commandante-general to the city of Mexico for final approval by the "superior junta de hacienda," and, if found to be correct, the proceedings were approved, the approval registered in the proper book, and the expediente returned to the province where it belonged.

On the 22d day of October, 1791, Don Pedro de Nava, commandante-general of western provinces, made a decree to the effect that, "notwithstanding what was provided in article 81 of the ordinances of intendentes," captains of presidios were authorized to grant house lots and lands to soldiers and settlers who might desire to establish themselves under the protection of the presidio. These grants were, however, limited to the territory embraced within four square leagues, measured one league from the presidio to each of the cardinal points. The motives of this decree are manifest; they were that the soldiers of the presidio might make homes for their families, and that pueblos might grow up around the presidial establishments.

The ordinances of the 4th of December, 1786, were further modified by the royal decree of the 23d of March, 1798. This decree provides that when the value of the *realengo* lands petitioned for and sold by the intendente does not reach the sum of $200 it shall not be necessary to refer the proceedings to the superior junta for approval. The reason for the issuance of this decree was that the expenses attending a reference to the superior tribunal were often greater than the value of the lands sold, which prevented persons of small means from making application for *realengo* lands, and much retarded the settlement of the country.

Under these ordinances, with the modifications referred to, grants of *realengo* or royal lands continued to be made until the dominion of Mexico was lost to the crown of Spain by the revolution which resulted in the independence of Mexico in 1821.

From the foregoing laws, ordinances, and decrees it is seen that the constant policy of Spain was to encourage by all means the settlement of her possessions in the New World; that, while the absolute ownership of the *realengo* lands was retained by the crown, laws from time to time were passed for the purpose of enabling actual settlers to obtain titles to so much of these *realengo* lands as they required for their use and occupation in the pursuits of agriculture and stock-raising; yet, while the terms under which titles to these *realengo* lands could be obtained for actual use and occupation were made so easy as to be within the reach of petitioners of humble means, still the Government guarded with jealous care their disposition by passing such laws as made it impossible for the vassals of the king to acquire them for any other purpose than that of actual use and occupation.

GRANTS OF "TERRENOS VALDIOS," OR VACANT LANDS, BY THE GOVERNMENT OF MEXICO, SUBSEQUENT TO THE YEAR 1821.

The revolution of 1821 changed the form of the Government of Mexico without producing any radical change in the habits or thoughts of the people. In 1822 an imperial government was established, which, however, was soon abolished, and the republican form adopted, and in 1824 a federal constitution was formed, modeled somewhat after that of the United States. On the 4th of August, 1824, the sovereign constituent Congress of the United States of Mexico passed decree No. 70, in which are specified the sources of the federal revenues, and the eleventh article of this decree recites "that the rents that are not included in the preceding articles of this decree belong to the States." As a compensation for this concession by the General Government the sum of $3,136,875 was required to be paid yearly by the states for the support of the General Government. This sum was apportioned to the different States according to their population and wealth, the sum apportioned to the State of the West (Estado del Occidente), embracing the Spanish provinces of Sonora and Sinaloa, being $53,125. Under this law grants or sales of land were made in the State of Sonora from 1824 down to the time when the system was changed by legislative enactment.

After the independence of Mexico, the old intendencia of the Spanish Government, embracing the provinces of Sonora and Sinaloa, was called El Estado del Occidente (the State of the West), continuing united under that name until about the year 1830, when they were divided by the boundary as it now exists.

On the 20th of May, 1825, the constituent congress of the free, independent, and sovereign State of the West (Estado del Occidente) passed provisional law No. 30, regulating the system of selling the public lands. Under these provisional regulations

the prices at which the public lands could be sold were graduated according to the location and quality of the land. The quantity allowed to one individual was limited to four square leagues, unless the applicant could satisfy the government that he required more for the use of his stock. Under this provisional law the State of the West, in making grants or sales of land, continued the system that had been established by the Spanish Government. The same formalities were observed; the lands were surveyed, valued, published for thirty days, and at the end of that time were sold at public auction to the highest bidder, the treasurer-general of the state occupying the same position under the state government that the intendente did under the Spanish Government. The grants, however, issued by the treasurer-general required no approval by the supreme government.

Between the time when grants cease to be made within the jurisdiction of the intendencia of Sonora and Sinaloa by the authorities of the Spanish Government and the time when they were made by the authorities of the "Estado del Occidente" under the law of the general congress of 1824 and the provisional law of the congress of the state of 1825, the granting power was exercised by an officer entitled *comisario general, provisional de hacienda, credito publico y guerra*, whose headquarters, as shown by the records of the times, were generally at Fuerte, a town in Sinaloa, near the northern boundary of the State.

Report of special agent, Mr. R. C. Hopkins, states: "That notes on expedientes of grants of land in the government archives of Sonora show that about the year 1825 a number of grants were issued by the above-named officer, on proceedings which under the Spanish Government had not gone beyond the approval of the provincial junta de hacienda," having doubtless at that point been arrested by the revolution of 1821. In these cases no borradores or draughts of title are found in the expedientes, but notes are found of the register of the grant in *cuardeno* No. 2 in the office of the comisario general.

On the 30th of May, 1834, the constituent congress of the State of Sonora issued decree No. 10, which provides as follows: "Article 1st. Six months' further time is granted to possessors of lands who have failed to obtain titles of ownership thereof, as required by decree No. 10 of the 28th of June, 1833."

Article 2d declares that if at the end of this time, which shall not be extended, the possessors of lands shall not appear and make their grants effective, their lands shall be denounceable, and the claimants thereof shall be subject to the penalties imposed by the organic law of the treasury, which is about to be passed. This law was required to be circulated and published in all the pueblos of the State, the respective authorities being directed to furnish exact lists of the lands in their districts for which titles had not been obtained.

On the 11th of July, 1834, was passed the "ley organica de hacienda" (organic law of the treasury). Article 57 of this law provides: That any one having necessity for a tract of land for grazing or other purposes shall present himself before the treasurer general, applying therefor in the name of the State, accompanying his application with the testimony of three impartial witnesses in relation to the circumstances of the petitioner, character of land, &c.

Article 58 declares that to no new settler (*creador*) more than four square leagues shall be granted or sold, unless it can be shown that, on account of the abundance of stock owned by such new settler, he needs more; in which case the treasurer general will concede him only so much as he may need, as shown by the testimony of impartial witnesses.

Article 60 declares that the treasurer general, as the immediate chief of all the revenues, shall make sale of the lands and issue titles therefor.

Article 61 declares that those who possess lands to which they have not obtained titles, although the lands have been applied for and surveyed, shall present themselves to the treasurer general within the time designated by the law No. 10 of the 30th of May of the current year (six months from 1st of June, 1834). The lands of the proprietors, which may not be regulated in accordance with this disposition, shall remain vacant and denounceable, provided the proprietors thereof shall not present themselves and make application for their titles within the time prescribed by said law, setting out in writing the cause of the failure to obtain title.

Article 62 directs the treasurer general to refer these matters to the promotor fiscal for his opinion, whereupon the matter will be determined in view of the rights of the interested party and of the public treasury.

Article 63 requires grantees of lands to construct boundary monuments of rough stone and lime within three months after the issuing of the title, and failing to do so, they have to pay a fine of $25 and the cost of constructing the necessary monuments.

Article 64 fixes the value of the public lands as follows: For dry lands only suitable for grazing, $15 per square league; for such as may be irrigated from reservoirs and contain pasture, $40, and without these circumstances, $35 per square league; for such as may contain springs or rivers, but are dry and broken, $60 per square league, and $80 per square league for such as are very fertile and suitable for agriculture. These

were the minimum prices, for less than which lands could not be sold in any case whatever.

Article 72 directs the surveyors to appoint as appraisers of the lands petitioned for persons who are free from prejudice and not especially partial to the petitioner.

Grants made subsequent to the passage of the foregoing law refer to the decree of the general congress of the 4th of August, 1824, and to the decress of the congress of the State of Sonora of the 30th of May, 1825, and of the 11th of July, 1834, as the basis on which they are made; and all the grants of land in Sonora since the passage of these laws were made under the authority thereof.

GRANTS UNDER THE LAWS OF COLONIZATION.

To encourage the settlement of the vacant lands of the republic, the sovereign general Constituent congress of the United States of Mexico, on the 18th of August, 1824, passed a law, article 1st of which declares: "That the Mexican nation offers to foreigners, who may come to establish themselves in the territory, security in their persons and property, provided they submit to the laws of the country."

Under this law any lands of the nation that did not belong to private individuals or pertain to corporations or pueblos were subject to colonization, except such as were embraced within the twenty leagues bordering on a foreign territory, or the ten leagues bordering on the seashore. In the granting of these lands Mexican citizens were to be preferred to foreigners. To carry into effect this general law the congresses of the states were to form such laws and regulations as might be necessary, in accordance with the general constitution and principles established by this law.

The maximum quantity that could be granted to one person under this law was eleven square leagues; one of irrigable, four of arable, and six of pasture lands.

The concluding article declares that, in accordance with the principles established by this law, the government will proceed to colonize the territories of the republic.

Under this law grants were made in the territory and department of the Californias down to the change of government on the 7th of July, 1846.

On the 4th of April, 1837, a decree was issued "to render effective the colonization of the lands of the republic." This decree declares the government, in concert with the council, shall proceed to render effective the colonization of the lands which may be, or should be, the property of the government, by means of sales, leases, or mortgages, applying the proceeds thereof (which in case of sale shall be at a price not less than $1.25 per acre) to the extinguishment of the national debt, which has already been or may be contracted; always reserving a sufficient quantity to fulfill the promises made to the soldiers, as a reward for their services in the war of independence, and also sufficient to satisfy the concessions made by congress as Indian reservations, and to those who had assisted in the re-establishment of the government in Texas.

On the 15th of September, 1837, an agreement was entered into in the city of London between the agents of the Mexican Government and the holders of Mexican bonds to the following effect: Article 1 provides for the consolidation of the national debt at 5 per cent. interest per annum. F. de Lizardy & Co. were appointed as agents of the republic to act in the matter; these gentlemen to issue, in the name of the Mexican Government, the corresponding bonds of the consolidated fund in sterling money, payable in London on the 1st of October, 1866. A certain class of these bonds were receivable in payment for vacant lands in the departments of Texas, Chihuahua, New Mexico, Sonora, and California, as might be desired by the purchaser, at the rate of £1 sterling for four acres; interest to run on the bonds until the purchasers of the lands should be placed in possession thereof.

Article 7 of this agreement provided that the payment of the principal and interest of these bonds should be secured by a mortgage, in the name of the Mexican nation, on one hundred millions of acres of the vacant lands of the departments of the Californias, Chihuahua, New Mexico, Sonoro, and Texas.

On the 1st of June, 1839, the foregoing agreement was approved by decree of President Santa Ana.

ATTEMPT OF PRESIDENT SANTA ANA TO ANNUL GRANTS MADE IN THE TERRITORY OF THE REPUBLIC AFTER 21ST OF SEPTEMBER, 1821.

On the 25th of November, 1853, President Santa Ana issued a dictatorial decree declaring: "That the vacant lands (*terrenos valdios*) being the exclusive property of the nation, could never have been alienated by any title whatever, by virtue of decrees, orders, and dispositions of the legislatures, governments, or authorities of the states or territories of the republic; wherefore such sales, cessions, and alienations as may have been made of the vacant lands, without the express order and sanction of the general powers in the form prescribed by law, are declared null and void." On the 7th of July, 1854, President Santa Ana issued a second decree in relation to public lands, requiring all titles of the alienation of public lands made in the territory of the republic from

September, 1821, to the date of the decree, given either by the general authorities or by the extinguished states and departments, shall be submitted to the revision of the supreme government, without which they shall be considered of no value, nor shall they convey any right of property. The foregoing decrees of President Santa Ana were annulled as follows: "On the 3d of December, 1855, Juan Alvarez, president *ad interim* of the Mexican Republic, issued a decree abrogating in all their parts the decrees of the 25th of November, 1853, and of the 7th of July, 1854, issued by President Santa Ana, and declaring that all the titles issued during the period referred to in said decrees of 1853 and 1854 by the superior authorities of the states or territories, under the federal system, by virtue of their legal faculties, or by the authorities of the departments or territories, under the central system, without the express authorization or consent of the supreme government for the acquisition of said lands, the same being in accordance with existing laws in relation to such alienations, shall in all times be considered as firm and valid, the same as the titles to any other property legally required, without in any case being subject to a new revision or ratification by the Government."

This decree further declares: "That the alienations of vacant lands that may have been made by the authorities of the states, departments, or territories, without the requisites mentioned in the foregoing article, and in contravention of the requirements of article 4 of the law of congress of the 18th of August, 1824, are null and void, and the possessors of lands in such cases shall be subject to such penalties as may be imposed by the laws of the republic."

Article 4th of the law of the 18th of August, 1824, above referred to, is as follows: "The territories embraced within the twenty leagues bordering on a foreign nation, and the ten leagues bordering on the sea, cannot be colonized without the previous approval of the Supreme Government." Decree of President Alvarez further declares: "That the concessions or sales of vacant lands which may have been made by competent authority and in accordance with the laws in force controlling the same, under the express obligation of colonizing them within a fixed time, on a failure to comply with this condition shall be void, the land in such case reverting to the nation." The decrees of President Santa Ana of 1853 and 1854 were also abrogated by the act of the Mexican Congress of the 16th of November, 1856. But even if the dictatorial decrees of President Santa Ana had not been declared null, they could not affect the Mexican grants in Arizona, since the treaty was signed on the 25th of September, 1853, while the decree of Santa Ana was not issued until the 25th of November, 1853, and that although ratifications of the treaty were not exchanged until after the 25th of November, 1853, these ratifications have a retroactive effect, relating to the date of the treaty, (September 25th, 1853), and bound both Governments from that date.

From the foregoing historic sketch of the laws, ordinances, and decrees of the Governments of Spain and Mexico in relation to the disposition of public lands is gathered: 1st, that under the ancient laws of Spain the full dominion of a conquered kingdom was claimed by the monarch by right of conquest. 2d, that the lands of the conquered kingdoms were divided into three classes; *first*, such as were conceded for the establishment and support of pueblos, which were denominated *consejiles* or *de propios; second*, such as were granted by the king to those who had assisted in conquering the country, and such as were sold to individuals, for the purpose of obtaining means to supply the necessities of the crown, which lands were denominated *de dominio particular;* and *third*, such as remained of the conquered kingdom, which were called "common lands," "vacant lands," and "royal lands." 3d, that the usufruct of this last-mentioned class of lands was ceded by the kings to their vassals, under the provisions of such laws as from time to time were passed in relation thereto. 4th, that these royal lands were granted for use and occupation, and that the quantity granted was limited to such an amount as the applicant might need and was able to use and occupy. 5th, that up to the 15th of October, 1754, grants or concessions of royal lands required the approval of the king. 6th, that from the 15th of October, 1754, to the 4th of December, 1786, grants of land were issued by the real audencias, and did not require the approval of the king. 7th, that from said 4th of December to the date of the Mexican independence grants of the royal lands were made by the intendentes or governors of provinces, and required the approval of the "superior junta de hacienda" established in the capital of Mexico. 8th, that the exceptions to this rule are as follows, to wit: On the 22d day of October, 1791, Don Pedro de Nava issued an order permitting captains of presidios to make grants within the four jurisdictional leagues of the presidio, and in 1798 grants of the royal lands of a value less than $200 did not require the approval of the "superior junta de hacienda." 9th, that, on the change of Governments in 1821, the *realengo* or royal lands of the Spanish Government became the public lands of the Republic of Mexico, and continued to be disposed of to settlers, by valuation and sale, much in the same manner as they had been under the Spanish Government. 10th, that the act of the Mexican Congress of the 4th of August, 1824, gave to the State of the West (Estado del Occidente), composed of the States of Sonora and Sinaloa, the public lands embraced therein, requiring from the State for this

concession the annual payment into the federal treasury of the sum of $53,125, and that based upon this act of the general Congress the Congress of the States of Sonora and Sinaloa united, on the 20th of May, 1825, passed a provisional law providing for the disposition of the public lands, which provisional law was followed by the organic law of hacienda, passed by the congress of the State on the 11th of July, 1834, confirming the provisional law of 1825, with some amendments thereto. 11th, that on the 18th of August, 1824, the general Congress of Mexico authorized the colonization of such lands of the nation as did not belong to individuals or corporations, directing the legislatures of the states to make such laws or regulations as might be necessary for the carrying into effect the provisions of this general law within their respective jurisdictions. 12th, that the provisional regulations made by the congress of Sonora on the 20th of May, 1825, for the disposition and settlement of the public lands, may be considered as authorized to be made by the act of the general Congress of the 18th of August, 1824. 13th, that on the 25th of November, 1853, and the 7th of July, 1854, General Santa Ana, by dictatorial decrees, attempted to annul the grants of land made subsequent to the 15th of September, 1821, which decrees were abrogated by decree of president Alvarez on the 3d of December, 1855, and by act of the Mexican Congress, passed November 16, 1856. 14th, that grants of the *realengo* or royal lands were made by the Spanish Government, for settlement, use, and occupation, and that grants under the Mexican laws of colonization, and under the provisional regulations made by the congress of Sonora and Sinaloa, of the 20th of May, 1825, and the organic laws of hacienda of the 11th of July, 1834, were made under the condition of occupation within a limited time, under penalty of a forfeiture of the right granted, unless a good cause could be shown why the condition of occupation had not been complied with.

Wherefore, since grants of the public lands were given on condition that they continued to be occupied, and if abandoned they were subject to denouncement and could be regranted by the Government, it is manifest that these grants of the public domain by the Government were conditional, and did not pass the absolute title or fee of the land.

GRANTS CONTAINING MINERALS.

MINES AND MINERALS.

In accordance with Interior Department instructions, I have collected information from authentic sources in reference to the laws of Spain and Mexico respecting minerals and what conditions attached to grants embracing mines.

From the earliest European settlement of the country mining for the precious metals constituted the principal branch of industry in Spanish America, and being the one that yielded the largest revenue to the government, laws and royal ordinances were from time to time passed for the encouragement of the adventurous prospectors and for the protection of the fortunate discoverer of mines of the precious metals; yet, although these laws and ordinances dignified the mining profession by attaching thereto the privileges of nobility, still the Government went no further in its liberality than to grant the miner the exclusive privilege of working the mine he might have discovered in the manner required and under the conditions imposed by the laws and ordinances in relation thereto; and when these conditions were disregarded or violated the ownership of the mine, or rather the exclusive right to work it, was lost, and the same reverted to the Government, to be acquired by any one else who might undertake to comply with the conditions under which it had been granted to the former owner, the absolute ownership of the mine ever remaining in the Government.

Joaquin Escriche, in his Diccionario Razonado de Legislacion y Jurisprudencia (a standard authority), under the head of Minas, says: "According to the ancient Roman law, mines of gold, silver, copper, iron, and other metals pertained to the owner of the land on which they were discovered, *erant privati, juris, et in libero privatorum usa juris comercio*, because they are benefits bestowed by nature, to be enjoyed by the owners of the land producing the same. Subsequently the Roman emperor appropriated one-tenth of the products of the mines of every character.

"Under the Spanish law a different rule was adopted; mines of gold, silver, lead, and other metals could not be worked without royal permission, since they (and also salt pits) belonged to the king. Any one was permitted to 'dig' in search of minerals or stones on his own lands, or on the lands of others with the consent of the owner, under the condition that the discoverer should receive one-third part of the net proceeds of the discovery, the other two-third parts to be given to the Government. Every Spaniard or foreigner was permitted to 'dig' in search of minerals on public or private lands, under the obligation of compensating for the damages occasioned. In Mexico, Venezuela, and Chili the matter of mines is governed by the ordinances of the 22d of May, 1783." (Escriche, new edition, printed 1869, Mina.)

As early as the year 1383, Don Alonzo XI issued a "pragmatica" in which it is declared: "That all mines of silver and gold and lead, and of any other metal whatever, of whatsoever kind it may be, in our royal seigniory shall belong to us, therefore no

one shall presume to work them without our special license and command; and also the salt springs, basins, and wells which are for making salt, shall belong to us, wherefore we command that they revert to us with the produce of the whole thereof, and that no one presume to intermeddle therein except those to whom the former kings, our predecessors, or we ourselves may give them as a privilege, or who may have held them from time immemorial." (*Vide* Book VI, Title XIII, Law II, Recopilacion de Castilla; Book IX, Title XVIII, Novisima Recopilacion.)

The law of Philip II, 1559, declares: That inasmuch as the discoverers of mines, after having discovered and registered them, pretend that by that act alone they have acquired such a right to them that no other person can, within the limits and space of such mines, enter, or try, or work, and that they can thus keep them encumbered without working them themselves or permitting others to do so, by which they pervent the principal produce and profit which belongs as well to us as to our subjects and to the public welfare, since that principally consists in the working and reduction of mines and metals, and not merely in their discovery, we declare and command that such discoverer of the mine or mines of silver, after having made registry in the manner prescribed, shall be obliged within six months to sink and excavate to the depth of three *estados* (a measure of about six feet), and not sinking and excavating his mine to the depth of three *estados*, it may be denounced before the judge and registry made thereof as of a vacant or undiscovered mine. Also, that we reclaim, resume, and incorporate in ourself, in our crown and patrimony, all the mines of gold and silver and quicksilver of these kingdoms, in whatsoever parts and places they may be and are found, whether in royal lands, or in those of lordships, or of the clergy, and whether in public, municipal, or vacant lands, or in inheritances, places, and soils of individuals, notwithstanding the grants which by us and by the kings, our predecessors, have been made to any persons, of whatsoever condition, rank, and dignity they may be. (Book VI, Title XIII, Law IV, Recopilacion de Castilla. Also, Book IX, Title XVIII, Law III, Novisima Recopilacion.)

ROYAL ORDINANCES FOR THE DIRECTION, REGULATION, AND GOVERNMENT OF THE IMPORTANT BODY OF MINING OF NEW SPAIN AND OF ITS ROYAL TRIBUNAL GENERAL, MAY 22, 1783, NOW IN PRACTICE, WITH MODIFICATIONS NOTED IN MEXICO.

Article I, Title V, declares: That mines are the property of the royal crown, as well by their nature and origin as by their reunion declared in Law IV, Title XIII, Book VI, Nueva Recopilacion.

Article II, same title, declares: That without separating them from the royal patrimony, they are granted to the subjects of the king in property and possession, in such manner that they may sell, rent, donate, and pass them by will, either in the way of inheritance or legacy, or in any other manner alienate the right which in the mines belongs to them, on the same terms on which they themselves possess it, and to persons capable of acquiring the same.

Article III, same title, declares: That this grant is understood to be with the conditions that the grantees contribute to the royal treasury the prescribed portion of the metals, and that they shall work the mines in the manner prescribed by the ordinances, so that they shall be considered forfeited whenever a failure shall occur in complying with the ordinances in which it is provided, and that they may be granted to any person who for that cause may denounce them.

Article I, Title VI, declares: That the discoverers of one or more mineral hills, absolutely new, may acquire on the principal vein which they may select as many as three *pertenencias*, continued or interrupted, according to the measurements which shall be prescribed, and if they may have discovered more veins, they may have one *pertenencia* on each vein, said *pertenencia* being determined and marked out within ten days. (A *pertenencia* was in extent two hundred *varas*, measured on the vein, the width being determined by the dip or angle thereof, being sufficiently wide to prevent the vein from being cut by a shaft sunk on a side claim at a depth of less than two hundred *varas*, this being the depth beyond which, in those times, it was considered unprofitable to work a mine.)

Article X, same title, declares: That if the denouncer of a mine does not put his working-shaft in order nor take possession within sixty days, he shall lose his right, and the mine may be denounced by another.

Article XIV, same title, declares: That any one may discover and denounce a vein or mine, not only in common land but also in the private lands of any individual, provided he pays for the land of which he occupies the surface, and the damage which immediately ensues therefrom, according to the valuation of the experts appointed by both parties, and a third in case of disagreement.

Article II, Title IX, provides: That no one shall be permitted to work mines without the direction and continual assistance of one of the intelligent and practical experts who in New Spain are called *Mineros* or *Guarda-minas*, who must be examined, licensed, and affirmed by one of the professors of mining, which each *Real* or *Asiento* must have.

Article XIII, same title, declares: That as mines require to be worked continually and incessantly in order to procure their metals, and as they require in them works and operations which can be executed only in a long time, and as their re-establishment, if their working be suspended and interrupted, will cost as much as in their original undertaking, therefore to obviate this inconvenience, and also to prevent any owners of mines who cannot or will not work them, from keeping them without use, and for a long time impeding by pretended working the real and effective labor which others might bestow upon them, I order and command that any one who shall for four consecutive months fail to work a mine with four operatives regularly employed and occupied in some interior or exterior work of real utility and advantage, shall thereby forfeit the right which he may have to the mine, and it shall belong to the denouncer who proves its desertion.

Article X, same title, declares: That no mine shall be abandoned without first informing the deputation of the district, in order that it may be published by fixing notices on the doors of the churches and other accustomed places, so that all may have notice thereof.

Article II, Title XIX, grants in favor of scientific professors of mining the privileges of nobility in order that all persons who devote themselves to this important profession and occupation may be considered and treated with all the distinction due to so noble a profession.

According to Escriche, the laws of Spain passed prior to 1821 and the laws of Mexico passed since that date have not changed the fundamental principles laid down in the ordinances of the 22d of May, 1783, in relation to the ownership of mines and the manner of acquiring title thereto; hence these ordinances have been in force in Mexico since the date of their passage in 1783, the Mexican mining laws passed since the year 1821 not having essentially changed the spirit thereof.

From the foregoing it is manifest that under the laws and royal ordinances of Spain, from very early times down to the date of the independence of Mexico, and under the mining laws of Mexico down to the publication of the new edition of Escriche (1869) the miner could acquire no absolute title or fee in any mine discovered by him in any part of the Mexican territory, the usufruct thereof being all that was granted him by the government, and this under such regulations, instructions, and conditions as were imposed by law; and when these conditions were not complied with, the right to work the mine was lost, and could be acquired by any one else who might undertake to comply with the conditions and regulations inseparable from the privilege of working mines. The Spanish and Mexican Governments, in granting lands in Mexico, never in terms reserved the minerals contained therein, for the reason that under the constitutional laws they were reserved by and for the government. For this reason, in the many grants of land made by Spanish and Mexican authorities in Sonora, as well as in California, no mention is made of minerals.

Pastoral and mining pursuits were separate branches of industry, and in a certain sense independent of each other. Both were cherished and protected by the government. To the grazier and agriculturist was granted so much of the soil as he had means to occupy and improve, together with such appurtenances thereto as were necessary to make the occupation of the soil possible and the use thereof valuable; and to the miner were granted the minerals he might discover in the soil and the usufruct of the mine in which they were found. But to neither of these parties was the grant unconditional. To the grazier were granted lands on condition that he occupied them usefully to himself and to the government, and the abandonment thereof was followed by a forfeiture of title, in which case the land reverted to the government to be regranted to a more industrious applicant. To the miner was granted the exclusive right to work the mine he might have discovered, on condition that he observe certain rules and regulations established by law and paid to the government a certain portion of the products of the mine; a violation of these conditions was also followed by a forfeiture of such title as he possessed, the usufruct of the mine reverting to the government to be regranted to a more vigilant and "honest miner."

The objects of the government in granting lands for settlement were the increase of the wealth and population of the country, the spread of the holy Catholic faith, and the extension of the power of the Spanish monarchy; and the motive that induced the granting of privileges to miners was that the royal treasury might be supplied with American gold. No grants of lands or mines were ever made by the Government of Spain or Mexico for speculative purposes. It is true that lands were sometimes granted as a reward for distinguished services, but in all other cases on condition of occupation.

From a careful consideration of the foregoing laws and ordinances, as well as of the usages and customs of Spain and Mexico, I am forced to the conclusions:

First. That the grantee of land under the Spanish and Mexican Governments acquired no title to the minerals contained in the granted land.

Second. That the title to the minerals contained in the tract granted remained in the government notwithstanding the grant of the land.

Third. That under the Spanish and Mexican laws and ordinances any one had a right

to "dig" in search of minerals, under certain conditions, on his own lands or on those belonging to individuals or private persons.

Fourth. That the Government of the United States under the treaty of 1853 for the purchase of a portion of the territory of Sonora succeeded to all the rights and obligations of the Mexican Government in relation to the ceded territory at the date of the treaty.

The result of these conclusions necessarily is: That since our Government succeeded to all the rights and obligations of the Mexican Government in relation to the ceded territory it is bound by the treaty to recognize and confirm all rights, titles, and privileges which had been granted by that government to private individuals prior to the cession of the territory, and to carry out the intentions of the Mexican Government toward those having ownership in lands and mines precisely as if there had been no change of sovereignty.

It is therefore clear to my mind that any one has at present a right to prospect for minerals on such portions of the ceded territory as may have been granted by the Mexican Government to private individuals, and a right to work any mines that may be found on said lands, under no more onerous conditions than the reasonable ones imposed by the mining laws of Mexico. See Article XIV, Title VI, Ordinances May 22d, 1783, heretofore cited.

CONGRESSIONAL REPORT ON PRIVATE LAND CLAIMS.

The following report made to the House of Representatives is inserted because it contains a large amount of most valuable information:

[House Report No. 1733, Forty-seventh Congress, first session.]

PRIVATE LAND CLAIMS IN CERTAIN STATES AND TERRITORIES.

JULY 26, 1882.—Referred to the House Calendar and ordered to be printed.

Mr. G. C. HAZELTON, of Wisconsin, from the Committee on Private Land Claims, submitted the following report, to accompany bill H. R. 6840:

The Committee on Private Land Claims, having had under consideration a bill (H. R. 3149) to provide for ascertaining and settling private land claims in certain States and Territories, respectfully submit the following report, to accompany substitute for said bill:

A bill that provides for the adjudication of claims in the district courts is objectionable, in that the courts having jurisdiction in the cases should have access to the entire archives of the Spanish and Mexican documents and records; and as these documents and records are kept in one place, they could not be readily accessible to all of the courts of the several districts in the Territories.

To illustrate this proposition, we will take the Territory of New Mexico, wherein the larger number of these claims are awaiting adjudication. The old Spanish and Mexican archives are in the possession of the surveyor-general of that Territory at Santa Fé. The place for holding the United States court for the first judicial district is at Santa Fé, and that court could have ready access to the archives in question; but the United States courts for the second and third districts in that Territory are at Albuquerque and Mesilla respectively, 75 and 300 miles distant from the place where the archives are kept.

In determining the character of these titles it is necessary in nearly every case, on account of the antiquity of the title papers, to introduce, for the purpose of comparison, other original documents already passed upon, bearing the signatures of the same Spanish or Mexican officials whose signatures, or purported signatures, appear on the muniments of title in the case at bar, in order to correctly determine whether they are genuine or not; as it is seldom the case that living witnesses can be found by whom the nature, whether genuine or not, of the offical signature can be shown.

The evidence of the abandonment, annulment, forfeiture, or fraudulent character of a grant may exist in the archives, in documents having no *direct* connection with the muniments of title in the case at bar in one district, and the same documents may embrace evidence of a similar character, or the reverse, in another case pending in another district, and if the documents were sent back and forth from the archives to the several judicial districts they would be liable to loss; or perhaps the document showing the annulment or fraudulent character of the grant in the case at bar might be unknown to the court before whom the cause may be pending, on account of its not being among the papers directly connected with the case under investigation.

The production in court of the original muniments of title should be required in all cases, when in existence, as the adjudicating authority should give them a personal inspection to avoid being imposed upon by fraudulent title. This could not be done if the court were to act upon certified copies only.

The Mexican colonization law of 1824 limited grants of eleven square leagues to

each grantee, but prior to that time there was no such law in force and all perfect grants anterior thereto could not be restricted to eleven square leagues, and no such general limitation of the area of these claims can be made by Congress without a violation of individual rights guaranteed by the terms of the treaties referred to; and it is only competent for Congress to provide that each claim shall be adjudicated under the particular Spanish or Mexican law under which the concession was made.

For these reasons we deem it essential for the proper adjustment of these claims that the court adjudicating them should have direct and ready access to the old Spanish and Mexican archives; and as a commission, in our opinion, is the proper authority to adjudicate these grants we beg leave to report that, having had under consideration H. R. 3149, entitled "A bill to provide for the ascertaining and settling of private land claims in certain States and Territories," and approving of its provisions, your committee recommend that the same do pass, believing that it is free from the objections indicated, and provides a means for the safe and speedy adjustment of these land claims.

The courts in most instances are already overburdened with business, and could not give these cases that prompt and careful consideration which the interests of the Government require, and where such large properties are involved. There are a large number of these Spanish and Mexican claims in the State of Colorado and the Territories of New Mexico and Arizona which remain unadjudicated. Under the present laws they are now investigated by the respective surveyors-general of those States and Territories, upon whom, in addition to their ordinary duties, is imposed the duty of taking testimony and reporting to Congress their opinions in all these cases.

These surveyor's-general are not supposed to possess the legal attainments and qualifications which are requisite in a judicial officer, yet they are required to act in a quasi-judicial capacity in cases often involving hundreds of thousands of dollars in value, and upon the title to immense tracts of land, necessarily passing upon intricate legal propositions embracing a construction of the laws of Spain and Mexico, and the rules of evidence, which no one, not learned in the law, is competent to do. The surveyor-general of New Mexico, who has had a large experience in investigating this class of claims, in his annual reports to the Commissioner of the General Land Office, has repeatedly called attention to the necessity of prompt action on the part of Congress upon this matter, as will be seen from the Land Office reports of 1876, '77, '78, '79, '80, and '81, and in our opinion he truthfully says that further delay on the part of Congress to provide for suitable means for the adjudication of these claims amounts almost to criminality. The present method is unsatisfactory both to claimants and the Government, as Congress fails to act on the reports of the surveyors-general in these cases, and as a necessary result the titles remain unsettled and uncertain. The proceedings are to a great extent *ex parte*, and while the claimants are always present with their witnesses there is no attorney to represent the Government. The other duties of the surveyors-general are such that they have not the time, even though they possessed the requisite legal acquirements, to protect the interests of the Government in these cases. They are compelled to act as attorneys for the Government and judge impartially between it and the claimants—rather an anomalous position.

Congress should not be required to act in a judicial capacity, nor can it, on mere copies of papers, act with any degree of correctness in the confirmation of a grant; and as a result it is liable either to do nothing and permit these claims to remain unsettled and unconfirmed, or they must accept the recommendations of the surveyor-general in regard to their validity or invalidity, thus virtually giving to one man the final decision of these important cases. And should the surveyor-general err in any particular, Congress is almost sure to follow in his footsteps and confirm that error, or, failing to act at all, it does injustice to the claimant, who is entitled to have his claim passed upon and finally determined. The obligations of the treaties, and the interests of the claimants and the public, demand that these titles be adjudicated, and that speedily.

In the courts the expenses will be onerous to claimants, who, as a rule, are limited as to means independent of their interest in the grants.

Your committee believe that the method provided by this bill for the adjustment of these claims to be a proper one, as it will prove to be a safe, speedy, and comparatively inexpensive manner of adjusting these land titles.

The present executive of New Mexico urges the passage of this bill by Congress, in the following language:

"In relation to all the unconfirmed grants, there should be a commission appointed empowered to come out here and take testimony and order surveys. In this way meritorious cases can be separated from fraudulent ones. This commission should exist for two years, and after that time all grants should be held as prescribed. Though the Government must keep the treaty in good faith, it cannot be held in violation thereof for Congress to fix a time when the subject shall be considered closed. The uncertainty now existing very greatly retards the development and growth of the Territory."

The following letter from the Commissioner of the General Land Office will show the importance of some legislation on this subject of land grants:

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., January 9, 1878.

Sir: On the 18th ultimo, Hon. A. G. Thurman, chairman of the Committee on Private Land Claims, United States Senate, addressed a communication to this office, inclosing a copy of Senate bill 376 "to provide for ascertaining and settling private land claims in certain States and Territories," and requesting my opinion on said bill, and a statement of any facts which might be of importance relative thereto.

In compliance with the above request, I have the honor to inclose herewith the aforesaid bill, with the following report:

As the title of the bill indicates, it proposes a method for ascertaining and settling the private land claims in the States and Territories therein named. Private land claims, as defined in the body of the bill, are claims based upon titles which had their origin under the Spanish or Mexican Governments prior to the date of the acquisition by the United States, of the Territory within which they are situated.

By the treaty of Guadalupe Hidalgo, ratified May 30, 1848, and the treaty commonly known as the Gadsden purchase, ratified June 30, 1854, the Mexican Republic ceded to the United States the territory embraced within the present limits of the States of California and Nevada, and the Territories of Arizona and Utah; part of the State of Colorado, and parts of the Territories of New Mexico and Wyoming.

By the eight and ninth articles of said treaty of 1848, which by reference thereto, was made a part of the subsequent treaty of 1854, it was stipulated that property of every kind, within the ceded territory "now belonging to Mexicans, not established there, shall be inviolably respected. The present owners, the heirs of these, and all Mexicans who may hereafter acquire said property by contract, shall enjoy with respect to it guarantees equally ample as if the same belonged to citizens of the United States." "That Mexicans, in the aforesaid Territory, who shall not preserve the character of citizens of the Mexican Republic conformably with what is stipulated in the preceding article shall be incorporated into the Union of the United States, and be admitted at the proper time * * * to the enjoyment of all the rights of citizens of the United States according to the principles of the Constitution; and in the mean time shall be maintained and protected in the free enjoyment of their liberty and property," &c.

For the purpose of carrying into effect the foregoing treaty stipulations, Congress, by the eighth section of the act of July 22, 1854 (Stat. at L., vol. 10, page 308), and the act of August 4, 1854 (Stat. at L., vol. 10, page 575), directed the surveyor-general of New Mexico, "under such instructions as may be given by the Secretary of the Interior, to ascertain the origin, nature, character, and extent of all claims to lands under the laws, usages, and customs of Spain and Mexico, and for this purpose may issue notices, summon witnesses, administer oaths, and do and perform all other necessary acts in the premises. He shall make a full report on all such claims as originated before the cession of the territory to the United States by the treaty of Guadalupe Hidalgo of eighteen hundred and forty-eight, denoting the various grades of title, with his decision as to the validity or invalidity of each of the same under the laws, usages, and customs of the country before its cession to the United States; and shall also make a report in regard to all pueblos existing in the Territory, showing the extent and locality of each, stating the number of inhabitants in the said pueblos, respectively, and the nature of their titles to the land. Such report to be made according to the form which may be prescribed by the Secretary of the Interior; which report shall be laid before Congress for such action thereon as may be deemed just and proper with a view to confirm *bona-fide* grants, and give full effect to the treaty of eighteen hundred and forty-eight, between the United States and Mexico; and until the final action of Congress on such claims, all lands covered thereby shall be reserved from sale or other disposal by the Government, and shall not be subject to the donations granted by the previous provisions of this act."

The provisions of this section were extended to the then Territory, now State of Colorado, by the act of February 28, 1861 (12 Stats., p. 176), and to the Territory of Arizona by the act of July 15, 1870 (16 Stats., p. 304).

It is impossible to determine the exact number of private land claims there are in the States and Territories named in the bill, but it appears from a schedule which accompanied the annual report for the year 1856 of the surveyor-general for the Territory of New Mexico, that there were, at the date of said report, one thousand and fourteen documents relating to grants of land by the Spanish and Mexican Governments, on file in his office, and from an abstract accompanying said report, that there had been selected from the public records or archives deposited by the former Governments at Santa Fé, 197 grants to land.

During the period of twenty-three years the aforesaid act of 1854 has been in force,

the surveyor-general has reported to Congress 123 claims; of this number only 23, one claim in every five, are found to be embraced in the abstract of grants above referred to, yet the surveyor-general in each case, with the exception of a very few of the pueblo or town claims, reports the claim as founded upon a complete grant. These facts lead to a conclusion that either the foregoing abstract of grants only represents one-fifth of the number of grants or private land claims in the Territory of New Mexico, or that 100 of the 123 claims which have been reported, 71 of which have been confirmed by Congress, are based upon spurious titles. The latter theory, in my opinion, is not tenable, as it is scarcely possible, much less probable, that the surveyor-general could have been imposed upon to such an extent in his investigations of these claims. We must therefore conclude that there are in the Territory of New Mexico alone, about one thousand private land claims, seventy-one of which, as before stated, have been confirmed, leaving over nine hundred yet to be adjudicated.

Taking the actual number of claims reported in the past twenty-three years, 123, by the surveyor-general under the act of 1854 as a basis, the average number reported annually is 5. At this rate, under the present system, the probable date when the last of the 900 unconfirmed claims will be reported upon and confirmed is in the far future. As the act of 1854 also extended the public land system to the States and Territories named, and the lands thereby, so far as they were not known to be covered by private land claims, became subject to appropriation under the laws regulating the disposal of the public domain, and as the limits of these private claims are not known to the officers upon whom devolves the duty of the execution of the public surveys, they are extended over them, and the settlers thus invited to settle upon lands to which it is, and will forever remain, impossible for them to obtain a valid title under existing laws.

On the other hand there are many persons who are deterred from settling upon the public lands by the fear that the land settled upon may be subsequently found to be within the limits of an unconfirmed, unsurveyed private land claim.

The claimants, in the mean time, must wait without remedy, and their grants, which would be valuable if the title were completed by a confirmation or patent, must remain comparatively worthless, as is the case with all property where the vendor offers for sale an incomplete title and prospective litigation.

As many of the grants made by Spain and Mexico were for a given quantity of land within larger exterior boundaries, *i. e.*, eleven square leagues or a less quantity within boundaries that may perhaps embrace an area of fifty, sixty, or a hundred leagues, and the said act of 1854, having placed the full quantity described in the grant in a state of reservation, until finally acted upon by Congress, it results in rendering unavailable for an indefinite period large tracts of land which properly belong to the United States.

The United States, by the long delay in the settlement of these claims, not only loses the sale of its lands, but the development of the resources of that country will create additional incentives for the manufacture of fraudulent title papers, with a view of securing therewith the public lands. The lapse of time, with the consequent death of witnesses and the loss or destruction of ancient records relating to land titles, adds to the possibilities of such forged and otherwise fraudulent title papers passing without detection the scrutiny of the officers whose duty it may become to act upon them.

As the act under which these claims are presented for the action of the surveyor-general does not contain any limitation within which they must be filed, neither the surveyor-general nor Congress is directly responsible for this delay. But even if it did, and the claims were all properly presented, a proper attention by the surveyor-general to his executive duties leaves him but little time to attend to the examination of complicated and confused evidences of title, most of which are in a foreign language. And when such claims have been reported to Congress and assigned to its appropriate committee, no member of such committee can conscientiously recommend that the United States convey the large tract of land, which the most of these grants contain, without giving to each case that careful, patient, and protracted examination which belongs to the judge rather than the legislator.

However able, competent, and valuable a surveyor-general may be as an executive officer, or to conduct the business arising in a surveyor-general's office, he may, and probably will, lack the technical legal knowledge which will enable him to cope successfully with voluminous title papers complicated by the sophistry of skillful attorneys. Yet, under the present system, the surveyor-general is required to surmount the difficulties; for, however carefully Congress may examine his work, it must not be forgotten that Congress acts on a copy of the papers filed with the surveyor-general, and hence cannot determine whether the grant is antedated or forged, or contains any of those defects which can be detected only by an inspection of the original record.

And again, from the fact that the majority of these grants were never segregated from the public domain by actual survey or measurement in the field under the Span-

ish or Mexican Governments, but bounded by natural landmarks without reference to objects known to our public-land system, it is impossible for Congress to determine the quantity of land the claimants are seeking a confirmation for. It is not within the power of the surveyor-general to furnish this information; and if it is within the knowledge of the claimants, which is very seldom the case, they prefer to withhold it in order to obtain a confirmation of their claim by metes and bounds without regard to quantity.

This is, perhaps, best illustrated by the case of the Maxwell or Beaubean and Miranda grant, which was recommended by the surveyor-general for confirmation, and confirmed by Congress according to the boundaries described in the grant, it appearing in one of the documents constituting the basis of the claim before Congress that said boundaries embraced an area of only about seventeen leagues, while, in point of fact, it is found by actual survey to contain about four hundred leagues, equal to about 1,800,000 acres. Under the Mexican laws, customs, and usages, the claimants in this case were only entitled to twenty-two leagues, or about 97,000 acres. This is not an isolated case, but one of many that have occurred and will continue to occur under the present imperfect system for the settlement of these claims.

It appears that as early as May, 1858, less than four years after passage of the act of 1854, the results of the present defective system were felt in Congress. The House Committee on Private Land Claims of the first session, Thirty-fifth Congress, in their report No. 457, state that the claims "forwarded by the surveyor-general have received the most careful attention your committee could give them; but in justice to the committee I must say this examination has been confined entirely to what seemed to be the principal papers in each case, having no time to scrutinize the evidence and the application, as made by the surveyor-general, of the Spanish and Mexican laws and usages to each of them in detail. *Nor will it ever be in the power hereafter of any committee of this House to make such an examination as will be entirely satisfactory* should these claims be allowed to accumulate before Congress. It is now ten years since the Territory of New Mexico was acquired, and nearly four years since the surveyor-general was authorized to examine and report to us the private land claims of its people; and, although protected, as is supposed, by treaty in the enjoyment of their property, no man in that Territory, without some action of Congress, can say that his title, however acquired, would hold against any claimant who might purchase his lands from the Government. * * * The people of New Mexico are not at all pleased to be compelled by law to submit their muniments of title to one man whose fitness for surveying is not supposed to qualify him particularly for discharging the duties of a judge, and yet whose opinions are expected to control, to a great extent, the final action of Congress on their claims.

"Because of this, and that Congress, if it shall reserve the right to itself of passing judgment, must rely upon the report of an examining commission, your committee believed it very important that such a board *should consist of at least three persons*, whose recommendations, whether to Congress or to a judicial tribunal, would be entitled to and command more respect than your committee or the House can award to the report of the surveyor-general alone."

It will be observed that this report not only sets forth the difficulties that Congress had to contend with as early as 1858 in dealing with these claims, but it also suggests practically the same remedy proposed by the bill now before me. If it was considered a necessary measure then to relieve Congress of a duty that it was impossible for it to satisfactorily discharge, as well as to protect the interests of the Government and do justice to the private claimants, in view of the present confused condition of titles to lands in the Territory of New Mexico, the result of the operation of the system introduced and continued in force up to the present time by the act of 1854, for the disposal of the public lands before the private land claims had been ascertained or settled, it is obvious that a far greater necessity now exists for the repeal of that system, and one more effectual and speedy in its operation provided.

In this connection it might be added that this office is in almost daily receipt of letters direct from the parties or by reference from the Department, from different sections of the State of Colorado and Territory of New Mexico, complaining bitterly of the evils growing out of and praying for relief from the hardships they are subjected to by the present tardy and defective system for the settlement of these claims; the grant claimants complaining that it is tantamount to a confiscation of their property to compel them to expend its value, or, perhaps more, to protect their rights against the settlers, and on the other hand the settlers charge the grant claimants as being land grabbers who are endeavoring to eject them, without color of right, from the lands they have settled upon and improved in good faith under the public-land laws.

The bill before me contains all of the best features of the act of March 3, 1851 (Stat. at L., vol. 10, p. 308), and supplemental legislation under which the private land claims in the State of California, a class of claims in every respect similar to those provided for in the present bill, have been finally confirmed. This legislation was the outgrowth or the fruits of an experience of about a half a century in the settlement of

private land claims in the territory acquired from France by the treaty of 1803, commonly known as the Louisiana purchase, and from Spain by the treaty of 1819, comprised within the present limits of the State of Florida. In the settlement of said claims, various methods were adopted, by commissioners with full power and jurisdiction to finally confirm all claims containing less than a limited quantity. Second, by commissioners whose jurisdiction was limited to simply reporting the facts in each case for the final action of Congress thereon, and third by the United States courts, who were clothed with a special jurisdiction for that purpose, each tribunal being entirely separate and independent of the other. The California act of 1851 consolidated the best features of these methods into one, by providing a commission with the necessary power and jurisdiction before whom the claims should be first presented, with an appeal therefrom, the filing of a transcript of the proceedings of the commission with the court to operate *ipso facto* as an appeal to the district court of the United States; the decree of the commission could only become final upon the dismissal of the appeal therefrom by the court. Experience has fully demonstrated that this system has yielded the best results of any that has yet been tried, and, in my opinion, is as near perfect as any that can be devised.

It might perhaps be suggested that inasmuch as in the majority of the cases these claims will have to go into court for the *final* adjudication of title, that the commission might be dispensed with, and the courts vested with original and exclusive jurisdiction in all cases. This course would be open to the following objections:

First. Delay, which is the principal objection against the present mode of settling these claims under the act of 1854. In this connection, it should be taken into consideration, first, that the courts already have all of the legitimate business they can attend to; and second, that if the adjudication of the title in these cases were made an original proceeding in the courts the whole case would have to be made up in the court, requiring in each case a period varying from two or three days to a week or ten days, according to the particular circumstances in each case, while on the other hand, if the case is brought into court in the form of a complete transcript of the proceedings of the commission thereon it can be disposed of in a comparatively much shorter time.

If the confirmation of these claims were left entirely to the court, it would, in my judgment, be a low estimate to fix the limit within which they would all be confirmed at twenty-five years.

Second. The commission, as constituted in the proposed bill, with its interpreters and two law agents, one of whom is required to be skilled in the Spanish language, furnishes a more perfect and effectual means for the protection of the interests of the United States than if the adjudication of these claims were devolved upon the courts. The bill contemplates that one of the law agents shall be in constant attendance upon the commission, while the other, whose duties will be more in the nature of a special attorney or agent, is abroad collecting testimony in behalf of the Government. In many instances it will be necessary for each agent to visit the premises in person to procure the information and witnesses necessary to a proper defense of the interests of the Government. The district attorneys could not possibly perform these duties if it were required of them, for the reasons, first, that outside of the time necessary to the discharge of the duties properly pertaining to their respective offices they would have but little time to devote to these duties, and second, that it would be necessary in order to properly perform them for the district attorney of each judicial district to be familiar with the Spanish language.

Another important feature deserving of attention in connection with the consideration of the bill is the great saving to the Government which will be effected in the adjudication of claims thereunder, as compared with that under the present system provided by the said act of 1854.

To enable the surveyor-general of the Territory of New Mexico to report to Congress the private land claims in his district, as required by said act of 1854, there have been annually appropriated from two to three thousand dollars. Dividing the average of these amounts, $2,500, equally among the five claims (the average number), annually reported by the surveyor-general, it results in a net cost to the United States of $500 for each claim; and to continue the computation to those which have not been reported or confirmed, estimated at 900, the aggregate cost to the United States will amount to $450,000. And after the expenditure of this sum of money on these claims it leaves them in a condition that Congress is almost as uncertain what final dispostion should be made of them as if they had never been reported.

On the other hand the proposed bill suggests a method by which said claims can be judicially determined at a cost to the United States of one-fourth of that above stated, or, instead of each claim costing the United States $500 to have it reported to Congress, as is the case under the present system, its confirmation by the commission and courts will cost the United States $120.

As I have already had occasion to state, it is impossible to determine the exact number of unconfirmed claims there are in the States and Territories named in the

bill; from the data at hand, the number has been estimated to be about 900. This number may be in excess, or it may be less than the actual number; but in either event, it is just as important and necessary that they should receive early and speedy action. It is justly due to the claimants and the settlers, who are directly concerned in having their rights finally adjudicated, and necessary to prevent the perpetration of frauds in the future upon the Government.

This office in its annual reports for the past five or six years or more has set forth the condition of land titles in the Territory of New Mexico, the only Territory in which the system provided by the act of 1854 has been in active operation since the passage of said act, and urged such legislation as that proposed by the bill before me for the settlement of all of the private land claims within the Territory, excepting the State of California, acquired from Mexico.

The bill under consideration was drafted in this office and the Department. After carefully reviewing it, I have the honor to suggest the following amendments thereto:

First. On line 9 of section 4, between the words "of" and "the," insert the words "one of," so as to read that "it shall be the duty of one of the said agents to attend all meetings of the commission," &c.

Second. On line 24 of section 7, between the words "district" and "court," insert the words "or territorial."

Third. On line 2 of section 8, between the words "district" and "and," insert "territorial," so that when amended it will read "that the commission herein provided for and the district, territorial, and Supreme Courts of the United States," &c., and;

Fourth. Add to section 12 the following, after the word "individual," on line 11, "and the fact of the existence of the city, town, or village, on the seventh day of July, one thousand eight hundred and forty-six, being duly proven, shall be accepted as *prima facie* evidence of a grant to the corporation thereof, or to the individual under whom the lot-holders claim."

The last amendment above suggested has been taken from the fourteenth section of the act of March 3, 1851, under which the private land claims, including claims to town property, in the State of California were confirmed. It was also incorporated into and made a part of the instructions issued by the Department under the act of July 22, 1854. The Government having thus adopted at an early day after the cession of the Territory the above rule in regard to what shall constitute sufficient evidence of the right of persons holding property under the corporate authorities of a town to a confirmation, and the fact that the system of the Spanish and Mexican Governments in regard to town grants is entirely different from that in force under the public land laws, constitute the grounds upon which I have based my suggestion in regard to said fourth amendment.

In accordance with the foregoing views, I have the honor to earnestly recommend the early passage of the aforesaid bill.

Very respectfully, your obedient servant,

J. A. WILLIAMSON,
Commissioner.

Hon. C. SCHURZ,
Secretary of the Interior.

In order to obtain the latest data on the subject, the honorable Secretary of the Interior was requested by Mr. Hazelton of your committee to furnish certain information as to the number and aggregate area of the grants approved and confirmed, and the following has been received in reply:

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., June 9, 1882.

SIR: Complying with the direction for report contained in the reference dated 1st instant of the Assistant Secretary of a letter to you dated 31st ultimo from Hon. George C. Hazelton of Committee on Private Land Claims, House of Representatives, inclosing H. R. 3149, entitled "A bill to provide for ascertaining and settling private land claims in certain States and Territories," and making certain inquiries in connection therewith, I have the honor to state that the total number of claims, includiug pueblos, reported to Congress, by the surveyor-general of New Mexico, under the eighth section of the act of July 22, 1854 (Stats. 10, page 309), is 141

Of this number there have been confirmed by Congress 64

Rejected by the Supreme Court of the United States under fifth section act of June 21, 1860 1

—— 65

Pending in Congress 76

Relative to Colorado and Arizona, would say in reply that under act of February 28, 1861 (Stats. 12, p. 172), the surveyor-general of Colorado has reported one claim, and under act of July 15, 1876 (Stats. 16, p. 304), the surveyor-general of Arizona has reported thirteen claims.

As none of the claims reported by the surveyors-general of Colorado and Arizona have been confirmed, the number pending in Congress is the same as reported, to wit: 14.

From the foregoing it will be observed that the number of claims reported by the surveyor-general of New Mexico is		141
Reported by surveyor-general of Colorado		1
Reported by surveyor-general of Arizona		13
Making a total of claims reported		155
Of this number there have been confirmed by Congress	64	
Rejected by the Supreme Court of United States under 5th act June 21, 1860.	1	
		65
Total pending in Congress		90

Of the 90 claims pending in Congress as aforesaid, three were rejected by the surveyor-general of New Mexico, and two were rejected by the surveyor-general of Arizona, and the case of the Una de Gato, originally recommended for confirmation, was, upon reinvestigation, subsequently reported as fraudulent.

It may be proper to state in this connection that in the claim of Gervacio Nolan, numbered 39, and that of José Sutton, numbered 45, both in the Territory of New Mexico, adverse reports were made by the proper committee of Congress. These claims are also included in the number pending as aforesaid.

In response to the second clause of the second question in Mr. Hazleton's letter, I inclose herewith a copy of office letter dated January 9, 1878, to the honorable Secretary of the Interior. This letter estimates the total number of grants in New Mexico to be 1,014. I find upon examination of the report of the surveyor-general of New Mexico of August 22, 1881, that up to that time only 190 claims, including pueblos, had been filed with him, and deducting the 141 which had then been reported by him, would leave 49 still pending in his office and 824 claims yet to be filed with him, assuming that none have been filed since that date.

While I have no means of determining the accuracy of the statement contained in said letter as to the probable number of grants in New Mexico, which may or may not be overestimated, yet I concluded to transmit a copy of the same, and the information upon that point may be accepted for what it is worth.

From the most reliable information in the possession of this office, it is believed that the number of claims to be reported by the surveyor-general of Arizona will not exceed 11. All the claims pending in Congress, with the exception of about 12, have been surveyed, and the preliminary surveys are found, upon examination, to cover an area of about 5,500,000 acres.

This office is not advised of the existence of any private land claims in the State of Nevada nor in the Territory of Utah. Mr. Hazleton's letter and inclosure are herewith returned.

I am, sir, very respectfully, your obedient servant,

N. C. McFARLAND,
Commissioner.

Hon. H. M. Teller,
Secretary of the Interior.

This bill is in substance the same as the one referred to by Commissioner Williamson in his foregoing letter of January 29, 1878, and which had the sanction of the Interior Department.

Your committee therefore report back the accompanying substitute for H. R. 3149, and recommend the passage thereof.

MR. HAZELTON'S ORIGINAL BILL.

[Referred to on page 1134.]

FORTY-SEVENTH CONGRESS, FIRST SESSION.

H. R. 3149.

IN THE HOUSE OF REPRESENTATIVES, JANUARY 16, 1882.

Read twice, referred to the Committee on Private Land Claims, and ordered to be printed.

Mr. G. C. HAZELTON, of Wisconsin, introduced the following bill:

A BILL to provide for ascertaining and settling private land claims in certain States and Territories.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purpose of ascertaining and settling private land claims in the States of Nevada and Colorado, and the Territories of New Mexico, Arizona, Wyoming, and Utah, a commission shall be, and is hereby, constituted, which shall consist of three commissioners, to be appointed by the President of the United States, by and with the advice and consent of the Senate, which commission shall continue for four years from the first day of September, eighteen hundred and eighty-two, unless sooner discontinued by the President; and such commission, when organized, shall have power to issue and enforce process for the attendance of witnesses, and to punish contempts, and shall be governed by the same rules of evidence and practice which govern the United States courts in the State or Territory where the claims are located; and all process shall be issued by the secretary of said commission, and shall run in the name of the United States, and be executed by the marshal of the United States for the district where said land is located.

SEC. 2. That a secretary, skilled in the English and Spanish languages, shall be appointed by the commission to keep a record of the proceedings of the commission in a bound book or books furnished for that purpose, which record of proceedings, at the termination of said commission, shall be deposited in the General Land Office of the United States.

SEC. 3. That such clerks as may be necessary, not to exceed five in number, including two competent stenographers, shall be appointed by the said commission; and the commission may, from time to time, designate their secretary or either of their clerks to act as interpreter for the commission.

SEC. 4. That the President of the United States is hereby authorized to appoint an agent and an associate agent, learned in the law, one of whom shall be skilled in the Spanish language, whose special duty it shall be to appear in behalf of and to represent the United States before said commission, and to continue them in such agency so long as in his judgment the public interest may require, and to allow them such compensation as he shall deem reasonable, not to exceed five thousand dollars per annum each. It shall be the duty of the said agents to attend all the meetings of the commission, to collect testimony in behalf of the United States, and to be present on all occasions at the taking of testimony by or in behalf of claimants before said commission; and that in all cases claimants shall be required to give notice in writing to either of said agents of the time and place they propose to produce witnesses for examination: *Provided*, That in all cases testimony shall be taken before the commission, or in pursuance of a commission issued by said commissioners, with interrogatories and cross-interrogatories annexed thereto and approved by them: *And provided further*, That all witnesses subpœnaed on behalf of the United States who shall testify before said commission shall be entitled to the same per diem and mileage as witnesses attending upon the district court of the United States, to be paid by the marshal in like manner upon the certificate of said commissioners.

SEC. 5. That the said commission shall hold its sessions at such place or places as the Commissioner of the General Land Office shall direct, of which due and public notice shall be given; and the United States marshal of the district within which the land is situated shall appoint one or more deputies whose duty it shall be to attend upon the said commission and execute all process issued by authority thereof, and who shall receive the same compensation as is allowed to the marshal for his attendance upon the district court and the performance of like services therein.

SEC. 6. That either of the said commissioners, when sitting as a commission, or the secretary of the commission, shall be, and is hereby, authorized to administer oaths to witnesses produced for examination in any case pending before the said commission; and that all testimony shall be reduced to writing, and shall be recorded and preserved in bound books to be provided for that purpose.

SEC. 7. That excepting in claims heretofore confirmed by or reported to Congress

for confirmation, each and every person claiming lands in the States and Territories aforesaid by virtue of any right or title, legal or equitable, derived from the Spanish or Mexican Government, shall present his claim to the said commissioners, when sitting as a commission, together with such documentary evidence and testimony of witnesses as the claimant relies upon in support of such claim, which may include the testimony heretofore taken before the surveyors-general under the authority given them to investigate such claims; and when said claim shall have been presented to the commissioners aforesaid, it shall be the duty of said commissioners to give notice of such presentation by a publication, once a week for four consecutive weeks, in two newspapers of general circulation, one published at the capital of the State or Territory and one published nearest the land claimed; and it shall be the duty of said commissioners, when the case is ready for hearing, to proceed promptly to examine the same upon such evidence, and upon the evidence produced in behalf of the United States, and to decide upon the validity, extent, and the exterior boundaries of the said claim; and in every case in which the said commission shall render a final decision, it shall be their duty to have prepared two certified transcripts of their proceedings and decision, and of the papers and evidence on which the same are founded, one of which transcripts shall be filed with the clerk of the United States district court for the district within which the land claimed is located, and the other shall be transmitted to the Attorney-General of the United States; and the filing of such transcripts with the clerk aforesaid shall ipso facto operate as an appeal to said court for the party against whom the decision shall be rendered; and if such decision shall be against the private claimant, it shall be his duty to file a notice with the clerk aforesaid, within three months thereafter, of his intention to prosecute the appeal; and if the decision shall be against the United States, it shall be the duty of the Attorney-General, within three months after receiving said transcript, to cause a notice to be filed with the clerk aforesaid that the appeal will be prosecuted by the United States; and on failure of either party to file such notice with the clerk aforesaid, the appeal shall be regarded as dismissed; and in all cases wherein notice of appeal as hereinbefore provided shall have been filed, the district court shall proceed to hear, try, and determine the rights of the parties, and render judgment upon the pleadings and evidence in the case, and upon such further evidence as may be taken by order of the said court, and shall, upon application of the party against whom judgment is rendered, grant a writ of error to the Supreme Court of the United States, in the manner now prescribed by law: *Provided, however*, That if the transcript of the record of proceedings in the district court is not filed in the Supreme Court by the claimant within one year after the filing of such appeal, said appeal may be dismissed on motion of the Attorney-General, on the certificate of the clerk of the district court showing that such appeal was taken.

SEC. 8. That the commission herein provided for, and the district and supreme courts of the United States, in deciding on the validity of any claim brought before them under the provisions of this act, shall be governed by the treaty of Guadalupe Hidalgo, the treaty with Mexico concluded on the thirtieth day of December, eighteen hundred and fifty-three, commonly known as the "Gadsden treaty," the law of nations, the laws, usages, and customs of the government from which the claim is derived, the principles and equity, and the decisions of the Supreme Court of the United States, so far as they are applicable.

SEC. 9. That all lands as aforesaid the claims to which shall be finally rejected in the manner herein provided, and all lands as aforesaid the claims to which shall not have been presented to the said commission within two years after the first day of September next, shall be deemed, held, and considered as a part of the public domain of the United States, and said claims shall be forever thereafter barred.

SEC. 10. That it shall be the duty of the surveyor-general of the State or Territory within which any unsurveyed claim to land, finally confirmed as aforesaid, is situated, to cause said claim to be accurately surveyed, at the expense of the United States, and to keep an accurate account of the cost of such survey or surveys, and the platting thereof, which account shall be entered of record in his office, and a certified transcript thereof shall be filed for record in the office of the recorder of land-titles of the county or counties within which the land is situated, which shall operate as a lien upon the land so surveyed for the amount of the said account; and if such lien shall not have been satisfied or discharged within five years from the date of the filing of said account for record as aforesaid, the Commissioner of the General Land Office may direct the necessary proceedings to be instituted in the proper United States district court to enforce said lien; and said court shall have power to issue suitable process for the enforcement of such lien, and by sale or otherwise compel the payment of all costs incident thereto, which proceedings shall be instituted by the United States district attorney for the district where the land is located, and summary judgment shall be rendered on his motion made to the court, after ten days' notice in writing to the grant claimant, his heirs or assigns: *Provided*, That in the location and survey of said claims the decree of confirmation shall be followed as closely as practicable whenever

such decree designates the specific boundaries of the claim; but when such decree designates only the out-boundaries within which the quantity confirmed is to be taken, the location of such quantity shall be made, as near as practicable, in one tract and in compact form; but if intervening grants render the location in one tract impracticable, then each separate location shall be made, as near as practicable, in compact form; and it shall be the duty of the Commissioner of the General Land Office to require a substantial compliance with the directions of this proviso.

SEC. 11. That whenever either of the surveyors-general as aforesaid shall, in compliance with the provisions of this act, have caused any claim to land as aforesaid to be surveyed, and a plat thereof to be made, he shall give notice that the same has been done, by a publication, once a week for four consecutive weeks, in two newspapers having a general circulation, one published at the capital of the State or Territory in which the land surveyed is situated and one published nearest the land thus surveyed, and shall retain in his office, for public inspection, the survey and plat for the period of ninety days from the date of the first publication at the capital of the State or Territory aforesaid; and if no objections are made to said survey, he shall approve the same, and transmit a plat and descriptive notes thereof to the Commissioner of the General Land Office, for his approval; but if objections are made to said survey within the said ninety days, by any party claiming to have an interest in the tract embraced by the survey, or any part thereof, such objections shall be reduced to writing, stating distinctly the interest of the objector, and signed by him and his attorney, and filed with the surveyor-general, together with such affidavits or other proofs as he may produce in support of the objections. At the expiration of the said ninety days, if the objections and prima-facie showing above prescribed have been filed, the surveyor-general shall give notice thereof to the United States district attorney in whose district said lands are situated; and, upon the receipt of such notice, said district attorney shall appear and examine the objections and proof filed in support thereof; and if, in his opinion, the same are not sufficient to warrant the ordering of a hearing to determine the correctness of said survey, he shall file his reasons therefor with the surveyor-general, whereupon the surveyor-general shall determine whether a hearing should be ordered, subject to an appeal therefrom to the Commissioner of the General Land Office; and if a hearing shall be ordered by the Commissioner, the surveyor-general shall give due notice thereof to all parties in interest, and to the said United States district attorney, whose duty it shall be to be present at such hearing for the purpose of representing the interests of the United States; and after such hearing shall have been had, the surveyor-general shall transmit a plat and descriptive notes of such survey, together with the objections and all the evidence relating thereto, with his opinion thereon, to the Commissioner of the General Land Office; and if the survey is approved by the said Commissioner of the General Land Office, he shall indorse upon the plat thereof his certificate of approval. If disapproved by him, or if, in his opinion, the ends of justice would be subserved thereby, he may require a further report from the surveyor-general touching the matters indicated by him or proofs to be taken thereon, or may direct a new survey and plat to be made. Whenever the objections are disposed of, or the survey and plat are corrected, or a new survey and plat are made in conformity with his directions, the said Commissioner of the General Land Office shall indorse upon the plat of the survey adopted his certificate of approval; and after the survey shall have been approved by the said Commissioner, as hereinbefore provided, and the expenses of such survey shall have been reimbursed to the United States, it shall be the duty of the said Commissioner to cause a patent to issue to the confirmee of such claim as soon as practicable after such approval and payment for survey.

SEC. 12. That the provisions of this act shall not extend to any city lot, town lot, village lot, farm lot, or pasture lot held under a grant from any corporation or town to which lands may have been granted for the establishment of a city, town, or village by the Spanish or Mexican Government, or the lawful authorities thereof; but the claim for said city, town, or village shall be presented by the corporate authorities of the said city, town, or village, or, where the land upon which said city, town, or village is situated was originally granted to an individual, the claim shall be presented by or in the name of said individual.

SEC. 13. That the final decrees rendered by the said commissioners, or by the district courts, or by the Supreme Court of the United States, or any patent that may be issued under this act, shall be conclusive between the United States and the said claimants only, and shall not affect the interests of third persons.

SEC. 14. That each commissioner appointed under this act shall be allowed and paid at the rate of five thousand dollars per annum; that the secretary of the commission shall be allowed and paid at the rate of three thousand dollars per annum; and three of the clerks hereinbefore provided for shall be allowed and paid at the rate of one thousand eight hundred dollars per annum; and such additional number of clerks, not exceeding two, as the commissioners may deem necessary, shall be allowed and paid at the rate of one thousand six hundred dollars per annum; the aforesaid salaries

to commence from the day of the notification by the commissioners of the first meeting of the commission; and all salaries herein provided for shall be paid monthly.

SEC. 15. That the actual traveling and hotel expenses of the commissioners, law agents, secretary, and clerks hereinbefore provided for, in traveling from place to place where the sessions of the commission may be directed by the Commissioner of the General Land Office to be held, and the traveling expenses of the law agents incurred in the performance of their duties relating to the collection of testimony on behalf of the United States, shall be paid by the United States upon vouchers approved by the commission.

SEC. 16. That the secretary of the commission shall receive for furnishing certified copies of any paper or record fifteen cents for every hundred words, which fees shall be accounted for and paid over to the United States.

SEC. 17. That all laws or parts of laws authorizing the surveyor-general of any State or Territory mentioned in this act to examine and report upon the title of any unconfirmed private land-claim, and all laws and parts of laws inconsistent with the provisions of this act, are hereby repealed.

SUBSTITUTE REPORTED BY THE COMMITTEE ON PRIVATE LAND-CLAIMS FOR MR. HAZELTON'S BILL.

[Referred to on page 1134.]

FORTY-SEVENTH CONGRESS, FIRST SESSION.

H. R. 6840.

[Report No. 1733.]

IN THE HOUSE OF REPRESENTATIVES, JULY 26, 1882.

Read twice, referred to the House Calendar, and ordered to be printed.

Mr. G. C. HAZELTON, of Wisconsin, from the Committee on Private Land-Claims, reported the following bill as a substitute for H. R. 3149:

A BILL to provide for ascertaining and settling private land-claims in certain States and Territories.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purpose of ascertaining and settling private land-claims in the States of Nevada and Colorado, and the Territories of New Mexico, Arizona, Wyoming, and Utah, a commission shall be, and is hereby, constituted, which shall consist of three commissioners, to be appointed by the President of the United States, by and with the advice and consent of the Senate, which commission shall continue for four years from the first day of September, eighteen hundred and eighty-two, unless sooner discontinued by the President; and such commission, when organized, shall have power to issue and enforce process for the attendance of witnesses, and to punish contempts, and shall be governed by the same rules of evidence and practice which govern the United States courts in the State or Territory where the claims are located; and all process shall be issued by the secretary of said commission, and shall run in the name of the United States, and be executed by the marshal of the United States for the district where said land is located.

SEC. 2. That a secretary, skilled in the English and Spanish languages, shall be appointed by the commission to keep a record of the proceedings of the commission in a bound book or books furnished for that purpose, which record of proceedings, at the termination of said commission, shall be deposited in the General Land Office of the United States.

SEC. 3. That such clerks as may be necessary, not to exceed five in number, including two competent stenographers, shall be appointed by the said commission; and the commission may, from time to time, designate their secretary or either of their clerks to act as interpreter for the commission.

SEC. 4. That the President of the United States is hereby authorized to appoint an agent and an associate agent, learned in the law, one of whom shall be skilled in the Spanish language, whose special duty it shall be to appear in behalf of and to represent the United States before said commission, and to continue them in such agency so long as in his judgment the public interest may require, and to allow them such compensation as he shall deem reasonable, not to exceed five thousand dollars per annum each. And at least one of the said agents to attend all the meetings of the commission, to collect testimony in behalf of the United States, and to be present on all occasions at the taking of testimony by or in behalf of claimants before said commission; and that in all cases claimants shall be required to give notice in writing to

either of said agents of the time and place they propose to produce witnesses for examination: *Provided*, That in all cases testimony shall be taken either before the commission, or in pursuance of a commission issued by said commissioners with interrogatories and cross-interrogatories annexed thereto and approved by them: *And provided further*, That all witnesses subpœnaed on behalf of the United States who shall testify before said commission shall be entitled to the same per diem and mileage as witnesses attending upon the district court of the United States, to be paid by the marshal in like manner upon the certificate of said commissioners.

SEC. 5. That the said commission shall hold its sessions at such place or places as the Commissioner of the General Land Office shall direct, of which due and public notice shall be given; and the United States marshal of the district within which the land is situated shall appoint one or more deputies, whose duty it shall be to attend upon the said commission and execute all process issued by authority thereof, and who shall receive the same compensation as is allowed to the marshal for his attendance upon the district court and the performance of like services therein.

SEC. 6. That either of the said commissioners, when sitting as a commission, or the secretary of the commission, shall be, and is hereby, authorized to administer oaths to witnesses produced for examination in any case pending before the said commission; and that all testimony shall be reduced to writing, and shall be recorded and preserved in bound books to be provided for that purpose.

SEC. 7. That excepting in claims heretofore confirmed by Congress, each and every person claiming lands in the States and Territories aforesaid by virtue of any right or title, legal or equitable, derived from the Spanish or Mexican Government, shall present his claim to the said commissioners, when sitting as a commission, together with such documentary evidence and testimony of witnesses as the claimant relies upon in support of such claim, which may include the testimony heretofore taken before the surveyors-general under the authority given them to investigate such claims; and when said claim shall have been presented to the commissioners aforesaid it shall be the duty of said commissioners to give notice of such presentation by a publication, once a week for four consecutive weeks, in two newspapers of general circulation, one published at the capital of the State or Territory wherein said land is situated and one published nearest the land claimed; and it shall be the duty of said commissioners, when the case is ready for hearing, to proceed promptly to examine the same upon such evidence, and upon the evidence produced in behalf of the United States, and to decide upon the validity, extent, and the exterior boundaries of the said claim; and in every case in which the said commission shall render a final decision, it shall be their duty to have prepared two certified transcripts of their proceedings and decision, and of the papers and evidence on which the same are founded, one of which transcripts shall be filed with the clerk of the United States district court for the district within which the land claimed is located, and the other shall be transmitted to the Attorney-General of the United States; and the filing of such transcripts with the clerk aforesaid shall ipso facto operate as an appeal to said court for the party against whom the decision shall be rendered; and if such decision shall be against the private claimant, it shall be his duty to file a notice with the clerk aforesaid, within three months thereafter, of his intention to prosecute the appeal; and if the decision shall be against the United States, it shall be the duty of the Attorney-General, within three months after receiving said transcript, to cause a notice to be filed with the clerk aforesaid that the appeal will be prosecuted by the United States; and on failure of either party to file such notice with the clerk aforesaid, the appeal shall be regarded as dismissed; and in all cases wherein notice of appeal as hereinbefore provided shall have been filed, the district court shall proceed to hear, try, and determine the rights of the parties, and render judgment upon the pleadings and evidence in the case, and upon such further evidence as may be taken by order of the said court, and shall, upon application of the party against whom judgment is rendered, grant a writ of error to the Supreme Court of the United States, in the manner now prescribed by law: *Provided, however*, That if the transcript of the record of proceedings in the district court is not filed in the Supreme Court by the claimant within one year after the filing of such appeal, said appeal may be dismissed on motion of the Attorney-General, on the certificate of the clerk of the district court showing that such appeal was taken.

SEC. 8. That the commission herein provided for, and the district and supreme courts of the United States, in deciding on the validity of any claim brought before them under the provisions of this act, shall be governed by the treaty of Guadalupe Hidalgo, the treaty with Mexico concluded on the thirtieth day of December, eighteen hundred and fifty-three, commonly known as the "Gadsden treaty," the law of nations, the laws, usages, and customs of the government from which the claim is derived, the principles of equity, and the decisions of the Supreme Court of the United States, so far as they are applicable.

SEC. 9. That all lands as aforesaid the claims to which shall be finally rejected in the manner herein provided, and all lands as aforesaid, except those which have been

held in actual occupancy and possession by parties claiming title thereto for more than twenty years, the claims to which shall not have been presented to the said commission within two years after the first day of September next, shall be deemed, held, and considered as a part of the public domain of the United States, and said claims shall be forever thereafter barred.

SEC. 10. That it shall be the duty of the surveyor-general of the State or Territory within which any unsurveyed claim to land, finally confirmed as aforesaid, is situated, to cause said claim to be accurately surveyed, at the expense of the United States, and to keep an accurate account of the cost of such survey or surveys, and the platting thereof, which account shall be entered of record in his office, and a certified transcript thereof shall be filed for record in the office of the recorder of land titles of the county or counties within which the land is situated, which shall operate as a lien upon the land so surveyed for the amount of the said account; and if such lien shall not have been satisfied or discharged within five years from the date of the filing of said account for record as aforesaid, the Commissioner of the General Land Office may direct the necessary proceedings to be instituted in the proper United States district court to enforce said lien; and said court shall have power to issue suitable process for the enforcement of such lien, and by sale or otherwise compel the payment of all costs incident thereto, which proceedings shall be instituted by the United States district attorney for the district where the land is located, and summary judgment shall be rendered on his motion made to the court, after ten days' notice in writing to the grant claimant, his heirs or assigns: *Provided*, That in the location and survey of said claims the decree of confirmation shall be followed as closely as practicable whenever such decree designates the specific boundaries of the claim; but when such decree designates only the out-boundaries within which the quantity confirmed is to be taken, the location of such quantity shall be made, as near as practicable, in one tract and in compact form; but if intervening grants render the location in one tract impracticable, then each separate location shall be made, as near as practicable, in compact form; and it shall be the duty of the Commissioner of the General Land Office to require a substantial compliance with the directions of this proviso.

SEC. 11. That whenever either of the surveyors-general as aforesaid shall, in compliance with the provisions of this act, have caused any claim to land as aforesaid to be surveyed, and a plat thereof to be made, he shall give notice that the same has been done, by a publication, once a week for four consecutive weeks, in two newspapers having a general circulation, one published at the capital of the State or Territory in which the land surveyed is situated and one published nearest the land thus surveyed, and shall retain in his office, for public inspection, the survey and plat for the period of ninety days from the date of the first publication at the capital of the State or Territory aforesaid; and if no objections are made to said survey, he shall approve the same, and transmit a plat and descriptive notes thereof to the Commissioner of the General Land Office, for his approval; but if objections are made to said survey within the said ninety days, by any party claiming to have an interest in the tract embraced by the survey, or any part thereof, such objections shall be reduced to writing, stating distinctly the interest of the objector, and signed by him or his attorney, and filed with the surveyor-general, together with such affidavits or other proofs as he may produce in support of the objections. At the expiration of the said ninety days, if the objections and prima facie showing above prescribed have been filed, the surveyor-general shall give notice thereof to the United States district attorney in whose district said lands are situated; and, upon the receipt of such notice, said district attorney shall appear and examine the objections and proof filed in support thereof; and if, in his opinion, the same are not sufficient to warrant the ordering of a hearing to determine the correctness of said survey, he shall file his reasons therefor with the surveyor-general, whereupon the surveyor-general shall determine whether a hearing should be ordered, subject to an appeal therefrom to the Commissioner of the General Land Office; and if a hearing shall be ordered by the Commissioner, the surveyor-general shall give due notice thereof to all parties in interest, and to the said United States district attorney, whose duty it shall be to be present at such hearing for the purpose of representing the interests of the United States; and after such hearing shall have been had, the surveyor-general shall transmit a plat and descriptive notes of such survey, together with the objections and all the evidence relating thereto, with his opinion thereon, to the Commissioner of the General Land Office; and if the survey is approved by the said Commissioner of the General Land Office, he shall indorse upon the plat thereof his certificate of approval. If disapproved by him, or if, in his opinion, the ends of justice would be subserved thereby, he may require a further report from the surveyor-general touching the matters indicated by him or proofs to be taken thereon, or may direct a new survey and plat to be made. Whenever the objections are disposed of, or the survey and plat are corrected, or a new survey and plat are made in conformity with his directions, the said Commissioner of the General Land Office shall indorse upon the plat of the survey adopted his certificate of approval; and after the survey shall have been approved by the said Commissioner, as

hereinbefore provided, and the expenses of such survey shall have been reimbursed to the United States, it shall be the duty of the said Commissioner to cause a patent to issue to the confirmee of such claim as soon as practicable after such approval and payment for survey.

SEC. 12. That the provisions of this act shall not extend to any city lot, town lot, village lot, farm lot, or pasture lot held under a grant from any corporation or town to which lands may have been granted for the establishment of a city, town or village by the Spanish or Mexican Government, or the lawful authorities thereof; but the claim for said city, town, or village shall be presented by the corporate authorities of the said city, town, or village, or, where the land upon which said city, town, or village is situated was originally granted to an individual, the claim shall be presented by or in the name of said individual.

SEC. 13. That the final decrees rendered by the said commissioners, and by the district courts, or by the Supreme Court of the United States, or any patent that may be issued under this act, shall be conclusive between the United States and the said claimants only, and shall not affect the interests of third persons.

SEC. 14. That each commissioner appointed under this act shall be allowed and paid at the rate of five thousand dollars per annum; that the secretary of the commission shall be allowed and paid at the rate of three thousand dollars per annum; and three of the clerks hereinbefore provided for shall be allowed and paid at the rate of one thousand eight hundred dollars per annum; and such additional number of clerks, not exceeding two, as the commissioners may deem necessary, shall be allowed and paid at the rate of one thousand six hundred dollars per annum; the aforesaid salaries to commence from the day of the notification by the commissioners of the first meeting of the commission; and all salaries herein provided for shall be paid monthly.

SEC. 15. That the actual traveling expenses of the commisioners, law agents, secretary, and clerks hereinbefore provided for, in traveling from place to place where the sessions of the commission may be directed by the Commissioner of the General Land Office to be held, and the traveling expenses of the law agents incurred in the performance of their duties relating to the collection of testimony on behalf of the United States, shall be paid by the United States upon vouchers approved by the commission.

SEC. 16. That the secretary of the commission shall receive for furnishing certified copies of any paper or record fifteen cents for every hundred words, which fees shall be accounted for and paid over to the United States.

SEC. 17. That all laws or parts of laws authorizing the surveyor-general of any State or Territory mentioned in this act to examine and report upon the title of any unconfirmed private land-claim, and all laws and parts of laws inconsistent with the provisions of this act, are hereby repealed.

SEC. 18. That the present custodians of all records or Spanish and Mexican archives relating to these titles shall be and remain the custodians thereof; and such custodian shall furnish the same, or any part thereof, for the use of said commission, when required.

FAILURE OF LEGISLATION.

This bill did not become a law.

LIMITATION AS TO TIME OF FILING AND SURVEY OF PRIVATE LAND CLAIMS.

STATUTE OF LIMITATION.

No limit is placed by law upon the time within which claimants in New Mexico and Arizona shall present their claims. The Commissioner of the General Land Office in his report for 1882, says, speaking of the absence of a statute of limitation applying to these cases:

The result is that claims which may be only simulated operate to prevent surveys and settlements of tracts which are really public lands of the United States. It is suggested that if no other than the present system for ascertaining the validity of foreign claims within the Territories mentioned is likely soon to be adopted, a law requiring all such claims to be presented for adjudication within a certain reasonable time or be thereafter held to be invalid, would be a just provision and one of great public utility.

CONFIRMATION AND SURVEYS OF PRIVATE LAND CLAIMS.

[See page 410.]

Three separate methods of confirmations of these claims have been recognized by law:

1. By boards of commissioners.

2. By Congress, upon reports of boards of commissioners.

3. By the Federal courts.

Preliminary to confirmation is the survey.—On pages 394-398 can be found the instructions issued by the Commissioner of the General Land Office to the surveyor-general of New Mexico, August 25, 1854, for the survey of such claims in New Mexico, Arizona, and Colorado.

INSTRUCTIONS AS TO SURVEYS, MAY 3, 1881.

IN EFFECT DECEMBER 1, 1883.

The following instructions in regard to the survey of private land claims are embodied in the new manual of instructions to surveyors-general, issued under date of May 3, 1881 (see page 575 herein) [Congress having, on March 3, 1881, appropriated $26,000 for the survey of private land claims in Arizona, New Mexico, and California]:

1. The instruments used in the survey of private land claims must be the same as those required for the survey of public lands, and must be registered and tested in like manner at the surveyor-general's office previous to the deputy's commencing work; and the instructions for the survey of public lands must, as far as applicable, be strictly observed in the survey of private land claims.

2. The surveyor-general will furnish to the deputy surveyor a full description of the boundary calls of each grant and special instructions for its survey, which description and instructions must be entered *in extenso* at the commencement of the field-notes of such survey.

3. The true magnetic variation must be noted at the beginning point of each survey and at each angle thereof, and wherever the variation of the needle is observed to change along the line the same must be noted and the reasons therefor stated, if known.

4. At the end of each mile along a boundary the character of the soil and amount of timber, grass, &c., will be stated; and the date of each day's work in the field must be noted at the end of the record thereof.

5. The requirements in the "Summary of objects and data required to be noted," as set forth in the instructions for the survey of public lands, must be observed by the deputy in the survey of private land claims. Where practicable, bearings must be taken from at least two points on the line to all prominent or otherwise notable objects in the vicinity, and where only one bearing can be taken the estimated distance must be noted.

6. Where the natural objects constituting a boundary call of a grant have become obliterated, or are difficult to recognize and identify, or where there may be a doubt as to the identity of the same, the deputy will request the parties interested, or others having knowledge thereof, to furnish disinterested and credible witnesses, whom he shall cause to be examined under oath, and whose testimony shall be written out in full in his presence and that of the officer administering the oath, and subscribed and sworn to before such officer duly authorized to administer oaths. The wording of the testimony so taken must be clear, precise, and definite, in order that the location of the natural objects constituting the boundary calls may be as clearly understood both in the General Land Office and the surveyor-general's office, as by the deputy in the field.

7. The testimony of interested parties relative to the location of boundary calls or objects may be taken, but should not be relied on as conclusive. The evidence as to such locations should be obtained, when practicable, from parties having no interest in the grant to be surveyed, and the deputy should thoroughly satisfy himself in every case as to the correct identification and location of the natural objects constituting boundary calls.

8. Where a grant call is a point or object still notorious under the name used in the original muniments of title, the additional testimony above provided for will not be required, but in such cases the deputy must state in his notes the fact of its being well known by such name, and that he is satisfied that it is the one described in the grant.

9. At the beginning point upon the out boundaries of each grant survey a corner must be established of the same character, size, and materials as prescribed for township corners upon the lines of the survey of public lands, except that only two pits will be dug, one on each side of the corner on the line. Upon the side of such corner facing the claim the initial letters of the name of the grant, and immediately under the same, the letters "Beg. Cor., 1" (for beginning corner one), must be neatly cut, chiseled, or affixed.

10. Each of the mile corners or stations of survey must be established in the manner prescribed for the establishment of section corners upon the lines of public surveys, except that they will be marked on the side facing the grant with the initials

of the grant and the number of the station or mile, as the case may be; and only two pits will be dug, one on each side of the corner, on the line.

11. Where mile corners are established, except upon meandered portions of the line, half-mile corners will also be established in the manner prescribed for the establishment of quarter-section corners upon the lines of public surveys, except that they will be marked upon the side facing the grant with the initials of the grant.

12. Such other marks, in addition to those above described, will be placed upon the corners as may be required by the surveyor-general in his special written instructions.

13. As far as practicable, bearings and distances must be taken from each of the corners or stations to two or more trees or prominent natural objects, if any, within a convenient distance, in the same manner as required in the instructions for the survey of public lands, and such trees or objects must be marked with the initials of the grant, and underneath same the letters "B. T.," or "B. O.," as the case may be.

14. Witness corners will be established, where necessary, in the same manner as required in the instructions for the survey of public lands.

15. In all cases where the lines of the grant boundary surveys intersect the established lines of survey of public lands or private land claims, the course and distance from such point of intersection to the nearest corner on the line of the prior survey must be carefully run, measured, and noted, and, wherever necessary, such corner must be re-established.

16. The survey of a private land claim must always be connected by a line actually run and measured in the field with some corner of the public surveys, if any such have been established within a distance not exceeding two miles from any point on the boundary lines of the private land claim.

17. Boundaries or portions of boundaries of previously established grant surveys, which also form a portion of the boundaries of the claim to be surveyed, will be adopted so far as common to both grants, but no payment will be made for such common boundaries unless it is necessary to re-establish same.

18. Before commencing the survey of any private land claim the deputy surveyor will be furnished from the records of the surveyor-general's office with descriptive diagrams of such lines and corners as it is supposed his survey will intersect, or with which it may be necessary to connect same.

19. In the case of confirmed grants the boundary lines must be surveyed and established in strict accordance with the confirmatory decree; and in the case of unconfirmed grants, with the grant calls, and the terms of concession. The field-notes must embrace a full, clear, and concise statement of the reasons why each boundary is so established, in order that the theory of the deputy may appear plain to any one reading the same.

20. The deputy surveyor must return with the field-notes a topographical map or plat of the survey. As far as practicable, all objects described in field-notes, and the main features of the tract surveyed, including towns, streams, mountains, roads &c., must be protracted on such plat as accurately as possible.

21. A general description of each tract must be given at the end of the field-notes of the survey of same, which description must embrace a brief statement of the main features of the tract surveyed, character of the land, timber and other natural growth, kinds of mineral, if any, population of towns and settlements, characteristics of mountains, streams, springs, &c., and such other data as may be of importance.

22. The field-note books must embrace a list of assistants, and preliminary and final oaths, as required in the instructions for the survey of public lands.

23. Official plats of the survey of private land claims will not be furnished to any person until the cost of surveying and platting same shall have been paid to the United States.

24. All protests against the manner of survey of any particular grant must be made in writing, setting forth fully the grounds of objections, and addressed to the surveyor-general of the district within which such survey was made, who will take testimony thereon, if necessary, in accordance with the "Rules of Practice" adopted by the Department of the Interior, and forward same, together with his recommendation in the premises, to the Commissioner of the General Land Office.

25. The survey of each private land claim must be made by the deputy surveyor in strict accordance with the instructions herein contained, and such special instructions as may be given him in each particular case.

SURVEY OF PRIVATE LAND CLAIMS IN NEW MEXICO, COLORADO, AND ARIZONA, AND AS TO THE VALIDITY OF SAID CLAIMS.

No one can estimate the number of private land claims yet to be filed. The Commissioner of the General Land Office, in his report for 1882, speaking of the survey and confirmation of private land claims in the above-named States and Territories, says:

The act of July 22, 1854, relative to private claims in New Mexico, the provisions of which were extended to Colorado by act of February 28, 1861, and to Arizona by the act of July 15, 1870, devolves upon the surveyors-general of those districts the jurisdiction to determine the validity or invalidity of claims presented to them for adjudication, which claims are afterwards reported to Congress for its action.

The vast power thus conferred upon subordinate officers of this Department has been the subject of judicial notice in cases coming before the courts.

Upon assuming the duties of this office I found the practice had been to transmit to Congress, without examination or remark, the reports of surveyors-general with copies of the title papers and proofs upon which the claims were approved. While it has been held that this office has no authority to review the proceedings of the surveyors-general, or even to call for or to examine the original muniments of title, I have nevertheless deemed it my duty, with the concurrence of the Department, to consider their reports, and in event of any obvious error to call the attention of Congress thereto.

In my last annual report I referred to the pressing necessity for some legislation that will facilitate the early adjudication of these claims, and I would again call attention to this subject.

PRIVATE LAND CLAIMS IN NEW MEXICO, COLORADO, AND ARIZONA.

To June 30, 1883.

Mr. Harrison's statement before the Senate Committee given on pages 1112 to 1116 herein, shows the condition of private land claims in the Department and in Congress to the date of his testimony.

The three subdivisions above set out are of most interest by reason of no statute of limitation as to the time of filing such claims and from the uncertainty as to whether the Nation owns any lands of value in New Mexico not covered by a grant or for which a grant, not now in sight, may have been issued by the authorities, or manufactured or is being manufactured by individuals.

MAP OF CONFIRMED AND UNCONFIRMED PRIVATE LAND CLAIMS IN NEW MEXICO, COLORADO, AND ARIZONA.

To June 30, 1883.

The map facing page 1155 shows the location of private land claims in the subdivisions above named. It is to June 30, 1883, and was prepared by William H. Walker, esq., principal clerk of private land claims in the General Land Office. The text on pages 1151 to 1155 shows whether claims are confirmed, unconfirmed, or patented.

AREA EMBRACED IN ENUMERATED CLAIMS.

	Acres.
48 confirmed in New Mexico and Colorado	7,732,890.00
25 pending in General Land Office in New Mexico and Colorado	1,913,301.91
68 pending in Congress from New Mexico and Colorado	5,345,053.13
12 pending in Congress from Arizona	188,179.16
Total	15,179,424.20

AREA (ESTIMATED) NECESSARY TO FILL ALL GRANTS OR PRIVATE LAND CLAIMS.

It was estimated June 30, 1880, which estimate has not been changed, that the area of lands embraced within the limits of private land claims on the public domain, patented and unpatented, was about 80,000,000 acres, an area almost equal to the land surface of the States of New York, Pennsylvania, Delaware, Maryland, Connecticut, Massachusetts, and New Hampshire.

PRVATE LAND CLAIMS (GRANTS AND INDIAN PUEBLOS) PATENTED BY THE UNITED STATES IN NEW MEXICO AND COLORADO.

To June 30, 1883.

As shown by the following statement forty-eight private land claims have been patented in New Mexico and Colorado, containing 7,732,890.00 acres.

PRIVATE LAND CLAIMS IN ARIZONA, REPORTED TO CONGRESS AND NOW AWAITING ACTION, JUNE 30, 1883.

Twelve private land claims in Arizona were within the register of Congress June 30, 1883, waiting acts of confirmation. They contain 188,179.169 acres.

LIST OF PRIVATE LAND CLAIMS IN THE TERRITORY OF ARIZONA, REPORTED TO CONGRESS AND NOW AWAITING ACTION.

To June 30, 1883.

TO ACCOMPANY "PUBLIC DOMAIN" BY THOS. DONALDSON.

MAP SHOWING PRIVATE LAND CLAIMS,

PATENTED OR UNPATENTED, OR CONFIRMED, IN NEW MEXICO, COLORADO AND ARIZONA,

To June 30, 1883.

The area and condition of these grants is shown by the text on the page opposite. They contain 15,179,427.20 acres.

It was estimated June 30, 1880, that it would require about 80,000,000 of acres of Public Lands to satisfy this class of claims, including those which had been already patented. See chapter XXXI, pages 365 to 410, and addenda to chapter, for confirmatory text.

In Colorado the Nolan grant and derivative claims under the Las Animas (or Vigil and St. Vrain) grant are not noted on the map. The two last were located by legal sub-divisions of the public surveys, and cannot be correctly represented on the scale of this map. No survey of their exterior limits has been made by the United States.

Official: General Land Office, June 30, 1883.

LEGISLATION RECOMMENDED JUNE 30, 1883.

The Commissioner of the General Land Office, in his annual report for the fiscal year ending June 30, 1883, makes the following statement and recommendations as to private land claims:

PRIVATE LAND CLAIMS.

Eight confirmed private land claims in California have been patented, and nineteen others docketed, but not finally disposed of.

Twenty-six private claims in Louisiana, Florida, and Illinois, and three in New Mexico, have been passed to patent. One in Louisiana and one in New Mexico presented for recognition have been rejected. Twenty-seven confirmed claims in New Mexico and Colorado, and forty-one in Louisiana and Florida, are awaiting final action. Three claims within the Las Animas grant in Colorado have been adjudicated. Six approved and twenty-four rejected claims within the same grant remain to be considered.

Scrip has been issued for two claims in Louisiana under the act of June 22, 1860, and subsequent acts. Three have been reported to Congress. Three hundred and six entries have been allowed on private land-scrip locations, and ninety-three are pending

Thirty-nine donation claims in Oregon and Washington Territory have been patented, twenty-six in New Mexico rejected, and five hundred and forty-seven in Oregon, Washington Territory, and New Mexico remain to be adjudicated. Eighty-four Indian claims have been patented.

Several thousand private land claims in Florida and Louisiana, and a smaller number in the several States of Missouri, Alabama, Mississippi, Arkansas, Illinois, Indiana, and Michigan, which have been confirmed by Congress, by various boards of commissioners, or by the courts, still remain undisposed of.

In Florida.—Plats of confirmed claims in Florida which have been surveyed by the United States are on file in this office, but it is found in many instances that the subsisting surveys embrace more land than was included in the confirmations.

All lands within the lines of these surveys are regarded as reserved until the claims are finally adjudicated. Meanwhile claimants treat the whole as their private property and make sales and conveyances. Numerous conflicts between settlers seeking title under the public land laws, and grant claimants or their assignees, arise from this unsettled condition.

It is desirable and important that sufficient provision be made by Congress for an investigation of these surveys in the field, and for such examination and investigation of the titles and claims in other respects as may be required in the public interests.

In New Mexico, Colorado, and Arizona.—Attention is again called to the condition of private land claims in New Mexico, Colorado, and Arizona. Nearly thirty years have elapsed since the passage of the act of July 22, 1854 (10 Stat., 308), providing for the settlement of these claims through their presentation to the surveyor-general and the submission of his reports to Congress.

About seventy claims have been confirmed by Congress. Ninety-four are pending before that body, while an unknown number remains on the files of the surveyors-general.

The claims presented under the act of 1854 (and subsequent acts, extending the provisions of that act to Arizona and Colorado) are chiefly in New Mexico and Arizona, a few only being in Colorado.

The presentation to surveyors-general of claims for confirmation, whether the same are finally confirmed or not, operates as a statutory reservation of the land claimed, although the situation of the land and the quantity embraced in the claims are ill-defined and uncertain.

The existence of these undetermined and unsettled claims is a perpetual menace to the industrial occupation of the soil. Settlements are retarded and to a large degree practically inhibited owing to the liability that the land upon which a settlement is made may fall within the limits of some unconfirmed and unsurveyed grant. There is a further liability of the assertion of claims heretofore unknown. The increasing value of land, owing to increased facilities of communication and the general settlement of all the Territories, invites the assertion of such claims, and is an incentive to the manufacture of fraudulent titles. The lapse of time favors claims of a doubtful character, and especially favors a broad expansion of original claims. Complaints have been made that grants have been confirmed by Congress, or surveyed and patented under Congressional confirmations, for a far greater quantity of land than is embraced in the grants.

The inadequacy of the present system of adjustment is shown by the statement just made that only seventy claims out of a possible thousand have been settled, while less than one hundred more have been in any manner reported for action, and this, as to number, is the result of thirty years' operation of the system. In other respects the results of the system are even less satisfactory. Repeated applications have been made for the institution of judicial proceedings to set aside patents already issued, either on the ground of fraud in original titles or of a fraudulent enlargement of boundaries. A suit is now pending for the recovery to the United States of nearly 2,000,000 acres embraced in a single confirmation by Congress upon a surveyor-general's report. This situation illustrates a more fundamental defect in the present system than that of mere interminable delay. It is that the machinery employed does not admit either of that scrutiny of title or of that accuracy in the determination of boundaries which the public safety demands. The surveyor-general is fully occupied with the ordinary duties of his office. He cannot give the time required for a thorough investigation of these cases even if he were always qualified for the duty and interests of such magnitude could properly be confided to the intelligence, discretion, or integrity of a single individual.

The determination of the boundaries and extent of claims rests almost wholly with deputy surveyors. They are only nominally officers of the United States. Actually, they are contractors. They are not required to exercise judicial functions, and cannot be expected to devote much of their own time to a critical investigation of boundaries shown them by interested claimants. For several years past, and until the beginning of the present fiscal year, after a claim had been favorably reported by the surveyor-general, the first step was to make what is called a "preliminary survey." This was not considered a finality. It did not purport to be founded upon any accurate basis. It purported only to describe boundaries which parties interested in extending claimed limits had pointed out. When a claim is confirmed by Congress, the confirmation may carry the survey as reported, and thus the merely preliminary survey becomes a Congressional grant.

These preliminary surveys were not required to be examined by this office, but in contemplation of law were simply transmitted to Congress as exhibits to the surveyor-general's reports. But if they had been examined here, such examination would, of necessity, have been a superficial one. Under the present system this office is without proper means to judge of the substantial correctness of surveys of private land claims. Minor errors, incident to any survey, may be detected. But whether the deputy surveyor found the true boundaries of the grant, or whether the monuments accepted as being the monuments called for by the grant, were such in fact, are matters wholly beyond the facilities of this Department to ascertain from any data furnished by the surveyor-general's reports.

The unauthoritative character of preliminary surveys has repeatedly been stated to Congress in my annual reports and in reports upon special cases.

An instance has been called to my attention where the original claim was for a quantity of land shown upon a plat presented to the surveyor-general as containing one square league, or less than 5,000 acres, and described as having fixed natural boundaries which claimants stated were well known and easily identified. And yet, upon the assignment of this claim to other parties a preliminary survey was obtained purporting to show identically the same boundaries, but embracing an area exceeding 300,000 acres.

The title papers transmitted to Congress for its judgment upon the validity of claims are not the originals or purported originals on file in the surveyor-general's office, but are copies merely. It is manifestly impossible for an opinion to be formed upon the authenticity of papers by an inspection of copies. Moreover, the organization and duties of legislative committees do not admit of that kind of scrutiny and investigation which claims of this character should receive before a confirmation of title to unknown quantities of land is made.

The reluctance of Congress to continue the confirmation of private land claims in New Mexico and Arizona, in view of the difficulties and uncertainties involved in such procedure, has been marked by its omission in late years to take action upon such claims, and by various propositions looking to some different mode of settlement.

I have heretofore been disposed to regard with favor the proposition of sending these claims to the courts, but upon a more mature consideration I am satisfied that the courts, with their present organization, would be unable to cope with the vast volume of additional business which would be thrown upon already overcrowded dockets. It is also doubtful if methods of judicial procedure are adequate to the proper investigation of such claims. The evidence to be produced is generally *ex parte*. Conflicting interests are apt to be removed, or a confirmation effected, through which the demands of all parties are satisfied out of a larger portion of the public domain. Settlers having adverse claims are not usually able to pay the expenses of a legal contest with wealthy grant claimants. The United States attorneys are occupied with their general duties, and provision is not made by which they can be compensated for the special and extraordinary labor that would be entailed by the proper defense of the public interests in such suits. The appropriations for special counsel do not permit the payment of fees approximate to those which experienced and able lawyers can obtain from private claimants of great bodies of the public lands.

The examination of these claimed titles is a work of protracted and patient labor, requiring in many cases detective experience and skill as well as legal acumen and learning, and in all cases close and painstaking individual effort. The nature and validity of claims being settled, questions of boundary and extent are to be determined, and such properly require investigations in the field. Usually testimony upon these points is furnished chiefly or wholly by claimants. It is obvious that a better knowledge of facts than can be obtained from such sources is essential to a just adjudication.

The old population of New Mexico and Arizona is permanent in its character. The lands occupied and cultivated by these people for generations are well known. The location of original claims in their neighborhood is ascertainable. I believe it possible, through a personal examination of monuments and boundaries by responsible officers of the Government, and by taking testimony in the neighborhood, to establish the limits of grants with a greater degree of accuracy than has yet been attained or that can be attained in any other manner.

My best conclusion is that a commission should be appointed for each of the Territories named, the duties of which should embrace a thorough examination and investigation of the foundations of all alleged private land claims in these Territories, together with an actual investigation of boundaries and limits, and that all claims before Congress or this office, as well as those depending before the surveyors-general, should be remanded to such commission for examination and decision with proper appeal for review upon error of law.

Much care would be requisite in framing such measure, which should not, I think, invest the commissioners with so great or irresponsible powers of confirmation as given to previous boards, but should require as preliminary to any result the most thorough research and exhaustive practical investigation.

The obligations of treaty stipulations are apt to be magnified into a recognition of property rights that had no existence under Spanish or Mexican law, and into the support of speculative schemes to dispossess the United States of its own property. The time has come when, in my opinion, the rights and interests of the United States should be faithfully and vigorously defended against unjustifiable assaults under cover of pretended foreign titles.

I further deem it a matter of great importance that the time within which claims not heretofore presented to surveyors-general may be filed before any tribunal should be limited to a brief period, and that all claims not presented within such period should be definitely barred.

In view of the great length of time that has already been allowed for this purpose, I think that further time should be limited to two years.

EXISTING METHODS OF SALE AND DISPOSITION OF PUBLIC LANDS.

To December 1, 1883.

[See Chapter XXXII, pages 411 to 415.]

CIRCULARS, METHODS OF PROCEDURE, AND REGULATIONS.

In Effect December 1, 1883.

The circulars, regulations, and details of procedure to acquire title to the public lands under the several laws as set out in the "addenda," from pages 517 to —— herein, and noted as "In effect June 30, 1883," are in effect December 31, 1883, with slight modifications, resulting from departmental and court rulings, which cannot be obtained in time for insertion here.

REFERENCES.

For decisions as to existing laws see the several chapters herein; also, "The existing laws of the United States of a general and permanent character relating to the public domain to December 1, 1880"; Public Land Commission, 1880, Ex. Doc. 47, Part I, Forty-sixth Congress, third session. See also "Decisions of the Department of the Interior and General Land Office, in cases relating to lands and land claims from July, 1881, to June, 1883"; also, see annual reports of Commissioner of General Land Office for the years 1880, 1881, 1882, and 1883—and regulations issued by that office.

THE PUBLIC LANDS OF THE UNITED STATES, WHICH ARE, AND LOCATION OF.

THE NATIONAL DOMAIN.

The national domain is the whole area, land and water, lying within the national boundaries known as the United States. (See pages 1 to 10 herein.)

THE PUBLIC DOMAIN, OR PUBLIC LANDS.

The public domain, or public lands—the property of the nation, and subject to legislative control and disposition by Congress alone—is the area known as public lands acquired by treaty, capture, cession by States, conquest, or other acquisition and purchase, and lying and being in the States and Territories below enumerated. (See also pages 10 to 29 herein.) The fact of the nation owning land within any of the other States not enumerated below does not make them "public lands"; such lands, used for forts, arsenals, dock-yards, post-offices, court-houses, hospitals, or any other purpose of government, are not public lands or domain.

NAMES OF PUBLIC LAND STATES AND TERRITORIES.

The public lands are included only within the States of Alabama, Arkansas, California, Colorado, Florida, Illinois, Indiana, Iowa, Kansas, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, Ohio, Oregon, Wisconsin, and the Territories of Arizona, Dakota, Idaho, Montana, New Mexico, Utah, Washington, and Wyoming, and the "Public Land Strip." Alaska, although public domain, has not as yet had the land laws extended over it by Congress. These States and Territories, with the exception of Ohio, Indiana, Illinois,* the "Land strip", and Alaska, are divided into land districts, in each of which there is a land office established by law, with a register and a receiver in attendance for the sale or other disposal of the public lands therein. (See sections 2234 to 2247 of the Revised Statutes of the United States; also list of land offices on page 554.) Information regarding public lands may be obtained at these offices.

PUBLIC LANDS—TITLE TO, HOW ACQUIRED.

DECEMBER, 1, 1883.

(Reference.)

The text on pages 411 to 415 is still in effect, December 1, 1883. The details as to who can enter, and qualifications, and the tables of fees, are the law, December 1, 1883.

WHO MAY ENTER PUBLIC LANDS.

A single man, a married man, a single woman, or a married woman, if (legally) the head of a family, citizens of the United States, or have declared their intentions to become such, can have the benefits of the several settlement laws.

The American citizen (male or female) must be over twenty-one years of age before he or she can have the benefits of the settlement laws, but the foreigner can have these benefits the moment after he files his or her declaration of intention to become a citizen.

THREE HUNDRED AND TWENTY ACRES [IN THEORY] THE UNIT OF PUBLIC LAND ACQUIREMENT BY ANY ONE PERSON.

Under the homestead act a person can acquire 160 acres by settlement and residence; under the pre-emption act 160 acres by settlement and purchase, or 320 acres. This was intended to be the limit of acquirement by any one person of public lands, but—

*No land offices in Ohio, Indiana, or Illinois. Any Government lands therein are entered on application at the General Land Office, Washington, D. C.

In fact, under the existing laws, *a person* can legally acquire *eleven hundred and twenty* acres, viz:

	Acres.
Under the homestead act	160
Under the pre-emption act	160
Under the timber-culture act	160
Under the desert-land act	640
Total	1,120

(See page 411 herein.)

METHODS OF ACQUIRING TITLE.

Title may be acquired by sale at auction, private entry or location, cash purchase, or entry under the several settlement and disposition laws by persons, associations, or corporations.

BY PURCHASE AT PUBLIC SALE.

This may be done where the lands are "offered" at public auction to the highest bidder, either pursuant to proclamation by the President or public notice given in accordance with directions from the General Land Office.

BY "PRIVATE ENTRY" OR LOCATION.

The lands liable to disposal in this manner are those which have been offered at public sale, which were not then sold, and which have not since been reserved or otherwise withdrawn from market. The area of such lands is small in the West, but almost the whole of the surveyed agricultural and other public lands lying in Alabama, Mississippi, Florida, Arkansas, and Louisiana can be purchased under the act of June 22, 1876. For details as to how public lands are proclaimed and offered, and how rendered subject to private sale or entry, see pages 206 and 207 herein. In this class of offered and unreserved public lands the following steps must be taken to acquire title:

METHOD OF PRIVATE (CASH) ENTRY OR PURCHASE.

CASH PURCHASE.

The applicant will first present a written application to the register for the district in which the land desired is situated, describing the tract he wishes to purchase, giving its area, form [No. 4-001.]

[No. 4-001.]

Cash application.

No. ——. LAND OFFICE, AT ———,
(*Date*) ———, 18—.

I, ——— ———, of —— county, ——, do hereby apply to purchase the —— of section ——, in township ——, of range ——, containing —— acres, according to the returns of the surveyor general, for which I have agreed with the register to give at the rate of —— per acre.

——— ———.

I, ——— ———, register of the land office at ——, do hereby certify that the lot above described contains —— acres, as mentioned above, and that the price agreed upon is —— per acre.

——— ———, *Register.*

Thereupon the register, if the tract is vacant, will so certify (see bottom of blank above) to the receiver, stating the price, and the applicant must then pay the amount of the purchase money.

RECEIVER'S RECEIPT.

The receiver will then issue his receipt for the money paid, in duplicate, giving to the purchaser a duplicate receipt, form No. [4-131.]

[No. 4-131.]

RECEIVER'S CASH RECEIPT.

(*Issued in duplicate, one for the files.*)

No. ——. RECEIVER'S OFFICE AT ———,
(*Date*) ———, 18—.

Received from ——— ———, of —— county, ——, the sum of —— dollars and —— cents, being in full for the —— quarter of section No. ——, in township No. ——, of range No. ——, containing —— acres and —— hundredths, at $—— per acre $——

——— ———, *Receiver.*

The register will then issue his certificate of purchase, form [No. 4-189.]

REGISTER'S CASH CERTIFICATE.

(*Issued in duplicate, one for the files, one for purchaser.*)

On this patent is issued.

[No. 4–189.]

CASH CERTIFICATE.

No. ——. LAND OFFICE AT ——,
(*Date*) ——, 18—.

It is hereby certified that, in pursuance of law, —— ——, of —— county, State of ——, on this day purchased of the register of this office the lot or —— of section No. ——, in township No. ——, of range No.——, containing —— acres, at the rate of —— dollars and —— cents per acre, amounting to —— dollars and —— cents, for which the said —— —— ha— made payment in full as required by law.

Now, therefore, be it known, that on presentation of this certificate to the Commissioner of the General Land Office, the said —— —— shall be entitled to receive a patent for the lot above described.

—— ——, *Register.*

At the close of the month the register and receiver will make returns of the sale to the General Land Office, from which, when the proceedings are found regular, a patent or complete title will be issued; and on surrender of the duplicate receipt such patent will be delivered, at the option of the patentee, either by the Commissioner at Washington or by the register at the district land office.

LOCATIONS WITH WARRANTS.

(See pages 712 herein, 715, and 721 *et seq.*)

Application must be made as in cash cases, forms as above, but must be accompanied by a warrant duly assigned as the consideration for the land; yet where the tract is $2.50 per acre, the party, in addition to the surrendered warrant, must pay in *cash* $1.25 per acre, as the warrant is in satisfaction of only so many acres at $1.25 per acre, or furnish a warrant of such denomination as will, at the legal value of $1.25 per acre, cover the rated price of the land. For example: A tract of 40 acres of land, held at $2.50 per acre, can be paid for with a warrant calling for 40 acres and the payment of $50 in cash, or by surrendering an eighty-acre warrant for the same—the 40 acres to be in full satisfaction for the said location; or a tract of 80 acres, rated at $2.50 per acre, can be paid for by the surrender of two eighty-acre warrants. If there is a small excess in the area of the tract over the quantity called for on the face of the warrant in any case, such excess may be paid for in money.

A duplicate certificate of location will then be furnished the party, to be held until the patent is delivered, as in cases of cash sales.

For fees chargeable by the land officers, and the several amounts to be *paid at the time of location*, see page 716.

NO LAND BOUNTIES GIVEN BY CONGRESS TO UNION SOLDIERS OR SAILORS IN THE WAR OF THE REBELLION.

By warrants is meant certain warrants issued under the act of Congress of March 3, 1855, and previous acts, giving public land as a bounty for military services rendered prior to the passage of the acts in former wars of the republic. The bounties given by law for military services in the late war, 1861 to 1865, were not given in *land*, but in *money*. The only privileges granted to soldiers and sailors on account of military services rendered by them during the late war, in connection with the public lands, are provided for in sections 2304 to 2309 of the Revised Statutes, allowing homestead entries to be made by them on condition of residence on the entered tracts, with cultivation of the soil, for a prescribed period.

AGRICULTURAL-COLLEGE SCRIP.

Application will be made as in cash cases. Same forms are used. Can be used as cash in private entry. For details see page 711.

CLOSE OF CASES AND PATENTS.

In all cases of cash entry, or location (or any other class of location or entry of public lands), the papers will be forwarded at end of the current month to the General Land Office at Washington for examination and approval. If all is found regular, a patent or title will be given.

PATENTS.

When patents are ready for delivery, they will in all cases be transmitted to the local office at which the location or entry was made, where they can be obtained by the party entitled thereto, upon surrender of the duplicate receipt or certificate, as the case may be, unless the duplicate shall have been previously filed in the General Land Office with a request that the patent be delivered as requested by the person sending the same; and in no case will the patent be delivered either from the general or the local office except upon receipt of such duplicate, or, in case of its loss from any cause, upon the filing in lieu of the same of an affidavit made by the present *bona fide* owner of the land, accounting for the loss of the same, and also showing ownership of the tracts or a portion thereof embraced in the patent.

In case the duplicate has been duly assigned by the locator, by a valid transfer in accordance with the laws governing transfers of realty in the State where the land is situated, such assignment will be recognized by the General Land Office and patent issued accordingly, provided the duplicate with the assignment thereon shall be filed in that office prior to the issuing of patent; but in no case will a patent be canceled for the purpose of making a reissue in the name of the assignee, where such assignment is not in possession of the General Land Office prior to date of the patent. Transfers of this kind must in all cases comply strictly with the law of the place, and if the assignor be a married man, and the statute requires the wife to join in the deed, it must be complied with, and in case of failure in this or other vital point the patent will follow strictly there cital of the certificate and issue only in the name of the original purchaser.

CLASSIFICATION AND METHOD—DISPOSITION OF PUBLIC LANDS.

DECEMBER 1, 1883.

No change in method or manner of disposition of the public lands or classification of them has taken place to December 1, 1883, except in the matter of the public lands in the State of Alabama, where a radical departure from existing laws and methods has taken place in the disposition of mineral lands, copper, coal, or iron, the property of the nation.

The act of March 3, 1883, given in full on page 980 herein, related to these lands. An enormous area of public lands, agricultural (in most instances) on the surface, containing valuable mineral deposits, coal and iron (which in most of the other land States are guarded by the law and land department with scrupulous care), and valued at millions of dollars, was, by the terms of this act, thrown into open market, after public offering, to be sold at private sale, in unlimited quantities, at $1.25 per acre.

The law in its title and upon its face does not convey its full force and effect.

If this policy is to be followed in the future in the legislation of Congress in relation to the mineral lands, gold, silver, copper, iron, and coal, in the remaining public-land States and Territories, the present seven grades of public lands, necessarily differing in value by reason of actual value, will be materially changed.

CLASSIFICATION—GRADES OF PUBLIC LANDS.

Mineral.—"In all cases 'lands valuable for minerals' shall be reserved from sale, except as otherwise expressly directed by law." (Section 2318, R. S.) Sold at from $2.50 to $5 per acre, except in Alabama, where they are sold for $1.25 per acre, either gold, silver, or iron lands.

Timber and stone.—Lands valuable chiefly for timber and stone, unfit for cultivation. Sold at $2.50 per acre, except in Alabama, where offered lands are sold for $1.25 per acre.

Saline.—Salt springs, sold at agricultural price, $1.25 per acre.

Town-site lands.—Sold at agricultural price, $1.25 per acre.

Desert.—Sold at $1.25 per acre.

Coal lands.—In all land States and Territories these lands are sold at $10 per acre when situated "more than 15 miles from any completed railroad, and $20 per acre when situated within 15 miles of a completed railroad, in limited quantities," except in the State of Alabama, where coal lands, public domain, under the existing law specially applicable to that State, can be purchased at private entry by any person or persons, in unlimited quantities, at $1.25 an acre.

Agricultural lands.—In all land States and Territories, at $1.25 per acre.

THE SEVERAL SETTLEMENT AND DISPOSITION LAWS.

DECEMBER 1, 1883.

The data on pages 411 to 415 is correct to December 1, 1883, with the addition of a class of entries known as the timber-culture entries. (See chapter XXIX, pages 360 to 362, and also page 1088 herein.

THE TIMBER-CULTURE LAW.

Under this law an applicant, male or female, head of a family, citizens of the United States, or those who have declared their intention to become such, can apply at any United States district land office and enter one quarter section (160 acres), of public lands, not mineral or otherwise reserved, as a timber-culture claim. Residence on the land is not requisite. Claimant need not make his affidavit for entry at the district land office. Fees are $14 at time of entry of a quarter-section tract and $9 for the entry of an 80-acre tract. For an exhibit of the method of entry under this law, see page 1091 herein, and also Mr. Commissioner McFarland's statement of the abuses under this system, pages 682, 683, and page 1164.

GREAT NUMBER OF EXISTING LAWS FOR SETTLEMENT AND DISPOSITION.

For the purpose of giving an idea of the complex and difficult public land system, the several settlement and disposition laws are detailed at length as in force and effect December 1, 1883. Persons, associations, or corporations can acquire title under these. The methods of locating military and naval land bounty warrants, agricultural college or other scrip, is also noted. Educational and railroad grants are not noted, as the gross area of these is fixed by law. In the matter of railroad grants the segregation of the lands decreases rather than increases the area of lands stated as being granted.

THE SETTLEMENT LAWS.

DECEMBER 1, 1883.

BY PERSONS.

Pre-emption acts 1841 and sections 2257 to 2288 Revised Statutes United States. See pages 685 to 688 herein. For forms used in entry, see page 688 and following.

Homestead. Original act of May 20, 1862. See page 1022 and following. For forms used in entry, see page 1031 and following.

Homestead. Adjoining farms. Section 229 Revised Statutes United States. See pages 1022, 1027. For forms used in entry, see page 1040.

Homestead additional act, March 3, 1879. See pages 1022, 1028. For forms used in entry, see page 1044.

Soldiers' and sailors' homestead act of June 8, 1872. See pages 1022, 1029, 1030. For forms used in entry, see page 1042.

Soldiers' and sailors' additional homestead act of June 8, 1872. See pages 1022, 1030. For forms used in entry, see page 1045.

Indian homestead act, March 3, 1875. See pages 1022 and 1031. For forms used in entry, see page 1045.

Desert-land act of March 3, 1877. See page 1103 to 1111. For forms used in entry, see page 1106.

Donation act, New Mexico, July 22, 1859. See page 969. Special forms used, only applicable to New Mexico.

THE DISPOSITION LAWS.

DECEMBER 1, 1883.

Cash, pre-emptor's private entry or purchase. For forms, see pages 1159 to 1160.

Timber-culture act. For forms see pages 1093 to 1103.

Stone and timber act. For forms, see pages 1086 to 1088.

Coal-land law of March 3, 1866. For form, see page 967.

Town-site and county-seat acts. See page 970.

Mineral-land laws. Acts of July 9 and 26, 1866, July 9, 1870, and May 10, 1872, and amendments. See page 978. For forms and procedure in entry, see page 1012.

Saline lands, act of July 12, 1877. See page 696.

Swamp and overflowed lands, page 676. For forms and procedure, see page 698.

Private land claims. For history of and details as to, see pages 365 to 410, and pages 1111 to 1157. A constant drain on the public lands; guarded by no adequate law as to limitation of time of filing.

LOCATION WITH WARRANTS AND SCRIP.

For methods of location with bounty-land warrants, see pages 711 and 715. These are located upon any vacant public lands subject to sale at *private entry*, or as cash in pre-emption or commuted homesteads—the last on offered or unoffered lands. Agricultural-college scrip, as above, with restrictions as to quantity locatable in township, and in any one State, see pages 710, 711. Scrip (see pages 289, 290, and 949 and following) can be used as cash in paying for cash, pre-emption, or commuted homestead entries the same as military and bounty-land warrants and scrip.

CHANGES NECESSARY IN EXISTING LAWS.

The following recommendations for changes and amendments made by the Commissioner of the General Land Office in his report for 1883 are given in full, together with references to recommendations of former years. This officer is charged by law with the care and custody of the public lands. His recommendations are the result of experience and investigation. The present laws, as detailed in the first part of this chapter, do not meet the requirements of the nation or the wants of the settler. Prompt and immediate legislation is necessary to preserve the remaining public lands and to so dispose of them that they will benefit actual settlers and persons desiring to found homes.

RECOMMENDATIONS OF THE COMMISSIONER OF THE GENERAL LAND OFFICE, 1883.

THE PRE-EMPTION LAW.

The general disproportion running through terms of years between the number of claims initiated and the number perfected, and the volume of relinquishments of such claims which are apparently purchased by *bona fide* entrymen or others, satisfy me that pre-emption filings are made, or procured to be made, to a great extent, for speculative purposes, and with no intention on the part of the person in whose name the filing is made to perfect the entry, or in any manner to comply with the law.

REPEAL OF THE PRE-EMPTION LAW.

[See pages 678 to 682.]

In my last annual report I renewed the recommendation, frequently made by my predecessors, that the pre-emption law be repealed. Continued experience demonstrates the advisability and necessity of such repeal. The objection that much good has heretofore resulted from the pre-emption system, and that it should not be discontinued because abused, appears to me without good foundation under the changed conditions created by the homestead law.

Before the homestead system was adopted the only method by which unoffered public lands could be obtained by settlers was by pre-emption. All the advantages of the pre-emption system are now embraced in the homestead laws. The same lands can be entered upon the same conditions and proofs and the payment of the same price under the homestead law as under the pre-emption law. We have simply a double system for the same purpose, employing two sets of machinery, two agencies of adjustment, and a duplication of records, when only one is required. The administration of the law would be simplified and the labor and expense lessened by a discontinuance of the now unnecessary system of pre-emption.

THE HOMESTEAD LAWS—SOLDIERS' HOMESTEAD DECLARATORY STATEMENTS.

[See pages 679 to 683.]

These declarations are in the nature of pre-emption filings. The present laws authorize their presentation by agent or attorney. Advantage is taken of this provision to obtain the authorization of soldiers to make filings which are used for speculative purposes by the agent or attorney. The soldier receives no benefit in such cases, but generally pays a fee which he is given to understand will procure for him 160 acres of land that he can sell without going upon it or even seeing it. I have made special effort to check the spread of this fraud upon soldiers of the country and upon the public land laws.

AMENDMENT OF THE HOMESTEAD LAWS.

The present laws and regulations permit settlers on unsurveyed lands, who have maintained a residence of five years, to make entry and give notice of final proof simultaneously after survey.

Parties who desire to obtain large quantities of land employ men to make entries on newly surveyed land, alleging residence long anterior to the survey. Notice of intention to make proof in thirty days is published, affidavits filed, final certificates issued, and the land patented before an opportunity is had to develop the facts and prevent the consummation of the illegal entry. Special agents report valuable lands in whole ranges of townships in certain districts to have been entered in this manner, when the land shows no evidence of settlement at any time, but is held as portions of large estates.

Notice to the world of claims to public land is a fundamental principle of the land laws. Thirty days' publication, which is frequently made in a distant or obscure newspaper, is insufficient notice for any practical purpose, especially when no entry has previously been recorded.

I think it important that provision be made by statute, fixing a period of not less than six months after a settlement claim has been placed on record before final proof shall be admitted, irrespective of alleged time of residence prior to entry.

COMMUTED HOMESTEADS.

The commutation feature of the homestead law is open to the same abuses as the pre-emption law. The alleged commutation settler is frequently a person employed at so much a month to sign entry papers and hold the claim long enough to enable his employer to secure title by commutation.

This system of illegal appropriation, which is especially made use of in obtaining title to lands of selected value and in large quantities, could be materially checked by an extension of the time within which a homestead entry may be commuted. The actual settler does not usually prefer to pay for his land when by continuing his residence upon it he can obtain title without price. It would be no hardship to require a period of residence sufficient to prevent the present easy evasion of the law. No time is fixed by statute as a condition of residence before commutation, but the same proof and payment may be made as in pre-emption cases. In these cases the regulations of this office require as a general rule that residence of six months shall be shown, and the same rule is, under the law, applied in commuted homestead cases.

I deem it a matter not less important than the repeal of the pre-emption law that the homestead laws should be amended so as to require proof of actual residence and improvement for a period of not less than two years before a homestead entry may be commuted by cash payment.

REPEAL OF THE TIMBER-CULTURE LAW.

[See pages 681, 683, and 1088.]

In my last annual report I called attention to the abuses flowing from the operations of this act. Continued experience has demonstrated that these abuses are inherent in the law, and beyond the reach of administrative methods for their correction. Settlement on the land is not required. Even residence within the State or Territory in which the land is situated is not a condition to an entry. A mere entry of record holds the land for one year without the performance of any act of cultivation. The meager act of breaking five acres, which can be done at the close of the year as well as at the beginning, holds the land for the second year. Comparatively trivial acts hold it for a third year. During these periods relinquishments of the entries are sold to homestead or other settlers at such price as the land may command.

My information leads me to the conclusion that a majority of entries under the timber-culture act are made for speculative purposes and not for the cultivation of timber. Compliance with law in these cases is a mere pretence and does not result in the production of timber. On the contrary, as one entry in a section exhausts the timber-culture right in that section, it follows that every fraudulent entry prevents a *bona fide* one on any portion of the section within which the fraudulent entry is made. My information is that no trees are to be seen over vast regions of country where timber-culture entries have been most numerous.

Again, under the operation of the pre-emption, homestead, and timber-culture laws, any one person may enter 160 acres in each class of entry, making a total of 480 acres which may be taken by one person. The power to acquire that quantity of public land by single individuals, while so many of the citizens of the country are landless,

is contrary to the general spirit of the public land laws, and, I think, not in consonance with approved public policy.

This objection would hold to the timber-culture act if the law was generally complied with in good faith, or if its provisions requiring the planting and cultivation of timber were capable of enforcement. I am convinced that the public interests will be served by a total repeal of the law, and I recommend such repeal.

DESERT-LAND ACT.

[See pages 684 and 1104.]

The desert-land act provides that proof of reclamation and final payment shall be made within three years from date of entry. A large number of cases is on the files of this office in which the time has passed and proof has not been made as required. At the expiration of the three years the parties were called upon to show cause why their entries should not be canceled. Such showing was made in but few instances. With a view to saving the equities of those who may have attempted in good faith to reclaim the lands entered, but may have been prevented from so doing by the great expense of obtaining water, or other good cause, it has been determined, with your concurrence, to make another call, and give to entrymen a further opportunity to make proof or to show cause for failure.

It has been represented that desert-land entries have largely been made for speculative purposes, in violation of the restrictions of the act, and in many instances upon lands naturally productive, and that lands are held fraudulently under the entry without attempt or intention of reclamation, but are occupied or leased for grazing and other purposes. Investigations so far made of alleged illegal entry under the desert-land act tend to confirm these allegations.

The theory of the desert-land law is, that the encouragement of irrigation required the disposal of land in larger quantities than 160 acres. This theory has not been sustained, as general systems of irrigation are adopted for the distribution of water, which are equally as available to the owners of small tracts as of large ones. The practical operation of the desert-land law has heretofore been to enable land to be purchased without settlement, and in quantities in excess of the limit established by the settlement laws, thus resulting in the encouragement of monopoly rather than the encouragement of reclamation.

TIMBER AND STONE ACT.

[See pages 684, and 1046 to 1086.]

This law applies to the States of California, Oregon, and Nevada, and Washington Territory.

It is a condition of this act that the land shall be valuable chiefly for timber, but unfit for cultivation. Entries are restricted to 160 acres for any one person or association of persons.

The restrictions and limitations of the act are flagrantly violated. Information is in my possession that much of the most valuable timber land remaining in the possession of the Government on the Pacific coast is being taken up by home and foreign companies and capitalists through the medium of entries made by persons hired for that purpose.

I have found it necessary to suspend all entries of this class and to direct an investigation in the field with a view to the procurement of evidence in specific cases to authorize the cancellation of illegal entries and the prosecution of guilty parties.

TIMBER LANDS.

[See pages 1049, 1081.]

The rapid decrease in the timber areas of the country invites attention to present methods of appropriation of public timber lands, and suggests the expediency of some modification of the laws by which remaining forests may be better preserved, or a more adequate revenue derived from their sale.

The present and increasing value of timber is an inducement to individuals and companies to make large investments with a view to the control of the timber product, and the further enhancement of prices resulting from such control. The facilit with which the restrictions of the public land laws are evaded is a temptation to the illegal acquirement of title for the purpose of such investments.

It would, perhaps, be of little moment how soon the public title to lands should pass to private holders, since that is the ultimate purpose of the laws, if the further

purpose of the laws that public lands should in the original instance be widely distributed among the people could also be secured. But if this cannot be done, and the systems of public disposal are to result, as they now do, in permitting capitalists to indirectly obtain great bodies of public land, it is certainly but provident for the United States to require a price to be paid for its timber lands somewhat commensurate to their value.

Several propositions have been presented in Congress looking to a change in the methods of disposing of lands valuable chiefly for timber. The subject is one of difficulty, and it is important that the wisest action be taken. I am of opinion that such lands should be reserved by law from ordinary disposal, and sold only after appraisement and upon sealed bids, at not less than the appraised price. It would be proper that an act to such effect should not deprive settlers on the public lands of the right to take timber for domestic purposes or the support of their improvements.

SWAMP LANDS INDEMNITY.

[See page 606]

The act of March, 1855, extended to March 3, 1857, confirmed all swamp selections previously made, whether or not properly so made, for lands intended to be granted, and also provided indemnity in lands or money for tracts disposed of by the United States subsequent to the swamp-land grant and prior to March 3, 1857, which should be found to have been swampy in character at the date of the swamp-land act.

The effect of the indemnity provision has been to incite claims by States or their agents or assigns for land or cash indemnity for a large quantity of the public land disposed of under general laws between 1850 and 1857 in the swamp-grant States. The validity of these claims is in many cases of a questionable character, and the allowance of them is a considerable and constant draft upon the Treasury. I have been compelled to reject probably the larger portions of the selections presented. If the State agents would exercise more discrimination in presenting cases much labor would be saved. The appropriation available for the examination of claims for swamp lands and swamp indemnity has permitted the employment during the year of but four special agents for this important service. The Southern States, to which the swamp grant in part applies, are urging the adjustment of their claims, and much progress has been made during the past year in their settlement. A portion of the force of the swamp division has been engaged in perfecting the records of the office, and preparing indexes, a fact not elsewhere referred to in this report.

RELINQUISHMENTS OF LAND ENTRIES.

[See page 683.]

The first section of the act of May 14, 1880 (21 Stat., 140), provides that when a relinquishment of any pre-emption, homestead, or timber-culture claim is filed in the local land office the land covered by such claim shall immediately become subject to entry by any other person, without awaiting the formal cancellation by this office of the relinquished entry.

The effect of this statute is to invite speculative entries for the purpose of selling relinquishments. The practical result is that when a new township is surveyed large portions of the land are at once covered with filings and entries, relinquishments of which are then offered for sale like stocks in the market. To such an extent is this proceeding carried that it is becoming difficult for an actual settler to obtain access to a quarter-section of public land in desirable agricultural localities without buying off a pretended claim that has no foundation other than the facility added by this statute for making and relinquishing it. The section facilitates this practice, and should be repealed.

FORFEITURE OF RAILROAD LAND GRANTS.

[See pages 788 to 933, and Chapter XXXVI.]

[See pages 1264, 1265.]

The question of declaring a forfeiture of the railroad land grants hereinafter noted or of any of them, is deemed an appropriate one for legislative consideration.

The time fixed in the granting acts for the completion of these roads expired in some instances in 1866, and in other cases at later periods down to 1882.

In the absence of Congressional action, lands have been certified or patented accordingly as roads have been constructed whether within or out of the time prescribed. Your immediate predecessor (Secretary of the Interior) suspended this practice prior to the meeting of Congress in December, 1880, but as no legislative action was taken

you (the Secretary of the Interior) have held that under the decision of the Supreme Court of the United States you (the Secretary of the Interior) had no right to declare a forfeiture or to further suspend the issue of patents for lands along the constructed portions of roads even if the same had not been built within the prescribed time. The remaining lands are continued in the reservations established by law or under withdrawals made for the protection of the grants. Meanwhile settlers have entered upon some of these lands and are anxious to know whether they must look to the railroad companies or to the United States for their titles. The public demand for a definite settlement of the question whether a forfeiture is to be enforced in any of these cases is constantly pressed upon my attention. I consider it of very great importance that the earliest possible action should be taken either to revive the grants or to declare them forfeited. If it be the judgment of Congress that the grants should be revived, Congress may unquestionably prescribe the conditions of such revival; and if such action should be taken I suggest that all actual settlers on the land be saved and secured in their rights and claims to land embraced in their settlements and improvements at the date of any such revival of the railroad grant.

SURVEYS.

[See page 567.]

DESTRUCTION OF MONUMENTS.

The frequent removal or destruction of corners marking the public surveys renders it necessary for me to call attention to the absence of any statute bearing upon the matter in cases where the surveys have been completed.

The protection of these monuments is of great importance both to settlers and the Government, and I recommend the passage of an act by Congress making the willful removal or destruction of monuments or corners of public surveys an offense, and providing proper penalties therefor.

FALSE AND FRAUDULENT SURVEYS.

Under existing laws deputy surveyors are liable on their bonds for the execution of false or fraudulent surveys, and are also liable to the penalties of perjury for falsely taking and subscribing an oath that surveys have been faithfully and correctly made. These penalties are ineffective to prevent gross frauds in the surveying service. Recoveries upon bonds are rarely possible, and the difficulty in obtaining convictions for perjury in general cases is well known.

I am of the opinion that punishment by fine and imprisonment for making false and fraudulent returns of public surveys is a matter of necessity for the better protection of the public interests, and I recommend the passage of an act to that effect.

RESURVEYS.

It often becomes necessary to resurvey townships which have been erroneously surveyed, or where the corners marking the surveys have become obliterated. The annual appropriations for the surveying service are not deemed applicable to such resurveys. Frequent applications are also made for the survey of beds of meandered lakes, sloughs, and ponds, and for the extension of surveys over tracts omitted from survey for some cause in the progress of the general survey of townships. It was formerly the practice to survey and dispose of tracts falling within the above-named classes and which were considered public land of the United States, but owing to the difficulty of determining questions of title, and doubt as to the authority for making surveys under current appropriations, such practice was discontinued by my immediate predecessor, and I have not felt authorized to renew it without legislative sanction.

There are many cases of this character in which, for the purpose of adjudicating the swamp grant to States, or other administrative purposes, it is the duty of this office to determine questions involved, and to this end an examination of the land, and its survey, become necessary.

I recommend that authority be given the Commissioner of the General Land Office for the resurvey of townships erroneously surveyed, or where corners have become obliterated, and for the examination and survey of the beds of meandered lakes, sloughs, and ponds, and for tracts omitted from previous surveys; such surveys or resurveys to be made under general appropriations or the individual deposit system.

PUBLIC LAND STRIP.

[See also pages 462 and 1187.]

The boundaries of the tract of unorganized territory south of the Kansas and Colorado State lines, and between the Indian Territory and New Mexico, have been established and exterior township lines surveyed. Subdivisional township surveys yet remain to be made.

Settlers are commencing to enter this territory, and means should be provided by which they may be enabled to secure titles under the public land laws and also to be protected in person and property by the laws of the land. The territory is not at present attached to any judicial district. In my last annual report I recommended that it be attached to the surveying district of New Mexico for the purpose of subdivisional township surveys and the disposal of the land. The land is, however, nearer the recently established Southwestern land district in the State of Kansas, and it would be more convenient for settlers to make their entries at Garden City, in that district, than at the Santa Fé land office in New Mexico. I recommend, therefore, the attachment of this public land strip to the Southwestern land district in Kansas, and, as there is no surveyor-general in Kansas, I also recommend that authority be given the Secretary of the Interior to cause the subdivisional surveys to be made under the general appropriation for the surveying service.

UNLAWFUL OCCUPATION OF THE PUBLIC LANDS.

[See page 539.]

DIFFICULTY OF OBTAINING PROPER LAND LEGISLATION.

It is almost impossible to obtain remedial legislation in the matter of public lands; as an illustration, see pages 678 to 675, herein, where details are given of attempts to repeal the pre-emption laws and amend the homestead and timber-culture acts. The Commissioner of the General Land Office, in his annual report for 1882, makes the following suggestions in regard to the—

UNLAWFUL OCCUPATION OF THE PUBLIC LANDS.

The illegal inclosure of the public lands in certain States and Territories, and the exclusive occupation of large tracts by private parties to the deprivation of the rights of others and the impediment of settlement and intercourse, have become matters of serious complaint.

A usual method of proceeding is that title is legitimately or otherwise obtained to the streams or water rights, and then the surrounding country, frequently for many miles in extent, is inclosed with fences, and all citizens warned off and their stock driven away.

In other cases the public lands are inclosed in this manner where no pretext of ownership or of legal claim to any part of the land exists. The usual routes of travel are also cut off by these inclosures, and the inhabitants of the country are in many instances compelled to go a great way around or to tear down the fences, thus incurring the risk of disturbance and perhaps bloodshed.

Letters received at this office from many persons, and reports made by officers and agents of this Department, disclose the fact that unlawful proceedings of this character are carried on to a great extent, and future serious trouble is apprehended between settlers and residents and the "cow boys," as employés of the stockmen are led.

It appears also that in some cases State laws have provided for a nominal tax upon "possessory rights," the effect of which is represented to be to locally legalize this infringement upon the laws of the United States; and citizens who have attempted to make settlements and entries within the limits of these ranges in accordance with the land laws of the United States have been ousted by judicial decree.

It is manifest that some decisive action on the part of the Federal Government is necessary for the maintenance of the supremacy of the laws and to preserve the integrity of the public domain.

It is undoubtedly true that the vast plains and mountain ranges west of the Mississippi River must be relied upon for an important proportion of the sheep and cattle husbandry required by the necessities of national consumption, but it does not therefore follow that this industry should be the subject of individual or corporate monopoly any more than that other agricultural pursuits should be so controlled.

The unimpeded progress of settlement will in due time bring the whole of the territory of the United States within the compass of private ownership. Meanwhile the unappropriated public lands suitable for grazing herds of cattle should be equally free to the enterprise of all citizens unembarrassed by attempts at exclusive occupation.

Existing laws (act March 3, 1807, 2 Stat., 445) authorize the President to direct the marshal of the proper district to remove unlawful boundaries placed on the public lands, and to remove persons unlawfully in possession thereof, and further authorize the employment of military force when necessary for this purpose. A forfeiture of any and all rights to land so occupied is also declared.

I have hesitated to recommend the summary exercise of the power vested in the Executive by this act, although it may yet become necessary to invoke that authority.

It is my opinion that a statute is required imposing penalties for the unlawful inclosure of the public lands, and for preventing by force or intimidation legal settlement and entry.

I respectfully recommend that the attention of Congress be invited to this subject.

ACTION OF CONGRESS.

August 7, 1882, Mr. T. M. Rice of Missouri, from the Committee on Public Lands, submitted the following:

REPORT.

[To accompany bill H. R. 3560.]

UNLAWFUL OCCUPATION OF THE PUBLIC LANDS.

[House report No. 1809, Forty-seventh Congress, first session.]

The Committee on the Public Lands, to whom was referred the bill (H. R. 3560) to prevent the unlawful occupation of the public lands, have had the same under consideration, and report the same back to the House, with the following amendments, viz:

1. Insert in the third line, after the word "the" and before the word "occupation," the word "appropriation."

2. In the sixth and seventh lines, strike out the words "the pre-emption or homestead laws," and insert in lieu thereof the words "any law of the United States."

3. In the eighth line insert the word "appropriated" before the word "inclosed."

4. In the eighteenth and nineteenth lines strike out the words "the homestead and pre-emption laws," and insert in lieu thereof the words "any law of the United States."

5. Add to the first section the proviso: "*Provided*, That this act shall not apply to school selections or lands taken in good faith under any grant of the United States to a State."

6. Strike out the second section of the bill.

This legislation is necessary for the following reasons:

In the State of California, and in others of the States and Territories, many ranchers or herders have settled on the public lands without claim or pretense, or title or possessory right, and have inclosed large tracts of the same with fences. Such lands, if vacant and unoccupied, would be eagerly sought for homestead and pre-emption purposes. But the fact of their occupation, though unlawful, and though in legal contemplation they are vacant and subject to homestead and pre-emption entry, deters the settlers from making entry thereon.

The Supreme Court of the United States in the case of Atherton *vs.* Fowler (6 Otto, 513), and the subsequent cases of Hosmer *vs.* Wallace (7 Otto, 575), and Trenouth *vs.* San Francisco (10 Otto, 251), has held that no right of pre-emption can be established by a settlement and improvement on a tract of public land which is in the possession of one who has inclosed, settled upon, and improved it.

In Hosmer *vs.* Wallace, the court says:

"To create a right of pre-emption, there must be settlement, inhabitation, and improvement by the pre-emptor, conditions which cannot be met when the land is in the occupation of another. * * * Under the pre-emption laws, as held in Atherton *vs.* Fowler, the right to make a settlement is to be exercised on unsettled land; the right to make improvements is to be exercised on unimproved land; and the right to erect a dwelling house is to be exercised on vacant land. None of these things can be done on land when it is occupied and used by others."

In Trenouth *vs.* San Francisco the court says:

"The right of pre-emption, under the laws of the United States, cannot be acquired by intrusion and trespass upon lands in the actual possession of others."

From these quotations, it is apparent that the Supreme Court intended to deny the right to pre-empt when there was *actual* possession in another, without regard to the character of the possession, whether lawful or not.

And so the supreme court of California understands those decisions, as will be seen from their language in the case of Davis *vs.* Scott:

"As the land was in the *actual* possession and occupation of the plaintiff at the time defendant attempted to locate a pre-emption claim thereon, it was not, therefore, subject to pre-emption."

The operation of these decisions is to permit the unlawful occupant to remain in possession. If the homesteader or pre-emptor attempts to locate on the lands, he is sued as a trespasser by the occupant, under the "possessory act" of California. If he defend under his homestead or pre-emption claim, he is met with the rejoinder that as the lands were in the actual possession of another, his homestead or pre-emption claim

is void. Thus he gets no standing in court to test the rights of the original trespasser. He can only enforce his claim by a contest and protracted litigation, which few settlers can afford.

It is believed that this bill affords an adequate, summary, and easily enforced remedy, and the passage of the bill so amended is recommended by your committee.

The bill with proposed amendments is as follows:

IN THE HOUSE OF REPRESENTATIVES, *January* 30, 1882.

A BILL to prevent the unlawful occupation of the public lands.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the appropriation, occupation, or inclosure of any tract of the surveyed or unsurveyed public lands in larger quantity than authorized by law shall not prevent the entry thereon by any one duly qualified and intending in good faith to acquire title under any law of the United States; but where such tract has been inclosed, appropriated, or is occupied for the purpose of acquiring title thereto under any of the laws of the United States, the occupation shall be held valid for such lesser quantity as the occupant is authorized by law to acquire title to: *Provided,* That the occupant, or several occupants, if more than one, shall, within ten days after written demand, designate the metes and bounds of such lesser quantity by well-defined marks. In case of neglect or refusal to do so, such occupant or occupants shall be deemed trespassers, and the whole tract may be entered on by persons duly qualified and intending in good faith to acquire title under any law of the United States; and such demand and neglect or refusal shall be held to bar a recovery in any action brought against any person so entering: *Provided,* That this act shall not apply to school selections or lands taken in good faith under any grant by the United States to a State.

FAILURE OF LEGISLATION.

Congress failed to pass the proposed law, and did not legislate in regard to grazing or arid lands, so that stockmen or cattle owners could get lands by authority of law.

The Commissioner was compelled to issue in pursuance of law and for the protection of actual settlers, the following:

P. DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., April 5, 1883.

TO REGISTERS AND RECEIVERS UNITED STATES LAND OFFICES, AND SPECIAL AGENTS:

GENTLEMEN: You are instructed to circulate the following notice in your district:

NOTICE RELATIVE TO UNLAWFUL INCLOSURES OF PUBLIC LANDS.

In view of the numerous complaints of the unlawful inclosures of public lands for stock range purposes, and consequent impediment to settlements, all persons are hereby notified as follows:

The public lands are open to settlement and occupation only under the public land laws of the United States, and any unauthorized appropriation of the same is trespass.

Such trespass is equally offensive to law and morals as if upon private property.

The fencing of large bodies of public land beyond that allowed by law is illegal, and against the right of others who desire to settle or graze their cattle on the inclosed tracts.

Until settlement is made, there is no objection to grazing cattle or cutting hay on Government land, provided the lands are left open to all alike.

Graziers will not be allowed, on any pretext whatever, to fence the public lands and thus practically withdraw them from the operation of the settlement laws.

This Department will interpose no objections to the destruction of these fences by persons who desire to make *bona fide* settlement on the inclosed tracts, but are prevented by the fences, or by threats or violence, from doing so.

The Government will take proper proceedings against persons unlawfully inclosing tracts of public land whenever, after this notice, it shall appear that by such inclosures they prevent settlements on such lands by others who are entitled to make settlement under the public land laws of the United States.

Very respectfully,

N. C. McFARLAND,
Commissioner.

DEPARTMENT OF THE INTERIOR,
April 5, 1883.

Approved:

H. M. TELLER,
Secretary.

COMMISSIONER'S RECOMMENDATION FOR 1883.

[From annual report.]

FENCING THE PUBLIC LANDS.

The practice of inclosing public lands by private persons and companies for exclusive use as stock ranges is extensively continued in States and Territories west of the Mississippi River. These ranges sometimes cover several hundred thousand acres. Special agents report that they have ridden many miles through single inclosures, and that the same often contain much fine farming land.

Summer and winter ranges in different sections of country are frequently controlled in the same manner by the same persons, who cause their cattle to be driven from one to the other, according to the season, keeping the whole of the land under fence and preventing the stock of smaller ranchmen from feeding upon any portion of it.

Foreign as well as American capital is understood to be largely invested in stock-raising enterprises involving unlawful appropriation of the public lands. Legal settlement by citizens of the country are arbitrarily prohibited, public travel is interrupted, and complaints have been made of the detention of the mails through the existence of these inclosures. Reports have been received of the use of violence to intimidate settlers or expel them from the inclosed lands.

A frequent incident to this control of large bodies of land is the acquirement of title by stock owners to the valleys, water-courses, and other especially valuable lands within the inclosures by means of fraudulent or fictitious entries caused to be made under the pre-emption, homestead, and desert-land laws. Investigations of such entries are in progress in several districts.

In April last a circular was issued by your direction giving notice as follows: (See circular, page—.)

This notice has been widely distributed in grazing districts by special agents and officers of this Department, and a number of cases of fencing trespass examined and reported upon by the special agents have been submitted to you for transmittal to the Department of Justice for appropriate action.

A recent decision by the district court of Wyoming Territory (see page —) affirming the right of the Government to cause the removal of fences from the public lands by proper judicial proceeding, has strengthened the Executive Department in its efforts to abate the evils complained of. Proceedings in equity, however, involve much time and delay, and I regard it expedient that some remedy at law should also be provided.

I renew the recommendation that an act be passed imposing penalties for the unlawful inclosures of public lands, and preventing by force and intimidation legal settlement and entry.

DECISION OF UNITED STATES COURTS AS TO UNLAWFUL OCCUPATION OF PUBLIC LANDS AND AS TO THE PRE-EMPTION ACT.

The two following decisions are of interest and value. The decision of Judge Sawyer is of great moment, and if it is to become the law for other courts it will be useless to attempt to set aside a patent obtained by fraud under the pre-emption act. The necessity for the immediate repeal of this law in the interest of morality and fair dealing is apparent in the light of this decision.

PRE-EMPTION PATENT.

IS PERJURY AND FALSE TESTIMONY IN OBTAINING PATENT IN PRE-EMPTION A CAUSE FOR SETTING IT ASIDE?

In the circuit court of the United States, ninth circuit, district of California, July, 1883.

United States *vs.* Geo. E. White et al.

1. *Jurisdiction.—Fraud.*—The United States courts have jurisdiction to vacate a patent to lands, in a proper case, on the ground of fraud.
2. *Fraud in procuring patent.*—The frauds for which courts will set aside a patent, granted by the United States, in the regular course of proceedings in the Land Office, are frauds extrinsic, or collateral to the matter tried and determined, upon which the patent issued; and not fraud, consisting of perjury in the matter on which the determination was made.
3. Perjury and false testimony in the proceeding by means of which a patent is secured by fraud is not fraud extrinsic, or collateral to the matter tried and determined in the Land Office, within the meaning of the rule, and a patent will not be set aside on that ground alone.
4. *Perjury.—Injury.*—Where no pecuniary injury to the United States is shown by the bill, and it does not appear that there is any other right in the land against the Government, whether a court of equity should set aside a patent obtained on false testimony, if otherwise proper, query?

5, *Return of purchase-money.*—Where the United States files a bill to set aside a patent on the ground that it was obtained upon false testimony, it should, at least, offer to return the purchase-money paid by the patentee for the land.
6. *Equity.*—When the United States comes into a court of equity, asking equity, like a private person, it should do equity.
7. *Forfeiture.—Equity.*—Courts of equity never enforce penalties or forfeitures.
8. *Forfeitures.*—If the United States desires to enforce the penalties and forfeitures imposed by section 2262 of the Revised Statutes for obtaining a patent to land upon false affidavits, it must do so by a proper proceeding at law, where the party charged will be entitled to a trial of the charge by a jury.

Before Sawyer, circuit judge.

A. P. Van Duzer for the United States.

L. D. Latimer and Barclay Henley, for defendants. Sawyer, circuit judge.

The first of these cases, United States *vs.* Geo. E. White, is a bill in equity to vacate a United States patent, issued to the defendant, on the ground that it was obtained upon false and fraudulent affidavits, and proofs, made under the pre-emption laws.

It is alleged that on May 6, 1876, the defendant filed a declaratory statement under the pre-emption laws upon a quarter-section of land situate in Humboldt County, described in the bill, and an affidavit stating that he had settled upon the land on November 5, 1873, and resided thereon ever since; that he had cultivated a portion as a garden, built a fence around about an acre, and built a house 9 by 12; that the improvements were of the value of $100, and that he was not the owner of 320 acres of land elsewhere. It is further alleged, that he paid the sum of $200, and thereupon, and upon the making of said proofs, a certificate of purchase in due form was issued to said defendant; and afterward, in pursuance of said certificate of purchase, a patent was issued on December 13, 1876. It is further alleged, *upon information and belief*, that said affidavits and proof were false; that defendant did not make the settlement as stated; did not reside upon said lands, and that he did own 320 acres of land elsewhere. And as the grounds of these false representations and proofs, the complainants ask that the patent be vacated and canceled; and that the money paid be adjudged forfeited to the United States.

There are numerous cases wherein the Supreme Court of the United States has said, in general terms, that a patent might be vacated for fraud on a bill of equity filed by the United States—as Moore *vs.* Robbins, 96 U. S., 533; Shipley *vs.* Cowan, 9 U. S., 330; and numerous others too familiar for citation. There can, therefore, be no question as to the jurisdiction of the court to entertain such a bill, where a proper case is presented. But it was never determined what kind of fraud, or in what form perpetrated, would furnish a proper case for the relief sought in this case, till the case of the United States *vs.* Flint, and United States *vs.* Throckmorton, in this court, 4 Saw., 51-3, affirmed in United States *vs.* Throckmorton, 98 U. S., 68. These were cases wherein a petition was filed under the act of 1851, before the Board of Land Commissioners, for confirmation of a Mexican grant, which had been confirmed. It was alleged in the bill that the grant presented was a fraud; that it had been perfected in Mexico, after the transfer of California to the United States; that the fraud was concealed from the Government officers and the Board of Land Commissioners; and that the confirmation was obtained upon false and perjured testimony. On these grounds it was sought to vacate the patent in the first case, and the confirmation in the second, and annul the title. But the court decided that the confirmation could not be vacated on the ground that it was obtained wholly upon false or perjured testimony, or for the palpable frauds alleged. The court held (affirming the views expressed by the circuit court in 4 Saw., 51-3), that the frauds for which the judgment of tribunals could be impeached are "frauds extrinsic, or collateral to the matter tried by the first court, and do not extend 'to a fraud in the matter on which the decision is rendered.'" Said the court, after citing and commenting on the authorities:

"We think these decisions establish the doctrine on which we decide the present case, namely, that the acts for which a court of equity will, on account of fraud, set aside or annul a judgment or decree, between the same parties, rendered by a court of competent jurisdiction, have relation to frauds, extrinsic or collateral, to the matter tried by the first court, and not to a fraud in the matter on which the decree was rendered.

"That the mischief of retrying every case in which the judgment or decree rendered on false testimony, given by perjured witnesses, or on contracts or documents whose genuineness or validity was in issue, and which are afterwards ascertained to be forged or fraudulent, would be greater, by reason of the endless nature of the strife, than any compensation arising from doing justice in individual cases." (98 U. S., 68.)

The same rule was adopted in Vance *vs.* Burbank, which also went up from this circuit, and the principle applied to the decision on a question of residence, and of fraud, decided by the United States Land Office, where one private party sought to control, for his own use, the title granted to another, upon alleged frauds practiced while obtaining the patent. Said the court, by the Chief Justice: "The appropriate

officers of the Land Department have been constituted a special tribunal to decide such questions, and their decisions are final to the same extent that those of other judicial, or quasi-judicial, tribunals are.

"It has also been settled, that the fraud in respect to which relief will be granted in this class of cases must be such as has been practiced on the unsuccessful party, and prevented him fr m exhibiting his case fully to the Department, so that it may properly be said, there never has been a decision in a real contest about the subject-matter of inquiry. False testimony or forged documents, even, are not enough, if the disputed matter has actually been presented to, or considered by, the appropriate tribunal. (United States *vs.* Throckmorton, 98 U. S., 61; Marques *vs.* Frisby, *supra.*) The decision of the proper officers of the Department is in the nature of a judicial determination of the matter in dispute.

"The operative allegation in this bill is of false testimony only. * * * * No fraud is charged on the register and receiver, or on the heirs of Perkins, in respect to the keeping back of evidence." (Vance *vs.* Burbank, 101 U. S., 519.)

Thus the decisions of the Land Office on application for patents were put upon the same footing as judgments and decisions of courts, and other tribunals like the Board of Land Commissioners. The only difference between this case and the other is, that in the first the United States and in the other the complaint, actually appeared—the United States not appearing—and were heard, while in this the United States did not formally appear as a contestant. But the principle is the same, only the mode of proceeding being different. In the Flint and Throckmorton cases the claimant under his grant, the treaty with Mexico, and the statutes of the United States, petitioned the Board for a confirmation of his grant. In this, the purchaser, under and in conformity to the statutes, applied to the Land Office for leave to purchase, as did the party in Vance *vs.* Burbank, and the Land Office, representing the United States, in due form heard the proofs, and determined the question of the right to purchase. In Vance *vs.* Burbank, the complainant intervened in fact, as he had a right to do under the law, and contested the right of his opponent. But the United States was not a party in any sense other than reported in this case. So in the present case anybody claiming an adverse interest had a right to intervene, but nobody seems to have done so. The proceeding was in the nature of a proceeding *in rem*, of which everybody takes notice. The hearing was regularly had, and decided in favor of complainant White, and the only fraud, if any there was, "was in the matter on which the decision was rendered," and not "extrinsic or collateral to the matter tried" and determined in the Land Office. The action of the Land Office is judicial in its nature. (Smelting Co. *vs.* Kemp, 104 U. S., 640.)

I can perceive no good reason why the principle should not apply to this case as well as to the others, and especially to the case of Vance *vs.* Burbank. That is the logical result of the principle established by the decisions cited, and I think the principle sound, and upon the whole, safe. Again, it is a principle, that, with reference to private parties, a court of equity will not grant relief against a fraud, unless it appears that some damage or injury has been sustained by reason of the fraud; for "courts of equity do not, any more than courts of law, sit for the purpose of enforcing moral obligations, or correcting unconscientious acts, which are followed by no loss or damages." (1 Sto. Eq. Ju., 203.) And when the United States enters the court as a litigant. * * * "it stands upon the same footing with private individuals." (U. S. *vs.* Throckmorton, 4 Saw., 43. It does not appear that the United States has been pecuniarily injured by the alleged fraud. No injury or damage is alleged, or in any way shown. The land was for sale to any authorized pre-emptioner, at $1.25 per acre. Defendant paid the full amount of the purchase-money, and it went into the United States treasury. The Government got all it would have obtained from any other party. It does not appear that anybody else had any rights, or wanted to purchase, or that the United States was under any obligation to patent the land to any other person. There is no possible pecuniary injury to complainant. The most that can be said is, that a principle of public policy was violated, and thereby a moral wrong resulted by reason of the legal disqualification, under the pre-emption act, of complainant to purchase. But the wrong was only *malum prohibitum*, not *malum per se.* It is by no means clear that the demurrer ought not to be sustained on this ground, but it is unnecessary to so decide now, for in my judgment it is not a case to be taken out of the rule established in the cases cited, of Throckmorton and Vance. In view of the notorious liberality in favor of purchasers, not to say looseness, with which the pre-emption laws have, ever since their adoption, been administered all over the Western States, to relax the rules referred to in the authorities cited, especially where no actual pecuniary damage or injury has resulted, either to the Government or private parties, and "retry every case in which" the action of the Land Office, as well as "judgments or decrees, rendered on false testimony given by perjured witnesses, or on contracts or documents whose genuineness or validity was in issue, and which are afterwards ascertained to be forged or fraudulent," would open a Pandora's box of evils "far greater than any compensation

arising from doing justice in individual cases." It would open the door to any party stimulated by malice or other unworthy motive, who could, upon *ex parte* and false statements, obtain the ear of the Attorney-General to promote suit in the name of the United States to the great vexation of honest as well as dishonest pre-emptors, and to the great detriment of the public peace and prosperity.

Again, the claim is stale, although statutes of limitation do not run against the Government, yet the staleness of the claim may be taken into consideration in determining the question, whether a court of equity should interfere and grant relief, where the United States, as well as a natural person, is the complainant. When the United States comes into a court of equity as a suitor, it is subject to the defenses peculiar to that court. (U. S. *vs.* Tichnor, 8 Saw., 156; U. S. *vs.* Flint, 4 Saw., 58–9; Badger *vs.* Badger, 2 Wall., 94; Stearns *vs.* Page, 7 How., 829.) Under the State law, this suit, if between private parties alone, would be barred within three years. (Manning *vs.* San Jacinto Tin Co., 7 Saw., 430.) Six years elapsed between the issue of the patent and the filing of the bill, and no averment is made to show that the fraud was not discovered, or by the exercise of ordinary diligence in the Land Office might not have been discovered, immediately after its consummation.

The money received is retained, and no tender appears to have been made, nor is any offer to refund the money made in the bill. The United States, like an individual, when it comes into court and demands equity, must do equity, or at least offer to do equity. It has received the full value of the land in money—the same amount that it would have received had the land been sold and patented to an admittedly qualified purchaser. It cannot keep the money and in a court of equity demand and receive a return of the land.

To meet this point, and as a basis for a decree of forfeiture of the money, as a part of the relief demanded in the bill, the United States attorney relies on Section 2262, R. S., which provides that, "if any person taking such oath swears falsely in the premises he shall forfeit the money which he may have paid for such land, and all right and title to the same."

This is highly penal and the only remedy, or rather punishment, other than an indictment for perjury, that appears to be provided by law for the wrong sought to be redressed.

But the United States has come into the wrong forum to enforce this penalty. "It is a universal rule in equity never to enforce either a penalty or forfeiture. (2 Sto. Eq. Ju., Sections 1319, 1494, 1509.) So a bill of discovery will not lie in a case which involves a penalty or forfeiture. (Ib.) As an answer on oath is not waived this bill is, in that particular, a bill of discovery and demurrable on that ground also. If the United States desires to enforce the penalties—the forfeiture of the money paid and the land patented—provided for in section 2262, R. S., cited, it must proceed in some appropriate mode at law, where the defendant will be entitled to a trial by a jury of the question as to giving false testimony.

In my judgment, the demurrer should be sustained and the bill dismissed; and it is so ordered.—*Pacific Coast Law Journal.*

UNLAWFUL OCCUPATION (FENCING) OF PUBLIC LANDS.

The decision referred to on page 1172 by Mr. Commissioner McFarland, in the matter of fencing public lands, was made by Chief Justice J. B. Sener in the U. S. District court for the first district of Wyoming Territory at August term, 1883.

In district court of the United States for the first district of Wyoming Territory.

THE UNITED STATES *vs.* ALEXANDER SWAN, THOMAS SWAN, Z. THOMMASSON, AND C. E. ANTHONY.

Sener, judge:

This case is here upon the amended bill filed by the complainant on the 13th of June, to which the respondents filed a demurrer on the 25th day of July, 1883, and upon which demurrer argument was heard by the court on the 1st day of August, 1883. In view of the magnitude and novelty of the questions involved, time, care and study have been bestowed upon them, to the end that the best reflection and the best lights might be brought to bear for their solution.

The demurrer has been argued by the respondents from the standpoints that the bill of the complainant is deficient in form and substance. As to form, that it is uncertain and vague; as to substance, that it fails to state such a case, even in bad form, as to entitle the complainant either to the discovery or relief which it seeks. The respondents claim that the bill should with clearness and accuracy show title in the complainant, and that this should be coupled with an allegation that by reason of withdrawal from settlement these citizens have no right to go upon these lands under

the laws of the United States as for mining and other proper purposes for which the laws provide.

This objection the court thinks not well taken, because the bill in its entirety shows for all the purposes of a demurrer that these parties are there wrongfully and unlawfully, which excludes the idea that these respondents have a right to be upon these lands.

Besides, the bill further alleges that all the even sections in two certain townships, except parts of two and twenty-two, are part of the public domain, and then proceeds to aver that said lands are now held for disposition under the land laws of the United S ates; and if they are open to settlement and disposition this excludes the idea that the respondents can be upon them lawfully, since the bill further charges the encroachment and intrusion upon these lands unlawfully.

The respondents claim that the bill is wholly uncertain in its meaning, in not showing what is meant by said lands as used in the charging part of the third clause of the amended bill, they claiming that, as used, the expression "said lands" is vague, uncertain, and indefinite.

Upon an amended bill the court thinks it would be better to make this averment clearer. The respondents also object that the bill is uncertain and vague, in not showing what parts of sections two and twenty-two the complainant has title to, the bill only claiming a part and not all of said section.

This objection is well taken. This bill is an application for an injunction order. Although there is a map filed with the bill and made a part of it as an exhibit, showing the land encroached upon, and intruded upon, yet the map is fatally defective as to section two, certainly in not showing how much of said section belongs to the United States and how much does not belong to the United States. As to section twenty-two, if the marks and letters "E" in the map are to be considered as the excepted parts, less trouble might be had as to this section, but in a bill of this importance, where an injunction is asked for, the court ought to have before it such a clear and indisputable showing as to what is complained of, as that in the event of its granting injunctive relief its order could plainly and with reasonable certainty point out what it is that should be abated, and what it is that should be restrained. In this bill this is not done. As is charged by the respondents, and as was admitted by the complainant in its argument, the bill in this respect is vague and uncertain, and for this reason the court thinks the demurrer ought to be sustained.

The respondents object that the bill wholly fails to show that the fence was built on or across the same sections of land before referred to. It alleges that it was built on certain even and odd numbered sections, in certain townships and ranges, but wholly fails to show that said districts were north, or that the ranges were west of the sixth principal meridian, or where the ranges are.

In an amended bill it might be well to show this; but the allegation contained in the bill that these sections in certain townships and ranges, are within Laramie County, and in the jurisdiction of the first judicial district of this territory, probably would be sufficient.

This case having been twice argued, both upon the structure of the bills and the sufficiency of any bill to give the United States the relief it seeks in this forum upon a proper bill, it seems to the court not just longer to withhold its opinion upon the right of the complainant to relief in cases like this in equity and by injunction. At the first argument the counsel for the Government, the able district attorney for Wyoming, held to the idea that it was a purprestnre and not a public nuisance. In the latter argument the learned assistant for the Government, Judge Brazee, held to the theory that the acts charged were a public nuisance. This view was stoutly resisted by the counsel for respondents.

According to Lord Coke, purprestnre was defined to be a close or inclosure, that is where one encroaches or makes that several to himself, which ought to be common to many. It is laid down by all the old writers that it might be committed either against the king, the lord of the fee, or any other subject.

In its common acceptation it has been applied to any encroachment upon the king, or any part of his domestic lands, or in the highways, rivers, harbors, or streets.

The distinguished counsel who argued for the respondents with so much learning and great zeal, contended that while there might be an appropriation of these lands by the respondents, so far as this bill shows, yet there was nothing in the bill, or deducible from it, to show that these lands are common to many, and that no adjudicated cases in this country on this question of purprestnre went further than to apply the doctrine as Lord Coke applied it to encroachments upon highways, rivers, harbors, and streets.

In the view which we take of this case, it may be unnecessary in order to give the court jurisdiction, to refer it absolutely to either of these branches of equity jurisprudence. The doctrine of relief in equity is now applied both by the English and American courts to any case in which there is an abuse of power given for public purposes, or when there is acting adversely to public policy. It is true this doctrine in English

and American chancery has grown up in the necessity of placing restraints on great corporations to prevent them from doing acts detrimental to the public welfare or hostile to the public policy. Lord Eldon, in Blackmore against Glamorgan Canal Navigation Company, stated it to be a sound and well-recognized equitable principle, "that parties shall do and forbear all that they are required to do, and forbear as well with reference to the interests of the public as with reference to the interests of the individual."

Quoting Lord Cottenham: "It is the duty of the chancery court to adapt its practice and course of proceedings as far as possible to the existing state of society and to apply its jurisdiction to all those new cases which from the progress daily making in the affairs of men must continually arise, and not from too strict adherence to forms and rules established under very different circumstances, decline to administer justice and enforce rights for which there is no other remedy." (1 Myhre & Co., 559, 4 idem, 141, 635.)

It is in this spirit that the supreme court of Pennsylvania spoke and acted in the case of Kerr *vs.* Frego, 47 Penn., 292, Chief Justice Lowry delivering the opinion of a unanimous court as far back as 1864, when he said:

"This remedy (meaning the remedy by injunction) extends to all acts that are contrary to law and prejudicial to the community, and for which there is no *adequate* remedy at law."

In this case, for all purposes of the demurrer, it is conceded that the respondents have, without authority of law, wrongfully taken possession of the public lands of the United States, fenced them in, and thus prevented the exercise, or the power, or the authority, or the enforcement of the homestead, pre-emption, and desert-land laws of the United States, as the case may be, within these lands so inclosed wrongfully and unlawfully, and so separated and fenced and converted to the wrongful and unlawful use of these respondents.

A specific injury to the public is averred in the bill, which is that the rights of the homesteaders, the pre-emptors, and parties lawfully seeking to reclaim the desert land of the United States, may be hindered and prevented, if not entirely denied their rights, by the building of these fences.

If it be answered that the parties who are fencing these lands unlawfully, may be doing a benefit to these lands, it is sufficient to say in reply that they are fencing and building more than the policy of the land laws of the United States allows to four people. As to what constitutes such an injury as gives a court of equity in such a case jurisdiction, we cannot do better than quote the language of Chief Justice Ryan in the case of the Attorney-General against the Railroad Companies, 35 Wisconsin, 552:

"The acts of the defendants charged give the jurisdiction, and it is for the court to judge of the consequent evil. It is not the averment of the pleaders, but the nature of the acts pleaded, which is material in the question of public injury. The conscience of the court must be satisfied, and may be satisfied or not, with or without averment."

If an information should aver public mischief where the court could see that there was none, the averment would go for nothing.

So without averment it suffices that the court can see the public injury. As in that case the court says: "It is hardly questioned that in these cases a public injury is apparent in the acts charged against these defendants." So may we repeat here: Directly or indirectly, this injury reaches many. Continuing, that able court says:

"We can only see the direct public injury, and the acts charged satisfy the conscience of the court of the public injury. If the acts be illegal, that is sufficient."

Upon the question of the right of a court of equity to enjoin a great public wrong the same supreme court (35 Wisconsin, page 534) further says, after speaking of the jurisdiction to enjoin private wrong at the suit of the person wronged: "It is almost a logical necessity to admit the other branch of the jurisdiction to enjoin at the suit of the State such a general wrong common to the whole public as interests the State, and could be remedied by private person only by a vast multitude of suits, only burthensome to each and impracticable for (their) very number, more conveniently, effectually and properly represented by the attorney-general as *parens patriæ*. But jurisdiction of informations of this nature has sometimes been denied here; courts of equity in this country, singularly enough, being sometimes more timid to control corporate power, and less willing to protect the public against corporate abuse than the English chancery. In both branches, says the court, of this jurisdiction, it proceeds as for *quasi* nuisance; and it is difficult to understand why the jurisdiction should be asserted as to private nuisance and denied as to public nuisance. But fortunately we find this wholesome jurisdiction sustained here by the great weight of authority, and with modern experience we deem it only a question of time when it must be universally asserted and exercised."

But do the acts charged in the bill of complaint, and for all the purposes of this hearing treated upon demurrer as true; constitute a public nuisance?

In 1837 the supreme court of Alabama, in the case of the State of Alabama against

the mayor and aldermen of the city of Mobile (5 Porter, 299), Collier, chief justice, delivering the opinion of the court, hold the right of chancery to exercise its jurisdiction in case of a nuisance, in restraining the exercise or erection of, and in some instances to abate that from which irreparable damage to individuals or *great public injury would ensue.* The court further said: "Courts of equity can interpose to restrain and prevent such nuisances threatened, or in progress, as well as abate those already existing, and by perpetual injunction the remedy is made complete through all future time; whereas an information or indictment at common law can only dispose of the present nuisance, and for future acts new prosecutions must be brought; and in the next place remedial justice may be prompt and immediate before irreparable mischief is done; whereas at law nothing can be done except after trial and upon the award of judgment."

In 1860 the supreme court of Georgia cited with approval this case, and said, in Mayor and Council of the City of Columbus *vs.* Arnold (30 Georgia, 508): "It is claimed that no such jurisdiction exists because the remedy at common law is adequate and complete by indictment," etc. It answered by citing approvingly this statement in Story's equity: "The grounds of this jurisdiction of courts of equity in cases of purpresture, as well as of public nuisance, undoubtedly is their ability to give more complete and perfect remedy than is attainable at law," etc. And also Eden on Injunctions to this effect, "that the remedy for this species of injury is by information of intrusion at common law or by information of the attorney-general in equity."

In addition to the foregoing the supreme court of Georgia, in this case, added as a reason why a remedy by indictment might be unavailing, the influence and integrity of the gentlemen against whom an indictment might lie would more than likely protect them before a jury.

In regard to public nuisance, the supreme court of New Jersey (1 Stockton, page 523), Attorney-General against Hudson River Railroad Company, decided in 1853, state that the jurisdiction of the courts of equity in regard to public nuisances seems to be of very ancient date, and has been definitely traced back to the reign of Queen Elizabeth.

Is the building of such a fence on the public lands a public nuisance as well as a public wrong? Blackstone defines a nuisance to be anything that worketh hurt, inconvenience, or damage; and Bacon defines a nuisance as anything that annoys, incommodes, or offends—anything that renders the enjoyment of life and property uncomfortable; and Brown, "anything which unlawfully annoys or does damage to another." A nuisance is either public or private. A public or common nuisance is such as affects or interferes with the king's subjects in general. Tried by these definitions, can there be any doubt that an inclosure of the Government domain, held either for the benefit of all the people, or else under the terms of the bill, as admitted by the demurrer, held for disposition and sale for the benefit of the settler, whether in his character as a homesteader, pre-emptor, or as one reclaiming the waste lands of the desert, is a great public nuisance, is an infringement of public right, and as such can be relieved against, if not by abatement, action for damages, or criminal prosecution, certainly by the more speedy, powerful, and all-sufficient remedy of injunction? But it is contended by the learned counsel for the respondents that there may be a remedy at law, and therefore no remedy in equity lies.

Our answer to the learned counsel is in the language of Judge Collier, in Alabama, in the case hereinbefore cited: Not that there may not be a remedy at law, but that in such cases the jurisdiction of the courts of equity is predicated upon the ground of the ability of equity to give a more complete and perfect remedy than is attainable at law. The relief is not grantable because, *strictissimi jnris*, there may be no remedy at law, but is grantable because there is a remedy more adequate in equity.

While courts of equity will hesitate, and have hesitated in England and in this country, in cases of public nuisances to act except in strong cases, yet they will always speak with no uncertain sound, and should so speak, where the public rights are invaded or a great public nuisance is threatened or in existence.

Are the acts complained of a purpresture? The supreme court of Wisconsin, in the case of the Attorney-General *versus* the Railroad Company, before cited (35 Wisconsin, page 532), going a step beyond the old-time technical definitions, perhaps, and applying the law to new necessities, after the spirit of Lord Cottenham, before quoted, says: "Any intrusion upon public right is in the nature of a purpresture." Such is, we think, sound equity at this day. That eminent jurist, Cooley, in the case of the Attorney-General against the Evarts Booming Company (34 Michigan, page 472), says: "A purpresture may be defined as an inclosure by a private party of *a part of that which belongs to and ought to be open* and free to the enjoyment of the public at large." Surely a better definition of the public domain of the United States could not be made; and, further, he says that "a purpresture is not necessarily a public nuisance."

A public nuisance is something which subjects the public to some degree of inconvenience or annoyance, but a purpresture may exist without putting the public to any inconvenience whatever.

The fencing of these lands, their withdrawal from settlement under the homestead, pre-emption, and desert land laws, not only subjects the public to some degree of inconvenience and annoyance, but it is an inclosure of that which belongs to or ought to be left free to the public, so that all the public may go thereon until some one lawfully segregates it and makes it his own; and if it can be decided that such a remedy as injunction does not lie in a case like this, then, not only might these respondents fence up such large tracts of land as are mentioned in the bill and keep them fenced, as by their demurrer is admitted, but other citizens singly or in small groups might do likewise, and so the authority of the Government might be set at naught, and the rights of the immigrant and the citizen coming to these plains to take up small portions of land under the laws of the United States would be utterly unavailing.

The learned counsel for the respondents objects that the fourth clause of the bill, while alleging that the respondents have intruded and encroached upon a part of the public domain, does not show what part of the public domain they have intruded and encroached upon. To this it may be sufficient to reply that the map filed with and made a part of the bill would seem to point out the encroachment and intrusion, but lack of definiteness in this respect may be supplied in an amended bill by describing the fencing by words showing what line or lines on the map were intended to point out the fence or fences complained of.

To the argument of the learned counsel for the respondents that the act of so encroaching or intruding is not shown to be in any manner wrongful or unlawful, it seems only necessary to say that the words "intrusion" and "encroachment" of themselves mean an unlawful going upon the rights or possession of another, as when a man sets his fence beyond his line—*vide* Bouvier's Law Dictionary, "Encroachment."

To the objection that the United States is only entitled to the same remedies for the protection of its property as an individual, we think the best answer is to be found in the words of Justice Miller in the case of the United States against Duluth, First Dillon, 471: "If the allegations of this bill be true, we have no doubt of the right of the officers of the Federal Government to bring this suit in the name of the United States, and to protect her rights, and we deem it a much more appropriate mode of doing so than by the physical force of the War Department." Not only may equitable intervention on the part of the court prevent this, but any attempt at force by parties thinking themselves entitled to enter on these lands under the respective land laws of the United States.

To the suggestion that an individual could not maintain a suit for an injunction on a bill such as is filed in this case, it would be sufficient to say that no individual could stand in relation to any other individuals possibly as in this case, unless it might be that of a trustee holding for others; and surely it would not be denied that a trustee would have the right to resort to a court of equity to protect the lands of his *cestuis que trusts* from such intrusion and encroachment, if they were threatened or being persisted in by many parties, rather than to drive such *cestuis que trusts* to a multiplicity of actions on the law side of the court. May not the United States under their liberal land law system be deemed as but holding these lands in trust for those who under their laws are ultimately entitled to them, and so not only may not the United States, but ought not the United States to protect as well as defend these lands for those ultimately entitled to them?

To the objection that injunction will not lie in this as in a case of purpresture, because of the common law definition of purpresture, the answer is to be found in the decisions in which, in Wisconsin and elsewhere, it is held that a purpresture (already quoted) is any intrusion of public right. Any intrusion of public right, while not probably strictly a purpresture, is in the nature of purpresture and as such is enjoinable.

To the objection that irreparable injury must be shown to entitle the court to jurisdiction, we think we may only repeat the words of the supreme court of Wisconsin, 35 Wis., case hereinbefore quoted, page 552: "Such an inquiry in such a case is a conclusion of fact rather than a fact. The conscience of the court must be satisfied, and may be satisfied with or without averment." In this case a public injury is apparent in the acts charged against these defendants and admitted by the demurrer, in that eleven even-numbered sections, a part of the public domain, are withdrawn by the intrusions and encroachment of these defendants from settlement under the land laws of the United States. Leaving out of view the timber-culture laws, this intrusion and encroachment may deprive eleven persons of their rights to reclaim and settle upon this land if it be simply desert land. If it be such as is open to the homesteader, forty-four persons may be deprived of their rights under the laws of the United States, and if pre-emptors forty-four persons may be deprived. The character of the land is not shown in the averments of the bill. Surely this statement is sufficient to show the great public injury, the wrongfulness and unlawfulness of the inclosure being admitted by the demurrer. To the objection that injunction will not lie in any case of trespass with no other elements in the case than are contained in the amended bill, it may be sufficient to answer that this bill alleges not only a trespass and a wrong, but a con-

tinuing wrong, against the Government of the United States and against such of its citizens as may be entitled to this land under the homestead, pre-emption, or desert-land acts, and that the ouster of the Government is not only a mere trespass, which is an unlawful act committed by violence by one private individual against another, but is in this case an act of disregard and of unlawful dispossession, encroachment, and intrusion upon the lawful power and authority of the Government of the United States, this additional element never being found where one individual trespasses upon another merely.

The learned counsel for the respondents maintained that as there was no right of common to the citizens of the public domain, the United States holds such public domain as property for disposition, and no prerogative remedy is given it to protect such property, citing several authorities, the last one being 37 Wisconsin, Attorney-General *versus* Eau Claire, 446, 447.

The learned counsel must have misconceived that reference. What the court there says we will quote; it was speaking of public rivers: "They are highways; they are in charge of the State, and the State cannot abdicate its charge of them. That charge is a duty to the Federal Government and a trust for the whole people, not of the State only, but of the several States. An unauthorized encroachment upon any of them is a violation of the duty assumed by the State in its aggregate and sovereign character to keep them forever open." "Every such encroachment is a purpresture which concerns the solemn prerogatives of the State and the prerogative jurisdiction of this court. Original jurisdiction of such cases here is too manifest for discussion." In Wisconsin, under their then constitution, the supreme court had original jurisdiction in cases of injunction, it is proper here to say.

It is true that none of the cases cited and relied on in this opinion are upon questions exactly such as that raised in the argument upon the bill and demurrer here.

But the doctrines enunciated and the language employed, even if it be conceded that they are in every case mere *obiter dicta*, which is not admitted, yet they are so convincingly persuasive and seem to the court so well in point in restraining what to the court seems to be so great a public wrong, that with becoming diffidence, and yet with sufficient confidence in their authority by persuasion, the court adopts them and makes them applicable to the case at bar.

Having answered all the objections of the counsel, and reached conclusions in this case, at least to its own satisfaction, the court proceeds now to say that upon the filing of an amended bill, for which on application leave will be given, and if an amended bill when so filed shall have the errors hereinbefore pointed out corrected, and shall show on its face that the United States district attorney for Wyoming acts under the direction of the Attorney-General of the United States in bringing such a bill, which statement this bill does not contain, this court will hold that a remedy by injunction does lie in such a case, provided the facts are such as are admitted by the demurrer to this bill, and are averred according to the well known rules of equity courts, and such bill shall be otherwise conformable to equity and the statutes of Wyoming governing equity practice. The demurrer to this bill must be sustained for the defects hereinbefore pointed out.

STATES AND TERRITORIES, 1776 TO DECEMBER 1, 1883.

[See Chapter XXXIII, pages 416 to 464.]

The Territories remain as on pages 452 to 464, no changes in boundaries except in the case of Dakota, where the southern boundary of that Territory, being the northern boundary of Nebraska, was changed so as to conform to natural boundaries. (See act approved March 28, 1882.)

AREA AND POPULATION.

The area as given on pages 28 and 29, and 452 to 464, is correct to December 1, 1883. The population as shown on pages 28 and 29 is correct to 1880, the date of the last national census.

NO NEW STATES SINCE 1880.

No State has been admitted into the Union since June 30, 1880. The matter on pages 416 and following is correct to December 1, 1883. The present Territories are New Mexico, Utah, Washington, Dakota, Arizona, Idaho, Montana, Wyoming. Alaska not organized. Indian Territory (not a political division under law of Congress as are the eight above mentioned), the "public land strip," and the District of Columbia.

FUTURE STATES.

The eight organized Territories will probably be admitted into the Union as ten or eleven States—Dakota forming, with parts of Montana and Wyoming, four States, one of which will probably be called Lincoln, one Dakota, and one Pembina, and the other Garfield. The vast arid regions embraced within the lines of some of these Territories necessitate large State boundaries. Nomadic life is consequent upon an arid region, and no dense population can be sustained in many of the Territories. The precious metal mining regions, generally in the foot-hills or mountains, contain large populations, but in many instances the food and supplies used therein are transported from States of the arable region. The enormous area of some of the Territories might be a standing menace to the balance and perpetuity of the Union, were the lands agricultural without irrigation, as are the lands of the Mississippi Valley, and therefore capable of sustaining a population, as for illustration, equal in numbers per square mile to the population of the State of Illinois. They might become nurseries for future republics. But large areas in these regions are balanced by sterility. The Union when the present Territories are admitted into the Union will probably consist of the present thirty-eight States, an additional State, "Lower California," from the southern half of the present State, and two States perhaps Western and Northern Texas, from the State of that name, and in addition the States of New Mexico, Utah, Washington, Dakota (and from the remainder the States of Lincoln and Pembina and Garfield), Arizona, Idaho, Montana, Wyoming, Alaska (with another name perhaps), Indian Territory as Okolohoma; in all, fifty-four States. The "Public land strip" will become a part of Kansas or Indian Territory, and the District of Columbia be the one remaining Territory. New Mexico and Utah have been Territories for thirty-three years, Washington thirty years, Dakota twenty-two years, Arizona and Idaho twenty years, Montana nineteen years, and Wyoming fifteen years.

Before the end of the century it is probable that the nation will be completed, and all of the Territories rounded into States. The wants and necessities of political parties, however, frequently create or prevent the admission of States, and they may all be admitted before ten years. Alaska may not be the last admitted. The field of adventure is now so limited for prospectors and pioneers that her gold fields, furs, and timber wealth may induce a rush and consequent large population. A name, signifying something in the history of the United States, might be substituted for Alaska. In the naming of our States and Territories, with the exception of Washington, names connected with our National history have been carefully avoided. Why, will be a query for the future historian. A few Indian names have fortunately crept in, so that some of our States will have American or aboriginal names.

RATIO OF REPRESENTATION.

Each State in the Union is entitled to not less than one member of the House of Representatives. The following table will show the number of persons requisite for a Congressional district during the several decades to 1880. By reference to pages 28–29 and pages 416 to 452 the dates of admission of the several States will be found.

ENACTED BY CONGRESS AND BASED ON RETURNS OF THE NATIONAL CENSUS.

	Persons.
The ratio of representation from 1793 to 1803 was 1 Representative for every..	33,000
The ratio of representation from 1803 to 1813 was 1 Representative for every..	33,000
The ratio of representation from 1813 to 1823 was 1 Representative for every..	35,000
The ratio of representation from 1823 to 1833 was 1 Representative for every..	40,000
The ratio of representation from 1833 to 1843 was 1 Representative for every..	47,700
The ratio of representation from 1843 to 1853 was 1 Representative for every..	70,680
The ratio of representation from 1853 to 1863 was 1 Representative for every..	93,423
The ratio of representation from 1863 to 1873 was 1 Representative for every..	127,381
The ratio of representation from 1873 to 1883 was 1 Representative for every..	131,425
The ratio of representation from 1883 to 1893 is 1 Representative for every....	154,325

POPULATION OF THE SEVERAL STATES AT DATE OF ADMISSION INTO THE UNION.

It will be noticed by the table below that several of the States, at the date of their admission, did not have the number of persons requisite to entitle them to a member of the House, based on the ratio of representation. The population of many of these States at the date of their admission is estimated, and the data used was undoubtedly the population reported by the preceding census:

State.	Admitted.	Population.
Vermont	1791	85,425
Kentucky	1792	73,677
Tennessee	1796	77,262
Ohio	1802	41,915
Louisiana	1812	76,556
Indiana	1816	63,897
Mississippi	1817	75,448
Illinois	1818	34,620
Alabama	1819	144,317
Maine	1820	298,269
Missouri	1821	66,557
Arkansas	1836	52,240
Michigan	1837	200,000
Florida	1845	54,477
Texas	1845	250,000
Iowa	1846	81,920
Wisconsin	1848	210,596
California	1850	107,000
Minnesota	1858	150,042
Oregon	1859	52,465
Kansas	1861	107,206
West Virginia	1863	376,683
Nevada*	1864	6,857
Nebraska (estimated)	1867	60,000
Colorado (estimated)	1876	150,000

*At the census of 1870, 42,491.

REPORTS AS TO RESOURCES OF THE TERRITORIES.

For a valuable series of reports as to the resources and wants of the several Territories see the reports of the surveyors-general of the several Territories made to and included in the annual reports of the Commissioner of the General Land Office for the years 1850 to 1883. Also see annual reports of agents and superintendents of the Indian service, in the reports of the Commissioner of Indian Affairs for 1850 to 1883. Also see annual reports of the governors of the several Territories to the Secretary of the Interior, included in the annual reports of the Secretary of the Interior from 1877 to 1883. This system of reports from governors of Territories was inaugurated by Secretary Schurz.

Officers of the Territories appointed by the President, confirmed by the Senate, and paid by the United States, December 1, 1883.

[Secretary acts as governor during absence of governor.]

GOVERNORS AND SECRETARIES.

Name and office.	Whence appointed.	Date of original appointment.	Date of present appointment.	Compensation.
ARIZONA.				
Frederick A. Tritle, governor	Nev	Feb. 6, 1882	Feb. 6, 1882	$2,000
Hiram M. Van Arman, secretary	Cal	Mar. 17, 1882	Mar. 17, 1882	1,800
DAKOTA.				
Nehemiah G. Ordway, governor	N. H	May 22, 1880	May 22, 1880	2,600
James H. Teller, secretary	Ohio	Feb. 21, 1883	Feb. 21, 1883	1,800

Officers of the Territories appointed by the President, &c.—Continued.

GOVERNORS AND SECRETARIES—Continued.

NEW MEXICO.				
Lionel A. Sheldon, governor	Ohio	May 5, 1881	May 5, 1881	2,600
William G. Ritch, secretary	Wis	Mar. 18, 1873	June 28, 1880	1,800
UTAH.				
Eli H. Murray, governor	Ky	Jan. 27, 1880	Jan. 27, 1880	2,600
Arthur L. Thomas, secretary	Pa	May 2, 1879	May 1, 1883	1,800
WASHINGTON.				
William A. Newell, governor	N. J	Apr. 26, 1880	Apr. 26, 1880	2,600
Nicholas H. Owings, secretary	Col	Feb. 5, 1877	Feb. 5, 1881	1,800
WYOMING.				
William Hale, governor	Iowa	Aug. 3, 1882	Aug. 3, 1882	2,600
Elliott S. N. Morgan, secretary	Pa	Mar. 10, 1880	Mar. 10, 1880	1,800

OTHER UNITED STATES OFFICERS IN THE TERRITORIES.

The judges, a chief justice and two associates, except in Dakota where there are three associates, are appointed by the President, confirmed by the Senate, and paid by the United States. The district attorney and United States marshal for each Territory are also appointed, confirmed, and paid in the same manner. These, with the executive officers above set out, are the United States officers for Territories. District land officers, collectors of customs, postmasters, and internal-revenue officers are appointed by the President as in the States, and under general laws relating to these different subjects.

LEGISLATION AS TO THE TERRITORIES.

[1876 to December 1, 1883.)

Much general legislation in relation to the several Territories was passed during the Forty-fourth, Forty-fifth, Forty-sixth, and Forty-seventh Congresses, generally in the matter of court terms, repeal of enactments of legislative assemblies of the Territories (the laws of such are reported to Congress after each assembly session for approval or rejection), and regulating the sessions of the legislative assemblies of the several Territories; this last in 1879–1880, also creating new land districts. The date of their creation is shown on pages 555, 556, and also the legisation making the commission to regulate elections in Utah in the Forty-seventh Congress, first session. The action of the Forty-sixth and Forty-seventh Congresses as to the admission of Territories into the Union as States is given in full.

NEW MEXICO.

(See page 452.)

In the Forty-fourth Congress, 1875–'76, the bill introduced by Hon. Stephen B. Elkins, the Delegate from the Territory of New Mexico, in the House of Representatives, for its admission into the Union, failed to become a law only by non-action of the Senate.

Forty-sixth Congress, third session, Senate, December 21, 1880 (Congressional Record, page 286). Mr John J. Ingalls, of Kansas, introduced, by unanimous consent, bill S. No. 1949, to enable the people of New Mexico to form a constitution and for her admission into the Union. Read twice by its title, and referred to the Committee on Territories and ordered to be printed.

Forty-seventh Congress, first session, Senate, December 7, 1881 (Congressional Record, page 51). Mr. J. J. Ingalls, of Kansas, asked and obtained unanimous consent to introduce a bill for the admission of the Territory of New Mexico into the Union. Ordered to lie on the table subject to call of Mr. Senator Ingalls.

Forty-seventh Congress, first session, House of Representatives, December 19, 1881 (Congressional Record, page 207). Mr. T. Luna, of New Mexico, introduced bill H. R. No. 1922, for the admission of the Territory of New Mexico into the Union as a State. Read first and second times, ordered printed, and referred to the Committee on the Judiciary; reference changed to Committee on Territories January 24, 1882.

UTAH.

(See page 453.)

Forty-sixth Congress, first session, House of Representatives, May 6, 1880 (Congressional Record, page 1089). Mr. Geo. Q. Cannon, of Utah, introduced bill H. R. No. 1757, to enable the people of Utah Territory to form a constitution and State government, and for the admission of said State into the Union on an equal footing with the original States. Read first and second times and referred to the Committee on Territories, and ordered to be printed.

Forty-seventh Congress, first session, House of Representatives, June 23, 1882 (Congressional Record, page 5282). The Speaker laid before the House a memorial from the delegate convention of the Territory of Utah, asking Congress to admit the Territory of Utah into the Union as a State, which memorial was accompanied by a draft of a constitution for said State, said to have been approved by the citizens of that Territory. Referred to Committee on Territories and ordered to be printed.

Petitions were filed during the session for and against the admission of Utah as a State.

Forty-seventh Congress, first session, Senate, February 20, 1882 (Congressional Record, page 1284). Mr. E. G. Lapham, of New York, introduced bill S. No. 1263, to amend the act establishing a Territorial government for Utah, passed September 9, 1850, and amendments, and to change the name to "Altamont". Read twice by its title, and referred to the Committee on the Judiciary.

Forty-seventh Congress, second session Senate, December 20, 1882 (Congressional Record, page 457). Mr. A. Saunders, of Nebraska, by request, asked and obtained leave to introduce a bill (S. No. 2272) for the admission of the State of Utah. Read twice by its title, and, with the accompanying papers, referred to the Committee on Territories.

The legislation for the suppression of polygamy in Utah during the first session Forty-seventh Congress is contained in "an act to amend section 5352 Revised Statutes" in reference to the suppression and punishment of polygamy, passed March 22, 1882. Under this law the President appointed commissioners, who were confirmed by the Senate. They supervise registration of voters and elections in Utah. They reside at Salt Lake City.

Board of registration and election in the Territory of Utah, December 1, 1883.

Name.	State.	Date of appointment.	Salary.
Alexander Ramsey, chairman	Minn	June 23, 1882	$5,000
Ambrose B. Carlton	Ind	June 23, 1882	5,000
George L. Godfrey	Iowa	June 23, 1882	5,000
Algernon S. Paddock	Neb	June 23, 1882	5,000
James R. Pettigrew	Ark	June 23, 1882	5,000

WASHINGTON.

(See page 454.)

Forty-sixth Congress, first session, House of Representatives, April 11, 1879 (Congressional Record, page 644). Mr. T. H. Brents, of Washington Territory, introduced H. R. No. 1290, for the admission of the State of Washington into the Union. Read a first and second time, and referred to the Committee on Territories and ordered to be printed.

Forty-seventh Congress, first session, House of Representatives, December 19, 1881 (Congressional Record, page 207). Mr. T. H. Brents introduced bill H. R. No. 1926, for the formation of a State government therein and the admission of the Territory of Washington into the Union. Read first and second time, referred to the Committee on Territories, and ordered to be printed.

Forty-seventh Congress, first session, House of Representatives, March 9, 1882 (Congressional Record, page 1759). Mr. N. W. Aldrich, of Rhode Island, from the Committee on Territories, reported back, with amendments, H. R. No. 1925, bill and recommended its passage. Referred to the Committee of the Whole House, and accompanying report (No. 690, first session Forty-seventh Congress) ordered to be printed.

DAKOTA.

(See page 454.)

DAKOTA.

(Without division.)

Forty-sixth Congress, third session, House of Representatives, December 6, 1880 (Congressional Record, pages 11 and 12). Mr. G. G. Bennett, of Dakota, introduced bill H. R. No. 6512, providing for the admission of Dakota as a State. Read first and second time, and referred to Committee on Territories and ordered to be printed.

Forty-sixth Congress, third session, Senate, December 8, 1880 (Congressional Record, page 34). Mr. A. S. Paddock, of Nebraska, asked and, by unanimous consent, obtained leave to introduce a bill (S. No. 1879) to enable the people of Dakota to form a constitution and State government, and for the admission of the State into the Union on an equal footing with the original States. Read twice by its title, and referred to the Committee on Territories.

THE TERRITORY OF PEMBINA.

ALL THAT PORTION OF DAKOTA NORTH OF 46° NORTH LATITUDE.

Forty-sixth Congress, second session, House of Representatives, January 7, 1880 (Congressional Record, page 223). Mr. G. G. Bennett, Delegate from Dakota, introduced bill H. R. No. 3225, establishing the Territory of Pembina (from the northern portion of the Territory of Dakota north of latitude 46°) and to provide a temporary government therefor. Read a first and second time, and referred to the Committee on Territories.

Forty-sixth Congress, second session, Senate, March 22, 1880 (Congressional Record, page 1769). Mr. S. J. Kirkwood, of Iowa, introduced bill S. No. 1516, establishing the Territory of Pembina, and providing a temporary form of government therefor. Read first and second times by title, and referred to Committee on Territories.

Forty-seventh Congress, first session, Senate, December 5, 1881 (Congressional Record, page 3). Mr. A. Saunders, of Nebraska, introduced bill S. No. 18, establishing the Territory of Pembina, from that portion of Dakota Territory north of latitude 46°, and providing a temporary government therefor. Read first and second time and laid on the table, to be referred to the Committee on Territories when appointed.

NORTH DAKOTA.

The same area as Pembina, being the northern portion of the present Territory of Dakota.

Forty-seventh Congress, first session, Senate, December 6, 1881 (Congressional Record, page 21). Mr. W. Windom, of Minnesota, introduced bill S. No. 158, establishing

the Territory of North Dakota and providing a temporary government therefor (being all of Dakota north of 46° latitude). Read first and second time by its title and ordered to lie on the table, to be referred to the Committee on Territories when appointed.

Forty-seventh Congress, first session, House of Representatives, December 19, 1881 (Congressional Record, page 206). Mr. R. F. Pettigrew, of Dakota, introduced bill H. R. No. 1889 (same text as bill S. 158, above), establishing the Territory of North Dakota.

Read first and second time, referred to the Committee on Territories, and ordered to be printed.

Forty-seventh Congress, first session, House of Representatives, February 25, 1882 (Congressional Record, page 1449). Mr. W. W. Grout, of Vermont, from the Committee on Territories, reported as a substitute for bill H. R. No. 1889 (bill above) bill H. R. No. 4672, establishing the Territory of North Dakota and providing a temporary government therefor. Read a first and second time, referred to the House Calendar, with accompanying report, and ordered to be printed. (See House Mis. Doc., first sess. Forty-seventh Congress, No. 552).

For petitions for admission of North Dakota, see Congressional Record, first session Forty-seventh Congress, pages 264, 303, and 401.

Forty-seventh Congress, second session, House of Representatives, February 5, 1883 (Congressional Record, page 2105). Mr. W. W. Grout, of Vermont, moved to suspend the rules to take from the House Calendar bill H. R. 4672, establishing the Territory of North Dakota and providing a temporary government therefor. A discussion followed. On the call of the ayes and nays, the ayes were 151; nays, 110; not voting, 30. Two-thirds of the members not having voted in favor of the motion, it was lost, and the rules were not suspended.

SOUTHERN PORTION OF DAKOTA.

SOUTH OF 46° NORTH LATITUDE.

Forty-seventh Congress, first session, Senate, December 6, 1881 (Congressional Record, page 190). Mr. A. Saunders, of Nebraska, introduced bill S. No. 112, to enable the people of Dakota to form a State government and for her admission into the Union. Read first and second time; referred to Committee on Territories when appointed.

Forty-seventh Congress, first session, Senate, December 6, 1881 (Congressional Record, page 21). Mr. William Windom, of Minnesota, introduced bill S. No. 157, same text as above bill S. No. 112, same order and reference. (Dakota south of 46° north latitude.)

Forty-seventh Congress, first session, House of Representatives, December 19, 1881 (Congressional Record, page 206). Mr. R. F. Petigrew, of Dakota, introduced bill H. R. No. 1886, for the admission of Dakota (south of 46°) into the Union. Read first and second time, and referred to the Committee on Territories.

Forty-seventh Congress, first session, House of Representatives, February 3, 1881 (Congressional Record, page 1199). Petition of citizens of Pembina County, Dakota, praying for the division of the Territory of Dakota on the forty-sixth parallel of north latitude, the north half to be organized as the Territory of Pembina, and the admission of the south half as the State of Dakota. Petitions for the admission of Dakota, first session Forty-seventh Congress. (Congressional Record, pages 18, 486, and 501.)

Forty-seventh Congress, first session, House of Representatives, February 16, 1882 (Congression Record, page 1220). Mr. J. C. Burrows, of Michigan, from the Committee on Territories, reported as a s bstitute for bill H. R. No. 1886 a bill, H. R. No. 4456, for the admission of the southerr portion of Dakota as a State. Read a first and second time, and referred to the Committee of the Whole House, and with the report ordered to be printed. (See H. R. Mis. Doc., first session, Forty-seventh Congress, No. 450.)

Forty-seventh Congress, first session, Senate, March 20, 1882 (Congressional Record, page 2045). Mr. A. Saunders, of Nebraska, from the Committee on Territories, reported bill S. 1514, as a substitute for bills S. No. 112 and 157, for the admission of the southern portion of the Territory of Dakota into the Union as a State. (See Senate Report, Mis., first session Forty-seventh Congress, No. 271.)

Forty-seventh Congress, first session, Senate, March 21, 1882 (Congressional Record page 2097). Mr. Eugene Hale, of Maine, presented the protest of N. T. Palmer and others, remonstrating against the admission of Dakota as a State, alleging repudiation or attempted repudiations by the county of Yankton and the Territorial assembly of certain railroad bonds purchased by petitioners in good faith. Ordered to be printed and to lie on the table. (See first session Forty-seventh Congress, Senate Mis. Doc., No. 68.)

Forty-seventh Congress, first session, House of Representatives, March 22 (Congressional Record, page 2140). Mr. J. P. Leedom, of Ohio, presented the views of a minority of the Committee on Territories against bill H. R. No. 4456, reported by a majority of the committee for the admission of Dakota as a State. Ordered to be printed with the report of the majority. (See first session Forty-seventh Congress, House Representatives Mis. Doc. No. 450, part 2.)

For petitions against the admission of Dakota as a State unless woman suffrage was recognized in the constitution, see Congressional Record, first session Forty-seventh Congress, pages 2040 and 3493.

Forty-seventh Congress, first session, Senate, March 27, 1882 (Congressional Record page 2276). Mr. George G. Vest, of Missouri, moved to recommit bill S. No. 1514 to Committee on Territories, alleging that the report accompanying said bill S. No. 271 was said to be the unanimous report of the committee, which was not the fact. A discussion followed, participated in by Senators Butler, Garland, Harrison, Saunders, Plumb, and McMillan. Mr. Hale favored the recommitment, so that the protest filed by him March 21 might be considered. It was so ordered.

Forty-seventh Congress, first session, Senate, April 5, 1882 (Congressional Record, page 2598). Mr. A. Saunders, of Nebraska, from the majority of the Committee on Territories, reported back bill S. No. 1514, for the admission of the southern part of Dakota as a State, with the recommendation that it be passed. Placed on the Calendar.

Forty-seventh Congress, first session, Senate, April 10, 1882 (Congressional Record, page 2725). Mr. George G. Vest, of Missouri, for a minority of the Committee on Territories, submitted views against the admission of the State of Dakota. (See S. Mis. Report, first session Forty-seventh Congress, No. 271, part 2.)

Forty-seventh Congress, first session, House of Representatives, July 17, 1882 (Congressional Record, page 6150). Mr. J. C. Burrows, of Michigan, by direction of the Committee on Territories, moved the suspension of the rules and the adoption of a resolution discharging the Committee of the Whole House from the consideration of bill H. R. No. 4456 for the admission of the State of Dakota into the Union, and making the same a special order for December 13, 1882. On the call of the roll for the suspension of the rules the yeas were 102, nays 76, not voting 112; so (two-thirds not having voted in the affirmative) the motion was lost.

Forty-seventh Congress, second session, Senate, January 5, 1883 (Congressional Record, page 870). Mr. J. J. Ingalls, of Kansas, presented a petition of James Finley and others, of Brown County, Dakota, praying that Dakota be admitted into the Union.

ARIZONA.

(See page 455.)

Forty-seventh Congress, first session, House of Representatives, January 31, 1882 (Congressional Record, page 743). Mr. G. H. Ouray, Delegate for Arizona, introduced a bill (H. R. No. 3808) for the admission of the Territory of Arizona into the Union. Read first and second time, and referred to the Committee on Territories and ordered to be printed.

IDAHO.

(See page 456.)

Forty-seventh Congress, first session, House of Representatives, January 31, 1882 (Congressional Record, page 743). Mr. George Ainslie, Delegate for Idaho, introduced a bill (H. R. No. 3809), for the admission of the Territory of Idaho into the Union. Read first and second time, and referred to the Committee on Territories and ordered to be printed.

ALASKA AND INDIAN TERRITORY.

DECEMBER 1, 1883.

(See pages 457 to 462.)

No change in the legislation affecting the status of Alaska or Indian Territory has taken place since June 30, 1880.

The map of the tribal holdings and surveys in Indian Territory, facing page 462, has been added. It is correct to June 30, 1883, and, in fact, to December 1, 1883, as no changes whatever in surveys or buildings have occurred since 1879, the date of the map.

This map gives in detail the status of the land claim of each tribe of Indians, showing holdings, area, and dates of treaty. The text on pages 459 to 462 is explanatory of this map.

PUBLIC LAND STRIP.

(See page 462.)

[TO JUNE 30, 1883, see page 1167.]

(Area, about 5,738 square miles, or 3,672,640 acres.)

The entire area of this tract is public domain. The lands embraced therein are not included within any surveying or land district, and while public domain cannot be entered as public land under settlement or other land laws, as a specific act of Congress is necessary to open them to the public.

By the act of Congress approved March 3, 1881, making appropriations for sundry civil expenses of the Government for the year ending June 30, 1882, there was appropriated the sum of $18,000 for the survey of "correction lines, guide meridians, and township lines in the strip of public land north of Texas, and bounded on the north by the States of Colorado and Kansas."

Under this act a contract was made with deputy surveyors August 26, 1881, by the Commissioner of the General Land Office, for the following surveys:

Establish, astronomically, a base line on the parallel of 36° 30′ north latitude, which is coincident with the north boundary of Texas, between the 100th and 103d meridians of longitude west from Greenwich; also, establish, astronomically, and by telegraphic time signals, a principal meridian of surveys, to be known as the Cimarron meridian on the 103d meridian of longitude west from Greenwich, being the eastern boundary of New Mexico, said meridian to be extended from the north boundary of the State of Texas to its intersection with the south boundary of the State of Colorado; also, to establish the necessary standard, guide meridian, and township exterior lines within the said public land strip, provided that the township lines first located shall be within such part of said public land as is most eligible for settlement or occupation, and that the gross mileage shall not exceed the sum of $18,000. Certain metallic corner monuments to be planted at the end of each second linear mile of the respective lines named.

The returns of these surveys were made direct to the General Land Office.

In his report for 1882 the Commissioner of the General Land Office recommends "the passage of an act to provide for attaching the lands to the Territory of New Mexico for the purposes of subdivisional surveys under the United States surveyor-general, and the disposal of lands thereafter at the United States land office in that Territory."

CENSUS APPROXIMATE ESTIMATE OF AREAS OF STATES, TERRITORIES, AND COUNTIES IN 1880.

The following area estimate for the United States, as reported by the Census Bureau September 30, 1881, is inserted for general information. Besides, the areas of all counties are given. The General Land Office does not estimate the area of counties. Townships six miles square are the unit in land parceling surveys. It will be noted that Mr. Henry Gannett, the accomplished topographer, who prepared the census estimate of areas, frequently uses and refers to the land office maps for data, and that coast-lines and boundaries along rivers, harbors, bays, and other bodies of water are estimated in the census estimate. The General Land Office surveys meander along streams, etc., to obtain actual land surface adjacent. The estimates of the General Land Office, pages 28 and 29 herein, are used in the preparation of this work as being accurate enough for all practical purposes, and as having been used for more than thirty years past, being corrected from year to year. The system of public land surveys, laying the land States and Territories off in sections six miles square, must surely give a reasonably correct area. For instance, the whole surface of the States of Ohio, Indiana, Illinois, Iowa, Alabama, Arkansas, Kansas, Mississippi, Missouri, and Wisconsin has been surveyed under the rectangular system used by the General Land Office. While the areas are not exact and are constantly being changed by new discoveries of small parcels of unsurveyed land, for all statistical and historical purposes they are accurate enough. It can be said that an exactly accurate area or surface survey is about equal to an impossibility.

THE CENSUS ESTIMATE OF AREAS OF STATES, TERRITORIES, AND COUNTIES IN 1880.

DEPARTMENT OF THE INTERIOR, CENSUS OFFICE,
Washington, D. C., September 30, 1881.

SIR: I have the honor to transmit to you herewith, for publication as an Extra Census Bulletin, tables showing the approximate areas of the United States, the several States, and their counties.

The necessity for revising the figures which have popularly passed as the areas of the States presented itself early in the progress of my geographical work in connection with the census. Of several States a number of estimates of area have been in use differing from one another by thousands of square miles, and none of them, perhaps, traceable to any authentic source. Many of the results were palpably wrong, being so far from the truth that it is a source of surprise that they were not corrected before.

The methods by which I have obtained the areas are fully set forth in the body of the bulletin. I may say, however, that while most of the areas can be considered as only approximations, yet they are as close approximations as the maps and the determinations of geographical positions of boundary lines, &c., will permit.

The details of this work were carried out by Mr. F. DeY. Carpenter, to whom I am also indebted for the formula for the area of a "square degree," the unit of computation.

Very respectfully yours,

HENRY GANNETT, E. M.,
Geographer Tenth Census.

Hon. FRANCIS A. WALKER,
Superintendent of Census.

APPROXIMATE AREAS OF THE UNITED STATES, THE SEVERAL STATES, AND THE TERRITORIES.

The question, What constitutes the area of the United States? is by no means a simple one. Our jurisdiction extends to a line three nautical miles from the shore, but this strip of sea cannot properly be regarded as a portion of the country. Supposing our boundary to be restricted to the sea-coast, there remains a question regarding the bays and estuaries of the sea. To what extent should the coast line be followed strictly, and where should we begin to jump across the indentations made by the sea? In this matter one can only follow his own judgment, making in each case

as natural a decision as possible, as no criterion whatever can be established. In this way [see Census Report] I have defined the coast limits, showing by the red line on the accompanying map what I have taken as the *gross area* of the country and of the States, severally.

Method of measurement.

Taking first the United States (with the exception of Alaska) as a whole, its area was determined by summing up the square degrees, *i. e.*, the regions comprised between consecutive parallels and meridians. Along the coast and the boundary lines of the country the areas of the fractional square degrees were obtained by direct measurement by means of scales, in every case measuring the smaller portion, whether land or water, to avoid, as far as possible, the errors incident to the projections and scales of the maps.

The Atlantic, Pacific, and Gulf coasts were measured on charts of the Coast Survey; the shore lines of the great lakes on those of the United States Lake Survey; and the boundary with Mexico on the maps of the Mexican Boundary Commission. The northern boundary follows the parallel of 49° to the Lake of the Woods. Thence to Lake Superior is a weak place where we are dependent upon the map of Hind's exploration. The northern boundary, east of the portion covered by the charts of the Lake Survey, was measured on the maps of the several international boundary commissions. A second weak spot exists on the eastern boundary of Maine, from Schoodic Lake to the Atlantic coast. This is covered by no *authentic* map, but measurements made on several different maps agree very closely.

We find, then, that the whole contour of the country is given by surveys whose accuracy is unquestioned, excepting in the two spots above mentioned, *i. e.*, from Lake of the Woods to Lake Superior, and from Schoodic Lake to the Atlantic. The measurements, made with the utmost care and several times repeated, can embody but very slight errors, and it is not probable that the two weak places in the boundary allow any considerable error.

The areas of the square degrees were computed by the following formula, derived by Mr. F. DeY. Carpenter:

$$\text{Area} = \frac{\pi}{90} (\text{M}'-\text{M}) \, \text{NR}m \sin \frac{1}{2} (\text{L}'-\text{L}) \cos \frac{1}{2} (\text{L}'+\text{L}),$$

in which M′ and M are the longitudes of the limited meridians, M′—M being in degrees or fractions of a degree; N is the normal to the middle latitude, in miles; R, the radius of curvature of the meridian at the middle latitude, in miles; L′ and L, the limiting latitudes; and $m = 1.004285$. The resulting area is in square miles.*

The areas of the square degrees entirely comprised within the limits of the country, and of those whose areas are more than one-half within, were computed by the above formula. From the latter were subtracted the portions lying without our limits, as determined by direct measurement, and to the whole were added the results of measurements of the remaining portions, *i. e.*, those not included in the computed square degrees.

The areas of the several States and Territories were determined in a similar manner. In cases such as those of Colorado, Wyoming, and Utah, where a State or Territory is limited on all sides by parallels and meridians, the exact determination of its area is an easy matter. In cases where the square degree is divided by the boundary line into two or more parts, these parts were distributed between or among the States by direct measurement from the best available maps, the sum of the parts being made to equal the whole, as determined by computation. The great source of error in the areas of the States is due, not to errors of measurement, which may be regarded as trifling, but to uncertainty in the location of the boundary lines between them. Until these shall have been accurately established, all measurements of certain States can be regarded as only approximations. Thus the position of the boundary between Virginia and West Virginia is not known within several miles, leaving sufficient latitude for an error of several hundred square miles in each State. Whatever may ultimately be taken from the area of one, by a correct location of this boundary, will be added to the other.

Another point to be considered is that of errors in surveying and marking those boundaries which, by law, have been established on certain lines, such as parallels or meridians. It is well known that many State and Territorial boundaries have been very badly surveyed, in some cases the errors amounting to miles. In such cases I have accepted as the boundary that established by law, as it is, of course, impossible to define the locations of the boundary stakes.

*For a full discussion of this formula, see article by Mr. Carpenter, in Van Nostrand's Engineering Magazine, for December, 1880, p. 457.

The following table gives the total areas of the States and Territories, as defined on the map and in the notes following the table, the area of coast waters, of rivers, &c., of lakes and ponds, of total water area, and the net land surface of the States and Territories:

Summary of areas of States, Territories, &c.

[In square miles.]

	Gross areas.	Coast waters (bays, gulfs, sounds, &c.)	Rivers and smaller streams.	Lakes and ponds.	Total water surface.	Total land surface.
Total	3,025,600	17,200	14,500	23,900	55,600	2,970,000
Alabama	52,250	440	260	10	710	51,540

ALABAMA.

Includes Mobile Bay, half of Perdido Bay, and half of the boundary portions of the Perdido and Chattahoochee Rivers.

Authorities.—For Gulf coast, Coast Survey maps; for east and west boundaries, Land Office maps, Coast Survey "sketches," and Engineer Office maps. The north boundary is taken at latitude 35°. The south boundary, from Perdido River to Chattahoochee River, follows the parallel of 31°.

ARIZONA.

Includes half of boundary portion of Colorado River.
Authorities.—For the Colorado River, Wheeler's maps; for the Mexican boundary, maps of the Mexican Boundary Survey.

ARKANSAS.

Includes half of boundary portion of Red River, Mississippi River, and Saint Francis River.
Authorities.—South boundary taken at 33° 00′; north boundary taken at 36° 30′. For the east boundary, Land Office maps and Coast Survey "sketches," after comparison with Engineer Office maps; for Red River, Texas land office maps; for boundary with Indian Territory, Ruffner's map of Indian Territory.

CALIFORNIA.

Includes bays of San Francisco, False, and San Diego. Includes half of boundary portion of Colorado River. Includes the portion of Lake Tahoe within State line.
Authorities.—For the Pacific coast, Coast Survey maps; for the Nevada boundary south of latitude 39°, Wheeler's maps; for the Colorado River, Wheeler's maps; for the boundary with Lower California, Mexican Boundary Survey.

COLORADO.

Is limited on all sides by parallels of latitude and meridians of longitude, and its area is simply a matter of computation.

CONNECTICUT.

Includes the various inlets and river-mouths along the shores of Long Island Sound.
Authorities.—For Long Island Sound, the Coast Survey maps; for the west boundary, French's map of New York and Colton's map of Connecticut; for the north boundary, Walling and Gray's atlas of Massachusetts; for the east boundary, Colton's map of Connecticut and Thompson's map of Rhode Island.

DISTRICT OF COLUMBIA.

Includes boundary portion of the Potomac River.
Authority.—McClelland's map of the District of Columbia.

DAKOTA.

Includes half of boundary rivers and lakes.
Authority.—For boundary rivers and lakes, Land Office map of Dakota, after comparison with Engineer Office map.

DELAWARE.

Includes half of the boundary portion of the Delaware River as far south as Cohansey Creek; also Rehoboth Bay and Indian River.
Authorities.—For the Atlantic coast, Delaware Bay, and the Delaware River south of latitude 39° 30′, the Coast Survey maps; for the Delaware River north of 39° 30′, the Geological Survey map of New Jersey; for the remaining boundaries, Colton's maps and the Eclectic Geography maps.

FLORIDA.

Includes half of Perdido Bay and half of the boundary portions of Perdido, Chattahoochee, and Saint Mary's Rivers; also Pensacola Bay, Santa Rosa Sound, Choctawhatchee Bay, Saint Andrew's Bay, Saint Joseph's Bay, Apalachicola Bay, Oklokonee Bay, Tampa Bay, Charlotte Harbor, Oyster Bay, and the inlets, lagoons, and sounds of the Atlantic coast.
Authorities.—For the coast line, the Coast Survey maps; for the north boundary, the Land Office maps and the Coast Survey "sketches."

GEORGIA.

Includes half of the boundary portions of Chattahoochee, Saint Mary's and Savannah Rivers, and half of Cumberland Sound and Tybee Roads; also Saint Andrews Sound, Saint Simon's Sound, Altamaha Sound, Doboy Sound, Sapelo Sound, Saint Catherine Sound, Ossabaw Sound, and Warsaw Sound.

Authorities.—For south and west boundaries, the Land Office maps and Coast Survey "sketches"; for the Atlantic coast, the Coast Survey charts; for the boundary with South Carolina, the Coast Survey "sketches." The north boundary is taken at latitude 35°.

IDAHO.

For west boundary and authorities, see Oregon and Washington. Boundary with Montana, summit of Bitter Root Mountains.

Authority.—Engineer Office map.

ILLINOIS.

Includes half of boundary portion of Mississippi and Wabash Rivers, but none of Ohio River.

Authorities.—The north boundary is taken at latitude 42° 29′ 30″; for the Lake Michigan coast, the Lake Survey maps; for the other boundaries, the Land Office and Engineer Office maps.

INDIANA.

Includes half of boundary portion of Wabash River, but none of the Ohio River.

Authorities.—For the shore of Lake Michigan, the Lake Survey maps; for the remaining boundaries, the Land Office and Engineer Office maps.

INDIAN TERRITORY.

Includes half of boundary portion of Red River.

Authority.—Ruffner's map of Indian Territory.

(Includes "Greer County," disputed territory with Texas.)

IOWA.

Includes half of boundary rivers.

Authorities.—For the east, south, and west boundaries, the Land Office and Engineer Office maps. The north boundary is taken at latitude 43° 30′.

KANSAS.

Includes half of boundary portion of Missouri River.

Authority.—Land Office map, checked by Engineer Office map.

KENTUCKY.

Includes half of boundary portion of Mississippi and Big Sandy Rivers and all of boundary portion of the Ohio River.

Authorities.—For the south boundary, the Coast Survey "sketches" and Killebrew's map of Tennessee; for the north and west boundaries, the Land Office and Engineer Office maps; for the east boundary, Colton's maps and the Eclectic Geography maps.

LOUISIANA.

Includes half of Sabine Lake and half of the boundary portions of Sabine, Mississippi, and Pearl Rivers. Includes the bays of Vermillion, Cote Blanche, Terrebonne, Timbalier, and Barataria, and the lakes of Calcasieu, Pontchartrain, and Borgne.

Authorities.—For the western boundary, the Texas land office map; for the Gulf coast, the Coast Survey maps; for Pearl River, the Land Office maps, checked by the Engineer Office map; for the Mississippi River, the Land Office maps and Coast Survey "sketches," checked by Engineer Office maps.

MAINE.

Includes half of the boundary portions of the Saint John, Saint Croix, and Piscataqua Rivers. Includes only such arms of the sea as are decidedly landlocked.

Authorities.—For the coast, the Coast Survey maps; for the eastern boundary, the

maps of the British Boundary Survey and Walker and Miles's atlas of Canada; for the northern and northwestern boundaries, the maps of the British Boundary Survey; for the boundary with New Hampshire, Walling and Hitchcock's atlas of New Hampshire.

MARYLAND.

Includes Assateague Bay, Isle of Wight Bay, Tangier Sound, the interior portion of Chesapeake Bay, and the boundary portion of the Potomac River.

Authorities.—For the Atlantic coast, Chesapeake Bay, the Potomac River south of the District of Columbia, and the boundary with Southern Delaware, the Coast Survey maps; the north boundary taken at latitude 39° 43′ 26″; for the remaining boundaries, Colton's maps and the maps of the Eclectic Geography.

MASSACHUSETTS.

Includes Boston Harbor.

Authorities.—For the coast, the Coast Survey maps; for the north boundary, Walling and Gray's atlas of Massachusetts and Walling and Hitchcock's atlas of New Hampshire; for the remaining boundaries, Walling and Gray's atlas of Massachusetts.

MICHIGAN.

Includes half of Montreal and Menominee Rivers; includes half of Saint Mary's, Saint Clair, and Detroit Rivers; includes Anchor Bay and Huron Bay, but no other portion of Lake Saint Clair, the Great Lakes, or their tributary bays. The Straits of Mackinac are not included.

Authorities.—For the Great Lakes and their connecting waters, the Lake Survey maps; for the Wisconsin boundary, the Land Office maps; for the south boundary, the Land Office, Engineer Office, and Lake Survey maps.

MINNESOTA.

Includes half of the lakes, straits, and rivers along the British boundary, except Rainy Lake and Lake of the Woods; includes half of Lake Travers, Big Stone Lake, Lake Pepin, Lake Saint Croix, and Saint Louis Bay; includes half of the boundary portions of Red River, Mississippi River, and Saint Croix River.

Authorities.—For the coast of Lake Superior, the Lake Survey maps; for the British boundary, Hinds's maps and the maps of the Northern Boundary Survey; for the east and west boundaries, the Land Office and Engineer Office maps. The south boundary is taken at latitude 43° 30′.

MISSISSIPPI.

Includes half of boundary portions of Mississippi and Pearl Rivers; includes Bay of Saint Louis.

Authorities.—For the Gulf coast, Coast Survey maps; for east and west boundaries, the Land Office maps and Coast Survey "sketches" in connection with the Engineer Office maps. The north boundary is taken at latitude 35°.

MISSOURI.

Includes half of all boundary rivers.

Authority.—Land Office maps, after comparison with the Engineer Office map and Killebrew's map of Tennessee.

MONTANA.

Authority.—For boundary with Idaho (summit of Bitter Root Mountains), Engineer Office map.

NEBRASKA.

Includes half of boundary rivers.

Authority.—For natural boundaries, Land Office maps, in connection with Engineer Office map.

NEVADA.

Includes half of boundary portion of Colorado River. Includes the portion of Lake Tahoe within State line.

Authorities.—For southwest and south boundaries, Wheeler's maps.

NEW HAMPSHIRE.

Includes all of boundary portion of the Connecticut River and half of Piscataqua River.

Authorities.—For the north boundary, the maps of the British Boundary Survey; for the south boundary, Walling and Hitchcock's atlas of New Hampshire, and Walling and Gray's atlas of Massachusetts; for the east and west boundaries, Walling and Hitchcock's atlas of New Hampshire.

NEW JERSEY.

Includes all bays and inlets of the Atlantic between Cape May and Sandy Hook; also Newark Bay and half of the boundary portions of the Delaware and Hudson Rivers, half of New York Bay, and half of Kill Von Kull and Staten Island Sound. No portion of Delaware Bay, Raritan Bay, or Sandy Hook Bay is included.

Authorities.—For Delaware Bay, the Atlantic coast, Raritan Bay, Staten Island Sound, and New York Harbor, the Coast Survey maps; for the Hudson River and the boundary with New York, the map of the New Jersey Geological Survey, and French's map of New York; for the Delaware River, the New Jersey Geological Survey map, and Colton's maps.

NEW MEXICO.

Includes half of boundary portion of Rio Grande.

Authority.—For the boundary with Mexico, Mexican Boundary Survey.

The remainder of the territory is limited by parallels and meridians.

NEW YORK.

Includes half of Niagara River and of the boundary portions of the Saint Lawrence and Hudson Rivers, and of Staten Island Sound. Includes Chaumont Bay, the New York portion of Lake Champlain, the Narrows, East River, and half of New York Bay. Includes, on Long Island, Jamaica Bay, Hempstead Bay, South Oyster Bay, Great South Bay, Belleport Bay, Moriche's Bay, Shinnicock Bay, Peconic Bay, Huntington Bay, Oyster Bay, and Flushing Bay.

Authorities.—For Lake Erie and Lake Ontario, the Lake Survey maps; for the northern boundary, the maps of the British Boundary Survey; for the eastern boundary, the Coast Survey maps of Lake Champlain, Walling and Gray's atlas of Massachusetts, French's map of New York, and Colton's maps; for the Atlantic coast and Long Island Sound, the Coast Survey maps; for the boundary with New Jersey, the New Jersey Geological Survey map. The south boundary is taken at latitude 42°.

NORTH CAROLINA.

Includes Pamlico Sound, Albemarle Sound, and Currituck Sound.

Authorities.—For the Atlantic coast, the Coast Survey charts; for the north, south, and west boundaries, the Coast Survey "sketches."

NOTE.—The north and south boundaries have been surveyed at different times, but have not been permanently marked. On the Coast Survey maps they appear to follow, as closely as possible, the route of the most recent survey, and this location has been accepted in determining the area of the State.

OHIO.

Includes none of boundary portion of Ohio River. Includes Maumee Bay and Sandusky Bay.

Authorities.—For the Lake Erie shore, the Lake Survey maps; for the other boundaries, the Land Office maps, the Engineer Office maps, Colton's maps, and Von Steinwehr's map of West Virginia.

OREGON.

Includes the bays of Nehalem, Tillamook, Oyster, Yaquina, Coos. Includes half of boundary rivers of Columbia and Snake. East boundary, south of the mouth of Owyhee River, is supposed to follow the meridian of 117° 01′ 30″.

Authorities.—For the coast line, the Coast Survey maps; for the Snake River boundary, the Land Office maps; for Columbia River boundary, the Land Office maps.

PENNSYLVANIA.

Includes half of boundary portion of Delaware River.

Authorities.—For the east boundary, the Geological Survey map of New Jersey and French's map of New York. The south boundary taken at latitude 39° 43′ 26″.

For the west boundary, the Land Office map of Ohio, Colton's maps, and the Eclectic Geography maps; for the Lake Erie coast, the Lake Survey maps. The north boundary is taken at latitude 42°.

RHODE ISLAND.

Includes Narragansett Bay and Jakonnet River.

Authorities.—For the coast line, the Coast Survey maps; for the boundary with Massachusetts, Walling and Gray's atlas of Massachusetts; for the boundary with Connecticut, Thompson's map of Rhode Island and Colton's map of Connecticut.

SOUTH CAROLINA.

Includes half of Savannah River and Tybee Roads. Includes Port Royal Sound, Saint Helena Sound, and Charleston Harbor.

Authorities.—For the coast line, the Coast Survey maps; for the boundaries with Georgia and North Carolina, the Coast Survey "sketches."

TENNESSEE.

Includes half of boundary portion of Mississippi River.

Authorities.—The south boundary is taken at latitude 35°. For the east boundary, the Coast Survey "sketches"; for the north boundary, the Coast Survey "sketches" and Killebrew's map of Tennessee; for the west boundary, the Land Office maps and Killebrew's map of Tennessee, in connection with the Engineer Office map.

TEXAS.

(Greer County not included.)

Includes half of boundary portions of the Rio Grande, Sabine River, and Red River, and half of Sabine Lake. Includes Laguna del Madre, Corpus Christi Bay, Aransas Bay, San Antonio Bay, Matagorda Bay, Galveston Bay, and other coast lakes and bays.

Authorities.—For the Rio Grande, the maps of the Mexican Boundary Survey; for the Gulf Coast, the maps of the Coast Survey; for the eastern boundary, from Red River to Sabine Pass, the Texas land office map; for the Red River boundary, Ruffner's map of Indian Territory.

AREAS OF TEXAS.

Texas land office map, 1879, 269,694 square miles (this includes Greer County, 2,622 square miles); Roessle's map, 268,684 square miles; Land Office report, 1878, 274,356 square miles; Census of 1870, 274,356 square miles; Census of 1880, 265,780 square miles, excluding Greer County.

UTAH.

Is limited on all sides by parallels and meridians; hence its area is a simple matter of computation.

VERMONT.

Includes the Vermont portion of Lake Champlain and none of the boundary portion of the Connecticut River.

Authorities.—For the north boundary, the maps of the British Boundary Survey; for the east boundary, Walling and Hitchcock's atlas of New Hampshire; for the south boundary, Walling and Gray's atlas of Massachusetts; for the west boundary, the Coast Survey maps of Lake Champlain, French's map of New York, Colton's map of Vermont, and Walling and Hitchcock's atlas of New Hampshire.

VIRGINIA.

Includes no portion of the Potomac River. Includes the various inlets along the Atlantic coast and the interior portion of Chesapeake Bay, from Smith's Island to the sea.

Authorities.—For the boundary with North Carolina, the Coast Survey sketch maps; for the Atlantic coast, Chesapeake Bay, and the Potomac River below Washington, the Coast Survey maps; for the remaining boundaries, Colton's maps and the Eclectic Geography maps.

WASHINGTON.

Strait of Juan de Fuca and Gulf of Georgia are excluded, but the islands in the same are included. The waters of Puget Sound, Admiralty Inlet, Hood's Canal, Gray's Harbor, and Shoalwater Bay are included. Half of the boundary portions of Columbia and Snake Rivers are included. The east boundary, north of the mouth of Clearwater River, is supposed to follow the meridian of 117° 01′ 30″.

Authorities.—For the coast line, the Coast Survey maps; for Snake River boundary, the Land office maps; for Columbia River boundary, the Land Office maps.

WEST VIRGINIA.

Includes half of the boundary portion of the Big Sandy River and all of the boundary portion of the Ohio River.

Authorities.—Colton's maps, the Eclectic Geography maps, and the Land Office map of Ohio.

WISCONSIN.

Includes half of Lake Pepin, Lake Saint Croix, Lac Desert, and Saint Louis Bay, and half of the boundary portions of the Mississippi, Saint Croix, Montreal, and Menominee Rivers. Includes Chaquamegon Bay. Does not include any portion of Green Bay or Sturgeon Bay.

Authorities.—For the shores of the Great Lakes and Green Bay, the Lake Survey maps; for the west boundary, the Land Office and Engineer Office maps; for the boundary with Michigan, the Land Office maps; the south boundary is taken at latitude 42° 29′ 30″.

WYOMING.

Is limited on all sides by parallels and meridians; hence its area is a simple matter of computation.

"PUBLIC LANDS."

(Unattached territory.)

Longitude, 100°–103°; latitude, 30° 30′–37° 00′.

Is limited on all sides by parallels and meridians, and its area is therefore a matter of computation.

WATER AREAS.

The areas of included bodies of water, as bays and other inlets of the sea, lakes, ponds, &c., were, in most cases, determined by direct measurement from maps.

The accuracy and completeness of this statement of water areas differs in different States with the scale and general correctness of the maps used. In a few cases they were found in print in such form as to show that they had been carefully determined.

The water surface of Maine has been carefully measured by Mr. Walter Welis, and the results are published in "Water Power of Maine." That of New Jersey has been measured with great care by Professor Cooke, the State geologist, who has published the measurements in his report on "Geology of New Jersey," 1868. In all States surveyed by the General Land Office, these areas were taken from the plats on file in the Land Office. In cases of these States the results are to be regarded as excellent.

In the unsettled portions of the West, where the land surveys have not yet extended, the areas were taken from the best maps to be had. The maps of Hayden's, King's, Powell's, and Wheeler's surveys have assisted greatly in completing the work.

The area of river surface has proved a very difficult matter to determine, even approximately. In case of States which have been entirely surveyed by the General Land Office, and of which the plats, on a large scale, are accessible, the areas of the larger streams were measured from them by taking the mean breadth and the length. This, of course, ignores the stage of water, but, as the surveys were made at all times of the year, it may be assumed as "medium stage." From such material the river surface of these States has been determined, and was found to range from one square mile in 90 of total area to one in 3,163, but averaging for the States of the Mississippi Valley about one in 200. This has served as a basis for estimating that of the other States.

Following is a list of the principal inland lakes of the United States, with their areas:

Lakes.	State.	Area in square miles.	Authority.
Abert	Oregon	73	Land Office maps.
Agogebic	Michigan	21	Land Office plats.
Apopka	Florida	53	Do.
Baskahegan	Maine	18	A.
Bayou Pierre	Louisiana	12	Land Office plats.
Bear	Utah and Idaho	58	Hayden.
Beaver	Indiana	23	Land Office plats.

Yellowstone	Wyoming	130	Hayden.

"A" refers to Water-Power of Maine, by Mer W. Waltrells.

AREAS OF COUNTIES.

The areas of counties given in the following table are the results of direct measurements from the best county maps, corrected arbitrarily in order to make them add up to the areas of the States. In the States surveyed by the General Land Office, in which county lines follow the boundaries of survey townships, the areas are susceptible of being deduced with a great degree of accuracy. In other States, where the county lines are located by minor natural or artificial points, such as houses, fences, roads, or small streams, the probabilities are against their being correctly drawn on even the best maps, and the areas are correspondingly uncertain. This is the case in most of the States on the Atlantic border, with West Virginia, Kentucky, and Tennessee in the interior.

Areas of the States and Territories, by counties.

NOTE.—The narrow column under each census year shows the order of the States and Territories when arranged according to magnitude of population. The figures of population for 1880 are in some cases subject to final correction at the Census Office.

* Does not include Indians not taxed in Indian territory. Actual population, 38,900,893.

CHAPTERS XXXIV, AND XXXV.

TO DECEMBER 1, 1883.

No change in the above chapters.

CHAPTER XXXVI.

ANNUAL BUSINESS OF THE GENERAL LAND OFFICE AND DISPOSITION OF THE PUBLIC LANDS UNDER THE SEVERAL ACTS FROM JUNE 30, 1882, to JUNE 30, 1883.

ADMINISTRATIVE STAFF, AND MISCELLANEOUS CIRCULARS AND REGULATIONS, AND GENERAL INFORMATION AND SUGGESTIONS RELATING TO THE PUBLIC LANDS TO DECEMBER 1, 1883.

The business of the General Land Office and the total disposition of the public lands from 1789 to June 30, 1880, is shown by the data from pages 196 to 415.

The business from June 30, 1880, to June 30, 1882, is shown from pages 517 to 1214.

This chapter will show in detail the official data from June 30, 1882, to June 30, 1883, and in some instances as noted to December 1, 1883.

DETAILS AS TO THE GENERAL BUSINESS OF THE GENERAL LAND OFFICE.

FOR THE FISCAL YEAR ENDING JUNE 30, 1883.

References to chapters are omitted where no business was transacted under them during the year 1883.

From the annual report of the Commissioner of the General Land Office and other sources:

ENTRIES AND FILINGS.

The total number of entries and filings posted during the year at all land offices was 251,685, aggregating 30,000,000 acres. These entries and filings constitute claims of record awaiting completion and adjudication.

INCREASE IN NUMBER OF CLAIMS FILED.

The increase in number of claims recorded in 1883 was 55,548 over the year 1882, and 93,700 over the year 1881.

ENTRIES APPROVED FOR PATENTING.

The number of entries approved for patenting under the pre-emption, homestead, timber-culture, desert-land, and other settlement and agricultural laws was 53,847, an increase over the previous year of 26,239.

CONTESTED CASES FROM DISTRICT LAND OFFICES EXAMINED DURING THE YEAR.

Four thousand two hundred and seventy-four contested cases were examined and acted upon.

BOARD OF EQUITABLE ADJUDICATION, SEE SECS. 2450 TO 2454, R. S. U. S.

Seventeen hundred and twenty-seven claims were confirmed by the board of equitable adjudication, an increase of 671 over the number adjudicated the previous year.

AGRICULTURAL PATENTS.

The number of patents issued on the various classes of entries and locations under the general land laws is 50,482, an increase over the previous year of 1,785.

PUBLIC SALES.

(See Pages 207 and 415 for Method of such Sales.)

Sixteen thousand acres of land were offered at public sale in the Gainesville, Fla., district. Three hundred and sixty acres were sold, and the remainder became subject to private entry.

Two million acres of pine-timber lands were offered in the Duluth, Minn., district, and 1,000,000 acres in the Saint Cloud district. About 268,000 acres were sold in both districts, at an average price of $1.90 per acre. The remainder of the lands became subject to private entry at the minimum price.

Ninety-eight additional townships, embracing 1,500,000 acres, were proclaimed for offering in the Saint Cloud district.

CASH SALES.

SALES MADE OUTRIGHT IN UNLIMITED QUANTITIES AT DISTRICT LAND OFFICES AT $1.25 PER ACRE—ALMOST ALL IN SOUTHERN STATES.

The number of private cash entries was 11,104, embracing 2,179,955.14 acres, an increase of 255,458.99 acres:

CONSUMMATED PRE-EMPTION AND HOMESTEAD ENTRIES.

2,285,710.35 acres were sold under the pre-emption law, an increase of 934,329.52 acres; 1,236,119.96 acres were embraced in commuted homesteads, an increase of 158,736.06 acres.

TOTAL CASH SALES IN 1883.

The total cash sales, including land sold at public and private sale, pre-emption, commuted homesteads, mineral lands, timber and stone lands, &c., amount to 6,839,042.67 acres.

PRICE PER ACRE REALIZED FROM CASH SALES IN 1883.

The amount of receipts from cash sales was $9,657,032.28, an average of a fraction over $1.40 per acre.

CORRESPONDENCE FOR THE YEAR 1883.

The number of letters received was 117,800, an increase of 26,238, or 30 per cent. over the year 1882. The number of letters written was 88,955, covering 66,384 pages of letter record.

MAPS AND PLATS—WORK DONE IN 1883.

Current work has included the revision and correction of the annual map of the United States (edition of 1882); the compilation of new maps of Florida and Arizona; revising and correcting maps of Alabama, Idaho, and Montana; the commencement of the compilation of new maps of Utah and Wyoming, and the revision of the map of Washington Territory; extending public surveys and railroad lines on State and Territorial maps; protracting and drawing diagrams of new surveys, and making numerous calculations for official purposes. Three hundred and seventy right-of-way railroad maps have been examined; 20 railroad land-grant maps constructed; 717 copies of railroad, private land claim, Government reservation, and district maps and township plats copied, and the tracings of 3,188 worn township plats examined preparatory to photolithographing them. Nearly 10,000 photolithographic copies of township plats have been furnished public officers, and a large number to private applicants. Indexes have been prepared to 150 volumes of field notes and plats of survey.

REPAYMENTS.

(Act of June 16, 1880.)

See "Decisions of the Department of the Interior and the General Land Office, in cases relating to lands and land claims from July, 1881, to June, 1883." Title, "Repayments," pages 527 to 539.

Five hundred and sixty-six repayment claims for lands erroneously sold or entered were adjusted and approved, amounting to $57,739.64. (See Circular of October 1, 1880.)

EXEMPLIFICATION OF RECORDS (COPIES).

Section 461 of the Revised Statutes makes it the duty of the Commissioner to furnish all exemplifications of patents or papers on file or of record in this office that may be required by parties interested, at a price fixed by the statute, the fees so received

to be paid into the Treasury. The amount received from that source the past year was $8,118.05. This class of work increases year by year, and now involves the aggregate time of several clerks, resulting in a corresponding loss to the ordinary business of the office.

In order that this special service for the accommodation of private parties who pay the expenses of it may not be an interference with the general service, nor a tax upon the general appropriation, I respectfully recommend that provision be made by law by which the money received at this office for certified copies of plats and records shall be deemed specially appropriated for defraying the expenses of preparing such copies, the same to be disbursed by the Treasury Department in the usual manner.

PUBLIC LAND STATISTICS.

This office is constantly called upon for information from the records for the use of committees and members of Congress, and other branches of the Government; State and county officials; scientific, historical, and politico-economic societies, American and foreign; immigration and agricultural associations; statistical compilers and others. The information so sought cannot usually be furnished without the expenditure of much time and labor in the examination of miscellaneous and voluminous records, and it is frequently impracticable for that reason to furnish it at all. Accuracy is hardly attainable in the preparation of statements that may be made in the unmethodical and often hasty manner indicated.

It is a matter of current official necessity, public convenience, and historical consequence, that essential public land statistics should be brought into accessible condition. To collate and arrange this data in convenient form for ready reference would probably require the work of six clerks for three years. But when done it would be done for all time, and a great saving of labor now annually required in making up statements and reports would be effected.

The compilation of data for my annual report has taken the constant labor of four clerks for three months. A call the past year for information in regard to sales of about 10,000,000 acres of Choctaw lands for use in a suit in the Court of Claims required the labor of six clerks six months to collate the facts. With a proper digest of record results the greater portion of such labor would be saved. It has never been possible, with the great need of all clerical force in current work, to even commence a systematic compendium of public land statistics.

INDEX OF LAND PATENTS.

An early provision of the statutes (section 459, Revised Statutes) makes it the duty of the recorder to prepare alphabetical indexes of the names of patentees of public lands. This work has never been done, and a special appropriation is now necessary to carry out that provision of law.

Such indexes are needed for constant reference, and the want of them involves greater labor in searching the records upon calls for information than would be required to annually continue them when once brought up to current dates.

FRAUDS UNDER EXISTING LAND LAWS.

(To June 30, 1883.)

The frauds committed under the several settlement and disposition laws had become so numerous and glaring that it was found necessary in 1883 to create a special division in the General Land Office to have charge of such matters. It is known as the "Special Service Division P." In the Report of the General Land Office for 1883, pages 206 to 211, will be found details of its operations. The following extracts are given:

INVESTIGATION OF FRAUDULENT LAND ENTRIES.

The work of investigating illegal and fraudulent entry and appropriation of the public lands was assigned to this division April 1, 1883. Since that date all matters in relation to public land investigations have been conducted under its supervision, except such as relate to swamp lands and the examination of frauds in the public surveys.

Notwithstanding the fact that much time has been employed in organizing the division and in the preparation of instructions to special agents, a large amount of work in the field has been performed in the brief period between the organization of the service and the close of the fiscal year.

Thirty special agents are now in the field investigating fraudulent land entries. Three of them (appointed prior to March last), in connection with clerks detailed for

such service, constituted the entire force theretofore engaged in this class of work; the others have been appointed from time to time under the act approved March 3, 1883.

The entries which have been the subject of investigation were made under the pre-emption, homestead, timber-culture, timber-land, desert-land and mineral acts, and the donation act of June 22, 1854, applicable to the Territory of New Mexico.

Pre-emption filings are largely made for timber lands as a cover for timber trespass, the filing being set up as a claim to hold the land until the timber can be removed.

FRAUDULENT PRE-EMPTION FILINGS.

A common abuse under the pre-emption act is the filing of a declaratory statement (section 2264, Revised Statutes) for speculative purposes, the party making the same having no intention to comply with the law and make entry, but filing it solely to make a claim to the land appear of record, which claim is then held for sale to the first *bona fide* entryman who will purchase a relinquishment of the filing rather than run the risk of making an entry subject thereto, and incur delay and expense involved in obtaining its cancellation.

Much desirable land being covered by such filings, parties desiring to enter the same as settlers in good faith, feel obliged under the circumstances to make such purchase in order to exercise the privilege of entry; they feel forced to incur extra expense. That the latter, in many instances, are ignorant of the law and their rights in the premises, inures to the benefit of the speculators. In many instances more is paid for a relinquishment of a filing than the Government price for the land, although the claim purchased may be founded on fraud and perjury. It has been the effort of this division to search out such fraudulent filings, to the end that the records of the office may be cleared of the same, and that honest and *bona fide* settlers may secure for themselves the homes that the law designed they should obtain.

FRAUDULENT PRE-EMPTION ENTRIES.

Large numbers of fraudulent pre-emption entries have been and are being made by parties either for their own benefit or the benefit of others who furnish the money to them for that purpose. The reports of agents show that gangs of men, ranging from ten to fifty, are often employed to make as many entries; that these men are hired at so much a head for that purpose; and that they do not hesitate to perjure themselves in supplying proofs for each other showing that the law has been complied with in every particular. Such violations of law occur in many localities.

FRAUDULENT HOMESTEAD ENTRIES.

Frauds under homestead laws are largely perpetrated in connection with entries in which the parties allege settlement prior to the date of entry, and at the time or soon after give notice of their intention to make final proof; thus being enabled to secure title earlier than in ordinary homestead entries, and in some instances before the discovery of the fraud. In many cases investigated, it is shown conclusively that no improvement has ever been made, the premises showing no evidence of residence or cultivation.

Section 2301 of the Revised Statutes (providing for the commutation of homestead entries) has been made the medium through which title has been secured to large bodies of the public lands without compliance with the requirements of law, the parties seeming to think that if the price of the land is obtained by the Government that is sufficient, and all that ought to be required, and that it is immaterial whether the conditions of the law have been observed or not. In this way moneyed corporations and wealthy speculators acquire title to vast bodies of the public domain, the "settler" being simply an employé paid so much a month to hold the claim until such time as the homestead entry can be commuted, which being done the land is deeded to the party employing and paying therefor. In many instances it has been ascertained that the deed of conveyance was executed in advance of the completion of the entry.

Special agents have been instructed to carefully examine into all entries under the two classes above named, and to report the result of their investigations to this office in order that fraudulent or speculative entries may be suspended or canceled, as the facts presented may seem to warrant.

FRAUDULENT MINERAL ENTRIES.

The fact has been developed that in many instances lands occupied for town-site purposes or adjacent to a town, or valuable for the timber thereon, and containing no mineral of any character whatever in paying quantities, are located and entered as

placer mineral claim; also that in some cases lands valuable only for agricultural purposes are entered under said law.

Where there is reason to suspect that the mining act is thus being made use of for fraudulent purposes, examinations and investigations have been ordered.

FRAUDULENT TIMBER-CULTURE ENTRIES.

Many entries under the timber-culture act are found to have been made solely for the purpose of speculation in the sale of the relinquishments of such entries, and with no purpose to comply with the requirements of the law. Parties have been able in this way to prevent *bona fide* entry of the lands for a term of years, their fraudulent entries being a bar to a valid entry until the record is cleared. Contests for failure to comply with the law as to breaking and planting cannot be entertained until after the expiration of one year from the date of entry; hence, the only course left by which the public lands can be protected against this class of speculative entries is for a special agent to thoroughly investigate suspected cases, with a view to the cancellation of entries where fraud is shown.

FRAUDULENT TIMBER-LAND ENTRIES.

Evidence is cumulative that the act approved June 3, 1878, providing for the sale of timber lands in the States of California, Oregon, and Nevada, and Washington Territory, is made use of by corporations and wealthy individual operators, to secure fraudulently, for the purpose of manufacturing into lumber or to hold for speculation, the accessible forests yet remaining in the States and Territory named. It is not desirable that these lands should pass into the hands of speculators (whose main object is to denude them of timber), and thus to be lost to those who would enter and make use of them in a legitimate manner in connection with their farms and improvements.

The fraudulent removal, under cover of this act, of the timber upon mineral lands, where the same is required for a proper development of the mines, can but have a very depressing effect upon the mining industry, and may result in permanent injury to it.

Still another view of the bad results from this species of speculative entries is that the wholesale destruction of forests resulting therefrom must, as experience has taught, tend to induce in particular sections of country sudden and great floods in streams that have their rise along the watersheds denuded of their timber, destroying or endangering life and property; while in other localities the destruction of the forests have the effect of decreasing the rainfall to such an extent as to render extensive sections of country almost worthless for agricultural purposes.

Another class of speculative and absolutely fraudulent entries made under this act are those made of lands which are valuable for agriculture and not properly subject to entry under said act.

In consequence of evidence already furnished, large numbers of entries under this act have been suspended, and are now being individually investigated.

FRAUDULENT DESERT-LAND ENTRIES.

There has been great abuse in entries under the act of March 3, 1877, to provide for the sale of desert lands in certain States and Territories. Many of the entries are for lands which are not "desert" within the meaning of the law, and which have been shown upon examination to be susceptible of cultivation without the necessity of irrigation. Again, lands which cannot possibly be reclaimed, but which are valuable for timber, are frequently embraced in such entries.

Entries are also made for the benefit of others than the entrymen in evasion of the restriction of the quantity which any one person is permitted to enter under the act.

FRAUDULENT DONATION ENTRIES.

Large numbers of illegal and fraudulent locations have been made in the Territory of New Mexico, under the donation act of July 22, 1854. Section 2 of said act is as follows, viz:

"That to every white male citizen of the United States, or every white male above the age of twenty-one years who has declared his intention to become a citizen, and who was residing in said Territory prior to the first day of January, 1853, and who may be still residing there, there shall be, and hereby is, donated one quarter-section, or one hundred and sixty acres of land, and to every white male citizen of the United States or every white male above the age of twenty-one years who has declared his intention to become a citizen, and who shall have removed or shall remove to and settle in said Territory between the first day of January, 1853, and the first day of January, 1858, there shall in like manner be donated one quarter-section, or one hundred and

sixty acres, on condition of actual settlement and cultivation for not less than four years: *Provided, however*, That each of said donations shall include the actual settlement and improvement of the donee, and shall be selected by legal subdivisions, within three months after the survey of the land where the settlement was made before the survey; and where the settlement was made after the survey, then within three months after the settlement has been made; and all persons failing to designate the boundaries of their claims within that time shall forfeit all right to the same."

Under the decision of the Department, dated November 29, 1882, in the case of Juan Rafael Garcia, the honorable Secretary held as follows:

"I think it was the intent of Congress, in the passage of the New Mexico donation act, that all selections should be made under the act, and settlement and cultivation be commenced by the 1st day of January, 1858, that being the limit of the time within which the necessary residence could be acquired."

In many cases it is found that the donee has in no manner complied with the provisions of the law as to settlement and cultivation. In such cases, fraudulent proof is presented to show settlement on the land prior to January 1, 1858. All such cases deserve and are receiving the attention of this division.

THE GENERAL LAND OFFICE — A SEPARATE BUILDING REQUISITE FOR ITS RECORDS.

Attention has been called for many years past to the want of room for storing and properly caring for the land archives of the nation. The General Land Office, at present located in the western portion of the building occupied by the Department of the Interior in Washington, has neither safe nor proper facilities for caring for its records. Using a large number of very small and unwholesome rooms, together with a gallery in the Patent Office, where many of the clerks are packed close to the roof, the chiefs of division and the executive officers cannot have the actual supervision of subordinates so essential to proper administration. The halls and corridors are masses of valuable paper waiting for fire to clear up the land records of the Government. The floor of the drafting-room is partially filled with maps and plats for lack of shelf or case room. The business of the General Land Office increases from year to year. More acres of land remain for disposition than have been sold or otherwise disposed of. The character of the lands remaining will require great care and exactness in their disposition. Fifty years from the present time, the probabilities are that the General Land Office will be of more service and value than at present, and doing a larger business than the average of any year prior to five years past.

A fire-proof building of brick or stone should be speedily provided for the use of this Bureau.

The health of the employés should have some consideration along with the question of the permanent care of records of lasting value to the people of the entire country.

The Commissioner of the General Land Office, in his annual report for 1883, says:

LAND OFFICE BUILDING.

The necessity for increased accommodations for the Land Office has heretofore been represented to Congress. This necessity is observable to all persons having business with this office, and the importance of providing for it was earnestly urged at the last session of Congress by a special committee of the Senate. The present accommodations are materially less than in previous years, the increase in business not only not being provided for, but former facilities having been impaired and limited by the demands of the Patent Office, which needs all room still occupied by this office.

An important division of this office, in which some twenty clerks are employed and more are required, is now, with a large mass of valuable and important papers and records, quartered in rented rooms at great inconvenience and risk.

The time has arrived when the public interests require the erection of a building for the use of the Land Office and its voluminous records. The records embrace the foundation of title to all the public lands of the United States passed to States, corporations, and individuals by grant, donation, sale, or other disposal. These records are invaluable. To a great extent they could not be duplicated in event of loss or destruction by fire or otherwise. It is of the utmost importance that they be permanently deposited in a perfectly fire-proof building. I earnestly recommend that immediate provision be made for the construction of such building.

INADEQUATE PAY OF OFFICIALS OF THE GENERAL LAND OFFICE.

The General Land Office, charged with the care and custody of the public lands, under the supervision of the Secretary of the Interior, is one of the most important and

responsible public divisions in the administrative circles of the Government. The survey, sale, or other disposition of the nation's public lands is within its control. It employs more clerks than the Navy or State Department or the Department of Justice. Its jurisdiction reaches from Lake Erie to the Pacific Ocean and from Canada to the Gulf of Mexico. Four-fifths of the lands of the entire area of the United States have been or are now under its supervision. It has an army of agents, surveyors, and registers and receivers. Under it are sixteen surveying districts in sixteen States and Territories, each with a surveyor-general, and scores of deputies; and one hundred and seven district land offices, selling or disposing of public lands scattered over an area of 1,200 miles square; also a corps of special timber-agents watching for and preventing depredations from the southern extremity of Florida to the northernmost portion of Washington Territory and Alaska, a broad belt of country almost 4,000 miles in length. To manage all of this grave responsibility we find a commission with the compensation of the manager of a wholesale mercantile house. The chief clerk who also acts as Commissioner—paid the salary of a second-class commercial clerk—and the chiefs of division inadequately paid, over a force of clerks not sufficient in number to carry on the daily business of the office.

An examination will show that several divisions are behind in their work a score of years.

The Commissioner of the General Land Office exercises executive, supervisory, and judicial powers. Cases are frequently decided by him in mineral and private land claims, cases involving millions of dollars. Secretaries of great Departments of the nation have no more duties or more responsibilities. An immense and wearing responsibility lies upon the Commissioner and his assistants. In aid of this he and his staff should be paid a living and proper salary, and a sufficiently numerous clerical force be given him. Pages 164 to 177 will furnish data from which to form an idea of the vast field and range of duties in charge of the General Land Office.

The business and labor of the General Land Office steadily increase from year to year, but the clerical force is not increased proportionately.

Mr. Commissioner McFarland, in his annual report for 1883, so forcibly yet modestly states the wants and necessities of his Bureau, that his statement and reasons are given in full:

ASSISTANT COMMISSIONER.

I renew the recommendation that an Assistant Commissioner be provided for. More than half the time of the Commissioner is taken up with official interviews upon the great variety of topics incident to the administration of the office. Two or three hours daily are consumed in the mechanical work of affixing his signature to letters and documents, numbering about 500 daily, leaving him little or no time for the consideration of important matters to which his personal attention is supposed to be given. An assistant, who should be authorized to sign such letters and papers, and perform such other service as the Commissioner might direct, would relieve the latter of much routine work, and enable him to better attend to the higher duties of his office.

CHIEF CLERK, LAW CLERK, ETC.

My estimates include a recommendation for a moderate increase in the salaries of the principal officers and clerks subordinate to the Commissioner. A greater increase than I have recommended would be expedient in the interests of good administration, and but a just reward for competent and faithful service.

The compensation provided for clerks and employés of the lower grades is reasonable; but the duties which clerks of higher grades are required to perform call for a degree of intelligence and ability that cannot be retained in the service, when secured, at the inadequate compensation provided. The Government needs the best service it can obtain, and is able to pay for it, but the Land Office is often unable to retain valuable clerks. The salaries paid in the Land Office are less than in other Bureaus and Departments not requiring as great capacity or ability. A transfer has recently been made from an $1,800 position in this office, requiring professional skill of a high order, to a similar but not more onerous position in another Department where the pay allowed is $2,500. A skilled assistant, whose services were needed, but who could here be paid but $1,600, received $2,000 by a similar transfer.

The chief clerk of this Bureau performs services of a character that should be paid by an increase of salary to $2,500. He must be competent to act as Commissioner, and his duties involve great tact and discretion as well as constant and arduous labor.

The law officer must be competent to submit opinions to the Commissioner upon the most complex questions arising in the administration of the land laws. He is constantly called upon to perform services requiring a high order of legal ability, and that familiarity with land law and practice which only careful training and long experience can give. I have asked an increase to $2,500 for the law clerk, and to $2,250 for an assistant, whose duties are similar.

I have also asked an increase to $2,000 for two examiners of office decisions, who are now taken from fourth-class clerks, and whose duties are of exceptional character and responsibility.

The early organization of the General Land Office included three principal clerks to be appointed by the President. There were then but three principal divisions. Now there are ten, exclusive of the recorder, chief clerk, and law clerk. There is no reason why a distinction should exist in the method of appointment or official designation of any of the ten clerks who are chiefs of the ten divisions. I renew my recommendation that the distinction adverted to be abrogated.

I have recommended an increase in the salaries of chiefs of divisions to $2,000. They supervise all the work done in their respective divisions as well as the standing and conduct of the clerks, and the amount asked is less than that allowed in other branches of the service for no higher or more responsible duties.

INCREASE OF CLERICAL FORCE.

The General Land Office has been deficient in clerical organization from the beginning. There has at no time been a sufficient number of employés to dispose of current work. The increase provided for from time to time has never been proportionate to the increase of business. The volume of work in arrears at the close of each fiscal year has steadily and rapidly grown larger. At the same time, the amount of work accomplished has been greater in proportion than the increase in clerical force. This has resulted from improved system and continued efforts to promote efficiency, But in late years the increase in the amount of work thrown upon the office has been almost overwhelming. The increase in working force and appropriations has been doled out in pittances, and seemingly more to accommodate the Department than to meet the demands of the service. It is no personal advantage to yourself or the Commissioner that work should be disposed of, but it is of public consequence that this official work should be performed.

It is a matter of deep complaint, and is felt to be a public shame, that men upon the frontier, who are developing the country by their enterprise and labor, should suffer delay, and have their rights imperiled through a false or simulated economy in the necessary disbursements for the conduct of public business.

In 1876 the amount of land disposed of under the public land system was 6,000,000 acres. In 1883 the disposals were 19,000,000 acres, an increase of 200 per cent. The actual amount of new business brought into this office during the last year embraced 226,088 entries, covering 19,430,032.80 acres (exclusive of filings and of areas previously reported), with receipts, exclusive of fees for certified copies, amounting to $11,705,765.65, against 161,396, entries, 14,309,166.40 acres, and $8,387,917.27 the previous year, being an average increase over 1882 of 39 per cent., and an increase over the year 1881 of 82 per cent.

The increase in clerical force allowed by the last annual appropriation was only 10 per cent., one-half of which was absorbed in the entirely new work of protecting the public lands provided for by recent legislation.

A large volume of work is annually thrown upon the office for which no provision is made in the usual estimates for clerical force. This consists in the preparation of official reports and answers to Congressional and other inquiries. Much of the time of a large number of clerks is occupied during the sessions of Congress, and frequently at other periods, in this manner.

There are now pending before this office 600,000 claims of record in some stage of inception or progress under general laws, exclusive of railroad grants, swamp and mineral lands, and private land claims. The pending agricultural claims alone involve an adjudication of title to 90,000,000 acres. If but one-half of these claims should be perfected into title it would take the present force employed upon this work three years to complete the adjustments, leaving the whole volume of business that might come up within that period unprovided for.

I have asked for one hundred additional clerks for the service of the next fiscal year. This estimate was made before the completed returns and accounts had disclosed the extent of the increase in business during the year, and without fully considering the inadequacy of such estimate. It is my most conservative opinion that two hundred additional clerks of the higher grades are immediately needed, and could

be employed with economy to the Government for a number of years to come. Provision for a grade of examiners of land titles, corresponding to the grade of principal examiners in the Pension Office, would be extremely desirable.

SALARIES.

It cannot be suggested that the General Land Office is less important to the public interests than other Bureaus of the Executive Departments, nor that the duties devolving upon the Commissioner are less comprehensive or arduous than those pertaining to any other office of similar grade. And yet the salary attached to this office is smaller than that allowed in several other positions involving a no greater magnitude of interest nor more exacting duties. The character and responsibilities of this office appear to me to justify the moderate recommendation that the salary of the Commissioner be fixed at $5,000. The foregoing recommendations for increase of official compensation are believed to be moderate and within the legitimate requirements of a proper administration of the public land system.

RECOMMENDATIONS OF THE PUBLIC LAND COMMISSION.

The Public Land Commission in its preliminary report February 24, 1880, 46th Cong., 2d session, Ex. Doc. No. 46, pages xiii to xv, inclusive, gives much valuable and historical data in relation to the duties devolving upon and wants of the General Land Office.

REPORT OF THE SENATE COMMITTEE ON PUBLIC LANDS.

The following report of the Senate Committee on Public Lands as to the requirements and necessities of the General Land Office is printed in detail. The testimony attached to it, 158 pages, as to the abuses and hardships existing under the several disposition laws is not printed. It is, however, of much practical value and interest.

It is unnecessary to say, perhaps, that no legislation of moment followed this investigation and report.

[Senate Report No. 362, 47th Congress, 1st session.]

IN THE SENATE OF THE UNITED STATES.

APRIL 3, 1882.—Ordered to be printed.

Mr. MORGAN, from the Committee on Public Lands, submitted the following report, to accompany bill S. 1619:

The Committee on Public Lands, to whom were referred the following resolutions—

"*Resolved*, That the resolution of the Senate adopted on the 27th day of October, 1881, authorizing the Committee on Public Lands to investigate the condition of the General Land Office with a view to providing better accommodations for the officers and employés thereof, and a proper grading of the clerks, and for the preservation of the books and papers, be revived and continued until the further action of the Senate.

"Attest:

"F. E. SHOBER,
"*Acting Secretary.*"

On motion by Mr. Blair:

"*Resolved*, That the Committee on Public Lands be instructed to inquire into the administration of the land laws and system, and their operation in the practical disposition of the public lands, and any abuses and hardships which may exist in their administration, and to report to the Senate any facts and recommendations with reference to the same, which, in their opinion, the public interests may require.

"Attest:

"F. E. SHOBER,
"*Acting Secretary.*"

have had the same under consideration, and respectfully report their recommendations thereupon; and the evidence taken by order of the Senate.

The evidence taken under these resolutions includes the statements of the Commissioner of the General Land Office, and the depositions of the chief clerk, the law clerk, the head of each division, and of the chief clerk of the Interior Department.

From these statements a full understanding of the actual condition of the General Land Office, and of the Interior Department building, can be obtained. The committee agree that the Interior Department edifice is incapable of properly accommo-

dating the Patent Office, the Bureau of Indian Affairs, and the General Land Office, and that these difficulties and embarrassments are increasing rapidly.

The want of sufficient room, light, and ventilation is very damaging to the health of the employés, and greatly delays them in their work, causing a serious loss of time and efficiency in their service. It also exposes the most valuable papers and records to theft, and to great danger from fire, and has already caused the destruction of many of them by mold and decay, and by the ravages of insects and vermin.

Mr. Lockwood, chief clerk of the Interior Department, has the supervision of the entire building. His entire deposition is referred to as presenting in condensed form a general view of the condition of each bureau in the department.

The statements of Mr. Lockwood are supported in detail by every witness examined by the committee.

It is obvious that there must be a change in the accommodations for the several bureaus now occupying the Interior Department building. The removal of the Indian Bureau to another building would afford some temporary relief, but that would be inadequate even to the present necessities of the Patent Office and Land Office, and must, if made, be followed soon by other like expedients. What new arrangements will give permanent relief from this defective and embarrassing condition of the Interior Department must be determined by the settlement of the question whether the General Land Office shall remain a Bureau in the Interior Department. If it remains in the Interior Department, its removal to another building cannot be avoided, or long delayed, as well for its own accommodation as to make room for the Patent Office and the Bureau of Indian Affairs.

This question includes far more that is important to the people of the United States, of this and coming generations, than the orderly and prompt transaction of the business connected with the disposal of our vast public domain; but that consideration alone is sufficient to demand the earnest attention of Congress to the necessity that exists for some change that will secure a better supervision of the business of the General Land Office.

The condition of the business of that Bureau is illustrated, rather than fully disclosed, in the testimony submitted with this report. This evidence, which does not include a full statement of the condition of the Land Office because of the reluctance of the committee to swell the report with statements in complete detail, shows the following state of facts:

1. In the division of private land claims there are at least 8,733 claims yet unadjudicated from the State of Louisiana alone. These claims originated under treaties.

In Oregon and Washington Territory 2,343 claims remain to be adjudicated.

In New Mexico, under the donation act of July 22, 1854, 208 claims remain for adjudication.

In California 53 claims remain to be disposed of.

* * * * * * *

To show the age of many of these claims, Mr. Harrison states that "in Louisiana alone there are at least 10,000 claims, some of which were adjudicated as far back as 1807, and from that time to the present we have not disposed of more than 1,300. The average number of letters written from this division is 1,300 per annum, of which some require a clerk three or four days to prepare."

In the public lands division, the chief, Mr. Howell, states as follows:

"We have charge of the adjudication of all private cash entries, private locations with land warrants, and the several kinds of scrip, homesteads, timber-culture entries, timber-land entries, restored military and Indian reservations, public sales under President's proclamations, and other minor details that do not occur to me now. This division is the basis and framework of other divisions of the office. We post in our records all pre-emption filings and entries, as well as the entries and filings adjudicated in this division. We also note on our records swamp-land selections, university selections, public offerings, executive withdrawals, town-site entries, donation claims, &c. Many of the postings come from other divisions of the office.

"Q. It is rather a historical division?—A. We note in permanent records most of the transactions in the administration of the land service.

"Q. Does that include also private land claims?—A. We note a reference to private land claims whenever possible, but the descriptions of those claims are so irregular, and there are so many conflicts in regard to boundary lines, and points of that kind, that that work is left to the division of private land claims.

"Q. Are pre-emption entries also in your jurisdiction?—A. We post all pre-emption entries and note any conflicts. The pre-emption division adjudicate the claims, and on their approval of the cases they are sent back to our division so that we can note their approval on our records. The clerks in the pre-emption division pass upon the sufficiency of proof."

Mr. Howell states that his division, with about fifty clerks employed, is six months behind, in the *mere posting of entries*, without which no work can proceed properly in any other division where any question of title, survey, or location may arise. This

division is also behind from one to six months in its correspondence. There are more than 1,000 contested cases pending in this division, and a still larger number held for consideration as being in conflict with other entries where no actual contest has been instituted.

This division has been crowded out of the rooms into a long hallway, on either side of which are open alcoves for the cases in which patent models are intended to be kept. The papers of the division, which must be frequently examined, are some of them in the first basement, and are scattered in cases from there to the attic, wherever room can be found for them, in the open hallways or elsewhere. The clerks have frequently to walk a fourth of a mile to get a paper that is needed, and it requires the skill of an expert to know exactly where to look for it. Some of these contested cases involve property to the value of millions of dollars. Mr. Howell says, "Of the several classes of entries on the records yet to be examined and passed upon, there are doubtless 100,000 cases, and with pre-emptions and soldiers' filings they embrace an aggregate area of more than 20,000,000 acres of land." In this division about 100 letters are written each day; the correspondence is much behind, and in some cases letters are filed away with the papers in the case until it is decided, and so remain unanswered for as much as a year.

In the pre-emption division there are 1,195 contested cases undecided, and 7,879 cases suspended or not acted upon. In this division 6,877 letters are written annually. In each of the above divisions the records run from ten pages to one thousand.

The mineral-land division was organized in 1866. This division examines the mineral-land surveys, and writes up the patents issued to claimants. The increase of business is very rapid; 1,718 cases are remaining to be examined, besides 20 contested cases, and 575 cases that involve the character of the land as to whether it is mineral land. This division is three weeks behind in its correspondence.

The surveying division is about one month behind in its work. The statements of Mr. Dallas, the chief of the division, are valuable as showing the imperfections in our public surveys, and the necessity of having inspectors of the work actually in the field. In the swamp-lands division there are "hundreds of cases" of private claims opposed to claims of States that are not acted on, and 14,000,000 acres of land claimed by States under swamp-land grants not acted upon. Some of the contested cases are twenty years old.

The railroad division was organized in 1872. Its jurisdiction covers an estimated area af 155,000,000 acres of land, of which 47,392,765 acres have been patented, and selections are pending and to be decided for 2,145,000 acres.

There are 3,921 cases of actual entries within railroad land-grant limits not disposed of, and 970 cases contested and not disposed of in this division. "In many cases the record is voluminous, and the questions involved are intricate, requiring very careful examination and consideration to reach proper decisions." This is equally true of the other divisions. The letters received during the last fiscal year were 3,727, and 6,153 were written and recorded. Some classes of work are greatly in arrears.

The work of the recorder's division has been largely increased by the addition to it of the Virginia bounty-land bureau, and the bureau of military bounty lands. Some of the cases undisposed of are very old. Scrip in favor of the estate of John Paul Jones was recently issued in one of them. In about 12,000 cases patents are yet to be written.

There are in the Land Office, not actually delivered, 291,572 patents that are in all respects complete and ready for delivery. These, being mostly of parchment, are being destroyed by rats, and obliterated by the lapse of time.

In the division of accounts some important parts of the work are four months behind. This division is called upon frequently by Congress and the Interior Department for statistical tables and statements, which are prepared by the clerks, who would find all they could do to keep the accounts of the division up to date. No account is kept in the General Land Office of moneys received for timber depredations. In the law clerk's division the business referred to it is several months in arrears, and many cases that require examination are never referred to this division, because the two clerks assigned to it are not able to examine them for want of time.

The forests of the country on the public domain are suffering greatly from depredations. The timber division is poorly provided with means to prevent this waste, which endangers the farming interest by its effect on the rainfall, and is rapidly sweeping away grand bodies of timber that can never be replaced.

Enough appears in these statements to induce careful attention to this bureau of public lands, which has in its charge the evidences of title to all the vast area of lands that has passed from the United States into private ownership, and the future disposal of an area that can be sold at some price, and much of which is very valuable, of about 1,500,000,000 acres.

The General Land Office is a great land court, with a jurisdiction that includes almost the entire range of the vast number of questions that arise out of our system of legislation respecting the public domain, if the changing, shifting, temporizing, and often conflicting legislation of Congress on this subject can be justly called a system.

Confusion and contradiction in the decisions of the General Land Office, of the local land offices, and the courts have been the natural results of the character of our legislation and the imperfect administration of our land laws.

The bills for special relief now before Congress, and that have for years been urged here, the claims for indemnity for time, labor, and money expended by patentees and other persons whose titles, issued under an act of Congress, or under one decision of the General Land Office, which have been destroyed by other laws or decisions, are sufficient proof of the necessity of a better administration of our land laws.

Doubtless Congress is responsible for much of this trouble and loss to the people, but far the general part of it is due to an inefficient administration of the land laws, in the shallow and hasty consideration given to their meaning and proper application to cases by the general and local land offices. It is only justice to say that the Secretaries of the Interior, the Commissioners of the General Land Office, and the chiefs of divisions have, as a rule, been able and efficient officers, and they have devoted all the time and energy possible to the faithful discharge of their duties to the public. The clerks also, as a rule, have done their duty diligently and faithfully and with far more of ability than could reasonably be expected from men who eke out a bare subsistence on the salaries allowed them, when they could earn twice the money or more in other service or pursuits. The fault is in the system, which is, after all, as good as could be devised with the facilities afforded by Congress, in room, light, ventilation, the number and grade of clerks, and their pay.

Every officer examined testifies to the necessity of having the pay of certain classes of clerks increased, so as to put a higher grade of talent and information within reach of employment for the more responsible clerkships in the several divisions, and to keep men in place after they have become experts in the great variety of special subjects that constantly arise for examination.

They also testify as to the number of clerks needed in addition to those now authorized to bring up the business in arrears, the entire number required to bring up the work and keep it up being about 90. For the year ending June 30, 1881, the clerical force of the General Land Office numbered 195. The Commissioner in his estimate submitted with his annual report asks for 243 clerks, which is an increase of 48 over the number employed at the close of the last fiscal year, and of 42 over the number now allowed. Under the last appropriation the sum allowed for all salaries, clerk-hire, messengers, and labor, was $287,820. The amount estimated for is $389,400, as follows:

Commissioner	$5,000 00
Deputy commissioner	3,000 00
3 inspectors of surveyor-general and district land offices, at $3,000 each	9,000 00
Chief clerk	2,500 00
Law officer	2,500 00
Recorder	2,000 00
3 principal clerks, of public lands, private lands, and of surveys, at $2,000 each	6,000 00
6 chiefs of division, at $2,000 each	12,000 00
Receiving clerk	2,000 00
Chief draughtsman	2,000 00
35 clerks of class 4, at $1,800 each	63,000 00
50 clerks of class 3, at $1,600 each	80,000 00
60 clerks of class 2, at $1,400 each	84,000 00
55 clerks of class 1, at $1,200 each	66,000 00
35 copyists, at $900 each	31,500 00
Chief messenger	900 00
8 assistant messengers, at $720 each	5,760 00
6 packers, at $720 each	4,320 00
12 laborers, at $660 each	7,920 00
	389,400 00

The cash receipts on account of lands and land entries during the last fiscal year were $5,408,804.16.

But 10,893,397 acres of land were disposed of, showing that the cash sales represent only a small proportion of the work done by the land offices. A large income was derived from fees for the work of the employés of the land offices.

In comparison with this amount of receipts, and the current work of the bureau, the foregoing estimate is certainly very moderate.

Many other matters in which legislative reforms are needed are disclosed in this testimony, but the committee think it better not to attempt to patch up a defective system until it has been determined that Congress prefers that system to the change they propose.

This great land court—the General Land Office—now has pending before it not less

than 140,000 cases for examination, of which about one-third are contested, either with the Government of the United States or with private litigants.

As it has been in the past, so it will be in the future, that ninety per cent. of the decisions made in this tribunal will be final and conclusive of the title to the lands in controversy. The value of those lands can scarcely be computed, so rapidly is the increase of value from the improvements put upon them by occupants, from railway extensions, from the enormous immigration to the United States, the rapid natural increase of population and wealth, and the growth of new industries.

The testimony discloses that the great body of those cases are in fact decided by the division clerks, many of whom are not educated lawyers; and who get pay at the rates of from $1,000 to $1,800 per annum.

It is greatly to their honor that so little is alleged against their integrity under such circumstances.

A single case is frequently found to cover more than a million dollars in value, and to require an examination of a record of over a thousand pages.

The clerk takes the case assigned to him and examines the record and finds the facts, giving such weight to the testimony as he thinks it entitled to, both as to competency and credibility, and its value in comparison with other contradictory statements. On his findings he applies the law as he understands it, and that is the adjudication of the case to stand until it is reversed.

The chief of the division takes the facts as found by the clerk and reviews the application of the principles of law, which the clerk has announced, to the case in hand and passes upon the soundness of his rulings on the law.

This is done when the chief of division has the time to give the case even this slight examination, but it is the exception and not the rule, that he can do so much in the re-examination of the case. He never reviews the facts as found by the clerk, unless some exception taken or some special order from a superior makes it a special duty.

A board of general supervision is organized by the Commissioner of the General Land Office, not under any law of Congress, consisting of three clerks detailed from other duties to examine all the letters written from all the divisions and all the decisions made in each.

It will be readily seen that this board cannot perform this work thoroughly from sheer lack of time and physical strength. They give a rapid glance at such matters as seem to be most important, and only in rare cases do they stop a case on its hurried progress through the official routine.

This scarcely amounts to a pretence of a review. The case then goes to the chief clerk and from him to the Commissioner. Neither of these officers have so much time as those through whose hands the cases have come to review them, and they are passed into decisions, no one objecting.

In contested cases, where the parties are able to employ counsel, exceptions and appeals contribute to procure a more thorough review, but in those cases, of which there are many, the decisions must be greatly delayed, from the pressure of other current business, in every stage of their progress, and must be examined in the midst of many urgent demands upon the time and attention of the Bureau officers to other business of equal or greater importance. If the case is difficult, and the Commissioner is advised of the trouble, he refers it to the law clerk, and his examination is delayed by a great pressure of business in his office. If the case reaches the Secretary of the Interior it is then brought into competition with a vast multitude of cases and questions and duties that engage his attention, from his important part in the general executive administration of the entire country, down through the Patent Office, the Pension Bureau, the Bureau of Indian Affairs, the Bureau of Education, the General Land Office, the Geological Survey, the Census Bureau, the office of Commissioner of Railroads, the Pension Agency, and the appointments to offices in which thousands of officers, clerks, and employés are to be heard, in some form, and provided for.

When we consider the number of cases and questions that grow out of our complicated land laws, in which the highest officer in the Department should settle and announce the rulings, and the actual impossibility that he can make personal examination into one case in a hundred that really need his supervision, it becomes evident that Congress should provide a better security for the wise and enlightened administration of this great landed estate held in trust for the people.

To your committee it appears to be the plain duty of Congress either to aid the Secretary of the Interior in giving a larger part of his time to the public lands and their administration, by transferring other Bureaus, now in the Interior Department, to some other Department, or to give to the public lands a more efficient and satisfactory supervision, by creating a Department of Public Lands, similar in its organization to the Department of Agriculture. This fact is so patent that it needs no discussion. An argument is urged against this plan that the Bureaus of Lands and Indian Affairs are so intimately connected that it will be difficult to separate them.

Your committee are not convinced that this is a real difficulty.

The Bureau of Indian Affairs was created by the act of July 9, 1832, in the War Department. The General Land Office was created April 25, 1812, as a Bureau in the Treasury Department, and was transferred to the Interior Department March 3, 1849; and in the same act the Bureau of Indian Affairs was transferred from the War Department to the Interior Department.

They were no more identified in their jurisdiction or duties after the transfer than they had been while they were in different Departments. Your committee do not find in the laws of the United States any enactment which gives to the Bureau of Indian Affairs, or any officer or agent thereof, any authority over the disposal or occupancy of the public lands, subject to sale or open to entry, in conflict with the jurisdiction conferred by law on the General Land Office, its officers or agents.

Without attempting a full discussion of this topic in this report, your committee recommend that a Department of Public Lands be created by law, and will hereafter report a bill for that purpose.

This Bureau, more than any other, unless it is the Patent Office or Printing Office, requires a building especially adapted to the nature of the business to be conducted in it.

Your committee also report a bill.

As it will be necessary, in any event, to provide immediately for additional room for the accommodation of the General Land Office, your committee recommend that this subject be referred to the Committee on Public Buildings and Grounds for their consideration.

GENERAL LAND OFFICE.

TO DECEMBER 1, 1883.

Administration of the land service, December 1, 1883.

SURVEYS OF THE PUBLIC LANDS

TO JUNE 30, 1883.

(See pages 178 to 195, to June 30, 1880.
See pages 567 to 676, to June 30, 1882.
For list of surveyors-general to June 30, 1883, see page 554.)

SURVEYS.

The areas of public surveys executed during the year 1883 was as follows:

	Acres.
Surveys of public lands	54,129,400.28
Surveys of Indian lands	512,098.53
Surveys of private land claims	642,233.98
Total number of acres surveyed during the fiscal year	55,283,732.79

At a cost of about 4 cents per acre.

Two thousand six hundred and seventy township plats and field notes of surveys of public lands and private land claims were examined during the year, and three hundred and fifty-one surveying contracts entered into by surveyors-general were examined and approved.

CERTIFICATES OF DEPOSIT ON ACCOUNT OF SURVEYS.

(See Pages 184, 185, and 569 to 572.)

The amount covered by certificates of deposit on account of surveys examined and accepted in payment for public lands during the year was $1,720,800.70.

The amount deposited for surveys under the individual deposit system was $1,162,935.58.

For data of importance as to the individual deposit survey system, see pages 569 to 572 and 1242, together with the recommendation of the Commissioner of the General Land Office for the repeal of this law. See also circular of September 15, 1883, relating to individual deposits, at end of this chapter. Congress seems to know nothing about the practical operations of this law or its abuses. (Sec. 2401 to 2403 R. S.)

Rates of survey for 1883 remain the same as on page 573. The Congressional appropriations were $400,000 for the year 1883 for surveys; the individual deposits $1,162,935.58—three times as much as made by Congress. The area of surveyed and undisposed of public lands June 30, 1883, was estimated at more than 243,000,000 acres, exclusive of the lands in the Southern States. (See page 528.)

CONGRESSIONAL APPROPRIATIONS FOR 1883.

(See Page 568 for 1881 and 1882.)

By the act of Congress approved August 7, 1882, there was appropriated $400,000 for the survey of the public lands for the year ending June 30, 1883. Said act provided for the expenditure of not exceeding $50,000 thereof for examinations of surveys in the field.

The appropriation for surveys was apportioned by the Commissioner of the General Land Office to the 16 surveying districts in accordance with the respective demands for field work called for by the public service, to wit:

To the district of—	
Arizona	$20,000 00
California	25,000 00
Colorado	50,000 00
Dakota	45,000 00
Florida	25,000 00
Idaho	15,000 00
Louisiana (actual)	17,292 38
Minnesota	20,000 00
Montana	31,500 00
Nebraska and Iowa	15,000 00
Nevada (actual)	20,590 52

To the district of—	
New Mexico (actual)	$24,944 20
Oregon	20,000 00
Utah	20,000 00
Washington	35,000 00
Wyoming	20,000 00
	381,377 10

By the same act of Congress there was also appropriated for surveys of private land claims during the year—

In Arizona	$8,000
In New Mexico	8,000
In California	10,000

TOTAL APPROPRIATIONS AND PRIVATE DEPOSITS FOR THE YEAR 1883.

(FOR 1883, SEE PAGES 570 AND 573.)

Total Congressional appropriations for the year to June 30, 1883	$400,000 00
Total deposits by persons or corporations for private surveys	1,162,935 58
Total	1,562,935 58

CONGRESSIONAL APPROPRIATIONS FOR 1884.

By the act of Congress approved March 3, 1883, $425,000 was appropriated for the survey of the public lands during the fiscal year ending June 30, 1884. This was not used, nor was it available, until after June 30, 1883.

The area surveyed was 55,283,732.79, at a cost of $2,195.625.66, or about 4 cents per acre.

AREAS OF SURVEYS FOR 1883.

(SEE PAGE 570.)

The extent of surveys during the year ending June 30, 1883, payable out of Congressional appropriations, and individual deposits for surveys of public lands, under section 2401 Revised Statutes, as reported, was as follows:

Land States and Territories.	Public lands.	Private land claims.	Indian lands.
	Acres.	*Acres.*	*Acres.*
Arizona	2,640,505.09		
California	3,726,176.04	58,238.75	
Colorado	3,966,773.79		202,410.45
Dakota	4,067,982.17		22,540.32
Florida	109,945.00		
Idaho	152,103.34		
Louisiana	392,237.50	750.72	
Minnesota	539,482.42		
Montana	1,265,695.98		
Nebraska	1,146,800.71		
Nevada	5,518,559.02		
New Mexico	12,847,969.93	583,244.51	
Oregon	2,492,323.50		
Utah	671,184.94		287,147.76
Washington	755,842.02		
Wyoming	13,835,818.83		
Total	54,129,400.28	642,233.98	512,098.53

SURVEYED AND UNSOLD LANDS.

(SEE PAGES 573 AND 528.)

The United States June 30, 1883, owned, in round numbers, 255,000,000 of acres of surveyed lands which were unsold.

SURVEYED AND UNSURVEYED LANDS TO JUNE 30, 1883.

(See Pages 16, 17, 189, and 574.)

The total area of public lands (from the beginning of the land system) surveyed to June 30, 1883, was 886,367,361 acres. The total area of public lands remaining unsurveyed to June 30, 1883, was 928,462,577 acres.

Tabular statement showing the number of acres of public lands surveyed in the following land States and Territories up to June 30, 1882, *during the present fiscal year, and the total of the public lands surveyed up to June* 30, 1883; *also the total area of the public domain remaining unsurveyed within the same.*

Land States and Territories.	Area of public lands in States and Territories.		Number of acres of public lands surveyed.				Total area of public and Indian lands remaining unsurveyed, inclusive of the private land claims surveyed up to June 30, 1883.
	In acres.	In square miles.	Up to June 30, 1882.	Under contracts made prior to June 30, 1882, but not heretofore reported because returned since June 30, 1882.	Under contracts made for the fiscal year ending June 30, 1883.	Total up to June 30, 1883.

a Of the surveys in Colorado, 202,410.45 acres are of Southern Ute lands, surveyed into 40-acre tracts for allotments to the Southern Ute Indians under act of June 15, 1880, and not heretofore reported.

b Of the surveys in Dakota, 22,540.32 acres were of the old Sioux Indian reservation west of Big Stone Lake. This reservation was resurveyed, and the area by resurvey was reported as 137,648 acres, an increase of 22,540.32 acres over the area reported by the original survey.

c Of the surveys in Utah, 287,147.76 acres were of lands within the Uintah Indian reservation, surveyed into 46-acre tracts for allotments to the White River Utes, under contract of D. G. Major, dated February 23, 1882, and act of June 15, 1880.

ENORMOUS AREA AND EXTENT OF SURVEYS UNDER THE PRIVATE DEPOSIT SYSTEM.

(See Page 570.)

During the fiscal year 1882, $2,013,270.77 was deposited by individuals and corporations for surveys. (See page 570 for table). During the fiscal year 1883, $1,162,935.58 was deposited for the same purpose, as follows:

DEPOSITS FOR PRIVATE SURVEYS OF PUBLIC LANDS TO JUNE 30, 1883.

(See Page 570.)

Statement showing the amount deposited by individuals and corporations for field and office work on account of the survey of public lands in the several surveying districts during the fiscal year ending June 30, 1883.

OFFICIAL RECOMMENDATIONS.

(See also Pages 184, 185, 569 to 573.)

Mr. Commissioner McFarland, in his official report for 1881, says of this law:

SURVEYS UNDER SECS. 2401-'2-'3, REVISED STATUTES.

The vastly increased area of the public-land surveys during the past fiscal year, as compared with that of previous years, is due to the facilities afforded to individual depositors under the provisions of the act of Congress approved March 3, 1879, amending section 2403 of the Revised Statutes so as to allow the assignment of certificates of deposit by indorsement, and making them receivable in payment for any public lands of the United States entered by settlers under the pre-emption and homestead laws.

The aggregate of deposits by individuals applying for surveys and declaring themselves, under oath, to be *bona fide* settlers amounted during the year to $1,874,523.68, thus exceeding the Congressional appropriation ($300,000) in the ratio of six to one.

Very extensive tracts of inarable lands, devoid of timber sufficient even to supply posts for marking the corners of the public surveys, have been surveyed, and the topographical features, when delineated on township plats from the field notes of deputy surveyors, fail, in a majority of cases, to show any evidence of settlement.

Fraudulent affidavits have undoubtedly been obtained by deputy surveyors for the purpose of securing as many and as large contracts as possible. Hundreds of said contracts were entered into, averaging say thirty to each surveying district, and returns of survey thereunder were duly made to the surveyors-general who, having no means of inspecting the work, were constrained to accept it whenever it appeared from the *intrinsic evidence* of the *returns* that the surveys had been properly executed, and without any other evidence whatever, while, if the survey is not properly made

and the corners duly established, a resurvey will be necessary at a future day should a demand for the lands arise, and thereby confusion would result and property rights be imperiled.

It may here be stated that the unusual estimate of $50,000 for examination of surveys in the field was made with a view to the possible continuance of the present law, and the possible want of authority to pay the expense of a thorough inspection to test the integrity of such surveys from any other source.

CIRCULAR INSTRUCTIONS RELATIVE TO DEPOSITS BY INDIVIDUALS FOR THE SURVEY OF PUBLIC LANDS.

GENERAL LAND OFFICE, SEPTEMBER 15, 1883.

(Supersedes circular of March 5, 1880, and all amendatory instructions. See pages 569 to 573.)

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., September 15, 1883.

To Surveyors-General, Registers, and Receivers:

GENTLEMEN: The circular of this office dated March 5, 1880, relative to surveys under the provisions of section 2401, Revised Statutes of the United States, and the acceptance by receivers of public moneys of certificates issued for deposits made under the provisions of said section, is hereby revoked, and the following substituted therefor:

1. The provisions of law governing such surveys and the issue and application of certificates of deposit on account thereof, are sections 2401, 2402, and section 2403 as amended by the acts of March 3, 1879, and August 7, 1882.

SECTION 2401. "When the settlers in any township, not mineral or reserved by Government, desire a survey made of the same under the authority of the surveyors general, and file an application therefor in writing, and deposit in a proper United States depository, to the credit of the United States, a sum sufficient to pay for such survey, together with all expenses incident thereto, without cost or claim for indemnity on the United States, it may be lawful for the surveyor-general, under such instructions as may be given him by the Commissioner of the General Land Office, and in accordance with law, to survey such township and make return thereof to the general and proper local land office, provided the township so proposed to be surveyed is within the range of the regular progress of the public surveys embraced by existing standard lines or bases for the township and subdivisional surveys."

SEC. 2402. "The deposit of money in a proper United States depository, under the provisions of the preceding section, shall be deemed an appropriation of the sum so deposited for the objects contemplated by that section, and the Secretary of the Treasury is authorized to cause the sums so deposited to be placed to the credit of the proper appropriations for the surveying service; but any excesses over and above the actual cost of the surveys, comprising all expenses incident thereto for which they were severally deposited, shall be repaid to the depositors respectively."

SEC. 2403. (As amended by act of March 3, 1879.) "Where settlers make deposits in accordance with the provisions of section twenty-four hundred and one, the amount so deposited shall go in part payment for their lands situated in the townships, the surveying of which is paid for out of such deposits; or the certificates issued for such deposits may be assigned by indorsement and be received in payment for any public lands of the United States entered by settlers under the pre-emption and homestead laws of the United States, and not otherwise."

The act of August 7, 1882, making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1883, provides as follows:

"That no certificate issued for a deposit of money for the survey of lands under section 2403 of the Revised Statutes, and the act of March third, eighteen hundred and seventy-nine, amendatory thereof, shall be received in payments for lands except at the land office in which the lands surveyed, for which the deposit was made, are subject to entry, and not elsewhere; but this section shall not be held to impair, prejudice, or affect in any manner certificates issued, or deposits and contracts made, under the provisions of said act prior to the passage of this act."

APPLICATION FOR SURVEYS.

2. Applications for surveys under section 2401 must be made in writing, in the form prescribed by this office, dated January 20, 1882, and must designate as nearly as

practicable the township to be surveyed, and state that the applicants are actual *bona fide* settlers therein, that they are well acquainted with the character and condition of the land included in said township, and that the same is not mineral or reserved by Government.

3. The mineral character of a township will be determined from the character of the greater portion of the land. Where it is not known that the greater portion of the land of a township is mineral, such township will be deemed surveyable under the provisions of section 2401. In such case the application will state the fact that the greater portion of the land is not mineral.

4. Every application for a survey must be accompanied by affidavits corroborating in full the statements made in the application.

5. The applications and affidavits, certified by the surveyor-general of the district within which such lands are situated, must be transmitted to this office with the contract entered into for the survey thereof.

6. Where the partial survey of a township becomes necessary on account of natural obstructions to a complete subdivision of the same, or of previous partial surveys, or for other good and sufficient reason, and it is impracticable to proceed regularly from a connection with the established southeast corner of the township, the survey must be connected with the nearest and most accessible established corner of existing surveys, and the lines must be properly run, measured, and marked from that point, so as to represent accurately and correctly the sections and subdivisions embraced in the surveys under execution. In such case the connecting corner should be fully identified and described in the manner required by law and instructions, and a full explanation should be given in the field notes of the deputy, showing the reasons for its adoption as the corner from which additional surveys are initiated.

7. Where one or more settlers on public lands make application as aforesaid for the survey of a particular township at his or their expense, the surveyor-general shall furnish the applicant or applicants two separate estimates, one being for the cost of the subdivisional survey of the surveyable portion of the entire township, and the other to cover all the expenses incident thereto. The surveyor-general will take the precaution to estimate adequate sums in order to prevent deficiencies in the cost of the service.

7. Surveyors-general will not under any circumstances accept, for the purpose of making the deposit moneys from applicants for surveys, either *mineral* or *agricultural*, but will instruct the applicants to deposit the estimated cost of the survey desired in some United States depository in the surveying district within which the lands are located.

Should there be no depository within the district, the deposits should he made with the nearest United States assistant treasurer, or other depositary. Applicants must be instructed fully as to the necessity of transmitting the *original* certificate to the Secretary of the Treasury, the *duplicate* to the surveyor-general, and the retention of the *triplicate*.

9. The surveyors-general shall exercise the most searching scrutiny into the statements of applicants for survey, to satisfy themselves of the truth thereof, and unless found to be *bona fide* in every respect they shall not accept such applications nor furnish the estimates requested.

10. Believing that in a great many instances applications for survey, particularly in sections of country unfit for settlement, have been procured or invited at the instance of deputy surveyors seeking contracts, you are instructed that such proceedings on the part of deputy surveyors are unlawful, and that contracts thus unlawfully procured will not be recognized as valid. The surveyor-general must minutely examine into all applications for surveys under the deposit system. If he is satisfied that the deputy has acted in the manner described, the commission of such deputy shall be forthwith revoked, and the surveyor-general shall report all the facts, with the findings in the case, to this office. Upon approval thereof, such deputy shall be deemed unfit to exercise the functions of a deputy surveyor, and the approval of a finding against a deputy will be communicated by this office to each surveyor-general for his information and guidance; and any surveyor-general who shall fail to report such deputy, or who shall employ any deputy so barred, will be open to charges to be preferred by the Commissioner of the General Land Office to the Secretary of the Interior.

11. Surveyors-general are required to exercise the utmost care and vigilance to prevent frauds and irregularities of any kind regarding surveys under the system of deposits by individuals, as also of surveys made under any other appropriation of moneys by Congress, whether general or special, and they will report each and every fact that may come to their knowledge of any attempted fraud, by whomsoever made, with all obtainable particulars, to this office for consideration and action.

12. The plats and field notes of surveys under the system of deposits by individuals, as returned to this office, do not usually show the settlements and improvements of the settlers at whose instance the surveys are ostensibly made. In a majority of in-

stances the location of the settler, whether *bona fide* or otherwise, is entirely omitted, while the improvements, if any, are never noted. In order, therefore, to still further check the abuses and dishonest practices to which this system of surveys has become subject, the attention of surveyors-general and deputy surveyors is specially directed to the requirements of pages 43 and 44 of the Instructions of the Commissioner of the General Land Office, dated May 3, 1881. The requirements therein contained must be strictly adhered to, and surveyors-general are required and enjoined to see to it that their deputies comply therewith.

13. Surveyors-general are directed to instruct their deputies that they must designate in the field notes and plats of their surveys the location of each and every settlement within a township surveyed under the deposit system, whether it be permanent in character or not, together with the names of such settlers and their improvements, if any. Cattle corrals are not considered as constituting improvements.

14. When no settlers are found within a township surveyed under the system of individual deposits, the field notes of survey must distinctly and unequivocally state that fact, and any omission so to describe and designate the settlements and their surrounding improvements, or the absence of one or both in the field notes and plat, will be deemed a sufficient cause to infer fraud, and the accounts of the deputy will be suspended until such omission shall have been supplied to both plat and field notes. A suspension of the commission of the deputy will in the meantime take place, and all the facts will be reported to this office for consideration and action.

15. Surveyors-general are directed to make known to their several deputies the provisions and nature of this order, and will be held strictly accountable for its faithful execution. Ignorance of the terms of this order will not be held an excuse for failure to comply therewith by deputies.

16. This order will be observed by deputies now in the field, and surveyors-general are directed to so inform them with the least practicable delay.

17. Surveyors-general are reminded of the important trust confided to them, and are instructed to exercise their whole authority to secure correct and honest surveys and returns by their deputies.

18. This order will take effect from and after the receipt of the same, and its receipt will be immediately acknowledged by each surveyor-general.

19. In every case of a contract heretofore approved, which the surveyor-general has reason to believe was fraudulently procured, such contract, and the accounts thereunder, must be immediately suspended and the facts reported to this office.

DEPOSITS.

20. Settlers availing themselves of the foregoing provisions will deposit with an assistant treasurer or in a designated depository of the United States, to the credit of the Treasurer of the United States on account of surveying the public lands and expenses incident thereto, in the district in which their claims are situated, the sum so estimated as the total cost of the survey, including field and office work.

21. Where several settlers desire the survey of the same township, the necessary deposit, to cover all expenses of the survey and platting, may be so subdivided as to be proportionate to the amount of lands within the township claimed by each settler.

22. In cases where the estimated cost of survey and incidental expenses is in excess of $200, the settler should be instructed to deposit in two or more sums in order that no certificate may bear a face value of more than $200.

23. Settlers making deposits for surveys are required to transmit the original certificate of deposit to the Secretary of the Treasury and the duplicate to the surveyor-general. They will retain the triplicate, to be used in the purchase of public lands in the surveyed township if desired, or to be disposed of by assignment as provided by law.

24. The triplicates only, therefore, are to be received in the purchase, under the pre-emption and homestead laws, of lands within the limits of the land district in which the lands desired to be surveyed are situated. This restriction applies to all certificates issued on or after August 7, 1882, except as hereinafter provided.

All certificates issued prior to that date are receivable for any public lands entered under the pre-emption and homestead laws, without reference to the location of the lands surveyed.

25. Certificates issued for deposits made subsequently to and including August 7, 1882, to cover excesses of cost of surveys executed under contracts entered into prior to the passage of the act of August 7, 1882, are not affected by the clause in said act restricting the use of certificates of deposit on account of surveys to the land districts within which such surveys are located.

26. Surveyors-general will, however, require all depositors in such cases to transmit to this office the triplicate certificates through their offices for certification, specifying in their letters of transmittal the name of deputy surveyor and number and date of contract.

27. Where the amount of a certificate or certificates is less than the value of the lands taken, the balance must be paid in cash.

28. Where the certificate is for an amount greater than the cost of the land, but is surrendered in full payment for such land, the receiver will indorse on the triplicate certificate the amount for which it is received, and will charge the United States with that amount only.

EXCESS REPAYMENTS.

29. Where the amount of the deposit is greater than the cost of the survey, including field and office work, the excess is repayable upon an account to be stated by the surveyor-general.

30. The surveyor-general will in all cases be careful to express upon the register's township plat the amount deposited by each individual, the cost of survey in the field and office work, and the amount to be refunded in each case.

31. Before transmitting accounts for refunding the excess of deposits over and above the cost of surveys in the field and office work, the surveyor-general will indorse on the back of the triplicate certificate of deposit in possession of the depositor the following: "$ ——— refunded to ——— ———, by account transmitted to the General Land Office with letter dated," ——— and will state in the account that he has made such indorsement. Where the whole amount deposited is to be refunded, the surveyor-general will require the depositor to surrender the triplicate certificate of deposit, and will transmit it to this office with the account.

32. No provision of law exists for refunding to other than the depositor, nor otherwise than as referred to in the preceding sections.

ASSIGNMENTS.

33. Under section 2403 as amended, certificates of deposits for surveys "may be assigned by indorsement." Assignments of such certificates are therefore not required to be acknowledged before an officer authorized to take acknowledgments, but the same will be recognized when made and presented in accordance with usages governing in cases of ordinary negotiable paper.

34. Certificates issued before or subsequent to March 3, 1879, may be assigned, but if issued prior to March 10, 1881, they must be transmitted to the General Land Office for an examination as to excess repayments, if any, and for certification as to their genuineness and value, if they do not already bear such certificates, before they can be accepted by the receiver, who will be governed by the certificate indorsed on or attached to them by this office.

35. Fraudulent certificates of deposit, purporting to have been issued at various United States depositories, having been put upon the market, rendering it possible for innocent parties to be defrauded in their purchase, you will cause the people in your respective districts to be advised of the possibility of such fraudulent issues, and request that all holders of certificates of deposit send them to this office for the purpose of examination and verification; said certificates to be returned to them without delay, with the certificate of this office as to their genuineness attached.

You are directed to post a copy of this circular in your office, and to take such other steps as you may deem necessary to disseminate the information without incurring the expense of publication in newspapers.

Assignments may be made to one or more persons, and when there are several original parties to, or several assignees of, one certificate, whether the same was issued on account of joint deposits or otherwise, and such certificate is presented in payment for lands to which it is authorized to be applied, the register and receiver will make the proper indorsement on the triplicate certificate presented showing the satisfaction of the *pro rata* share of each party interested. They will make the same notes respectively on the register's certificate of purchase and the receiver's original and duplicate receipts.

36. When the entire amount of a certificate is not satisfied at the same time, the triplicate should be retained by the receiver, and when fully satisfied be sent up as hereafter prescribed. But such certificates should as far as practicable be satisfied during the current quarter; and in order to avoid embarrassment in the settlement of receivers' accounts, and to enable depositors to more readily utilize their certificates, attention should be particularly directed to the instructions contained in section 21 of this circular.

37. The statute specifically provides that certificates when assigned may "be received in payment for any public lands of the United States entered by *settlers* under the *pre-emption* and *homestead* laws of the United States, *and not otherwise.*" They are therefore not receivable in payment for lands sold at public or private sale, nor for mineral, desert, coal, or timber lands, nor for fees and commissions on homestead entries, nor in any manner otherwise than as provided by law.

REGISTERS' AND RECEIVERS' RETURNS.

38. In their monthly cash abstracts the register and receiver will designate the entries in which certificates of deposit are used and the balances paid in cash, if any, noting on the certificates of purchase and receipts the manner of payment. The receiver in his monthly account-current will debit the United States with the amount of such certificates, and in his quarterly accounts will specify each entry made with these certificates, giving number, date, amount for which received, by whom and with whom the deposit was made, and debit the United States with the same.

39. After certificates are accepted they should be canceled by writing across the face of each the word "canceled," together with a description of the tract of land sold, date of sale, name of office, and number of entry over the signature of the receiver.

40. All certificates, whether transmitted for examination or as having been accepted in payment for lands sold, must be forwarded in a registered package (the latter once a month), with letter of transmittal, direct to the Commissioner of the General Land Office, and by the same mail an abstract (Form 4-543) should be transmitted to the same address containing a full description of each certificate inclosed in the registered package (which is to contain no other matter), as follows: Number of certificate, date, assistant treasurer or depositary issuing the same, name of depository and amount deposited (stating whether for field or office work, or both), and description of survey for which deposit is made.

N. C. McFARLAND,
Commissioner.

DEPARTMENT OF THE INTERIOR, *September* 19, 1883.

Approved.

H. M. TELLER, *Secretary.*

THE PRE-EMPTION ACTS, CASH ENTRIES THEREUNDER, AND VITAL AMENDMENTS NECESSARY TO EXISTING SETTLEMENT LAWS.

(See Chapter X, pages 214 to 216, inclusive, to June 30, 1880. See addenda, pages 678 to 695, to June 30, 1882.)

The regulations and forms of entry on pages 683 to 695 are in effect and correct to December 1, 1883.

REPEAL OF THE PRE-EMPTION ACTS.

In recommendation as to the repeal of these laws, see pages 678 to 685 and 1163.

AREA ENTERED UNDER THE PRE-EMPTION ACTS.

No changes have been made in the pre-emption acts since June 30, 1880.

The number of entries thereunder cannot be given in detail, because the system of the General Land Office carries them into "cash entries," and they are, therefore, embraced in the annual cash receipts from sales of lands under various laws.

It is estimated that the disposals of lands under the pre-emption acts, since the beginning of the land system to June 30, 1883, have been about 175,000,000 of acres.

PRE-EMPTIONS DURING THE YEAR ENDING JUNE 30, 1883.

Eight thousand eight hundred and forty-five pre-emption entries were approved for patent in *ex parte* cases, and 741 contested cases were decided, the whole involving 1,500,000 acres.

Eleven thousand nine hundred and twelve new cases were received for action. The number of cases undecided June 20, 1883, was 12,542, an increase of the number in arrear of 2,370

The number of pre-emption filings placed on record during the year was 47,933, which at 160 acres each would cover 7,669,280 acres.

CASH ENTRIES.

The area cash entries, including private cash entries, pre-emptions, and commuted homesteads, during the fiscal year ending June 30, 1883, was 6,839,042.67 acres, realizing $9.657,032.28.

SALINE LANDS.

(See pages 217, 218, and 696, to June 30, 1880 and 1882.)

No change to June 30, 1883.

The official regulations on page 696, as to how saline lands are rendered subject to disposal under the act of January 12, 1877, are in effect December 1, 1883.

SWAMP AND OVERFLOWED LANDS.

TOTAL AREA OF SWAMP LANDS SELECTED TO JUNE 30, 1883.

(See Chapter XII, pages 219 to 222, inclusive, to June 30, 1880; also see addenda, pages 696 to 710, inclusive, to June 30, 1882.)

Total acres selected to June 30, 1883, 70,445,957.58 acres. During the year ending June 30, 1883, the swamp land selections reported to the General Land Office for adjudication aggregated 449,188.17 acres.

TOTAL AREA OF SWAMP LANDS CERTIFIED OR PATENTED TO THE SEVERAL STATES UP TO AND DURING THE YEAR TO JUNE 30, 1883.

Lists embracing 686,295.53 acres were approved, making a total of 56,455,467.56 acres certified or patented to the several States. The unadjudicated claims still pending in the General Land Office amount to 14,000,000 acres, the same as at the commencement of the fiscal year.

REGULATIONS AND DECISIONS UNDER THE SWAMP-LAND LAWS.

To December 1, 1883.

The official regulations and decisions under the swamp-land laws, given on pages 698 to 710, are in effect December 1, 1883.

SWAMP-LAND INDEMNITY.

(See pages 696 and 1166.)

Twenty-eight thousand four hundred and ninety-six acres were patented as indemnity for swamp lands disposed of by the United States between the years 1850 and 1857, under military warrant and scrip locations, making a total of swamp indemnity lands patented to the several States of 504,812.99 acres.

Cash indemnity claims were approved for payment to the amount of $90,333.38.

The act of March 2, 1855, extended to March 3, 1857, confirmed all swamp selections previously made, whether or not properly so made, for lands intended to be granted, and also provided indemnity in lands or money for tracts disposed of by the United States subsequent to the swamp-land grant and prior to March 3, 1857, which should be found to have been swampy in character at the date of the swamp-land act.

(See pages 80–81 annual report Commissioner General Land Office, 1883, for details of swamp-land division K of that office.)

Statement exhibiting the quantity of land selected for the several States under acts of Congress approved March 2, 1849, *September* 28, 1850 (*Revised Statutes of the United States, section* 2479), *and March* 12, 1860 (*Revised Statutes of the United States, section* 2490), *up to and ending June* 30, 1883.

EDUCATIONAL LAND GRANTS BY THE UNITED STATES TO PUBLIC-LAND AND OTHER STATES.

(See chapter XIII, pages 223 to 231, to June 30, 1880; also see pages 710 to 711, to June 30, 1882.)

TO JUNE 30, 1883.

The regulations and forms on pages 710 to 711 herein, as well as the historical data on pages 223 to 231, are in use and is correct to December 1, 1883.

LAND GRANTS AND RESERVATIONS FOR EDUCATIONAL PURPOSES.

To June 30, 1883.

The statistics on page 223, and following, are correct to June 30, 1883, viz:

	Acres.
For public or common schools	67,893,919
For agricultural and mechanical colleges	9,600,000
For seminaries or universities, to June 30, 1880	1,165,520
Add grants for university purposes to the Territories of Dakota, Montana, Arizona, Idaho, and Wyoming	230,400
In all, a grand total to June 30, 1883	78,889,839

The value, at the minimum price of $1.25 per acre, in round numbers, being $99,000,000; but it may be safely estimated that these educational-grant lands have realized to the States more than $250,000,000.

UNIVERSITY GRANTS TO DAKOTA, ARIZONA, IDAHO, AND WYOMING TERRITORIES.

(See pages 226, 227, and 228.)

Two townships, of 23,040 acres each, six miles square, or 46,080 acres, were reserved by the act of February 18, 1881, for a university in each of the Territories above named. At $2.50 per acre this endowment is equal to $115,200. All existing Territories and political divisions, save the District of Columbia, Indian Territory, and Alaska, now have university grants.

The act was as follows:

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That there be, and are hereby, granted to the Territories of Dakota, Montana, Arizona, Idaho, and Wyoming respectively, seventy-two entire sections of the unappropriated public lands within each of said Territories, to be immediately selected and withdrawn from sale and located under the direction of the Secretary of the Interior, and with the approval of the President of the United States, for the use and support of a university in each of said Territories when they shall be admitted as States into the Union: *Provided*, That none of said lands shall be sold except at public auction, and after appraisement by a board of commissioners, to be appointed by the Secretary of the Interior: *Provided further*, That none of said lands shall be sold at less than the appraised value, and in no case at less than two dollars and fifty cents per acre: *Provided*, That the funds derived from the sale of said lands shall be invested in the bonds of the United States and deposited with the Treasurer of the United States; that no more than one-tenth of said lands shall be offered for sale in any one year; that the money derived from the sale of said lands, invested and deposited as hereinbefore set forth, shall constitute a university fund; that no part of said fund shall be expended for university buildings, or the salary of professors or teachers, until the same shall amount to fifty thousand dollars, and then only shall the interest on said fund be used for either of the foregoing purposes until the said fund shall amount to one hundred thousand dollars, when any excess, and the interest thereof, may be used for the proper establishment and support respectively of said universities."

LAND BOUNTIES FOR MILITARY AND NAVAL SERVICES.

(See chapter XIV, pages 232 to 237, to June 30, 1880; also see pages 711, 721, to June 30, 1882.)

To June 30, 1883.

The official rules, regulations, and forms and procedure for location and assignment of bounty-land warrants on pages 712 to 721 herein are in effect December 1, 1883.

For official rules, regulations, and forms as to Revolutionary bounty land see pages 958 to 962 herein; also, for details of business of the recorder division B of the General Land Office for 1883, see annual report of Commissioner of General Land Office for 1883, pages 39, 40, 41.

The outstanding warrants under all laws to June 30, 1883, were 13,955, embracing 1,768,580 acres.

AREA OF GRANTS FOR MILITARY AND NAVAL LAND BOUNTIES.

TO JUNE 30, 1883.

The grants for military and naval land bounties from the origin of these laws to June 30, 1883, amount to 61,064,150 acres, as follows:

Condition of bounty-land business under acts of 1847, 1850, 1852, *and* 1855, *showing the issues and locations from the commencement of operations under said acts to June* 30, 1883.

TWO, THREE, AND FIVE PER CENT. FUNDS.

(See chapter XV, pages 238, 239, to June 30, 1880; see addenda to chapter XV, pages 721 to 727, to June 30, 1882.)

TO JUNE 30, 1883.

No accounts adjusted for any amounts accruing later than June 30, 1882. See page 721.

INDIAN RESERVATIONS FROM THE PUBLIC DOMAIN.

(See chapter XVI, pages 240 to 248 inclusive, to June 30, 1880; see addenda 727 to 753, to June 30, 1882.)

For list of agencies and agents to September 13, 1883, *see pages* 744 *to* 747.

TO JUNE 20, 1883.

The details of making and unmaking Indian reservations, and the historical and legal data, pages 241 to 244, is correct to December 1, 1883.

NUMBER AND LOCATION OF RESERVATIONS.

The total number of Indian reservations in the United States, June 30, 1883, was 137, containing 135,998,101 acres, with an estimated population of 259,632, or about 529 acres to each Indian.

REFERENCES.

Washington	16	6,330,148	9,891
Wisconsin	7	586,026	916
Wyoming	1	2,342,400	3,660
Grand total	137	135,998,101	212,497

The Commissioner of Indian Affairs in his annual report for 1883, says:

ALLOTMENT OF LANDS IN SEVERALTY, AND PATENTS.

During the year fifty-one certificates of allotments have been issued to the Pawnees, under the provisions of the fifth section of the act of April 10, 1876 (19 Stat., 30), and nineteen to the Chippewas of the Mississippi, on the White Earth Reservation, under the provisions of the seventh article of the treaty of March 10, 1867 (16 Stat., 721). Patents have been issued as follows: To the Chippewas of Lake Superior and the Mississippi, under the provisions of the third article of the treaty of September 30, 1854 (10 Stat., 1110), on the La Pointe or Bad River Reservation, thirty-four, and on the Lac Court d'Oreilles Reservation, eighteen; to the Winnebagoes, under the fourth section of the act of February 21, 1863 (12 Stat., 658), four; to the Kickapoos, under the provisions of the third article of the treaty of June 28, 1862 (13 Stat., 624), eleven; and to the Sisseton and Wahpeton bands of Sioux, under the fifth article of the treaty of February 19, 1867 (15 Stat., 505), nine; making the total number of certificates and patents issued one hundred and forty-six. Fifty Santee Sioux have made homestead entries under the concluding paragraph of the sixth article of the treaty with the Sioux Indians, concluded April 29, 1868 (15 Stat., 635). Allotments have also been made by the agents on the Nisqually, Squaxin, Bad River, and Lac Court d'Oreilles Reservations, the schedules of which have been returned for correction.

As to the utility and desirability of alloting lands in severalty to the Indians and giving them valid titles thereto, I can only reiterate what has been said in my preceding reports. In no case where allotments have been made and the titles secured, with proper restrictions, have any other than the best results followed. I shall, therefore, adhere to the policy of allotting lands wherever the same can legally be done and the condition of the Indians is such as to warrant it.

ALLOTMENTS IN SEVERALTY DELAYED BY LACK OF MONEY FOR SURVEYS.

One of the principal obstacles in the way of making allotments is the fact that there are no appropriations available for the survey of Indian reservations. In many cases allotments are authorized by treaty on reservations which have never been surveyed, and in other cases on reservations where the lines and monuments of the survey have become obliterated. In the latter cases I have, where practicable, authorized the employment of surveyors to rerun and remark the lines, paying for the work out of the appropriations for employés. Your attention is called to the importance of this matter in another portion of this report.

The agent at the Fort Berthold agency reports that the Indians under his charge are anxious to take allotments, and that it would be greatly to their advantage to do so. There being no law nor treaty authorizing allotments to these Indians, it is my intention to prepare and submit for transmission to Congress at its next session, subject to your approval, a bill granting such authority.

At the last session of Congress a bill was submitted increasing the allotments to the Nez Percés in Idaho and the Willamette Indians on the Grand Ronde Reservation from twenty acres, as provided for in the treaty with the Nez Percés, and from the graduated quantity provided for in the treaty with the Willamette Indians, to one hundred and sixty acres for each Indian entitled to an allotment under the treaties. No action was taken by Congress. As the quantity of land in each of these reservations is more than sufficient to give the amount recommended, and the Indians are desirous of having the quantity increased, the bill will be again submitted to you for transmission to Congress at its next session.

The Secretary of the Interior, in his annual report for 1883, on the subject of allotment in severalty, says:

INDIAN TITLES.

The tenure by which most of the Indian tribes hold their land is very unsatisfactory. In a few cases the Indians are sufficiently advanced to appreciate the advantages of land in severalty, but the great mass of the Indians are not only not ready for land in severalty, but violently opposed to it, and incapable of taking care of such title if given to them. A title in severalty to or individual ownership of land is unknown in Indian polity, and they cannot understand why one man should have a claim on or title to land that he does not occupy, any more than they can understand how one man can become the owner of more air than he needs. They do not cultivate land in common, but each Indian has a separate patch or piece of ground which he tills year after year if he desires. When he neglects to cultivate it, any other person may do so. While he cannot comprehend individual ownership, he does know what title to his tribe means. He has been accustomed to hear the claim made that his tribe owns a section of the country. The invasion by one tribe of the region claimed by another has been the cause of innumerable wars. The denial of ownership in his tribe he fully understands, and whether that denial comes from a hostile tribe or from one of his own number, it is, in his opinion, a crime to be punished. The reservation belongs to the tribe in trust for all the members thereof if they wish to occupy it. If it is sold, it must be sold for all.

I renew the recommendation that I made on the subject in my former report:

"To the end that the Indians may be secure in their titles and have the assurance that they will not be removed, except by their free consent, I recommend the passage of a law to give each tribe a patent for the land the Government has guaranteed to it, leaving the Indians to determine the question of allotment for themselves. This system has given entire satisfaction to the civilized Indians of the Indian Territory, and is consonant with Indian law and religion."

SURVEYS OF INDIAN RESERVATIONS.

[From Report of Commissioner of Indian Affairs for 1883.]

Are surveyed under the direction of the General Land Office and its surveyors-general and assistants.

It would seem that the experience of the last few years had demonstrated the utter futility of endeavoring to procure adequate appropriations for the survey of Indian reservations. Year after year proper estimates are prepared and submitted to Congress with the most urgent recommendations. Last year $100,000 was asked for and but $5,000 was appropriated. For the present fiscal year $100,000 was estimated for and not a dollar was appropriated; and there has not been an appropriation of any consequence made for the survey of Indian reservations during the past ten years. There are thousands of miles of reservation boundaries that have never been defined and marked by official survey, and the wonder is that the conflicts between the Indians and settlers are not more frequent than they are, when it is considered that in very many instances it is found absolutely impossible to determine which party is in the right. The settlers, surrounding the Indians on all sides, are anxious to procure good land upon which to settle, while the Indians themselves are watchful and naturally jealous of their rights. There is no guide in the matter. The settlers, miners, or herders, as the case may be, approaching from all directions, and gradually circumscribing the Indians to the vicinity of their agencies, are finally confronted by the Indians or their agent with the warning that they are encroaching upon the reservation. This, in all

likelihood, is disputed, and in the absence of proper marks indicating the boundaries of the reservation the dispute continues, engendering the bitterest feeling, which too often ends in unfortunate strife. When it is understood that all surveys of Indian reservations, by express stipulation of law, are executed under the direction and control of the General Land Office (see 2115, Rev. Stats.) with the same safeguards against fraud that are employed in the survey of the public lands, it is difficult to see why appropriations for these much-needed surveys are so persistently withheld. They are as much needed to determine the rights of settlers as to protect the interests of the Indians.

In the fulfillment of treaty stipulations and in carrying out the general policy of the Government in settling the Indians on individual allotments, it is necessary that arable lands within certain reservations be subdivided, and it is important in some cases that this be done at once; yet there is not a dollar available for this special purpose, although it was intended that a considerable portion of the $100,000 estimated for should be used in that way.

SURVEYING THE BOUNDARIES OF INDIAN RESERVATIONS.

The Secretary of the Interior in his annual report for 1883 says:

One great difficulty in keeping the Indians on their reservation and the whites off is the uncertainty of the boundary lines. The exterior of all the reservations should be surveyed, and plainly marked, so that neither Indians nor whites would have difficulty in determining the boundaries thereof, and I recommend a suitable appropriation for this purpose.

The Commissioner of the General Land Office in his annual report for 1883 says of

ALLOTMENT LANDS FOR UTE INDIANS:

The surveys made previous to the last fiscal year of lands for allotment to the Southern Utes in Colorado and New Mexico, amounting to 326,675.56 acres, have been examined and approved. In the past year surveys have been returned of 148,255.65 acres.

Two hundred and eighty-seven thousand one hundred and forty-seven and seventy-six one-hundredth acres have been surveyed within the Uintah Reservation in Utah for allotment to the White River Ute Indians.

Some progress has been made in the field-work of surveys in Utah for allotment to the Uncompahgre Utes, but no returns have been received.

INDIAN RESERVATIONS.

A contract has been entered into for the survey and subdivision of seventeen townships in the late Uncompahgre Reservation in Colorado.

The survey of the boundary between the Crow Reservation and Crow ceded lands in Montana, and surveys of Crow lands for allotment, have been contracted for. The survey of the boundary lines has not yet been executed. Some progress has been made in field surveys for allotment.

The lands within the old Sioux Indian Reservation west of Big Stone Lake in Dakota have been resurveyed and the western boundary line retraced, the original surveys having been reported fraudulent. The area shown by the original survey was 115,157.68 acres, and by the resurvey 137,648 acres, making an increase by the resurvey of 22,540.32 acres.

LANDS IN INDIAN TERRITORY.

(See chapter XXXIII, pages 458 to 462, to June 30, 1880; see addenda, page 1187.)

To December 1, 1883.

See map facing 462 for all holdings and titles of Indian tribes thereon. It is, in fact, correct to December 1, 1883.

No lands can be disposed of by the Indian tribes or individuals in the Indian Territory. The occupancy and other titles are as given, pages 459 to 462. The United States must approve or concur in title to lands in this Territory. There are no public lands in this Territory, or lands coming within the provisions of the settlement or disposition laws, as no act of Congress has brought any portion of the lands of this Territory under the operation of any public land laws. Persons entering Indian Territory as settlers claiming under any of the public land laws of the United States are merely intruders and trespassers. During the year 1883 an attempt was made to obtain the approval of the

Department of the Interior of a lease of pasturage lands by the Indians of Indian Territory. In his annual report for 1883 the Secretary says:

LEASING OF INDIAN LANDS.

In April last (1883) certain parties, alleging that they had made leases or agreements with the Cheyenne and Arapahoe and other Indians of the Indian Territory for the privelege of grazing cattle on the reservation of said Indians, by paying therefor 2 cents per acre per annum, applied to the Department to have their leases or agreements approved by the Department, and to be put in possession of the lands included in said leases or agreements. It was understood that quite a large amount and nearly all the lands so occupied by the Cheyennes and Arapahoes were included in such leases or agreements. It was urged by the parties desiring the approval of such leases or agreements that the Indians could derive a large revenue from the use of the lands, and be otherwise benefited by such occupation. I did not find authority for the making of such leases or agreements by the Indians, or by the Department, and I therefore declined to approve them, and informed the parties that I saw no objections to allowing the Indians to grant permission to graze cattle on their reservation at fair and reasonable terms; that the authority to so occupy must be given by the tribe, and not an individual member, and the whole tribe must participate in the benefits thereof; that the Department would not feel called on to remove the occupants under such leases or agreements, provided the Indians made no complaints and the Department was satisfied that the Indians were properly treated; that the parties and their employés conformed strictly to the statutes and rules of the Department with respect to the intercourse laws, with reference to the introduction of liquors, fire-arms, ammunition, &c.; that the Department would, when it appeared to be desirable for the public interest to do so, exercise its right of supervision to the extent of removing all occupants, without reference to such leases or agreements, on such notice as might be right and proper under the circumstances; and that all parties, in accepting such agreements from the Indians, must accept the same subject to such conditions and to the future action of Congress.

It is undoubtedly to the interest of the Indians to allow parties to graze cattle on their lands, if a fair price is paid for such privileges, as it will in time become a source of considerable revenue to them, and will familiarize them with the care of stock. It is believed that the owners of lands would soon find it to their interest to hire Indians to herd their stock, and thus another source of revenue would be opened to them. Had the Department approved of the leases or agreements it would doubtless have been the duty of the Department to collect from the occupants the money to be paid under the terms of such leases or agreements, and such money so collected would necessarily go into the Treasury of the United States. The Indians, having assumed the right to lease the land, would not readily submit to have the money paid to the Department and put in the Treasury, although such fund might be subsequently used for their benefit. It will be impossible in the present condition of affairs to prevent conflicts between rival claimants for the privilege of grazing on Indian lands within the Indian Territory without legislation. Congress should provide some system by which the unoccupied lands can be leased by the tribe or the Department for the benefit of such tribes, and the money expended for the tribe without covering it into the Treasury.

ATTEMPT TO SETTLE ON LANDS IN INDIAN TERRITORY UNDER THE CLAIM THAT THEY ARE PUBLIC LANDS.

The Commissioner of Indian Affairs, in his annual report for 1883, speaking of this, says:

INTRUDERS ON INDIAN LANDS.

As stated in the previous reports, an amendment to the law in reference to intruders so as to punish by imprisonment as well as fine is absolutely necessary. An intruder without property has very little fear of a fine. Some intruders have already been removed several times by the Indian police or the military, and as often have returned. The present law, imposing a fine *only*, has no terrors for this class of men. All that can at present be done is to remove the intruder, and if he reappears to bring a civil suit against him in the nature of an action of debt to recover the statutory penalty of $1,000. I have yet to hear of a single instance in which the penalty has been recovered. The result is expense to the Government for no purpose. Notwithstanding his repeated expulsion from the Indian Territory, Payne and his party of "Oklahoma colonists" have twice during the present year made attempts at settlement in that country, requiring the aid of the military, at great expense to the Government, to effect their removal.

In addition to the urgent recommendations which have repeatedly been made by this office and the Department on the subject, the Secretary of War deemed this frequent furnishing of troops for the removal of trespassers, at great expense to the Government, without any practical results, as a matter of such serious importance in the interests of the military service and of public economy that on the 2d February last he addressed a special communication to the President urging the amendment of section 2148, Revised Statutes, by providing a term of imprisonment for unlawfully entering upon Indian lands. This communication was transmitted by the President to Congress on the 5th February last, and on the 3d of the same month Mr. Dawes introduced in the Senate a a bill (S. 2450), some time previously prepared in this office,* reading as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section twenty-one hundred and forty-eight of the Revised Statutes of the United States be amended to read as follows, namely:

"Every person who without authority of law enters and shall be found upon any Indian lands, tribal reservation, or lands specially set apart for Indian purposes, shall for the first offense, upon conviction thereof, pay a fine of not more than five hundred dollars, and be imprisoned at hard labor for not more than one year; and for every subsequent offense, shall, upon conviction thereof, pay a fine of not more than one thousand dollars, and not less than five hundred dollars, and be imprisoned at hard labor for not more than two years, nor less than one year; and the wagons, teams, and outfit of such person or persons so offending shall be seized and delivered to the proper United States officer, and be proceeded against by libel in the proper court and forfeited, one-half to the informer and the other half to the United States, and in all cases arising under this act, Indians shall be competent witnesses: *Provided, however*, That the provisions of this section shall not apply to emigrants or travelers peaceably passing through such Indian lands, tribal reservations, or lands especially set apart for Indian purposes, without committing any willful trespass or injury to person or property."

On the 10th February last the bill as read and referred was reported back by the Senate Committee on Indian Affairs without amendment, but Congress again adjourned without taking action in the matter.

While on this subject I desire to say a few words in regard to the repeated attempts which have been made by United States citizens during the past four years to unlawfully appropriate certain lands of the Indian Territory reserved under treaty by the Government for Indian purposes, under the pretext that such lands are open to the public for settlement. Full accounts of these raids and of the measures taken by the Government to expel the intruders will be found in the successive annual reports of this office for the years 1879, 1880, 1881, and 1882. During the period referred to, D. L. Payne, the recognized leader of the movement, has been repeatedly arrested only to be released by the military authorities on the Kansas border, or held to answer to a civil suit in the United States court at Fort Smith to recover the penalty imposed by the statute, a suit invariably terminating without any practical result. With each repetition the movement appears to acquire additional strength. From official reports made to the War Department and on file in this office, I learn that in the expedition which left Arkansas City for the Oklahoma lands on the 1st February last there were about two hundred and fifty persons, principally from Kansas and Missouri, including some twenty women and children, with from eighty to one hundred wagons filled with provisions and forage sufficient to last them thirty or forty days, and with tents, furniture, agricultural implements, &c. They appeared in the main to be a well-to-do, quiet set of farmers, and a different class of people from those who had been engaged in previous similar enterprises, but they were all well armed, mostly with Winchester rifles and carbines, and among them it was reported there was one man from Wichita, Kans., who had with him a full wagon-load of whisky and cigars, intending to open a saloon on arriving at their destination.

Besides this party, there were other and smaller outfits which were discovered and heard of *en route* from Caldwell and Coffeyville, Kans., to join the main body. Those from Caldwell are stated to have been with one or two exceptions persons without visible means of support, whom the citizens, though deprecating the movement, were glad to get rid of at any price.

Payne, with his secretary, one W. H. Osburn, traveled with the Arkansas City party, and at a meeting held there the night before starting he is said to have roundly abused the Government and the Army. From the same official sources I learn that every member who joins the Oklahoma colony pays $2.50 for a certificate of membership therein, of which 50 cents are retained by the secretary and the remainder goes into Payne's pockets. The form of certificate is as follows:

---

*See House Ex. Doc. No. 145, Forty-seventh Congress, first session.

[Capt. D. L. Payne, president; Hon. J. M. Steele, treasurer; W. H. Osburn, secretary.]

Certificate of membership.

OFFICE OF PAYNE'S OKLAHOMA COLONY,
Wichita, Kans., ——— —, 188—.

This certifies that ——— ———, having paid the fee of two dollars, is a member of Payne's Oklahoma Colony, is entitled to all the benefits and protection of said colony and an equal voice in all matters pertaining to and the formation of its local government.

In testimony whereof the official signatures of the president and secretary are hereto subscribed, and the seal of the colony attached.

———— ————,
President.

———— ————,
Secretary.

I also learn that Payne issues "land certificates" to persons who do not desire to go down themselves, by which he guarantees them 160 acres of land in the "Oklahoma Colony," in consideration of $25, which it is also stated he appropriates to his own use. I have no copy of this last mentioned certificate; but, even if there are no other controlling influences at work, it is manifestly a profitable speculation for Payne himself, who is not likely to desist from starting these expeditions so long as he can find persons credulous enough to part with their money on such worthless assurances, or so long as the law in relation to trespassers on Indian lands remains in its present unsatisfactory condition.

From a letter dated June 26 last, addressed to the Department by the honorable Secretary of War, I am advised that Payne has now applied to the United States circuit court at Topeka, Kans., for an injunction restraining military interference with his entrance into and occupation of the Oklahoma district of the Indian Territory, thus bringing up for judicial decision the whole question affecting the status of said district; and that the matter has been referred by the War Department to the Attorney-General to take such measures as may be deemed necessary to protect the interests of the United States in the premises.

I respectfully recommend that the attention of Congress be specially drawn to these aggressive movements on Indian Territory lands as illustrating the urgent necessity for speedy and effective legislation in regard to trespassers.

MILITARY RESERVATIONS UPON THE PUBLIC DOMAIN.

(See Chapter XVII, pages 249 to 254, to June 30, 1882; see addenda, pages 748 to 752, to June 30, 1883.)

TO JUNE 30, 1883.

The following list shows the changes in reservations either by increase or decrease of area during the year ending June 30, 1883:

References.—The data on page 249 *et seq.* are correct. See also decisions of the Department of the Interior and General Land Office in cases relating to lands and land claims to June 30, 1883. Title, "Military Reservations."

The total number of military reservations on the public domain in the public land States and Territories June 30, 1883, was 177, containing 3,155,152.76 acres.

MILITARY RESERVATIONS.

[From the Annual Report Commissioner General Land Office, 1883.]

Military reservations declared, reduced, enlarged, modified, or restored to the public domain during the year ending June 30, 1883, are as follows:

In Arizona.—By Executive order dated May 14, 1883, Fort Huachuca reservation was enlarged on the north so as to include grazing lands and extend to the Babacomari land grant, as was intended by the original order dated October 29, 1881.

In California.—By Executive order dated October 21, 1883, Molate Island, or Red Rock, in San Francisco Bay, was formally declared a military reservation. It was reserved March 2, 1858, by order of the Secretary of the Interior. It contains 7.52 acres, in sec. 17, T. 1 N., R. 5 W., M. D. Mer.

In Florida.—Fort Brooke military reservation, containing 148.11 acres, was relinquished by the Secretary of War to the Secretary of the Interior, under act of August 18, 1856 (11 Stat., p. 87). By Executive order dated November 17, 1882, the following described tracts were formally declared reserved for military purposes, the same being portions of reservations ordered by the Secretary of War on March 23, 1849, "until the completion of the surveys necessary for the coast defenses":

1. The south end of Gasparilla Island for a distance of 2 miles from its southern extremity; and the north end of Boca Grande, or Cayo Costa Island, for a length of 2 miles from its northern extremity.

2. The whole of Egmont Island, at the entrance of Tampa Bay, except the 15 acres at the north end previously reserved for light-house purposes.

3. Flagg Island, at Saint George's Sound.

In Indian Territory.—By Executive order dated January 17, 1883, the reserve at Fort Supply was enlarged by adding to it the south half T. 25 N, R. 22 W., and the SW. ¼ of T. 25 N., R. 21 W.

In Kansas.—By act of Congress approved August 4, 1882, Fort Larned reservation was authorized to be relinquished by the Secretary of War and sold to actual settlers, after survey and appraisal.

In Montana.—By act of Congress approved August 4, 1882, it was provided that the Fort Benton military reservation should be restored to the public domain, surveyed, and disposed of.

In Utah.—By Executive order dated the 12th of May, 1883, a military reservation for Fort Thornburgh was declared. Two tracts were reserved—one for the post and the other for wood and timber. The post reserve is partly surveyed land. The surveyed portion falls in T. 3 S., R. 20 E., and T. 4 S., R. 21 E.

All the land in the wood and timber reserve is unsurveyed.

Military reservations in public-land States and Territories, July 1, 1883.

[Additions to and corrections to tables. See pages 748 to 752.]

Page.	State or Territory.	Name of reservation.	Increase to acres.	Present area.
748	California	Camp Independence	5,210.18	
		Total area of reservations in California		17,531.68
749	Florida—15 reservations	Fort Brooke (relinquished by War Department). Three small ones created. (See text above about equaling this reduction)		148.11
		Total area of reservations in Florida as far as known		13,282.40
749	Kansas—5 reservations	Fort Larned (restored to public domain)		10,240.00
		Total area of reservations in Kansas as far as known		53,870.22
750	Montana—8 reservations	Fort Benton, area not known (restored to the public domain)		
751	Utah—5 reservations	Fort Thornburg, created by Executive order May 12, 1883		21,851.00
		Total area of reservations in Utah as far as known		147,450.47

Change in recapitulation of areas as far as known or estimated, during the year to June 30, 1883.

[See page 752].

Number of reservations.	June 30, 1883, total area of all reservations.	Increase of area.	Decrease of area.
California	17,531.68	2,560	
Reduced to 5, Kansas	53.870.22		10,240
Reduced to 8, Montana	861,956.64		
Increased to 5, Utah	147,450.47	21,850	
Total		24,410	10,240

Total number of reservations, 177. Total area, 3,155,152.76.

DISTRIBUTION ACT OF SEPTEMBER 4, 1841.

(See Chap. XIX, page 256, to June 30, 1880; also addenda, page 753, to June 30, 1882.)

TO JUNE 30, 1883.

The table on page showing $691,117.05 is correct to June 30, 1883, and in fact to December 1, 1883, as the law is executed.

CANAL, WAGON, MILITARY-WAGON AND RAILROAD GRANTS.

(See Chap. XX., pages 257 to 288, to June 30, 1880, and addenda, pages 753 to 849, to June 30, 1882.)

TO JUNE 30, 1883.

The matter of a historical character, from pages 257 to 288, is correct to December 1, 1883. The Congressional reports and executive documents, from pages 789 to 849, are also of present value. For index of these see page 789. The official rules and regulations on pages 935 to 949 are in effect, with amendments, until December 1, 1883. The map of land-grants for wagon and rail roads, facing page 949, is correct to December 1, 1883.

CONSTRUCTION OF LAND-GRANT RAILROADS.

[See pages 268 and 754.]

FOR THE YEAR ENDING JUNE 30, 1883.

The construction of 1,210.68 miles of land-grant railroad was reported during the year, making a total of 17,449.78 miles of road reported as constructed under all grants to June 30, 1883. This aggregate includes 205 miles in the Indian Territory, and 342.87 in the State of Texas for which there is no grant, such construction being an incident to land-grant lines proper.

States and Territories	Miles.	States and Territories.	Miles.
Alabama	822.00	Mississippi	406.00
Arkansas	620.16	Missouri	703.00
Arizona	200.00	Montana	508.00
California	1,228.89	Nebraska	832.00
Colorado	298.00	Nevada	460.00
Dakota	425.58	New Mexico	150.00
Florida	313.10	Oregon	227.00
Idaho	87.00	Texas (where there are no United States lands)	342.87
Illinois	705.72	Utah	255.00
Indian Territory	205.00	Washington	286.00
Iowa	1,672.00	Wisconsin	689.00
Kansas	1,654.00	Wyoming	400.00
Louisiana	412.00		
Michigan	1,148.96		
Minnesota	2,398.50	Total	17,449.78

AREA OF LAND GRANTS TO RAILROADS.

The data on page 753, being an estimate of 155,504,994.59 acres as the area necessary to fill all railroad land grants as granted, have not been materially changed. Of this area about 50,000,000 acres were granted to States and Territories and about 105,000,000 acres to corporations.

RAILROAD LANDS CERTIFIED OR PATENTED.

To JUNE 30, 1883.

The total area of lands certified or patented to railroads to June 30, 1883, was 47,004,043.96 acres.

To States	36,248,839.07
To corporations	11,422,946.65
	47,671,785.72
Deduct area forfeited by acts of Congress	667,741.76
Total	47,004,043.96

MILITARY WAGON-ROAD LANDS CERTIFIED OR PATENTED.

To JUNE 30, 1883.

The total wagon and military wagon road lands certified or patented to June 30, 1883, was 1,741,897.59 acres.

CANAL LANDS PATENTED.

To JUNE 30, 1883.

The total area of canal lands patented from 1824 to June 30, 1883, was 4,424,073.06 acres.

GRAND TOTAL FOR ALL GRANTS.

For all of these grants certified or patented to June 30, 1883, a grand total of 53,170,014.61 acres.

ATTACHMENT OF RAILROAD RIGHTS.

(See pages 280, 284, and 764 to 768.)

The table of attachment of railroad rights to June 30, 1882, on pages 764 to 768, is not printed for 1883. The courts by decisions having changed the general principle of attachment of railroad rights, and the General Land Office not having as yet prepared a corrected list to June 30, 1883, no attempt is made to correct the old table. The table to June 30, 1882, is not, in fact, correct, and in the light of recent decisions is misleading.

CERTIFIED OR PATENTED LANDS TO RAILROADS FOR THE YEAR ENDING JUNE 30, 1883, AND TOTAL ACRES CERTIFIED OR PATENTED TO ROADS NAMED TO JUNE 30, 1883.

ADDENDA—See tables, pages 756 to 763.

Statement showing number of acres of lands certified or patented to the several railroads during the fiscal year ending June 30, 1883.

Reference on pages herein.	State, Territory, or corporation.	Names of road.	Number of acres certified or patented for year ending June 30, 1883.	Total number of acres certified or patented up to June 30, 1883.
757	Arkansas	Little Rock and Fort Smith (additional five-mile limit)	139,853.62	506,009.88
759	Wisconsin	Wisconsin Central	66,504.91	642,149.47
759	Minnesota	St. Paul, Minneapolis and Manitoba	84,098.96	1,258,428.99
760	Corporation	Union Pacific	640.00	1,959,523.08
761	Corporation	Central Pacific	59,444.72	780,879.40
761	Corporation	Union Pacific (Kansas division)	46,193.33	963,714.03
762	Corporation	Union Pacific (successor to the Denver Pacific Railway Company)	78,484.78	164,721.51
762	Corporation	Southern Pacific	2,519.92	1,040,430.03

CERTIFIED OR PATENTED TO MILITARY WAGON-ROADS.

TO JUNE 30, 1883.

(See pages 260 herein.)

The only wagon-road to which lands were patented during the fiscal year ending June 30, 1883, was the Willamette Valley and Cascade Mountain military wagon-road. The additional amount patented to this company was 440,856.52 acres; in all, 548,749.53 acres.

Corrections and changes in tables of areas certified or patented to June 30, 1883.

(See pages 756 to 763.)

Page herein.	Name of railroad.	To June 30, 1882, stated to be on page 756.	Should be to June 30, 1883.
756	Arkansas, Saint Louis, Iron Mountain and Southern, additional five miles.	204,079.17	203,999.17
760	Leavenworth, Lawrence and Galveston	256,281.67	256,121.67
760	Atchison, Topeka and Santa Fé	2,745,938.47	2,745,778.47
760	Union Pacific	1,953,883.08	1,954,523.08
762	Northern Pacific	746,509.52	746,390.22

These are the only changes, except in the case of roads to which lands were certified or patented during the fiscal year ending June 30, 1883, and noted herein.

AREA OF RAILROAD LANDS PATENTED.

Report of Commissioner of General Land Office.

DURING THE YEAR ENDING JUNE 30, 1883.

There were certified or patented under railroad grants during the year 477,740.24 acres, and 440,856.52 acres were patented for wagon-roads, an increase in patents for railroads and wagon-roads over the previous year of 742,190.10 acres.

LISTS AWAITING EXAMINATION AND APPROVAL.

Lists of railroad selections aggregating 3,070,453.41 acres are awaiting examination being an increase over the previous year of 1,112,060.62 acres.

NUMBER OF SETTLEMENT CLAIMS WITHIN LANDS CLAIMED BY RAILROADS.

The number of settlement claims within the granted or indemnity limits of the various railroad grants that were awaiting original or final action at the close of the year was 6,891, an increase of 1,327 over the arrears of the previous years. Of the total number pending 1,464 had received some action, and 5,427 had not been reached for examination.

RIGHT-OF-WAY RAILROADS.

(For list of, to June 30, 1882, see pages 769 to 771.)

The number of railroad companies recognized as entitled to a right of way through the public lands, to land for station purposes, and to take timber and other material from public lands for the construction of their roads, was at the close of the fiscal year 163, located in the various public-land States and Territories.

RIGHT-OF-WAY RAILWAY COMPANIES.

FROM JUNE 30, 1882, TO JUNE 30, 1883.

(Corrected and additional to list on pages 769 to 771.)

States and Territories.	Date of laws.	Statutes.	Page.	Name of company.
Arizona	Mar. 3, 1875	18	482	Arizona Narrow-gauge Railroad.
Arkansas	Mar. 3, 1875	18	482	Eureka Springs Railway Company.
Colorado	Mar. 3, 1875	18	482	Colorado Northern Railway.

Grand total to June 30, 1883	918,596.76	48,745,941.55

Canals from 1824 *to June* 30, 1883.

(For names of canals, see page 258.)

Indiana	1,457,366.06
Ohio	1,100,361.00
Illinois	290,915.00
Wisconsin	325,431.00
Michigan	1,250,000.00
Total canals	4,424,073.06

Grand total railroad, wagon-road, and canal grants patented or certified from 1824 to June 30, 1883	53,170,014.61
Patented or certified during the year ending June 30, 1882	918,596.76

This statement varies from year to year, from the fact that the adjustment of grants frequently reduces areas stated to be due railroads.

REPORT OF GOVERNMENT DIRECTORS OF THE UNION PACIFIC RAILROAD.

For Annual Report of the Directors of the Union Pacific Railroad for the year 1882, see Ex. Doc., No. 94, 2d sess., 47th Cong. H. of R.

LAPSED RAILROAD LAND GRANTS AND TAXATION OF RAILROAD LANDS.

Hon. H. M. Teller, Secretary of the Interior, in his annual report for 1883, speaking of the two subjects above noted, says:

RAILROAD LAND GRANTS.

In my last report I called attention to the necessity for some legislation in reference to lapsed grants. The necessity for such legislation still exists, and I repeat what I said on that subject:

"Congress has from time to time, commencing in 1850, made grants to the several States or to corporations to aid in the construction of railroads. In some instances the roads have been constructed and in others partially completed; but in some cases no attempt has been made to build the roads and thus secure a title to the land. The lands thus granted have been withheld from the operation of the settlement laws. The Supreme Court of the United States has declared, in the case of Schulenburg *v.* Harriman (21 Wallace, 44), that a failure to complete the road within the time fixed in the grant did not forfeit the grant. Lands thus withheld from the operation of the settlement laws must so remain until Congress shall declare such lands forfeited. If it is the intention of Congress to allow the railroad companies to complete their roads after the expiration of the term fixed in the grant, and thus claim the benefit of the grant, it should be so declared at an early day. Large tracts of land are not available for settlement, because the settler cannot determine whether the title is in the government or in the railroad company. If he purchase from the railroad company and it fails to complete its road and secure the title, he takes nothing by such purchase, and he cannot secure the land under the settlement laws, for the Department is not authorized to treat such lands as public lands. Besides this, the even sections within the limits of the grants are subject to cash entry at not less than $2.50 per acre. Thus the settler is sometimes compelled to pay a double price for the privilege of owning lands near a railroad which is never constructed."

It is difficult to make the people understand that the executive department of the Government cannot declare a grant forfeited when the corporation for whose benefit it was made has failed to comply with the conditions thereof. Petitions are presented to the Executive demanding the forfeiture of grants for non-compliance with the conditions thereof. Individual claimants declare themselves outraged because the Commissioner of the General Land Office refuses to allow filings on the odd sections of land within the unforfeited railroad grants. The Government is derided as the government of the rich and opposed to the poor, because the executive department of the Government does not do what the courts have repeatedly declared could be done only by the legislative branch of the Government, that is, declare a forfeiture of a grant.

Complaint is made that grants made more than a quarter of a century ago are still treated as valid, subsisting grants, and the settler forbidden to go thereon, although nothing has been done toward the building of the road, which must be built before the

railroad company can receive the evidence of the title given to it by the Government so many years before.

If the executive department of the Government disregard the law and issue a patent to such settler, he takes nothing by the instrument, and is as much at the mercy of the corporation as if he had not received the Government patent. Congress alone can relieve the settler by declaring the grants forfeited.

If the grants are not forfeited when there has not been a full compliance with the conditions of the grant, it seems to be just and proper that some provision should be made by which the settlers, who, through ignorance, or because they believed such grants had been or would be forfeited, have made settlement on such railroad lands, can secure a title, either through the railroad company or from the Government.

TAXATION OF RAILROAD LANDS.

By section 21 of the act of July 2, 1864 (13 Stat., 356), amendatory of the Pacific Railroad act of July 1, 1862 (12 Stat., 489), it is provided—

"That before any land granted by this act shall be conveyed to any company or party entitled thereto under this act there shall first be paid into the Treasury of the United States the cost of surveying, selecting, and conveying the same, by the said company or party in interest, as the titles shall be required by said company, which amount shall, without any further appropriation, stand to the credit of the proper account, to be used by the Commissioner of the General Land Office for the prosecution of the survey of the public lands along the line of said road, and so from year to year until the whole shall be completed, as provided under the provisions of this act."

By act of July 31, 1876 (21 Stat., 121), substantially the same provision was extended to all railroad companies receiving grants of lands, "unless * * * exempted by law from the payment of such cost."

By the failure of the companies to pay such costs and apply for patents a large amount of lands granted and available for railroad purposes are, under the rulings and decisions of the Supreme Court, as enunciated in Kansas Pacific Railway Company *v.* Prescott (16 Wall., 603) and Railroad Company *v.* McShane (22 Wall., 444), substantially relieved from State taxation, and contribute nothing to the fair support of the burden and revenue of the local governments, and at the same time deny to the General Government the due compensation provided by law for the surveys already extended over a portion of the lands, and the benefit of the enlarged appropriations intended to secure further surveys along the line of the road.

Experience has shown that, instead of aiding the Government and facilitating the survey and sale of the public lands along the routes, and the consequent settlement of the country, the provision has operated to retard such laudable results, and also has served to enable the companies to obtain such valuable parcels of land as they may find speedy profit in selling, thus imposing the full burden of taxation upon their grantees and other settlers who purchase lands in the same neighborhood, while refusing to take the patents for the larger body of less valuable lands upon which such burden would fall in the hands of the companies themselves.

It is earnestly to be desired that some means of adjustment of these grants, as a whole, be provided, or some method devised which shall, under cover of legislative authority, not only remedy the evil suggested, but enable this Department to reach a finality as to the titles to be conveyed to these corporations at the earliest practicable moment, and thus relieve an anxious and excited public feeling, already sufficiently aroused upon the various difficult and complicated questions connected with the administration of this momentous and important branch of public affairs.

To this end I most urgently recommend that the prompt and serious attention of Congress be invited to the foregoing suggestions.

LAND GRANT RAILROADS NOT COMPLETED IN TIME.

[From the Annual Report of the Commissioner of the General Land Office for 1883.]

JUNE 30, 1883.

(For areas granted to these several roads see pages 756 to 763 herein.)

The following tables show the grants for roads not completed in time in cases where the granting acts contain similar provisions relative to conditions or the reversion of lands to the United States. These are classified under the following heads:

1. Where the grant provides that if any portion of the roads be not completed within the time fixed, no further sale shall be made and the lands unsold shall revert to the United States.

2. Where the grant provides that if the roads be not completed within the time fixed, no further patents shall be issued to the railroad company, and no further sale shall be made, and the lands unsold shall revert to the United States.

3. Where the grant provides that if the road should not be completed in time the lands not patented should revert to the United States.

4. Where the grant provides that if the road should not be completed within ten years the lands not patented should revert to the State, and if the State should fail to complete the road within five years after the expiration of the ten years the land undisposed of should revert to the United States.

5. Where the grant provides that if the companies fail to file their assent to the act, or to complete their roads as provided therein, the act shall be null and void, and all lands not patented to the company or companies at the date of such failure shall revert to the United States.

6. Where the provision is that the company should complete a section of twenty or more miles within two years and the entire road within six years.

7. Where it is provided that if the companies make any breach of the conditions of the grant, Congress may do any and all acts necessary to secure the speedy completion of the roads.

Statement showing States to which grants have been made to aid in the construction of rail roads which have not been completed within the time required by law, the grants to which provide that if any of the roads be not completed within the time therein fixed no further sales of the lands granted for such road, or roads, shall be made, and the lands unsold shall revert to the United States.

FORFEITURE OF RAILROAD LAND GRANTS.

(From the annual report of the Commissioner of the General Land Office for 1883.)

The following tables show the grants made to several States and corporations for roads that have not been constructed within the time required by law, classified for reference and convenience under four heads, viz:

1. Where the roads have been completed but not within the time required.
2. Where the roads have not been completed within time but which are in course of construction.
3. Where the roads have been partly completed and construction suspended.
4. Where no part of the roads has been constructed.

Twelve grants fall within the first classification, eight in the second, nine in the third, and twelve in the fourth.

Statement showing States and corporations to which grants have been made to aid in the construction of railroads which have been completed, but not within the time required by law.

State or corporation to which grant was made.	Name of railroad.	Date of act making grant and acts extending time for completion of road.	Statutes.	Page.	Date when road should have been completed.	Number of miles of road completed before expiration of grant.	Number of miles of road completed after expiration of grant.	Total length of road.	Remarks.

INDEBTEDNESS OF THE PACIFIC RAILROADS TO THE UNITED STATES FOR BOND SUBSIDIES TO JUNE 30, 1883.

(See pages 933 to 935.)

[Furnished by Hon. W. H. Armstrong, Commissioner of Railroads, from advance sheets of his annual report for 1883.]

CONDITION OF THE BOND AND INTEREST ACCOUNT.

The public debt statement issued by the Treasury Department, June 30, 1883, shows the condition of the accounts with the several Pacific railroad companies, but takes no account of moneys in the sinking funds held by the Treasurer of the United States, or of the compensation for services not at that time settled by the accounting officers. In the following statement the semi-annual interest which matured July 1, 1883, is included under the heading "Interest paid by the United States:"

Name of railway.	Principal outstanding.	Interest accrued and not yet paid by the United States.	Interest paid by the United States.	Interest repaid by transportation to credit of bond and interest account.		Balance of interest paid by the United States.
				By transportation services.	By cash payment, 5 per cent. of net earnings.	
Central Pacific	$25,885,120	$776,553 60	$23,452,555 27	$4,592,158 25	$648,271 96	$18,212,125 06
Western Pacific	1,970,560	59,116 80	1,668,248 94	9,367 10	.....	1,658,881 94
Union Pacific	27,236,512	817,095 36	24,957,850 41	8,933,292 87	.....	16,024,557 54
Kansas Pacific	6,303,000	189,090 00	6,129,333 09	2,969,049 59	.....	3,160,283 50
Central Branch, Union Pacific	1,600,000	48,000 00	1,549,808 26	152,157 10	6,926 91	1,390,724 25
Sioux City and Pacific	1,628,320	48,849 60	1,464,297 49	121,355 39	.....	1,342,942 10
Totals	64,623,512	1,938,705 36	59,222,093 46	16,777,380 20	655,198 87	41,789,514 39

The total indebtedness of the several subsidized Pacific railroads to the UnitedStates on June 30, 1883, was as follows:

TOTAL DEBT.

Union Pacific (including Kansas Pacific):		
Principal	$33,539,512 00	
Accrued interest	31,087,183 50	
		$64,626,695 50
Central Pacific (including Western Pacific):		
Principal	27,855,680 00	
Accrued interest	25,120,304 21	
		52,976,484 21
Sioux City and Pacific:		
Principal	1,626,320 00	
Accrued interest	1,464,297 49	
		3,092,617 49
Central Branch, Union Pacific:		
Principal	1,600,000 00	
Accrued interest	1,549,808 26	
		3,149,808 26
Total		123,845,605 46

TOTAL CREDIT.

TRANSPORTATION SERVICES PERFORMED AND MONEY PAID INTO THE TREASURY.

Union Pacific:		
Transportation services	$11,902,342 46	
Half transportation applied to sinking fund	1,536,379 10	
Interest on sinking-fund investments	96,318 49	
		$13,535,040 05
Central Pacific:		
Transportation services	4,601,525 25	
Cash payment, 5 per cent. net earnings	648,271 96	
Cash payment, sinking fund	633,992 48	
Half transportation applied to sinking fund	1,650,452 68	
Interest on sinking-fund investments	119,570 70	
		7,653,813 07
Sioux City and Pacific:		
Transportation services		121,355 39
Central Branch, Union Pacific:		
Transportation services	152,157 10	
Cash payment, 5 per cent. net earnings	6,926 91	
		159,084 01
Total		21,469,292 52
Balance in favor of the United States but not due until maturity of principal, 1895–'99		$102,376,312 94

RECAPITULATION.

Due from Union Pacific	$51,091,655 45
Due from Central Pacific	45,322,671 14
Due from Sioux City and Pacific	2,971,262 10
Due from Central Branch, Union Pacific	2,990,724 25
	102,376,312 94

CONDITION OF THE SINKING-FUND ACCOUNTS.

Appendix to this report (Report of Commissioner of Railroads for 1883) gives a detailed statement showing the condition of the sinking-funds of the Union and Central Pacific Companies, respectively, held by the Treasurer of the United States under the act of Congress approved May 7, 1878, from which it will be seen that on June 30, 1883, those funds amounted to $4,036,713.45; the Central Pacific having to its credit $2,404,015.86, and the Union Pacific $1,632,697.59.

Investments have been made by the Secretary of the Treasury as follows:

Character of bonds.	Central Pacific.	Union Pacific.	Total.
Funded loan of 1881, 5 per cent	$736,700 00	$256,450 00	$993,150 00
Funded loan of 1907, 4 per cent	199,100 00	32,650 00	231,750 00
Currency sixes	444,000 00	361,000 00	805,000 00
Principal	1,379,800 00	650,100 00	2,029,900 00
Premium paid	179,563 73	124,065 43	303,629 16
Total cost	1,559,363 73	774,165 43	2,333,529 16

On June 30, 1883, the amounts remaining in the United States Treasury, *uninvested*, were as follows:

Credit of the Union Pacific	$858,532 16
Credit of the Central Pacific	844,652 13
Total	1,702,184 29

That the sinking-fund has not accomplished the result anticipated is quite evident, and may practically be regarded as a failure for want of suitable investment. The last investment for the Union Pacific was made April 6, 1881, at which time a premium as high as 35 per cent. was paid, but the company repeatedly protested against such high rates of premium. Reference to the foregoing table will show that the sum of $650,100 has been invested at a cost of $124,065 43, or an average premium of nearly 20 per cent. On June 30, 1882, the amount in the sinking-fund uninvested was $407,441.99, and on June 30, 1883, it had increased to $858,532.16. This is a manifest hardship to the company, as so large an amount should be drawing a fair rate of interest.

The last investment for the Central Pacific was made November 27, 1882, the sum of $541,800 having been invested in the funded loan of 1881 continued at 3½ per cent., at a premium of 2 per cent. The sum of $1,379,800 has been invested for this company at a cost of $179,563.73. On June 30, 1883, the amount in the sinking-fund uninvested was $844,652.73.

SCRIP.

[See Chapter XXI, pages 289, 290, to June 30, 1880. See addenda, pages 949 to 926, to June 30, 1882.]

TO JUNE 30, 1883.

Total scrip issued by the General Land Office, other than bounty-land scrip for military service, to June 30, 1883, embraces in all 2,949,113.664 acres. The additional scrip issued under various laws, to June 30, 1882, and to June 30, 1883, was as follows:

Scrip issued by surveyor-general of Louisiana, under act of June 2, 1858	219,808.524
Scrip issued by surveyor-general of Florida, under act of June 2, 1858	6,250.000
Scrip issued by surveyor-general of Missouri, under acts of July 4, 1836, and June 2, 1858	283,567.400
Scrip issued by the Commissioner of the General Land Office pursuant to decrees of the United States Supreme Court, under act of June 22, 1860, and supplemental legislation	624,269.220
Scrip issued in satisfaction of the claims of Israel Dodge, Walter Fenwick, and Mackey Wherry, under act of June 21, 1860	15,870.610
Scrip issued in satisfaction of the claim of T. B. Valentine, under act of April 5, 1872	13,316.000
Scrip issued in satisfaction of the claim of Pascal L. Cerre, under act of January 27, 1857	3,004.510
Scrip issued in satisfaction of the claim of Samuel Ware, under act of December 28, 1876	640.000
Scrip issued in satisfaction of the claim of the heirs of Joseph Gerard, under act of February 10, 1855	1,920.000
Scrip issued by surveyor-general of Florida in satisfaction of the claim of Fernando de la Maza Arredondo, under act of May 23, 1828	38,000.000
Scrip issued in satisfaction of the claim of Coleman Fisher, under act of May 14, 1834	640.000
Scrip issued by the recorder of land titles for Missouri, under act of February 17, 1815	174,910.420
Scrip issued under fourteenth article of treaty of March 17, 1842, with Wyandot Indians	22,400.000
Scrip issued by surveyor-general of Louisiana, under act of June 29, 1854	2,671.060
Scrip issued to Charles Gayarré, Louisiana	340.280
Scrip issued for Las Ormigas and La Nana grant	15,372.440
Scrip issued in satisfaction of act of June 1, 1878, for Robert Cole (20 Stat., p. 536)	2,320.000
Warrants issued under act of April 11, 1860—Porterfield warrants (12 Stats., p. 836)	6,133.000
Choctaw scrip issued under treaty of 1830, the greater portion of which has been located and patented:	
Heads of families, 1,159; amount each (acres), 320 — 370,880.00	
Children over 10 years, 1,460; amount each (acres), 320 — 467,200.00	
Children under 10 years, 1,192; amount each (acres), 160 — 190,720.00	
	1,028,800.000
Chippewa half-breed scrip, Red Lake Pembina Chippewa half-breed scrip, and Sioux half-breed scrip	488,880.000
Total to June 30, 1883	2,949,113.464

GRADUATION ACT OF 1854.

[See Chapter XXII, pages 291–962.]

To December 1, 1883.

No change in the chapter as printed on page 962.

COAL LANDS.

To June 30, 1883.

[See Chapter XXIII, pages 292 to 294, to June 30, 1880, and addenda, pages 962 to 969, to June 30, 1882; also "Decisions of Department of the Interior and General Land Office to June 30, 1883," title "Coal Lands."]

The regulations as to entry of coal lands and forms on pages 965–969 are in effect December 1, 1883.

NUMBER OF ENTRIES TO JUNE 30, 1883.

The total number of entries under this act from March 3, 1866, to June 30, 1883, was 283, containing 40,172.97 acres, realizing $623,305.65.

AREA OF COAL LANDS.

The estimate on pages 292 and 293 of the area of the coal fields on the public domain is 5,528,970, and should be increased to 10,000,000, as new discoveries to June 30, 1883, have so increased it. This area will be constantly increased by new developments in the arid regions.

The Commissioner of the General Land Office in his annual report for 1883, speaking of fires in the public coal lands, says:

FIRES IN COAL FIELDS.

The continuous burning for a number of years of extensive coal fields at different points in the Black Hills district of Dakota having been reported to this office, the special timber agent on duty in that Territory was detailed to examine and carefully report upon the matter, which resulted in a thorough investigation of two of the numerous fires now in progress; one, the burning of a vein of coal 21 feet thick, situated in the region of Belle Fourche River, 91 miles northwest of Deadwood; and the other, a vein of coal 24 feet thick in the vicinity of Donkey Creek.

In these two fields the fire has been raging for the known periods of three and five years, respectively, and has originated from some unknown cause where the coal has been exposed by the washing away of the earth. At times the earth over the fire slides down and covers the face of the fire, causing it to smoulder. Pent up gases are thus generated and explode. This, with the settling of the earth from above, forms openings acting in effect like chimneys, and causing the coal below to burn as in a furnace.

The coal croppings show that these fields abound in lignite coal extending many miles. The surface ground is valuable for grazing purposes and grain raising, as well as for coal mining. The fields are of great value to the Government and surrounding country; the value of the same may be compared to equal areas of coal lands in Pennsylvania. In close proximity to these lands are mountains of iron ore of a superior grade destined to furnish a great manufacturing industry for the West.

The agent is of the opinion that excavations around the coal fields, forming a cut-off, would serve to extinguish the fires, and presents an estimate of the probable expense in the two cases examined, recommending that the work be let to the lowest responsible bidder. It has also been suggested that the War Department detail an officer from Fort Meade to make a careful and accurate examination of the matter, aided by competent assistants. Prompt and vigorous measures should be taken to arrest the destruction of these coal fields. This can be accomplished only by a legislative appropriation of funds sufficient for the purpose.

Statement of coal lands from March 3, 1866, to June 30, 1883.

DONATION ACTS.

(See Chapter XXIV, pages 295 and 297, to June 30, 1880; also addenda, page 969, to June 30, 1882.)

To June 30, 1883.

Under the several donation acts to June 30, 1883, the nation has disposed of 3,121,-534.52 acres.

The donations to June 30, 1882, were 3,117,401.73 acres. (See page 969.)

From June 30, 1882, to June 30, 1883, the entries were as follows:

Donation claims for the fiscal year ending June 30, 1883.

States and Territories.	No. of entries.	Acres.
Mew Mexico	2	280.00
Oregon	12	3,532.67
Washington	1	319.79
	15	4,132.46

TOWN-SITE AND COUNTY-SEAT ACTS.

(See Chapter XXV, pages 298 to 305, inclusive, to June 30, 1880. Also addenda, 970 to 978, to June 30, 1882.)

To June 30, 1883.

Under all of the several township and lot acts there has been disposed of to June 30, 1883, 167,871.39 acres.

NAMES OF TOWNS LOCATED PRIOR TO JUNE 30, 1882.

The names, area, and locations of towns entered prior to June 30, 1882, can be found on pages 300 to 305 and 970 to 971.

The entries of town sites during the year ending June 30, 1883, were seventeen, containing 5,076.98 acres.

TOTAL ENTRIES TO JUNE 30, 1883, OF TOWN SITES.

To June 30, 1880, under the town-site acts, there were located, on public lands, 420 towns, containing 144,131.23 acres; from June 30, 1880, to June 30, 1882, there were located 45 towns, with an acreage of 12,626.50 acres; from June 30, 1882, to June 30, 1883, there were located 17 towns, with an acreage of 5,076.98 acres; in all to June 30, 1883, 482 towns, with a total acreage of 161,834.71.

Town-site entries approved during year ending June 30, 1883, by pre-emption division, General Land Office.

Name.	State or Territory.	Acres.	Approved.	Date of act.
Spearfish	Dakota	320.00	July 25, 1882	Mar. 2, 1867

MINES ON THE PUBLIC DOMAIN.

(See Chapter XXVI, pages 306 to 331, inclusive, to June 30, 1880. See also pages 978 to 1015, to June 30, 1882.)

To June 30, 1883.

Under the acts of 1866, 1870, and 1872 there have been patented as quartz, vein or lode, or other valuable deposit mining claims in the several precious metal bearing States and Territories of the public domain, from 1867 to June 30, 1883, 7,209 lodes, containing 67,764.21 acres, and realizing $350,746.00; under the placer acts of 1866, 1870, and 1872 there have been patented in the same localities to June 30, 1882, 1,822 placer claims, containing 156,719.33 acres, realizing $405,266.00; in all, vein and placer, from 1866 to June 30, 1883, patents for 9,031 claims, containing 224,483.54 acres, realizing to the nation $756,012. (See Tables —.)

REGULATIONS IN EFFECT DECEMBER 1, 1883.

The mining regulations on pages 986 to 1015, together with the forms on pages 1013 to 1014, are in effect, and correct to December 1, 1883.

FORMS USED IN MINERAL ENTRIES.

In Effect December 1, 1883.

The data as to mineral-land entries on pages 1013 and 1015, and forms required and procedure in district land office to complete a mining title, are correct to December 1, 1883.

The forms enumerated, from 1 to 11, to be used by applicant when publication is made, and Nos. 1 to 4, after publication, and others, are not furnished by the United States. They can be found in "Copp's United States Mineral Lands," laws, forms, instructions, and decisions, second edition, Henry N. Copp, Washington, D. C., 1882, pages 527 to 548. They can also be found in the "American Mining Code," by Henry N. Copp, Washington, D. C., pages 67 to 87.

MINING ENTRIES AND DETAILS FOR THE YEAR ENDING JUNE 30, 1883.

(From the annual report of the Commissioner of the General Land Office for 1883.)

(N—Mineral Lands Division.)

This division has charge of all entries, claims, and matters arising under the mining and coal-land laws of the United States.

The following statement shows the quantity of mineral and coal lands sold, and the number of entries, filings, &c., therefor, made during the fiscal year ending June 30, 1883:

MINERAL LANDS.

Acres of mineral lands sold		31,520.18
Mineral entries made	2,112	
Mineral applications filed	2,312	
Adverse claims filed	390	
* * * * * * *		
Total acres sold		47,133.00
Mineral contests received		119

The principal work done by this division during the last fiscal year is shown by the following statement:

Mineral patents issued, including the making of plats of surveys		1,750
Coal patents issued		51
Pages of patent record, including plats of surveys made		9,578
Mineral entries examined, including examination of survey plats	2,120	
Mineral entries examined except as to survey	400	
Total mineral entries examined		2,520
Mineral contests finally disposed of		31
Number of letters received and docketed		6,623
Number of letters written		6,023
Number of pages of letter record written		4,856

The above showing of work done does not include the work done in making connected diagrams of the surveys of mineral claims, the preparation of certified copies of papers, the examination of *ex parte* agricultural entries referred to this division upon allegations that the land claimed is mineral, and other miscellaneous work which has to be kept up in the division.

The following statement shows the condition of work in the division at the close of the fiscal year:

Mineral entries unexamined	1,085
Mineral entries examined and in suspended files	986
Mineral entries awaiting examination of survey (about)	400
Mineral contests in files and not finally disposed of	174
Total cases not disposed of	2,645

NOTE.—This statement does not include the *ex parte* agricultural cases in the division suspended upon allegations that the land is mineral in character.

DECREASE IN ANNUAL SALES OF MINERAL LANDS.

During the year ending June 30, 1882, there were 36,768.63 acres of mineral lands sold. The statement for the year ending June 30, 1883, shows a decrease in quantity of 5,248.45 acres. This decrease, it is believed, is due largely to the timely action taken by the Department and the regulations adopted to prevent the fraudulent appropriation of large tracts of public lands as "placers." Soon after the beginning of the last fiscal year applications by an association of persons for patent to a placer claim were, by circular instructions, restricted to one hundred and sixty acres each (see paragraph 8 of circular approved September 23, 1882), and by amendment of December 9, 1882, to said circular, still further precautions were adopted to prevent the wrongful appropriation of public lands as alleged placer claims.

Excepting this decrease in the number of acres of mineral lands sold, the above statements show that the volume of business under the mining laws is steadily growing.

As compared with the year ending June 30, 1882, the increase is shown as follows:

INCREASE DURING THE YEAR ENDING JUNE 30, 1883.

In number of mineral entries made	264
In number of mineral entries examined and suspended	261
In mineral patents issued	452
In acres of coal lands sold	6,978.49
In coal filings made	107
In mineral contests received	91
In letters received	907
In number of letters written in the division	1,013

PROTESTS AGAINST MINERAL ENTRIES.

In a large number of cases *protests* against mineral entries come up with the final entry papers or are filed here after the entries have reached this office. The examination of these protests requires care and takes up considerable time. As they are examined and disposed of in the same order as the entries against which they are filed, this work is not stated separately, but is included in the number of mineral entries examined. These protests frequently present intricate questions of law for consideration, and questions of fact which have to be determined by the taking of testimony. They are often argued by counsel, and frequently the consideration of a single protest will require much labor and time.

OVERLAPPING SURVEYS.

In many of the surveys where there are conflicting or overlapping claims it is a matter of the greatest difficulty to determine some of the questions that arise, and the examination for the purpose of determining the correctness of these surveys has to be made with the utmost care.

PLACER MINING CLAIMS.

TO JUNE 30, 1883.

(See pages 982, 983.)

Statement showing the number of placer claims patented in the several precious-metal-bearing States and Territories of the public domain for the fiscal year ending June 30, 1883.

States and Territories.	No. of placers.	Total acres.	Total amount.
California	70	9,377.81	$23,430 00
Oregon	2	38.06	97 50
Montana	15	751.49	1,897 50
Wyoming	2	1,200.00	1,600 00
Utah	1	16.39	42 50
Colorado	40	3,184.41	8,000 00
Dakota	3	81.52	207 50
Alabama	1	119.62	300 00
Total	134	14,769.30	35,575 00

RECAPITULATION.

(See pages 982, 983.)

From 1867 to June 30, 1883—The results of the various acts.

States and Territories.	No. of placers.	Total acres.	Total amount realized.
California	1,018	100,821.03	$261,114 50
Oregon	69	3,785.83	9,911 50
Nevada	6	2,257.74	5,645 00
Idaho	4	75.87	285 00
Montana	334	20,461.95	52,631 50
Wyoming	9	1,851.95	3,480 00
Utah	8	165.15	630 00
Colorado	322	26,629.63	69,896 50
Dakota	51	450.56	1,372 00

Number of placer claims patented from 1866 to June 30, 1883	1,822	156,719.33	405,266 00
Grand total, vein and placer	9,031	224,483.54	756,012 00

HOMESTEADS.

(See Chapter XXVII, pages 332 to 350, to June 30, 1880; see addenda, pages 1015 to 1046, to June 30, 1882.)

To June 30, 1883.

The regulations and procedure, pages 1017 to 1031, and the forms used in the several entries, pages 1031 to 1046, are in effect December 1, 1883.

GREAT NUMBER OF ENTRIES.

Total entries under the law to June 30, 1883.

From May 20, 1862, date of the law, to June 30, 1883, there were made 608,677 original homestead entries, containing 75,215,104.17 acres. During the same period 213,486 final entries were made, containing 25,917,210.43 acres.

Homesteads to June 30, 1883.

The number of original homestead entries during the year was 56,565, embracing an area of 8,171,914.38 acres, an increase of 11,234 entries and 1,823,769.33 acres over the previous year. Final proof was made on 18,998 entries, embracing 2,504,414.51 acres.

One thousand and ninety soldiers' additional claims were presented, of which 569 were approved and 156 rejected.

RECOMMENDATIONS AS TO AMENDMENT OF THE HOMESTEAD LAWS.

For recommendations of Commissioner and proposed action of Congress on the amendment of the homestead laws, see pages 683 and 1063.

INDIAN HOMESTEADS.

(See pages 1032 and 1045–1046.)

The Commissioner of Indian Affairs, in his annual report for 1883, says of

INDIAN HOMESTEAD ENTRIES.

I again, and for the third time, invite attention to the necessity of legislation by Congress to enable Indians to enter lands under the fifteenth and sixteenth sections of the act of March 3, 1875, extending to Indians the benefits of the homestead act of May 20, 1862, without the payment of the fees and commissions now prescribed by law, or to the necessity of placing a fund at the disposal of the Department which can be used for such payments. I have again submitted an estimate for the sum of $5,000, and, as stated in my last annual report, I trust that Congress will either amend the law so as to allow Indians to enter homesteads without cost to them, or make appropriation of the sum estimated.

In this the Secretary of the Interior, Hon. H. M. Teller, in his annual report for 1883, concurs. He says:

In this I heartily concur. I think when an Indian will settle on land, intending to make it his home, he ought to be encouraged in so doing.

THE RESULTS OF THE HOMESTEAD ACTS FROM MAY 20, 1862, TO JUNE 30, 1883.

Number and area of entries under the homestead acts by States and Territories from May 20, 1862, to June 30, 1883.

States and Territories.	Recapitulation of aggregate entries by States and Territories and acres, from May 20, 1862, to June 30, 1882.				To June 30, 1883.				Recapitulation of aggregate entries by States and Territories and acres, from May 20, 1862, to June 30, 1883.

TIMBER AND STONE ACT.

(See Chapter XXVIII, pages 357 to 359, to June 30, 1880; addenda, pages 1047 to 1087, to June 30, 1882.)

To June 30, 1883.

From June 3, 1878, the date of the act, to June 30, 1883, 456,743.91 acres of timber and stone lands have been sold.

REGULATIONS IN EFFECT DECEMBER 1, 1883.

Instructions to special timber agents, from pages 1053 to 1081, are in effect December 1, 1883. The regulations as to entries and forms, from pages 1084 to 1087, are also in effect December 1, 1883.

TIMBER AND STONE LAND ENTRIES FOR THE FISCAL YEAR 1883.

Two thousand one hundred and one entries, embracing 297,735.50 acres, were made under the timber and stone land act of June 3, 1878, (chiefly timber-land entries), being an increase of 1,373 entries and 202,498.48 acres over the previous year, in the States of California, Oregon, and Nevada, and Washington Territory, to which States and Territory only the act is applicable.

RECOMMENDATIONS AS TO THIS LAW AND ITS ABUSES.

See page 1165 for recommendations as to this law and the frauds committed under it, especially as to the grabbing of the timber lands of the Pacific coast by home and foreign capitalists. Also, see page 684.

SPECIAL TIMBER AGENTS TO DECEMBER 1, 1883.

For list of special timber agents to September 13, 1883, see page 1051 herein. For list to December 1, 1883, see page 1237. These special agents are appointed by the Secretary of the Interior and act under direction of the Commissioner of the General Land Office and aid in the suppression of timber depredations.

RECOMMENDATIONS OF THE COMMISSIONER OF THE GENERAL LAND OFFICE, 1883.

For recommendations of the Commissioner of the General Land Office for the fiscal year 1883, as to the timber lands of the United States, see pages 1165 and 1166; also, see page 684.

GREAT NUMBER OF ENTRIES IN CALIFORNIA IN 1883.

More entries with greater area under this act were made in California in the year 1883 than made in the other three States and Territories to which it applies from 1878 to 1883. These entries were all suspended for color of or actual fraud; in Washington Territory as well.

The Commissioner, in his report for 1883, gives the following in regard to timber trespass:

TIMBER TRESPASS.

Special agents were employed during the year for the protection of the public timber. The number of trespass cases investigated and fully reported was 987. Three hundred and thirty-one criminal actions and two hundred and eight civil suits were commenced. Propositions of settlement were received and acted upon in 154 cases. Five hundred and sixty cases are now pending in the courts, and 294 cases are waiting further investigation and action of this office.

The amount of timber involved in trespass cases investigated was upwards of 300,000,000 feet, at an estimated market value of over $8,000,000 and a stumpage value of nearly $2,000,000.

The amount recovered or paid into the Treasury in cases in which final action has been had was $33,260.59. The amount involved in pending suits is $208,929.28, and the amount due on accepted propositions of settlement $12,736.27.

I found it necessary to cause an investigation to be made of alleged extensive depredations near the Canadian frontier in the State of Minnesota, and anticipate as a result the discontinuance of trespasses from the Canada side.

Agents cannot be sent to such distant points, far from settlements and lines of public travel, without camping outfits and the necessary assistance for making surveys and measurements, all of which involve greater expense than can be continuously maintained under existing appropriations.

FOREST FIRES.

Several reports have been received relative to the destruction of large bodies of timber by cyclones and forest fires. Negotiations are in progress to dispose of fallen and of scorched standing timber in these cases.

Public notices, calling for information of fires and pointing out methods for preventing their spread, have been furnished special agents for posting in timber districts, and these measures and the duties performed by agents in case of fires have been the means of saving much timber during the past year. Ten extensive fires have recently occurred, in seven of which the agents have performed valuable service in checking and extinguishing the same, although greatly retarded in such work on account of the necessary limit placed upon their expenditures.

The appropriation for the timber service should permit the employment of persons under the direction of the special agents to watch against and give prompt notice of fires, and take efficient measures at the first outbreak of a fire to check its progress.

[From the Annual Report of the General Land Office, 1883.]

P.—*Special Service Division.*

In charge of special timber agents.

(See pages 1048 to 1050 for operations for the years 1881 and 1882.)

Since the presentation of my last annual report there has been placed under the direction of what was then known as the Timber Depredations Division, having charge of the special agents appointed to aid in protecting the timber upon the public domain, the supervision of all the special agents appointed to examine and report upon all cases of fraudulent entry of public lands, to examine mineral surveys, and to perform various other duties under the direction of this Bureau. The division is now styled the Special Service Division.

The work performed therein during the past fiscal year is summarized as follows:

Letters received and registered	5,930
Letters written	3,119
Pages of record	2,637

PROTECTION OF PUBLIC TIMBER.

For this branch of the service there have been continuously employed during the greater part of the year twenty-five special agents. Towards the close of the year thirteen additional agents were employed.

The following statements present in brief the results accomplished by these special agents during the fiscal year, the number of cases investigated and reported, the value involved in the same, the amount received and amount still due on account of accepted propositions of settlement, the amount involved in civil suits, and the amount and kind of material involved, and the stumpage and market value of the same:

Statement showing number of timber-trespass cases reported during the fiscal year and action taken.

Cases reported	987
Criminal prosecutions instituted	331
Civil suits instituted	208
Propositions of settlement acted upon	154
Cases awaiting further investigation and action	294
Total	987

Statement showing action taken on propositions of settlement.

Propositions of settlement received		174
Propositions of settlement accepted	85	
Propositions of settlement rejected	69	
Propositions of settlement awaiting action	20	
Total		174

Statement showing number of cases in which legal proceedings have been instituted, and number of cases disposed of, so far as reported to this office.

Civil suits disposed of	36	
Civil suits pending	172	
		208
Criminal suits disposed of	43	
Criminal suits pending	288	
		331
Total number of cases in which legal proceedings have been instituted		539

Statement showing amount and kind of timber, lumber, and other material involved in cases reported to this office during the fiscal year, also showing the estimated stumpage and market value of the same.

Feet of timber	301,140,487
Number of railroad ties	2,485,956
Number of trees	55,583
Number of logs	1,281,648
Number of poles	41,640
Number of sticks of square timber	2,244
Number of cords of bark	2,178
Number of posts	135,256
Number of shingles	900,000
Number of cords of wood	91,669
Number of pickets	33,800
Number of acres of land trespassed upon in which amount of timber is not stated	62,013
Estimated market value of timber above stated	$8,144,658
Estimated stumpage value of same	1,709,824

Statement showing amount involved in cases acted upon, and amount accruing to the Government thereby.

Amount reported paid into court on account of civil suits disposed of	$11,629 52	
Amount involved in civil suits pending, or which have been disposed of, and not reported to this office	208,929 28	
Total amount involved in civil suits instituted		$220,558 80
Amount of fines reported paid in criminal suits disposed of		6,625 61
Amount paid to receivers of public moneys in settlement of accepted propositions	$12,754 73	
Amount due on propositions of settlement accepted	12,736 27	
Total amount involved in propositions of settlements accepted		25,491 00
Amount reported received by receivers of public moneys for timber disposed of		2,250 73
Total amount paid in and involved in suits		254,926 14
Amount of appropriation		75,000 00
Balance in favor of the Government		179,926 14

In considering the above statement due allowance must be made for civil suits pending, in many of which there may be a failure to secure verdicts for the full amount of damages claimed, although in every case where civil suit has been instituted the parties are reported to be financially responsible.

It should also be taken into consideration that reports have been made in 294 cases, which, from lack of sufficient clerical help, are yet unacted upon. The amount involved in these cases would materially increase the figures already given. A considerable portion of the time of special timber agents during the fiscal year has been taken up in investigating cases of alleged fraudulent entries and of illegal fencing of public lands in localities where there was no other agent for that purpose.

Fewer propositions of settlement were accepted during the last fiscal year than during the year previous. This was owing to the abandonment of the policy of establishing a uniform rate of stumpage. Such policy was found to operate in the interest of flagrant violators of the law, and afforded them opportunity to escape on the same terms as innocent or unintentional trespassers.

Therefore the existing policy is not to accept or entertain any proposition of settlement unless there are mitigating circumstances in the case, making it neither just nor proper to institute legal proceedings. In each case the measure of damages to be paid is determined by the circumstances of trespass. The various instructions to special timber agents have been compiled in pamphlet form, giving explicit directions in any case of trespass that may arise, the laws relating to public timber, all circular instructions, rules, and regulations in force under those laws, and forms of reports, affidavits, &c., for their official use.

Several reports have been received at this office relative to large bodies of public timber destroyed by cyclones, and large bodies of burned standing timber. Negotiations are now in progress relative to disposal of the same in order that it may be utilized and saved from waste.

Public notices relative to forest fires have been prepared to be posted by the special timber agents in conspicuous places, which, in connection with the instructions to the agents relative to their duties in case of such fires, has had a most beneficial effect, and has been the means of saving millions of feet of public timber.

Information has been received of ten extensive forest fires since the notices referred to were issued, in seven of which the special timber agents have performed valuable services in checking and extinguishing the same, although they have been greatly retarded in such work on account of the necessary limit placed upon their expenditures. This feature of the service needs special attention, and it is hoped that the next appropriation for protecting the public timber will be sufficient to enable this office to give it the consideration it is entitled to, and to authorize the employment of persons under the direction of special timber agents to watch, and take prompt measures at the first outbreak of a fire to check its progress, which otherwise would gain uncontrollable headway and destroy more valuable timber in one day than is felled in a year.

While much has been effected toward suppressing depredations upon the public timber near the centers of population, and in preventing wanton waste and destruction in such felling and removing of timber as is sanctioned by law for the construction of railroads, and for mining and domestic purposes, the fund has been expended with so much necessary caution in order to maintain the force in the field and provide for possible contingencies and emergencies, that it has been wholly inadequate for the more expensive requirements of the service at remote points.

It has been found necessary to check the depredations upon timber lands of the United States in Minnesota, near the northern international boundary line, committed by parties from the sparsely timbered sections of the Dominion of Canada. Special agents cannot be sent to these far-distant points without proper camping outfit and the necessary assistance for survey and measuring; all of which requires greater expense than could be incurred continuously with the amount appropriated for the timber service.

Much greater vigilance is needed than has been possible with the force of special agents employed to prevent the cutting of timber on the public lands in New Mexico and Arizona to be exported to Mexico and there used in building the railways of that country.

SALES OF TIMBER AND STONE LANDS FOR THE FISCAL YEAR 1883.

[See pages 359 and 1052.]

The results of the stone and timber act to June 30, 1882, can be found on page 1051. The total area to that date was 159,008.41 acres; for the year 1883, 297,735.50 acres; in all a grand total to June 30, 1883, of 456,743.91 acres.

Sales of timber and stone lands for the fiscal year ending June 30, 1883.

States and Territories.	No. of entries.	Acres.
California	1,242	180,799.54
Nevada		
Oregon	132	15,912.52
Washington	727	101,023.44
Total	2,101	297,735.50

TIMBER CULTURE.

[See Chapter XXIV, pages 360–362, to June 30, 1880, and also addenda, pages 1088 to 1103, to June 30, 1882.]

To June 30, 1883.

The rules and regulations on pages 1091 to 1093 are in effect December 1, 1883.
The forms on page 1091 to 1103 are in effect to December 1, 1883.

REPEAL OF THE LAW.

For recommendations as to the amendment of this law, see page 683. For recommendations as to the repeal of this law and for statement of frauds under it, see Mr. Commissioner McFarland's annual report for 1883, cited on page 1164 herein.

AREA ENTERED UNDER THIS LAW.

To June 30, 1883.

The number of first or original entries under this law since its date, March 3, 1873, was 101,358, containing 16,768,076.70 acres, an area about equal to the area of the States of West Virginia and Delaware. The number of final or consummated entries to June 30, 1883, was 500, containing 67,589.46 acres. The statistics are given in full below.

Statement showing the number of timber-culture entries, with areas, made during the year 1883 *in each State and Territory, and recapitulation from March* 3, 1873, *to June* 30, 1883.

DESERT LANDS.

[See Chapter XXX, pages 363, 364, to June 30, 1880; see also addenda, pages 1104 to 1111, to June 30, 1882.]

TO JUNE 30, 1883.

REGULATIONS BLANKS AND FORMS IN EFFECT DECEMBER 1, 1883.

The official regulations given on pages 1104 to 1106 are in effect December 1, 1883.

Also the forms used in and procedure in desert-land entries as given on pages 1106 to 1111.

For the evils growing out of and abuses under this law, see Mr. Commissioner McFarland's annual report for 1883, cited on page 1165, herein; also see pages 684 and 1221.

AREA EMBRACED IN FIRST ENTRIES TO JUNE 30, 1883.

From March 3, 1877, to June 30, 1883, there have been 5,103 entries under this act, containing 1,607,310.22 acres, realizing to the nation, in entry fees, $401,036.62.

FIRST ENTRIES OF DESERT LANDS DURING THE YEAR ENDING JUNE 30, 1883.

The number of entries made under the desert-land act of March 3, 1877, during the fiscal year ending June 30, 1883, is 1,254, embracing an area of 436,633.69 acres, realizing $109,186.91; which is an increase of 271,677.75 acres as compared with such entries made during the previous fiscal year.

Sales of desert lands during the year 1883 *to June* 30, *under the act of March* 3, 1877.

	No. of entries.	Area.
		First entries.
Arizona	71	36,584.78
California	69	23,511.10
Idaho	199	58,562.11
Montana	213	71,315.47
Nevada	2	120.00
New Mexico	129	33,781.67
Oregon	52	13,673.50
Utah	137	34,313.27
Washington	58	25,616.29
Wyoming	324	139,155.50
	1,254	436,633.69

Recapitulation of first entries by fiscal years.

Years.	Entries.	Acres.	Amount.
1877	741	271,604.91	$67,654 69
1878	957	298,586.07	74,168 45
1879	611	164,368.30	40,994 95
1880	546	162,601.29	40,652 63
Total to June 30, 1880	2,855	897,160.57	223,470 72
1881	426	108,560.02	68,378 99
1882	568	164,955.94	
Total to June 30, 1882	3,849	1,170,676.53	291,849 71
1883	1,254	436,633.69	109,186 91
Total to June 30, 1883	5,103	1,607,310.22	401,036 62

FINAL DESERT-LAND ENTRIES.

If all first entries are consummated and the final one dollar per acre paid (twenty-five cents per acre being paid at time of first entry), the nation will realize on the area entered to June 30, 1883, $2,008,346.84. For final desert entries for the years 1882 and 1883 see pasters, "statements of entries for years 1882–'83, facing pages 521 and 521."

PRIVATE LAND CLAIMS.

See Chap. XXXI, pages 365 to 410, to June 30, 1880; also addenda, pages 1111 to 1157, to June 30, 1883.)

ADDITIONAL—TO JUNE 30, 1883.

The addenda, pages 1111 to 1157, brings this chapter, with statistics and map, down to June 30, 1883, and in most particulars to December 1, 1883.

The recommendations on pages 1155 to 1157 of the Commissioner of the General Land Office, taken from his annual report for 1883, are valuable and pertinent.

RECOMMENDATIONS OF SURVEYORS-GENERAL, 1883.

(See pages 1121 to 1125.)

RECOMMENDATIONS OF THE SURVEYOR-GENERAL OF ARIZONA.

J. W. Robbins, surveyor-general of Arizona, in his annual report to June 30, 1883, says:

SPANISH LAND GRANTS.

"This branch of the business of my office necessarily progresses slowly on account of the difficulty of obtaining such evidence as is necessary in determining the merits of the claims presented. This difficulty results from various causes:

First. Within my immediate reach there are no original records in which historic data may be found, or standards for the comparison of handwriting;

Second. The dates of the grants are so far back that it is very difficult to find witnesses who can testify in relation thereto; and,

Third. The description of boundaries given in the original title papers are often so vague that it is almost impossible to fix the location of the tract granted, even when the original title papers are found to be genuine. Several important cases which were before the office on my taking charge are still pending for the reason that the claimants have failed as yet to furnish the necessary evidence, and some very important new claims, among them being the grant to Miguel de Peralto of 300 square leagues, or 1,350,000 acres, have been lately presented, which will require much labor and considerable time in the procurement of evidence and in the investigation thereof.

Of the grants made by the treasury department of Sonora between 1822 and 1854, the original records are to be found in the capitol at Sonora, and in relation to this class of grants there is but little difficulty in obtaining the required archive evidence; but in relation to grants made before 1822 by the Spanish Government there are several places where the ancient records may be found, and which places it may be necessary to visit in order to compare copies with originals and to obtain other proofs necessary in determining the validity of such claims.

Apart from the grants made by the General Governments of Spain and Mexico, many small grants were made by the commandants of presidios under the decree of 1791. Of these no records were kept, save in the local archives of the presidios. The presidios of Tucson and Tubac were located in the present Territory of Arizona, and that of Santa Cruz near the boundary thereof. Under the Spanish Government grants were made by the commandantes of these presidios, some of which have been presented for examination, and more doubtless will be presented; but since, with the abandonment of these ancient presidios, the records perished, there is no archive evidence of these presidial grants in existence, and their investigation therefore is attended with much difficulty."

RECOMMENDATION OF THE SURVEYOR-GENERAL OF NEW MEXICO.

(See pages 1123 to 1125.)

Henry M. Atkinson, surveyor-general of New Mexico, in annual report to June 30, 1883, says of Spanish and Mexican land grants:

PRIVATE LAND CLAIMS.

The following private land claims have been filed during the past year, viz:

No. 192, Antonio Jacques *et al.;* No. 193, Santa Clara Pueblo; No. 194, Elquea grant (refiled); No. 195, Sito de Navajo tract.

Testimony has been taken in a number of cases, and final action had in the following:

Reported No. 130, town of Albuquerque, approved.

Reported No. 131, Juan Pablo Martin, approved.

Reported No. 132, Antonio de Salazar, approved.

Reported No. 133, Antonia Rosa Lujan, approved.

Reported No. 134, San Mateo Spring, approved.

In the latter case four leagues square were claimed, but as the granting decree restricted the claim to one square league it was approved to that extent only.

The transcript in these cases will be forwarded as soon as they can be prepared. The case of (reported No. 117) Juan de Jesus Lucero, grant rejected in 1879, and reopened for the introduction of further testimony, has not been closed, as the parties are slow in introducing their evidence. I am convinced that the grant is a forgery, as shown on the face of the papers.

I again, for the eighth time, call attention to the unsatisfactory results of adjusting these grant titles under the present system. It is all-important that Congress should fix a limitation of time in which all claims of this character should be filed and prosecuted and thereafter barred, and some more safe and speedy method should be provided for their adjudication, as the present one is unsatisfactory and unsafe, both for the Government and claimants.

As to the plans to be adopted I will reiterate the statement made in my last annual report.

(See pages 1123 to 1125 for this.)

MINERAL ON UNCONFIRMED LAND GRANTS.

(See page 1125.)

Mr. Atkinson continues:

There is another feature in these grant cases which I again desire to call attention to, and which should receive the early consideration of Congress; I refer to the right to the mineral on unconfirmed grants.

The local Spanish and Mexican authorities were empowered to make grants for agricultural purposes, but they were not authorized to alienate the right to the mineral; hence the latter was by force of law reserved to the Spanish or Mexican Government, and upon the acquisition of this Territory by the United States the right to the mineral within the limits of these grants became vested in this Government. Yet there is no statutory provision permitting the miner to acquire a right to what mineral he may discover thereon.

There should be some legislation by Congress whereby the Government can realize from the mineral interest in grants and the prospector secure to himself the benefits of discoveries upon tracts of this character, on payment to the claimants the value for agricultural or pastoral purposes of the area claimed as necessarily used in mining, together with such other reasonable compensation for such damages as the proprietors of the grant may sustain in the premises by virtue of an easement to the miners, whereby they can have ingress to and egress from the mines over the lands of the claimants, and the appropriation of necessary timber for mining purposes.

CONDITION OF BUSINESS IN THE PRIVATE LAND-CLAIMS DIVISION OF THE GENERAL LAND OFFICE, JUNE 30, 1883.

For exhaustive statements as to claims pending and business during the year in this division see pages 51 and 52, annual report of the General Land Office for 1883.

CHAPTER XXXVI.

THE NATIONAL PARK.

DECEMBER 1, 1883.

The insertion of a chapter on the National Park is warranted by the fact that it was a portion of the public domain, and a portion of it may be returned to it. It is the largest reservation of the kind in the world, and its being reserved is due to the labor of a few earnest men. The preservation of its curious natural wonders is largely due to Col. P. W. Norris, its former superintendent.

Natural wonders and venerable or interesting relics of architectural value or domestic use on the public domain should be preserved. The Shoshone Falls, on Snake River, Idaho, lie adjacent to surveyed lands; we shall shortly expect some enterprising person to capture the land lying around the falls, aided by some one of the numerous settlement or other disposition laws. Deposits of sulphur, nitrate of soda, and other indispensable elements of war, now disposed of as "valuable minerals," should also be reserved by the Government. Many of the old Indian and Mexican ruins in Arizona, Colorado, New Mexico, and California should be reserved, along with other remains of former civilizations. The big trees of California, such as are on public lands, should also be reserved, as well as hot, sulphur, and other mineral springs, which are scattered over the Western public lands, should also be reserved for the common good.

LOCATION OF THE PARK.

The Park or reservation lies in the northwest corner of Wyoming Territory, extending on the north and west into Montana and Idaho Territories. In or immediately adjacent to it rise Lewis fork of the Columbia River, Snake (or Shoshone as it is commonly known), Green River, fork of the Colorado, flowing into the Pacific Ocean. The Jefferson, Madison, Gallatin, and Big Horn, and other branches of the Missouri and Mississippi, which flow into the Atlantic, also originate within or near its borders.

ITS DISCOVERY.

John Coulter, a sergeant in the expedition of Lewis and Clarke in 1805, after his discharge, along with a portion of the Sheep Eater (Bannock) Indians, explored this region. His description was received with ridicule, and until about 1859 this region was known in derision as "Coulter's Hell."

AREA OF THE PARK.

The Park is an oblong square, 65 miles in length from north to south, and 55 miles wide from east to west, and contains 3,575 square miles, or 2,288,000 acres, or more than the area of Rhode Island and Delaware.

HOW LEGISLATION TO RESERVE WAS OBTAINED.

On December 18, 1871, Hon. S. C. Pomeroy, of Kansas, introduced into the United States Senate a bill for the reservation of a national park near the source of the Yellowstone River. Hon. William H. Claggett, Delegate from Montana, introduced a duplicate of this bill in the House of Representatives about the same time. After reference to the Committees on Public Lands in each body, a favorable report was made by both. Mr. Mark H. Dunnell, of Minnesota, for the House Committee on Public Lands, made the report, and the bill passed the House without amendment. It became a law March 1, 1872. The most urgent advocate of this measure, and the one person who did the most to secure this law, was Doctor F. V. Hayden, who prepared the map, data, and the House committee's report, at the request of Hon. C. Delano, Secretary of the Interior. The act was as follows:

ACT OF DEDICATION.

AN ACT to set apart a certain tract of land lying near the headwaters of the Yellowstone River as a public park.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the tract of land in the Territories of Montana and Wyoming lying near the headwaters of the Yellowstone River, and described as follows, to wit: commencing at the junction of Gardiner's River with the Yellowstone River and running east to the meridian passing ten miles to the eastward of the most eastern point of Yellowstone Lake; thence south along the said meridian to the parallel of latitude passing ten miles south of the most southern point of Yellowstone Lake; thence west along said parallel to the meridian passing fifteen miles west of the most western point of Madison Lake; thence north along said meridian to the latitude of the junction of the Yellowstone and Gardiner's Rivers; thence east to the place of beginning, is hereby reserved and withdrawn from settlement, occupancy, or sale under the laws of the United States, and dedicated and set apart as a public park or pleasure ground for the benefit and enjoyment of the people; and all persons who shall locate, settle upon, or occupy the same or any part thereof, except as hereinafter provided, shall be considered trespassers and removed therefrom.

SEC. 2. That said public park shall be under the exclusive control of the Secretary of the Interior, whose duty it shall be, as soon as practicable, to make and publish such rules and regulations as he may deem necessary or proper for the care and management of the same. Such regulations shall provide for the preservation from injury or spoliation of all timber, mineral deposits, natural curiosities, or wonders within said park, and their retention in their natural condition.

The Secretary may, in his discretion, grant leases for building purposes, for terms not exceeding ten years, of small parcels of ground, at such places in said park as shall require the erection of buildings for the accommodation of visitors; all of the proceeds of said leases, and all other revenues that may be derived from any source connected with said park, to be expended under his direction in the management of the same and the construction of roads and bridle-paths therein. He shall provide against the wanton destruction of the fish and game found within said park and against their capture or destruction for the purpose of merchandise or profit. He shall also cause all persons trespassing upon the same after the passage of this act to be removed therefrom, and generally shall be authorized to take all such measures as shall be necessary or proper to fully carry out the objects and purposes of this act.

Approved March 1, 1872.

SUPERINTENDENTS OF THE PARK.

In 1872 N. P. Langford, esq., of Montana, was appointed superintendent of the Park, but without compensation.

In 1877 Col. P. W. Norris, of Norris, Mich., an indefatigable explorer and mountaineer, succeeded Mr. Langford as superintendent, and so continued until 1882. He opened up the Park to tourists, and laid out and improved paths and roads. His annual reports for 1879, 1880, and 1881 contain much practical information and historical data. The rules and regulations provided under his administration were as follows:

Rules and regulations of the Yellowstone National Park.

DEPARTMENT OF THE INTERIOR,
Washington, D. C., May 4, 1881.

1. The cutting or spoliation of timber within the Park is strictly forbidden by law. Also the removing of mineral deposits, natural curiosities or wonders, or the displacement of the same from their natural condition.

2. Permission to use the necessary timber for purposes of fuel and such temporary buildings as may be required for shelter and like uses, and for the collection of such specimens of natural curiosities as can be removed without injury to the natural features or beauty of the grounds, must be obtained from the superintendent; and must be subject at all times to his supervision and control.

3. Fires shall only be kindled when actually necessary, and shall be immediately extinguished when no longer required. Under no circumstances must they be left burning when the place where they have been kindled shall be vacated by the party requiring their use.

4. Hunting, trapping, and fishing, except for purposes of procuring food for visitors or actual residents, are prohibited by law; and no sales of game or fish taken inside the Park shall be made for purposes of profit within its boundaries or elsewhere.

5. No person will be permitted to reside permanently within the Park without permission from the Department of the Interior; and any person residing therein, except under lease, as provided in section 2475 of the Revised Statutes, shall vacate the premises within thirty days after being notified in writing so to do by the person in charge; notice to be served upon him in person or left at his place of residence.

6. *The sale of intoxicating liquors is strictly prohibited.*

7. All persons trespassing within the domain of said Park, or violating any of the foregoing rules, will be summarily removed therefrom by the superintendent and his authorized employés, who are, by direction of the Secretary of the Interior, specially designated to carry into effect all necessary regulations for the protection and preservation of the Park, as required by the statute, which expressly provides that the same "shall be under the exclusive control of the Secretary of the Interior, whose duty it shall be to make and publish such rules and regulations as he shall deem necessary or proper"; and who, "generally, shall be authorized to take all such measures as shall be necessary or proper to fully carry out the object and purposes of this act."

Resistance to the authority of the superintendent, or repetition of any offense against the foregoing regulations, shall subject the outfits of such offenders and all prohibited articles to seizure, at the discretion of the superintendent or his assistant in charge.

P. W. NORRIS,
Superintendent.

Approved:
S. J. KIRKWOOD,
Secretary.

Colonel Norris was succeeded in 1882 by P. H. Conger, the present superintendent.

REFERENCES.

For a complete and thorough description—physical and scientific, with much historical data—of the Yellowstone National Park, see volume 12, Annual Report of the United States Geo logical and Geographical Survey of the Territories, F. V. Hayden, United States Geologist, in charge, in two parts, with an atlas. Washington, 1883. The illustrations and letter-press are exhaustive, and the preparation of the several divisions of the work was done by experts under Dr. Hayden's immediate direction and observation. Also, see guide-books and Northern Pacific and Union Pacific Railroad guides. Also, see reports of Superintendent of National Park for 1879, '80, '81, '82, and 1883. Also, see "Calumet of Coteau." P. W. Norris, J. B. Lippincott & Co., Phila., 1883, page 235, and following, for data as to discovery and explorations of the Park.

DISTANCES IN THE PARK.

To illustrate the size of the reservation and the distance between points of interest, the following data from the Report of the Secretary of the Interior for 1881 is given:

Lower Ford of Pelican Creek	3	31
Foot of the Yellowstone Lake	3	34
Passamaria or Stinkingwater bridle-path.		
Concretion Cove to Turbid Lake		3
Jones' Pass of the Sierra Shoshone Range	7	10
Confluence of the Jones and Stinkingwater Fork of the Passamaria River	12	22
Nez Percé bridle-path.		
Indian Pond to Pelican Valley		3
Ford of Pelican Creek	3	6
Nez Percé Ford of the Yellowstone	6	12
Alum Creek bridle-path.		
From the Great Falls of the Yellowstone, via Crystal Falls and Grotto Pool and the Upper Falls, to the mouth of Alum Creek	4	4
Terrace Mountain Trail.		
Headquarters at the Mammoth Hot Springs, amongst the numerous active and extinct Mammoth Springs, to foot of the Ancient Terraces		1
Up steep pine, fir, and cedar clad terraces, to summit of the mountain	1	2
Along the range of the vertical cliffs, for 400 to 800 feet high	2	4
Descent of South Terrace to Rustic Falls, 40 feet high, at the head of the impassable cañon of the West Fork of the Gardiner River	1	5
Upon the southern cliff, above these falls, is a Sheepeater arrow-covert, and the remains of an ancient game-driveway thereto.		
Swan Lake, on the Fire Hole road	1	5
Trail to the Falls of the East Gardiner River.		
From the road near the middle of the cañon along the eastern declivity, one mile		1
To the fall, not unlike the famous Minnehaha, and like which, allows a safe pathway between the sheet of water and the wall rock.		
Monument Geyser Trail.		
Foot-bridge at head of the cañon of the Gibbon, which ascends nearly 1,000 feet within a distance of one mile, some portions of which are exceedingly difficult for a horseman, and hence called a trail		1
The active and the extinct and crumbling geyser cones are alike uniquely interesting, and the outlook remarkably beautiful.		
Trail, or foot-path, to head of the Great Falls of the Yellowstone.		
Leaves at the lower end of the camping ground above, and descends 500 or 600 feet within one-fourth of a mile to the pole-bordered outlook at the very head of the cataract.		
Trail to the Yellowstone River below the Lower Falls of the Yellowstone.		
This trail descends Spring Run from the rustic bridge nearly to its waterfall, thence along the steep declivity beneath Lookout Point in a winding, dangerous way, to the foaming river, which cannot now be ascended, along it, as formerly, to the foot of the falls upon this side; but can be reached upon the other, via the timber-fringed gorge.		
The main danger is from detached fragments of rock, which attain incredible volocity before reaching the river.		
Besides these trails there are several others to fossil forests, cliffs, geyser or sulphur basins or falls, which will be fully noted in the forthcoming guide-book of the Park.		

Recapitulation of distances, roads, bridle-paths, and trails within the Park.

ROADS.

	Miles.
1. Road to the north line of the Park, towards Bozeman, about	7.00
2. Direct road to the Forks of the Fire Hole Rivers	36.00
3. Road from Forks of the Fire Hole Rivers to the foot of the Yellowstone Lake, about	30.00
4. Branch road from Sage Creek to Alum Creek	4.00
5. Tower Falls road, about	21.50
6. Geyser Basin road	11.00
7. Madison Plateau	24.00
8. Madison Cañon	18.00
9. Queen's Laundry	2.50
	153.00

BRIDLE-PATHS.

1. Middle Gardiner	7.00
2. Painted Cliffs	3.00
3. Paint Pots	11.00
4. Mount Washburn	15.00
5. Grand Cañon from the Forks, about	16.00
6. Shoshone Lake	33.00
7. Mines, to Clark's Fork, about	27.00
8. Hindoo or Goblin Mountain	29.00
9. Fossil Forest	34.00
10. Passamaria	22.00
11. Nez Percé Ford	12.00
12. Alum Creek	4.00
	213.00

TRAILS.

1. Terrace Mountain	6.00
2. Falls of the East Gardiner	1.00
3. Monument Geyser	1.00
4. To head of Great Falls of the Yellowstone, about 200 yards.	
5. To river below the Great Falls of the Yellowstone, 200 yards.	
	8.00

Superintendent Conger, in his report dated October 1, 1882, calls attention to acts of—

VANDALISM IN THE PARK.

I have hardly the patience to discuss this subject without passion. The most of the depredations committed seem to me so entirely purposeless that I am unable to conceive the cause that impels men and women to wantonly destroy, purely for destruction's sake. What are we to think of a man that will pack long poles, as heavy as he can carry, a great distance, for the purpose of thrusting them into the cone and down the throats of these great geysers, when the only possible effect must be to obstruct their flow and mar their beauty? This is done repeatedly, although I have neglected no opportunity to warn, admonish, and entreat all tourists whom I have met in the Park not on any account to do so. I have also by published order forbidden the collection of any specimens, and cautioned all persons having occasion to build a fire in the Park to be certain to extinguish the same before leaving camp. But, notwithstanding all this, tourists go into the Park with iron bars and picks secreted in their wagons, with the express intent to disregard the law and defy the Superintendent. The cones of the great geysers are already badly defaced, and vast tracts of the beautiful forests that adorn this Wonder-Land are laid waste by fire annually through the wanton carelessness and neglect of visitors.

Another source of great annoyance are the hunters in the Park. I am sure you will agree with me that it is not possible for a single gamekeeper to guard so vast a territory as the National Park and prevent the breach of the laws in regard to the killing of game. When we consider the temptation, and the opportunity which these vast solitudes afford, we need not wonder that the laws are broken and the orders disobeyed. But I leave it for the superior wisdom of the honorable Secretary of the Interior to suggest some remedy for these evils.

APPROPRIATIONS FOR THE CARE OF THE PARK.

Congress each year makes an annual appropriation for the care of the Park. It is expended subject to the approval of the Secretary of the Interior. Men are employed to watch, drive out marauders, and to open new roads and paths. Mr. Conger, in his last report, speaking of the annual allowance for care of and opening the Park, says:

In this connection I would call the attention of members of Congress to the fact that heretofore the annual allowance for all purposes in the Park has been only $15,000; and I beg them to inquire of themselves how far this sum would go toward building and repairing the roads in their State or district, and also to bear in mind that this Park is on the top of the Rocky Mountains, and that everything that enters into use there costs at the least twice as much as the same would cost in almost any of the States.

PRIVILEGES GRANTED IN THE PARK.

Details as to this lease can be found in Senate Ex. Doc. No. 10, second session Forty-seventh Congress, being a letter of the Secretary of the Interior of December 11, 1882, transmitting to the Senate, in response to a resolution of December 7, copies of agreements with certain parties for privileges in Yellowstone Park. Also see—

Senate Ex. Doc. No. 48, second session Forty-seventh Congress, being a letter from the Secretary of the Interior of date January 16, 1883, in response to Senate resolution of January 9, transmitting copies of all letters and communications in regard to the contract made by him with certain parties for granting privileges in and leasing portions of the Yellowstone National Park.

RATES AND FARES TO AND IN THE PARK.

Round-trip tickets from Ogden, Utah (Union Pacific Railroad), over the Utah and Northern Railroad to the Park and return are sold at $45 each. At Beaver Cañon connection is made with Bassett Brothers Tourist Line for the Park. Distance from Beaver Cañon to Fire Hole Basin is 100 miles over a good mountain road. Time required for the trip is two days (stopping over night), and fare for round trip is only $25.

The Park Branch of the Northern Pacific Railroad is now open. It leaves the main line at Livingston, Montana, so that tourists can go all the way to the border of the Park by rail. No railroad is permitted to enter the Park.

Stages will convey them from the railroad terminus to the new hotel at Mammoth Hot Springs, where carriages, guides, and saddle-horses will be furnished for visiting all the many wonderful features of this great pleasure-ground of the nation. The rate of fare from Saint Paul, Minn., to Mammoth Hot Springs and return is about $90.

Tourists who desire to camp out can hire tents and camp equipage and engage guides at Mammoth Hot Springs.

ROUTES TO THE PARK.

Superintendent Conger, in his report for 1882, says:

The tourist desiring to visit the Park, who may be, we will say, at Chicago, has his choice of either of the great Pacific railroads. The Union Pacific via Omaha to Ogden, thence by the Utah Northern to Beaver Cañon, where he takes stage or private conveyance up the valley of the Snake River to the Lower Fire-Hole Basin, a little over 100 miles from the railroad. Or he can take the northern route via Saint Paul and the North Pacific to Livingstone (Benson's Landing), from whence a branch road is to be built, I am informed, early next season, to the borders of the Park near my headquarters, 65 miles from Livingstone

GUIDE-BOOKS TO THE PARK.

The most exhaustive guide-book to the Park can be found in the work entitled the "Calumet of the Coteau." Also, see the guide-book published by the Yellowstone National Park Improvement Company, and by the various railroads leading to the Park.

ACCOMMODATIONS FOR TRAVELERS.

The Yellowstone National Park Improvement Company, of which Mr. Rufus Hatch, of New York, is president, under a lease from the Secretary of the Interior, as provided by law, has erected hotels and other accommodations for the use and benefit of tourists. The hotel at Mammoth Hot Springs is under the management of this company.

Under the terms of the lease the Secretary of the Interior must approve the rates and charges made by the Yellowstone National Park Improvement Company. The following are the approved rates:

Stage-route fares, Yellowstone National Park Improvement Company.

[Single trip rates.]
